Martinez Club.—The Martinez Gun Club will hold its first shoot of the season on the ranch of Fred K. Burnham in the Alhambra valley next Sunday afternoon at 2 o'clock. It will be a handicap shoot for a silver cup offered by the club. The organization has accepted challenges from Sacramento and San Jose for meets during the spring.

* * * *

Trade Notes.—At the Rodeo Gun Club, Salinas, California, March 12th, O. N. Ford of San Jose was high over all with a score of 99x100, and M. O. Feudner was high professional, 91x100, both using the shells with "steel where steel belongs," Mr. Ford making a run of 75 straight.

At Ogden, Utah, March 17th, E. R. Morgan of Salt Lake City won high professional average, 146x150, using Peters shells.

At the Saratoga Blue Rock Club, Saratoga, Cal., March 18th, high amateur average was won by O. N. Ford of San Jose with score 129x150 and Geo. H. Anderson of San Jose third amateur average, breaking 123. Both of these gentlemen shot Peters shells.

PANAMA LURES TARPON FOLLOWERS.

The sport of "a thousand thrills" has charmed connoisseurs in the realm of angling from the days of Simon Peter to Isaac Walton, and from Isaac Walton to our H. D. Snyder, president of the Panama Canal Tarpon Club. Every new year brings its devotees new surprises and new delights. The year 1916 is already presenting the latest in ichthyology—or rather is offering the time-honored sport in brand-new territory. The canal zone of Panama is destined to be known as the new tarpon country. Thousands of ardent rodster-tourists have visited the great canal, and have gone their way all unaware that the gigantic locks, the famous spillway, the tropic streams, the bays, were flaunting before their unseeing vision a siren's lure that would bring them back on annual pilgrimages after the newness of the great engineering feat of the ages has ceased to attract.

For the lure of angling for tarpon is real, and insistent. And 2000 miles is really an insignificant distance for a yacht cruise in quest of the "bucking broncho of the sea." A six-day run on direct steamers from New York, five from New Orlens, brings one from the snow and sleet and rigor of the northern winter to bask gratefully beneath skies aglow and gleaming with the warmth and the magic of Panama. He who in times past has come to the isthmus to escape for a while the rush and the bustle of northern existence, and to view for himself the greatest monument of man's engineering acumen, has been prepared by a bibliography already extensive; but not so well advertised have been the phenomenal attractions of the republic as a hunting country.

Not for long can a land so luxuriant in vegetable and animal life remain obscure. Scientists are studying the flora and fauna of the isthmus, and within the year their reports will reveal some startling surprises regarding our newly acquired territory. Certain it is that none of the famous hunting grounds in the North American continent present such a variety of game to the square mile, or where sportsmen may revel amid surroundings more beautiful, under bluer skies, or where the gorgeous cloud effects are so far beyond compare. For here, in this unbroken expanse of primeval wilderness roam the white-tailed deer, the jaguar, the tapir, the agouti, the porcupine, the mangoe cat, the puma, the ocelot, the collared peccary, the corbina and Spanish mackerel—they are all here, but he best of them is a Satyr to Hyperion compared with the lordly tarpon, that beautiful, wildly-leaping creature of the sea, whose knowledge of aviation and gymnastics has long since placed him in the piscatorial hall of fame. That day is passed when fishermen need cruise 4000 miles for successive seasons to catch tarpon, without getting a single strike. They are in the Charges in dozens, in Gatun lake in hundreds, and the pools below the spillway is their sporting rendezvous. Panama sportsmen have been experiencing all the thrills and joys of game fishing on the isthmus for at least four years. There are occasional let-up days, when they can get away from work, and inasmuch as summer weather and the top o' fishing both continue the whole year through, these breathing spells permit of a fairly regular distribution of happy hours and days for enjoyment of the famous pastime. One common mistake has not been committed, that of overlooking the necessity for suitable provision for the protection and propagation of the fish. On January 27, "the powers that be" issued the following edict, and the vigilance of Uncle Sam will insure its enforcement:

"Effective at once, fishing in the Charges below the spillway at Gatun will be permitted only with a rod and reel, and the use of hand lines, spears, nets, seines, dynamite or other means, is prohibited. Nets and seines may be used, however, for the purpose of obtaining bait. All others than old employees in canal service will be required to have a pass, unless accompanied by an old employee. The superintendent of Gatun locks is authorized to issue passes."

o

FORD'S HIGH AVERAGE QUESTIONED.

San Francisco, Cal., Mar. 20, 1916.

Friend Reporter, Breeder and Sporsman:

A short while ago there appeared in one of the dailies and I think in your Breeder and Sportsman, an account of Mr. O. N. Ford being the high average man for California for the year 1915 and also claiming the highest average ever made in California on registered targets.

Now, if you will consult the Interstate Association report for 1915 you will see that J. I. Weisser of National City is the "High Average Man," having made .9685 to O. N. Ford's .9505.

Now, another thing: Some one has referred to the shooters in their write-up as Tar Hawks. The originator of this cognomen used it as a name for the Blue Rocks. He wrote up the Pacific Coast Handicap for one of our San Diego papers. He referred to the shooting grounds as "Dirt Bird Roost" and said that "Down at Dirt Bird Roost if a shooter pointed his Sky Hook right he stopped the flight of the Tar Hawk." Now if you or your friends, and also Mr. O. N. Ford, want to use these expressions, use them in the way that they were originally meant and you won't get in "Dutch."

Yours truly,

SAN DIEGO.

Friend "San Dieg.":

Glad to hear from you. The Breeder and Sportsman welcomes communications pertaining to matters of interest to sportsmen. We stand for the promotion of the best interests of the trap-shooting sport and do our best at all times to boost it along.

We regret to note that you have a grievance. You seem to be gunning for O. N. Ford. You misstate facts, however. O. N. Ford was the high average amateur of California for 1915, as was stated by the Breeder and Sportsman. It is true that J. N. Weisser of National City turned in the creditable average of .9685 but you must consider that Mr. Weisser shot at only 350 targets in registered tournaments. Now, it is a rule of the Interstate Association that a competitor must shoot at 2,000 targets or over in order to secure an average. Mr. Ford achieved his average of .9505 in 2,830 targets. You can readily see that Mr. Ford is entitled to all the honors that have been conferred on him, as Mr. Weisser took his average in only 350 targets.

Relative to making use of the term "Tarhawks," I can only say that the creator would hardly register an objection in others using it. It seems very appropriate to us to label shooters "tarhawks" but if you protest we will in the future be careful and name only the harmless blue rocks as such.

Let us hear from you again, San Diego, and let's all get together and pull for the "sport alluring."

Yours, [Ed.]

o

Astoria Club.—The members of the recently organized Astoria Rod and Gun Club held a most enthusiastic meeting at the Chamber of Commerce last week, the main topic of discussion being the new trapshooting grounds to be located near Astoria. The Astoria organization plans to make trap shooting one of the most popular sports in connection with the activities of the club.

After talking over the matter, the club members appointed Nace Grant and Charles Burlingame a committee to secure the grounds for trap-shooting. The grounds will be located as near the city as possible and it is proposed to secure the best equipment for these grounds of any club in the northwestern part of the state. Charles Ungerman and Johnny Merila were named to purchase the traps to be used by the Astoria Rod and Gun Club members.

Keen interest is being displayed in trap shooting and it is thought that many of Astoria's lady sharpshooters will be familiar figures on the club grounds. The club last evening appoined J. Erickson, W. A. Harrison, Jack Bay and Charles Anet on the hunting committee.

Before taking an adjournment until Tuesday evening, March 28th, the members of the Astoria Rod and Gun Club nominated the following honorary members to the organization: A. A. Anderson, Ed. Lapping, J. R. Hinman, Leland R. Gilbert, L. R. McCullough, M. R. Pomeroy, C. W. Loughery, John Larson and W. M. Peters.

The present officers of the local sportsmen's association were nominated to head the newly organized club, and the election will be held at the next meeting. The officers nominated are: Chas. V. Brown, president; Chas. Lankester, 1st vice-president; Chas. Humphreys, 2nd vice-president; Chas. A. Burlingame, 3rd vice-president; Chas. R. Higgins, treasurer; A. W. Kinney, secretary.

Executive committee: C. W. Stewart, chairman; William McMullen, A. J. Reed, Dr. F. Vaughn, Jalmar Erickson, Arthur Grimberg, Enos Burlingame, L. R. Marsh.

* * * *

Bass at Tiburon.—The Raccoon Straits have been the scene of striped bass activities for the past couple of weeks. Rodsters have worked along the Angel Island shore and Tiburon with pleasing results. Bass, ranging in size from three to eighteen pounds, have been landed. Experts declare that the striped bass take the spoon better at the last of the flood tide and there is not much use trying at other times.

53,000,000 Fish Liberated In 1915

FISH AND GAME COMMISSION CARRYING ON WORK

While California has today a larger variety of fresh and salt water game and edible fishes than any other state, she is much indebted to the eastern and middle states for a good many of her fishes. California has drawn largely upon nearly every other state having native game and food fishes. She has introduced these fishes either through exchange with other states or through the medium of the United States Bureau of Fisheries.

While it is generally accepted that when the first white man came to this state he found the lakes and streams alive with fish, such is not the case, for they found fish only in the ocean, bays and streams up to the first water falls, and, with a very few exceptions, they were fish of inferior quality. Since then the state and federal governments have introduced many valuable and interesting varieties.

The Hudson river supplied us with our shad, Germany and Japan our carp, New Jersey our striped bass, Mississippi and New Jersey our catfish, Maine the Atlantic salmon, Vermont and Michigan the black bass, Illinois the Warmouth bass, sunfish and crappie; the great lakes the Mackinaw trout, Michigan the loch Leven trout, Illinois gave us the yellow perch, United State Bureu of Fisheries the white fish and brown trout, New Hampshire the Eastern brook trout.

Hundreds of millions of the imported species have been artificially propagated at our hatcheries. They have been planted and transplanted to practically every bit of living water, so that today there is no locality in the civilized world that affords a greater variety of sport than the waters and mountains of California. The national convention of fish and game commissioners at their meeting in San Francisco in 1915 proclaimed California to be twenty years in advance of any state in the Union in the matter of propagation and protection of fish.

Independent or aside from the immense sums derived from our commercial fishes, the aggregate food value of anglers' catches will run into many thousands of dollars. It proves as nothing else can the direct and practical benefit following intelligent fish culture work, for which, in California, the angling and commercial licenses pay all the cost.

In 1915 the State Fish and Game Commission liberated nearly 53,000,000 fish, of which 36,000,000 were salmon, thus benefiting the entire public at the expense of those who buy an angling and commercial fishing license. A steady growth in marine fisheries protective legislation is being made as its needs are better understood.

The striped bass is conceded the most important and most successful of our introductions. They were introduced in 1879. Considering the small number of fish introduced, 885, and their remarkable increase in a few years, the results obtained from the introduction of these fish into California is one of the great feats of acclimitization of fish in the history of fish culture. In 1889 they were on sale in San Francisco markets, and from 1889 to 1892 the number caught and sold increased 250 per cent. Over 2,000,000 pounds of striped bass have been marketed in one season in San Francisco. This does not include the amount sold in other markets. The striped bass is one of the finest food and game fishes in the United States, and if the California Fish and Game Commission had not succeeded in acclimatizing any other variety of fish the value of the striped bass alone would more than repay the people for all the money spent in introducing other species.

The black bass, both large and small mouth, were introduced in 1874. They have thrived in a most remarkable manner. Henshaw, the greatest authority on these fish, states they are the gamest fish that swims. They are to be found in considerable numbers in the lakes, rivers and sloughs of California.

The catfish were introduced from the Mississippi valley and New Jersey in 1874, several species being imported. These were planted in the sloughs and rivers of the Sacramento and San Joaquin. They have increased very rapidly, and for some years we have been exporting dressed catfish to the places from whence they came.

The yellow perch, green sunfish, blue gill sunfish and crappie were introduced in 1891, and again in 1908. They are now to be found in large numbers and are increasing very rapidly.

An imported fish that has thrived in the most remarkable way in our waters, but one whose food value is greatly underestimated in California, is the shad. This fish was introduced in 1891, and has increased until now it is one of the most common and abundant of fishes in our waters. The shad is considered by many piscatorial connoisseurs to be the most delicious of all fish, but the average Californian has yet to find this fact out. The Delaware shad, not one bit superior to the California shad, sell in the Eastern markets at $1 to $1.50 each, yet these fish go begging in this state at 25 cents and less each. The shad are diminishing on the Atlantic coast at an alarming rate.

In an effort to repay the East in some measure for what she has done for California arrangements are now being made whereby the California Fish and Game Commission will repay their debt of many years ago by supplying shad eggs to restock the depleted Eastern waters.

Lack of knowledge in the preparation and cooking of shad is largely responsible for the unpopularity on thiscoast. This is also true with reference to the lowly and much despised carp. The State Fish and Game Commission is now compiling a booklet on California fish and modes of preparing and cooking them, which will do much to lower the cost of living.

The Eastern brook or speckled trout were first introduced into California in 1872. Millions of these fish have been artificially prapagated and distributed by the California Fish and Game Commission. They are now found in large numbers in every county of the state having suitable waters.

The Ike trout, also known as Mackinaw, the Loch Leven or Scotch trout, and the German Brown, were introduced into California in 1984 and are now to be found in abundance in the lakes and streams of this state. Millions are propagated and distributed in the public waters annually.

A great many other, but less important, species of fish have been introduced into this state with more or less success.

The state of Maine estimated the value of its sport at $15,000,000 in 1914. California's sport is worth fully as much and is increasing so fast that it would be a bold man, indeed, who would venture to predict the limit in the next few years.—Sacramento Union.

THE BEST LINIMENT

OR PAIN KILLER FOR THE HUMAN BODY

Gombault's Caustic Balsam

IT HAS NO EQUAL

For —It is penetrating, soothing and healing, and for all Old Sores, Bruises, or Wounds, Felons, Exterior Cancers, Boils **the** Corns and Bunions, **Human** CAUSTIC BALSAM has no equal as a Liniment. **Body**

A Perfectly Safe and Reliable Remedy for Sore Throat, Chest Cold, Backache, Neuralgia, Sprains, Strains, Lumbago, Diphtheria, Sore Lungs, Rheumatism and all Stiff Joints

We would say to all who buy it that it does not contain a particle of poisonous substance and therefore no harm can result from its external use. Persistent, thorough use will cure many old or chronic ailments and it can be used on any case that requires an outward application with perfect safety.

DOUBLE SERVICE Automobile Tires

Guaranteed 7,000 Miles Service

Absolutely Punctureproof

Double Service Tires are made double the thickness of the best standard make tires.

This 100% greater wearing surface naturally gives that much more mileage and service. The average of 12 miles of tough fabric and one inch surface tread rubber makes these tires *absolutely punctureproof*.

These tires excel all others for use in the country over rough and rugged roads as well as on hard pavements. They are as easy riding and resilient as any other pneumatic tire—the air space and pressure being the same.

They are the *most economical* and "care free" tires made and are used where tires must be depended on and tire troubles cannot be tolerated. Many *Double Service* style tires are in use in the U. S. government and European War service.

Our output is limited to a certain amount, but for a short time we offer the following reduced special prices as an Introductory Offer:

PRICES

Tires	Tubes		Tires	Tubes
30x3 in.	$ 8.60	$2.30	36x4 in.	$17.45	$4.65
30x3½ in.	10.85	3.10	35x4½ in.	21.20	5.60
32x3½ in.	12.75	3.20	36x4½ in.	22.50	6.75
33x4 in.	15.75	4.20	37x4½ in.	23.60	6.20
34x4 in.	16.70	4.35	37x5 in.	26.30	6.60

All other sizes not included in above list also furnished. Non-skids at 10% additional.

Terms: Payment with order at above special prices, a 10% discount allowed on orders for two or more tires. All personal checks must be certified.

Try these tires now and be convinced of their very high qualities. Sold direct to the consumer only.

Descriptive folder upon request. Write for it.

RACE TRACK FOR SALE.

The Ukiah race track, located a little less than a mile from the Court House at Ukiah and bounded by the State Highway on the west, the county road on the south, and the Northwestern Pacific Railroad nearly the entire length on the east side of the track. The property consists of twenty acres. Fifty-nine good box stalls, good grandstand, fencing in good order, and one of the best half mile tracks in the state. An excellent winter track and an ideal place to work horses during that season. Plenty of adjoining drives for jogging horses. Two wells on the premises as well as water from the city water works, with tanks conveniently arranged for sprinkling.

This is the only race track in Mendocino county and the location of the county fairs. Ukiah is the county seat and has a population of about 3000, is in a most fertile valley in which all kinds of fruit, vegetables, hay, grain and hops are grown. Has excellent water; no malaria or mosquitos. It has paved streets, good sewerage, and splendid gas and electric light works. There are many standard and thoroughbred horses in this county and the people are a race loving lot. This property is offered for sale at a less price than adjoining property is held at. For terms and further particulars address

COLT DISTEMPER

You can prevent this loathsome disease from running through your stable and cure all the colts suffering with it when you begin the treatment. No matter how young, SPOHN'S is safe to use on any colt. It is wonderful how it prevents all distempers, no matter how colts or horses at any age are "exposed." All good druggists and turf goods houses and manufacturers sell SPOHN'S at 50c and $1 a bottle; $5 and $10 per dozen. All druggists and manufacturers.

SPOHN MEDICAL CO., Goshen, Ind., U. S. A.

Makes Them Sound SMITH'S WONDER WORKER Keeps Them Sound

Allays fever and inflammation at once, this must be done to effect a cure. UNEXCELLED AS A REMEDY for bone and bog spavins, curbs, splints, ringbones, capped hocks, shoe boils, wind puffs, thoroughpins and bunches of all kinds, bowed, strained and ruptured tendons, shoulder, hip and stifle lameness, weak joints, sweeny, cording up, throat trouble and rheumatism. Relieves pains and soreness without loss of hair or a day's let up. As a leg and body wash it has no equal, invigorates and restores the distressed horse between heats and after hard workouts.

Price $1.50 per bottle, prepaid on receipt of price. $12.00 per doz.; $7.00 per half-doz.; $8 per gal. F. O. B. Tiffin, Ohio.

GUNCRAFT

By W. A. Bruette

A modern treatise on guns, gun fitting, ammunition, wing and trap shooting.

The theoretical side of the subject has been covered with a scientific accuracy which makes it an up-to-date book of reference, and the practical side of wing shooting, gun fitting, the master eye, defects in vision and other important questions have been treated in a way that will enable either the expert or the amateur to determine if he is shooting with a gun that fits him and how to decide upon one that does. It will enable him to ascertain why he misses some shots and is successful with others. The secrets of success in trap shooting, as well as the peculiarities in flight of the quail, the jacksnipe, the woodcock, the ruffed grouse, and the duck family, are illustrated by drawings and described in a way that will facilitate the amateur in mastering the art of wing shooting.

SAVE-THE-HORSE

TRADE-MARK REGISTERED

Use It Firts and You'll Not Have to Use Any Other After

Save-the-Horse has stood alone and unique among veterinary remedies for twenty years.

Our Answer Gave Him Hope

San Leandro, Cal., Sept. 14, 1915.

Troy Chemical Company, Binghamton, N. Y.

Dear Sirs: It is a long time since I corresponded with you. I thought several times to write, but kept from doing so because I wanted to be sure not to give any false report of what Save-the-Horse has done. It is surely all you claim. It has actually done wonders for my black mare, Phoebe. She was foundered so bad that neither I nor anybody else who looked at her, ever thought that she would walk again.

I was told to kill her for the chickens, but could not bear to do so. I wrote you, and your answer gave me hope, so I got Save-the-Horse, and used it faithfully. It cured the founder so entirely that I can't see any remains of it whatsoever.

Thank you very much for the remedy, it is good. I also thank you for the promptness and kindness that you awarded me in your dealings.

Respectfully yours, JOHN P. PETERSON.

Save-the-Horse goes through and through both bone and tissue.-It works inside not outside

It has the highest potency—it is the King of Remedies—for any blemish or lameness—it cures to stay cured;—and every bottle is sold with a contract to cure or refund the money. Save-the-Horse enjoys the distinction of being recommended by more satisfied users, and of having more imitators and counterfeiters, than any other veterinary remedy in the world today.

Druggists everywhere sell Save-the-Horse WITH CONTRACT or sent by us Express prepaid.

$5 with a binding contract to refund money or cure any case of BONE AND BOG SPAVIN, THOROUGHPIN, RINGBONE (except low), CURB, SPLINT, CAPPED HOCK, WIND-PUFF, SHOE BOIL, INJURED TENDONS AND ALL LAMENESS. No scar or loss of hair. Horse works as usual.

Harpers Weekly and The Breeder and Sportsman

$5.50 WORTH FOR $3.25

Breeder and Sportsman

One Year, 52 Copies, Regular Price $3

THE BREEDER AND SPORTSMAN is the oldest weekly journal devoted to the Horse west of Chicago, having been established in 1882. This interest, together with the Kennel, Gun, Fishing, Coursing and kindred sports receiving the most attention in its columns; together with Agricultural and Dairying Departments, under whose headings especial attention is paid to the breeding, etc., of Cattle, Sheep, Hogs, Poultry, and all other animals connected with stock raising.

As an advertising medium to Racing Associations, Horsemen, Stock Breeders, Manufacturers of Sulkies, Carriages, Wagons, Agricultural and Dairying Implements and Machinery, Sporting Goods, Fanciers, Stock Foods, and all others desiring to bring their wares to the attention of the classes to whose interests the paper is devoted within the field mentioned above, the BREEDER AND SPORTSMAN will be found indispensable.

Harpers Weekly

Six Months, 26 Copies, Regular Price $2.50

At no time has it been so evident to Americans as now, that the most important thing in the lives of all of us is the progress of the European War.

Next to your daily bread the war interests you most vitally. It may even come to be the most important part of your problem of living.

The periodical of greatest fundamental interest to you today is the one that can best report those phases of the war that come closest to your country and you.

Because of connections abroad and at home, HARPER'S WEEKLY is that publication.

As a critical commentary that presents inside facts, it is the necessary bridge for intelligent readers between the daily newspaper and the monthly review.

You want HARPER'S WEEKLY now. You can get it now on trial at a remarkable reduction.

Send $3.25 Now and Get Them Both

THIS OFFER is made to all who will send us $3.25 before March 31st, 1916, whether for extension of subscription, renewal of subscription or a new subscription. Address:

REID'S REMARKABLE RECORD

Adds Further Evidence of the Superlative Quality of

Peters SHELLS

Shooting at Registered Tournaments during the past four years L. H. Reid of Seattle, has made a phenomenal Record of consistent High Scores

1912—	2115 ex	2200,	96.14%, Pacific Coast High General Average.
1913—	3843 ex	4005,	95.95%, Pacific Coast High General Average.
1914—	2146 ex	2225,	96.44%, Professional Average for United States.
1915—	2482 ex	2550,	97.33%, Pacific Coast High General Average.
Total,	10,586 ex	10,980,	96.46%

During the above four years, Mr. Reid has shot at nearly 30,000 Registered and non-registered targets, breaking an average practically equal to the above. In accomplishing these results, he used about two-thirds TARGET (medium grade) and one-third IDEAL (high grade) shells, all with

The "Crimp" Is A Vital Spot

¶ Put your finger on the shot end of your Remington UMC shot shell where the paper is folded into the inside of the case. That folded edge you know as the "crimp" or "turnover." You've indicated a vital spot in shot shell construction. Moreover, you've singled out one of the decided advantages in Remington UMC shells.

To give you velocity and pattern, the crimp must be hard and smooth enough to work easily through your gun—be it single, double, pump or auto—and yet not so hard as to interfere with the passage of the wads from the gun upon firing. A sufficient stiffness in the paper must be maintained to enable the crimp to withstand banging around in your pockets. Unless the crimp retains its shape, you can't feed it into the chamber of your gun.

¶ These two points—adequate hardness for one purpose and adequate pliability for another—have been kept in mind by the makers of Remington UMC shot shells. By working toward a happy medium, perfection in shot shell case construction has been reached in Remington UMC.

REMINGTON UMC

Your dealer—the man who displays the Red Ball Sign of Sportsmen's Headquarters—will be glad to serve you from his full line of standard loads and sizes in Remington UMC ammunition. While you're there, look over his Remington UMC repeating and autoloading shotguns and rifles.

TRAINING THE HOUND

A PRACTICAL TREATISE ON THE TRAINING OF FOX HOUNDS, BEAGLES, AND COON HOUNDS.

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent. Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies. Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; $1.50, postpaid.

P. O. DRAWER 447, SAN FRANCISCO, CAL.

BREEDER AND SPORTSMAN

VOLUME LXVIII. No. 14. SAN FRANCISCO, SATURDAY, APRIL 1, 1916. Subscription—$3.00 Per Year

The one-time star of the Durfee stable
COPA DE ORO 2:01
who has been purchased by Charles D. Hudson of New Zealand, and who sailed for his new home on Wednesday of this week aboard the steamer Moana.

Pleasanton Driving Park

PLEASANTON, CALIFORNIA

offers for service for the season of 1916 the following stallions:

THE ANVIL 2:02 3-4

Fastest trotting stallion ever offered for service in California, and fourth fastest entire trotter in the world

Son of St. Valiant Vincent 2:11¾ (by St. Vincent 2:13½ out of the triple producer Grace Lee 2:29¼ by Electioneer 125); dam Amy Smith by Emperor Wilkes 2:20¾, sire of Princess Eulalia (4) 2:09¼, etc.; grandam by Hambletonian 539.

The Anvil is regarded by Edward F. Geers as one of the very greatest trotters that he has ever raced. For five years the pair of Tennesseeans went to the races together and in that time were but twice unplaced, while winning a total of fifteen races, including the historic M. and M.

As an individual he is most pleasing, not too large or coarse in any way but smoothly and compactly made and "all horse" in every line. He is a perfect headed, pure gaited trotter, with the very best of disposition, and is destined to become a very great sire of trotting speed. His opportunities in the stud have been very slight as he has been retired from racing only since the close of 1914, and has but three or four foals now three years old. He was selected to head the stud at Pleasanton Driving Park not only on account of his great qualities as a race trotter, but because one of his first foals, Anvilite (2) 2:22¼, with a trial of ten seconds or more faster, is in every way the greatest colt trotter ever handled by C. L. DeRyder. The services of The Anvil are recommended to you without reserve.

Fee for The Anvil 2:02¾, $100 with usual privilege

Vernon McKinney 2:01 1-2

Fastest member of the great family of McKinney 2:11¼

Sire of VERNA McKINNEY (2) 2:13 (his first foal raced), fastest two-year-old pacing filly of 1915.

Son of Guy McKinney 37625 (by McKinney 2:11¼ out of Flossie Drais by Guy Wilkes 2:15¼); dam Maud Vernon by Mount Vernon 2:15¾, sire of the dams of Leata J. 2:03, etc.; grandam Mag by General McClellan, sire of the dams of Mack Mack 2:08, etc.

Vernon McKinney's racing career was not an extensive one but will long be remembered for the excellence of his performances, as his winnings include a Chamber of Commerce stake in time very near the record for that event at the time, and he is the fastest of all the McKinneys.

He is a horse of rare qualities in the way of individual excellence, almost ideal in behavior and temperament in harness or out. Since his retirement he has been a popular horse in the stud and our claim that he would prove a very great sire of pacing speed has been fully substantiated, his first foal to be raced being the season champion for the age and gait in 1915, a most excellent testimonial to his potency. He is a very sure breeder, his get are uniformly endowed with natural speed and the physical and mental requirements of modern race horses and find ready sale at most gratifying prices.

Fee for Vernon McKinney 2:01½, $50 with usual privilege

The best of care taken of mares in any manner owners may desire, but no responsibility assumed for accidents or escapes. Address for particulars

CHAS. L. DeRYDER, Superintendent, PLEASANTON, CAL.

MR BROODMARE OWNER, do you realize the importance of the simple facts that sixty of McKinney's sons and nearly fifty of his daughters are producers of standard performers? That the McKinneys won more money than any other family in 1915? That the McKinneys won the largest percentage of the futurities, both east and west, in 1915? That McKinney has more sons to sire 2:10 performers than any other stallion living? Keep these facts in mind, and remember that I offer you the services of

THE VERY BEST SON OF McKINNEY

CARLOKIN 2:07 1-2 EXHIBITION MILE 2:05 1-4

Champion Trotter and Champion Sire of Trotters in the West

Reg. No. 36548. Licensed Pure Bred, Cert. No. 41.
Mahogany bay. Height 15.1½. Weight 1060.

Sire of ESPERANZA (3) 2:09, only three-year-old to win every trotting stake for that age on the Pacific coast, and also the following colt performers:

The Lark (4)	2:09½	Carsto (2)	2:22½
Ethel D. (3)	2:11	Helen Belle (2)	2:22½
Carl (3)	2:14¼	Carlschen (2)	2:23
Doctor S.	2:14½	Santiago (3)	2:24¼
Johnny Dugan p (3)	2:16	May Marian p (3)	2:24¼
Hermes (2)	2:16½	Carlrich p (2)	2:24½
John Warwick (2)	2:17	El Carbine (2)	2:27½
Nicola B. (3)	2:18½	Eileen C. (3)	2:29
Miss Carlokin p	2:20	Carlos (2)	2:29¼
Carleta (2)	2:20¾	Fulton G. (2)	2:30

Carlokin is the best son of McKinney not only by performance but by breeding as well, his dam being the famous producer Carlotta Wilkes, whose ten performers include four with records below 2:10, while his grandam and great grandam were also producers, by Alcantara and Clark Chief. He has demonstrated that he sires more early and extreme speed than any other stallion in California, and his get are courageous race horses, endowed with soundness and wonderful vitality.

Fee: $75 the season, usual privileges; details on request.

W. G. DURFEE 2019 South Figueroa St. LOS ANGELES, CAL.

BILLIE BOYD (2) 2:30, trotter, breeder's record on halfmile track.
SELMA PALEY (2) trial 2:26½, trotter, public trial on halfmile track.

Colts and Fillies by WILBUR LOU Always on Sale

Wilbur Lou is by the great race horse and sire Kinney Lou 2:07¾, out of the triple producer Louise Carter (3) 2:24, grandam the famous Ingar, dam of 6 including John A. McKerron 2:04½, etc.

Breed to him for "Horses that will race." Fee for 1916, seventy-five dollars with usual privilege or money refunded at our option. Write for detailed particulars, all information gladly furnished.—Licensed Pure Bred, Cert. 23.

Derbertha Bells

Licensed Pure Bred, Cert. No. 226

NO. 60907 :: A. T. R. RULE 1.

Derbertha Bells, foaled 1911, stands 15.3, weighs 1200 pounds and is a solid dark bay or brown of magnificent conformation, style and trotting action. His breeding, too, is of the best, tracing 20 times to Hambletonian 10—5 through Electioneer, 5 through George Wilkes, 4 through Strathmore and 4 through Abdallah 15 (the big four of the sons of Hambletonian) and twice through his daughters; balanced by 18 crosses to Mambrino Chief 11—five of these through his greatest son Mambrino Patchen 58 (leading progenitor of the dams of trotting sires); 25 crosses to Imp. Bellfounder, 8 to Henry Clay, 8 to Imp. Trustee, 5 to Pilot Jr. 12, and sustained by such other famous broodmare sires as The Moor, A. W. Richmond, Black Hawk, St. Clair, Geo. M. Patchen, Grey Eagle, Imp. Glencoe, Williamson's Belmont, etc. His broodmare inheritance is incomparably great—5 crosses to Green Mountain Maid (dam of 9 including a world's champion and 4 sires including Electioneer, the world's greatest trotting progenitor), 3 crosses to Alma Mater (dam of 8 and 7 sires, including Alcyone and Alcantara), and one each to Miss Russell (dam of 8 including Maud S. 2:08¾ and 6 sires including Nutwood, the world's greatest broodmare sire), Dolly (dam of 4 and 5 sires, including Director and Onward), Beautiful Bells (dam of 11 trotters including 4 world's champions and 9 sires) and Minnehaha (dam of 8 including a champion yearling and 6 sires). These are the greatest mares of history in number of descendants in the standard list, to which add two crosses to Bertha (the only mare with 2 in 2:04½, 5 in 2:10 and 13 in the list; with two 2:05 producing sons, five 2:10 producing sons and two other sons with produce only a fraction slower).

This pedigree contains the blood of 20 mares (counting duplicates) with an average of 9 performers each and presents an aggregation of family founding sires and dams unexcelled, if not unequaled. Neither is it necessary to confine ourselves to the standard or even to the 2:10 list, or go into the musty records of the distant past for examples of the prepotency of these blood lines in the production of speed, but we can easily and abundantly demonstrate their value in speed of the first flight in the present generation. He has 1 two-year-old and 2 yearlings that stamp him as a sire entirely worthy of his superlative antecedents, as they (like their sire) are uniformly large, handsome, intelligent, tractable and of great speed promise. Come and see them and the new crop and you will breed to him. Fee $25 the season with return privilege. Tabulated pedigree upon request. J. W. PENDLETON,
1601 Seminary Avenue, Oakland, California

Don't Make a Mistake by not Breeding to the Great

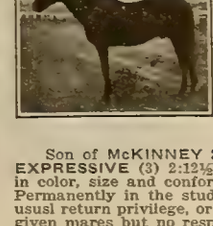
KING LILLY POINTER

Registered No. 5223.

By the great Star Pointer 1:59¼, 3183, dam Lilly S. by Direct 2:05¼, 20113,—two world's champions for many years.

Second dam the great race and broodmare Lilly Stanley.

King Lilly Pointer is a green horse with remarkable speed. With very little work he has paced a mile on the Los Angeles track in 2:08¼ with ease. He goes without straps and has paced a half in 1:01¼ in third position all the way around, and has easily stepped quarters in 29 seconds. In another work out he went to the quarter in 30½ seconds, the second eighth in 14 seconds, finishing the last quarter in 30 seconds, going the seventh eighth in 14 seconds,—a 1:52 gait.



He is a seal brown in color, 15.2½ hands high, weighs 1100, and his get prove that he will be a sire of high-class race horses.

Fee $35 cash with return privilege, or right of substituting another mare. Best of care taken of mares, but no responsibility assumed for accidents of any kind.

Address for particulars, tabulated pedigree showing that he is the greatest bred pacing stallion in the United States,

W. H. NESMITH, 4218 S. Figueroa St., Los Angeles, Cal.

King Lilly Pointer can be seen at Los Angeles Exposition Park. Phone Home 28446.

Expressive Mac 2:25½

A. T. R. No. 41513. Licensed Pure Bred, Cert. No. 1041.

SIRE OF

Clara Mac 2:04½; Vera Hal 2:05; Madam Mac 2:07¼

Only stallion offered for service in California to sire two in 2:05, three in 2:10.

Also sire of Eddy Mac (3) 2:29½, trial 2:13; Nellie Mac trial 2:09½ trotting, 1915, and others with fast trials

Son of McKINNEY 2:11¼ (sire of 27 in 2:10) and the greatest living broodmare, EXPRESSIVE (3) 2:12½ (dam of 6 trotters, 2 in 2:10) by ELECTIONEER 125. Ideal in color, size and conformation — seal brown, height 16½ hands, weight 1275 pounds. Permanently in the stud at my ranch three miles south of Selma at $25 the season, usual return privilege, or $35 to insure. Good pasture at $2 per month and best of care given mares but no responsibility assumed for accidents or escapes. Address for all particulars,

J. H. NELSON, Selma, Cal.

GET IN THE CHAMPION CLASS

Mate your speedy mares with

WM HAROLD 2:13¼

Reg. No. 55286

A great race horse and sire by The Great Sidney, sire of Sidney Dillon, sire of Lou Dillon 1:58½, world's champion mare and first trotter to beat 2 minutes; dam Cricket 2:10, dam of 6 in the list.

Terms on Application. Mares boarded.
Address DR. C. CORWIN, Hayward, Cal.

MR. SMITH'S BILL ONCE MORE.

Some weeks ago we presented to our readers a aft of the initiative measure proposed for submit- to the voters of the state at large at the general ection this fall by Mr. Ed R. Smith of Ocean Park d a number of other horsemen from southern Cali- rnia, while a few days later we printed a letter om Mr. Smith concerning the same . We regret to y that on each occasion we were impelled to offer iticisms of the proposed action, as in our opinion had certain shortcomings that prevented it from ing the most highly desirable bill that could be vised to accomplish the desired end, while we also ere, and are, of the opinion that its sponsors were king the wrong course in submitting it as an initia- e petition in preference to making the efforts in behalf directly to the state legislature. Since that ne we have received the circular letter which Mr. nith and his friends are sending to horsemen solic- ng funds for the waging of the campaign, and more cently the following letter from Mr. Smith has ached the editor's desk:

Ocean Park, Cal., Mch. 27, 1916.

litor Breeder and Sportsman:

Enclosed please find Registered Horse Breeders Bill, hendments to California racing law, with the splendid dle to same by the Attorney General of California. At is time we are asking of you that you give this meas- e the same treatment that you have always displayed the past on all matters which were of benefit to the rse breeding industry of this state. Your valuable per has always and at all times championed the cause the breeders and horsemen and endeavored to be right d fair and worked in their interests. We appreciate ur criticisms of our measure, as you were of the opin- n that the movement was ill advised at this time, as u thought that we should have waited and brought the l up in the halls of the legislature. We are of the inion that you are sincere in that belief, but we differ ere.

As history has proven, and you well know, with your luable assistance through the columns of your paper d with the efforts of the breeders and horsemen and eir friends that have worked hard for the past eighteen ars with these senators and members of the legislature, ring to get through the necessary legislation for appro- lations for county or district fairs, etc., up to the pres- t time it has been impossible to get any kind of legis- ion toward that end. Since the appropriation for unty and district fairs has ceased, the great stock farms our beautiful state have one by one gone out of exist- ce, as there was no incentive to breed or place to race sell their produce, with the exception of a few fairs at had hard uphill struggles to exist under present con- ions, and if there is not some kind of legislation soon be had the few stock farms and breeders left will have follow in the footsteps of those that have already quit e business.

So now, Mr. Editor, breeders and horsemen, let us all get our differences of opinion and go into this cam- ign with a solid column and a united army of breeders, rsemen and friends; let us get behind this measure, ucate the public, and go before the people with this od clean bill, gotten up by a body of reputable breeders the very best interests of the horse breeding indus- of the state, a measure that should appeal and recom- nd itself to all classes. There is absolutely no possibility of syndicate or gambling control, as all racing where wagering is to be held at any state, county, or agricultural fair, association or corporation, are under the direct control and management of the Racing Commission, and every dollar made will revert right back to the breeders and horsemen.

This measure is being put before the people wholly by public subscription. We are asking financial aid from all those that can affard to donate to this cause and expect a very liberal response. Every dollar subscribed will be used for the necessary expenses of getting out the printing, petitions, etc. If we all pull together, work in harmony and put our best efforts in this campaign, success will surely follow. Petitions are now being prepared and will be in circulation soon.

ED. R. SMITH, Secretary,
Registered Horse Breeders.

When we first gave consideration to this matter we expressed our firm belief in the sincerity of Mr. Smith and his associates in their conviction that they were taking the best course for the achievement of a most desirable end, and before going further we wish to repeat this assurance. At the same time we have not modified our views as previously expressed concerning the measure advocated by them—indeed we are more firmly convinced than before that the bill should be altered in some respects, which we have previously pointed out, and that the legislation desired has a better chance in the assembly than it has if put before the people as an initiative measure, also for reasons which have been so fully expressed previously that a repetition at this time seems scarcely necessary. We have lost no opportunity for talking over the "pros and cons" of the matter with various horsemen with whom we have come in contact since the bill first appeared in our columns, and in almost every instance the opinion reached upon the conclusion of such conversations was identical with that voiced in former articles.

Mr. Smith submits the record of past failures of attempts to secure legislation of an ameliorating nature when sought direct from the legislature, and there is no sidestepping the truth of his examples. With some of these instances the present editor of this publication is not personally familiar; with a couple of the later ones he has some slight acquaintance. In the winter of 1912 and 1913 a district fair bill was introduced into the legislature upon the recommendation of Governor Johnson that he would sign a bill for a limited number of fairs. The measure was drawn and submitted to him before it went before the house, according to the best of our belief, and he voiced a complete approval of the same. It became the subject of amendment until it had grown to unrecognizable proportions and when put before his excellency it was very promptly and emphatically vetoed. It has been stated in quarters antagonistic to Mr. Johnson that the additions to the bill were made by his henchmen for the express purpose of bringing about valid grounds for the course taken by him after it came from the legislative bodies enacting it. While this may be true, we incline more to the belief that the amendments were added by various persons for other reasons, and that the same would not have materialized had the way been properly paved for the introduction of such a measure. Neighborhood jealousy was the cause of the addition of some of the fairs which it was proposed to establish, while the lack of proper appreciation of the real benefits to accrue in the future to the state at large by the establishment of a comparatively small number of SUCCESSFUL fairs caused the tacking on of others. These opinions of ours in this matter, while purely personal, have not been formed without grounds, largely the result of an exchange of opinion with a good many people who were more or less interested in the matter in hand.

At the last session of the legislature, the governor having reiterated his inclination to accord favorable action on his part to any bill passed providing reasonable appropriations for district fairs, not to exceed seven or eight in number, another attempt was made to secure help of this nature. As originally introduced the measure provided for fourteen districts, but it was almost immediately amended to call for seven, that it might have every chance of meeting with approval if passed. Acceptable as it was known to be it failed of becoming operative, and this, we have been told personally by members of the legislature and persons close to the governor, because its enactment was not sufficiently urged by the people who should have been most interested in its welfare. Whether or not this statement, made to us by different people, is absolutely correct in its fullest meaning, we are not in position to state; we can and will say this upon our own responsibility, that the bill did not meet with the concerted and aggressive support that horsemen and stock growers especially should have accorded it. The matter is one that is open to argument, but we incline to the opinion that had this last bill received the support it merited on the part of vitally interested people it would have gone through both branches of the legislature and the office of the governor with flying colors.

While attempts to secure direct legislation may have been unsuccessful as stated by Mr. Smith and reviewed above, it may not be out of place to bring to mind the fate that met the initiative measure attempting to establish the pari-mutuals in this state some years ago, the people registering their disapproval of the subject in overwhelming fashion. It is not necessary to remind us that "things are different since Tom Williams died." We know that they are different—in professional circles. We also know that there are thousands of people in California today who will vote no on such a proposal who never heard of Tom Williams or, if they did hear of him, do not know at this moment whether he is dead or alive. We will make the following memoranda of opinion concerning Mr. Williams and dismiss this phase of the situation: Tom Williams, alive, was a stumbling block in the path of any attempt at establishing a racing commission and pari-mutual speculation on a proper, conservative basis through an appeal to the legislature direct; his death lessens the opposition that any really good measure, well supported in the proper quarter, would meet in the halls of the senate and assembly, while it in no way affects the sentiments or beliefs of countless thousands of voters, men and women, to whom a race track is merely a sink of iniquity in any hands. Tom Williams did not make the race track: The race track made Tom Williams, and it is against the race track rather than the individual that the great opposition of the "lay public," unfamiliar with inside conditions, is directed. That opposition exists very strongly at this time, just as it did when the people cast their last vote against the pari-mutual.

Our objections to Mr. Smith's bill have been fully stated in former articles and still hold. Our objection to the method he proposes to pursue is just as strong as it ever was, if not stronger. We regret that we are not in accord with Mr. Smith and his associates in the matter, but we are fully convinced that the stand we take is a proper one and we cannot recommend his measure or his method to favor or financial support on the part of the friends of the horse and horseracing in California.

LIVE STOCK INSURANCE FOR CALIFORNIANS.

Breeders of livestock of all description, saving range animals, will learn with genuine satisfaction that they may now avail themselves of protection for their holdings through the medium of insurance against death and accident with the Montana Livestock and Casualty Insurance Company, a most progressive and substantial western concern now operating in the states of Montana, California, Utah, Washington and North Dakota after having complied with all the various strict requirements governing such companies in those states. Its officers and directors, headed by President Edwin Norris, late governor of Montana, are representative businessmen of the northwest, the home office being in Helena, and the financial affairs of the company are in most excellent condition, nearly twenty-three thousand dollars having been paid to policy holders in 1915 and a surplus of practically five times that sum being now in hand.

Some years ago the eastern concerns specializing in insurance of this nature had representatives in California, but none of them have operated here since the passing of the very stringent regulations governing insurance companies, the field being practically unserved in this respect. Determining the opportunity presented to be a most attractive one, Mr. George B. Conway made a journey here from Helena, looked the ground over and immediately went into executive session with the insurance commissioner, with the result that his company was duly accredited and accorded permission to operate in this state. A state agency has been established in San Francisco at 602 Royal Insurance Building, with Mr. Douglas Keith as general agent, and local connections are rapidly being established throughout the state, Mr. Conway having spent several days here this month for this particular purpose. There is a most excellent field here for the writing of livestock insurance, and we have every reason for recommending the newcomers to your consideration.

Copa de Oro Sails on Long Voyage

FAMOUS PACER AND SIRE PURCHASED BY NEW ZEALAND BREEDER

During the last several years the trotting horse breeders of New Zealand and Australia have made numerous purchases of American bred trotters and pacers, both stallions and mares, and in practically every instance have not only proven their appreciation of values in select blood lines but have shown a willingness to pay well for anything that really pleased them and gave promise of filling their needs. Many individuals of high degree have found homes in the twin dominions of Australasia at good prices, but it remained for Mr. Charles D. Hudson of Ravensbourne, Dunedin, New Zealand, to set a new pattern in every respect in the way of importations from America when he secured from William G. Durfee of Los Angeles, through the friendly offices of Robert A. Smith of the same city, the great race horse and speed sire Copa de Oro 2:01, for many seasons the bright particular star of the Durfee stable, both in harness and at stud. In all particulars Copa de Oro is in a class by himself among horses exported to the lands across the Pacific, while the price paid for him, while not publicly announced, is considerably in excess of former figures obtained from this quarter. Mr. Hudson, who we are pleased to note keeps track of American harness horses through the medium of the Breeder and Sportsman, was attracted by the excellence of the performance of Copa de Oro and his get as set forth therein and correspondence was entered into, some months ago, which finally resulted in the consummation of the purchase of the individual whom he so greatly admired. The horse arrived in this city last Saturday, accompanied by John McQuaig of the Durfee staff, Mr. Durfee also coming up from Los Angeles to oversee the final arrangements for inspection and shipping. The famous pacer was quartered at the City Front Stables pending shipment and quite a number of his many local admirers took advantage of the opportunity to go down and give him a last visit. Shipment for his new home was made Wednesday morning, especially constructed quarters having been provided for him on the main deck of the Moana of the Union S. S. Co. of New Zealand, the same boat that carried Don Pronto 2:02¼ to Australia just a year ago yesterday.

Copa de Oro, the fastest entire pacer ever foaled in the state of California, was bred by Peter W. Hodges of Pleasanton and first saw the light of day in 1912, one year earlier than the great trotter and speed sire San Francisco 2:07¾, for whose existence we are also indebted to the breeding operations of Mr. Hodges. Mr. Hodges was, and is, a great admirer of the family of Nutwood Wilkes 2:16½ and was most successful in obtaining speed in copious quantities by a judicious use of the blood of that horse, through the dam in the case of San Francisco, while Copa de Oro is a son of the old premier of the Martin Carter establishment. Not only through his sire does Copa de Oro come into the possession on a most potent infusion of excellent blood, but his inheritance through his dam is one of exceptional richness. Atherine 2:16¾ is the dam of three standard performers in addition to the subject of this sketch, including the trotter Rags 2:09¼ and the futurity winner Nicola B. (3) 2:18½ who has trialed not far from the two-ten mark, while other daughters of Patron 2:14¼ have produced such sterling performers as Linda Wrona 2:05½, Miss Adbell 2:06¼, Hazel Laing 2:08¼, Boreazelle 2:09¼, Carroll 2:09¼ and two score more in standard time. Athene, dam of Atherine and one other trotter, was bred very much like the grand old high wheel champion Maud S. 2:08¾, being a daughter of Harold 413 and out of a mare by Pilot Jr. 12. Still further back come the rugged "pioneer crosses" to Mambrino Chief 11, Downing's Bay Messenger and Messenger, the great grandam of Bacchante Mambrino being presumably a daughter of the gray stallion to whose importation in 1788 is due the foundation of the family of the American trotter.

While never raced by his breeder, Copa de Oro developed in his hands a wonderful turn of speed which led to his purchase by Mrs. L. G. Bonfilio of Los Angeles, whereupon he became a member of the stable of William G. Durfee, who at that time had already taken high rank among the younger generation of horse trainers and race drivers. "Bear stories" galore emanated from the southern training center pending the appearance of the new combination—stories that were proven to be well grounded when the handsome five-year-old stallion, displaying all the characteristics of a seasoned campaigner, celebrated his advent to the world of fame by winning his first start at Salinas in 1907 in straight heats and fast time, the three trips being negotiated in 2:10¼, 2:08¾ and 2:09½, his nearest competitor being the bay mare Inferlotta. Five times that summer this great pair came together, and every time was a horse race. Three times out of the five the mare emerged victorious, but never by any great margin, having to pace to a record of 2:04¾ to win at Santa Rosa. Thirteen starts were made by the new sensation during that season, his itinerary extending to the half-mile tracks of Washington and Idaho, and but once was he behind the money—at Salem in a field of fifteen starters two days after having won a three heat race in the mud over the same course. The other dozen starts were evenly divided between firsts and seconds, and his earnings for his first season out were but a few dollars under the five thousand mark.

After such a good showing he was deemed "ripe" for a campaign in the most select company the land had to offer and in the following spring he found himself headed east on the longest journey of his young life, his first stopping place of moment being Peoria. Evidently the distillery odor which is supposed, at least in the fancy of the cartoonist or Sunday special writer, to overhang this Illinois city at all times and which is so offensive to the nose of the teetotaller, served merely as a pleasant stimulant to the wanderer, as he proceeded to make it two in a row in a field of ten starters in which the main contenders were Star Patch and Major Mallow, the time of both heats being exactly the same, 2:06¼. Having by this proceeding annexed practically a round thousand dollars toward keeping the well known wolf from the Durfee door, the journey was continued to the famous four cornered course at "The Hut," where the summary was topped in one-two-three order and the figures after his name altered to read 2:05¾.

By this time the east was fully awake to the fact that another real race horse had come out of the west, the opinion being strengthened at Detroit when he slipped over a couple of heats in a two-in-three event in 2:04¼ and 2:04¾, eight real good wigglers doing a dust eating specialty in his wake. Later in the same week he had his first dose of the same treatment for that year, Darkey Hal winning a spirited five heater in which he came out second best, three heats of the five being negotiated in the merry time of 2:04¼. At Kalamazoo Darkey repeated the performance, our friend being second again and winning one heat in 2:03¼, but at Buffalo the tables were turned and the dusky lass from Canada had to be content with second place in the final summary. At Readville Major Brino manned the guns for our Canadian cousins and wiped out the national stain by taking two to Copa de Oro's one out of a total of three heats in time barely on the slow side of six, while in the five thousand dollar event at Hartford our friend had to be satisfied to finish in fourth place to an international combination composed of The Eel, Major Brino and George Gano, the slowest mile being 2:05¼. At Syracuse, in a field of six including the redoubtable warrior Jerry B., Messrs. Durfee and De Oro donned their winning clothes long enough to line out three of 'em in four and a half, four and a quarter and five.

About this time clouds began gathering on the horizon in a manner that told of heavy weather to come. In the first start at Columbus the Californians had to be satisfied with a three way split with Judex and Major Mallow, taking the second heat in 2:03¼ but standing third in the summary, while in the second start over the Ohio speedway they were behind the money in a field of nine which was topped by Eph Cinders and Jerry B. At Lexington the high winds became regular hurricanes and the 2:06 pacers proceeded to inaugurate the fall meeting there by hanging up the figures that still stand as the fastest seven heat race ever contested by harness horses. Minor Heir speared the first heat in 2:00½ and peated in 2:02; The Eel then took one in 2:05¾, w Copa de Oro registering in the next one in 2:0 Jerry B. and one Senor Ricardo McMahon had b figuring more or less prominently in the contest to this time and suddenly came to the conclusion t the time had arrived for them to emphasize "more" and put the soft pedal on the "less," as t proceeded to line out the next three in 2:06½, 2:0 and 2:07¼. The race was one that put the stamp true greatness upon every one of the heat winne and Copa de Oro, after the first mile, was never wo than third. Three days later, for the third and l time in his career, he finished behind the money that great quartet of pacing queens, Lady Maud 2:00½, Reproachless 2:04¼, Aileen Wilson 2:0 and Citation 2:01¾. The latter mare came on w with the McMahon stable and at Phoenix won t races from Copa de Oro, who was second in e of the six heats which were raced in time fr 2:02½ to 2:06¾.

Taken to the big line again in 1909 the great pa became the victim of an illness that threw him of training for some time and precluded any rac on his part until well toward the end of the seas At Syracuse he was second to The Eel in the fi for-all pace and again equaled his former record 2:03¼ in winning the second heat, outranking La Maud C. and Aileen Wilson. At Columbus he t the first mile in 2:02 before relinquishing his pl to Aileen Wilson, finishing second in the follow fast miles and besting his old enemies The Eel 2:0 and Citation, as well as the redoubtable Hedgew Boy 2:01. This was his last Grand Circuit appe ance, but on his way home a stop was made at Ph nix long enough for him to win the free-for-all p there in very comfortable fashion and to pace a n against time, to beat his record of 2:02, in 2:01¼

By this time, under our mistaken system of creasing a horse's earning capacity as his sp increases, there was so little opportunity of mak a paying campaign for another season that in 1 Copa de Oro was merely given an easy preparat for a trip against the watch at Phoenix, late in fall, for the express purpose of putting him in two minute list. The success attending this atte was most gratifying, and the trip was made in 1 with every effort being made to comply with recently enacted rules governing such performan Technicalities were invoked by disgruntled ri and by a highly technical interpretation of the re lations the performance was declared irregular, horse being deprived of the credit of what wa sterling performance. Later in the week over same course he stepped the second heat of a winn race in 2:01, and this appears as his official rec in all annals of the American turf. The fact rema that he is given full credit in the minds of all ho men for the mile in 1:59.

As he was mated with but very few mares u after his permanent retirement to the stud, wh was not effected until a time when harness ho breeding in California had begun to fall off q noticeably, his opportunities in service have b very limited indeed, his few early foals raced be now but five years of age. He became a 2:10 sir 1914 when the three-year-old gelding Contention paced to a record of 2:10 and should, save for error on the part of the clerk of the course at Ph nix, have been credited with tying the world's rec of 2:08¼ for geldings of the age and gait in a ning performance. Two other three-year-olds tri below 2:10 that same season, so horsemen were prepared for the achievement of the world's rec for three-year-old pacing geldings by Rayo de (3) 2:07¼ in 1915, assuring Copa de Oro of the s high standing as a sire that had been his as a horse. He is recognized as one of the very best of the extremely fast pacers, and is accepted as of the most potent of the recent comers to the g table of sires.

Among the many horses of excellence exporte New Zealand and Australia in the several years ing which the sport of trotting has been popula those countries, Copa de Oro occupies two un positions: He is the first two minute performe

a home in that section of the world as well as first American sire ever exported thereto who had ren himself a sire of two-ten speed—and world's rd speed at that—prior to his exportation. His blishment in the stud in New Zealand will have onderful influence upon the entire harness horse ily in the antipodes, and if blessed with an ordi- y term of life there is little doubt that he will nd the greatest line of horses known to that tion. In his departure the Breeder and Sportsman ls that it is losing an old and valued friend, and gratulations not only to Mr. Hudson but to the w Zealand horsemen in general are in order—and hereby extended in all heartiness.

PROMISING OUTLOOK AT VANCOUVER.

Vancouver, B. C., March 23, 1916.

itor Breeder and Sportsman:

Since my last communication, Mr. George Bell has quired control of the good mare Myrtha Pointer, d I understand that she will be both matineed and ced. As she is by Star Pointer 1:59¼, dam Myrtha hips 2:09¼ by Whips, her speed inheritance is gh. She has shown considerable speed, going a atinee half two years ago in 1:05 driven by her wner to a cart.

Mr. A. McKenzie has purchased the three-year-old lt by Zobona 2:18, son of Zombro, dam Just It by earest. The colt is thin, having been allowed to rage for himself most of his life, but is a nice colt many respects and has certainly good breeding to stify his owner's expectations.

Mr. D. K. Campbell has placed his three-year-old lt by Deroches 2:05¼, dam a McKinney mare with record of 2:12¼ on a halfmile track, in the hands Frank Loomis. Mr. Loomis has also received from r. R. L. Handford of Ladner a full brother of Beauty that raced through this district last year under the wnership of David Nixon, her sire being Woodlock, son of Zolock. He has also received from Mr. andford the trotting gelding Uncle Tom, that was prominent winner in the local races at Vancouver st year.

At present Mr. Loomis has five head and is expect- ng other additions daily.

Mr. Lewis, who is also at the Minoru track, has n addition to the twelve head brought with him from he prairie provinces, Dixon Brothers' Aurelia Lou, big trotting stallion that showed some speed last ear but became uncontrollable. He is now a gelding nd they expect great things from him this year. Lewis also has for Dixon Brothers the iron gray filly . B. P. 2:06¼, dam Lady Patrick. Lady Patrick was y Ben Z., son of Zolock, and her dam was Laurell nca.

The annual meeting of the Vancouver Driving As- ociation was held on Tuesday night and was the est attended and most enthusiastic meeting the riving club has held for some years. A number of nen who have formerly been prominent in the show horse game were present and signified their intention f transferring their affections to the trotters. A trong campaign for membership will be inaugurated nd the chances are that a most successful season will follow. E. C. Davison, last year's president, has three-year-old that he intends to race. K. M. C., a ig pacer by B. C. King, dam Arketta by McKinney, will also likely be raced during the season. The best horse in the Lewis stable at the present time is King Bond 2:10½ by The Bondsman. He has another pacer with a mark of 2:14¼ and the balance of his stable are colts.

Yours truly,

W. C. BROWN.

"Is the Caucasian played out?" asks the Australian Trotting Record. "For the first time in the history of trotting at Richmond an Indian was numbered among the reinsmen—an Oriental hawker and skin buyer in far off Bairnsdale sought fame for his trusty mare in metropolitan company. The fame of the mare had preceded her, and she was sent out favor- ite in the Tradesmen's Handicap. She, however, cut an inglorious figure, and finished last but one. The proud owner and driver announced that he had made the sulky in which he was driving, the wheels ex- cepted. The home-made workmanship availed him nothing, and an ominous rattle as the machine passed up the straight caused some apprehension that there would be a breakdown before the course was com- pleted. Bairnsdale timber, however, stood the test, and all ended happily except for the confiding punters who had invested their coin on the mare and her lusky driver."

North Randall Entries

STAKE FIELDS AT G C. OPENER

Entries to the early closing events at the Grand Circuit inaugural at North Randall closed March 14 and are presented herewith as a sample of the quality of fields that may be expected in the major events on the big line this summer. The events for aged horses have not drawn as largely as in some years but the response to the juvenile classes has been very good indeed, showing that the promoters had the right idea in providing two classes for three-year-old trotters. A conspicuous feature of the entry list is the lack of California horses, the only ones nominated from this state being the good stake trotter Spriggan 2:08¼ in the stable of Will DeRyder, Wm. G. Durfee's great filly Virginia Barnette 2:08¼, and E. R. Dunne's futurity winner of last season, Virginia Humbug (2) 2:16¾.

Young Todd, b g by Director Todd—Woodford Belle, by Ongale; Walter R. Cox, Dover, N. H.

Prestolite, blk m by Don Varrick—dam by Dignity Dare; C. P. Cecil, Jr., Danville.

Spring Maid, ch m by The Abbe—Miss Burlap, by The Beau Ideal; Ben F. White, North Randall.

AT OREGON STATE FAIR GROUNDS.

While there is a general feeling of pessimism among harness horsemen over the general situation, there are five trainers working horses at the State Fair Grounds track at Salem, Ore.

Dr. A. G. Smith, who keeps a horse or two because he can't keep from it, is working two of his own. Complete 2:16¼, by Palite, a good son of Nutwood Wilkes, will probably be raced in the big trotting stake this year. She was entered last fall and was a most promising candidate, but wrenched an ankle on a cuppy track and was not well in time to race. It is, of course, early to make predictions, but she is all right and can "go some" now.

Helen Hall, by Hal R., dam Vida Mac by McKinney, is a racy-looking young mare. It is the doctor's intention to race both of them. Complete was grand champion standard bred mare last year and in 1914 at Oregon State Fair.

J. B. Stetson has his good mare Novela by Letrado (3) 2:25 trotting, dam by Alaska, one of the good sons of Electioneer, second dam by Robt. McGregor, third dam by Red Wilkes, and fourth by Mambrino Patchen. She took a mark of 2:15½ last season and promises to lower that considerably this year. Boniquee, a three-year-old pacer by Count Boni, dam Niquee 2:13¼, by Joe Patchen, is owned jointly by Stetson and C. A. Harrison.

Joseph Ansel (3) 2:12¼ by Prince Ansel, dam by Nutwood Wilkes, is owned by C. A. Harrison. He will race and, barring accidents, will undoubtedly take a very low mark.

Stetson is seriously contemplating going back to Nebraska or elsewhere east for this season's racing. He will have one or two more horses from Seattle and will take them with him if he goes.

Ed Keyt has his own good mare Wild Girl 2:18½ by Wild Nutling, dam by General Washington. She is another entrant in the $2,000 trot that went lame last year. She is now all right and if she stays so has speed that would seem to make her invincible. He also owns Edith M., a green trotter by R. Ambush, dam by Vinmont. She is promising and will race. Keyt also has on pasture in the infield a mare by R. Ambush, out of Mildred E. K., the dam of King Seal 2:09 and Holly Brand 2:06¼; a three-year-old by King Seal, out of Wild Girl, and a four-year-old gelding by On Voyage, out of Mildred E. K.

Sam Bush has Robin West by R. Ambush, dam by Zombro, owned by H. C. Fletcher. Robin West's dam is the dam of McAlzo, that Mr. Fletcher successfully raced two seasons and then sold. He is a more compact horse, very handsome, and is an excellent race prospect. Bush also has his own horse, Bon Diablo by Bonaday, dam by Diablo. Sallie H., owned by Frank McCarty, completes his string. She is a green pacer by Hal Norte, dam by Aguinaldo. She worked last year in 2:13, half in 1:03, and will be raced.

Last, but by no means least, is Alex. Grant with Francis J. 2:08. The horse looks as fit as he ever did this early in the spring; not a mark of his previous campaigns on him. Francis J.'s first colt in this region is now on the grounds. The old mare, Greetings by Sable Wilkes, owned by B. H. Davis of Silverton, Ore., was bred to him last year, after she had almost been given up as a non-breeder. The first service resulted in one of the most perfect and handsomest colts ever seen on the grounds and, although she is 23 years old, she is brought back to be bred again. And that colt is a great ad. for Francis J.

Jean by Gambetta Wilkes, also in Grant's charge, has a nice yearling by Monterey 2:09¼ and will soon drop a colt by Francis J. Alex. gives Francis J. his work every day and still enjoys the brush with him as in days of yore.

There are no runners here yet, but with the good purses hung up for them this year, it is rumored that there will not only be many to race, but that quite a number will train here a little later.—Rural Spirit.

THE PROMISE OF THE FUTURE.

Seattle, Wash., Mar. 20, 1916.

Editor Breeder and Sportsman:

I have before me a recent copy of the Trotter and Pacer, on the front cover of which is a picture of San Francisco 2:07¾, the renowned son of Zombro, with Breeder Peter W. Hodges up. Looking at the picture brings back some pleasant memories to me, the picture being a reproduction of one taken during the season Mr. Hodges raced San Francisco on the Grand Circuit. It strikes me that California horsemen should be proud of Peter W. Hodges as the man who bred, raised and campaigned San Francisco, and while Mr. Hodges was, we may say, forced to sell his great horse to the Walnut Hall stock farm, yet in selling San Francisco he did the light harness horse world a great and lasting benefit, for San Francisco went right into the greatest collection of brood mares ever owned by one farm, and at that great nursery San Francisco has more than made good.

Mr. Hodges is not being heard of these days. Probably he is living in some quiet place educating a few San Francisco colts, as I know he had a few and I hope that he will soon come out with another and, if possible, a better horse than San Francisco. This same quiet gentleman, Mr. Hodges, is not only a good trainer but he proved himself an artist in the selection of blood lines, for not only did he breed San Francisco but also one of California's very fastest pacers, Copa de Oro 2:01. Therefore, it is about time for Hodges to spring a new equine king on the country. I hope he does and that he may sell one in 1916 for $50,000.

Thinking over Copa de Oro, Carlokin, King Lilly Pointer, Baronteer Todd, The Anvil, Vernon McKinney, The Proof, Derbertha Bells, Demonio, Arlie Demonio, Wilbur Lou, and the many other first class stallions now standing for public service in California, I wonder if the season of 1916 will be as busy as it should be. California horsemen should awaken to the fact that when the European war is over standard bred horses will be in big demand, and unless more breeding is done during 1916 than during the three years past, the Pacific Coast will be out of standard bred horses. Middle western breeders, eastern and southern breeds are preparing for the coming market, so it is up to California and the whole Pacific slope to be up and doing. Every farmer and fancier in California who owns a good mare should get busy and select the stallion from amongst the many good ones advertised and breed his mare early and nominate her in every Pacific coast stake, for by nominating his mare in the futurities the breeder has placed a better valuation not only on the foal but also on the dam.

I hope to live long enough to see the Pacific coast race tracks all open for business with plenty of horses and early racing. I think the game has been taking a vacation.

Let's hope that 1916 will be a busy and successful year. Horsemen should, one and all, assist in making prosperity for their own game. It is an old and true saying that "The Lord helps those who try to help themselves." Yours truly,

C. A. HARRISON.

"THE SHIP THAT NEVER RETURNED."

Several eastern contemporaries have dug up and circulated of late a clause from the will of the famous California reinsman, Thomas E. Keating, who died several years ago at Lexington, the wording of the same being as follows: "I am not and never have been married and I have no lawful or adopted children. Nevertheless, knowing the facility with whi persons are proved widows, lawful children or ado ed children of deceased persons, I give and bequea to any person who may prove to be my lawful wid the sum of $50, and the same sum to anyone provi to be my lawful or adopted child."

The precaution taken by Mr. Keating did not esta lish a precedent, as other men here in the west, a perhaps in the east, made similar provisions to d courage the attempts of pretenders to worm the selves in as beneficiaries of deceased persons, esp cially those of ostensibly no family, and while t executor of the Keating estate was not called up to pay out any money in fifty dollar chunks und this clause, the story calls to mind a certain sum ten times that amount which he failed to collect f the benefit of the estate on account of rather unusu grounds.

Some time before his departure for the east the campaign that was to be so unexpectedly inte rupted by the final summons to the judge's stand ar the imposing of the penalty that could not be r versed by any earthly tribunal, turf or civil, M Keating made a loan of five hundred dollars to brother trainer here in California who has droppe from view in the last few years and who has, qui probably, also run the race of life to a losing finis ere this. Affairs were not flourishing with the broth trainer for some months thereafter, and when Kea ing was ready to ship out the loan was as y unsettled. Tommy went to see his creditor, who ha his stable at the same course, and after some conve satiqn and explanation of circumstances it wa mutually agreed that the matter should be allowe to stand for the time being, the borrower assurin the payment of the obligation upon Keating's retur to California in the fall. With this understandin they separated never to meet again, Mr. Keating death coming in October of that year, 1900, at Le ington.

In due time the executor assumed charge of th estate, and in going over the papers of the decease reinsman found a memorandum of the loan mentione above, taking immediate steps to secure a settlemer of the same. The brother trainer who had been th beneficiary of the loan was still here in California not a thousand miles away from this city, and th executor had no trouble in locating him or in securin his admission that he owed the money. Furthe more he had the money in hand at the time an stated that he was ready to fulfill his last unde standing with his benefactor; that is, he would pa the five hundred dollars "whenever Tommy cam back to California." Interment having been made i Reno, Keating had failed to live up to his end of th agreement, according to the survivor's contention, s there remained, in his eyes at least, no obligation o his part. He stood pat, the matter was not in shap to make sufficient grounds for a suit, and the fiv hundred dollars was never paid.

IT MIGHT HAVE HAPPENED IN INDIANA.

The nomination of the champion pacer Our Thorp in the Royal Handicap, of 400 sovs, on the secon day of the Forbury Park Trotting Club's Summe Meeting, January 29 last, invested the event wit more than ordinary interest, as it was considered tha this brilliant horse would carry off another substan tial stake, with the possibility of providing spectator with something of a thrilling nature in doing so However, the O.Y.M. horse was unfortunate. Afte the second race, and prior to the Royal Handicap, h was sent out to give an exhibition of speed over a mile. It was not to be regarded as an attempt t lower the record, for the time was not being taker officially, and no purse was being offered by the club but Mr. Fleming decided to give the public an extra opportunity of seeing his horse in action. After a couple of preliminary rounds Our Thorpe dashed off accompanied by a pacemaker. On reaching the quarter-mile post he shied at a shadow thrown across the track by the starting post, and in attempting t jump it got tangled in his hopples, turned a complete somersault, and fell heavily. On his return to the paddock he appeared to be rather badly knocked about, having his knees skinned, his forehead grazed and was walking decidedly lame. It was impossible for him to appear on the track again during the afternoon, and his withdrawal from the Royal Handicap reduced the field to Emmeline and Eccentric. Emmeline, who also suffering from the effects of a fall, was not in the best of form, and was beaten by Eccentric over the mile and a quarter in 2:48 2-5.—Australian Trotting Record.

Notes and News

The Iowa State Fair is the first to adopt the new one-man judge rule and Magnus Flaws of Chicago has been tendered the appointment by E. J. Curtin, president of the Great Western Circuit, with the consent of Secretary Knight. Mr. Flaws has also been selected as starter at the South Dakota State Fair—his tenth year.

◈◈◈

The pacing mare Neva May 2:20¼ owned by Dr. R. J. Cluen of Parma, Idaho, was given through the season as untraced in various race reports from the northwest but it now develops that she's not so bad off for breeding after all, as she is by Suomi 2:16, a son of Zombro bred and owned by Tuttle Brothers of Rocklin, this state, while her dam is a daughter of Harold McKinney.

◈◈◈

Alex Wishart, who for some time has been head colt developer at Maple Lawn Farm, Delavan, Ill., the home of The Exponent and Trampfast, has given up that comfortable berth to accept Ned McCarr's former place as second trainer for Tommy Murphy, Ned having gone matineeing some weeks ago for the Pittsburgers. Wishart is one of the hardworking kind that Murphy requires, and as he has had the best of success in recent years the new combination ought to be a first class one.

◈ ◈ ◈

Gracie Pointer (4) 2:07¾, owned by Charley DeRyder, dropped a nice foal by Vernon McKinney 2:01½ Sunday night, a spooky little bay fellow wish as great a speed inheritance as the next one. Gracie Pointer was one of the fastest of all the Star Pointer 1:59¼ family, pacing below 2:05 as a three-year-old, while her dam was a daughter of Charles Derby 2:20, brother to the champion Klatawah (3) 2:05½ and sire in his own right of a goodly line of extremely fast pacers, including that grand old warrior Jim Logan, who shared the championship honors for three-year-olds with Klatawah and whose mile in 2:01¾ stamped him as the champion racing pacer of the Pacific coast.

◈◈◈

We present the following concerning the trotting mare Ella Mac 2:11½ for the benefit of the subscriber who made inquiry as to her present eligibility, it being his opinion that she was entitled to a time allowance in addition to the four seconds granted mile track performers when entered on half-mile courses: Ella Mac was raced in 1913, and while at no time during the season did she ever head a summary, she won one heat at Santa Rosa in 2:11½ in a three-heat, every-heat-a-race contest in which the total purse was divided into three equal parts with no added money awarded to the winner according to the standing in the summary at the conclusion of the event. Under these conditions each horse that won a heat in that race acquired a winrace record, and so appears in the winrace and eligibility book. Under the rules it is necessary that a horse race, in years subsequent to a winrace record, without winning a race or equaling his or her record in order to establish grounds for a time allowance, one second being allowed for each such season up to four, that being the limit of allowance. As Ella Mac has not been raced since acquiring the present winrace she carries she is eligible to the 2:12 class on mile tracks and to the 2:16 class on the small rings, allowance of four seconds to be claimed on the entry blank in writing whenever entry is made under the last provision.

◈◈◈

Will Durfee came up from Los Angeles to look after the various matters attendant upon the shipping of Copa de Oro to his new owner in New Zealand, and as usual had a hard time getting away from San Francisco and started for home—not that Chief White or Sheriff Finn lodged the Los Angeles county deputy in durance vile or that the wherewithal to make the return journey was lacking, a slight call at a local bank after the loading of Copa de Oro aboard the Moana straightening out that little matter. There were other business matters of more or less importance to be attended to, and William likes San Francisco and San Francisco likes William, so there you are. He looks like his winter's work had agreed with him in every respect, and both he and his horses will be ready for the fray when the bell rings at some of the early meetings that are staged in northern Ohio shortly before the Grand Season opens at North Randall. Virginia Barnette, Esperanza, White Sox and one or two others will be staked in a fair number of the early closers to which they are eligible, while they and others will be provided with engagements in the later closing purses. The Los Angeles trainers have been taking things rather more comfortably this winter than was the case last year, owing to the early meeting at the exposition, but speed making is beginning to be indulged in now and Will reports that there is quite a little on tap, and not all of it in his stable by a good deal. As Californians on the big line this summer will be few and far between Durfee will carry practically the undivided good wishes of all western horsemen.

Rodney J. MacKenzie, of whom his California friends have seen but little for the last several months, made a brief in and out visit here and at Pleasanton a few days ago, en route to the northwest after an eastern trip. After going over the local racing outlook and finding it none too promising, from his standpoint at least, he decided to ship practically all his trotting stock save a number of choice brood mares and stallions to the spring sale that Frank Kenney will hold May 2 to 5 at Indianapolis, where they "will sell under the watch." C. L. DeRyder, who has been Mr. MacKenzie's manager at Pleasanton and who is developing a strong penchant (with our customary apologies for the infringement of the Review's copyright) for the simple life as exemplified in the ownership of an alfalfa ranch and a bunch of fat cows, will follow the same course and join his consignment with that of his principal patron, the joint offerings being of a nature that should make them among the greatest attractions at the sale. There are well tried green trotters in the lot with demonstrated ability to trot around 2:08 or better, as well as some of the nicest younger things that the state of California affords at this moment. A more comprehensive mention of the consignments will be made at a future time, but right now we wish to congratulate Mr. Kenney and the prospective sale attendants upon the securing of this collection of horses. California can ill afford to lose them herself, as the ranks of our farms and racing stables are being badly depleted, but they will go with our best wishes for falling into good hands and delivering the goods in the very best manner.

◈ ◈ ◈

T. E. Pollock of Flagstaff, Arizona, near which city his Pinewood Stock Farm is located, was among the guests of the Palace hotel for several days of late, and while in his usual pleasant humor he had a slight "damper" put upon his enjoyment of the visit by a wire from home announcing the death of his great young trotter Pinewood (3) 2:24¼, considered by very many horsemen as one of the most promising youngsters in the land. This is the colt that created so much favorable comment at Pleasanton last spring prior to his purchase by Mr. Pollock, Ed Parker having made him and sold him at a good round figure. He was a son of Lijero 2:15½ and came from a line of stoutly bred producing dams, never showing the slightest indication of a desire to do anything but trot when in harness and turning a mile on the Pleasanton course right at 2:12 at that gait. He was started but twice last season, winning one race and being once third to Great Northern and Doctor Wayo at Albuquerque, being so good at Phoenix that Mr. Pollock thought better not to start him for fear of giving him a mark faster than was desirable that late in the season. That he was right as rain at that time he demonstrated fully by trotting the Phoenix track in 2:09¼ for Mr. Carman, the farm's trainer, the observers considering him to be up to a mile in 2:08 or better at that moment. Always inclined to be the boss of the outfit even as a two-year-old, it was thought that castration would prove beneficial and he was submitted to that operation with pleasing results. He had come around in excellent shape and was in great condition to take his spring work at the time Mr. Pollock left home and his death, from causes not made known in the telegraphic advice, is a severe disappointment, as he loomed as the best horse ever owned by Mr. Pollock and was to be pointed for a future career on the Grand Circuit.

◈◈◈

Fred W. Wadham, the well known southern California horsebreeder whose ranch is established in the heart of the flood country near Tia Juana, came through the recent stirring days with little pecuniary loss, owing to the fact that practically all of his property is on upland ground, enabling him to save all of his own stock and a great deal belonging to his neighbors, as well as to offer refuge and shelter to many of the unfortunate people who had their all washed away. Writing of the great disaster in a recent letter Mr. Wadham said in part: "The floods certainly made a clean sweep of the Tia Juana valley, the most fertile and productive section of San Diego county. One cannot realize the extent of the damage without having known the valley before and trying to compare it with the waste it is at present. The whole floor of the valley, at one time covered with alfalfa, corn and vegetables of all kinds, now looks like a desert and it will take years to redeem it. The greatest loss I myself had was the killing of a fine Airedale dog by the coast marines who were placed on patrol duty during the flood distress. This dog has been the guardian of my whole premises for the last seven years, family, stock and poultry, and I am glad to say that while performing all the duties of a well trained, well bred watch dog he has never bitten anybody. I was away from home when it happened and it is well that I was. If they had burned my house I could have rebuilt it, but I cannot bring back my steadfast friend and good and faithful servant. I am prosecuting the man who killed him and am also after the government for damages. The work the marines did down here was anything but complimentary to the service in many ways, and I am trying to make an example of this particular case." During the floods Mr. Wadham and his household were isolated from the balance of the world for nearly three weeks, receiving no mail or supplies during that time, and friends will join us in hoping that the experience is not one they will have to undergo again, and also in extending regrets for their loss.

Matt Zahner, who spent most of last season at the San Jose Driving Park and then went into winter quarters at Preston, is now at Hollister where he will have the pacing stallion Fred Branch in service.

◈◈◈

Mrs. H. E. Armstrong's famous matron Jessie M., dam of two in 2:10, by Del Norte 2:08, has foaled a fine baby to the cover of Joe Patchen II. 2:03¼, and will in all probably be mated this time with Vernon McKinney. Henry Smith has bred Della H. 2:10 to the same sire and the fast daughter of Hal B. and Jessie M. should prove very productive of extreme speed from such a cross.

◈ ◈ ◈

In answer to the inquiry of a Fresno subscriber for the breeding of Bodaker 2:13 we present the following information: Roan horse, foaled 1904, A. T. R. Number 59130, by Antrim 5918, son of Aberdeen 57; first dam Birdie by Jay Bird 5060, a good speed siring son of George Wilkes; second dam Lady Lyle by George Wilkes; third dam Dame Tansey by Daniel Lambert 102; fourth dam Quarter, untraced. The first three dams are producers and Bodaker trialed several seconds faster than his record, and while bred to but few mares is the sire of Sis Bodaker, that trotted last spring at Pleasanton close to 2:10.

◈ ◈ ◈

Mr. and Mrs. Andrew Albright Jr. of Newark, New Jersey, who have been spending the winter in southern California as is their usual custom, were registered at the St. Francis for a few days this week, their stay in San Francisco being entirely too short to please the numerous friends of each in the bay country. Mr. Albright's original intentions were to spend some time in this vicinity and have a look over the trotters and pacers at various nearby training points, but unforeseen circumstances prevented such a course and his local journeying was confined to one day at Pleasanton Driving Park, which has always exercised a wonderful drawing power upon all of our eastern visitors who are fond of the harness horse. Mr. Albright's home establishment, Prospect Farm, already numbers a fair quota of California-bred mares and their ranks will shortly be augmented by the addition of a number purchased during the present season. Baby Doll 2:10¼, the sister to the excellent futurity trotter and producer Katalina 2:11¼, bought by Mr. Albright on a former visit to California, was one of his early purchases this spring, while she will be accompanied on her eastern journey by half a dozen others that are distinguished in one or several of the important respects that contribute to equine excellence, including Inferlotta 2:04¾ by Inferna 2:15½ and out of that four-time producer of 2:08 speed, Carlotta Wilkes; Rose Gifford by Rex Gifford 2:14; Lilly S. (dam of Zomrect 2:12¼, King Lilly Pointer 2:14, etc.), by Direct 2:05½; and the Zombro mares Bessie Tea 2:22, Marie G. (sister to Clara G. 2:22¾, her dam being Wilhelmina by Woolsey, the brother to Sunol 2:08¼), and Zomzar (dam of the trotter El Carbine (2) 2:27¼, for whom the New Zealand folks paid John S. Mabel a healthy price some seasons ago) out of Alcanzara by Alcazar 2:20½. Shipment of this band will be made from Los Angeles on April 15, and it is possible that the car will contain a few others when the time comes to load out.

◈◈◈

A meeting of the directors of the Sonoma and Marin District Fair Association was held last Saturday morning in Santa Rosa and steps were taken toward the holding of a pretentious county fair and race meeting some time in August, an arrangement of dates being desired that would give Santa Rosa the first meeting of the season in this section of California. In recognition of the wide public demand for the fair and the benefits accruing to the community at large from the staging of the event, definite action was deferred until April twelfth, when another meeting will be held in which all the improvement bodies and agricultural associations of the district will participate and at which time resolutions backed by every one of these organizations will be drawn up requesting that the county supervisors make an appropriation of public funds for the benefit of the project. The request will be so well backed from so many widely varied interests and neighborhoods that there is every reason to believe that the supervisors will accord it favorable action, and this, coupled with the support derived from the business men of Santa Rosa, will give the association ample funds for putting on a really great fair. Moreover it is possible, though not yet definitely arranged, that the P. C. T. H. B. A. will cast their lot with the Sonoma folks and give their annual Breeders' meeting in conjunction with the fair, a course that met with such abundant success a few seasons ago. Mr. Edward H. Brown, prime mover of the many projects of a publicity nature carried to such successful conclusions by the Santa Rosans in recent years, was in this city a few days ago and had a long talk with representatives of the Breeders' Association on this particular subject, definite negotiations to be resumed after the meeting on April 12. Santa Rosa is anxious for the Breeders to bring their meeting there, no better facilities are offered in this part of the state for staging the colt stakes of that organization and the extensive program of purse races usually provided by them, and a pooling of interests along the lines suggested herein will doubtless prove highly satisfactory to both horsemen and promoters.

Thoroughbred Matters

DEATH CLAIMS J. J. GRANT.

Another chapter in the "passing of Emeryville" was written early this week when Marshal E. J. Carey of the town of that name called at the Mills Hotel, 1354 Park Avenue, to take his old friend Jim Grant on one of their frequent little rides about the country. Failing to meet the Marshal or to answer to the room call, an informal entrance to the room was made which revealed that the widely known old horseman had answered the call for the last long ride, heart failure having caused his death just a little earlier in the day.

Jesse James Grant, to give the deceased the full name which was seldom heard among his legion of friends, was one of the most widely known of the elder generation of horsemen on this coast. For many years prominently identified with the racing operations of Theodore Winters and J. B. Haggin, he achieved high rank in his calling as a trainer of thoroughbreds, while for the decade prior to its closing he was superintendent of the Emeryville race track, a position whose numerous duties he discharged in a manner most agreeable to his employers and in which he added greatly to his acquaintance and popularity among horsemen and the racegoing public. He had to all appearances been in the best of health and but three days before his death had celebrated the sixtieth anniversary of his birth. He was unmarried and was survived by but one brother, Angus Grant of Carson, Nevada, who arrived in time to be present at the funeral services, which were held under the auspices of the Masonic lodge. Mr. Grant was a worthy citizen of the community in which he had for so long made his home and for a number of years had served in the capacity of Trustee for the Town of Emeryville. His passing will stir a regretful chord in the hearts of his neighbors and of countless numbers of horsemen of high and low degree scattered throughout the world.

JOCKEY CLUB TO EXPERIMENT IN REMOUNT BREEDING.

With the matter of the future supply of cavalry horses in America assuming greater importance daily, the Jockey Club has determined upon an experiment which will be watched with a great deal of interest, as the outcome of the project will have a far-reaching effect upon the remount breeding industry in this country. Through its breeding bureau the parent association has made a donation of a number of excellent mares, of various types and breeds, to the Genesee Breeders and Farmers' Association in the Genesee valley, near Rochester, New York, with the stipulation in the deed of gift that the mares are to be mated with the thoroughbred stallions controlled by the bureau and now located in that section of the state, famed for the fertility of its pasture lands and the excellence and abundance of its water. The experiment is to continue through a period of years, and by the process of selection and elimination, in the ranks of sires, dams and produce, it is believed that the proper nick for the production of the most desirable type of cavalry horse will be determined. For bringing the highly important project to a reality, horse breeders are indebted to the activities of Mrs. Herbert Wadsworth, president of the association in the Genesee valley, who made the suggestions which induced the Jockey Club to extend its co-operation. The wide range of the experiment is best recognized by a consideration of the numerous families of horses represented in the following list of the mares placed with members of the association at a recent date:

Chestnut mare of the thoroughbred type, about 15.3, five years old, by Glendalough (thoroughbred), out of a half-bred mare. Mare bred in Virginia and has been used as a saddle horse.

Gray Irish mare, Bally Raggat, 11, bred in Ireland, by Windsor Scratch out of half-bred mare.

Bay mare, docked, twelve years old, by a Kentucky saddle horse, out of a registered trotting mare. This mare has had two foals and is reported as an excellent mother.

One heavy gray mare of unknown breeding, ten years old, and rather a Percheron type.

Black saddle mare, 6, 16 hands, by Kentucky saddle stallion. Bred in Kentucky and sold in New York by S. T. Harbison.

Ravena, 13, by Clifford, out of Bar Maid II. Bar Maid II. was by Laureate out of Bar Maid. Bar Maid was by Tipperary out of Lucy Fowler (dam of Tom Bowling).

Mink (see American Morgan Register No. 3), ch m, 1904, by Bob Morgan—Sorrell by Moses. Bred to Bion, Russian Orloff stallion (1905), gr h. Record 2:21½.

Lady Grey, English riding mare. Age and breeding not known. Bred to The Harvester (1905), record 2:01, by Walnut Hall—Notelet by Moko.

Chestnut mare, four years old, by Kavalli, registered trotting stallion, out of Exlex (thoroughbred).

Chestnut mare, 4, by Kavalli, out of Cito (thoroughbred).

Bay mare, 4, by Kavalli, out of Artiste II. (thoroughbred).

Bay mare, 5, by Kavalli, out of Forray II. (thoroughbred).

Bay mare, 5, Fair Hit (thoroughbred), by Omaha, out of Hit or Miss.

Oratress, brown mare, 10 (thoroughbred), 16 hands, by Maddison out of Brooklet.

Bay mare, 9 (thoroughbred), by Omaha, dam Zerelda.

Bay mare, by Meadowthorpe or Woolsthorpe, mare by Tea Tray.

Bay mare, 5, 16 hands, Louie Grice, by Bryn Mawr, out of Dolly Wagner (thoroughbred), scar below left shoulder, but perfectly sound.

Bay mare, 4, by Kavalli, out of Wyr (thoroughbred)-

Chestnut mare, 5 (thoroughbred), by Omaha, out of Jane Randolph.

Pete Clark, the form chart expert, who made his way back to his old haunts here in California at the close of the winter meeting at Juarez, stopped at San Diego en route and took a run across the line to the rehabilitated plant of the Lower California Jockey Club at Tia Juana, where he found the work of repairing the damage done by the floods rapidly nearing completion, with horses in goodly numbers arriving for the re-opening of the course on Saturday, April 15. Juarez had a rather light season owing to the various complications arising from the turmoil existing in the land of the little brown brother, and while there were a few uneasy days among the horsemen there no severe discomforts were experienced and the track will reopen as usual next Thanksgiving day.

DATES FOR CANADIAN RACING.

Ontario Jockey Club, Toronto, May 20 to May 27.

Dorval Jockey Club, Montreal, May 29 to June 5.

Montreal Jockey Club, Montreal, June 6 to June 13.

Connaught Park Jockey Club, Ottawa, June 15 to June 22.

Hamilton Jockey Club, Hamilton, June 24 to July 1.

Niagara Racing Association, Fort Erie, July 4 to July 11.

Windsor Jockey Club, Windsor, July 15 to July 22.

Hamilton Jockey Club, Hamilton, July 26 to August 2.

Niagara Racing Association, Fort Erie, August 5 to August 12.

Windsor Jockey Club, Windsor, August 16 to August 23.

Connaught Park Jockey Club, Ottawa, August 26 to September 2.

Montreal Jockey Club, Montreal, September 4 to September 11.

Dorval Jockey Club, Montreal, September 13 to September 20.

Ontario Jockey Club, Toronto, September 23 to September 30.

PAST PERFORMANCES OF THE DERBY CANDIDATES.

A couple of weeks ago we presented the list of entrants in the classic Kentucky Derby which will be run on May 13 at Churchill Downs, and now append a compilation of the past performances of the various candidates in their two-year-old form. It will be found of interest not only in doping out your favorite for the Derby but for preservation for future reference, as the list includes nearly three score of the choicest and most prominent youngsters in America, only six of which failed to race in 1915. The stake as it stands at present is worth $11,400, and as the starting fee is $200 and it is believed that fifteen to eighteen colts will participate in the contest it should be worth close to fifteen thousand dollars in all. We are indebted to the Thoroughbred Record for the following statistics:

Horse.	Sts.	1st	2d	3d	Unp.	Won
Thunderer	3	3	0	0	0	$17,385

*Raced in England.

JOHN E. MADDEN'S YOUNGSTERS.

A good start is half the battle according to all the accepted dope of the race track, especially in the sprints, but John Madden figures the good start as a consummation devoutly to be hoped for at all times. Long before the season opens John usually gets off right foot first by shipping the young 'uns to the track at which they are to open the season, selecting St. Patrick's Day as a highly appropriate occasion for making the shift, this time sending to Churchill Downs on the day of the patron saint of the Emerald Isle the following formidable array of colts and fillies:

Marse Henry, br c (3), by Ben Brush—Nun's Cloth by Melton.

Petrograd, ch c (2), by Peter Quince—Carthagena by St. Carlo.

Chestnut colt (2), by George Kessler—Cottage Girl by Hidalgo.

Brown colt (2), by Marta Santa—Divination by Horoscope.

Chestnut colt (2), by Watercress—Enterprise by Bathampton.

Oakwood Boy ch c (2), by Salvation—Escarola by Amigo.

Bay colt (2), by Cyclades—My Bessie by The Commoner.

Bay colt (2), by Rockton—Qnaga by Clifford.

Chestnut colt (2), by McGee—Sanfara by Ingoldsby.

Rebel, ch c (2), by Salvation—La Sinaloa by Emperor of Norfolk.

Brown gelding (2), by Plaudit—Meritorious by Miller.

Bay filly (2), by Hessian—Flora Basset by Bassetlaw.

Bay filly (2), by Hessian—Lychee Nut by Sir Modred.

Lightfoot, b f(2), by Fair Play—Lucy Cross by St. Simon.

Drink Jackson's Napa Soda.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

ALIENS VIOLATE GAME REGULATIONS.

Once again the Fish and Game Commission is confronted with the problem of curbing aliens who violate the game regulations. During the week a number of arrests and convictions were made. Joe Fartayan, a Frenchman, was apprehended at Novato for hunting without a license and having live quail in his possession. The game deputies also seized six snare traps that he had in his possession. He was fined $50.

Alexander Michir was convicted at Cloverdale for having deer meat in his possession and was taxed $50. L. M. Wonderly and F. C. Steenhofer were caught at Maple Creek with deer meat. The former pleaded guilty and was fined $25, while Steenhofer demanded a jury trial. Boze Spika (some name, eh?) was detected hunting without a license and drew a fine of $25. Eli Malardvich and George Gordon were also taken into custody at Rosevale for being without a license.

The numerous violations bears out the estimate of the Fish and Game authorities that aliens are guilty in 80 per cent of the cases. There has been some agitation for a law preventing aliens from having firearms in their possession, but so many legal tangles would result that no move in that direction has been made. Pennsylvania has such a law, but back there it is said that the aliens as a rule are of the lower classes, while in California we have some high class aliens who would be unjustly treated by a hard and fast law.

TROUT SEASON OPENS IN WASHINGTON.

State Game Warden L. H. Darwin has issued a circular letter to the county game wardens throughout Washington drawing their attention to the early open season and suggesting that sportsmen be notified in time to get out their yearly licenses. The letter follows:

To all Game Wardens, State of Washington:

Gentlemen: I desire to call your attention to the fact that the open season for the taking of trout commences his year on April 1, a month earlier than last year, when the open season started May 1.

I wish you would secure as much publicity in your local papers for this as possible to the end that all may be fully advised and have the same opportunity for getting out on the opening day.

In this connection I also desire to suggest that you make your own arrangements regarding proper police work on that day.

By calling attention to the fishing season opening a month earlier than last year you can undoubtedly largely increase the taking out of licenses before April 1. Respectfully,

L. H. DARWIN,
State Game Warden.

BRITISH SOLDIERS CANNOT HUNT WITHOUT A LICENSE.

An interesting point was raised at Malton last Saturday as to whether a soldier needs a gun license to shoot over land. It arose in the case of Trooper C. Bradshaw, of the Queen's Own Yorkshire Hussars, who was summoned for using a gun without a license at Amotherby on January 14th. The police evidence showed that defendant, when home on leave, was seen shooting rabbits, and when asked if he had a license replied that he was a soldier, and did not need one, adding that it was a caution if he could not have a bit of practice when on leave. The Chairman (Sir William Worsley) said defendant was laboring under a mistaken idea. Soldiers could only shoot by order of their commanding officers, and could not use guns without a license. A fine of 10s. was imposed. We believe that quite a number of soldiers are under the impression that they can shoot rabbits, ttc., without taking out a gun license.—Shooting Times and British Sportsman.

RIFLE NOTES OF CALIFORNIA.

F. C. Taylor won the Members's Match shot by the Mt. Tamalpais Military Academy Rifle Club of San Rafael, Cal., with a score of 94.

Ernest Woodbury was the winner of the Members' Match shot by the Sacramento High School Rifle Club, score 96.

The winner of the Members' Match shot by the California Grays Rifle Club of San Francisco was H. R. Christiansen, who scored 114.

With a score of 130 Geo. Von Breyman of Bicknell won the Members' Match shot by the Santa Maria Rifle Club.

F. F. Clark won the Members' Match shot by the Pasadena Rifle and Revolver Club with a score of 148.

The Members' Match shot by the Fort Bragg Rifle Club was won by Dr. W. C. Scott, score 110.

Largely through the good offices of the Red Bluff Rifle Club a company of National Guardsmen has been formed, with 94 names on the preliminary roll. It is expected that both indoor and outdoor ranges will be built by the State and be made available for use by rifle clubs, but the Red Bluff club expects to maintain its own range.

Resolutions commending the activities of the National Rifle Association in promoting civilian rifle training have been adopted by the Red Bluff Rifle Club and transmitted to the Senators and Representatives from California. "This club approves the plan and purposes of the National Rifle Association, and regards the idea of encouraging the use of arms and the practice of shooting by citizens as a very worthy object," the resolutions read. "We commend to your favorable consideration the activities of the N. R. A., and ask that you support any proposals or requests for legislation or assistance that may be made by said association for government aid in the construction of rifle practice ranges or the use of such ranges by civilians, and for the issuance of free ammunition for the Springfield rifles or rifle clubs or for any other reasonable requests in such matters."

Representative Raker of California has written to the N. R. A. that rifle clubs in his district are interested in these matters and he desires to intelligently co-operate with the association in the matter.

There is talk of forming a rifle club at Los Molinos.

COMING KENNEL SHOWS ON COAST.

March 30-April 1—Seattle Kennel Club, Seattle, Washington.

April 5-7—Victoria City Kennel Club, Victoria, B. C.

April 27-29—Golden Gate Kennel Club, Dreamland Rink, San Francisco.

September 4-7—Spokane Kennel Club, Spokane, Washington.

‡ ‡ ‡

First day's attendance at Westminster was the record for the club—7,500 paid admissions. A tribute to the dog.

‡ ‡ ‡

The largest dog in the show was Col. Jacob Ruppert's Ch. Lady Lyndon, tipping the scales at 240. Some St. Bernard. The smallest, Mme. Carreno's toy black and tan, Ch. Karno Little Britton.

‡ ‡ ‡

Dr. M. C. Hall, of the United States Bureau of Animal Industry, has published a bulletin in which he points out that the domestic status of the dog has not yet been adapted to the hygienic requirements of modern life, tand declares hat the destruction of all superfluous dogs, including those that are ownerless or whose owners do not keep them at home and in a sanitary condition, would mean an annual saving of hundreds of human lives, and an increase of millions of dollars in the wealth of the nation. He points out especially the danger of letting dogs take too great liberties with human beings; as for example, licking the baby's face or the children's candy.

The regular 50 target spoon shoot at the Youghiogheny Country Club, in spite of extreme cold weather, was held and well attended on March 18th. Dr. Heisey was high gun, winning the spoon in "A" class with a 44 out of a possible 50. He was closely followed by John Stallings with a 43, he and Stallings being tied in the first two events. Dr. Howder won the spoon in "B" class with a 39 out of a possible 50 and Napier the spoon in "C" class with a 32 out of 50, and A. M. Young the spoon in "D" class with 29 out of 50.

NEW GAME CLUB ORGANIZED.

Randall (Wash.), March 21.—A rod and gun club has been formed here under the imposing title of the Randle Song & Game Gird, Game Animal & Game Fish Association. Officers have been elected as follows: C. H. McMillion, president; H. A. Smith, secretary-treasurer. C. A. Huntington, game warden for Lewis and vicinity, and R. K. Peters, for Randle and vicinity, were the originators.

The object of the club is to protect song and insectivorous birds, game birds, game animals and game fish; to see that game laws are enforced; to encourage the propagation of game and game fish, and to secure such legislation as may conduct to these purposes.

Randle is the center for big game hunters, and the formation of such an association is especially timely now. Hundreds come in to hunt on the Cispus and around Lewis. There have been many violations of the law on account of the vast territory covered, as these violations have occurred in such remote places that apprehensions are difficult.

The purpose is also to build up a sentiment to protect game and to comply with the naw. The association is modeled after that of Pierce county and will be glad to affiliate with others in this county as well as with the state association. A large membership was secured at the very first meeting.

GOLDEN GATE TO HAVE BIG SHOW.

To judge from the number of inquiries received by O. F. Vedder, superintendent of the Golden Gate Kennel Club, the coming show will be the largest ever held by the club. Already a number of eastern kennel clubs have come forward with trophies, while local fanciers have been quick to respond to the postal cards sent them asking that they donate prizes. Indications are for a five-point show.

George W. Quintard, owner of the famous Ridgeway Fox Terrier kennels at Bayside, Long Island, will personally bring on Matford Vic and Wireboy of Paington for the show. Jack Bradshaw will exhibit a large string, including his famous bulldog, Country Model. Dr. Billings will show Bilmer Bingo, his crack home-bred Airedale. Dr. T. Martin Smith will show the crack fox terrier Art Smith, along with several others equally as good. Dr. Thomas Creely is getting a string ready for the big event, and A. S. Chisholm will show his well-known brace of bulldogs, Ridgeway Gertie Bertnana and Mackworth Bertie. William Valleas will show Berseker. H. M. Robertson of Pasadena will bring a large string of blue-blooded dogs. A large southern entry is expected. Mrs. Anita Baldwin is also expected to send along her well-known kennel of prize winners.

‡ ‡ ‡

Peter B. Kyne, the noted writer of magizine stories, writes as follows from Thousand Oaks, Berkeley:

"In conjunction with Mr. Henry Gutsch of Berkeley I have 'gone in' for English bulldogs, and, with good luck, Mr. Gutsch and I will have, by the end of this week, a kennel of as fine English bulldogs as anyone could wish for.

"At the present time we have but one brood bitch, Baroness Swasher, out of Ch. Dundee Swasher, ex. Forfarshire Frolic. She is a bitch with a wonderful body and hard to fault. She has never been benched, having been in whelp during show season. At present we have three beautiful bitches out of her first litter, and it is our intention to enter the three at the Kennel Club show. We hope to get at least first with one of these young bitches.

"Baroness Swasher is now in whelp to Berseker. At the present time we are negotiating with the hope of acquiring a stud dog of considerable repute."

CASTING RECORD IN SOUTH.

Los Angeles, Cal.—E. J. Kennedy established a new club record in heavy tackle distance fly at the contest of the Southern California Rod and Reel Club held at Eastlake Park March 11, by achieving a mark of ninety feet and six inches. Mr. Kennedy entered five events and took first place in four.

In a special team event George Griffey and A. E. Perkins defeated Oscar Lane and E. J. Kennedy.

A. Bauer of Chicago, a former president of the National Association of Scientific Angling Clubs, was present and watched the contest with interest.

Three fly and three bait events were scheduled, and the winners and their scores were as follows:

Accuracy fly—Charles Van Horn 98 9-15, E. J. Kennedy 98 7-15, E. M. McKenney 98 1-5.

Heavy tackle distance fly—E. J. Kennedy 90 feet 6 inches, Charles Van Horn 79 feet, J. J. Low 73 feet 6 inches.

Heavy tackle dry fly accuracy—E. J. Kennedy 99, Charles Van Horn 98.6, J. J. Low 96.8.

Half-ounce accuracy bait—E. J. Kennedy 98.1, A. Greenbaum 97.8, Oscar Lane 97.6.

Half-ounce distance bait—E. J. Kennedy 199.8, Oscar Lane 156.2, A. Greenbaum 149.8.

Two and one-half ounce distance bait—George Griffey 204.4, A. E. Perkins 193.5, Sherman Baker 79.6.

* * * *

Game Bag Limits.—The daily game bag limit on ducks in the various states which have a bag limit on wildfowl is as follows: George, 50; Oregon, 30; California, Utah, Arizona, Nebraska, Iowa, Arkansas, Louisiana, Alabama, Connecticut, Michigan, Ohio, New York, Florida, 25; Idaho, 24; Washington, Nevada, Montana, Colorado, New Mexico, South Dakota, Kansas, Vermont, New Hampshire, Mississippi, Tennessee, New Jersey, Delaware, 20; Wyoming, 18; New Jersey, Delaware, 20; Wyoming, 18; North Dakota, Minnesota, Missouri, Wisconsin, Illinois, Indiana, Massachusetts, 15; Oklahoma, 10; Maine, 10. Texas, Kentucky, Pennsylvania, West Virginia, Virginia, Rhode Island, North Carolina, South Carolina and Maryland have no bag limit on migratory water-fowl.

* * * *

Fishing Off Hilo.—Two ardent fishermen are now on Wawaii in the persons of J. W. Jump and H. L. Morris, mainlanders and men who travel all over the world to get a chance at the big game fish that patrol the oceans. The two visitors landed at Kawaihae from the Mauna Kea on Wednesday a week ago and they will wait there until their own power campan, the "Dixie Maru," reac hes that port. The sampan is a wonderfully fitted out boat and she is run by electricity, storage batteries being installed on the craft. She can make good speed and she is fitted out regardless of cost.

The fishermen had great luck off Maui, Molokai and Oahu and they have put up world's records for tuna fishing. Other game fish have also been landed by the experts and last Tuesday, off Oahu, Mr. Jump landed a twenty-three pound fish on a nine- ounce rod.

The mainlanders intend to fish all around this island, and they are making strenuous efforts to have H. V. Patten and Dr. Schoening, Hawaii's expert fishermen, join them for a few days' cruising.—Hilo Herald.

Sportsmen's Row

Willard Terrill, one of the popular trap-shooting boosters of San Francisco, leaves in a few days for Wilmington, Del., to accept a position with the Du Pont Company. Terrill's departure is the source of much regret for he was always a prime favorite.

* * * *

The Golden Gate Club is out to encourage the lady members to come out to the traps oftener. Through the efforts of some of the prominent members a reception room has been built to the clubhouse for the exclusive use of the fair shooters. The place will be fitted up nicely and it is hoped the lady shots will take advantage of the cordial invitation extended to them.

* * * *

Ever know that Billy Price is one of the pioneer bicycle riders of San Francisco? 'Tis a fact. He was a member of the famous Bay City Wheelmen, and don't be surprised if he is on a bike out with the old-timers when they hold their revival at the Park Stadium on April 9th.

* * * *

Clarence Nauman is another well-known shot who formerly secured pleasure out of wheeling. Billy is trying to get Clarence to turn out, too.

* * * *

Mrs. Harry Payne Whitney of New York is the first woman to take tarpon in the Useppa Island waters this season. Her name was entered first on the list in the woman's class for prizes.

* * * *

Members of the Shaver Lake Fishing Club of Fresno will hold their annual outing at the Shaver Lake clubhouse this year. The date for the trip will be May 20. About sixty members agreed on the proposition at the annual Italian dinner of the club given last Saturday night. Happenings at the outings in past years were related at the dinner. General M. W. Muller was tosatmaster.

* * * *

The Los Angeles Gun Club moved from Venice to its new home last week and by hard work and long hours succeeded in installing one trap so that the boys could try out their guns, March 12th. These grounds are situated four miles east of the post office at Los Angeles, and inside the city limits, with a number of surface lines running to the grounds, all of which are 5-cent car fare. By automobile it is ten minutes' ride from any of the sporting goods stores. Our official address is 4101 Alhambra Ave. We have leased ten acres of ground from the Huntington Estate, and shoot to the north. A row of large "gum" trees throw their shade entirely over the shooters' platform, which will be highly appreciated in this land of almost perpetual sunshine.

Our grand opening will take place on April 2nd. A free barbecue will be served.

LOS ANGELES GUN CLUB,
FRED H. TEEPLE, Sec'y.

The State game farm is still being conducted at Haward, Cal. The Commission is making arrangements to fix up the lease and discontinue operations, per the order of the Board of Control which considered that the game farm was too great an expense. Applications have been made to the Commission from many quarters for the permission and license to conduct private game farms.

* * * *

A. A. Durney is one of the enthusiastic members of the Alameda Elks who is taking an active interest in the trap-shooting sport. He was out to the opening and showed a deal of skill in breaking the blue rocks.

* * * *

The Fish and Game Commission is now located in commodious and spacious quarters in the New Call Building, San Francisco. Licenses and other business of the Commission will be transacted there in the future.

* * * *

The report current in some sections that the elk in Jackson Hole, Wyo., were starving to death is untrue, as the animals are in better shape than they usually are at this time of the year and there is plenty of feed for them. A few calves have died and there are a few cases of "scab" among the old bulls, which is not unusual, but generally speaking, the animals are in good condition.

* * * *

..The casting pcol of the Tacoma (Wash.) Bait and Fly Casting Club at Point Defiance Park is creating a deal of favorable comment in the northwest. This sunken lagoon is a natural beauty spot and an ideal place for casting, as the casters are sheltered from every catspaw of wind. The Pacific Northwest tournament was held there last August and it proved to be such a fine location for casting meets that the Tacoma casters determined to hold their club contests there in future.

* * * *

H. Gooding Field, a prominent authority on game fish in Hawaiian waters, is paying San Francisco a visit. Mr. Field recently entertained Fredk. Burnham of Martinez with a wonderful fishing trip around Honolulu.

* * * *

Bryon Kennedy, a 15-year-old lad of Savannah, Ga., has established a reputation as a shooter of big

We have with us a likeness of Toney Prior, the San Francisco crack who is starting the season with a bang. He was high gun at the Golden Gate shoot and carried off the honors last Sunday at San Jose.

game. He recently chased a big wild cat into a swamp and did not show up at home until he walked in with the dead animal across his shoulders. The cat was full grown.

* * * *

Said the game warden of Kansas to the game warden of Oklahoma: "I'll trade you 500 pairs of quail for 500 fish." And, thereupon, was the swap made, "sight unseen," as we boys used to say.

Miss Marian Fuller of Boston, an enthusiastic sportswoman, recently killed a white deer in the Adirondack Mountains. This deer had been seen by hunters for several years past, and many have shot at it, only to score failures. It had so many escapes that it became known as the "phantom deer." White deer are very rarely shot, and Miss Fuller has offered this specimen to the Museum of Natural History of Ne wYork. She says that every girl should spend a couple of months in the open each year.

COAST CLUBS JOIN A. A. T. A.

The American Amateur Trapshooters' Association, the shooters' new national supervisory body of which John Philip Sousa is President, has now completed its organization in thirty-nine states. In each state a Vice-president has been elected who will head the state organization and represent the various units in the National Council. The secretaries of the affiliated clubs in each state constitute the Council of State Secretaries, which, under the direction of the State Vice-President, will carry on the work of the Association. The State Organizations follow. The Pacific Coast clubs included in this list have all become affiliated with the Association; they have already held successful shoots for the official A. A. T. A. medals, and are as follows:

CALIFORNIA

Vice-President—Not yet elected.

Affiliated Club—San Jose Blue Rock Gun Club, O. N. Ford, Secretary.

MONTANA

Vice-President—Frank Conley of Deer Lodge (President Montana State Sportsmen's Association).

Affiliated Clubs—Forsyth Gun Club of Forsyth, J. L. Crawford, Secretary; Billings Rod & Gun Club of Billings, A. H. McArthur, Secretary.

NEBRASKA

Vice-President—Not yet elected.

Affiliated Clubs—Cody Gun Club of Cody, L. E. Brown, Secretary; Fremont Trapshooting Club of Fremont, C. H. Stoney, Secretary.

NEVADA

Vice-President—Not yet elected.

Affiliated Club—Star Pointer Gun Club of Ruth, J. E. Eudey, Secretary.

OREGON

Vice-President—H. H. Veatch of Cottage Grove (President Oregon State Sportsmen's Association).

Affiliated Clubs—Portland Gun Club of Portland, Frank Templeton, Secretary; Saint Helene Trapshooting Club of Saint Helene; Wellsdale Gun Club of Albany, C. G. Dodels, Secretary.

UTAH

Vice-President—John F. Cowan of Salt Lake City (President Utah State Sportsmen's Association).

WASHINGTON

Vice-President—Not yet elected.

Affiliated Clubs—Eagle Gun Club of Blaine, F. L. Gott, Secretary; Green Lake Gun Club of Seattle, W. C. Smith, Secretary; Idawa Gun Club of Balouse, E. L. Taylor, Secretary; Seattle Trapshooting Association of Seattle, W. B. Taft, Secretary; Spokane Gun Club of Spokane, Al. Wieseman, Secretary.

Hunters report hundreds of deer being slaughtered by wolves in northern Minnesota. The deep snow, thawing and feezing, which forms a crust strong enough to support the wolves, but which lets the deer through, has made the deer become an easy prey for these ravagers.

YOU CANNOT TRADE LICENSE.

It is apt to be rather a costly matter for Vancouver hunters who take the risk of going out to hunt without obtaining a license. In January at Point Grey, Arthur T. Welsh and T. H. Williams were each fined $50 and costs, Williams for shooting on Welsh's license and Welsh for permitting it to be done. The two men were caught in the woods in the vicinity of where the wardens are spreading out feed for the pheasants. They claimed, however, to be looking for wild ducks and had two spaniels with them.

An interesting coincidence was that Mr. Welsh had been summoned only ten days before for shooting without a license, but got off on suspended sentence on a plea that he had sent his brother to take out the license for him and did not know that it had not been taken out.

* * * *

Beavers Ordered Killed.—Beavers did so much damage at Merry Brook, Victoria County, N. B., that it became necessary for the Department of Lands and Mines to issue instructions to the game warden in that section to kill a number of them.

A colony of beavers were damming the brook so successfully as to cause destruction of property in that section and the residents asked that some measures be taken to protect their interests. The only way out of the situation was to order the game warden to kill some of the beavers.

Ten of the beavers were accordingly killed and their skins sold by the Department. The colony of beavers near Merry Brook is the largest in the province.

SATTLE FLY-CASTING TOURNEY.

The board of trustees of the Seattle Fly-Casters announce that two tournaments will be held this year among the local sharpshooters at the meet as follows: June 21 and 22 and August 23 and 24. Details of these meets in regard to entries, kind and number of events and other particulars will be announced at an early date.

Game Warden Rief addressed the meeting on the habits and life of game fish and advanced some suggestions as to means of ridding lakes and streams of suckers and other objectionable and destructive fish.

* * * *

Shoot in Snow.—When it comes to heeding the call of sportsmanship, you will have to hand it to the Leavenworth Gun Club, who all winter have been holding their regular trapshooting meets in several feet of snow. Ike Fisher, of Seattle, who returned from a shoot at Leavenworth during the past week, reports that the gunners mushed to the firing line threw five feet of snow and drew their supplies on sleds.

The scores for 100 birds were: J. B. Adams 91, I. M. Fisher 91, A. Pinch 87, F. T. Mottler 85, C. E. Butler 83, J. E. Tholin 84, S. G. Daly 82, T. Thompson 74, C. Eckhart 62, W. Smith 63. At fifty birds—J. A. Adams 40, J. W. Elliott 39, D. A. Burgett 37.

* * * *

"HOW" TO FORM TRAPSHOOTING LEAGUES.

The Du Pont Company has just issued a very interesting booklet on "Trapshooting Leagues." It tends to be to trapshooting what the baseball guide is to baseball. It explains the benefits derived by trapshooters and clubs from trapshooting leagues, and the best way to organize them.

Some of the items that are covered in the booklet are:—

Best Time to Form a League.
Cost of Organizing a League.
Organization of Trapshooting Leagues.
Duties of Officers and Committees.
Rules of Successful Leagues.
Follow-up Letter to Clubs.
How to Write Other Clubs.
Location of Clubs.
Kind of Shoots to Hold.
Lewis Class System.

It also describes in detail the inside workings of many of the country's best trapshooting leagues.

Most people go in for trapshooting on account of sport or pleasure. They like to shoot and go to the nearest trapshooting club. Often they take their friends and they in some cases join the club. Such interest is putting trapshooting in the first rank of sportdom. There is a new club formed every week.

Of late business interests are becoming enthused about the sport. Several large firms have financed the forming of trapshooting clubs among their employees.

In Sedgwick, Colorado, the city authorities have hired a professional trapshooter to give exhibitions every Saturday afternoon during 1916. Surely the sport has flourished in that locality to make civic authorities take a hand. In most cases officials have to be begged into submitting to new ideas or the "people's" wishes.

In Sioux Falls, South Dakota, the hardware stores have organized a local gun club, which holds its business meetings at the different stores in town.

The club shoots every week, and it conducted an Interstate Tournament some time ago. The members say it benefits the city as well as trade.

With interest so keen no one knows the next kind of organization that will "fall" fo rtrapshooting.

Coast Shoot to be Held in September

STATE TOURNEY AT SAN JOSE NEXT MONTH BEING BOOSTED

Portland (Ore.).—Efforts of the Portland Gun Club to secure sanction from the Interstate Association to hold the Pacific Coast Handicap and the Sportsmen's Association of the Northwest tournament on its traps at Everding Park during the Rose Festival week have failed, according to an announcement made by President A. W. Strowger.

Failing in their plans, the directors have decided to stage the northwest shoot June 4, 5, 6 and 7, and have been given permission to stage the Pacific Coast Handicap in September. The exact dates will be telegraphed to the local club's officers in the near future.

With the question of dates settled, President Strowger is preparing the program for the shoot, and he has planned one that will make the tournament attractive to every shooter in the northwest. In this shoot, medals and trophies valued at several thousand dollars will be shot for, in addition to the Rose Festival event of 10 0targets.

The Oregon State Shoot will be staged May 15 and 16 at Albany, Ore., and the Pacific Indians will hold their tournament at Tacoma, Wash., in July.

* * * *

San Jose Club.—A score of the best known shooters in California, A. G. Wilkes, a San Francisco millionaire, his guest, J. A. Considine, the well known New York theatrical man, and a couple of crack lady shots participated last Sunday in the most successful opening shoot ever staged by the San Jose Blue Rock Club. Over 5,000 shots were fired and some good early-season scores were made. The shooting indicated that some unusually high marks will probably feature the big Calffornia and Nevada shoot, which is to be held here May 28 to 31 inclusive, when a carload of clay pigeons will be flung from the traps and two or three thousand dollars' worth of ammunition burned up in the guns.

Tony Prior of San Francisco was high man Sunday, getting 97 out of his first 100 targets; O. N. Ford was second with 94, George H. Anderson was a close third with 93 and Louis Baumgartner fourth with 92. Anderson made the longest run of the day, getting 55 without a miss. Tony Prior and Bobby Ford each broke 50 straight.

Mrs. A. G. Wilkes shot over the local traps for the first time and made the good score of 65. Miss G. Meyers broke 63 out of her first 100 and improved as she went along. She hit 71 out of her second string.

Mr. Considine, who came down with the Wilkes's from San Francisco in their machine, had not shot for some time, but borrowed a gun and broke 84, a very good score under the circumstances.

Scores, first hundred—Tony Prior 97, San Francisco; O. N. Ford 94, San Jose; George H. Anderson 93, San Jose; R. C. Reed 93, Berkeley; Louie Baumgartner 92, San Jose; B. Worthen 92, San Francisco; R. E. Tamey 88, San Jose; R. C. Hogg 87, Saratoga; C. A. Haight 86, San Francisco; N. Howard 85, San Francisco; William McKagney 84, San Jose; C. H. Nash 84, San Jose; Dr. Heidleburg 83, San Jose; C. R. Arques 82, Madrone; William Ellis 82, San Francisco; J. A. Cook 82, Oakland; H. H. Rickelson 82, San Francisco; Ray Chapman 82, San Jose; A. G. Wilkes 82, San Francisco; Dr. McGettigan 81, San Francisco; J. W. Considine 72, San Francisco; Mrs. A. G. Wilkes 65, San Francisco; Miss G. Meyers 63, San Francisco; Dr. Topham 62, San Francisco.

Second hundred—Tonp Prior 97, B. Worthen 93, N. Howard 90, A. G. Wilkes 88, Dr. McGettigan 85, J. W. Considine 84, C. A. Haight 83, Miss Meyers 71, Dr. Topham 70.

* * * *

Pastime Club.—Walsh and Williams tied for high gun at the Pastime Gun Club shoot last Saturday, each getting 94 out of 100. Several other good scores were made, the scores following:—

Parry, shot at 100, broke 90; Sargent 100—93, Morse 100—91, Justin 40—36, Williams 100—94, Gillmore 100—90, Walsh 100—94, Barber 100—90, Beckwith 100—90, Andrews 80—70, Lowe 20—17, Mrs. Andrews 20—14.

* * * *

Los Angeles Club—There was an exciting shoot at the the Los Angeles Gun Club last Sunday and good scores mingled with the shooting. H. Pfirrmann stacked up the record score of the day with a 99, while several of his associates managed to reach the 90 mark. The scores:

H. Pfirrmann, Jr., 99x100; F. A. Richter 99, E. L. Mitchell 97, F. H. Mellus 94, D. E. Llewellyn 91, Baron A. De Ropp 88, F. H. Nichols 88, Charles Vories 88, Mrs. H. Pfirrmann 76, O. H. Binns 84, Steve Fullerton 93, George H. Melford 88, J. W. Meek 88, Frank Free 75, E. E. Skdale 90.

C. Vories, 24x25; E. Mitchell 49x50, F. H. Mellus 48x50, Steve Fullerton 48x50, G. H. Melford 46x50, J. W. Meek 45x50.

H. Vories, 19x25, F. J. Adams 44x50, H. Adams 38x50, H. F. Stewart 54x75, P. Schultz 15x25, L. R. Mellus 45x50, William Wilshire 45x50, N. A. Bonynge 34x50, J. F. Doods 46x50, M. D. Towne 44x50, S. B. Friend 40x50, Miss A. Wheeler 34x50, B. Steel 44x50, Fred Thatcher 30x50, R. H. Bungay 46x50, Fred H. Teepe 21x25, G. Dixon 23x25, Owen Council 45x50, F. E. Gregory 34x50, Dr. E. H. Hall 20x25, G. Mallard 22x25.

23-yard handicap—F. H. Mellus 44x50, E. L. Mitchell 44x50, H. Pfirrmann 45x50, George Milford 42x50, Steve Fullerton 42x50, J. W. Meek 22x25, William Wilshire 22x25.

* * * *

Seattle Association.—Trapshooting in Seattle is receiving more attention this season than for many years past. The Seattle Trapshooters' Association is in the midst of a very busy season. A new clubhouse on their Harbor Island grounds has added greatly to the comfort of the club members. Weather conditions have not been the best for good shooting during the past few programs, but nevertheless some good scores have been kept up.

A bunch of lady shooters is one of the features of this year's shooting, there being many of the "fair sex" turning out for the sport alluring. Miss Grace Hardy, Mrs. J. Ruppe, Mrs. J. W. Cochran, Mrs. J. H. Hopkins and Mrs. Fred Hayner are some of the ladies breaking into the game with the Seattle Club.

Tom Wilkes, the theatrical man, formerly of San Francisco, is now living in this city and has made his regular appearance on the Harbor Island grounds. E. Wolbach of Grand Island, Nebraska, recently visited here and shot in one of the regular programs.

Mat Grosman and Hugh Fleming continue in their high scores, Hugh recently breaking a 50 straight and then getting a 47 out of his second 50, running 84 straight without a miss. C. E. McKelvey, president of the club, recently furnished the surprise of the season and hung up a new record for Seattle by making a 100 straight record and missing only one out of 175 birds. This record was made in special added events.

The State Tournament is to be handled by the Seattle Club and with the improvements recently made should be a big attraction for outside shooters. New shooters are appearing each Sunday and are coming through with high class shooting.

The club is now in the midst of a handicap shoot of 150 targets to determine the owner of the gold pin recently presented to the club by H. R. Everding of the Portland, Ore., club.

SEATTLE TRAPSHOOTERS' ASS'N,
By E. A. FRY.

* * * *

Golden Gate Club.—There's going to be one banner merchandise shoot of the Golden Gate Club this month. Already seventy prizes have been secured, which assures one or more prizes to every man, woman and child that steps to the traps. The date has not been named as yet but it will likely be staged on Sunday, April 30th, which happens to be an open date. The prizes donated so generously by trapshooting enthusiasts offer a variety of useful and ornamental presents.

There was some practice shooting during the week with the following results:—

Fifty birds—Sunkel 25, Stelling 40, Jarsons 37, Swales 46, Craig 34, Bridgeforte 38, T. Prior 44, Miss Meyers 33, E. Prior 34, Wallace 36, Cullen 34, Webster 42, Terry 44, Reon 29, Adams 38, Chambers 22.

Seventy-five birds—Durney 37, Reed 69, Middleton 26, Boyd 52, Price 53, Blum 59, Garrett 69, Merriman 26, Martine 44.

One hundred birds—Dorsey 69, Howard 78, Stressler 78, Jones 65, Topham 75, Orr 88, Gaskel 52, Westerfeld 67, Lockhardt 78, Wade 44, Jordan 56, Swenson 73, Hawxhurst 96, Carman 71, Haight 88, Avery 90.

One hundred and fifty birds—Landry 125, McGettigan 118, Brickell 115, Dimond 120, Coleman 90, Hayden 97, French 111, Wilkes 131, Mrs. Wilkes 116, Sanborn 110, Dorsey 122, Stahl 133.

* * * *

Oakland Elks.—The newly organized Oakland Elks' Club is going to make a start in the alluring trap shooting sport tomorrow on the Golden Gate Club's grounds in Oakland. A large membership has been secured and the new officers of the body are counting on a banner attendance. Pretty soon when the boys get good they are going to challenge the Alameda Elks for a match shoot. There is a rumor abroad that the Berkeley brothers are going to get busy and put a club in the field. Then if San Francisco gets active and goes to the traps there could be formed a very interesting league with competition at regular intervals.

* * * *

Big Time Club.—Members of the Big Time Gun Club put the finishing touches on the new grounds of the club on the Schenk ranch in Fruit Ridge last Sunday. The gunners turned out in force to paint the traps, repair a fence and make other improvements. The work of getting the grounds in shape has been in progress every Sunday for the past six weeks.

The first shoot of the season will be held on the new grounds next Sunday. The club members are planning a big time for the formal opening. Tentative arrangements are now being made for an automobile parade, in which several scores of autos will be entered.

* * * *

Vernon Club.—Billy Wilshire's handsome, unique trophy, a fountain pen surrounded with diamonds and gold bands, was taken for keeps Sunday when it was contested for at the Vernon Club for the twenty-first time, by Dr. L. M. Packard with a score of forty-five dead clay pigeons out of the half-century pitched.

This selfsame trophy has been competed for since early in November of last year, and has brought out the keenest kind of trap shooting competition among the local cracks.

Only three shooters were ever successful enough to gain their second legs. They were Packard, Mellus and Bruner. Packard gained his early in the game and has been putting up a running fire ever since.

He unmasked his batteries yesterday and let loose with enough small chilled shot to do the necessary amount of damage to the fifty tarhawks to award him the prize permanently.

Stan Bruner, manager of the club, announces that big doings are promised for next Sunday, when a new three-leg trophy will be put up and several other valuable prizes. No entrance fee will be charged.

A good crowd was out to watch the shooters compete in the grand finale, and over 2700 targets were thrown.

Several notables were among the black bird exterminators, including Owen Council, Bob Bole, "Winchester" Harry Hoyt, "Doc" Cooper, "Red" Hedderly, king of the small-bore cracks; Bill Dougherty, and Pete Peterson.

Hedderly easily proved his title to the small-bore throne yesterday by breaking forty-six birds out of fifty with a twenty-gauge gun. The results follow:

Wilshire Handicap—

Shooter—	Hdcp.	Bke.	Targ.
Manderville	16	50	38
Peterson	17	39	17
Van Nest	16	50	30
Dodds	19	50	39
Bruner	19	50	40
Evans	18	50	35
Famechon	18	50	40
Kunz	18	50	37
Dougherty	17	50	39
Pugh	18	50	41
Palmer	16	50	27
George Oliver	16	50	45
Reid	16	50	24
Dr. L. M. Packard	19	50	45
Mrs. Groat	18	50	38
C. E. Groat	16	50	38
Dierdoff	17	50	42
Smith	16	50	25
Bob Bole	16	50	34
Owen Council	17	50	40
Hary Hoyt	16	50	41

20-Gauge Squad—

J. C. Cline, shot at 25, broke 17; Ed Hedderly 50—46, Brown 25—7, Stan Bruner 25—19.

* * * *

Salt Lake Club.—With very little wind blowing to bother the shooters, a score of clay bird enthusiasts enjoyed one of the best shoots of the season at the traps Sunday morning. Glen Bishop carried off the honors in the handicap shoot. In the regular event he tied with Bain, Johnston and Klein, making it necessary to shoot off the tie. In the first shoot-off he eliminated Johnston and Klein, establishing his claim as Western Arms champion, and tied again with Bain. In the finals he won from Bain by the score of 25 to 24.

In the shoot-off between Bray and Heagren, who tied in the cup shoot the previous Sunday, Bray defeated Heagren by a score of 20 to 19.

With the large number of new shooters who are becoming interested in the game this season, it is expected that the club may be compelled to use both traps regularly from now on. The club wishes to extend an invitation to scatter gun artists to participate in their regular Sunday morning shoots.

* * * *

Breeder and Sportsman:—

The Fresno Blue Rock Club will hold a registered shoot on Saturday, April 29th. Trusting we will see many visitors present, we remain,

Yours, FRESNO BLUE ROCK CLUB,
C. B. JACKSON, Sec.

COMING REGISTERED TOURNAMENTS.

California.

Los Angeles, May 8, 9.—Vernon Gun Club, William Pugh, Manager.

San Jose, May 28, 29, 30—San Jose Blue Rock Club, O. N. Ford, Secretary.

Eureka, July 4—Eureka Blue Rock Club, H. A. Hine, President.

Fresno, April 29—Fresno Blue Rock Club.

Oregon.

Portland, June 5, 6, 7—Sportsmen's Association of the Northwest Tournament, under the auspices of the Portland Gun Club, Frank Templeton, Secretary.

Washington.

Chehalis, May 30—Chehalis Rod and Gun Club, Gus T. Thacker, President.

Seattle, July 4—"Old Policy," Green Lake Gun Club, W. C. Smith, Secretary

Tacoma, July 18, 19, 20, 21—Pacific Indians, F. C. Riehl, Secretary.

PREDACEOUS BIRDS AND MAMMALS.

We hear it constantly said that the best method of increasing our game is to destroy predaceous birds and mammals. The people who make these statements fail to take into consideration that there are many factors which govern the increase or decrease of species and that the effect of predaceous birds and mammals is but slight in comparison with many other factors. Investigate conditions where game is most numerous and one will find that hawks and other vermin are also very abundant. Not only was game extremely abundant in early days in California, but predaceous birds and mammals were also abundant. There seems to be a balance established between the two. More game means more food for the enemies of game, and naturally an increase of them.

The argument is not that it is useless to destroy the enemies of game, but that this method of increasing game species is overemphasized. The hunter too often places the blame for the scarcity of game on hawks, weasels, skunks, etc., when the real blame should go on the hunter himself. So far as we can see predaceous birds and mammals do not greatly decrease any game species under natural conditions. The prime reason why game is scarce is because too large a toll has been taken by the hunter and food and cover for game has been greatly reduced.—California Fish and Game.

* * * *

Fishing at Sacramento.—While the Sacramento river remains high, too high for the best of fishing, several local Isaac Waltons have managed to land a few of the large striped bass now ascending the stream for spawning purposes. Some have been taken with clams as bait, while other fishermen have reported catches on spoons or other artificial bait. In the Mokelumne river and Snodgrass slough several good strings of striped bass have been secured.

Under the law striped bass may be taken at any time with hook and line, although fishing for black bass is not permitted until May 1. Net fishing at this time for the striped bass is illegal, although some of the fishermen are attempting it. Last week, for example, the game wardens found some fishermen who had put out nets in the Mokelumne. Several hours were required to pick up all the nets.

Water still is too high in the river for good catfishing, although in the more quiet back water of the sloughs this variety is taking the bait readily. During the past week one fisherman out for catfish hooked two rainbow trout, between 15 and 18 inches in which to his surprise violated all the rules and went after the catfish bait.

MRS. SCHILLING SHOOTS FROM AEROPLANE.

Trapshooting from aeroplanes seems to appeal especially to the women shooters. Several weeks ago Annie Oakley (Mrs. Frank E. Butler) tried hitting the inanimate clays from one of Uncle Sam's airships while flying over Atlantic City, N. J., at the rate of a mile a minute, and more recently Mrs. Ada Schilling, of Portland, Ore., attempted to annihilate a lot of clay targets while in an aeroplane crossing the Willamette river. If this keeps up aeroplane trapshooting will not be looked upon as a novelty.

Some time back A. B. Thaw, the aviator, purchased a hand-trap, and had it attached to his aeroplane, and he likes nothing better than to blaze away at the targets two or three hundred feet in the air, traveling as fast as the wind. Maybe he doesn't break as many as he would if he was on the ground, but Thaw seems to like the sport better in the air. Trapshooting will never be as popular from the aeroplane as on the ground, for everyone hasn't the means to live up to an aeroplane, nor the time to practice the managing of one.

Mrs. Butler discovered that she had to shoot very quickly, much quicker than on the ground, for the airship and the target going in the same direction didn't give her time to raise the gun and aim. Mrs. Schilling, too, had her difficulties in breaking the "blue rocks." She found that the airship, going so fast in the same direction as the target, sometimes passed the target before she could get perfect aim. She modified this somewhat by riging up the trap so that the target would be thrown in the air and a trifle to one side, but no matter how the targets are thrown they are difficult to hit when the airship is moving along 50 to 60 miles an hour.

Mrs. Schilling said that she enjoyed the air trip immensely and that she was happy to try the experiment again. Mrs. Schilling is the leading woman trapshooter on the Pacific Coast and one of the best in the United States. Only recently has she taken up her home in Portland. She was formerly connected with the Blue Rock Club of San Jose, Cal. In the 1915 averages of the Interstate Association for the Encouragement of Trapshooting, Mrs. Schilling was 113th on the list of 8,400 shooters. She had an average of 87.07, breaking 2,116 out of 2,443 targets in registered shoots.

Mrs. Schilling is the wife of Carl J. Schilling, an expert shot also. The little woman, for she is but 4 feet 11 inches in height, and weighs only 95 pounds, is one of the most popular frequenters of the trapshooting tournaments of the Western States. She holds her own at all times with the male shooters. She uses a 12-gauge gun and the men wonder at her endurance in the tournament matches. Mrs. Schilling is further handicapped in comparison with the male shooters through the necessity of using a light load. With a light load the shot-spread is less and her aim must be truer in order to break the "bird" before it gets out of range.

RIFLE SHOOTING IN CHINA.

Rifle shooting is popular in China, according to a report to the Department of Commerce by Vice Consul Gustave J. Barrett at Shanghai. He says: "Of the many branches of sport indulged in by the foreign residents of Shanghai, rifle and revolver shooting is very popular. This is evidenced by the fact that out of a total foreign population of approximately 15,000, there are seven clubs with a membership of 754. The clubs are: Clay Pigeon Club, organized in 1907, membership, 40; Société de Tir Internationale, organized in 1912, membership, 80; Shanghai Gun Club, organized in 1900, membership, 40; Miniature Rifle and Revolver Club, rifle club organized in 1909, revolver club organized in 1912, membership, 300, affiliated with miniature rifle clubs of Great Britain, though the Shanghai Club is strictly international in character; Shanghai Rifle Association, organized in 1902, membership, 187; Sportsman's Gun Club, organized in 1900, membership, 60, reorganized in 1910, present membership, 80; Swiss Rifle Club, organized in 1911, membership, 27.

"A unique organization is the Shanghai Volunteer Corps, organized in 1864, and composed of the younger members of Shanghai's international settlement," adds the Consul. "It is similar in purpose and organization to the State militias of the United States. Its personnel includes 51 officers and 1,127 enlisted men. An outdoor range is maintained where practice and competitive shoots are held at frequent intervals. Wild game shooting is popular in China and is carried on extensively during the open season from October to March."

* * * *

Jack Rabbit Drive.—It is estimated that 2,000 jackrabbits were killed in the South San Joaquin district last Sunday, and at least one coyote met his fate in the rabbit drive held by the South San Joaquin farmers under the direction of Ed Powers of Manteca and County Farm Bureau officials.

Hunters from all parts of the county gathered in the South San Joaquin during the morning and when the chase started at 9:30 o'clock there were more than 400 shotguns pointed out toward the hiding places of the long-eared jacks.

The march on the rabbits lasted from 9:30 in the morning until after 2 o'clock in the afternoon, and during the afternoon hundreds of automobile parties visited that part of the county to see the huntsmen and others gathering up the slain field pests.

Several Sacramento autoists joined in the hunt.

ELK RELEASED IN UTAH.

More than 100 persons gathered from great distances to see twenty-five elk belonging to the state, which have been kept in a pasture all winter near East Mountain, Emery county, Utah, turned loose on March 22, according to Fred W. Chambers, State Fish and Game Commissioner. Mr. Chambers said the elk were easily driven up a canyon to the spot where they were to again take up their wild existence, and were abandoned at the same point where the last elk ever seen in that part of the state was killed. In the herd are five bulls and twenty cows, most of which he said are with calf. The elk were secured from the Jackson's Hole country. In their new haunts Mr. Chambers said there is plenty of winter range. Shooting the animals will be strictly prohibited.

* * * *

Five hundred fishermen caught a total of at least 3,000 pounds of catfish Sunday in Utah lake, according to Fred W. Chambers. Mr. Chambers said the average catch of each angler was thirty fish, running about five to a pound. Some, however, he said, caught twice the average number and a few large fish were taken. Ordinarily angle worms and the old-fashioned still fishing methods were used.

ASK OPEN SEASON ON SHAGS.

A petition has been addressed to Carl D. Shoemaker, Oregon State Game Warden, by the Newport Rod and Gun Club, asking that an open season be declared on shags in the county till July 1, 1916. These birds subsist entirely on small fish and they are responsible annually for the destruction of thousands of salmon, trout and other food fish. There are hundreds of them feeding on fish in Yaquina, Alsea and Siletz bays and other waters.

Permission has been granted to sportsmen in Coos county to kill these shags during the above season and the same privilege is sought for the Newport section. The Newport gun club may choose sides and hold a shag hunt, the losers to pay for a banquet at which the State game official will be invited to attend.

* * * *

The Hood River Game Protective Association plays no favorites, and when some of the younger members of the organization—deputy game wardens—investigated the fish creel of C. K. Marshall, director of the Commercial Club and prominent in the circles of the game club, and discovered that he had several trout smaller than the legal length, ten inches, a complaint was duly sworn out, charging Mr. Marshall with violation of the game laws.

Mr. Marshall submitted to the penalty of his carelessness gracefully. He was obliged to leave the city on business. However, he instructed D. McDonald, president of the game association, to appear before Justice of the Peace Buck and plead guilty for him. The court advised that Mr. Marshall must make the plea in person, and on his return a fine will be assessed for the violation of the law.

KEEN INTEREST IN TRAP-SHOOTING.

William J. Higgins, a well known Sacramento blue rock enthusiast who has just finished a business trip through the Sacramento and San Joaquin valleys and the San Francisco Bay region, reports that this year will see the biggest trap shooting season in the history of California.

He reports that many new gun clubs are being formed and much more interest is being taken by the members of the clubs already organized. Higgins declares that the new policy of many clubs to bring to the front the social side of the trap meets has added greatly to the interest in the events.

New clubs will be in the field at Biggs, Folsom, Roseville, Nevada City, Grass Valley and Santa Rosa this season, while in several other towns sportsmen are discussing plans and may organize before many weeks.

Gun clubs are shooting regularly in the bay sections while shoots are also planned at Newman, Modesto and Fresno. At the last named city a big trap meeting is planned for Raisin Day, April 29th, when valuable prizes will be awarded to the winning contestants.

Great interest is also being taken in the Nevada-California shoot at San Jose on May 28th, 29th, 30th and 31st when over $1,000 in cash and prizes will be awarded the most expert marksman. The winner of this shoot will be eligible to compete in the Grand American Handicap in St. Louis in August.

The season in Sacramento is scheduled to open April 2nd when the Big Time Gun Club plans a big program at the John Schenk place on the Fruit Ridge Road.

* * * *

Greenhill (Wilmington, Del.), Club.—The cold wintry days do not seem to bother the Greenhill shooters in the least. There were 25 out March 20th in spite of the fact that it was one of the days set apart for a league shoot, which usually takes the majority of the Wilmington shooters out of town.

The highest score for the day was made by H. L. Morgan, who broke 24 out of 25 in his first event. Jack and Ray Kaiser each broke a 22. Jack is an old seasoned shooter and his brother Ray, who is brand new at the game, was more than delighted to tie with him.

Of the Greenhill members, J. Kaiser was high in class A, and R. Bonsall in class B. Each man was presented with a leather wallet.

Both the Greenhill and Nemours Trapshooting clubs, which are shooting every Saturday at the Greenhill grounds, have become affiliated with the American Amateur Trapshooters' Association and Miss Hammond is the first Wilmington shooter to shoot for one of the A. A. T. A. medals. She made both her shoots, making a 20 and a 16, and if she is fortunate on her next eight events of 25, she will win one of the bronze medals given to women shooters who are members of the A. A. T. A.—Harriet D. Hammond. Sec'y.

* * * *

Ely (Nev.) Club.—At a meeting of the White Pine Rod and Gun Club it was decided to hold a handicap trophy shoot, which will cover a period of twelve weeks. A committee consisting of President L. H. Murdock, E. L. Fletcher and Herman Wise was appointed to arrange matters of detail. The contestants will be handicapped by the added bird system based upon the club records.

The first of the series of shoots will be held at the club grounds in East Ely on Sunday afternoon. Interest in trap shooting is reviving and much activity is looked for in the sport during the coming summer.

* * * *

Vancouver (B. C.) Club.—Plans were laid at the annual meeting of the Vancouver Gun Club for the holding of the B. C. championships this year on Dominion Day, when a big Patriotic Shoot will be staged at the Oak street traps.

To this big Patriotic Shoot will come representatives from all over British Columbia, and there will also be shots from clubs as far down the coast as San Francisco. According to the present plans, the Dominion Day Patriotic Shoot of the Vancouver Gun Club promises to be one of the biggest meets ever held on the Pacific Coast.

It was decided at the meeting that the first practice shoot of the club this year will be staged on April 8. The opening shoot of the club's program, when merchandise prizes will be put up, will be on April 15. At this latter shoot there will be a special competition for beginners.

* * * *

Vallejo Club.—Judging from the talk heard wherever the powder-burners congregate, the Vallejo Gun Club will establish its traps in the vicinity of Flosden this year, the committee appointed to select a site being in favor of going north of town. For a time it was thought that the old race track might be secured, but inasmuch as this property has changed hands and is to be placed on the market it eliminates it as a site for the traps. The members of the gun club are manifesting much interest in the coming season and some great sport is anticipated. It is believed that many new gunners will affiliate with the organization and that some interesting club shoots will be featured during the summer months.

THE FARM

PIGS AND PREPAREDNESS.

Farmers who intelligently feed and care for their pregnant sows, so as not to overload them with fat, but instead give them feeds for thedevelopment of bone and muscle, are on the right road toward the production of strong and healthy litters. Their preparedness program, however, does not end here.

Two weeks before farrowing the sow should be put into a farrowing pen so that she will become acquainted and contented in her new quarters. The farrowing pen should be dry and free from draughts. Provide the pen with a guard rail made of 2 by 4-inch planks set 8 inches from the wall and 8 inches from the floor to prevent the sow from crushing the pigs against the wall. Use only a small quantity of bedding; leaves or straw are preferable. See that the sow has plenty of fresh water.

It pays to keep the sow quiet. Assistance at the time of farrowing should be at hand if needed, but the sow need not be helped if she is getting along well. In cold weather put the newly born pigs in a well warmed basket and after farrowing is over the pigs should be placed with the sow, care being taken that each one gets to a teat. When the afterbirth is passed is should be removed from the pen at once and burned or buried.

After farrowing the sow should have nothing but water and a little thin slop for the first day. The feeding for the first three or four days should be light, and the time consumed in getting the sow on full feed should be from a week to ten days, depending on the condition of the sow and the size and thrift of the litter. It takes plenty of sow's milk to make healthy growing pigs. If the pigs begin to scour, feed the sow less and give her plenty of strong lime water.

It is very necessary that the little pigs have plenty of exercise and all the sunlight that can be given them. Do not allow the pigs to run out during a cold rain. If possible, provide green feed or roots. These keep the sow healthy and cheapen the ration. Encourage the pigs to eat grain after they are three or four weeks old. Build a creep for them so they can feed alone. At this age feed for bone and muscle. Give them all the skim milk you can. If skim milk is not available, give them some meal and plenty of pasture. In about eight or ten weeks the pigs will have practically weaned themselves. After they have been successfully weaned the most perplexing job is over.

By putting into practice the essential points above mentioned the number of pigs raised to weaning should be increased. Hogs never fail to respond to good care. Kind treatment always means contentment with its corresponding profits.

—o—

Most feeders of dairy cows can produce protein more cheaply than they can buy it. Wise is the man who has a good supply of legume forage on hand from his alfalfa, clover, cowpea, or soybean fields, for the dairy cow cannot do her best on corn, timothy hay, or fodder even with good succulent silage to help maintain summer pasture conditions.

Bran at a dollar a hundred furnishes protein at a cost of about eight and a half cents a pound, while cotton seed at $1.90 a hundred furnishes it at a cost of little over fivecents a pound. The cost of producing the protein on the farm in alfalfa, clover, or other leguminous crops varies with local conditions, so that no such definite figures can be given, but almost any farmer should be able to supply himself at much less than five cents a pound. If he has neglected to do so, however, he must purchase protein in some form to supplement silage and corn.

Feeding two pounds of cottonseed meal a day to a cow that has been giving milk on such a ration as corn, fodder, and timothy hay will increase the flow to a surprising degree.

Gombault's Caustic Balsam

The Worlds Greatest and Surest

Veterinary Remedy

HAS IMITATORS BUT NO COMPETITORS!

SAFE, SPEEDY AND POSITIVE.

Supersedes All Cautery or Firing. Invaluable as a CURE for

FOUNDER,
WIND PUFFS,
THRUSH,
DIPHTHERIA,
SKIN DISEASES,
RINGBONE,
PINK EYE,
SWEENY,
BONY TUMORS,
LAMENESS FROM SPAVIN,
QUARTER CRACKS,
SCRATCHES,
POLL EVIL,
PARASITES.

REMOVES

BUNCHES or BLEMISHES,
SPLINTS,
CAPPED HOCK,
STRAINED TENDONS.

SAFE FOR ANYONE TO USE.

We guarantee that one tablespoonful of Caustic Balsam will produce more actual results than a whole bottle of any liniment or spavin mixture ever made. Every bottle sold is warranted to give satisfaction. Write for testimonials showing what the most prominent horsemen say of it. Price, $1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use.

The Accepted Standard VETERINANY REMEDY

Always Reliable. Sure in Results.

None genuine without the signature of The Lawrence-Williams Co.

Tacoma, Wash.

RACE TRACK FOR SALE.

The Ukiah race track, located a little less than a mile from the Court House at Ukiah and bounded by the State Highway on the west, the county road on the south, and the Northwestern Pacific Railroad nearly the entire length on the east side of the track. The property consists of twenty acres. Fifty-nine good box stalls, good grandstand, fencing in good order, and one of the best half mile tracks in the state. An excellent winter track and an ideal place to work horses during that season. Plenty of adjoining drives for jogging horses. Two wells on the premises as well as water from the city water works, with tanks conveniently arranged for sprinkling.

This is the only race track in Mendocino county and the location of the county fairs. Ukiah is the county seat and has a population of about 3000, is in a most fertile valley in which all kinds of fruit, vegetables, hay, grain and hops are grown. Has excellent water; no malaria or mosquitos. It has paved streets, good sewerage, and splendid gas and electric light works. There are many standard and thoroughbred horses in this county and the people are a race loving lot. This property is offered for sale at a less price than adjoining property is held at. For terms and further particulars address
F. W. KELLEY,
Care of Breeder and Sportsman.

ASSESSMENT NOTICE.

MAY DAY GOLD MINING COMPANY—Location of principal place of business, San Francisco, California. Location of works, Calaveras County, California.

Notice is hereby given that at a meeting of the Board of Directors, held on the 24th day of February, 1916, an assessment (No. 4) of five (5) cents per share was levied upon the capital stock of the corporation, payable immediately in United States Gold Coin, to the Secretary, at the office of the company, 1215 Van Ness Ave., San Francisco.

Any stock upon which this assessment shall remain unpaid on the 20th day of April, 1916, will be delinquent and advertised for sale at public auction, and unless payment is made before, will be sold on Friday, the 19th day of May, 1916, to pay the delinquent assessment, together with the cost of advertising and expenses of sale.

By order of the Board of Directors.
C. E. HEALD, Secretary.

Office—1215 Van Ness Ave., San Francisco, California.

FOR SALE.

BEST POLICY 42378, one of the best bred horses in the world. Handsome bay horse, small star in forehead, left hind pastern and left fore heel white. Has size, heavy boned, stylish, pure gaited trotter, sound, and a splendid individual in every respect. Best Policy is by Allerton 5128, dam Exine 2:18¼ by Expedition, next dam Euxine by Axtell, next dam Russia by Harold 413, next dam Miss Russell, dam of Maud S., etc. Best Policy has trotted a mile on the Hanford half mile track in 2:12. He is ten years old and with little training would make a good game race horse, and ninety percent of his colts are trotters. He will be sold at a great sacrifice. For price and further particulars address

For Greatest Satisfaction Use

DOUBLE SERVICE Automobile Tires

Guaranteed 7,000 Miles Service

Absolutely Puncturepproof

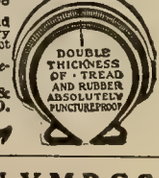
Double Service Tires are made double the thickness of the best standard make tires.

This 100% greater wearing surface naturally gives that much more mileage and service. The average of 12 miles of tough fabric and one inch surface tread rubber makes these tires *absolutely puncturepproof.*

These tires excel all others for use in the country over rough and rugged roads as well as on hard pavements. They are as easy riding and resilient as any other pneumatic tire—the air space and pressure being the same.

They are the *most economical* and "care free" tires made and are used where tires must be depended on and tire troubles cannot be tolerated. Many *Double Service* style tires are in use in the U. S. government and European War service.

Our output is limited to a certain amount, but for a short time we offer the following reduced special prices as an introductory Offer:



PRICES

	Tires	Tubes		Tires	Tubes
30x3 in.	$ 8.60	$2.30	36x4 in.	$17.45	$4.65
30x3½ in.	10.55	3.10	36x4½ in.	21.20	5.60
32x3½ in.	12.75	3.20	36x4½ in.	22.50	5.75
33x4 in.	15.75	4.20	37x4½ in.	23.60	6.20
34x4 in.	16.70	4.35	37x5 in.	26.50	6.60

All other sizes not included in above list also furnished. Non-skids at 10% additional. Terms: Payment with order at above special prices, a 10% discount allowed on orders for two or more tires. All personal checks must be certified.

Try these tires now and be convinced of their very high qualities. Sold direct to the consumer only. *Descriptive folder upon request. Write for it.*

Learn to Shoot

AN HOUR each week at the traps is an investment that pays big dividends in increased vim and efficiency.

Trapshooting

is a pleasant tonic for every tired-out, brain-fagged, business man. The whir of the clay birds—their subtle challenge to your gun skill—makes an alluring sport that eases and benefits both your mind and body. Costs less per year, club membership included, than any other popular sport.

Harpers Weekly and The Breeder and Sportsman

$5.50 WORTH FOR $3.25

Breeder and Sportsman

One Year, 52 Copies, Regular Price $3

THE BREEDER AND SPORTSMAN is the oldest weekly journal devoted to the Horse west of Chicago, having been established in 1882. This interest, together with the Kennel, Gun, Fishing, Coursing and kindred sports receiving the most attention in its columns; together with Agricultural and Dairying Departments, under whose headings especial attention is paid to the breeding, etc., of Cattle, Sheep, Hogs, Poultry, and all other animals connected with stock raising.

As an advertising medium to Racing Associations, Horsemen, Stock Breeders, Manufacturers of Sulkies, Carriages, Wagons, Agricultural and Dairying Implements and Machinery, Sporting Goods, Fanciers, Stock Foods, and all others desiring to bring their wares to the attention of the classes to whose interests the paper is devoted within the field mentioned above, the BREEDER AND SPORTSMAN will be found indispensable.

Harpers Weekly

Six Months, 26 Copies, Regular Price $2.50

At no time has it been so evident to Americans as now, that the most important thing in the lives of all of us is the progress of the European War.

Next to your daily bread the war interests you most vitally. It may even come to be the most important part of your problem of living.

The periodical of greatest fundamental interest to you today is the one that can best report those phases of the war that come closest to your country and you.

Because of connections abroad and at home, HARPER'S WEEKLY is that publication.

As a critical commentary that presents inside facts, it is the necessary bridge for intelligent readers between the daily newspaper and the monthly review.

You want HARPER'S WEEKLY now. You can get it now on trial at a remarkable reduction.

Send $3.25 Now and Get Them Both

THIS OFFER is made to all who will send us $3.25 before April 30th, 1916, whether for extension of subscription, renewal of subscription or a new subscription. Address:

REID'S REMARKABLE RECORD

Adds Further Evidence of the Superlative Quality of

Peters SHELLS

Shooting at Registered Tournaments during the past four years L. H. Reid of Seattle, has made a phenomenal Record of consistent High Scores

1912—	2115 ex	2200, 96.14%,	Pacific Coast High General Average.
1913—	3843 ex	4005, 95.95%,	Pacific Coast High General Average.
1914—	2146 ex	2225, 96.44%,	Professional Average for United States.
1915—	2482 ex	2550, 97.33%,	Pacific Coast High General Average.
Total,	10,586 ex	10,980, 96.46%	

During the above four years, Mr. Reid has shot at nearly 30,000 Registered and non-registered targets, breaking an average practically equal to the above. In accomplishing these results, he used about two-thirds TARGET (medium grade) and one-third IDEAL (high grade) shells, all with "STEEL WHERE STEEL BELONGS"

THE PETERS CARTRIDGE CO., — Pacific Coast Branch, — 585-587 Howard St., SAN FRANCISCO, CAL.

The "Crimp" Is A Vital Spot

¶ Put your finger on the shot end of your Remington UMC shot shell where the paper is folded into the inside of the case. That folded edge you know as the "crimp" or "turnover." You've indicated a vital spot in shot shell construction. Moreover, you've singled out one of the decided advantages in Remington UMC shells.

To give you velocity and pattern, the crimp must be hard and smooth enough to work easily through your gun—be it single, double, pump or auto—and yet not so hard as to interfere with the passage of the wads from the gun upon firing. A sufficient stiffness in the paper must be maintained to enable the crimp to withstand banging around in your pockets. Unless the crimp retains its shape, you can't feed it into the chamber of your gun.

These two points—adequate hardness for one purpose and adequate pliability for another—have been kept in mind by the makers of Remington UMC shot shells. By working toward a happy medium, perfection in shot shell case construction has been reached in Remington UMC.

REMINGTON UMC

Your dealer—the man who displays the Red Ball Sign of Sportsmen's Headquarters—will be glad to serve you from his full line of standard loads and sizes in Remington UMC ammunition. While you're there, look over his Remington UMC repeating and autoloading shotguns and rifles.

REMINGTON UMC

THE REMINGTON ARMS UNION METALLIC CARTRIDGE COMPANY

Woolworth Building New York City

PARAMOUNT PARKER GUNS

Look...

Mr. Woolfolk Henderson, an amateur, by scoring .9753% made the HIGHEST OFFICIAL GENERAL AVERAGE FOR 1915

Mr. Lester German, a professional, by scoring .9742% made SECOND OFFICIAL GENERAL AVERAGE FOR SAME PERIOD

CLEAN SWEEP ON DOUBLE TARGETS

Messrs. Guy V. Dering, S. A. Huntley and Woolfolk Henderson won FIRST, SECOND and THIRD,

Read... respectively, by scoring 9000%, 8666% and 8400%.

THE WORLD'S RECORD!!!

At Atlantic City Sept. 15 to 17 Mr Lester German broke all Tournament Records by scoring 647 OUT OF 650 TARGETS, with one run of 372 straight, which is longest for the year.

PARKER GUNS have won the Grand American Handicap 9 times out of 25 offers, once with 100 straight, only time made. Also 7 out of 9 Interstate Championship Events with highest scores ever made, twice with 198 x 200 at 18 yards rise.

Remember PARKER PACIFIC COAST RECORDS

In California Mr. Henry Pfirrmann won the Pacific Coast Handicap and Mr. J. Foster Couts won the Championship of California.

In Portland, Oregon, Mr. P. H. O'Brien by scoring 241 straight made the record for the Pacific Coast.

If interested in small bore guns write for instructive booklet which will be sent free on request. For further particulars regarding guns from 8 to 28 gauge, address

TRAINING THE HOUND

A PRACTICAL TREATISE ON THE TRAINING OF FOX HOUNDS, BEAGLES, AND COON HOUNDS.

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; $1.50, postpaid.

BREEDER AND SPORTSMAN

P. O. DRAWER 447, SAN FRANCISCO, CAL.

BREEDER AND SPORTSMAN

VOLUME LXVIII. No. 15. SAN FRANCISCO, SATURDAY, APRIL 8, 1916. Subscription—$3.00 Per Year

A TWO-MINUTE TRIO AT PLEASANTON

C. L. DeRyder, otherwise known as "Alfalfa Charley," Gracie Pointer 2:07¾ by Star Pointer 1:59¼ and her three-day-old foal by Vernon McKinney 2:01½. Photographed March 29.

Pleasanton Driving Park

PLEASANTON, CALIFORNIA

offers for service for the season of 1916 the following stallions:

THE ANVIL 2:02 3-4

Fastest trotting stallion ever offered for service in California, and fourth fastest entire trotter in the world

Son of St. Valiant Vincent 2:11¾ (by St. Vincent 2:13½ out of the triple producer Grace Lee 2:29¼ by Electioneer 125); dam Amy Smith by Emperor Wilkes 2:20¾, sire of Princess Eulalia (4) 2:09¼, etc.; grandam by Hambletonian 539.

The Anvil is regarded by Edward F. Geers as one of the very greatest trotters that he has ever raced. For five years the pair of Tennesseeans went to the races together and in that time were but twice unplaced, while winning a total of fifteen races, including the historic M. and M.

As an individual he is most pleasing, not too large or coarse in any way but smoothly and compactly made and "all horse" in every line. He is a perfect headed, pure gaited trotter, with the very best of disposition, and is destined to become a very great sire of trotting speed. His opportunities in the stud have been very slight as he has been retired from racing only since the close of 1914, and has but three or four foals now three years old. He was selected to head the stud at Pleasanton Driving Park not only on account of his great qualities as a race trotter, but because one of his first foals, Anvilite (2) 2:22¼, with a trial of ten seconds or more faster, is in every way the greatest colt trotter ever handled by C. L. DeRyder. The services of The Anvil are recommended to you without reserve.

Fee for The Anvil 2:02¾, $100 with usual privilege

Vernon McKinney 2:01 1-2

Fastest member of the great family of McKinney 2:11¼

Sire of VERNA McKINNEY (2) 2:13 (his first foal raced), fastest two-year-old pacing filly of 1915.

Son of Guy McKinney 37625 (by McKinney 2:11¼ out of Flossie Drais by Guy Wilkes 2:15¼); dam Maud Vernon by Mount Vernon 2:15¾, sire of the dams of Leata J. 2:03, etc.; grandam Mag by General McClellan, sire of the dams of Mack Mack 2:08, etc.

Vernon McKinney's racing career was not an extensive one but will long be remembered for the excellence of his performances, as his winnings include a Chamber of Commerce stake in time very near the record for that event at the time, and he is the fastest of all the McKinneys.

He is a horse of rare qualities in the way of individual excellence, almost ideal in behavior and temperament in harness or out. Since his retirement he has been a popular horse in the stud and our claim that he would prove a very great sire of pacing speed has been fully substantiated, his first foal to be raced being the season champion for the age and gait in 1915, a most excellent testimonial to his potency. He is a very sure breeder, his get are uniformly endowed with natural speed and the physical and mental requirements of modern race horses and find ready sale at most gratifying prices.

Fee for Vernon McKinney 2:01½, $50 with usual privilege

The best of care taken of mares in any manner owners may desire, but no responsibility assumed for accidents or escapes. Address for particulars

CHAS. L. DeRYDER, Superintendent, PLEASANTON, CAL.

MR BROODMARE OWNER, do you realize the importance of the simple facts that sixty of McKinney's sons and nearly fifty of his daughters are producers of standard performers? That the McKinneys won more money than any other family in 1915? That the McKinneys won the largest percentage of the futurities, both east and west, in 1915? That McKinney has more sons to sire 2:10 performers than any other stallion living? Keep these facts in mind, and remember that I offer you the services of

THE VERY BEST SON OF McKINNEY

CARLOKIN 2:07 1-2 EXHIBITION MILE 2:05 1-4

Champion Trotter and Champion Sire of Trotters in the West

Reg. No. 36548. Licensed Pure Bred, Cert. No. 41.

Mahogany bay. Height 15.1½. Weight 1060.

Sire of ESPERANZA (3) 2:09, only three-year-old to win every trotting stake for that age on the Pacific coast, and also the following colt performers:

The Lark (4)	2:09½	Carsto (2)	2:22½
Ethel D. (3)	2:11	Helen Belle (2)	2:22½
Carl (3)	2:14¼	Carlschen (2)	2:23
Doctor S.	2:14½	Santiago (3)	2:24¼
Johnny Dugan p (3)	2:16	May Marian p (3)	2:24¼
Hermes (2)	2:16½	Carlrich p (2)	2:24½
John Warwick (2)	2:17	El Carbine (2)	2:27½
Nicola B. (3)	2:18½	Eileen C. (3)	2:29
Miss Carlokin p	2:20	Carlos (2)	2:29¾
Carleta (2)	2:20¾	Fulton G. (2)	2:30

Carlokin is the best son of McKinney not only by performance but by breeding as well, his dam being the famous producer Carlotta Wilkes, whose ten performers include four with records below 2:10, while his grandam and great grandam were also producers, by Alcantara and Clark Chief. He has demonstrated that he sires more early and extreme speed than any other stallion in California, and his get are courageous race horses, endowed with soundness and wonderful vitality.

Fee: $75 the season, usual privileges; details on request.

W. G. DURFEE 2019 South Figueroa St. LOS ANGELES, CAL.

Saddle Horse Breeders are Respectfully Offered the Services of the Magnificent young Stallion

Breed to him for "Horses that will race." Fee for 1916, seventy-five dollars with usual privilege or money refunded at our option. Write for detailed particulars, all information gladly furnished.—Licensed Pure Bred, Cert. 23.

HEMET, CAL.

Derbertha Bells

Licensed Pure Bred, Cert. No. 226

NO. 60907 :: A. T. R. RULE 1.

Derbertha Bells, foaled 1911, stands 15.3, weighs 1200 pounds and is a solid dark bay or brown of magnificent conformation, style and trotting action. His breeding, too, is of the best, tracing 20 times to Hambletonian 10—5 through Electioneer, 5 through George Wilkes, 4 through Strathmore and 4 through Abdallah 15 (the big four of the sons of Hambletonian) and twice through his daughters; balanced by 18 crosses to Mambrino Chief 11—five of these through his greatest son Mambrino Patchen 58 (leading progenitor of the dams of trotting sires); 25 crosses to Imp. Bellfounder, 8 to Henry Clay, 8 to Imp. Trustee, 5 to Pilot Jr. 12, and sustained by such other famous broodmare sires as The Moor, A. W. Richmond, Black Hawk, St. Clair, Geo. M. Patchen, Grey Eagle, Imp. Glencoe, Williamson's Belmont, etc. His broodmare inheritance is incomparably great — 5 crosses to Green Mountain Maid (dam of 9 including a world's champion and 4 sires including Electioneer, the world's greatest trotting progenitor), 3 crosses to Alma Mater (dam of 8 and 7 sires, including Alcyone and Alcantara), and one each to Miss Russell (dam of 8 including Maud S. 2:08¾ and 6 sires including Nutwood, the world's greatest broodmare sire), Dolly (dam of 4 and 5 sires, including Director and Onward), Beautiful Bells (dam of 11 trotters including 4 world's champions and 9 sires) and Minnehaha (dam of 8 including a champion yearling and 6 sires). These are the greatest mares of history in number of descendants in the standard list, to which add two crosses to Bertha (the only mare with 2 in 2:04½, 5 in 2:10 and 13 in the list; with two 2:05 producing sons, five 2:10 producing sons and two other sons with produce only a fraction slower).

This pedigree contains the blood of 20 mares (counting duplicates) with an average of 9 performers each and presents an aggregation of family founding sires and dams unexcelled, if not unequaled. Neither is it necessary to confine ourselves to the standard or even to the 2:10 list, or go into the musty records of the distant past for examples of the prepotency of these blood lines in the production of speed, but we can easily and abundantly demonstrate their value in speed of the first flight in the present generation. He has 1 two-year-old and 2 yearlings that stamp him as a sire entirely worthy of his superlative antecedents, as they (like their sire) are uniformly large, handsome, intelligent, tractable and of great speed promise. Come and see them and the new crop and you will breed to him. Fee $25 the season with return privilege. Tabulated pedigree upon request.

J. W. PENDLETON,
1601 Seminary Avenue, Oakland, California

Don't Make a Mistake by not Breeding to the Great

KING LILLY POINTER

Registered No. 5223.

By the great Star Pointer 1:59¼, 3183, dam Lilly S. by Direct 2:05¼, 20113,—two world's champions for many years.

Second dam the great race and broodmare Lilly Stanley.

King Lilly Pointer is a green horse with remarkable speed. With very little work he has paced a mile on the Los Angeles track in 2:03¼ with ease. He goes without straps and has paced a half in 1:01¼ in third position all the way around, and has easily stepped quarters in 29 seconds. In another work out he went to the quarter in 30½ seconds, the second eighth in 14 seconds, finishing the last quarter in 30 seconds, going the seventh eighth in 14 seconds,—a 1:52 gait.

He is a seal brown in color, 15.2½ hands high, weighs 1100, and his get prove that he will be a sire of high-class race horses.

Fee $35 cash with return privilege, or right of substituting another mare. Best of care taken of mares, but no responsibility assumed for accidents of any kind.

Address for particulars, tabulated pedigree showing that he is the greatest bred pacing stallion in the United States,

W. H. NESMITH, 4218 S. Figueroa St., Los Angeles, Cal.

King Lilly Pointer can be seen at Los Angeles Exposition Park. Phone Home 28446.

Expressive Mac 2:25½

A. T. R. No. 41513. Licensed Pure Bred, Cert. No. 1041.

SIRE OF

Clara Mac 2:04½; Vera Hal 2:05; Madam Mac 2:07¼

Only stallion offered for service in California to sire two in 2:05, three in 2:10.

Also sire of Eddy Mac (3) 2:29½, trial 2:13; Nellie Mac trial 2:09½ trotting, 1915, and others with fast trials

Son of McKINNEY 2:11¼ (sire of 27 in 2:10) and the greatest living broodmare, EXPRESSIVE (3) 2:12½ (dam of 6 trotters, 2 in 2:10) by ELECTIONEER 125. Ideal in color, size and conformation — seal brown, height 16½ hands, weight 1275 pounds. Permanently in the stud at my ranch three miles south of Selma at $25 the season, ususl return privilege, or $35 to insure. Good pasture at $2 per month and best of care given mares but no responsibility assumed for accidents or escapes. Address for all particulars,

J. H. NELSON, Selma, Cal.

GET IN THE CHAMPION CLASS

Mate your speedy mares with

WM HAROLD 2:13¼

Reg. No. 55286

A great race horse and sire by The Great Sidney, sire of Sidney Dillon, sire of Lou Dillon 1:58½, world's champion mare and first trotter to beat 2 minutes; dam Cricket 2:10, dam of 6 in the list.

Terms on Application. Mares boarded.

THE YEAR BOOK IS OUT.

After being posted on the overdue board at the Marine Exchange for a matter of several weeks the good ship Volume Thirty-one of the Year Book Line, registered under the ownership of the A. T. R. A., made port last week after a stormy passage of nearly ninety days from the company wharves on the south arm of Bubbly Creek, on the western shores of Lake Michigan. Loaded to the Plimsoll with statistical tables and with her rigging and superstructure coated thick with ice weighing hundreds of tons additional, token of the high seas and zero weather encountered en route, she set so low in the water that the full power of her engines was required to maintain any headway to speak of, even in fair weather, while in the rough going she was at the mercy of the elements, practically every heavy sea breaking over her bow and sweeping her from stem to stern. In his report to the owners Captain Knight makes mention of a mutiny in the black gang before the vessel was well out to sea, causing her to put back to a strange port and ship an entire new bunch of stokers and repair some slight injury suffered by her boilers during the trouble. Once away again Chief Engineer Best, who alone of all the officers and crew really understood the intracies of her compound compiling engines, became the victim of a severe illness, his absence from his post serving not only to retard the vessel's progress but actually to endanger her safety. During the first few hours of his indisposition the vessel, with her engines barely turning, wallowed in the trough of the waves and encountered the further misfortune of having her rudder put out of commission by improper handling while trying to come about under slight headway. At this juncture Mrs. Best, the plucky wife of the sick chief who has made many trips with him and understood better than anyone else the peculiarities of the specially constructed engines, stepped into the breach and set the machinery to rights while the crew risked life and limb in the construction of a jury rudder, after which the momentous voyage was resumed and eventually completed. Our water front reporter heard an unconfirmed rumor to the effect that while the vessel was lying helpless and in dire straits, with distress signals displayed from the masthead, she was passed by an able ship flying the colors of the rival company, the N. T. A., whose captain violated all ethics of the sea by failing to make the slightest offer of assistance or to stand by in case of need in the apparently impending emergency. This rumor could not be substantiated and was traceable merely to members of the crew, none of the ship's officers having any statement to make in the matter.

Owing to the long delays encountered in the voyage and the exceptionally swift passage made by that ultra-modern turbiner, the Review Guide, registered from the same home port and carrying a somewhat similar cargo, the merchandise in the capacious hold of Volume Thirty-one will find a much slower sale than would have been the case had the trip been made on scheduled time. However, Volume Thirty-one carries the sole official reports of the proceedings of the past season, and we bespeak for it a generous patronage on that account. For the moderate sum of $3.25, these complete reports will be delivered to your address and will be found to be well worth the money. Parties with the statistics from former seasons already in their libraries should not fail to keep the series complete, while the newcomer to the business will find the information provided of inestimable value. We have an extra copy of the same at this office and will be pleased to forward it to any address at the regular price, as above.

Members of the San Francisco-California Driving Club met on Tuesday evening of this week for the first time this season, the principal business of the session being the nomination of officers for the ensuing year, the election to be held next Tuesday evening, April 11, at the customary meeting place. A re-election of the officers under whose leadership the club enjoyed such a success in 1915 was urged by almost all in attendance, but both President Giannini and Secretary Marisch begged to be excused from further service of an active nature. The plea of Mr. Marisch was recognized but Mr. Giannini's "alibis" were not acceptable to his fellow members and he was nominated by a unanimous vote to succeed himself as president, other selections being as follows: Jack Welsh, vice-president; I. B. Dalziel, treasurer; W. J. Kenney, secretary; Dan Keating, sergeant at arms; Bert Edwards, J. J. Ryan, Timothy D. Sexton, A. Ottinger and Joe Kidd, directors. As has been the usual custom in the past the club will race on Sundays throughout the season at the Stadium track in Golden Gate Park, the first matinee being scheduled for Sunday, May 14, by which time practically all the horses of the various string will be well along in their training and ready to start for the trophies.

Ventura Fair Association Is Flourishing

THREE YEARS OLD AND GROWING FAST

Encouraged by the great success of its autumn events of 1914 and 1915 the Ventura County Fair Association has made arrangements for another and perhaps many more exhibitions. The 1916 event is scheduled for September 13-16, inclusive, at Seaside Park, Ventura.

The Board of Directors this year comprises forty-five of the leading individuals of "the greatest lima bean producing county in California," and thirteen of the forty-five are women—a decided departure from the past. The experience of the Ventura association has been that women did more, probably, towards making the fair a success than any other single element that entered into it. The county of Ventura first gave the women their just recognition by building them a $7,000 pavilion for housing their remarkable exhibit.

Those comprising the fair's directorate are as follows: A. L. Hobson, Ventura; E. P. Foster, Ventura; John Lagomarsino Sr., Ventura; Sol N. Sheridan, Ventura; T. G. Gabbert, Ventura; T. S. Clark, J. J. Burke, E. S. Thacher and Earl Soules, Nordhoff; E. C. Canet, Ventura; F. E. Davis, L. E. Mills, William Pope, Santa Paula; A. Camarillo , C. C. Perkins, W. H. Stiles, Caramillo; Charles Donlon, T. A. Rice, Ernest Eastwood, Joseph McGrath, J. L. Milligan, Oxnard; F. A. Snyder, Somis; Leon Lehman, Oxnard; T. J. Donovan, Thomas Gould, Geo. C. Power, L. P. Hathaway and Wm. Cook, Ventura; Roger G. Edwards, Saticoy; Mrs. T. A. Rice, Mrs. Joseph Hummell, Mrs. Thomas Walker, Oxnard; Mrs. A. Camarillo, Mrs. Cora Doremus and Mrs. Chas. Daily, Camarillo; Mrs. F. E. Davis, Mrs. D. W. Mott, Santa Paula; Mrs. Frank Beaman, Mrs. A. L. Drown, Nordhoff; Mrs. G. W. Tighe, Fillmore; Mrs. L. B. Hogue and Mrs. Frank J. Sifford, Ventura; W. H. Fleet, Sespe; James Walker, Bardsdale; J. W. Hitch, Somis.

The officers for 1916 are as follows:

President—Adolfo Camarillo, Camarillo.

Vice-Presidents—E. P. Foster, Ventura, Charles Donlon, Oxnard and T. A. Rice, Oxnard.

Treasurer—Wilbur H. Stiles, Camarillo.

Secretary—L. P. Hathaway, Ventura.

Harness and running events will be a strong feature of the amusement program this season; county horsemen are even now training at Seaside Park for monthly matinees, the first of which is to be held April 30, all by way of keeping the stock in condition for the fair's races. Chariot races will be pulled off on two of the days of the fair, while the event of real class will be scheduled for probably the last afternoon—a race or races in which jumpers, ridden by men and women from Coronado, Santa Barbara, Burlingame, Pasadena and Riverside, will participate. There will be a grand Wild West, "bigger and better" than any of those heretofore given by this institution.

The agricultural department will be entirely in the hands of the Farm Bureau and the Farm Bureau Centers of Ventura county, now thoroughly organized for the production of competitive exhibits as well as for the various purposes for which the Bureau exists.

L. P. HATHAWAY
Ventura's Wide Awake Secretary

W. B. Parker, Farm Adviser, is in charge of this department.

The county of Ventura has guaranteed the association sufficient money for the erection of sectional stalls for the accommodation of at least 100 head of exhibition stock, while there is now stabling for all the race stock that may be naturally expected to attend. Besides, the county will apportion from the "Immigration Fund" enough to more than cover every cent of the institution's expense, making the fair, therefore, strictly a COUNTY institution. The fair did a business of nearly $12,000 last year and on the middle day had a gate of practically $4500, at 50 cents for adults and 25 cents for children.

Located on the coast route of the State Highway, the Ventura Fair will be in a position to entertain visitors from the far northern as well as the far southern portions of California and doubtless will attract largely from the auto touring fraternity, especially on the day when the jumpers are scheduled.

Sires of Two or More 2:05 Performers

A TIMELY AND VALUABLE COMPILATION

Some people like pie for breakfast, and others drown perfectly good sliced cucumbers in cream previous to devouring the vegetable—wherefore in the springtime (nature's mating season, as the poets of long ago set forth in lyric form) the man who is interested in the light harness horse has an appetite for facts regarding the achievements of his favorite srains of blood in the matter of producing speed of various sorts.

Some are interested only in colt trotters, others feast with greatest joy upon stellar performances by mature steeds, while a third contingent welcomes all sorts of speed, lapping up the deeds of the 2:30 trotter and the 2:25 pacer with gusto because they are of the "standard" brand—probably on the same principle that the man whose stomach is deranged by a clam served in Providence, R. I., does not complain bitterly (as he would had the incident occurred in Kansas City) because Rhode Island waters are the home of the clam, and in theory every clam in that vicinage is, by right of birth, a good clam. In Providence the man's stomach may be out of kilter, but the clam is all right, whereas in Kansas City the clam would be condemned unheard.

For those who revel in high standards of speed, the 2:05 list of trotters and pacers has a flavor not to be found in the 2:20 list, while the 2:30 proposition is as sawdust to his palate. For such I have prepared a list of stallions that have sired two or more 2:05 trotters or pacers (or both) and present the same herewith. The number of trotters and pacers sired by each horse is stated, as is their average speed as shown by their best records, this feature seeming to me a particularly interesting one, and to show what strains of blood appear, in the male line, to be most prolifice in the production of the sort of speed that puts a performer in the free-for-all class, so to speak, the family of each horse is given in he final column:

Sire	Record	Trotters	Pacers	Average Record	Family
Peter the Great	2:07¼	4	1	2:03.15	Happy Medium
The Director General	.....	1	3	2:04	Dictator
Joe Patchen (p)	2:01¼	0	4	2:01.62	Wilkes
Brown Hal (p)	2:12½	0	4	2:03.37	Tom Hal
Walter Direct (p)	2:05¾	0	4	2:03.50	Dictator
Chimes (3)	2:30¾	1	2	2:04.08	Electioneer
Nutwood Wilkes	2:16½	1	2	2:03.08	Abdallah, 15
Hal B. (p)	2:04½	0	3	2:02.75	Brown Hal
Atlantic King (p)	2:09¾	0	3	2:03.68	Abdallah, 15
Gambeta Wilkes	2:19¼	0	3	2:03.75	Wilkes
Hal Dillard (p)	2:04¾	0	3	2:03.85	Brown Hal
Argot Wilkes (p)	2:14¼	0	3	2:04.18	Wilkes
Zombro	2:11	0	3	2:04.25	Wilkes
Bingen	2:06¼	2	0	2:01.37	Electioneer
Bellini	2:13¼	2	0	2:04.25	Artillery
McKinney	2:11¼	1	1	2:02	Wilkes
Walnut Hall	2:08¼	1	1	2:02.62	Electioneer
Todd	2:14¾	1	1	2:04.62	Electioneer
Chitwood (p)	2:22¼	0	2	2:00.75	Abdallah, 15
Direct Hal (p)	2:04¼	0	2	2:02.50	Dictator
Grattan	2:13	0	2	2:02.75	Wilkes
Charles Derby	2:20	0	2	2:03.12	Strathmore
Thistle	2:13¼	0	2	2:03.12	Strathmore
Oratorio	2:13	0	2	2:03.25	Wilkes
Newtown Boy	2:10¼	0	2	2:03.25	Bald Hornet
Pactolus	2:12¾	0	2	2:03.50	Mamb, Chief, 11
Searchlight (p)	2:03¼	0	2	2:03.50	Wilkes
Bob Fitzsimmons (p)	2:07¾	0	2	2:03.75	Electioneer
Direct (p)	2:05½	0	2	2:03.75	Dictator
Diablo (p)	2:09¼	0	2	2:04	Strathmore
Baron Wilkes	2:18	0	2	2:04.12	Wilkes
Little Frank (p)	2:09	0	2	2:04.12	Strathmore
Twelfth Night	.....	0	2	2:04.25	Wilkes
Tennessee Wilkes	2:27	0	2	2:04.50	Wilkes
Expressive Mac	2:25½	0	2	2:04.75	Wilkes

On the whole, the proposition as displayed by the above table figures out pretty much as one might expect. Peter the Great is first in a convincing manner. He is the only horse with five performers to his credit, the only one with four trotters, and the average of his get, 2:03.15, is a stunning one when the number of trotters as opposed to pacers—4 to 1—is considered. Incidentally he provides the greatest colt trotter, Peter Volo 2:02, a champion at 1, 2, 3 and 4 years of age. The supreme test of a sire in the matter of speed production is that he shall shine brilliantly, no matter from what angle the light is thrown on the proposition, and under such conditions Peter the Great has done work clearly superior to that of any other sire, living or dead. As to his ultimate standing as a progenitor (which is another chapter), it is certain he does not class with Bingen, considering present generation stallions only, nor has he yet sired extreme speed equal to that which goes to Bingen through the work of his son, Uhlan 1:58. It should be borne in mind that the above tabulation has to do with but one phase of the breeding problem. As a progenitor, Bingen towers above all other horses of his day as a giant looms among men of ordinary stature, and from all indications he eventually will lead every stallion, dead or alive, in this particular.

Peter the Great and Bingen, today's leading sires, are in the van among all the trotting stallions whose names appear above, and the notable horse among the pacers is Brown Hal 2:12½ to high wheels. In at least one particular the Tennessee horse has a distinction, in common with Direct, shared by no other member of the distinguished company, each of the pair mentioned having a son and a grandson in the list. Brown Hal's son is Hal Dillard 2:04¾, and his grandson is Hal B. 2:04½, by Hal Dillard. Direct's son is Direct Hal 2:04¼, and his grandson is Walter Direct 2:05¾, by Direct Hal. The Brown Hal blood certainly is breeding on as no other pacing strain ever did, and as evidence of this fact it may be said that Hal B. 2:04½, grandson of Brown Hal, has, despite limited opportunity in the stud, sired three members of the 2:05 list whose records average 2:02.75, they being Hal Boy 2:01½, largest money winning pacer of 1915, Hal B. Jr. 2:02½, and Hal Raven 2:03¾, the last named a blind mare that was the incarnation of gameness. As for Hal B. Jr., if his speed could be controlled and used when wanted, he is a two-minute pacer.

The Direct strain also is a very potent one. Direct, himself a trotting horse with a trotting record of 2:18½, got Directly 2:03¼ (a champion two-year-old), and Direct Hal 2:04¼, never beaten a race. Direct Hal in turn got Ess H. Kay 2:00¾, and Reproachless 2:04½, while his son, Walter Direct, already has four in the 2:05 pacing list, headed by Napoleon Direct 2:00¾. It is wonderful how two-minute speed at the pace runs in the Direct family. The head of the house had it, and were he alive today, well and sound (which he never was as a pacer), and trained according to modern methods, there is not the slightest doubt in the minds of horsemen but that he would have a record close to two minutes. Direct Hal took his 2:04¼ record merely because he had to go that fast to win a heat, and, as he was retired at the close of the campaign, there was no chance to ascertain just how fast he could go. Walter Direct, Mr. Geers once told me, after the pacer was in the stud, was the fastest horse he ever sat behind. He went lame after taking his 2:05¾ mark, and was retired.

When it comes down to families, it is found that, of the thirty-five sires listed above, twelve trace in the male line to George Wilkes 2:22, five to Electioneer, five to Dictator, four to Strathmore, and three to Alexander's Abdallah, the last named horse, although not much heard of these days, having given the turf two world's champion trotters in Goldsmith Maid 2:14 and Cresceus 2:02¼, the first named sired by himself and the champion stallion by his grandson, Robert McGregor 2:17½. These figures show once more the tremendous output of pacers by the Wilkes strain. The stallions in the above list which trace to George Wilkes are Joe Patchen, p., Oratorio, Gambetta Wilkes, Argot Wilkes, p., Zombro, McKinney, Twelfth Night, Grattan, Searchlight, p., Baron Wilkes, Tennessee Wilkes and Expressive Mac, yet their total contribution to the 2:05 trotting list is Sweet Marie 2:02, daughter of McKinney, while their pacers number thirty.

It is indeed remarkable that an even dozen sires of such prominence, each one able to produce pacers of topnotch calibre, should furnish but one individual to be credited with a 2:05 trotter, and when this fact is coupled with the additional one that they are all male line descendants of one horse, George Wilkes, the conclusion is irresistible that the founder of the family possessed the pacing germ in a degree that during his lifetime was undreamed of, although he was known to be double gaited and to have at least as much speed at the pace as the trot. Every branch of the Wilkes family produces pacers in abundance, and in many instances it is of the highest quality. Take, for instance, the case of the brothers Alcantara 2:23 and Alcyone 2:27, sons of George Wilkes, and themselves noted sires. Alcantara lived to the age of thirty, was the sire of many foals, most of them from well-bred mares, yet he got no 2:10 trotters, but is the sire of six pacers in 2:10 or better. Alcyone got three trotters with marks under 2:10, and one pacer in even time. In the above list no male line descendant of Alcantara shows, while Alcyone is represented by McKinney, Zombro, Expressive Mac and Searchlight, the nast named being the only pacer in the lot. So that while, in the first generation, the Alcyone family's fastest representatives were trotters in the ratio of 3 to 1, and Alcantara's were all pacers, the succeeding generations witness a complete reversal of that condition.

The McKinney branch of the Alcyone family makes a great showing through McKinney and his sons, Zombro and Expressive Mac, while the Alcyone strain is once more in evidence through Searchlight, grandson of the head of the house, and the Dictator blood, with its five representatives, likewise looms very large, although it comes through one son of the house, Director 2:17, the work of Direct and his son and grandson being supplemented by that of The Director General (son of Director), and perhaps to some extent by that of Oratorio, the dam of which horse was by Dictator. That Director should have established such a strong sub-family of pacers is the more remarkable from the fact that he was strictly a trotter, never known to pace a step, and his distaste for any other gait was so marked and his freedom from the use of all mechanical accessories so apparent that John Goldsmith, who had the stallion after his four-year-old form, more than once talked with me about the fact, saying he would like to match Director against any trotter in the world, both horses to go without shoes, boots, or anything but a plain harness.

The Alexander Abdallah's strain gets a place in the above list through the trotter, Nutwood Wilkes 2:16½, and the pacers, Atlantic King 2:09¾ and Chitwood 2:22¼. Nutwood Wilkes and Chitwood are sons of Nutwood 2:18¾ (grandson of Abdallah 15), and in connection with what has been told of the pacing streak in the Wilkes blood it is worth noting that their dams were by George Wilkes, and also that the speed average of the Chitwood pair is the best in the table—2:00¾—made by the brother and sister, Lady Maud C. 2:00½ and Hedgewood Boy 2:01. The Atlantic King pacers trace to Abdallah 15, through the stout-hearted trotter Atlantic 2:21, of high-wheel days, he being the sire of Atlantic King and himself a son of Almont, son of Abdallah 15. The Almont blood has furnished some sensational speed at the pace, the most conspicuous examples being Flying Jib 2:04, by Algona, son of Almont; Anaconda 2:01¾ (dam by Algona); and Frank Bogash Jr. 1:59¼, whose sire was a son of Atlantic King, and from a mare by Almont Pilot, son of Almont.

Strathmore, to whom four of the sires in the above table trace, was probably the fastest natural pacer sired by Rysdyk's Hambletonian, the great progenitor, and it is at the pace that his blood has shown

the best, his daughters producing a lot of high-class speed at that way of going, one of them being the dam of the three brothers—Moko, a famous sire, Bumps 2:03¼, a one-time champion wagon pacer, and Baron D. 2:10, a sire. The Strathmore horses get into the above table through the trotter, Charles Derby, his pacing son, Diablo, the pacer Thistle, and the pacer Little Frank. Charles Derby was a son of Steinway, who at one time held the three-year-old trotting record, 2:25¾, he being by Strathmore. Thistle is a son of Sidney, p. 2:19¾, a son of Santa Claus 2:17½, by Strathmore. Sidney naturally was a trotter, and was a star yearling at that age, but too much drilling made him footsore and he shifted to the pace, just as did Direct under like conditions, and in the hands of the same man—Monroe Salisbury. Direct took a trotting record of 2:18½ before soreness made a pacer of him.

Bingen and Bellini, the only horses other than Peter the Great to sire more than one 2:05 trotter, stand out boldly by reason of this fact, and it accentuates the regret that Bellini was limited to so few mares during practically his entire stud career. It also is a pity, in view of what the few of his get that were trained as two- and three-year-olds accomplished, that the ban on early speed development of Bellini's foals was not lifted earlier in the history of the family, since, had that been done, the Bellinis would have added greatly to their fame. His pair of 2:05 trotters, Soprano 2:03¾ and Bonington 2:04¾, were colt trotters of rare class, the filly being a stake winner at three, taking a record of 2:08¾ that summer, while Bonington at three could beat 2:10, took a record of 2:06½ at four, and last summer acquired a race tab of 2:04½ at five.

Bingen's pair are Uhlan 1:58 and Admiral Dewey 2:04¾, and both were colt trotters, the Admiral being a stake winner at three when he took a record of 2:14¼, trotting the last quarter of the mile in :31¾ rather handily. Lameness then laid him on the shelf, and when his mark was carried below the 2:05 line he still was in trouble, and in reality could not take the work necessary to show his best speed. Although Uhlan did not race professionally as a colt, he trotted in 2:27 on the half-mile track at his owner's farm, and at three was matineed in Boston and beat 2:15, showing the speed was there.—H. T. White, Horse Breeder.

RACE PROGRAM AT OREGON STATE FAIR, 1916.

MONDAY, SEPTEMBER 25th.		
Two-year-old Trot	2 in 3	$150.00
2:10 Pace	3 heats	750.00
2:25 Trot	3 heats	600.00
⅝ Handicap Dash		200.00
TUESDAY, SEPTEMBER 26th.		
2:15 Trot	3 heats	700.00
2:18 Pace	3 heats	750.00
Three-year-old Trot	3 heats	400.00
⅝ Mile for Two-year-olds		250.00
⅞ Mile		250.00
WEDNESDAY, SEPTEMBER 27th.		
Three-year-old Pace	3 heats	400.00
2:30 Trot	3 heats	600.00
2:08 Pace	3 in 5	2000.00
One Mile		350.00
⅜ Mile		100.00
THURSDAY, SEPTEMBER 28th.		
Three Minute Trot (Farmers' Race)	2 in 3	200.00
2:12 Trot	3 in 5	2000.00
2:20 Pace	3 heats	750.00
1¼ Mile	Portland Derby	500.00
FRIDAY, SEPTEMBER 29th.		
2:18 Trot	3 heats	700.00
Free-for-all Pace	3 heats	750.00
Two-year-old Pace	2 in 3	150.00
⅝ Mile		250.00
½ Mile		200.00
SATURDAY, SEPTEMBER 30th.		
Consolation Trot	3 heats	500.00
Consolation Pace	3 heats	500.00
2:25 Pace	3 heats	750.00
One Mile Handicap		350.00

All races except 2:12 trot, 2:25 trot, 2:08 pace and 2:25 pace are late closing events, closing September 11. The four above mentioned are early closing, to close June 1.

A. T. A. MEETING.

Chicago, Ill., March 20, 1916.

Notice is hereby given that the next regular meeting of the Board of Appeals of the American Trotting Association will be held at the Auditorium Hotel, Chicago, Tuesday, May 2, 1916, at 10 o'clock a. m., for the transaction of such business as may properly be presented to the Board for its consideration.

All new applications and written evidence must be received at this office not later than April 10, 1916.

W. H. KNIGHT, Secretary.

FROM CORN ROWS TO FUTURITY WINNERS, OR THE CROOK IN THE LANE.

Trivial happenings have often caused momentous changes in the pages of history, so it is no cause for consternation on the part of those who have never heard the facts in the case before to learn that J. B. Chandler was turned to the driver's profession through a slight disagreement with an honest, God-fearing Illinois farmer, who failed to realize the unbounded energy that lay in the bright-eyed, honest-faced, auburn-thatched farmer boy, who was later destined to achieve a name as a leader among colt trainers. "Chan" was then sixteen and, as common with settlers in those pioneer days, the Chandler family had its trials, so our hero started out with a strong determination to keep the wolf as far away from the Chandler door as possible. At the age of eleven he had made neighborhood fame by conquering an unruly billy goat, throwing him on behind his saddle and riding eighteen miles to the township detention hospital; so it required but a little demonstration of his strength and agility to convince the farmer whom he tackled for a position that he was just about the proper boy to hire. Reporting an hour before sunrise on the day set for beginning work young Chandler started with a determination to honestly earn the fourteen simoleons per month that had been agreed on as wages, payable in coyote hides, at the option of the farmer. In the field at daylight, the long corn rows were made to bloom rapidly under the careful ministration of "Chan," an old gray horse and a single-shovel plow of antique design, and when the dusk was gathering as worker and steed started toward the farmhouse the plowed-out corn stood up, bold and gleaming, one foot higher than the stalks that had yet to meet the willing worker. Supper was eaten and "Chan" was about to seek the nearest bed when a fleet of milk pails that hid well the kitchen floor was assembled and he was bidden to put a fitting finale on the day's labor by assisting the other hired hand to milk thirty-two cows, curry them off for the night and give the same number of calves their alfalfa meal, during which feasting of the juveniles the faithful duo were to whittle shavings for the calves' beds.

The consummation of these varied tasks that supposedly meant the culmination of the day's labor, came well after 10 o'clock, and during the entire process the mental workings of "Chan" were giving some thorough consideration of what to him was a a new phase of farm life.

"Perhaps," thought he, "this sleeping habit is no more than a notion, and if I may help this honest, God-fearing man through the day likewise I can do the same through the night. Sunday afternoons can be used for sleep, and in the added time that I devote to his interests, no doubt, I can gain his favor and get off on the Fourth of July to hunt rabbits."

Pursuing this line of reasoning the youth inquired for the room where the farmer was now sweetly reposing in that sleep that comes only to those who are at peace with their fellow men. "Chan" perceived, as he trod up the stairs, that the snoring came strongly and regularly. Knocking at the door with knuckles made firm from his eighteen-hour session with corn and cows and calves, he finally drew a none too cordial response:

"What do you want?"

"Where is the axe?" quoth "Chan," "and if there is nothing more important on hand I will split wood until breakfast is ready."

Angry at what he considered an unwarranted intrusion on the part of his hired boy the farmer fell into a diatribe of words, ending with the discharge of "Chan." The latter, bitter over the unappreciative farmer's action, hastened to the nearest race track, determining to end it all by plunging his entire savings on the first race of the day—a ten-day meeting with $350 purses was on. Instead, the judges singled him out from the crowd and put him up behind a two-year-old trotter that was being pulled, and "Chan," thinking of the farmer, the corn, the cows, the calves, and his eighteen hours of unappreciated toil, drove the youngster to a thrilling win in 2:32¾. The pleased owner gave him a side of pork for his good work, the judges contributed a grandstand coupon, and he engaged for a full season at an advance in salary over his farm job. The rest is history.—Western Horseman.

Famous Campaigners in Detroit Classics

CALIFORNIANS FEW BUT SELECT

While the Grand Circuit opens at North Randall, things do not begin to get "real hot" as a rule until the following week when the scene shifts to Detroit, interest at the Michigan city being stimulated by the staging of the first of the major classics of the season, the M. and M. and the B. of C., which the general public will have trouble in recognizing as the modern appellation of the time honored Chamber of Commerce. Spriggan and either Virginia Barnette or Esperanza will do battle for M. and M. honors for California, while White Sox or Clara Mac will meet the Board of Commerce wolves. Joe Patchen II., on whom California has a lien, is coupled with The Beaver by Feming & Company of Winnipeg in that same stake and whichever one Billy Fleming starts may be a hard nut to crack. Virginia Humbug is entered in the Wayne Hotel Sweepstakes for three-year-old trotters, and other horses bred here in the west appear in several of the early closers, the complete entries to which are as follows:

MERCHANTS' AND MANUFACTURERS' STAKE, 2:08 TROT, $10,000.

Ames Albingen 2:07¾, Alonzo McDonald; Bonington 2:04¾, E. F. Geers; Bacelli, 3, 2:09¼, Pastime Stables; Dick Watts 2:14¼, A. S. Rodney; Director Todd 2:10¾, Walter R. Cox; Earlwood L. 2:12, W. T. Crozier; Guy Nella 2:07¼, W. R. Neill; Mabel Trask 2:14¾, Walter R. Cox; Mr. Forbes 2:13¼, Milham & Engelman; Omar 2:05¼, J. B. Wathen; Peter Mc. 2:03½, Beau Ideal Stables; Rusticoat 2:08½, Pastime Stables; Sadie S. 2:07¾, M. J. Ronin; St. Frisco 2:07¾, E. F. Geers; Spriggan 2:08¼, V. K. Dunne; The Eno 2:08¼, J. B. Wathen; Trampright 2:09¼, Thomas W. Murphy; Vanko 2:06¼, Thomas W. Murphy; Virginia Barnette 2:08¼, W. G. Durfee; Worthy Prince 2:11¼, Walter R. Cox; Esperanza 2:09, W. G. Durfee.

BOARD OF COMMERCE STAKE, 2:06 PACE, $5,000.

Altawood 2:08¼, C. A. Valentine; Ben Earl 2:12¼, Ed. Peterson; Billy Dale 2:09¼, Walter R. Cox; Del Rey 2:03¾, Walter R. Cox; Fred Russell 2:04, H. C. Hersey, agent; Goldie C. 2:07½, C. A. Valentine; Joe Patchen II. 2:03¼, Fleming & Co.; Lillian T. 2:07¼, Everett Beckwith; Miss Harris M. 2:07¼, Alonzo McDonald; Peter Farren 2:07¼, Thomas W. Murphy; Pat Carmody 2:08½, D. S. Gordon; Roan Hal 2:06¼, Montezuma Stable; Sadie Densmore 2:02, H. H. Thomas, agent; St. Anthony Carter, br h by Sir Lightfoot, E. F. Geers; Shipmaster 2:05¼, Loan Bros.; The Beaver 2:08¼, Fleming & Co.; The Problem 2:08¾, Thomas W. Murphy; The Savoy 2:06¼, Emmett Williams; White Sox 2:05¼, W. G. Durfee; Wilbur S. 2:06½, Curt Gosnell; Young Todd 2:17½, Walter R. Cox; Clara Mac 2:04½, W. G. Durfee.

HOTEL PONCHARTRAIN STAKE, 2:15 TROT, $3.000.

American Girl, Brook Farm; Bothnian, Thomas W. Murphy; Busy Lassie, Walter R. Cox; Brisac, Thomas W. Murphy; Colonel Riser, U. S. Horse Shoe Co.; Ess H. Kay, Jr., Thomas W. Murphy; Early Don, C. A. Valentine; Frank Morris, Walter R. Cox; Grand Chimes, Black River Stock Farm; Helen Worthy, Thomas W. Murphy; Harvest Glow, E. F. Geers; Hollyrood Bertha, Hollyrood Farm; Jeanette Speed, Walter R. Cox; Leonor McKinney, Pastime Stable; Little Grove, A. F. Ruthven, agent; Lindsey, George Rider; Lillian the Great, Beau Ideal Stock Farm; Lu Princeton, Walter R. Cox; Peter Grim, Hollyrood Farm; Regardless, Frank Hedrick; Uno Stanley, R. H. Anderson; Walnut Grove, A. F. Ruthven, agent; Widower Peter, W. H. Grosch.

HOTEL GRISWOLD STAKE, 2:10 PACE, $2,000.

A. D. C., Dempsey Bros.; Adioo Guy, Harry Gray, agent; Arkensello, Black River Stock Farm; Bayman, G. C. Johnstone; Baby Bertha, Maplewood Stock Farm; Ben Earl, Ed Peterson; Bessie R., E. E. Bell; Billy Dale, Walter R. Cox; Box R., V. V. Martin; Derby Custer, Thomas W. Murphy; Jay El Mack, Everitt Beckwith; Jimmy E., C. A. Valentine; Marjorie Kay, Walter R. Cox; May Fern, C. A. Valentine; Periolat, Harry Gray, agent; Peter Farren, Thomas W. Murphy; Peter Piper, Walter R. Cox; Presolite, C. P. Cecil Jr.; Sad Thoughts, Ed Peterson; Spring Maid, B. F. White, agent; The Problem, Thomas W. Murphy; Wilbur S., Curt Gosnell; Young Todd, Walter R. Cox.

WAYNE HOTEL SWEEPSTAKES, THREE-YEAR-OLD TROT, $600 ADDED.

Brownie Watts, br f by General Watts, A. S. Rodney; Expressive Lou, b f by Atlantic Express, Thomas W. Murphy; Forrest B., b c by Mainleaf, Hollyrood Farm; Great Minnie, b f by Peter the Great, W. L. Snow; Harrod's Creek, ch c by General Watts, H. A. Bell; Lightsome Watts, b f by General Watts, E. F. Geers; Maple Tree, br c by Siliko, John E. Madden; Native Judge, b c by Justice Brooke, Brook Farm; Pat De Forest, br c by The De Forest, E. F. Geers; Peter Dixie, b c by Peter the Great, Reamore Farm; Sister Susan, b f by Peter the Great, Walter R. Cox; Walnut Tree, b f by Siliko, H. J. Schlesinger; W. G. Truman, br c by Crito Leyburn, J. C. Small; Willow Tree, b g by Siliko, W. L. Snow; Virginia Humbug, W. G. Durfee.

PERFORMERS AND PRODUCERS OF 2:10 TROTTING SPEED.

[From the Trotter and Pacer.]

When Wallace had the Year Book well under way, back in 1880, not of the least importance in that publication was "The Table of Great Brood Mares."

Admission to that hall of fame required that a matron be the dam of two standard performers, else have one in the list and either a producing son or daughter. The requirements have not been made more severe, yet how we have grown away from it is well attested by the fact that in 1915 alone fifteen mares became dams of two 2:10 trotters.

Almost everybody concedes that the finest test of a brood mare is to produce herself and throw a producing daughter. As the 2:10 list is now the standard by common adoption, there is presented below a list of the brood mares which have produced a 2:10 trotter and have one daughter at least that has accomplished this classification.

Until recently first place in this hall of fame belonged unquestionably to Adolph Spreckels' short bred mare Jenny, by Bull Pup. She produced Hulda 2:08½; another daughter produced Dione 2:07¼, and Dione completed the third generation of 2:10 speed by furnishing to the turf Bernice R. 2:07¼.

The place of honor, it is interesting to note, passes to another short-bred mare—Nell, by Estill Eric. She produced two 2:10 troters herself, has three daughters that are 2:10 dams, and last year's two-year-old colt, Bingen Silk 2:08¾, furnished the third generation. Jenny and Nell are the only brood mares in this classification that won such distinction. It is also noteworthy that there are just ten 2:10 trotting mares that are 2:10 producers as follows: Lou Dillon, Nancy Hanks, Lillian R., Lucille, A. Leading Lady, Zephyr, Dione, Lucile Marlow, Miss Adbell and Caracalla. The complete list of great producing mares follows:

Nell, by Estell Eric-Skipper, by The Embry Horse; dam of
1—Tom Axworthy, rn g, by Axworthy.....2:07
2—Belle Vara, b m, by Vatican.....2:08¾
3—Amnell, by Ambassador, dam of
1—Guynella, b m, by Guy Axworthy.....2:07¼
4—Nelda Worthy 2:12½, by Axworthy, dam of
2—Prinelda, rn f (3), by Prince McKinney.....2:09½
5—La Rose, by Anteeo, dam of
3—Gray Gem, gr g, by Dancourt.....2:09½
6—Nell Worthy 2:22, by Axworthy, dam of
4—Nell Cord 2:26¾, by Silk Cord, dam of
1—Bingen Silk, b c (2), by Bingen.....2:08¾

Jenny, by Bull Pup, son of St. Lawrence, dam s. t. b. by Williamson's Belmont; dam of
1—Hulda, b m, by Guy Wilkes...—.....2:08½
2—Gracie S. 2:22, by Speculation, dam of
1—Dione 2:07¼, b m, by Eros, dam of
1—Bernice R., b m, by Dexter Prince.....2:07¼

Cascarilla 2:15½, by Shelby Chief—Missie by Brignoli; dam of
1—Caspian, b g, by Patron.....2:07¼
2—Caracalla 2:10, b m, by Patron, dam of
1—Carroll, b g, by McAdams.....2:09¼
3—Carrilla 2:22½, by Nugget, dam of
2—Norrie, b g, by Brown Wilkes.....2:09¼

Nancy Lee, by Dictator—Sophy, by Edwin Forrest; dam of
1—Nancy Hanks 2:04, b m, by Happy Medium, dam of
1—Admiral Dewey, b h, by Bingen.....2:04¾
2—Lord Roberts, b h, by Arion.....2:07¼
3—Narion, by Arion, dam of
1—Albia, b m, by Bingen.....2:08¾
4—Muda S., by Stamboul, dam of
2—Muda Guy, b f (4), by Guy Axworthy.....2:09

Miss Copeland, by Almont Star—Copeland Mare by Prophet Jr.; dam of
1—Copeland, br g., by Del Mar.....2:09¼
2—Expectation, by Autograph, dam of
1—Major Delmar, b g, by Del Mar.....1:59¾
2—Justice Brooke, br c (3), by Barongale.....2:08½

Maggie Yeazer, by Red Wilkes—Docia Payne, by Almont; dam of
1—Walnut Hall, br h, by Conductor.....2:08¼
2—Mary North, by Moko, dam of
1—Vito, b c (4) by Prodigal.....2:09¼
2—Northspur, b c (3), by San Francisco.....2:09¾

Paronella, by Parkville—Minnie Merrill, by Young Jim; dam of
1—Country Jay, ch g, by Jay Hawker.....2:05¼
2—Kentucky Todd, bl c (3), by Todd.....2:08¾
3—Ormonde, bl c (3), by Wilkes Boy.....2:08¾
4—Judge Parker, br h, by Jay McGregor.....2:09½
5—Lady Ripples 2:15, by The Tramp, dam of
1—Lady Elmhurst, rn f (4), by Walnut Hall.....2:10

Emma T. 2:17½, by Socrates—Patsy Labor, by Abdallah Pilot; dam of
1—Emma Brook, b m, by Silent Brook.....2:09¾
2—Miss Adbell 2:09¾, b f (3), by Adbell dam of
1—Adbell M., b c (4), by Moko.....2:08¾

Miss Edgar 2:29, by Bourbon Wilkes—Lark, by Abdallah Mambrino; dam of
1—Lucille Marlow 2:09¼, b f (4), by Prodigal, dam of
1—Lucille Bingen, b f (3), by Bingen.....2:08½
2—Minna Ward, b f (3), by Prodigal.....2:10

Gaiety Girl 2:15¼, by Red Wilkes—Maggie H., by Homer; dam of
1—Gay Audubon, ch c (4), by Audubon Boy.....2:06¾
2—Gaiety Lee 2:16¾, by Bingen, dam of
1—Lee Axworthy, b c (4), by Guy Axworthy...2:03¼

Caracas, by Bingen—Houri by Onward; dam of
1—Nahma, b m, by Peter the Great.....2:07¼
2—Vera Peters, by Peter the Great, dam of
1—Vincent Todd, b c (3), by Jim Todd.....2:08¾

Cricket, by Pilot Medium—Trixy, by Louis Napoleon; dam of
1—Carlo, bl g, by Bellini.....2:08¾
2—Trixy Nutwood, by Nutwood, dam of
1—Beatrice Bellini, bl m, by Bellini.....2:08½
2—Tokio, gr g, by Bellini.....2:09

Nancy Hanks 2:04, by Happy Medium—Nancy Lee, by Dictator; dam of
1—Admiral Dewey, b h, by Bingen.....2:04¾
2—Lord Roberts, b h, by Arion.....2:07¼
3—Narion, by Arion, dam of
1—Albia, b m, by Bingen.....2:08¾

Ozama, by Director—Mary Sprague, by Gov. Sprague; dam of
1—Ozanam, br m, by Axtell.....2:07
2—Ozalma 2:20¼, by Moko, dam of
1—O'Neill, br h, by Walnut Hall.....2:07¼

The May Fern 2:11½, by Red Fern—Slip, by Gen. Geo. H. Thomas; dam of
1—Capt. Aubrey, b h, by Peter the Great.....2:07¼
2—Humma, by Bingen, dam of
1—Straight Sail, bl f (3), by Mainsheet.....2:08¾

Maggie F., by Young Jim—Molly, by Young Diamond; dam of
1—The Wanderer, b g, by The Tramp.....2:08¼
2—Lady Valdameer, by Valdameer, dam of
1—Creighton, b g, by The Bondsman.....2:08¼

Johannah Treat 2:24¾, by Thos. Rysdyk—Katie Treat, by Venture; dam of
1—Del Coronado, b h, by McKinney.....2:09½
2—My Irene S., by Petigru, dam of
1—Esperanza, b f (3), by Carlokin.....2:09

Blessing, by Jay Bird; dam of
1—Onward Silver, ch h, by Onward.....2:05¼
2—Sarah McLure, by Cresceus, dam of
1—Cedar Lake Girl, b m, by Bob Noble.....2:09¼

Enola D., by Axtell—Annie Thomas, by Cyclone; dam of
1—Chase, b g by Keeler.....2:07¼
2—The Huntress 2:23¾, by Onward Silver, dam of
1—Margaret Druien, b m, by Peter the Great...2:03¼

Ethelwynn, by Harold—Kathleen, by Pilot Jr.; dam of
1—Ethel's Pride, b m, by Directum.....2:06¾
2—Extasy 2:11½, by Baron Wilkes, dam of
1—Lord Dewey, b h, by Admiral Dewey.....2:03¾

Kentucky Central, by Balsora—Nonesuch, by Brignoli; dam of
1—Kentucky Union, ch m, by Aberdeen.....2:07¼
2—Sylvan Maid, by Aberdeen, dam of
1—Onward Silver, ch h, by Onward.....2:05¼

Crystalline 2:19¼, by Onward—Crystal, by Crittenden; dam of
1—Crystallion, b h, by Arion.....2:08¾
2—Bondalin, by The Bondsman, dam of
1—Bondella, b f (3), by Walnut Hall.....2:07¾

Fanny K. 2:21¼, by Major Benton—Lady Prince, by Jefferson Prince; dam of
1—Lucille 2:07, b m, by Brummell, dam of
1—Lucille Spier, b f (3), by Directum Spier....2:07¾

Crescent, by Robert McGregor—Belle H., by Clark Chief Jr.; dam of
1—Gulvallis Directum, b c (4), by Directum.....2:08¾
2—Zella Directum, by Directum, dam of
1—Electric Patch, bl c (3), by Dan Patch.....2:09¼

Letitia 2:18¾, by Louis Napoleon—Maud, by Garabaldi; dam of
1—Lillian R. 2:04½, b m, by J. T., dam of
1—Peter Mc., b h, by Peter the Great.....2:03½

Lou Milton, by Milton Medium—Fly, pedigree untraced; dam of
1—Lou Dillon 1:58½, ch m, by Sidney Dillon, dam of
1—Lou Billings, b f (3), by John A. McKerron..2:08¾

Gracie S. 2:22, by Speculation—Jenny, by Bull Pup; dam of
1—Dione 2:07¼, b m, by Eros, dam of
1—Bernice R., b m, by Dexter Prince.....2:07¼

Miss Pratt, by Heir at Law—Lettie B., by Taggart's Abdallah; dam of
1—A Leading Lady 2:07, b f (3), by Bingen, dam of
1—The Lady Zombro, b m, by Zombro.....2:10

Gazelle 2:11½, by Gossiper—Gipsey, by Gen. Booth; dam of
1—Zephyr 2:07¼, b m, by Zombro, dam of
1—Virginia Barnette, b f (3), by Moko.....2:08¼

Maideen, by Aberdeen—Daisy, by Crittenden; dam of
1—Patchen Maid 2:08¼, bl m by Patchen Wilkes, dam of
1—Santos Maid, b f (4), by Peter the Great.....2:08¼

—o—

At a meeting of the Sonoma County Driving Club held Monday night in Santa Rosa it was decided to hold the first matinee of the season on Sunday, May 28, at the track in that city. Similar events will be held throughout the summer at Petaluma and Sonoma, with horsemen from all three cities participating in them, and as between the combination there is a sufficiency of horses for the staging of generous programs some excellent sport is assured. The feature of the opening card will be a match race between Frank Turner and Joe Ryan, the former piloting the pacing gelding Dr. Wm. S. Jennings and the latter pinning his faith to the former Stadium pacer Hamburg Belle.

—o—

Mahomet Watts 2:08¼, the fast but erratic son of General Watts which Charley DeRyder had out here a year ago, is now owned by Bob Moreland of Lexington, who will work him over into a show horse.

NUTWOOD'S FIRST STANDARD PERFORMANCE.

While we have, since the passing of the Horseman, become accustomed to alluding to the Horse Review as our sole surviving Chicago contemporary, the fact remains that we have another most highly respected kindred publication in the city where winter sometimes lingers in the lap of spring, etc., etc., the Breeder's Gazette. True the latter journal is devoted more especially to general farming and stock raising than to the trotting horse, but quite often the horse department contains contributions of exceptional interest to the trotting fraternity. Some weeks ago there appeared under the title "Nutwood's Introduction to the Track" the following letter from Fannie Passeday Duncan of Kentucky, which the many western horsemen who recall the famous chestnut stallion who took his best record over the Stockton track in 1879 and who came to be revered as the greatest of brood mare sires, will take pleasure in reading:

Here is a bit of ancient trotting horse history that may interest your older reades. I found the letter among some old papers belonging to my husband. The name of the writer of the letter was not in evidence:

"There was to be a trot meeting at Grand Rapids. I had a friend at Pittsburg who wrote me if a yellow stallion would appear at the meeting. He was still unknown but I could lay money on him freely, for he certainly could trot in 2:25. The name, he wrote, was Nutwood. My friend added that Nutwood was owned by a shrewd man who would never show him up until he was ready to win, and advised me to say nothing, but go in.

"Monday we went out to see the horses move. In came a big chestnut stallion, jogging sleepily around the track, never moving faster than a 3-minute gait and then disappearing. No one timed him, no one noticed him. That night Frank Shaw mounted the stand and proceeded to sell the horses down. B. C. Holly's Little Sam was the favorite and the horses were sold out briskly until at the end Shaw called Nutwood. No one seemed to know him, but a small voice said 'Two dollars.' The same process with the same result was repeated and I looked for the owner of the voice. He was a quiet, modest, medium-sized man, partly hid by a pillar—J. W. Knox. Once again the pool was sold and when Nutwood was called the same old two-dollar bid was made. Then I held up three fingers. Shaw looked surprised but he cried my bid and Mr. Knox said four. I held up five fingers. There was no further competition and I was possessor of a Nutwood pool—the first. This process was repeated three times and I quietly moved my position until I was near Mr. Knox. He said: 'I see you are buying Nutwood pools. What do you know about him?'

"Well, the race was trotted. Splan was in it, and some other noted drivers, and Little Sam after winning two heats was a great favorite, etc. In the first two heats Nutwood was nowhere. In the third, when he passed first under the wire in a jog there surely was astonishment in the grand stand and consternation among the betting fraternity. Nutwood won with ease. It was in this race Nutwood first beat 2:30. Was it not singular that in this race Nutwood should have defeated Mr. Holly, who in 1888 owned and trotted Nutwood's best son to a fast record, made $20,000 out of his trotting capacity, and sold him for $32,000 to Robert Steel of Philadelphia?

"It is interesting in this connection to recall that to Mr. Knox was practically due Nutwood's breeding, for once when on a visit to Woodburn, Mr. Knox said: 'Broadhead, if you breed that gray mare to Belmont I will give you $500 for the foal at weaning time.' The gray mare was Miss Russell, afterward the dam of Maud S. 2:08¾, and Nutwood was the foal."

While not Nutwood's real "introduction to the track," as he had won a few races in the previous year, 1876, at minor meetings and for small purses, the race alluded to above was his first appearance in an event of much importance or in especially tough company, the purse being eight hundred dollars and the field including B. C. Holly's Little Sam 2:30, P. Wineman's Lady Logan 2:30½, A. A. Roger's Belle of Fairfield 2:31¼, W. Sinsabaugh's Rose of Washington 2:21¾, C. S. Case's Kinsman Boy 2:28½ and R. M. Anderson's Maud Williams 2:37. Little Sam won the first and second heats, Lady Logan the fifth, and Nutwood the third, fourth and sixth, the time of the race being 2:33, 2:33¼, 2:29, 2:30¼, 2:32¼, 2:31½.

Notes and News

Esperanza (3) 2:09.
Spriggan 2:08¼.
Virginia Barnette (3) 2:08¼.
Are entered in the M. & M. at Detroit.

◈ ◈ ◈

While the Board of Commerce catches Clara Mac 2:04½ and White Sox 2:05¼.

◈ ◈ ◈

Del Rey 2:03¾ is another native son who may start in the latter classic, under eastern colors.

◈ ◈ ◈

And the Two Eyed Joseph Patchen, winner of the event in 1912, will endeavor to stage a comeback stunt if all goes well.

◈ ◈ ◈

Doctor Burns Jr., mentioned as a probability some weeks ago, is not in the list, so the sore finger must still be a little touchy.

◈ ◈ ◈

Spring has come in Chicago, officially, and has been welcomed editorially by the staff of our esteemed sole surviving Chicago contemporary.

◈ ◈ ◈

However, the cold cream adorning the winsome lassie's features, presumed by the editor of our e. s. s. C. c. in his innocence to have been administered as a precaution against sun burn—

◈ ◈ ◈

Really proved to be a preparedness measure against the attack of General Jack Frost and his cohorts.

◈ ◈ ◈

However, there is gladness in the hearts of the climatic paradisers, as the Year Book is out and warmer weather cannot now be long deferred. Nay, Genevieve, not long, not long.

◈ ◈ ◈

Verbena Mac, now at Stony Ford Farm, New York, has foaled to the cover of Prince Ansel (2) 2:20½, the youngster being a full brother to Verbena Ansel (1) 2:22½, now in the stable of Billy Marvin and being entered by him in the two-year-old sweepstakes on the big line.

◈ ◈ ◈

Steve D., who has been one of the standbys of the matinee game locally for a number of seasons, has been sold by G. Tassi of this city to Archdeacon Emery and D. J. White of Atwater, California, and will round out his career in light road use in the service of those gentlemen.

◈ ◈ ◈

Now that the training season is getting along to the time when you are making a little more speed you may need some new boots and special rigging. Odd sizes and shapes need not worry you if you will confide your troubles to J. Janson, Jr., at Pleasanton, now about the only custom boot maker in this part of the world.

◈ ◈ ◈

Among the entries to the 2:10 early closing pacing events at North Randall and Detroit, the Edwards and the Hotel Griswold stakes, appears the name of Adioo Guy 2:10¾, the chestnut son of Guy Dillon and Adioo by Guy Wilkes bred here in California by F. S. Turner of Santa Rosa and raced through Michigan and Ohio last season with such success by Harry Gray. Starting in ten races in 1915, most of them over halfmile tracks, he was but once behind the money, once fourth, once second and seven times a winner, so he figures as one of the kind of race horses that the Dillons make when they are really good ones, a trait that runs pretty regularly in the get of Guy Dillon especially. Reviewing the probable candidates for pacing honors in the central west of late a contributor to the American Sportsman paid him the following respect: "Adioo Guy 2:10¾ is by Guy Dillon 2:23½. It is human nature for us all to admire a few horses in particular, and we were rather disappointed last fall because this little chestnut and Kate McKinney did not hook up, because, in our humble opinion, a duel would have resulted such as is seldom seen. We have seen Adioo Guy, in the space of an eighth, come from the rear, whip around his field and be several open lengths in the lead before the opposition realized what had happened. Last season was his first time out, yet he learned all the angles of the game and was a sure 2:05 pacer in the fall, although he only worked in 2:06, first half in about 1:04½. He will probably make only a couple of starts on the halfmile rings, then hit the Grand Circuit." From the way he is performing he looms as a real pacer, and while he is no longer owned in California his career in select company will be watched with a great deal of interest. (Incidentally, while looking over his performances of 1915 in that official publication, the Year Book, we find his record given in the alphabetical list of new performers as 2:11¼, while in the heat at Monroe, Michigan, which he won in 2:10¾, he is credited with finishing in eleventh position, a rank also accorded to Astrola in the same heat. We learn further that he is both a mare and a stallion and that the proper spelling of the name is Adioo Guy, Addioo Guy and Adivoo Guy, all official. However, that is nothing, especially between friends.)

Sure, J. David West has it if it is in the line of horse furnishings. A card to him at 1018 Fillmore street, this city, will bring you what you want by return mail.

◈ ◈ ◈

The track at Everett, Washington, where the Snohomish County Fair is to be staged, is being made into a regulation halfmile course and the speed program this year will be more pretentious than at any time in the past.

◈ ◈ ◈

There was no fooling about the April Fool's Day matinee held at Santa Ana by the members of the Orange County Driving Club, the racing being of the keen variety that furnished excellent entertainment to the crowd in attendance. Three harness races, two events for the thoroughbreds, a novelty race for mounted horsemen and a bicycle race made up a generous program. The best time to harness was made in the opening event by Atlantic Fleet, who equaled his regular record of 2:21 pacing, a pretty fair clip for this time of the year.

◈ ◈ ◈

The editor is in receipt of a communication from Budd Doble in which that gentleman contradicts the report of the sale of Kinney de Lopez to Bob Sebastian, made recently in these columns. Our information at the time was derived from a letter from Mr. Sebastian, but evidently the negotiations fell through at the last moment. Mr. and Mrs. Doble are still at Hemet but expect to leave there shortly and enter definitely upon the long promised vacation, taking with them the best wishes of the community in which they have made their home for the last four or five years, as well as those of trotting horse folks throughout the world.

◈ ◈ ◈

Helen Belle (2) 2:22¼, who was left at Pleasanton last fall by W. G. Durfee to be bred to the great trotter Anvil 2:02¾, died some days ago at that place from unknown causes. She started but once last season, winning the senior trotting division of the Oregon futurity in straight heats, without having to lower the record taken as a two-year-old at Los Angeles, and was reckoned by Mr. Durfee as a coming great brood mare, being by Carlokin 2:07½ out of Carolyn C. by Axtell (3) 2:12, whose daughters have produced ten trotters with records from 2:05 to 2:08¼, grandam Expedience by Expedition 2:15¾, sire of the dams of such good race trotters as Jack Leyburn 2:04¼, Tenara 2:05¾, and many others.

◈ ◈ ◈

Abbie McNutward by Guy McKinney, dam Lady Irene 2:14½ by Diablo 2:09¼, grandam Geraldine (dam of Leata J. 2:03) by Mount Vernon 2:15¼, foaled on March 29 a fine brown filly by Derbertha Bells, the young lady having been named Bertha Tripple, to signify her manifold relationship to Bertha, greatest of all great brood mares. Abbie McNutward is the dam of the good filly Greatness (3) 2:10¼, winner of second money in last year's three-year-old pacing division of the Breeder's futurity, and as he is pretty well overstocked with horses at present she and other well bred ones are being offered for sale through our business columns by owner J. W. Pendleton, 1601 Seminary Avenue, Oakland.

◈ ◈ ◈

As May Day this year comes on Monday, which is not the best day of the week for a celebration, Dixon will stage her annual "May Day Festival" on the following Saturday, May 6, which is much more convenient for all concerned. As usual the harness races will play a very large part in the day's activities and will be three in number, the Dixon colt stake, already closed and in which a number of the best colts in this section of the state are eligible to start, and a 2:20 class and a free-for-all for aged horses of either gait. These latter events will be three in five at halfmile heats for purses of $150, to which will be added all entrance money received in each class, entrance fee being fifteen dollars, cash with entry. Closing date is set for Saturday, April 15, and all particulars may be obtained by addressing L. A. Morris, chairman Chamber of Commerce, Dixon.

◈ ◈ ◈

The current number of our northwestern contemporary, the Rural Spirit, contains an inquiry from C. P. Caylor of La Grande for the maternal blood lines of the trotting mare Cantatrice 2:25¼, and the editor takes pleasure in supplying the same, having had an acquaintance of some years' standing with the family of the mare in question, dating back to the time when he was a resident of the community in which she was reared. Cantatrice was foaled at Brook Nook Ranche, Montana, in 1904, a daughter of Alcone and the double producing matron Traviata by Malcolm 5661, grandam Drama by Lexington Golddust 4205. Malcolm was a son of Robert McGregor 2:17½ and the great brood mare Maggie Medium by Happy Medium and was owned for a number of years in Montana, first by Amsden, Brookman & Company, and then by C. X. Larrabee. After the purchase of the Amsden, Brookman & Co. property by Mr. Larrabee, those holdings forming the nucleus of what is now Ruby Dell Ranch, Mr. Brookman became manager of that tract and was for many years identified with the Larrabee interests in that capacity. Cantatrice is a full sister to Cadence 2:16, and if Mr. Caylor will address an inquiry to either H. L. Miller, Homepark, Montana, or Cyrus Gates, care of the Pacific Realty Co., Bellingham, Washington, he may learn the breeding farther back, which has escaped the memory of the writer.

M. L. Jones of Brooks, Oregon, for some years one of the progressive members of the Oregon State Fair Board, has been reappointed to that office by Governor Withycombe and has succeeded J. H. Booth of Roseburg as president of the board. The fair at Salem has flourished in a most gratifying manner during Mr. Booth's tenure of office and the good work will doubtless go on in an uninterrupted manner under Mr. Jones.

◈ ◈ ◈

Frank B. Dupree of San Diego has recently purchased of Fred W. Wadham and sent to the track at Los Angeles for training the four-year-old brown filly Bonnie Treat by The Bondsman and a three-year-old gelding by Nuristo, both out of that grand old matron Johanna Treat 2:24¾, dam of Del Coronado 2:09½, Zulu Belle 2:06¼, etc. Mr. Wadham considers the Nuristo gelding the most promising foal that Johanna has yet produced, and Mr. Dupree will give both of them a fair show to live up to the reputation established by the older members of the tribe.

◈ ◈ ◈

George L. Swisher, who has wintered with his horses at his home place near Provolt, Oregon, moved to the track at Medford late in March with seven head of candidates for honors this season on the North Pacific Circuit, all trotters but one and all green but one. This one exception is the trotting mare Hallie B. 2:16¼ in a winning race on a halfmile track, she having been raced successfully by Swisher in 1915, being but once behind the money out of eight starts. She was once third, once first and the balance of the time second, usually to Floradora Z., and forced that good campaigner to trot to a record of 2:11½ at North Yakima to win, the slowest of the three heats being 2:13¼. An attempt to refresh our recollections of Hallie B. by reference to Volume 31 of the Year Book were very nearly frustrated completely owing to the fact that she is credited "officially" with being a pacer insofar as recent performances are concerned, though credited with her old trotting record of 2:24¼. It is also a matter of regret that so good a trotter should be given as "guideless" on the dam's side "officially," as she is out of the standard and registered mare Zircon by Vice Regent, grandam Sard by Alaska, a son of Electioneer, third dam Lavina 2:28 (dam of one trotter) by Woodford Wilkes, fourth dam Pearl (dam of four trotters and three pacers) by Ashland Patchen, fifth dam Ruby Duroc (dam of two trotters) by Messenger Duroc, sixth dam Lady Nodine by Hambletonian 10, seventh dam by American Star. As she promises to be quite a bit better than a 2:10 trotter, by a non-standard pacing sire, we recommend this maternal pedigree to the consideration of the "official" compilers before the publication of another number of the Year Book. George writes under date of March 24 that in making the change to Medford, in the heart of the Rogue River fruit zone, he expected to find some nice warm weather, but instead ran into a touch of frost that had set all the smudge spots to smoking so enthusiastically that a breath of fresh air was a rarity, while in "navigating" in the haze the danger was always uppermost of colliding with a lamp post or plate glass window in a manner pointing to an over indulgence in the brand of squirrel poison that has become popular in Oregon since the dry laws went into effect.

◈ ◈ ◈

C. A. Harrison of "somewhere in Washington" paid one of his frequent brief visits to California this week, dropping in Monday and returning to the northwest by the Shasta Limited on Wednesday, Tuesday having been spent at Pleasanton watching the horses work. In Peter's Queen in the stable of Millard Sanders, Mr. Harrison has a five-year-old trotting mare that seems to be a genuine Peter the Great from what she has shown Millard so far this spring, negotiating a couple of halves under the eye of her owner Tuesday in 1:06, while she has been the same distance earlier in the year in time a bit faster. This lassie, whose dam is a full sister to Sonoma Girl 2:04¼, came to Millard in rather rundown condition during the winter and has been brought around by him very nicely indeed, being now in most excellent shape. Going slow she has the rather rough, unattractive gait that characterizes many of the best of her family, but flattens into a very good way of going, carrying a low head and attending strictly to business. She will not be raced this season but will be brought along carefully and given a thorough sampling late in the season to see if she is of the Grand Circuit kind. Owing to the dearth of racing on the coast Mr. Harrison is sending to the Indianapolis sale the nice young mare Tosora (2) 2:26¼, now five years of age by The Patchen Boy (3) 2:10¾, and the three-year-old Boniquee by Count Boni, both out of that good daughter of Joe Patchen 2:01¼, Niquee 2:13¾, whose dam was Oenone 2:11¼ by Woodford Wilkes, etc. John B. Stetson of Salem, in whose stable these mares are at present, will also send to the same sale the trotting mare Novela 2:15¼ by Letrado (3) 2:25, dam Navajo by Alaska, grandam Native Silver by Red Wilkes, etc., her record having been made last season over the halfmile track at Chehalis. The three will arrive at Pleasanton shortly and make the trip to the Hoosier auction along with the consignment of Charley DeRyder and Rodney MacKenzie. They will sell under the watch, and Mr. Harrison reports them in fine shape to show that way, having had the benefit of a first class wintering with plenty of work. True Kinney 2:12¼ is taking his work in great fashion at Seattle and will probably be raced by Mr. Harrison on the tracks of the North Pacific Circuit.

Thoroughbred Matters

[Written for the Breeder and Sportsman.]

THE BLOOD THAT WINS.

That the line of Eclipse now includes all but a trifling percentage of the thoroughbreds of England is sufficiently well known. The line of Matchem, in spite of its prominence in the first half of the nineteenth century, is now reduced to obscure individuals. The Herod line, with its great American members from Glencoe to Hamburg, was allowed almost to run out in England, when the recent importation of Roi Herode from France, followed by his great son, The Tetrarch, gave it new footing. There remain the descendants of Eclipse, to whom it is convenient to refer under the subdivisions of those great individuals in the history of breeding,—Blacklock, Touchstone, Stockwell, and Isonomy.

It occurred to me that it would be interesting to determine the relative prominence of these lines among the latest winners of the English turf, particularly as nothing of the kind is set forth in the usual records. At the beginning of 1916 the annual tables of the sires of winners and the sires of their dams, with the comparative winnings in each division, were published in London by the periodicals devoted to English breeding. It is a time-honored custom. It gratifies and rewards the owners by spreading the fame of their stallions and their mares; but in itself it reveals nothing of the secret factors that produced the results. Limiting myself to the task of ascertaining the relative prominence of the different lines, I have examined each individual stallion in those tabulated lists with the object of comparing their descent in tail male. The evidence thus collected shows at a glance the culminated tendencies of the last few decades of English breeding. It will be a surprise, I think, to American breeders to realize the dominant position now occupied by the Blacklock strain.

Among the 19 sires whose offspring in 1915 won more than £3,000, the Blacklock blood divides the leadership almost equally with that of Stockwell. The latter won £44,638, the former £42,007; but there were 65 Blacklock winners against 58 Stockwells. When the sires of dams are considered, the disparity is so great that the Blacklock horses stand by themselves. Their offspring won £49,157, but the winnings of mares by Stockwell sires did not go beyond £16,769. In the matter of two-year old winnings the Blacklocks again opened a tremendous gap: their winnings were £16,170 against £7,498 by the Stockwells. Yet two of the greatest sires in England at sprinting distances, Polymelus and Orby, are in the Stockwell line. From the two-year-old supremacy of the Blacklocks it is not to be inferred that they do not also shine by reason of their stamina. In the division of stayers, of the sires of winners at ten furlongs and over, the Blacklock sires once again overtop the Stockwells by the number and record of such horses as St. Frusquin, Collar, Santoi, The White Knight, compared with Radium of Stockwell descent. Desmond, who leads every other sire of two-year-old winners by more than £3,300, is all but entitled to be added to the ten furlong class of the four Blacklock sires just named. In the same class are Dark Ronald and Spearmint of the Touchstone line.

To tabulate for handy reference the 19 sires of winners of £3,000 and over according to their descent in tail male:—

58	winners by	7	Stockwell sires won	£44,638
65	" "	7	Blacklock " "	42,007
28	" "	2	Touchstone " "	17,337
18	" "	2	Isonomy " "	12,923
6	" "	1	Herod " "	3,385

These sires, or at any rate the first eleven in the list, made the following winnings, which I have divided between their two-year-olds and their older offspring:—

1.	Polymelus	4	2-yr.-olds,	£3,099:	6	others,	£14,639
2	Dark Ronald,	2	"	297:	9	"	11,946
3.	Sundridge,	2	"	4,045:	12	"	6,446
4.	Desmond,	6	"	7,776:	4	"	1,117
5.	Llangibby,	0	"	.....:	8	"	8,537
6.	St. Frusquin,	6	"	2,080:	4	"	6,034
7.	Orby,	4	"	4,399:	4	"	3,130
8.	Symington,	5	"	1,036:	12	"	3,957
9.	Valens,	3	"	1,511:	2	"	3,165
10.	Fariman,	5	"	3,607:	5	"	779
11.	Santoi,	0	"	.....:	10	"	4,219

The sires of winning two-year-olds of 1915 stand in this order of winnings above £2,000: (1) Desmond. (2) Orby. (3) Sundridge. (4) Fariman. (5) Polymelus. (6) Roi Herode. (7) Chaucer. (8) St. Frusquin. (9) Bayardo. The Blacklocks are Nos. 1, 3, 7 and 8. Isonomy, Herod, and Touchstone are represented by Nos. 4, 6 and 9. The other two are Stockwells.

When the sires of the winning broodmares are compared, the mares whose offspring won £3,000 and over, the result is as follows:—

49	mares by	7	Blacklock sires won		£49,157
41	" "	3	Isonomy " "		22,564
21	" "	4	Stockwell " "		16,769
28	" "	2	Touchstone " "		9,959

These 16 sires of broodmares stand in the following order: (1) **Persimmon**, £12,923. (2) **St. Hilaire**, £11,336. (3) Gallinule, £9,635. (4) **Velasquez**, £8,635. (5) Isinglass, £6,579. (6) Hackler, £6,417. (7) Wildfowler, £6,350. (8) **St. Serf**, £5,523. (9) Melton, £4,775. (10) Orvieto, £4,668. (11) Cyllene, £4,303. (12) **Donovan**, £3,871. Then **Matchmaker**, Ayrshire, **St. Simon**, Meddler, each above £3,000. The Blacklocks are in heavy type.

The object of this brief analysis will have been attained, if, at a time when the importation of English thoroughbreds is exceptionally brisk, the American breeder shall realize the modifying influence which this diffusion of the Blacklock blood is sure to exert on the future of breeding. At the moment, Polymelus, a horse of Stockwell descent, has been for two successive years the leading sire of English winners. His dam and his grandam were both by Touchstone sires. His pedigree has not received any direct addition from a horse of Blacklock descent in seventy years. But already his greatest son, deeply inbred though he is to two great members of the Touchstone line, Hampton and Hermit, is akin to the Blacklocks through his maternal grandsire, St. Hilaire.

A. A. WHEELER.

San Francisco, April 2, 1916.

The meeting at Bowie got away to a nice start a few days ago, and since that time has come the pleasing information that the Hall anti-gambling bill which was introduced into the Maryland legislature failed of advancement to its third reading on the final night of the biennial session of that body, which came to a close Monday. This means at least two more years of racing at the four Maryland tracks where the thoroughbreds have been so popular in late seasons, Bowie, Pimlico, Havre de Grave and Laurel.

The flourishing condition of thoroughbred racing in the east is well attested by the patronage accorded the recently closed stakes of the Empire City Racing Association, to be contested at their track at Yonkers during the meeting of July 12 to 28. The fifteen events received a total of eight hundred and seventy-six entries from seventy-six owners, distributed as follows: Empire City Handicap 55, Yonkers Handicap 51, Mt. Vernon Handicap 67, Fleetwing Handicap 53, Melrose Stakes 52, Arrow Stakes 49, Whirl Stakes 88, East View Stakes 81, Wakefield Handicap 84, Demoiselle Stakes 71, Frivolity Stakes 54 and the Sprightful Stakes 52. The fields will be highly representative ones, as the best stables in the country are included in the list from which nominations have been received.

All doubts as to the staging of those two great English classics, the Derby and the Oaks, were removed a few days ago when the stewards of the Jockey Club announced that both would be raced at Newmarket, the Derby on May 30 and the Oaks two days later. Efforts are also being made to obtain governmental consent to the staging of a few meetings in the northern part of the Island during the summer, with a fair prospect of favorable action.

Drink Jackson's Napa Soda.

ENGLAND'S LARGEST STUD.

The biggest private establishment in the United Kingdom (if not in the world) devoted to the rearing and breeding of the British thoroughbred, is comprised in the Melton Studs, belonging to Mr. Mueker. At Thetford, Norfolk, there are about 11,500 (eleven thousand five hundred) acres of land, a large part of which is available in the form of paddocks. The auxiliary stud at Westerham, Kent, covers an area of 350 acres. There are at these Melton Studs over 300 boxes for stallions, brood mares, yearlings and foals, besides 15 large sheds, capable of holding over 100 animals. At the present moment the mares at the Melton Studs number 229. There are also 39 yearling fillies (the colts having been sold), and before many months have gone by it is expected that the population of the paddocks will be increased by the arrival of an additional large number of foals. Including the stallions, there are now over 270 thoroughbreds at the two stud farms, and by next June the total will be, in all probability, about 400.

This plain statement of facts will, no doubt, be deemed sufficient to make good the claim that the Melton Studs are easily the biggest in Great Britain and Ireland. That they have other claims to distinction will be allowed when it is understood that during the years of 1913 and 1914 the winners of nearly 300 races in various parts of the world were out of Melton Stud mares or by Melton Stud stallions. At the Hunter Show at Islington recently, four winners of King's Premiums were bred at the Melton Studs. They were Sysonby, Sea Flier, Irrawaddy and Persimmon's Pride.

In putting forward these facts and figures there is no desire to belittle the wonderful achievements of the Childwick Bury Stud. Mr. Joel is heartily to be congratulated on his phenomenal success as a breeder of thoroughbred racing stock, and he would, perhaps, be the first to acknowledge his indebtedness to the qualities of a mare bred at Westerham Hill. Reference is here made to Absurdity, Jest, Black Jester and King's Joker. Another daughter of Melton that contributed substantially to the reputation of the Childwick Bury Stud is Yours, the dam of Your Majesty and Our Lassie.—Dublin Sport.

[Hamburg Place, near Lexington, Kentucky, can show a record even more enviable than that of the great English establishment mentioned above.

Hamburg Place contains 2,240 acres, and, at present, has 235 broodmares. In 1915 alone the produce of the mares and stallions from this farm won 325 races and $294,827.

During the past seven years, the get of Hamburg Place stallions have won the almost unbelievable sum of $1,605,454.—Ed.]—Thoroughbred Record.

DURYEA YOUNGSTERS FOR AMERICA.

That a most excellent string of youngsters from the Haras du Gazon, the late Herman B. Duryea's famous breeding establishment in France, will race on American tracks this season is forecast by the entry list at Empire City, fifty-eight entries in all having been made for that meeting. The foreign-bred aristocrats, who have been quartered in England for some months, are expected to arrive in this country in the near future, the two-year-olds that are making the trip including the following:

Herodate II., ch c, by Uncle—Herodia.
Killadi, b c, by Irish Lad—Ascot Belle.
Muskross, br c, by Irish Lad—Stillwater.
Panoche, b c, by Irish Lad—St. Inez.
The Belgian, ch c, by Rabelais—Suffragette IV.
Tranby, b c, by Irish Lad—Frizette.
Biddleford, b f, by Irish Lad—Rabenstein.
Censure, b f, by Irish Lad—Census.
Farce, b f, by Rire aux Larmes—Armenia.
Gas Light, br f, by Irish Lad—Gasjet.
Inniskillen, b f, by Irish Lad—Zuna.
Medora, b f, by Rabelais—Mediant.
Mint Drop, b f, by Irish Lad—Mintberia.
Teetotal, b f, by Irish Lad—Teetotum II.
The Minx, b f, by Irish Lad—Artless
Wedding March, b f, by Irish Lad—Wedding Bells II.

President Coffroth of the Lower California Jockey Club was a visitor in the city this week and states that all will be in readiness for the reopening of the Tia Juana track next Saturday, with four times as many horses present as was the case when the meeting was interrupted.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

THE SPEED OF GAME BIRDS.

A youthful inquirer wants to know something of the ordinary speed of our different game birds when walked up before a hunter or flushed before a dog. While the real speed capacity of any of these birds has never been reliably determined, it is no difficult matter to approximate that of all of them. To the hunter, the smaller the bird the greater will he imagine its speed, for with the smaller the bird the greater is the fluster in getting away. The speed of a bird and the distance you are from the same, must come into your calculations when shooting for the bag, not that this is done by any sort of mental arithmetic or by comparative figures—it is simply an instinctive solution that comes alone with practice and study.

If a bird—and I care not what kind—is going at a 40-mile an hour clip, and it is 40 yards from where you are standing, to hold five or six feet ahead would be none too much. In fact, it would be found about the correct thing.

Let's see now, to make sure. Forty miles an hour means something like 60 feet a second. That is for the bird. A shot from a 12 or 16 gun, propelled by regulation load of Du Pont or Hercules powder, travels say something like 900 feet a second. That would mean that the bird would have traversed about five or six feet, and you, in order to kill the bird, would have to hold fom five to six feet ahead of the same, counting lateal swing of the gun, pressure and everything, all of which is little more than prescience.

Now for the flight of birds, under ordinary circumstances: Canvasback, from 75 to 140 miles an hour; redhead, from 75 to 100; mallard, from 40 to 60; widgeon, from 50 to 70; gadwall, same; teal, green wing, from 75 to 100 miles an hour; teal, blue wing, from 60 to 80; wild goose, 80 to 100; quail, from 40 to 50; upland plover, from 50 to 75; chicken, from 50 to 60; hawks, most any species, from 75 to 150, and jacksnipe, from 40 to 60.—Sandy Griswold.

FISHING GOOD IN NORTHWEST.

Fishing conditions on streams in Western Oregon are reported by the Southern Pacific Company as follows:

Grants Pass—Chinook salmon now being caught with spinner. Some from 25 to 30 pounds in weight. Steelheads are beginning to bite more freely as the Rogue River clears.

Cottage Grove—Best fishing is in Coast Fork, about 20 miles west, and Upper Row River, about 20 miles east of this place.

Marshfield—Weather last two weeks delightful. Coos River and Ten Mile Lakes are clear, trout biting fine. During past week trout have been taking the fly. In mountain streams in Coos county fish are now biting fine.

Eugene—some good catches of salmon trout have been made on the Coos Bay branch near Mapleton on Siuslaw River. Bait used was pickled chub.

Roseburg—Parties from here are still having success on the North Umpqua about two miles above Winchester; salmon trout, cut throats and an occasional steelhead.

Tillamook—Streams still high, but few good strings of fish have been caught with angleworms and salmon eggs for bait.

HUNT STARTED FOR "BLUE TIGER."

A quest for the "blue tiger," a beast which has been termed the "Flying Dutchman of zoology," because many scientists and explorers have seen it yet none has yet been caught, began last week when Roy Chapman Andrews and Mrs. Andrews sailed for the Orient on the liner Tenyo Maru from San Francisco.

Somewhere in Central Asia or Tibet they expect to capture a specimen of their elusive quarry and to make an exhaustive study of zoology for the American Museum of Natural History of New York, of which Andrews is assistant curator. Andrews will write a book on his adventures, which will be illustrated by color photographs taken by Mrs. Andrews, who has studied a new system of color photography in Germany and France.

From here Mr. and Mrs. Andrews will go to Yokohama, thence by rail to Pekin and to Fuchow, where Edmund Heller, formerly of Stanford University, will join them. Heller was with Theodore Roosevelt on his African big game hunt and has explored the remote provinces of China.

From Fuchow the party will journey up the Yangtse Kiany river to the border of Tibet, where Harry R. Caldwell, a famous hunter and explorer, will join them. Here a safari, or party of guides, porters and servants will be organized and a start made for Central Tibet—the home of the "blue tiger." The expedition expects to be out of civilization for about a year and was organized by the American Museum of Natural History.

EXPERIMENTING WITH TROUT.

An unusual experiment is being tried out by the San Francisco Fly Casting Club at its lodge near Union Mills, on the Truckee river. Instead of stocking the streams with trout fry as is the usual method, the plan of maintaining the fish until they have attained a length of ten inches is being tried. It has been found that of the thousands of fry that are turned loose a large proportion become the prey of larger fish. By keeping the fish until they are large enough to look after themselves, it is believed that a much larger percentage will reach maturity.

For the past nine months the club has been experimenting on 100,000 trout raised from fry furnished by the Fish and Game Commission. These trout have been reared and fed under the direction of an expert keeper and at the club's expense. By next November these fish will have attained a length of ten inches, and if it is planned to throw them in at various points along the course of the Aruckee.

It is said that the project of raising the trout in water conditions similar to those in which they must live until such time as they are able to take care of themselves has never before been attempted in California, and the result is being watched with much interest by all sportsmen.

The fry are first placed in rearing ponds where they remain for six months. They then are transferred to a section of the river which has been dammed off and is well protected. Here they are kept until of sufficient size to liberate.

By tagging the fish it is hoped to determine positively many interesting questions concerning their habits and trout fishermen believe they will gain many valuable pointers in this way.

GAME WARDEN IS FOILED.

"For Sale—Two white tailed deer—one pair of silver pheasants. Apply Henry Royce, Kapowsin, Wash.," read Game Warden Ira D. Light of Pierce county in the want ad. columns of a Seattle morning newspaper.

"Ah ha!" hissed the warden, between his moustaches, "some one is trying to dispose of game outside the county, so we will not suspect him. I must see about that."

Disguising himself as a county official, Warden Light speeded up to Kapowsin and called upon Royce. The unsuspecting advertiser did not penetrate the disguise and proudly exhibited the deer and pheasants. He confessed openly that he had advertised them and they were for sale.

"Ah ha," said Light, throwing aside his disguise and appearing in his true character, "it becomes me painful duty to arrest you for the violation of the game laws of ——."

"Not me," said Royce, who is a well-to-do lumberman, "these deer and pheasants are not game. They are domestic animals, born and bred on my place. Raised on the bottle, the deer were."

"Foiled!" hissed Light, as he sped for the county jitney, "baffled but not beaten,' 'and he whizzed down the mountain side for home.

CATCHES "SOME" FISH—400 POUNDS.

Redding, March 30.—A 400-pound fish was caught in the Sacramento river yesterday by Eugene Barion, the "musical fisherman." Barion is called the "musical fisherman" because his 200-foot trot line which is stretched across the Sacramento at Middle creek is equipped with a chime of twelve Swiss bells—one for each line dangling from the main line with spoon attached.

Barion's catch yesterday was a sturgeon—a big fish that measured seven feet without the head. When the sturgeon grabbed the hook every one of the twelve bells rang a clatter that awakened him from his afternoon nap in his cabin ashore.

The "musical fisherman" was unable to land his big catch alone. He had to call in the assistance of two neighbors to land the fish.

Barion's catch netted him $63.

WEAKNESS IN GAME PRESERVATION LAWS.

According to John J. Barnett, deputy Fish and Game Commissioner of Ventura county, the principal weakness in the average game preservation law lies in the fact that while fishermen and hunters who violate them are brought to task, little or nothing is done in a systematic way to kill off the depredating creatures which prey on the fish, birds and animals it is hoped to conserve.

While pot hunters and fishermen are responsible for considerable killing of game out of season, the so-called "vermin" are at work all the time and do an incalculable amount of damage. Barnett proposes to inaugurate a war on these pests and will start the ball rolling with a mountain lion hunt in which men and dogs will take part. He figures that affairs of this kind can be successfully staged by reason of the fact that it provides keen and exciting sport to the participants. The hunt will be held on a number of the larger ranches of the county where these mountain lions have been quite destructive.

By the same token, the Oregon State Game Warden has been petitioned by the Newport Rod and Gun Club asking that an open season be declared on shags until July 1. These birds are said to subsist almost entirely on small fish and they are responsible annually for the destruction of thousands of salmon trout and other food fish. Hundreds of them are reported feeding on the fish at Yaquina, Alsea and Siletz bay and other waters. Permission already has been granted to sportsmen in Coos county to kill these shags, which is a species or cormorant and voracious feeder.

BOOK ON PHEASANT BREEDING.

Editor, Breeder and Sportsman:—

There has been mailed you this day, under separate cover, a 150-page illustrated book, entitled "American Pheasant Breeding and Shooting," which is believed to be the first fully detailed, sequential book on the breeding of any species o fgame ever published on the English language. This is the first of a series of efforts on the part of the Department of Game Breeding and Preserving of the American Game Protective Association to furnish the sportsmen of this country with a real literature on game breeding—something with which the man who has never bred game and has never seen it bred can achieve results.

It is believed that this book and those that will follow it will be of immeasurable benefit in increasing the supply of wild life that is so necessary if we are to have any real sport in this country.

This Association believes that we can get more game in the United States principally through two things:

First, by spreading a knowledge of game breeding. It is believed that this book and the articles, detailed and authoritative, on the subject of breeding mallards and bobwhite quail in captivity, which have appeared respectively in the February and October numbers of the Bulletin of this Association, will be very valuable in achieving this end.

A second measure that it is thought will be most helpful in getting a larger game supply is through the setting aside of preserves or sanctuaries for wild life where it can breed undisturbed by man at all times, the overflow from which will furnish a continuing supply of birds for sportsmen.

We shall appreciate any notice that you may see fit to give this book in your columns.

We are sending you also, under separate cover, the February Bulletin of this Association, in which you will find on page 1, outside column, an article which gives a pretty clear review of the pheasant book. From this and the introduction to the book itself, we think you will be able to get the data necesssary in the event that you care to give this book any notice.

Very truly yours,

G. M. TAYLOR, Secretary,

American Game Protection and Propagation Ass'n.

FOXES FOUND EVERYWHERE.

In answer to an inquiry, let me say that the fox is an animal closely related to the dog. It is a native of almost every part of the globe and is everywhere known as the most wily of beasts of prey. It has a straight, bushy tail, erect ears, and is extremely alert and avaricious, devouring birds and small quadrupeds, fruits, honey and eggs.

The stories told of the animal's intelligence in eluding its enemies, in protecting its young and in getting its food are often too wonderful to be easily believed.

The fox's home is a dry burrow or hole in the rock, and usually consists of an outer hole or room, where the fox lies; a store-room, where he keeps his food, and, behind all, his sleeping room and the place where his family lives.

When the fox is captured he will sometimes feign death and will endure the roughest treatment without flinching. The fox will dodge, double on his track, try to conceal his scent and use many other ingenious tricks to deceive his pursuers.

Besides the common fox of Europe and Asia, there are the blue fox of the Aleutian and other Arctic islands, notable for its beautiful bluish fur, one of the most valuable furs in the market.

The black fox, a native of the northern parts of Asia and America, similar to the common fox, but distinguishable by its rich, shiny, black fur.

The gray fox or silver gray fox, characterized by the thick tail, at the tip of which is a tuft of stiff hairs. This fox can be made very tame and will play with dogs. In winter their fur becomes asilvery gray, and they are common through the northern parts of America.

The red fox of America, generally of a pale yellow color, especially in the Arctic regions.

The cross fox, whose fur is gray on the upper parts and black beneath and on the muzzle, with a dark cross over the shoulders.

And the swift fox, an inhabitant of the Western American plains.—Captain Bugs.

* * * *

Charles T. Rankin, of Kansas City, Mo., has won eight trapshooting tournaments in succession in Missouri and in the eight he has broken 448 out of 500 targets.

Sportsmen's Row

Easterners are boasting of some kid shooters who have passed the sixty mark and are improving with age. They have nothing on a couple of boys around San Francisco. "Pop" Best is credited with being over seventy and yet he turned out at the Golden Gate shoot and busted 19 out of 20 in the club event. "Pop" Adams is 62 and he cracked 19 out of 20. With a little more experience these youngsters will develop into pretty fair blue rock busters.

* * * *

Carl Westerfeld, commissioner in charge of the San Francisco division of the Fish and Game Commission, is now the owner of a gun that any champion would be proud of. Look out, you boys in the first class.

* * * *

T. W. Parsons is some prize-getter. He has already secured fourteen and is still going.

* * * *

The Golden Gate is thinking of erecting an extra trap for non-members. It is the club's intention to make every one welcome and give all the shooting they wish with as little delay as possible.

* * * *

The Merchandise shoot of the Golden Gate Club on Sunday, April 23rd, promises to be a banner affair. Seventy prizes are already up and they will be distributed via the grab bag system. This assures a prize or more to every one who participates.

* * * *

Oregon City, Or., April 5.—Rev. J. K. Hawkins, of the First Methodist Church, is a fisherman for both fish and men. Just at present the local pastor is eagerly awaiting the time when the high waters of the Willamette will recede and the river below the Falls will become the paradise of the salmon troller.

Rev. Mr. Hawkins, who has been stationed at Medford and Rosebuirk, has fished in the Rogue and the North Umpqua rivers for salmon, as well as other streams in all parts of the state, and is a lover of the sport. He has secured a boat and a large quantity of tackle and other equipment ready for the first day the river gets back to its ordinary stage.

Salmon trolling in the Willamette river will probably surpass the sport offered in past years because of the Gill act, which greatly regulates net fishing here. Under its stringent provisions, the commercial net fishermen, who spoil the fishing for the sportsman,must not cast their nets between the suspension bridge and the falls, in this way reserving the best portion of the river to the man with hook and line.

The river will probably be low enough to allow fishing within the next week or ten days.

* * * *

The ban on fishing in Marion county (Oregon) streams in effect since December 10th, last, by order of the State Board of Fish and Game Commissioners, ended April 1st, and fishermen of that section are preparing to raid the streams for their initial catches of the year. Angling was prohibited by the Board because of the rapid depletion of the trout and other fish which stocked these streams. The streams affected by the Board's order were Butte, Abiqua and Silver creeks and their tributaries.

* * * *

Fifteen hundred crabs swarming about the hold of his launch was the one-day haul of Artie Hall, an Ilwaco, Wash., fisherman. The wholesale price on the dock for the catch was $105. Other fishermen made similar catches and a full freight car was sent on its way to Portland and San Francisco, the value of the consignment being between $400 and $500.

Favorable weather after a long period of storm is given as the reason for the unusually large catches. Glutting of markets is feared if the big hauls continue.

* * * *

A true story comes from Hudson, Illinois, from A. N. Starkey, living on a farm northwest of that village. He owns a collie and a rat terrier. The latter disappeared and after being searched for was given up for dead. The collie however acted very strangely. Immediately after being given food he disappeared and did not return until the next meal-time. Members of the family decided to follow him. They did so, and a half mile from the house the poor little rat terrier was found, caught in a trap which had been set for mink. The collie had been carrying food in his mouth to his little friend for over a week, and was overjoyed to think help had come to the rat terrier. The latter was very soon released and tenderly cared home to be given proper care. The devotion of the collie was much remarked in that neighborhood.

* * * *

The fish and game commission's ocean patrol has been making life interesting for some of the illicit commercial fishermen of late. The arrests of Japanese at Catalina late last week were timely. Considerable complaint is heard about illicit fishing from time to time, and the arrests will have a wholesome effect, it being manifestly impossible for the slow boats that can be rented to cope with the faster craft used by such of the fishermen as are evading the law. But all these things will be changed when the patrolboat comes to her work, although this does not seem likely to develop until summer, owing to delays that cannot be avoided.

June is the big month for the trapshooters. There are 116 tournaments registered that month, 73 were registered in that month last year. There are 61 registered shoots in July, 44 in August, 26 in September, 15 in October and one in November. April has 31 and May 112. This unprecedented registration is an assurance of the greatest trapshooting year in the annals of the sport.

* * * *

A number of changes have been made in the dates announced of the registered shoots. The Lincoln (Neb.) Gun Club tourney has been moved from April 5 to April 12; the Central Pennsylvania Trapshooters' League tourney at Phillipsburg from April 20 to August 17, and the tournament of the Hill City Gun Club, Vicksburg, Miss., advanced from May 16-17 to April 1819, and that of the Central Pennsylvania Trapshooters' League at Altoona from June 16 ot April 20.

* * * *

The eleventh Pacific Coast Trapshooting Tournament will be held at Portland, Ore., on September 12, 13 and 14, under the auspices of the Portland Gun Club. There will be $1,000 added money and the winner of first place in the Pacific Coast Handicap will be guaranteed $100 and a trophy; the winner of second place will be guaranteed $75 and a trophy, and the winner of third place will be guaranteed $50 and a trophy. Several other trophies will also be awarded.

* * * *

An effort is being made to have the secretaries of the trapshooting clubs throughout the country attend the Grand American Handicap in St. Louis and get pointers on the handling of large tournaments.

* * * *

Jim Thorpe, the Indian athlete, who is on the payroll of the New York National League baseball team, tried his hand at trapshooting in a recent tournament of the Capitol City Club of Oklahoma City, and broke 74 of the 100 targets thrown.

* * * *

More than forty states will stage amateur championship shoots to determine the eligibility of trapshooters to engage in the fight for the national amateur title in August.

* * * *

One of the biggest jelly fish ever brought ashore at Santa Monica was found about two miles at sea by Thomas Valenzuela, a fisherman of that place. It is about two feet in diameter. When scooped into a hand net by Valenzuela the fish was floating about on the surface. Valenzuela was stung by one of the creature's "feelers" as it was being unloaded into the boat, but the injury was not serious.

* * * *

The body of Fred Morris, fisherman and trapper, living in an ark at Bouldin Island, was found in the river about a mile west of Black slough landing by Captain Goldstein of the Island Transportation tug Islander. Deputy Coroner Chester Conklin went after the body, which appeared to have been in the water about a week.

* * * *

Los Angeles Club.—More than one hundred and twenty-five shooters took part in the opening of the Los Angeles Gun Club at its new grounds back of Eastlake Park, Sunday. Over two hundred were fed at the big free barbecue, prepared by the famous Spanish chef Joe Romero, and it was nearly 5 o'clock before the last squad had left the firing line.

S. R. Smith won the first diamond scarf pin with a "break" of 49x50, and Owen Council was second with 48x50. C. Vories and George Middleton, each with 47x50, tied for the third, and Vories won the shootoff with 22x25 to 21x25 for Middleton. Five shooters tied for the fourth place pin, each with a break of 46. These were Henry Pfirrmann, C. L. Nickle, F. H. Nichols, O. Evans and W. Dougherty. In the shootoff Pfirrmann won with 25 straight. C. L. Nickle had 24, as did Evans, and Dougherty 21. F. H. Nichols broke but 20. The fifth prize also brought about a three-cornered tie between C. F. Dodds, C. F. Nichols and C. D. Griffith, each with 45. Nichols won with a break of 25 straight.

Pfirrmann had individual honors for the day, for after getting off to a bad start two 23s he proceeded to break 108 birds straight in regular competition, including the shoot-off for the diamond prize. The "break" was unfinished.

Scores in events 2 and 1 follow. Event 2 of 50 targets, shot at from 16 to 22 yards for which five diamond scarf pins are offered each Sunday. Event 1 of 50 targets, shot at 16 yards, open to all amateurs. Event 2 was shot first and event 1 second. Scores:

S. R. Smith, 97x100, H. Pfirrmann 96, Owen Council 94, C. L. Nickle 93, Wm. Dougherty 93, C. F. Blackstock 91, F. H. Nichols 91, G. Middleton 90, O. Evans 90, Ed Mitchell 90, E. S. Allen 89, R. B. Witman 88, E. E. Ekdale 88, G. Melford 88, J. F. Dodds 87, F. H. Mellus 87, Jack Milligan 86, S. Fullerton 86, J. P. Haese 85, O. Pachmayr 85, P. O. Long 83, T. M. Arnell 81, W. B. Harvey 81, Rossbach 79, B. Brady 78, D. E. Llewellyn 73, Mrs. H. Pfirrmann 73, C. H. Betz 72, V. Hodges 70, C. W. Fish 66, H. J. McCaffery 60, Neel Nickle 49, F. J. Adams 41.

C. E. Groat, 44x50, C. D. Hagerman 37, R. H. Bungay 43, Joe Singer 35, F. B. Winter 26, R. H. F. Variel 32, W. Brauer 33, H. Beckwith 23, G. Persinger 35, A. Pachmayr 40, R. L. McCourt 35, F. W. Thatcher 28, H. W. Harrison 35, F. E. Andreas 32, Dr. Tabor 40, H. Adams 43, H. Hoyt 41, C. Vorhies 47, R. Arnold 44, L. R. Mellus 44, L. H. Brown 31, A. D. Switzer 36, A. L. Rowe 39, C. D. Griffiths 45, W. L. Cooper 40, W. Harrington 39, J. Matfield 34, R. C. Nissen 41, R. Chenoweth 31, W. Koerner 37, F. E. Gregory 30, C. Monaghan 41, F. A. C. Drew 40, Edward Drew 36, P. H. Stortz 28, C. F. Nichols 45, W. K. McCarthy 24, T. D. Robinson 15, C. W. Fish (20 gauge) 42, J. Seamans 34, A. G. Allen 39, Victor Moore 35, F. Schriner 41, A. W. Stowel 19, F. Young 40, G. T. Cline 37, W. Kays 33, J. W. Wenzell 44, M. Barber 42, C. Julian 38, H. Poston 47, H. Poston 49, J. G. Heath 43, C. W. Clement 31, F. Young 40, Mrs. Pachmayr 27, Dr. Packard 47, A. D. Switzer 35, A. L. Rowe 40, M. Barber 42, S. Waldridge 33, C. Vorhies 47, R. Arnold 48.

H. Nelson, 17x25, H. Beckwith 15, Capt Hensley 15, G. Persinger 22, L. R. Mellus 23, W. Koerner 13, Roy Wages 8, B. Lowenstrout 12, Roy Rouse 4.

Practice breaks of 25 straight: Ed Mitchell, F. H. Mellus, H. Pfirrmann, and 24x25 as follows: P. O. Lang, J. F. Todd, R. A. Arnold and R. W. Wilman.

* * * *

Big Time Club.—The Big Time Gun Club held the first shoot of the season Sunday at the Schenk ranch in Fruit Ridge, and it was pronounced by all who attended one of the most successful events of the kind ever attempted in that section. The attendance was far greater than had been anticipated, with the result that the committee handling the arrangements for the noonday meal was confronted with the task of hurriedly securing further supplies in order that the visitors might not leave the grounds hungry. This was remedied in short order, after it was evident that there would not be sufficient eatables on hand, and everything passed off without a hitch. Preparations had been made for about 150 people, but there were over 250 on hand when noon arrived.

Eighty-six shotgun artists tried their luck at breaking the clay pigeons and some fine scores were made. The shooting continued until it was too dark to see and so many participated that the records could not be figured up. The secretary has accordingly been late in turning in the scores, which accounts for their not appearing in this issue of the Breeder and Sportsman.

Extensive preparations had been made for the event and promptly at 9 o'clock in the morning an automobile parade started through the principal streets of the city on the way to the grounds.

Delegations from many of the nearby towns were in attendance and tried their luck at breaking birds which were thrown from the new traps recently installed on the grounds.

* * * *

Vernon Club.—"Pop" Bruner, founder of the Vernon Gun Club, was on the grounds Sunday to welcome the Vernonites who competed in the huge merchandise shoot after being absent on a business trip for two months. It was a fairly large crowd which fronted Pop and some 5,000 targets were sent spinning to their silent deaths before decisions on the raiment, glassware and hardware could be reached.

An order calling for a suit of clothes was up as the first prize and was won by Dr. L. M. Packard with a score of ninety-four dead birds out of the century.

Conditions on the contest called for compeitors to fire from sixteen yards and added birds would be given as handicaps. Class shooting and not high gun won.

The second prize, a cut glass water pitcher and six glasses put up by George Oliver of the Hercules Powder Company was taken after Dierdoff and Chas. E. Moist had tied with ninety-three apiece, by Moist when he defeated Dierdoff in the shoot-off at 25 birds.

Mrs. Groat and Palmer tied with 93 for the third prize, a shell case, and shot off for it at 25 targets. Mrs. Groat carried away the honors and the case.

Stan Bruner and Wilshire tied for the Vernon Club set of spoons, also with the 93 count. Bruner annexed the silverware in the shoot-off.

Pete Peterson and Cornelius tied up for the trout rod. Guess what they had—93 again. Peterson won the shoot-off and fish-getter.

The last prize up, a shooting jacket, was won by Greenfield, who was all alone with his 93.

Manderville won the 100 targets and shells for bringing to the club the most new shooters.

Hugh Poston, Charlie Julian and Mr. Barber breezed into the club before noon and broke up the clays in general. The contest was disfavored with a strong wind. The scores follow:

Merchandise Shoot—

Shooter—	Hdcp.	Bke.	Targ.
Heath	Pro.	74	100
H. E. Posten	Pro.	93	100
Cornelius	7	93	100
S. A. Bruner	2	93	100
Carlie Julian	25	84	100
Barber	20	88	100
Grewell	11	89	100
Dierdoff	12	93	100
Fitzgerald	10	89	100
Wilshire	13	93	100
L. D. Forest	7	92	100
Oliver	Pro.	70	100

Program for State shoot at San Jose

PORTLAND TRIES OUT TRAP-SHOOTING AT NIGHT WITH SUCCESS

San Jose, Cal.—O. N. Ford, secretary and manager of the San Jose Blue Rock Club, has received the outline of the program of the California and Nevada state shoot, which is to be held in San Jose on May 28, 29, 30, 31. As things look now it will be a banner shoot. On May 28, in the forenoon, 100 targets will be shot in practice. For the afternoon the two O. N. Ford championships of California and Nevada at 50 singles and at 25 pair of doubles will be shot.

On May 29 there will be ten events at 20 targets each. Thirty dollars in cash will be added to each event.

On Tuesday, May 30, the schedule calls for eight events at 25 targets each with $35 added to each event. On this day six championship trophies will be shot for, among them being the Sorrenson diamond medal valued at $400.

May 31 in the morning there will be five events at 20 targets, $30 added to each; in the afternoon the California and Nevada state championship, 100 targets, $100 added, with seven Interstate trophies to the seven high guns. The winner will also receive $50 to go to St. Louis to attend the national shoot in August.

Never, it is said, has there been a shoot held in California with this amount of money involved, and figuring on 125 shooters in the four days, it will mean that fully $10,000 will change hands. Mr. Ford will order one carload of blue rock targets and to shoot them up takes $3,000 worth of ammunition.

* * * *

Oakland Elks Club.—Another blue rock club made its debut around the bay last Sunday when the Oakland Elks held a successful shoot on the Golden Gate grounds in Alameda. Thirty-three gunners faced the traps and enjoyed bright, sunshiny weather to have a lot of fun. The majority of the new club members were new at the game and their scores accordingly were very creditable.

The Oakland Elks want to get their eyes sharpened up so as to give their Alameda brothers a race in the near future. Judging from the manner in which the recruits busted the blue rocks they will hold up their end nicely.

In the shoot Sunday Barney Worthen, an experienced man with the tarhawks, was high amateur with 47x50. F. Carter, Bill Price, Vosburg, Avery and Hamlin also did well. Dick Reed led the way for the professionals with 49 out of 50 and Hawshurst and Willet were close behind. The scores were:—

Shooter.	20	20	10	Ttl
Worthen	18	19	10	—47
Stonebarger	14	16	7	—37
Hawxhurs*	20	19	9	—47
Reed*	20	20	9	—49
Willet*	19	19	9	—47
Rickelfson*	15	13	10	—38
Avery	13	18	9	—40
Vosburg	16	17	6	—39
Price	17	18	5	—40
Lockhardt	13	14	4	—31
Spanu	10	12	6	—28
Adams	9	11	9	—29
Hynes	7	8	9	—24
Durney	13	11	5	—29
Hamlin	15	14	10	—39
Goodman	11	11	7	—29
A. Korn	3	4	4	—11
F. Carter	20	16	6	—42
Ballard	12	9	7	—28
Merrill	8	11	7	—26
Deldman	7	9	6	—22
Studley	7	5	7	—19
Ray	12	12	6	—30
Meineke	13	16	9	—38
Schreiber	13	14	6	—33
Fuller	14	13	4	—31
Dr. Hein	8	14	5	—27
O. N. Jones*	13	14	8	—35
Jordan	11	13	7	—31
Miller	17	14	7	—38
E. G. Williams	10	15	6	—31
Mathews	9	11	8	—28
Martine	16	7	8	—31

*Professionals.

* * * *

Alameda Elks Club.—The Alameda Elks will hold their second shoot in Alameda tomorrow. The boys had such a good time on the opening last month that they will be back at the traps in force. They realize that they will have to keep right on edge to hold the Oaklanders in check.

* * * *

Seattle Association.—A bunch of the old-timers, and not a small crowd of new shooters, turned out in the rain on March 26 at the regular program shoot of the Seattle Trapshooters' Association on their Harbor Island grounds.

Repeating his performance of the previous Sunday, Hugh Fleming was the high score, breaking 48 out of his fifty targets. Mat Grossman and Tom Wilkes ran Fleming a close race, they dividing second honors, with scores of 47. L. H. Reid, professional, scored 48.

A. W. McKenzie, factory representative for the Velie autos and trucks, was on the grounds for the first time this year, this being the first time he had shot for over eighteen years. His score was exceptional for a new shooter.

G. M. Valentine showed his steady improvement and at the rate he is going will soon be among the high scores. J. V. Hough came out strong in his total score average, making 90 per cent. C. R. Sydman, formerly of Snohomish but now living in Seattle, was on the grounds for the first time this season. J. R. ("Dok") Hager showed up with a gun that was too long for his arm. When it comes down to real shooting, "Dok" is there.

Several of the members shot the second part of the Everding trophy handicap. Scores:

Fifty targets—M. Grossman 47, *L. H. Reid 48, F. Williams 36, J. H. Hopkins 44, R. Kinzer 39, W. B. Taft 44, Deskin Reid 39, M. McManee 40, Hugh Fleming 48, W. F. Zwick 29, C. R. Sydman 42, J. V. Hough 44, C. W. Bandy 38, G. M. Valentine 41, C. E. McKelvey 44, Tom Wilkes 47, A. W. McKenzie 32, J. R. Hager 13, Van M. Woodaman 32, R. S. Searle 45.

*Professional.

One hundred targets—R. Kinzer 81, W. B. Taft 87, M. McManee 81, Hugh Fleming 90, W. F. Zwick 64, J. V. Hough 90, G. M. Valentine 83, C. E. McKelvey 89, Tom Wilkes 91.

* * * *

Golden Gate Club.—One week from tomorrow, Sunday, April 16th, the Golden Gate Club will hold its monthly shoot. They are making plans to entertain over fifty powder-burners. In order to keep their hand and eye in a number got in some practice last Saturday with the following results:—

FIFTY BIRDS—Stelling 40, Parsons 37, Swales 46, Craig 34, T. Prior 44, E. T. Prior 31, Miss Meyers 33, Wallace 36, Cullen 34, Webster 42, Dirks 25, Terry 44, Reon 29, Adams 38, Chambers 22, Bridgeforte 38, Sunkel 25.

75 BIRDS—Blub 59, Price 54, Martine 44, Merriman 26, Kierrilff 33, Garrett 69, Boyd 54, Middleton 26, Reed 69, Durney 35.

100 BIRDS—Dorsey 79, Howard 78, Stressler 78, Jones 65, Topham 75, Orr 88, Gaskel 42, Jordan 66, Swenson 73, Hawxhurst 96, Westerfeld 67, Lockhardt 78, Wade 44.

125 BIRDS—Landry 109, Brickell 101, Carman 84, Haight 108, Avery 110.

150 BIRDS—Coleman 90, Dimond 120, Brickell 115, McGettigan 118, Landry 125, Mrs. A. G. Wilkes 115, Wilkes 134, French 111, Rudolph 92, Hayden 92.

200 BIRDS—Stahl 169, Dorsey 164, Sanborn 136.

San Jose Club.—Gunners from outside points invaded San Jose Sunday and insisted upon having a practice shoot over the traps which will be used in the California-Nevada tournament next month. H. Lorenson came over from Newman with a new shooting iron and expressed considerable satisfaction with the new armament when he busted 95 out of 100 clays. Toney Prior of San Francisco wrecked 92 and George H. Anderson executed 90.

Miss Geneva Meyers of San Francisco was present and shooting in splendid form. For a time she had some of the topnotchers rather worried and she finished with the very good score of 83. With the exception of Mrs Ada Schilling, no other woman shooter has equaled this mark over the San Jose traps.

Toney Prior made high score in the doubles, hitting 22 out of 24. W. J. McKagney was second with 21.

George Anderson broke 74 straight, the second longest run made at the local club this year. He went 55 without a miss March 26.

O. N. Ford was slightly indisposed and did not shoot—the first shoot he has missed since coming to San Jose.

W. J. McKagney has won an A. A. T. medal.

The San Jose Blue Rock Club will shoot at home on April 9th and on the 16th they will go to San Francisco to compete in the Golden Gate Club shoot. The score:

H. Lorenson, Newman, 95; Toney Prior, San Francisco, 92; George H. Anderson, San Jose, 90; L. Baumgartner, San Jose, 89; C. R. Arques, San Jose, 87; William J. McKagney, San Jose, 87; Dr. Heidleburg, San Jose, 87; Miss G. Meyers, San Francisco, 83; Leo Thornton, San Jose, 77; Prior Jr., San Francisco, 75.

Doubles—Toney Prior, 22 out of 24; William J. McKagney, 21; H. Lorenson, 20; Louie Baumgartner, 20; Dr. Heidleburg, 18; George Anderson, 17; C. R. Arques, 17; George Brown, 15; S. Bell, 14.

* * * *

A. B. Jordan, secretary of the Oakland Elks' Blue Rock Club, was busy as a bee Sunday running off the shoot. He is a new hand at the game but is a worker. Everything ran off nicely and Jordan promises big doings the next time the Oaklanders get out to the traps.

* * * *

Portland Club.—Trapshooting at night was inaugurated at the Everding Park raps of the Portland Gun Club last week. Superintendent Ed Mathews has been experimenting with various lights for the past year so that trapshooting might be enjoyed in the evening as well as in the day time.

Four big 100 candle power electric lights are stationed in front of the trap house. The degree to which the equipment has been perfected may be judged from the fact that Frank Templeton broke 92 out of 100 targets last Thursday night when the first tryout was made. Two other shooters broke over 90 per cent in the initial tryouts. The shoot started at 8:30 o'clock.

Night shooting should become very popular. Portland is the first city in the west to inaugurate the plan. Several large eastern gun clubs have facilities for night shooting.

Owing to adverse weather conditions on March 26, there were not enough women present to hold the telegraphic match with Spokane and the match was defaulted. The two prizes which were offered for the two high guns in the women's squad were not contested for as there was not a full squad present.

Spokane won the telegraphic shoot with the men's team of the local club by the score of 116 to 109. The scores were, Spokane—Chingren 24, McElroy 23, Gregory 23, Miles 23, Hayes 23, total, 116. Portland—F. Templeton 23, J. W. Seavey 22, E. H. Keller 22, A. Parrott 22, and W. E. Carlton 22; total, 109.

J. W. Seavey was high man in the high bird event among the amateurs, with H. E. Dickerman of Chicago second. Pete Holohan topped the professionals and Jim Bull was second. Mrs. Ada Schilling broke 90 per cent.

E. G. Hawman, president of the Woodburn Gun Club, and C. E. Fellers, were among the out of town visitors.

The scores of the 100-bird event:

F. Templeton 88, H. A. Pollock 82, W. E. Carlton 84, W. G. Bristol (20 gauge) 54, *E. B. Morris 82, J. C. Morris 74, A. G. Hawman 83, C. E. Feller 86, J. Reid* 84, Miss Gladys Reid 60, H. A. Dickerman 90, Mrs. A. Schilling 90, C. J. Schilling* 88, A. L. Zachrisson 58, P. J. Holohan* 94, A. W. Strowger 72, A. W. Strowger Jr. (28 gauge) 16x20, J. P. Bull* 92, E. H. Keller 88, A. Parrott 88, J. W. Seavey 92, Dr. O. D. Thornton 84, A. Moelm 73, O. Manary 68, L. E. Creswell 76. *Professional.

Twenty-one blue rock enthusiasts participated in the first night trap shoot. Judging from the enthusiasm night shooting will become very popular.

Regulation 50-yard, 16-yard rise, targets were thrown and the shooters experienced no difficulty in hitting the "mud saucers." Superintendent Mathews installed the big lights on the top of the clubhouse, but the light was not as good as it was when the arcs were in the trap house. Before the next shoot the lights will be transferred to the trap house.

Al Seguin topped the shooters, breaking 92 per cent. W. C. ("Bill") Bristol was out with his trusty 20-gauge. After knocking 62 per cent of his targets to pieces he was challenged a couple of times for match races and he accepted both of them. The percentages:

Roy Wilson 80, F. Templeton 80, H. A. Pollock 74, A. Eeguin 92, A. Woelen 50, J. G. Clemson 60, A. L. Zachrisson 52, James Marris 70, J. S. Crane 50, W. B. Honeyman 82, W. C. Busbe 62, E. F. Platt 68, H. L. Corbett 64, W. E. Carlon 80, H. F. Corbett 64, E. R. Goodwin 68, E. H. Keller 76, George Bertz 44, A. W. Strowger 64, Critchlow 60, O. D. Thornton 60.

* * * *

Lewiston, Idaho.—The practice shoot at the Lewiston Gun Club traps attracted a large attendance March 26th and some good scores were made. In the shoot for the Everding trophy several changes were made in the standings. Larson now leads with 92 targets out of a possible 100. Wallace and Johnson are tied with 91 each, and Hill and Hahn are tied with 89 each. Larson was high man in the practice shoot, with 45 out of 50.

* * * *

Yallace, (Idaho) Club.—High scores were the rule at the weekly shoot of the local gun club at the Nine Mile traps on March 26th. Thirteen members participated. Scott was in good form and finished with 47 out of 50. Werkheiser and St. Jean tied for second place with 45 each. Gibbs and Venable tied for third place with 43 each. The club goat went to Gibbs on a miss and out contest between Gibbs, Venable and Martin. The remaining scores in the regular 50-bird event were: Lieb 35, McConkey 40, Howarth 39, Ebbley 34, Heitfeld 31, Martin 39, White 39, Walker 40.

COMING REGISTERED TOURNAMENTS.

California.

Los Angeles, May 8, 9.—Vernon Gun Club, William Pugh, Manager.

San Jose, May 28, 29, 30—California-Nevada Association Tournament, San Jose Blue Rock Club, O. N. Ford, Secretary.

Eureka, July 4—Eureka Blue Rock Club, H. A. Hine, President.

Fresno, April 29—Fresno Blue Rock Club, C. B. Jackson, Secretary.

Oregon.

Portland, June 5, 6, 7—Sportsmen's Association of the Northwest Tournament, under the auspices of the Portland Gun Club, Frank Templeton, Secretary.

Portland, Sept. 12, 13, 14—Pacific Coast Handicap.

Washington.

Chehalis, May 30—Chehalis Rod and Gun Club, Gus T. Thacker, President.

Seattle, July 4—"Old Policy," Green Lake Gun Club, W. C. Smith, Secretary

Tacoma, July 18, 19, 20, 21—Pacific Indians, F. C. Riehl, Secretary.

FLY-FISHING ON BEAR LAKES.

There will be much more fly-fishing done on the Bear lakes this summer in an effort to stir up interest on the part of the big fellows in surface feeding. On Little Bear the prospect is best. Such good sport can be had by "spooning" with the big chaps on the upper lake that one can get along very passably with them in spite of their disinclination to come up to the top and take a sporting chance until hooked. Then they incoke the air freely enough; as one chap of ocean experience said, they act like decent fish until hooked, and then they seem to think they are flying-fish!

Sea fishing is looking up. There was a big school of mackerel cruising about the other day along the west coast. Sana Monica and Redondo anglers had considerable fun with them. In days gone by Redondo was the messa of the mackerel anglers—the long cane-pole fraternity of other days. But the best sport with mackerel always was from a boat in the quiet of early morning, when they will take a red and white fly like a Parmachenee belle as freely as any trout. And don't think they aren't game, or that the sea doesn't breed gamey fish. No fish of equal weight can outfight a mackerel; they are built for speed and endurance and if "courage" is the proper term to apply to the mentality of a fish, they have that, too. At least a big mackerel never quits until he dies.

JUDGE OF KENNEL SHOW TO COME.

Walter H. Reeves, of London, who will judge all breeds at the Golden Gate Kennel Club April 27, 28 and 29 will arrive in San Francisco next week. Reeves has the distinction of being the highest salaried dog expert in the world. In the neighborhood of two hundred and fifty dogs of many breeds have been entered by their owners since O. F. Vedder, the superintendent of the show, opened his offices at 528 Market street last Saturday. Jack Bradshaw, the local dog expert, left for New York last week to accompany a string of dogs that he bought in England several weeks ago to his kennels here. Bradshaw will show several of his newly acquired dogs along with Country Model, California's champion bulldog.

‡ ‡ ‡

Mrs. Anita M. Baldwin, daughter of the late E. J. "Lucky" Baldwin, will show her entire kennel of Airedale terriers, Russian wolfhounds and bulldogs. Failsworth Knight, a $2,000 bulldog, will be among the dogs entered.

‡ ‡ ‡

Mrs. Norwood B. Smith, owner of Cragwood St. Bernard kennels in Palo Alto, is importing a pair of St. Bernards from England.

‡ ‡ ‡

G. Kellogg Claxton will show his imported West Highland white terriers at the Golden Gate show.

‡ ‡ ‡

It is rumored that George W. Quintard, of Bayside, L .I., will send his famous team of wire-haired fox terriers, Matford Vic and Wireboy of Paington, here to compete with the local dogs at the Golden Gate show April 27, 28 and 29.

‡ ‡ ‡

Champion Amen Gem, the greatest Airedale terrier bitch ever bred who was bought in a London dog pound, for about four dollars, will be one of the many Airedales at the coming show. She is the property of the Vickery kennels, of Chicago.

‡ ‡ ‡

Failsworth White Knight, a bulldog owned by Anita Baldwin, of California, won the ribbon for best dog any breed at the Seattle show last week. H. B. Hungerford of New York judged.

‡ ‡ ‡

Thomas Harrison, an English dog expert, who came from England last year to manage W. E. Mason's Dogs of All Nations exhibit at the Exposition, arrived in San Francisco last week, after a brief visit in the south. Harrison has decided to stay over for the Golden Gate show, and may get up a string of dogs to show.

SALMON TAKEN IN THE BAY.

While trolling for striped bass in the San Francisco Bay last Sunday Henry Hellrich, a skilled and learned rodster, landed a 30-pound salmon near the fog bell of Angel Island. This is odd for this time of the year. Small runs of salmon have come along but not many, and later in the season.

Trolling for striped bass continues in Raccoon Straits and off Angel Island. Members of the San Francisco Striped Bass Club have made catches during the past two weeks ranging in weight from seven to thirty pounds.

* * * *

Angleworms Sing.—That angleworms sing is the remarkable discovery made by Walter Armacost, a florist of Santa Monica and Sawtelle.

Ground beds in the greenhouses are full of the earth worms and a kick on the board siding of the bed is instantly followed by a chorus from the wriggling creatures. At certain times of the day every kick will be followed by the worm chorus.

Contrary to the belief of some plant growers, Mr. Armacost holds that the earth worms are rather beneficial to the plant than otherwise.

His theory is that the action of the worms in the soil enables the plant to appropriate its nourishment to better advantage. Therefore he does not attempt to exterminate them.

Queer Ways of Catching Animals

ENERGY, ENTERPRISE, PATIENCE AND SKILL DISPLAYED IN METHODS

The energy, enterprise, patience and skill displayed in the methods used in uncivilized countries for the capture of wild animals find issue in most remarkable artifices.

A common way of ensnaring prey is to set up effigies of the species and to imitate their peculiar cry.

In Siberia, where the peasant, if he sees any one shoot a bird on the wing, stands with mouth gaping in astonishment, not at the skill of the sportsman but at his folly in expending his ammunition, the fowler, having constructed a small hut of green branches in order to hide himself, spreads his nets over the grass in its vicinity where are scattered some stuffed geese or, say, some sitting, others standing in the natural positions of the bird in question. On a flock of wild geese passing overhead, the Siberian with a small bit of birch bark, curiously fashioned, imitates with singular verisimilitude the notes of the birds. On hearing, they wheel and alight among the stuffed skins, when he instantly draws the net over them and easily secures a considerable number.

Incidentally, as a "shot" the average Siberian fowler, especially among those inhabing the great marshlands between the lower courses of the Obi, Yenesi, and Lena, where wild fowl abound, excels almost all. If he does shoot, though he prefers to trap even the black-cock and other game birds, the Siberian always hits the bird on the head. When he shoots, he at first approaches the object on all fours, and then crawls on his stomach till he is at a proper distance for firing. Rarely if ever does he miss, and always hits an animal, the fur of which is of worth, through the muzzle.

Along the east coast of Central America the Indians use a similar method for catching waterfowl. With artificial birds, resembling the teal or wild duck or other bird, made out of rushes, and set afloat on the waters of the lagoon, they lure their prey to its capture, a large calabash hiding the head of the Indian as he aproaches, swimming very gently. Something of a corresponding method also obtains in the deserts of Arabia among the ostrich-hunters. The hunter covers himself with an ostrich skin, and passing an arm up the neck he imitates the motion of the great bird, by means of which artifice he approaches near enough to secure his victim.

Capture through imitation also is resorted to by the Esquimaux, where untouched by civilization or short of powder and shot. Concealing himself behind a heap of stones, the hunter imitates the peculiar bellow or grunt of the deer, and thus lures it within range of his spear or arrow—an artifice which once was common to almost all American Indians. During the winter and early spring the Esquimaux to this day catch wolves and other animals in traps or small houses built of ice. At one end of the hut is a door made of the same material, fitted to slide up and down in a groove. To the upper part of this a line is attached which, passing over the roof, is let down into the trap at the inner end, and there held by slipping an eye in the end of it over a peg of ice. Over the peg is placed a loose grummet, to which the line has been fastened, and a false roof, placed over all to hide the line. The instant the animal drags at the bait the grummet slips off the peg, bringing with it the line holding up the door, and this falling closes the trap and secures the prey.

The Northmen also make use of bird traps just large enough to contain one person, who shuts himself up in his snow-built lure. On the top of it is left a tiny opening ,through which the man thrusts out one of his hands to lay hold of the bird the moment it alights to take away a bait of meat laid there. In certain outlying parts of France, and in the Spanish Pyrenees, also in the hilly regions of northeast Portugal, a similar contrivance is in vogue among the poorer inhabitants, the lure in which the fowlers hide being formed of green boughs instead of snow.

It is however in the trapping of wild beasts for exhibition purposes that most ingenuity is shown.

In giraffe hunting, trappers usually employ a contrivance of three posts joined together at one end and weighted at the other. Pursuing the animals out in the open land, the trapper draws as close to his quarry as the latter will allow, and casts his entanglement in such a way and with such skill that it winds round the giraffe's legs and brings it to the ground, when it is immediately secured.

Zebras are also captured in this manner though the lasso used by cowboys is often utilized. But the difficulty with the giraffe and zebra is to get near enough for the entanglement to be thrown the intervening distance.

The experienced trapper runs little risk with elephants. He finds the place where elephants are evidently in the habit of passing or halting, and here with the aid of natives he digs a great cavity some twenty feet in diameter and five to six feet deep, erecting a strong, high, wooden fence all around it, except at one place, where a large gate is swung.

On a herd of elephants being discovered in the vicinity, the trapper rides out to encounter them, and inveigles one of them, usually a bull, to give him chase. Generally the quadruped is only too willing, and pursues him at a round pace toward the trap, for which the trapper rides. But when he is right on the gate of the trap, he swings his horse round and slips through the narrow opening in the fence, which has escaped the notice of the irate elephant, that being less agile than the horse, cannot turn in time to stop itself but plunges into the trap, the gate of which closes quickly behind it, and lands, with no little impetus, in the great hole prepared for its reception. After having remained in this position for some days, during which it is subjected to the suffocating fumes of many fires, driven stupid with the noise the trapper's natives purposely make, and deprived of water and food, the quadruped's spirit breaks; and completely humbled he is loaded with chains and ropes, and led away.

Apes of all species, save the gorilla, are more easily captured than any other class of wild animal.

All the trapper has to do is to walk near their haunts, when they scurry off to their retreats among the boughs of the trees, and catch him. He drinks, or pretends to drink, from a bottle containing a crude spirit, and leaving the bottle behind walks away. Directly his back is turned the monkeys shoot down from the trees, and investigating the bottle taste its contents. In due course, the trapper returns and easily ropes in the animals that have been overcome by the intoxicant.

The gorilla is not to be caught in this fashion. Indeed, it has been said that a full-grown gorilla has never yet been captured alive. Certainly no sane man would attempt such a feat. When a wild-beast trapper encounters a gorilla, the very great market value of it may occur to his mind; but it does not tempt him to try to make a capture. He shoots to save his life. If his aim is indifferent, the probability is that a human skeleton will mark the place of the encounter. The few gorillas seen in captivity are either victims of infantile indiscretion or very large baboons.—N. Tourneur—Rod and Gun.

Green Lake Club—Trapshooters have often claimed their sport is the only one that cannot be put out of commission by the weather man, and this was proved March 26th at the Green Lake Gun Club, Seattle, when a crowd of thirty-four shooters turned out and shot through the regular program in a driving rain. Some fine scores were hung up during the day.

The hard rain made it necessary to postpone the special ladies' event, and while several of them were out they were content to remain in the clubhouse.

J. S. Ruppe was high amateur, with 48 out of 50, and Matt Grossman was right on his heels with 47. L. H. Reid, professional, also got 48 out of his 50.

The scores:—

	15	15	15 Ttl
Ruppe	13	15	20—48
*Reid	15	15	18—48
Grossman	14	14	19—47

Folsom-Natoma Club.—Members of the Folsom-Natoma Rod and Gun Club are having some sport Sunday afternoons at blue rock shooting. So far the honors have been pretty evenly divided between Joe Rickey and Ollie Ferguson. The great "white hope" of the club, however, is Jack Frates. Jack scored one at the first shoot and two at the second. If he keeps gaining one each time, and if the season lasts long enough, he will eventually make a perfect score.

The club has arranged for a bluejay shoot by dividing the membership into two teams, one under the captaincy of Joe Rickey and the other headed by Billy McKean. The shoot will close April 23rd. The teams are as follows:

Rickey—B. Aymar, L. Biggs, F. Burnham, L. A. Coan, J. Curle, T. Clayborne, M. DeAmaral, J. DeRoas, D. Dunkenson, J. W. Enlow, J. Frates, B. Hunt, N. Hall, J. Jacobs, Wm. Kaelin, J. Leonard, L. Moon, D. McHugh, G. Murer, C. O'Connors, J. Phelan, L. Putnam, C. Romanowitz, H. Seimer, C. Schwilk, C. Spencer, G. Todhunter, A. L. Thau, J. T. Wall, I. B. Walther, H. Weinrich, W. L. Young.

McKean—E. L. Baham, Wm. Bean, L. Cassella, E. Crail, W. N. Crail, T. Doyle, P. Donnelly, D. G. Davenport, G. W. Elliott, F. Fritz, F. Games, L. D. Hopfield, F. Hopfield, C. S. Jones, S. Kuster, Ed. Moon, A. McDonald, F. Myers, F. Newman, Chas. Orr, N. Pratt, C. Rigney, C. Rankin, A. D. Smith, Wm. Stapleton, O. B. Thorp, G. Tagtmier, E. T. Wall, Ed. Welch, Fritz Weber, Pep Young.

THE FARM

CAN DUAL PURPOSE CATTLE BE BRED?

The extent to which opinions differ on this question is so great, that it is in a sense almost unexplainable. In this country a great majority of those who teach in the lines pertaining to animal husbandry claim that dual cattle cannot be successfully bred. In Great Britain but few persons are found, even among those who breed straight dairy cattle, who will dispute the possibility of breeding dual cattle. As a result of this difference of view, but few attempts are made to breed dual cattle on correct lines in America, while the great bulk of the cattle in Great Britain are of the dual types. The great mass of the cattle in America that are called dual purpose are not dual purpose at all. They have not been bred on correct lines. Correct lines of dual breeding are dwelt upon below.

Why that idea should have become so firmly rooted in the minds of men is one of the unaccountable things. Those who hold it claim that the tendency to swing to milk on the one hand and to meat on the other will be so constantly present that the equilibrium cannot be established. Why this should follow of necessity I fail to see. The first law of breeding and far the most important one is that "like produces like." This likeness in transmission extends to every feature of the organization, to form, to function, to disposition and to color. The dominant factors in this discussion are those that relate to form and function. The operation of this law in relation to form will be conceded by all fair-minded men; for without its aid extreme dairy form could not be secured. The battle ground, therefore, centers around the transmission of the function, or of function in its relation to form.

It will be conceded by all that a marked degree of uniformity may be secured in the transmission of form and function that is extreme in one direction in the dairy cow, and extreme in another direction in the beef animal. Why should such transmission fail when middle ground transmission is sought—that is good production in the lines of both milk and meat? Can any opponent of this idea show why?

If it were true that there was inherent antagonism from start to finish between milk and meat production in the same animal, then we could imagine difficulty in maintaing equilibrium in the transmission.

[Concluded Next Week.]

RACE TRACK FOR SALE.

The Ukiah race track, located a little less than a mile from the Court House at Ukiah and bounded by the State Highway on the west, the county road on the south, and the Northwestern Pacific Railroad nearly the entire length on the east side of the track. The property consists of twenty acres. Fifty-nine good box stalls, good grandstand, fencing in good order, and one of the best half mile tracks in the state. An excellent winter track and an ideal place to work horses during that season. Plenty of adjoining drives for jogging horses. Two wells on the premises as well as water from the city water works, with tanks conveniently arranged for sprinkling.

This is the only race track in Mendocino county and the location of the county fairs. Ukiah is the county seat and has a population of about 3000, is in a most fertile valley in which all kinds of fruit, vegetables, hay, grain and hops are grown. Has excellent water; no malaria or mosquitos. It has paved streets, good sewerage, and splendid gas and electric light works. There are many standard and thoroughbred horses in this county and the people are a race loving lot. This property is offered for sale at a less price than adjoining property is held at. For terms and further particulars address
F. W. KELLEY,
Care of Breeder and Sportsman.

WANTED.

Pacer, five to eight years. One that has been campaigned; sound. Address
A. B., This Office.

WANTED—A blocky built, easy moving pacing mare, weight about 1100 lbs. and between 5 and 8 years old; sound and gentle. Address
BOX 228, Livermore, Cal.

GOOD ONE FOR SALE.—Three-year-old colt by The Bondsman, first dam Burnside by Antrim; second dam Dolly by Arronax; third dam Birdie by Jay Bird; fourth dam Lady Lyle by George Wilkes. This colt was bred by Thomas Ronan of Pleasanton and will be sold cheap. Address JOHN SMITH, Care of Breeder and Sportsman.

ASSESSMENT NOTICE.

MAY DAY GOLD MINING COMPANY—Location of principal place of business, San Francisco, California. Location of works, Calaveras County, California.

Notice is hereby given that at a meeting of the Board of Directors, held on the 24th day of February, 1916, an assessment (No. 4) of five (5) cents per share was levied upon the capital stock of the corporation, payable immediately in United States Gold Coin, to the Secretary, at the office of the company, 1215 Van Ness Ave., San Francisco.

Any stock upon which this assessment shall remain unpaid on the 20th day of April, 1916, will be delinquent and advertised for sale at public auction, and unless payment is made before, will be sold on Friday, the 19th day of May, 1916, to pay the delinquent assessment, together with the cost of advertising and expenses of sale.

By order of the Board of Directors.
C. E. HEALD, Secretary.

Office—1215 Van Ness Ave., San Francisco, California.

FARMS FOR SALE
Choice Land in Idaho

Lewiston, Idaho, is situated at the forks of Clearwater and Snake rivers and has transportation to the coast.

960 acres 7½ miles from Lewiston, Idaho, 4½ from Lapwai, Idaho, on main traveled road, all in cultivation except about 15 acres, all level land, just a little rolling, 320 acres of fall wheat in, 225 acres fall plowed for spring crop, about 30 acres in alfalfa. All fenced and cross fenced. Two good springs with big cement water troughs, well, windmill and cement reservoir, water piped to house, 7 room house, hot and cold water and electric lights. Large horse barn with hay mow in the center, electric lights in barn; cow barn with two box stalls; hog pens, shade trees, chicken houses, blacksmith shop, wagon shed, granary, outdoor cellar with bunk house overhead. $85 per acre; will take one-third down, time on balance to suit purchaser, at 7 per cent interest. One-third of crop goes with place if sold any time up close to harvest. Mild climate, can raise all kinds of fruit, grain and vegetables. Wheat in this country goes from 35 to 65 bushels per acre, barley 40 to 80 bushels per acre.

320 acres 4½ miles south of Vollmer, Idaho, 275 acres in cultivation, balance in pasture and timber, farm land lays practically level, one-third of crop goes with place if sold before harvest. Some fall wheat already sown. All fenced and cross fenced. Quarter section of it fenced hog tight; good four-room house, wood shed, and out of door cellar, nice grove around house, well at house, fair stabling and out buildings, spring and spring creek close to barn, three springs on place. Price $70 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

238 acres 4½ miles from Lewiston, Idaho, 175 acres in cultivation, 25 more can be cultivated, balance good bunch grass pasture, fenced and cross-fenced, good spring creek runs across place, small house, station on place for Johnson R. R., two grain warehouses at station. Price $70 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

160 acres of timber land, good farm land when timber is cleared off, all can be farmed except about 2 or 3 acres. Good timber, yellow pine and fir. Price $4000, 40 miles from Lewiston, Idaho. Well located to log off.

240 acres 6 miles from Asotin, 12 miles from Lewiston, Idaho, about 75 acres in fall wheat, about 75 acres more can be cultivated, balance in bunch grass pasture, two springs, small house, all fenced. Price $40 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

TO WIN

You want your horse made **SO SOUND** that the **"CURED"** part will stand up through "slips," "twists," "clips" from opposite foot,—through jogging, training, fast work, heavy tracks,—in short through every ordeal allied with **"RACING TO WIN,"—NOT** once—but **EVERY** time.

SAVE-THE-HORSE
(Trade Mark Registered.)

does just **THAT!** Not by the "skin of the teeth," not once in a while, not through luck and chance, **BUT**—positively and with unvarying continuity, **BECAUSE** it proves to have the adequate power and properties required under all such tests. This may leaves no chance for doubt.

sound STRONG, but the EVIDENCE

WE ARE THE ORIGINATORS of the plan of giving a Signed Contract to return money if Remedy fails on Ringbone, Thoroughpin, SPAVIN, or any Shoulder, Knee, Ankle, Hoof or Tendon Disease

Regardless of Price or Any Other Reason, Save-The-Horse is the cheapest remedy known. It goes through and through both bone and tissue—it works inside, not outside—and produces a cure that withstands every test.

No Scar or Loss of Hair. Horse Can Work as Usual.

For Greatest Satisfaction Use
DOUBLE SERVICE Automobile Tires
Guaranteed 7,000 Miles Service
Absolutely Puncturepoof

Double Service Tires are made double the thickness of the best standard make tires.

This 100% greater wearing surface naturally gives that much more mileage and service. The average of 12 miles of tough fabric and one inch surface tread rubber makes these tires *absolutely puncturepoof.*

These tires excel all others for use in the country over rough and rugged roads as well as on hard pavements. They are as easy riding and resilient as any other pneumatic tire—same air space and pressure being the same.

They are the *most economical* and "care free" tires made and are used where tires must be depended on and tire troubles cannot be tolerated. Many *Double Service* style tires are in use in the U. S. government and European War service.

Our output is limited to a certain amount, but for a short time we offer the following reduced special prices as an **Introductory Offer:**

PRICES

	Tires	Tubes		Tires	Tubes
30x3 in.	$ 8.60	$2.30	36x4 in.	$17.45	$4.65
30x3½ in.	10.85	3.10	35x4½ in.	21.20	5.60
32x3½ in.	12.75	3.20	36x4½ in.	22.50	5.75
33x4 in.	15.75	4.20	37x4½ in.	23.60	6.20
34x4 in.	16.70	4.35	37x5 in.	26.30	6.60

All other sizes not included in above list also furnished. Non-skids at 10% additional.

Terms: Payment with order at above special prices, a 10% discount allowed on orders for two or more tires. All personal checks must be certified.

Try these tires now and be convinced of their very high qualities. Sold direct to the consumer only.

Descriptive folder upon request. Write for it.

TRAINING DISTEMPER.

Ever hear of this? Yes, of course you did, but under different name. You have seen it in cases where the horse was "overtrained," worked a little too fast and regular. The nervous system gets the shock, after the voluntary muscular system has been taxed too heavily. The trouble starts in the mucous surfaces and the digestive apparatus, too, must then be impaired. He begins to cough when the glands are materially affected.

"SPOHNS" is your true salvation. It restores the appetite and normal functions of the whole system. The action in such cases is remarkably rapid and sure for recovery when you use this remedy according to instructions with each bottle. Only 50c and $1 a bottle; $5 and $10 a dozen. Sold by all druggists, horse goods houses, or express prepaid by manufacturers.

Harpers Weekly and The Breeder and Sportsman

$5.50 WORTH FOR $3.25

Breeder and Sportsman

One Year, 52 Copies, Regular Price $3

THE BREEDER AND SPORTSMAN is the oldest weekly journal devoted to the Horse west of Chicago, having been established in 1882. This interest, together with the Kennel, Gun, Fishing, Coursing and kindred sports receiving the most attention in its columns; together with Agricultural and Dairying Departments, under whose headings especial attention is paid to the breeding, etc., of Cattle, Sheep, Hogs, Poultry, and all other animals connected with stock raising.

As an advertising medium to Racing Associations, Horsemen, Stock Breeders, Manufacturers of Sulkies, Carriages, Wagons, Agricultural and Dairying Implements and Machinery, Sporting Goods, Fanciers, Stock Foods, and all others desiring to bring their wares to the attention of the classes to whose interests the paper is devoted within the field mentioned above, the BREEDER AND SPORTSMAN will be found indispensable.

Harpers Weekly

Six Months, 26 Copies, Regular Price $2.50

At no time has it been so evident to Americans as now, that the most important thing in the lives of all of us is the progress of the European War.

Next to your daily bread the war interests you most vitally. It may even come to be the most important part of your problem of living.

The periodical of greatest fundamental interest to you today is the one that can best report those phases of the war that come closest to your country and you.

Because of connections abroad and at home, HARPER'S WEEKLY is that publication.

As a critical commentary that presents inside facts, it is the necessary bridge for intelligent readers between the daily newspaper and the monthly review.

You want HARPER'S WEEKLY now. You can get it now on trial at a remarkable reduction.

Send $3.25 Now and Get Them Both

THIS OFFER is made to all who will send us $3.25 before April 30th, 1916, whether for extension of subscription, renewal of subscription or a new subscription. Address:

REID'S REMARKABLE RECORD

Adds Further Evidence of the Superlative Quality of

Peters SHELLS

Shooting at Registered Tournaments during the past four years L. H. Reid of Seattle, has made a phenomenal Record of consistent High Scores

1912—	2115 ex	2200, 96.14%,	Pacific Coast High General Average.
1913—	3843 ex	4005, 95.95%,	Pacific Coast High General Average.
1914—	2146 ex	2225, 96.44%,	Professional Average for United States.
1915—	2482 ex	2550, 97.33%,	Pacific Coast High General Average.
Total,	10,586 ex	10,980, 96.46%	

During the above four years, Mr. Reid has shot at nearly 30,000 Registered and non-registered targets, breaking an average practically equal to the above. In accomplishing these results, he used about two-thirds TARGET (medium grade) and one-third IDEAL (high grade) shells, all with

ARROW SPEED SHELLS

WHAT A FLOOD of real shooting memories that name conjures! At the traps, in tight, binding races, when each load must pattern perfectly to win, Arrow Speed Shells bring home the bacon.

IN THE FIELD

WHEN WHIZZING Bob White or Valley Quail, racing like glancing shadows, fold up at the bidding of Speed Shells. And those wonderful kills up in the kite country — teal, mallard, "can" or red-head drop headlong when Speed Shells command!

FOR VETERAN OR NOVICE

ARROW SPEED SHELLS appeal with a smashing, hard hitting logic that is the last word in preparedness for gun-pointing forays. In twin tubes, pump or autoloading, Arrow Speed Shells function with a silky smoothness that is merely another asset of this perfect product.

The 20th Indoor Championship Match and Prize Shoot

WON WITH

WINCHESTER

.22 Caliber Rim Fire Cartridges

The winning of this — the most important indoor shooting of the year — means more than simply another addition to the long list of triumphs to Winchester — the **W** brand of guns, ammunition, etc. It is convincing proof that the long and firmly established policy of Quality First, followed so religiously in the manufacture of Winchester goods, has not been relinquished an iota, notwithstanding the unparalleled demands made upon the Winchester company for its products during the last twenty months. It plainly shows that, no matter how unusual the condition, Winchester goods can always be relied upon. The big winners at the Indoor Shoot were as follows:

100 SHOT CHAMPIONSHIP MATCH

Won by L. G. Buss, score 2473, with Winchester cartridges and Winchester Telescope Sight. All of the first six contestants used Winchester Telescope Sights, and four of them Winchester cartridges.

RING TARGET CONTINUOUS MATCH

G. W. Chesley and H. Hunziker, shooting Winchester cartridges, tied with two other shooters, making five 75s—perfect score. Three of the four contestants in this match used Winchester Telescope Sights.

ZIMMERMAN TROPHY MATCH

Won by G. W. Chesley. Second, H. Hunziker. Third, L. C. Buss. All shooting Winchester cartridges. Mr. Hunziker made a perfect target of 5 degrees in his string, and Mr. Chesley one of 6 degrees.

BULLSEYE MATCH

Won by S. Murphy with a target measuring 7 degrees. Second, J. J. Young with a 7½ degree target. Third, C. Zettler with an 8 degree target. Fourth, G. W. Chesley with an 8 degree target.
All four place winners used Winchester cartridges.

FOR RELIABILITY AND RESULTS USE THE **W** BRAND

PARAMOUNT PARKER GUNS

Look...

Mr. Woolfolk Henderson, an amateur, by scoring .9753% made the
HIGHEST OFFICIAL GENERAL AVERAGE FOR 1915

Mr. Lester German, a professional, by scoring .9742% made
SECOND OFFICIAL GENERAL AVERAGE FOR SAME PERIOD

Read...

CLEAN SWEEP ON DOUBLE TARGETS
Messrs. Guy V. Dering, S. A. Huntley and Woolfolk Henderson won
FIRST, SECOND and THIRD,
respectively, by scoring 9000%, 8666% and 8400%.

THE WORLD'S RECORD!!!

At Atlantic City Sept. 15 to 17 Mr Lester German broke all Tournament Records by scoring 647 OUT OF 650 TARGETS, with one run of 372 straight, which is longest for the year.
PARKER GUNS have won the Grand American Handicap 9 times out of 25 offers, once with 100 straight, only time made. Also 7 out of 9 Interstate Championship Events with highest scores ever made, twice with 198 x 200 at 18 yards rise.

Remember

PARKER PACIFIC COAST RECORDS

In California Mr. Henry Pfirrmann won the Pacific Coast Handicap and Mr. J. Foster Couts won the Championship of California.
In Portland, Oregon, Mr. P. H. O'Brien by scoring 241 straight made the record for the Pacific Coast.

If interested in small bore guns write for instructive booklet which will be sent free on request. For further particulars regarding guns from 8 to 28 gauge, address

TRAINING THE HOUND

A PRACTICAL TREATISE ON THE TRAINING OF FOX HOUNDS, BEAGLES, AND COON HOUNDS.

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies. Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; $1.50, postpaid.

RESERVE GROUP OF IMPORTED REGISTERED SHIRE STALLIONS

PRIZE WINNERS AT THE PANAMA-PACIFIC INTERNATIONAL EXPOSITION

FROM THE BLACKHAWK STOCK RANCH, BURLINGAME, CAL.

Pleasanton Driving Park

PLEASANTON, CALIFORNIA

offers for service for the season of 1916 the following stallions:

THE ANVIL 2:02 3-4

Fastest trotting stallion ever offered for service in California, and fourth fastest entire trotter in the world

Son of St. Valiant Vincent 2:11¾ (by St. Vincent 2:13½ out of the triple producer Grace Lee 2:29¼ by Electioneer 125); dam Amy Smith by Emperor Wilkes 2:20¾, sire of Princess Eulalia (4) 2:09¾, etc.; grandam by Hambletonian 539.

The Anvil is regarded by Edward F. Geers as one of the very greatest trotters that he has ever raced. For five years the pair of Tennesseeans went to the races together and in that time were but twice unplaced, while winning a total of fifteen races, including the historic M. and M.

As an individual he is most pleasing, not too large or coarse in any way but smoothly and compactly made and "all horse" in every line. He is a perfect headed, pure gaited trotter, with the very best of disposition, and is destined to become a very great sire of trotting speed. His opportunities in the stud have been very slight as he has been retired from racing only since the close of 1914, and has but three or four foals now three years old. He was selected to head the stud at Pleasanton Driving Park not only on account of his great qualities as a race trotter, but because one of his first foals, Anvilite (2) 2:22¼, with a trial of ten seconds or more faster, is in every way the greatest colt trotter ever handled by C. L. DeRyder. The services of The Anvil are recommended to you without reserve.

Fee for The Anvil 2:02¾, $100 with usual privilege

Vernon McKinney 2:01 1-2

Fastest member of the great family of McKinney 2:11¼

Sire of VERNA McKINNEY (2) 2:13 (his first foal raced), fastest two-year-old pacing filly of 1915.

Son of Guy McKinney 37625 (by McKinney 2:11¼ out of Flossie Drais by Guy Wilkes 2:15¼); dam Maud Vernon by Mount Vernon 2:15¼, sire of the dams of Leata J. 2:03, etc.; grandam Mag by General McClellan, sire of the dams of Mack Mack 2:08, etc.

Vernon McKinney's racing career was not an extensive one but will long be remembered for the excellence of his performances, as his winnings include a Chamber of Commerce stake in time very near the record for that event at the time, and he is the fastest of all the McKinneys.

He is a horse of rare qualities in the way of individual excellence, almost ideal in behavior and temperament in harness or out. Since his retirement he has been a popular horse in the stud and our claim that he would prove a very great sire of pacing speed has been fully substantiated, his first foal to be raced being the season champion for the age and gait in 1915, a most excellent testimonial to his potency. He is a very sure breeder, his get are uniformly endowed with natural speed and the physical and mental requirements of modern race horses and find ready sale at most gratifying prices.

Fee for Vernon McKinney 2:01½, $50 with usual privilege

The best of care taken of mares in any manner owners may desire, but no responsibility assumed for accidents or escapes. Address for particulars

CHAS. L. DeRYDER, Superintendent, PLEASANTON, CAL.

MR BROODMARE OWNER, do you realize the importance of the simple facts that sixty of McKinney's sons and nearly fifty of his daughters are producers of standard performers? That the McKinneys won more money than any other family in 1915? That the McKinneys won the largest percentage of the futurities, both east and west, in 1915? That McKinney has more sons to sire 2:10 performers than any other stallion living? Keep these facts in mind, and remember that I offer you the services of

THE VERY BEST SON OF McKINNEY

CARLOKIN 2:07 1-2 EXHIBITION MILE 2:05 1-4

Champion Trotter and Champion Sire of Trotters in the West

Reg. No. 36548. Licensed Pure Bred, Cert. No. 41.

Mahogany bay. Height 15.1½. Weight 1060.

Sire of ESPERANZA (3) 2:09, only three-year-old to win every trotting stake for that age on the Pacific coast, and also the following colt performers:

The Lark (4)	2:09½	Carsto (2)	2:22½
Ethel D. (3)	2:11	Helen Belle (2)	2:22½
Carl (3)	2:14¼	Carlschen (2)	2:23
Doctor S.	2:14½	Santiago (3)	2:24¼
Johnny Dugan p (3)	2:16	May Marian p (3)	2:24¼
Hermes (2)	2:16½	Carlrich p (2)	2:24½
John Warwick (2)	2:17	El Carbine (2)	2:27½
Nicola B. (3)	2:18½	Eileen C. (3)	2:29
Miss Carlokin p	2:20	Carlos (2)	2:29¼
Carleta (2)	2:20¾	Fulton G. (2)	2:30

Carlokin is the best son of McKinney not only by performance but by breeding as well, his dam being the famous producer Carlotta Wilkes, whose ten performers include four with records below 2:10, while his grandam and great grandam were also producers, by Alcantara and Clark Chief. He has demonstrated that he sires more early and extreme speed than any other stallion in California, and his get are courageous race horses, endowed with soundness and wonderful vitality.

Fee: $75 the season, usual privileges; details on request.

W. G. DURFEE 2019 South Figueroa St. LOS ANGELES, CAL.

Saddle Horse Breeders are Respectfully Offered the Services of the Magnificent young Stallion

Le GRAND McDONALD

Reg. No. 6360. A. G. S. H. B. A. :: Licensed Purebred Cert. No. 2008.

Winnner WORLD'S JUNIOR CHAMPIONSHIP, P.-P. I. E.

Foaled in 1913, son of Grand McDonald 2228 (son of the world's champion Rex McDonald) winner of the championship of three states for the two years last shown; dam Queen Alice 10649 by Forest LeGrande 2107.

In service for the season of 1916 at the ranch of The Bridgford Company near Knightsen, Contra Costa County, at fifty dollars to a limited number of approved mares only

Offers for service the best grandson of McKinney 2:11¼

WILBUR LOU 2:10¼

Record made in third heat of winning race as 3-year-old.

A world's champion as a yearling, record (1) 2:19½; unbeaten as a two-year-old, a famous futurity winner at three, and at six years of age the "sire of the day" in California, his first crop of two-year-olds including

NATALDAY (2) 2:13½

Champion two-year-old race trotter of the Pacific Coast, winner of Pleasanton and State Fair Futurities, 1915

FIESTA LOU (1) 2:25, (2) 2:22½, pacer, half-mile track records, separately timed in a race in 2:14½.

GOLDSMITH LOU (2) 2:29, trotter, breeder's record on halfmile track.

BILLIE BOYD (2) 2:30, trotter, breeder's record on halfmile track.

SELMA PALEY (2) trial 2:26½, trotter, public trial on halfmile track.

Colts and Fillies by WILBUR LOU Always on Sale

Wilbur Lou is by the great race horse and sire Kinney Lou 2:07¾, out of the triple producer Louise Carter (3) 2:24, grandam the famous Ingar, dam of 6 including John A. McKerron 2:04½, etc.

Breed to him for "Horses that will race." Fee for 1916, seventy-five dollars with usual privilege or money refunded at our option. Write for detailed particulars, all information gladly furnished.—Licensed Pure Bred, Cert. 23.

HEMET, CAL.

Derbertha Bells

Licensed Pure Bred, Cert. No. 226

NO. 60907 :: A. T. R. RULE I.

Derbertha Bells, foaled 1911, stands 15.3, weighs 1200 pounds and is a solid dark bay or brown of magnificent conformation, style and trotting action. His breeding, too, is of the best, tracing 20 times to Hambletonian 10—5 through Electioneer, 5 through George Wilkes, 4 through Strathmore and 4 through Abdallah 15 (the big four of the sons of Hambletonian) and twice through his daughters; balanced by 18 crosses to Mambrino Chief 11—five of these through his greatest son Mambrino Patchen 58 (leading progenitor of the dams of trotting sires); 25 crosses to Imp. Bellfounder, 8 to Henry Clay, 8 to Imp. Trustee, 5 to Pilot Jr. 12, and sustained by such other famous broodmare sires as The Moor, A. W. Richmond, Black Hawk, St. Clair, Geo. M. Patchen, Grey Eagle, Imp. Glencoe, Williamson's Belmont, etc. His broodmare inheritance is incomparably great—5 crosses to Green Mountain Maid (dam of 9 including a world's champion and 4 sires including Electioneer, the world's greatest trotting progenitor), 3 crosses to Alma Mater (dam of 8 and 7 sires, including Alcyone and Alcantara), and one each to Miss Russell (dam of 8 including Maud S. 2:08¾ and 6 sires including Nutwood, the world's greatest broodmare sire), Dolly (dam of 4 and 5 sires, including Director and Onward), Beautiful Bells (dam of 11 trotters including 4 world's champions and 9 sires) and Minnehaha (dam of 8 including a champion yearling and 6 sires). These are the greatest mares of history in number of descendants in the standard list, to which add two crosses to Bertha (the only mare with 2 in 2:04½, 5 in 2:10 and 13 in the list; with two 2:05 producing sons, five 2:10 producing sons and two other sons with produce only a fraction slower).

This pedigree contains the blood of 20 mares (counting duplicates) with an average of 9 performers each and presents an aggregation of family founding sires and dams unexcelled, if not unequaled. Neither is it necessary to confine ourselves to the standard or even to the 2:10 list, or go into the musty records of the distant past for examples of the prepotency of these blood lines in the production of speed, but we can easily and abundantly demonstrate their value in speed of the first flight in the present generation. He has 1 two-year-old and 2 yearlings that stamp him as a sire entirely worthy of his superlative antecedents, as they (like their sire) are uniformly large, handsome, intelligent, tractable and of great speed promise. Come and see them and the new crop and you will breed to him. Fee $25 the season with return privilege. Tabulated pedigree upon request.

J. W. PENDLETON,
1601 Seminary Avenue, Oakland, California

Don't Make a Mistake by not Breeding to the Great

KING LILLY POINTER

Registered No. 5223.

By the great Star Pointer 1:59¼, 3183, dam Lilly S. by Direct 2:05¼, 20113,—two world's champions for many years.

Second dam the great race and broodmare Lilly Stanley.

King Lilly Pointer is a green horse with remarkable speed. With very little work he has paced a mile on the Los Angeles track in 2:08¼ with ease. He goes without straps and has paced a half in 1:01¼ in third position all the way around, and has easily stepped quarters in 29 seconds. In another work out he went to the quarter in 30½ seconds, the second eighth in 14 seconds, finishing the last quarter in 30 seconds, going the seventh eighth in 14 seconds,—a 1:52 gait.

He is a seal brown in color, 15.2½ hands high, weighs 1100, and his get prove that he will be a sire of high-class race horses.

Fee $35 cash with return privilege, or right of substituting another mare. Best of care taken of mares, but no responsibility assumed for accidents of any kind.

Address for particulars, tabulated pedigree showing that he is the greatest bred pacing stallion in the United States,

W. H. NESMITH, 4218 S. Figueroa St., Los Angeles, Cal.

King Lilly Pointer can be seen at Los Angeles Exposition Park. Phone Home 28446.

Expressive Mac 2:25½

A. T. R. No. 41513. Licensed Pure Bred, Cert. No. 1041.

SIRE OF

Clara Mac 2:04½; Vera Hal 2:05; Madam Mac 2:07¼

Only stallion offered for service in California to sire two in 2:05, three in 2:10.

Also sire of Eddy Mac (3) 2:29½, trial 2:13; Nellie Mac trial 2:09½ trotting, 1915, and others with fast trials

Son of McKINNEY 2:11¼ (sire of 27 in 2:10) and the greatest living broodmare, EXPRESSIVE (3) 2:12½ (dam of 6 trotters, 2 in 2:10) by ELECTIONEER 125. Ideal in color, size and conformation—seal brown, height 16½ hands, weight 1275 pounds. Permanently in the stud at my ranch three miles south of Selma at $25 the season, ususl return privilege, or $35 to insure. Good pasture at $2 per month and best of care given mares but no responsibility assumed for accidents or escapes. Address for all particulars,

J. H. NELSON, Selma, Cal.

GET IN THE CHAMPION CLASS

Mate your speedy mares with

WM HAROLD 2:13¼

Reg. No. 55286

A great race horse and sire by The Great Sidney, sire of Sidney Dillon, sire of Lou Dillon 1:58½, world's champion mare and first trotter to beat 2 minutes; dam Cricket 2:10, dam of 6 in the list.

Terms on Application. Mares boarded.
Address DR. C. CORWIN, Hayward, Cal.

Mr. Broodmare Owner:

A HANDSOME "FOLDER."

Years ago were one to write any lines about a stallion at service he would at once be open to charges of booming that horse's interests. But, at this time, I will try to do a little "announcing," and trust to the geographical location of the subject to free me of the implication.

That "grand old man" of trotterdom, Budd Doble, Esq., in far-away California, sent me a folder containing the pedigree of Wilbur Lou (that I have always wished to see), and it is unique as well as attractively arranged. Mr. Doble always was progressive and tasteful.

The card folds in and is like some of those handy little bill purses one sees, and not entirely unlike an envelope. A half-tone of the horse shows, and it was a successful pose, too, lifelike, animated and attractive to a horse-lover. Mr. Doble announces him as "Premier Stallion Hemet Stock Farm," and Hemet is in Southern California and a wondrous estate.

Wilbur Lou is a rare sample of training-on forces; he took a yearling record of 2:19½ in 1910; at two won all engagements, yet did not reduce his year-old mark. When three he scored 2:10¼ and won a coast futurity—an honor, anywhere won, entirely creditable.

At but five—1914—he showed among speed sires, having to his credit a standard-by-record yearling. Last season four, all two years old, went in, including Natalday 2:13½, trotting, and champion of the Pacific coast at that age for the season.

It always is pleasant to note a trifle of sentiment expressed in a name. One of Wilbur Lou's colts is Goldsmith Lou (2) 2:29, and, as all know (of course) Mr. Doble gave Goldsmith Maid her record, 2:14, September 2, 1874, at old Mystic Park, and his winnings, covering many seasons, with the champion of all campaigners is a chapter apart as among wonderful achievements of any era.

Kinney Lou 2:07¾, sire of Wilbur Lou, was Mr. Doble's farewell performer in the eastern country and a credit, indeed, to the famous maker of champions. To ship from coast to coast and condition a stallion to top-notch capacity shows conclusively both Kinney Lou to have been a very great trotter and that the master-hand of a Doble retained its cunning of old. Many who read this will recall the stake won by Kinney Lou over the Empire City course and the reception Mr. Doble was tendered as he returned to dismount and "weigh out." I will never forget it.

Hemet seems, by the illustrated catalogue sent me last season, a veritable dreamland of opportunities to a horseman. Mr. John Shepard, "the dean of Boston roadites," winters regularly there; Ed. R. Bowne, Beau Brummel of the driving fraternity (and you remember what he accomplished, variously, while active as a trainer), visits there each winter season and thus preserves his youthful bloom. It must be the Ponce de Leon of the west as Mr. Doble, himself, now nearing 80, was up behind something he bred at Hemet at the San Francisco meeting last November. Long may Mr. Budd Doble survive and retain his manifold accomplishments. He, indeed, was facile princeps among his contemporaries, and his name and fame never will be forgotten, even when our champions may trot in 1:55 or even faster.

Always I have enjoyed him, and he stands for more that when one refers to him as "our veteran retired Mr. Doble"; Dexter first, then the glorious Maid; Nancy Hanks and Kinney Lou—what a quartet! In conclusion I would say, I notice the "imprint" shows this unique "folder" to have been the handiwork of the Breeder and Sportsman, San Francisco, so widely read the country over.—Percy, in the Trotter and Pacer.

INTERMOUNTAIN FAIR AND RACING CIRCUIT

Horsemen of the Pacific coast and Rocky Mountain states will learn with much pleasure of the formation of the Intermountain Fair and Racing Circuit, the organization having been effected on April First at Boise with an original membership of eight cities, to which more will in all probability be added as the result of a second meeting of fair and race promoters to be held shortly at Pocatello, at which time the stakes and purses will also be arranged and announced. As the circuit now stands, an outlay of forty thousand dollars or more will be made for speed classes participated in by both harness horses and runners, the former predominating, the opening dates already claimed being as follows:

Montpelier, Idaho	August 14
Rexburg, Idaho	August 21
Blackfoot, Idaho	August 28
LaGrande, Oregon	September 4
Baker, Oregon	September 11
Ontario, Oregon	September 18
Boise, Idaho	September 25
Salt Lake, Utah	October 2

This circuit should grow into the strongest one in the northwest, as the cities and towns are all live ones, the gentlemen behind the movement are of the right kind, and every effort will be made to make the sport as attractive as possible to all comers, special features being added to the various programs to round them out to everyone's liking. Both harness horses and runners will be required to parade before the stand after the fashion in force on all running tracks, and drivers and jockeys alike will be required to appear in clean bright colors. Membership with the American Trotting Association will be effected and harness racing conducted under those rules.

The delegates in attendance at the Boise meeting at which the circuit was organized were Charles Ziemer, Ogden; Joseph Waddenn and S. O. Carrell, Baker; C. H. McDermott, J. R. Kirby and O. P. Hendershot, Boise; Warren Dennis, Rexburg; S. E. Decay, Blackfoot; L. H. Strong, Montpelier, and A. W. Trow, Ontario, the following officers being chosen for the permanent organization: Charles Ziemer President; O. P. Hendershot, Vice-President, and Joseph Waddell, Secretary-Treasurer, these three gentlemen also constituting the executive committee. While there was a general demand for the formation of such a circuit, thanks are due very largely to the untiring efforts of Mr. Waddell in bringing matters to a successful conclusion, as he has been working to this end for the past three or four years.

The speed program for the entire circuit will be arranged in the very near future and horsemen will be advised concerning the same through the medium of the Breeder and Sportsman.

$20,000 FOR PURSES AT CALIFORNIA STATE FAIR.

All doubts as to what recognition would be accorded to the speed program at the forthcoming California State Fair, September 2 to 9 inclusive, were set at rest this week when the directors of the California State Agricultural Association met at Sacramento on Wednesday and appropriated the sum of twenty thousand dollars to be devoted to the staging of trotting, pacing and running races, the bulk of the sum to go to the harness horses. This is in addition to the several thousands of dollars involved in the racing of the various stakes sponsored by the society, and is a larger sum than has been appropriated for this express purpose in recent years, insuring a speed program of a nature that will attract the very best horses in the west. In view of the fact that many of the leading local stables are shipping east and that some of the most loyal supporters of former fairs will not have their horses on hand the action taken by the society is most commendable and will meet with the hearty approval of all horsemen. It is possible that the absence of some of the topliners will stimulate a greater entry on the part of the smaller establishments, and in any event there should be plenty of horses available to give good fields in the various classes. Secretary Paine and his associates are now engaged in preparing the program, and the details of the same will be announced at the earliest possible moment through these columns.

Breeders will also learn with pleasure that the board authorized the opening of a new number of the Stanford-Occident stake on lines similar to its immediate successor. It will be made for foals of 1916, to close on Monday, May 15, and full particulars will be given herein during the course of the next few days. We bespeak a generous patronage both of the new stake and of the speed program at the coming fair, as the California State Agricultural Society is certainly "playing fair" with its horsemen friends.

$75,000 ON NORTH PACIFIC CIRCUIT.

We are advised by Secretary Pace of the North Pacific Fair Association that the stake book for the speed programs of the various members of that organization is now ready and that horsemen may obtain the same by dropping a card to him at 1209 Alaska Building, Seattle. Entries to the early closing events are due on June first, while these stakes will be augmented by a goodly offering of class races which will not close until well along in the season.

The North Pacific Fair Association has been the one thing that has kept "body and soul together" in the northwest in recent years insofar as harness racing is concerned, and the coming season will witness the crucial test of the possibility for the members to continue as in the past. There are eight fairs on the circuit at which the events for the trotters and pacers form the main attraction for the week, as well as a number of stock and agricultural expositions in which speed plays no part. To make the harness events attractive both to the public and to campaigning horsemen substantial purses have been arranged at each of the eight fairs alluded to, with by far the greater number of the races to be contested on the popular three heat system, allowing most horses to make two starts a week without detrimental after effects. As the prospect for any great amount of racing in this state is not overly promising it is quite likely that many of our stables will make the trip into the northwest, as has been the case for a good many years, and we most heartily recommend the tracks of the North Pacific Circuit to their consideration. Full particulars of the circuit will appear in these columns in the near future, but we suggest that every man with horses in training send to Mr. Pace at once for the stake book.

A generous patronage of the events set forth therein means the continuation of racing in that section in an even more pretentious manner, while lack of the same will undoubtedly mean a curtailment of the offerings in the future. Help to keep your own business alive and others will help you as well.

ROMANCE AND MELODY ACROSS THE SEA.

[New Zealand Trotting Journal.]

Thelma, who is the pride of the Wildwood stud farm, is in her twenty-first year, but she certainly does not look it, as her condition is almost perfect and her teeth are as good as any ten year old horse. She is in foal to Logan Pointer this season.

Ardath looks to have a chance of winning a race at the Otahuhu meeting, as he is on the limit in a twelve furlong race (4 min. class), and he only went 4:4 3-5 when he won at Wanganui, he can hardly be re-handicapped more than five seconds.

I saw Marie Correlli during the week and I must say she has filled out into a grand stamp of a brood mare, and on the looks of her well conditioned filly foal she must certainly be a good mother. Any brood mare that could beat this matron in a show ring would be worth looking at.

Jenny Lind, who will be remembered as one of the mares that Bryce brought out from Scotland when he first came to this country, has a very bonny colt foal to Wildwood Junior. He is a chestnut and takes a place amongst the best foals I have seen this season. Jenny Lynd, who is a good mother, visited Wildwood Jr. again.

Good Winners and Bad Losers

VARIOUS TYPES OF THE GENUS HORSEMAN

A large, full-blooded, double-fisted man came into the Review office a couple of weeks ago and proceeded to give the sport of harness racing "merry hell." He started in rather a mild way, but as he progressed with his tale of woe he became angry with everybody and everything, including himself. Before he finished you would have thought that upon every occasion he turned around in the horse business somebody had pulled a gun on him and turned his pockets inside out.

I happened to know the facts about his connection with the business, also that he was just what he appeared on the surface to be, viz., one of those cheap, "tin-horn sports," such as set in poker games equipped to skin suckers—I would have taken a small wager that he had a set of loaded dice in his clothes while he was talking to us. From my knowledge of his career, and from what I could draw from his own conversation, I positively knew the whole trouble to be based upon the fact that he started into the sport to skin all comers, and didn't "get by." Hence his sore and disgruntled state . I went as far with him as I could in a conversational way, telling him what I thought about alleged sports of his sort, but I felt, "deep down inside of me," as if I would like to wipe up the office with him.

This man belonged in that well-recognized classification, "good winners but bad losers." He wanted to beat stake horses with a steed that had cost him $500, and when he failed to make good, yi-yi'd like a hound to whose caudal appendage some unfeeling person had attached a large tin can.

I could readily picture the attitude of this "sport" had his horse proved a "headliner." What a cheerful man he would be! How exultant! What a good, true sportsman! How wise! And, Oh, my! What a judge of horseflesh! I can see him in the barber shop having his "spinach" amputated, his face aglow with happiness, passing pleasing remarks to his friends, and offering the suggestion that the steed really had not shown what was in him; "just wait till next season, it looks like 2:00 for him," etc., etc.

I have had had long and somewhat painful experience with this type of horse owner; have had them knock my ribs in and smash my hat on winning occasions; have had them sob on my shoulder when they lost; have shuddered at the language they have employed to denouce drivers, judges and newspaper men upon the mournful occasions of defeat. I am onto them, and have become so "wised up" that I can size them up the very first day that they light on a race track; but I have also grown calloused and hardened. No longer do I mingle my tears with theirs; no longer do I permit them to exude their own upon the lapel of my coat; and when they win I likewise avoid them, knowing that the day is not far distant when their smiles will be turned to frowns, and that instead of emphasizing their joy by smashing my ribs and my hat, they will seek my blood, charging me with being part of an organized conspiracy to defraud them.

I am naturally a cheerfully disposed man; it affords me gratification to help others carry their burdens of sorrow; I am content to listen to troubles that rightly should be related to a policeman; but I am "getting along" as years go; I have lost some of that responsive mental elasticity which enables one to be upon all occasions a philosopher; and so I have reached the point where two things are barred, viz.—IVrd jokes and the wails of bad losers.

These gents who come under the 'Good winner, hard loser" classification, are usually garrulous men. They introduce themselves in horse society wearing the air of conquerors; they seem to feel that they are filling a long-felt want in the business; they wonder how it got along at all before they broke into it; they admit that their horses possess extraordinary merit, but it is so secret that it is withheld only from the stone deaf; they exhibit their bank rolls; they pose in barrooms and hotel lobbies and prepare to march through a circuit with banners aloft and bells ringing.

But their prearranged triumphant invasion halts with the first defeat (that being, as a general thing, in the first race), and they beat a hasty retreat, remaining, however, long enough to expose the fact that they are "tin-horn" sports.

I have seen an uninterrupted sequence come and go during the years that I have been in the business, and their sudden exits have become one of those things out of which I get real pleasure. They are merely transients, floaters, and "didn't belong" at all; just fly-by-nighters, that dropped into our midst for a fleeting moment and then decamped. They didn't care a tinker's d—n about horses, but figured that they were so mentally superior to the general run of men engaged in the sport that all they had to do was to buy a plug and proceed to rake in the coin.

It takes game men to be good sportsmen in any line, and it requires sentiment to make a real horseman. Can you imagine one of the type which I have described entertaining such a commodity as sentiment? Why, if they even thought that they were troubled with it they would submit to a surgical operation in order to have it removed. Armed only with a desire to win by any means; to get money by hook or crook, and swell around afterward, such participants in our sport won't last long, and while they are around they are not going to gather about them a wide circle of friends.

I have known a few downright "mean" men to own good horses; and I have, too, known numerous high-class gentlemen that, try as they did, were denied the pleasure of ever owning one real high-class performer. Just recently a trainer was telling me of a circumstance which provides a good illustration of the above observation.

"I have a patron," said he, "that I simply cannot find a winner for. I have trained a number of horses for him, but they either turn out to be no account, or else they go wrong. Every time I send him his bill I feel ashamed, and every time I meet him I want to apologize to him. He is one of the finest men in the world, and the gamest that I ever came in contact with—but for some reason he hasn't any luck at all."

I know the gentleman to whom the trainer refers, and many times have thought that there was never another man in the business like him. He never complains, never has an ill word to say against the business, and his love for horses is so great that he finds room in his heart for even the worst steeds that he owns. He excuses them and praises their efforts, assuming that they are doing the best that they can. To know such a man is to respect him and to pray for his success.

This gentleman can amply afford to indulge his fancy, but I have known many wealthy men who could not take defeat with good grace. They are highly successful in their own lines, and failure in anything that they undertake gets on their nerves. It isn't the loss of money that affects them, either; it is just the thought that they tried to do somehing and failed.

Money will purchase horses that seem to possess great merit, but many things transpire to bring about their defeat. Sickness or lameness may handicap them. Then, too, the other fellow may have acquired a steed that is just a little bit better! In their own particular line these rich men frequently snatch the coals from the fire by exercising superior business acumen; but in the racing sport, they are as helpless as the man who bets his last dollar and witnesses the horse he played go down to defeat. Indeed, they are more helpless—the chances are that the other man has become used to such contingencies, whereas the rich one is not accustomed to the sting of defeat.

It is for this very pertinent reason that some wealthy men identify themselves with the sport for a temporary period only. But back of their sudden exist is another reason, viz., they were not horse lovers, and merely took up the sport after the manner of any other fad that happens momentarily to strike their fancy. They were not among the true devotees of breeding and racing, men who possess real love for horses and take an active, unselfish interest in them.

* * * *

One might assume that, because a man had more money than he could hope to need if his life's tenure covered a thousand years, he could take defeat philosophically, saying to himself, "They beat me this time, but I will stick and show them that I can and will win."

I may have related an incident which exemplifies this phase several years ago, but it will bear repetition. A Wall street man who was well known for his gameness in financial affairs, had his horse soundly beaten in the Transylvania at Lexington, and this one defeat drove him out of the sport. Not only that—it put him, for the time being, in a very nervous state indeed. It was one of the hardest-fought battles ever waged in the Blue Grass classic, and the owner's hopes were so centered upon victory that he nearly collapsed at the conclusion of the race. I chanced to meet him next morning in the lobby of the Phoenix Hotel, and he frankly told me that he was all unstrung. "I have had a sleepless night," said he, " and I am going back to New York on the first train. I never was hit as hard as I was yesterday afternoon, and so far as the racing game is concerned, I am through."

I have never seen him since on a race track. He turned out the defeated steed and has never owned another race horse. His was simply a case of "nerves." He could stand to win or lose thousands in Wall street speculations without the least strain to his nervous system, but he was not temperamentally adapted to witness a horse of his lose after a valiant struggle for a great turf prize.

Speaking of rich men who become nervous when their horses are racing, reminds me of another incident, one which struck me as being very comical.

A wealthy gentleman's steed was engaged in a bitter contest for the M. and M. at Detroit, but after watching the first heat, which was red-hot, the owner repaired to the stable where his horses were quartered and there received bulletins of the race. It was a very warm day, and he had carried an umbrella which he still held over him ,although seated in the shade of an awning. The sight of him sitting there in the shade with his umbrella raised was too much for me. I had to laugh, and this seemed to irritate the owner, who inquired what there was about the matter that struck me as being so funny? "If you will lower your umbrella," I replied, "I will tell you." He glanced up, and in a shame-faced way remarked, "Well, what do you know about that?"

It so happened that the gentleman's horse was beaten, and when I carried him the unpleasant news his action gave me a big surprise. Instead of taking it hard, as I reckoned he would, he instantly relaxed into a cheerful mood, saying, "Well, he did better than I thought he would." Later in the evening I saw him leading the horse around while the steed was being cooled out, occasionally handing him a lump of sugar. Right then it came to me that Bill Shakespeare was right when he told us that nature has fashioned many strange fellows in her time.

* * * *

A Wisconsin friend of mine proved last fall that he was the sort of sportsman that I would like were my finances such that I could afford to own horses. His colt was a tentative factor in the Kentucky futurity, but having experienced the worst of racing luck, landed just outside the money. With several others I approached him in order to offer my sympathy, but while thanking us, he said: "I haven't any reason at all to feel badly about the outcome of the race. As I understand it, there were something like fifteen hundred colts eligible to this event, and I figure that my colt was good enough to beat all but four of them."

That was the correct and sensible analysis of the matter—but, unfortunately, many owners cannot see things that way. Later in the meeting I had the satisfaction of congratulating this same gentleman on his colt's victory in another event, and I cannot remember a similar occasion that gave me more pleasure.

* * * *

Harness racing was built upon a foundation of sentiment, and that is the very reason why it thrives and continues to attract so many of our people. Take this sentiment away and it would quickly crumble. This fact has been clearly demonstrated in the professional baseball field. The major league magnates during the last few years got to fighting over the

spoils, commercializing the sport to such an extent that even the real "fans" grew cold and withheld their patronage. Now they are busily engaged in trying to bring back the sentiment that they lost, but that seems a pretty difficult task.

* * * *

Did you ever pause to consider that it requires very high-grade material to make a first-rate horseman? Or, for that matter, a first-rate sportsman of any kind?

A real horseman, one that can accept defeat gracefully; one that is not found seeking to take unfair advantage of the other fellow; one that remains calm in either victory or defeat, presents about as fine a type of manhood as can be found in this big world of ours. Such men possess courage, gameness, morality, sentiment and imagination, and will do to tie to in fair or foul weather. We remember many of this type in the ranks of harness racing devotees, and for this reason the sport may congratulate itself. As compared with those long-faced fanatics who want to take all of the legitimate joy out of life, and force us to live in the little, narrow, contracted sphere that they have selected for themselves, a good sportsman, liberal-minded and big-hearted, as they are known to be, is more of a Christian, by far a better citizen, and as a friend, I wouldn't trade one of them for a regiment of our present-day moralists and reformers.—Marque, Horse Review.

PACIFIC BREEDERS' FUTURITY STAKE No. 13.

The following thirty-four sixth payments were made on April first, last, on three-year-olds entered in Pacific Breeders' Futurity Stake No. 13, for foals of 1913. The three-year-old divisions of this stake will take place at the meeting of the Breeders' Association this year.

H. G. Angevine's br c Jake Logan by Nearest McKinney, dam Berta Logan by Bert Logan.

I. L. Borden's b f Cherry B. by Barney Barnato, dam Ella G. by Hambletonian Wilkes; b g Alesandro by Barney Barnato, dam Ramona by Prince Robert.

L. H. Brittain's b f Mono K. by Nutwood Demonio, dam Caromia King by Valencia King.

J. J. Campbell's b c Baron C. McGregor by The Bondsman, dam Kate Kopje by Cresceus.

S. Christenson's b c Natalday by Wilbur Lou, dam Ella J. by Bob Mason.

Cave J. Couts, Jr.'s br f Miss Kenneth by Kenneth C., dam Black Bess by Bohida.

S. H. Cowell's b c Sacramento Boy by Henry Nutwood, Jr., dam Charmion by Nutwood Wilkes.

G. Cuneo's rn c Bond Boy by The Bondsman, dam Provoline by Chas. Derby.

W. G. Durfee's ch c Manuelito by Manrico, dam My Irene S. by Petigru; bl f Miss Rico by Manrico dam Subito by Steinway; ch c Rico by Manrico, dam Pavlowa B. by Petigru; br c Hermes by Carlokin, dam Miss Quealey by Moko.

E. A. Gammon's b f Miss Axworthy Dillon by Axworthy, dam Cleo Dillon by Sidney Dillon.

Hemet Stock Farm's bl c Don de Lopez by Kinney de Lopez, dam Eradiate by Geo. W. McKinney; b f Fiesta Lou by Wilbur Lou, dam Fiesta Queen by On Stanley.

N. A. Holaday's b g Dictatus Jay by Alconda Jay, dam Dictatus Belle by Dictatus.

Leo Lynch's b c Dr. Dyer by Vernon McKinney, dam Reubic by Elyria.

Frank Malcolm's b f Miss Bond by The Bondsman, dam Miss Harris by Sidney Dillon; b c Fresno Bond by The Bondsman, dam Fresno Girl by Seymour Wilkes.

Chas. R. Marley's br f The Expense by The Proof, dam Nusta by Nushagak.

J. W. Marshall's br f Verna McKinney by Vernon McKinney, dam Ramona by Demonio.

Al McDonald's b c Surety by The Bondsman, dam Eva H. by Washington McKinney.

J. E. Montgomery's b f Carolyn by Lock Logan, dam Trilby Maid by Black Ralph Jr.

J. A. Scott's ch f Kitty Nearest Smith by Nearest, dam Lady Smith by Tom Smith.

Chas. F. Silva's b c Stanley Quinn by Dan Logan, dam Lady Arthur by Sir Vaux; br c Inspector by Lijero, dam Queen S. by Sable Wilkes.

L. H. Todhunter's bl f Jet Moko by Moko Hall, dam Osmuda by Bon Voyage.

Frank Treanor's b f Catherine T. by The Proof, dam Decoratio by Prince Ansel.

D. W. Wallis' ch f Patti C. by El Angelo, dam Mary W. by Dictatus; b f Julia M. by El Angelo, dam Search Lida by Searchlight.

Chas. W. Winter's b c Alhambra Duke by Alhambra Prince, dam Ezelda W. by Del Coronado.

Fred Woodcock's br c Capt. Mack by The Bondsman, dam Bessie L. by Montana Director.

M. L. Woy's b f Lulu B. by The Bondsman, dam Loma B. by Stam B.

The western consignments to the May sale at Indianapolis are increasing in number constantly and as the quality represented is of the very best, the westerners promise to be among the top notchers of that auction.

"HAWLEY" AT WALNUT HALL.

At Walnut Hall Farm, a few days ago, I saw Mendocita, the dam of the futurity winner of last year, Mary Putney (3) 2:05½, and thought I knew why the filly was so great a trotter without considering her bloodlines. The answer can be found in the conformation of the mother of the young mare which swept all before her during the season of 1915. Mendocita is the best looking broodmare at Walnut Hall Farm in my judgment, and a more bloodlike individual would be hard to find. She has substance, size, quality, and is so well balanced that she does not strike one as being either tall or long, yet such is the case. Mendocita is by Mendocino 2:19½, himself a very good-looking horse and one of much quality as well as muscular development. The dam of the crack among last season's three-year-olds has a very bloodlike head and neck, good shoulders, the best of feet and legs, and, while not in the least gross about the body, is well ribbed and carries a stout frame. She is a better individual than her famous daughter, albeit the futurity winner is a very true made mare, and the matron is as clean limbed, as faultlessly proportioned as the best type of thoroughbred broodmare.

The advocates of thoroughbred blood in the trotter have, in the daughter of Mendocino, a striking example of the efficacy of their theory, yet it is idle to advance the argument that the action and speed of the light harness horse comes from this strain, for neither are to be found in the blood horse or any of his ancestors. The blood of Esther doubtless gives to her offspring and their descendants a fine texture of bone, a quality that is desirable, finish, conformation and constitution, but it cannot furnish action or speed at the trot, for the very good reason that thoroughbreds have neither. Mary Putney inherits speed action and gameness from her sire, San Francisco 2:07¾, and through a long line of trotting ancestry. Her sire was not only a very fast trotter, but a well gaited one and a thorough race horse. His sire, Zombro 2:11, a very fast stallion, is by McKinney 2:11¼, one of the really great sires of this era, and on the maternal side there is the best of inheritance. Mendocino was a trotter of more than ordinary ability, and was begotten by the best action-controlling sire of his generation, Electioneer, who overcame the influence of the thoroughbred blood in the mares at Palo Alto and gave to the world many of the best colt trotters ever bred in this country. Because Mendocita is an almost faultless individual, and gives to her daughter the benefit of her perfection in conformation, it should not be taken for granted that her hot blood, which comes from her dam, had an influence on the action or speed at the trot of her daughter, for this strain is lacking in this respect.

The fact that Walter Cox will again train Mary Putney has given the gossips an opportunity to start reports that are not justified by the facts, and these include the statement that the filly was not sold to Chauncey H. Sears, in whose name she won the rich prizes to which she was eligible last season. The truth of the matter is that one of the members of the Pastime Stable sent to W. J. Andrews a draft for $5,000 after the driver for the syndicate had urged the purchase of the daughter of San Francisco, but, before the check could be tendered, Mr. Sears made an offer of the amount asked by Cox, which was accepted. The New Bedford sportsman gave his check, which, however, was never presented for payment as the mare won herself out before it was deposited for collection, and, instead, the new owner of the mare took up the paper with the proceeds of the first stake won by the three-year-old. But for the fact that Billy Andrews was very busy on the day he received word from his employers, the Pastime Stable would have had the glory and profit accruing to the ownership of the crack trotter of her division. As it was, the famous reinsman carried the draft in his pocket, expecting to tender it on meeting Walter Cox. The latter sold the mare, no doubt, because he believed her to be inferior to Native Spirit (2) 2:09¾, and, in so doing, committed an error that has been made by every horseman whose experience covers an extended period.

A rare looking yearling now at the farm is one bred by Harry Burgoyne, the manager of the great estate, and owned by A. Kingsley Macomber, son-in-law of the late master of Walnut Hall Farm. This fellow is by Native King 2:11¾, and is quite the equal in point of speed of St. Frusquin or any of the stars of the recent sale. Native King has forged to the front as a sire of early and extreme speed, and the chestnut colt by the son of Moko and Yellow Belle is possibly the best of his get if one can judge by conformation, action and speed. San Francisco is quite the rage just now, and for the best of reasons, as last season saw at least three of his representatives racing in the best of company, and one, Mary Putney, far and away the best of her age in training. The son of Zombro is, of course, a very great sire, and one likely to hold his place among the leading stallions for many years to come, yet I think the fact that he has had access to the best band of mares in the world has much to do with his success, and it should not be overlooked that the dam has fully as great an influence over the foal as the sire, many dissenters to this view notwithstanding.

St. Frusquin, the highest prived yearling at the recent New York sale, is at Walnut Hall Farm, and will remain until Walter Cox ships his stable to Dover after the autumn meeting at Lexington. The youngster is a typical San Francisco in appearance, having the conformation of his sire and very much the same color and marks, except that he is a bit darker. He has a good head, a fine neck, is well ribbed, and carries himself like a colt of courage and sense. He will be a taller horse than his sire, and, while patterned after the now famous stallion, will have more daylight under him, a great advantage in any horse intended for speed, and something lacking in the sire of the topliner of the New York sale. Perhaps St. Frusquin, the trotter, will become as famous as the thoroughbred, St. Frusquin, which was by St. Simon, the Peter the Great of the English breeding world and the contender in the Derby, won by Persimmon in the colors of the then Prince of Wales, later Edward VII., after having beaten his near relative in the Two Thousand Guineas at a mile.—Horse Breeder.

ANOTHER AUSTRALASIAN RECORD.

Still another Australasian record has gone to the wall in New Zealand. This time the Prince Imperial gelding Don Caesar is the hero. Starting off 4 sec in the Forbury Handicap, of 450 sovs, on the second day of the Forbury Park Trotting Club's Summer Meeting, January 29, and opposed to a formidable field, he came with a spirited late run and beat Evelyn by a long neck, with Succeed third, in 4 min 28 3-5 sec. The previous race record for two miles was 4 min 30 sec, established by Emmeline in May, 1912, and equaled by Our Thorpe in the New Brighton Cup last December. The race in which Emmeline set up her record was the Winter Oats Handicap, an event endowed with 250 sovs, at the Forbury Park club's Winter Meeting in 1912. Curiously enough, the Rothschild mare's margin of victory on that occasion was similar to Don Caesar's—a long neck, Dr. Chutney running second and Glendalough third. The performance of Don Caesar represents the fifth Australasian record lowered in New Zealand during the present season. On December 16 last Country Belle lowered the mile record from 2:8 3-5 to 2:7 1-5 at Addington, Christchurch. In the Free-for-all on the same course on November 11 Our Thorpe reduced the one and a quarter mile race record to 2:41, while at Auckland on January 1 Country Belle set the Australasian two-mile test standard at 4:22 4-5, and two days later, at South Canterbury, Prince Berlin placed the mile and a half race limit at 3:22 2-5. Though Emmeline lowered both the mile and two-mile records in the one year, seldom has such a number of records over different distances and new track limits been established in New Zealand as during the present season's racing. Don Caesar, who is a brown six-year-old gelding by Prince Imperial from Maritana, won the Lightning Handicap at Christchurch last August from False Alarm and Sherwood in 2:17 4-5, ran fourth in the New Zealand Cup last November, and second to Our Thorpe in the Champion Handicap at Canterbury Park. At the Forbury Park club's Summer Meeting in 1914 Country Belle won the Forbury Handicap. In 1913 it was won by Schoolgirl, and in 1912 by Maelstrom.—Australian Trotting Record.

Frank G. Jones of Memphis is the proud owner of a brand new trotting aristocrat at Castleton, in the Blue Grass, Dudie Archdale 2:03¼ having but recently foaled a fine bay colt to the cover of her old rival and stable mate, Anvil 2:02¾. If the youngster inherits an intensification of the good qualities of both sire and dam he should be one whale of a trotter some of these fine days.

Notes and News

Our Thorpe, the Australasian champion pacer who was scheduled for a trip to American tracks and whose mishap at Dunedin was reported in this paper a few days ago, has had his journey indefinitely postponed owing to the severe shaking up experienced at that time.

◈◈◈

That Intermountain Circuit more fully described elsewhere in this paper looks encouraging for the harness horse interests in the eastern Oregon and Idaho country and will prove the means of providing engagements for quite a number of stables that would otherwise find themselves up against a very short campaign for the present season.

◈◈◈

Goldie McGregor, a nice yearling filly by Onward McGregor (3) 2:23¼ out of Gypsy C. by Nutwood Wilkes 2:16½, grandam Miss Volmer by Welcome 2:10½, is being broken to harness by her owner, Charles Cook of Irvington, and will be pointed for the money in the Breeders' Stake No. Fifteen the junior divisions of which will be raced in 1917.

◈◈◈

We have for sale at this office one number of the Year Book for 1915, Volume 31, just from the press of the A. T. R. A. It contains all the usual official information of the racing of 1915 in the United States and Canada and will be sent to any address desired upon receipt of the regular price, $3.25, with transportation charges prepaid.

◈◈◈

The American bred trotting mare Alice Shaw by Edward Aubudon, owned by Barlow Brothers of New Zealand, scored a decisive win in the Temuka Handicap at Timaru recently, leading a field of thirteen starters by a matter of several lengths, after having been unsuccessful in her races previously at Forbury and Manawatu. The event was for unhoppled trotters at two miles, the winner's time being 5:09 3-5.

◈◈◈

Leo Lynch of San Ramon arrived at the Pleasanton track last Wednesday with the three-year-old pacer Doctor Dyer by Vernon McKinney 2:01½, dam Reubic by Elyria, and will get the youngster ready for his stake engagements, as he is eligible to all the pacing events for the age here in California this season. The Doctor is a promising prospect of the genuine Vernon McKinney stamp and showed that he has a lot of natural quality by working in 2:21 as a two-year-old for his owner when at Pleasanton last season.

◈ ◈ ◈

The twelve-year-old brown gelding, Prince Lot 2:07¾, by Prince Ansel 2:20½, sire of the trotting mare Bonnie Ansel 2:09¼, who raced so successfully on Pacific coast tracks last season, has been purchased by the well-known horse auctioneer, H. B. Potter, of Providence, Rhode Island. His dam is Lottie 2:15 (dam of Lottie Ansel 2:14¼), by San Diego 8776, grandam Flora B. 2:27, a daughter of Whippleton 1883. His grandsire, Dexter Prince, is the sire of Bernice R. 2:07¼, Lisonjero 2:08¼ and Eleata 2:08½. The latter is the well-known brood mare formerly owned by the late James Hanley and later his son, Walter H. Hanley, who sold her in New York at the November Old Glory sale last year.—Trotter and Pacer.

◈◈◈

W. C. Brown of Vancouver, B. C., has recently sold to E. D. Gould of the Midway Stock Farm, Kearney, Nebraska, the brood mare Princess Bessum 2:29½ (dam of Prince Del Monte 2:22½) by Egyptian Prince and her stud colt of this season by Robert Bingen 2:11¼, now a member of the stud at Midway. William Whalen of Santa Rita Stock Farm, where the mare has been running since along in the winter, states that the foal is the best one that has made its appearance at his establishment in a long time, an opinion shared by the Livermore Valley regulars who have been out that way since its birth. The pair will soon be shipped to their new home in Nebraska, where the mare will be bred to Robert Bingen again, while the colt will be developed as an advertisement for both sire and dam.

◈ ◈ ◈

Practically all of the band of famous matrons gathered by Woodland Stock Farm have found homes in the east since the dispersal of that establishment some months ago, and now one of the best of them all and one of the very few yet remaining in California will make the eastern pilgrimage, Ella J. T. having been purchased from a local horseman by Andrew Albright Jr. and shipped to Los Angeles to join the considerable delegation that he has gathered there during the last few months. For the first time in some years she is not with foal but the off year will very probably prove beneficial. She has been a most successful producer in the past, being the dam of Honey Healey 2:08¼, San Felipe 2:09¼, Natalday (2) 2:13½, Santa Paula 2:17¼ and Emma C. 2:22¼, as well as a couple of other pacers now of racing age that have shown ability to go in the list and the yearling trotting colt owned by A. W. Longley. She seems due for at least two new standard performers this year, while Natalday and El Paso, the futurity colts now in training at Pleasanton, are ranked as about as good as they come in this neck of the woods.

Al Pryor of Santa Cruz is at Pleasanton with the pacing mare Colleen by Charley D. 2:06¼, out of Cricket 2:10 by Steinway (3) 2:25¾, and will handle her himself during the early portion of her season's prep. Homer Rutherford raced her in a few events in 1914, when she showed her ability to pace very close to 2:06, and also had her last season until he shipped east to the races, when she was sent home. She is a very attractive mare both in harness and out and if given plenty of time to make speed without being forced off her feet she ought to make a useful thing to take to the races, as she has just as much lick as the next one and a good deal more than lots that are paying dividends.

◈◈◈

Al McDonald, who has made his headquarters at Pleasanton for the last few years, will ship to Indianapolis when the DeRyder-MacKenzie consignment goes to the sale there and will enter his three-year-old pacer Surety in the class races for that age and gait over the central western tracks. This colt, who is by The Bondsman and out of Eva H. by Washington McKinney, began life as a trotter but switched to the pace about this time last year and made speed very rapidly at that way of going. Shipped to the exposition last fall he contracted a cold from which he had not yet recovered when the Pleasanton futurities were raced, but at that was barely beaten in the first heat in 2:12½ and finished out that hard fought event in excellent style. He has wintered in great shape and has a lot of lick this spring, having already been miles in 2:23 with halves in 1:08¼ and quarters in :31.

◈◈◈

A. Ottinger, not liking the looks of things for much racing locally this summer, has decided to send his three matinee performers to the Indianapolis sale, where they ought to be pretty well regarded. Dick W. 2:06½, with a little time allowance to help him out this year, should earn some money over central western tracks in the pacing classes, while the trotting mares Agnes Carter and Frances S. are in fine shape and will show a good turn of speed under the watch over the Indianapolis course. Agnes Carter, even were she not in shape to race, should be snapped up by some of the big eastern breeders at a good price for breeding purposes, as she is by Nutwood Wilkes 2:16½ out of the double producer Excella by Monbells, grandam Expressive (3) 2:12½ by Electioneer, great grandam Esther by Express, three daughters of the latter mare having produced 2:10 trotting speed.

◈◈◈

The advertised foreclosure sale of the famous race track at Readville, Mass., which was scheduled to be held March 20, did not take place as Owner A. J. Welch, of Hartford, made satisfactory arrangements to pay the tax claims of the town of Dedham and that of the mortgagee, Charles J. McDermott, of Brooklyn. It is now definitely settled, however, that the two-minute track will never again be opened for trotters or made a racing center. Trainers located there were notified last week to vocate their stables and barns by April 1. It is said that arrangements have already been completed to use the property for manufacturing purposes, and at least part of it will be cut up for building lots. Having been given advance notice a few days ago, trainers have already made arrangements to move, a majority going to Combination Park tract, among them the veteran trainer Ed. Bither, who has been a regular tenant at Readville since the plant was first built.—Horse World.

◈◈◈

Homer Rutherford, who had a very successful season last summer in the central west with the good three-year-old trotter George N. Patterson (3) 2:12¼, fastest by both record and trial of any of the coast trotters of the age last year, will go east again this season with the black son of On Voyage and Yu Tu by R. Ambush, taking with him a two-year-old colt by The Bondsman and out of the same mare. This lad's name is Sequoia and he is an upstanding, sturdy brown youngster apparently worthy of the good name. Last spring in his breaking he attracted a great deal of favorable comment from the eastern visitors at Pleasanton, and this year is learning to trot very handily ,having progressed to a mile in the standard notch, with a half in 1:13 and a quarter in :35½. He is paid up in four eastern stakes and may do to start in some of them late in the year. Just where Homer will race he has not yet decided, but it will probably be in the same locality visited last summer.

◈◈◈

Expressive Mac 2:25½, sire of those three great pacing mares Clara Mac 2:04½, Vera Hal 2:05 and Madame Mac 2:07¼, was one of the best patronized trotting stallions in California last season and the 1916 crop of foals, from the best mares to whom he has ever had access, is putting in an appearance. Dolly D. by Athadon, owned by L. Karns at Lindsay, foaled a big bay colt late in March and the pair are the center of attraction among horse-lovers in their home town, Mr. Karns being so well pleased with the newcomer that the mare will be returned to the court of Expressive Mac. Jennylyn (dam of Madame Mac) by Hawthorne foaled April 9 a full brother to the sensation of the winter ice season in Minnesota, and Beautiful Morn 2:25, purchased by Mr. Nelson here in the city last fall, has a brand new son by Palo King and will be bred to Expressive Mac. Mr. Nelson has two other excellent mares now due to foal to the embrace of the same sire, Zyphrus by Bombro and Narcola by Athadon, the latter matron being the dam of the trotter Alessandro 2:23½ and McCola, with a trial better than 2:10.

When Tim Sexton came across the bay one night last fall and attended Charley DeRyder's Christmas Tree sale at the Riding and Driving School he parted with forty-five whole dollars for a black weanling filly by Vernon McKinney out of a mare by Oh So, the further pedigree not being established. Tim sent her to Pleasanton by Henry Smith with instructions to break her, Hank eventually sending down word that she was nicely broken but could neither trot or pace. With the idea that if well broken he would cut down expenses by bringing her home and having a boy drive her once in a while, Tim wended his way to the MacKenzie horse paradise to get first hand information as to how she handled. She had one of those notions and it required a man and a boy to hook her up, after which Henry got her on the track, gave her a yank when she bowed her neck and she lit pacing. Tim decided to leave her there, bought her a substitution in the stakes, and she has never done anything but pace since then. She is the greatest little speed marvel on the track up there, acts as wise as an owl, and at eleven months of age turned a half in 1:18 with the final end of it in :38, while last Saturday she marched through the lane like an oldtimer in :37¾. She has all the earmarks of one that the knowing horseman will do mighty well to bear in mind in the future.

◈ ◈ ◈

Harry Bell, the Canadian horseman who has been at Pleasanton since the close of the racing season of 1914, will ship east about the middle of May with the good trotter Grattan Boy 2:09½ and take in the class races on the big line for the early meetings, then shipping on to Monroe, Goshen and Middletown and picking up the Grand Circuiters again later in the season. Grattan Boy, a son of Montana Grattan and Silk by Copper King, is working around 2:20 for Harry at the present and looks fit as can be for another hard campaign like he made in 1914, when he won in excess of sixty-six hundred dollars in an international tour extending from the Canadian prairies to the southwestern part of the United States. He is a halfmile track trotter of rare quality, as he has amply demonstrated in the past, and should be a prominent contender in the hottest kind of going in the good purses hung up at the three tracks mentioned, while the big line folks are going to find him no soft thing to handle. A Pleasanton trainer tells a tale of being two or three lengths ahead of him at the three-quarters and being that far behind him at the wire, timing his own steed through the lane in thirty and a half seconds, so he evidently doesn't have to depend on watchful waiting to win a race when he is ready. Harry has lots of friends in this neck of the woods who will take pleasure in hearing of the pair giving a good account of themselves throughout the coming campaign.

◈◈◈

An unusual amount of interest centers in the stable of Will DeRyder at Pleasanton owing to the presence of one of the very few of California's candidates for the M. & M. and other Grand Circuit classics this season, the bay gelding Spriggan 2:08¼ whose rise to fame was so much on the meteoric order in 1915. Bought by his present owners late in the fall of 1914 he startled the talent all over the country by winning the big trotting stake at the spring meeting at the exposition, following up that performance by a most consistent campaign that lasted through the fall meeting at the same course. His winnings in his first year out under Will's direction amounted to very nearly seventeen thousand dollars, a sum exceeded on the Grand Circuit by but three horses, Peter Scott, Mary Putney and Hal Boy. In eleven starts he was never worse than third, winning eight times, and that he will give a good account of himself again this year is believed by all who have seen him this spring. He is a peculiarly built horse that carries little excess weight in the way of upholstery on his bones, but he seems to have more real substance now than ever before. He is the picture of health, has no warmed over spots that bother him, and is working very nicely around 2:20. Dicto 2:09¼, separately timed last season very close to 2:05, is as husky as ever and is a better horse than he was generally credited with being when matineeing here a season or so ago, inheriting most of his quality through his dam. He will make the trip east also, though not starting in as select company as his stable mate, and Will and his patrons are making a quiet look around for a really high class trotter, ready to race to add to the string. The green trotter El Volante S., who will be carried over a year, and the trotting filly Miss Bond (2) 2:17½, winner of second money in the State Fair futurity last fall, will probably be left here on the coast in good hands when Will leaves for the east next month. Both have done all asked of them to date and Will is satisfied that they are the making of a pair of good racegoers with a little more education. He also has the Ottinger horses at present, but these will in all probability go to the Indianapolis sale.

FROM AMERICA'S PREMIER REINSMAN.
The World's Champion Peter Volo Wore Them.
Poughkeepsie, N. Y., May 10, 1914.
Yours to hand and in reply will say that I have used your X Ray Pads and am using them now on some of my very best horses and consider them a wonderful pad; never had anything suit me as well in the way of a pad.
Very truly yours,
THOS. W. MURPHY.
J. David West, the dealer in turf goods at 1018 Fillmore Street, San Francisco, sells these pads. Send for circular.

While E. A. Gammon has made the recent payments on Miss Axworthy Dillon in the local stakes in which she was engaged, a good many horsemen who have young things paid up in the same events will perhaps sleep better o' nights when they learn that she will in all probability be included in the band of trotters and pacers which Charley DeRyder is taking to the Indianapolis sale, so there is a possibility that she may not be out here when the three-year-old trotting stakes are called this fall. She is paid up in practically every stake in the country, and as not only DeRyder but a good many other canny judges consider her a 2:08 or better trotter this season she may be kept too busy down east to pay to ship this far west again. This filly came from nothing to a mile in 2:14½ and repeat in 2:15, in a race, mind you, in about a hundred days, and the folks who raced against her last fall are the ones who figure her the strongest at this moment. She is a deceptive looking young lady, being rather long and slim, but she is a real trotter in harness, one of the kind that will not break and will give all she has in her any time it is asked for. She is bred that way, being by Axworthy (3) 2:15½ out of Cleo Dillon (3) 2:13¾ by Sidney Dillon, and as evidence of the place she occupies in the respect of Mr. DeRyder it may be noted in passing that he has tilted the price on her a round thousand iron men since he began moving her up a little this spring. No very fast work has been called for as yet, but a quarter last week in thirty-two seconds was simple, so she "has it with her" all right. Horses consigned to the Indianapolis sale will be shown under the watch at the mile track at the state fair grounds on the day before the sale begins, and birds that show more than the Pleasanton contingent will have to be mighty fit. Rapallo, a beautifully gaited trotter and a fine individual, considered by many as the superior in breeding to his famous half-brother San Francisco, has a prior trial in about 2:07 to his credit and is now working in 2:22, with halves better than 1:05. One front leg bears the blemish of some jack doctoring a few years ago, but he is sound and in great condition. Sis Bodaker, now five years old and with a trial last year right at the two-ten mark, is trotting below 2:20 with halves in 1:04½ and looks very fit indeed for the slow trotting classes on any ordinary circuit. The Earnest, who loomed as a sensational colt trotter and was retired for castration, has only recently commenced his spring jogging, but has matured into an attractive gelding and will be well liked by bidders at the Hoosier auction. The Vernon McKinneys are given a double representation by a dandy yearling pacer out of a Carlokin mare and a five-year-old gelding out of a daughter of Diablo, grandam the dam of Leata J. 2:03, while there is a real yearling trotter by Joe Patchen II out of Zombro Belle by Zombro, a fine big youngster that has shown quarters better than forty, weeks ago during his breaking days. Two of the get of that rare old campaigner Fresno Girl 2:10½ are in the lot, the four-year-old trotting gelding Midnight Express by Expressive Mac 2:25½ and the three-year-old pacer Fresno Bond by The Bondsman, both of them ready to show speed of the extreme kind. Asa Pointer, a Star Pointer gelding with a previous trial around 2:06 and the sturdy campaigner Hal J. 2:09½, who made Russell Boy pace the twolapper at Jackson, Miss., in 2:07¼ to beat him in one of his races last fall, will also be in the shipment, and perhaps a number of other good prospects. There will be plenty of good horses at this auction, but Californians like these will hold their own with the best of them when it comes to being in demand at good figures.

◈ ◈ ◈

Millard Sanders, who has had about as many good California trotters as the next one in the several years that he has been identified with the harness horse of the Pacific coast, waxes enthusiastic over the quartet now in his stable at Pleasanton composed of Future Tramp (4) 2:09¼, Natalday (2) 2:13½, Howard's Comet and Peter's Queen, each the property of a different owner. The Trampfast trotter, owned by Timothy D. Sexton of Oakland, progressed steadily last season for Charley Durfee, negotiating a mile for that wily gentleman over the Pleasanton course right at 2:08 and achieving the season's trotting race record for geldings of the age over the slow course here at the exposition, driven by the owner and defeating in that mile that pair of great mares, Maymack and Esperanza. The easterners who were in evidence at the exposition meeting made some overtures to Tim for the purchase of the little fellow but there was nothing doing in that line, while since then two or three offers of five thousand or more have been made in good faith and refused. He is one of the best bred trotters in the world and Charley Durfee is authority for the statement that no horse can trot a half in a minute with greater ease, so Tim has reasons for liking him. He has no engagements and will be raced but lightly this season, a mile in 2:25¼ being all that has been asked of him to date. Natalday is starting up the season's work very rough gaited, as was the case last year, and seemingly a little inclined to pace at times, but Millard threw three comfortable miles into him Saturday without him making a hitch or a skip of any kind, so he is probably ready to square away and get ready for his stake engagements, which are not limited to those on this coast. He has grown into an impressive looking horse and should be better than a two-ten trotter this year, which will be quite an advertisement for his sire, Wilbur Lou. Howard's Comet, owned by Peter Howard of Alameda, was trained by Millard last season and was doing finely until he hit the exposition track and started in a number of amateur events driven by his owner, when he developed a tendency to jump up early and often. He has a rather unattractive of way of going but gets over a lot of ground at a stride and right now is the readiest trotter on the Pleasanton course, working handily last week in 2:15¾. The fourth member of the quartet, Peter's Queen, is a daughter of Peter the Great and Sonoma Queen, sister to the M. & M. winner Sonoma Girl, and is the property of Clinton A. Harrison, the northwestern horseman who simply cannot stay away from California for any considerable length of time. Up at Woodland this girl did not do very well and came to Millard in poor shape, but has come around nicely and is making speed very impressively. She has gone the route better than 2:18 to date, with halves around 1:05 or 1:06, and will be carried along easily until late in the season, when Mr. Harrison will come down and see exactly what she has in her, after which she will be staked east or sold. She has a lot of the characteristics of the best of the family to which she belongs and looks very promising indeed. During the winter and early spring Millard had the A. W. Longley pacer, Pedlar Direct by Baron Direct, in his stable and brought him along to a mile in 2:15 before turning him over to the owner, that being considerably the best showing this little sidewheeler has made since his education commenced. Several youngsters and green things round out the stable at present and will probably be heard from later on in the season.

◈ ◈ ◈

From all present indications it seems likely that two or three brood mares who are already producers of 2:10 speed will have additions made to their members of that select circle from the string of trotters and pacers now being prepped for the summer's campaign by Sutherland & Chadbourne at Pleasanton. The member of the stable that is farthest advanced right at this moment is the four-year-old pacing filly Jessie Patchen, who is unraveling miles in 2:16½ with halves at a two-eight clip, so that 2:10 should be well within the range of her possibilities before the season is really far advanced. She is by Joe Patchen II and out of that double producer of extreme speed Jessie M., dam of Hal J. 2:09½ and Della H. 2:10. Two-year-olds that could pace in 2:10 have not been hardly as thick as hair on a dog's back since Directly hung the record for colts of that age at 2:07¾ a good many years ago, but the bay gelding El Paso seems to have as good a chance to turn the trick as the next one of his age and gait. He is by True Kinney and out of the dam of San Felipe, Honey Healey, Natalday, etc., and while Fred has had a number of two-year-olds to pace around 2:10 to 2:13 he considers this boy about the best of them all. He has been a mile this spring in 2:30 with a half in 1:12 and is extremely pleasing in every way. He will be the first harness horse to be campaigned by the wealthy young Dixon business man, Roy D. Mayes, and no one will begrudge the owner a good start. Verna McKinney, whose mile in 2:13 last fall stamped her as the boss filly of the age and gait for the country for that season, is fit as can be and taking easy work around 2:35 with occasional brushes at a much merrier clip. She has not been troubled by the intermittent touches of distemper that set her back several times last spring and summer, and from the way she could pace then she should find two-ten no trick at all this year. She is sound as ever and will make the second fast one for Ramona, who is also the dam of Del Rey 2:03¾, a candidate for the Board of Commerce at Detroit at the coming meeting. Red Patch, a four-year-old gelding by Joe Patchen II—Trix McAdrian is working nicely below 2:30 at the pace, and the two-year-old Vernon Pointer, by Vernon McKinney—Poinsetta 2:25, is getting untangled and squaring away to a point where he can travel a mile handily in 2:45, with quarters at a 2:20 clip. He was a little inclined to do a little of everything and really not much of anything for a time, but is showing considerable promise now. The older record horses, Bon Cres (3) 2:10¼ and A. B. C. 2:10¼, are taking things easy as yet with miles around 2:35 as their speed limit, and two young trotters in the stable are showing like real comers. The elder of this pair is the three-year-old bay colt Baron C. McGregor, and in spite of this nomenclative handicap he is making considerable speed. He is by The Bondsman and out of the dam of Bon Cres, and while a trifle small is a rugged scamp with a dogged way of going, turning the full distance last week in 2:28 with a quarter in :34. The younger one is also a bay colt, a two-year-old, and has shown his natural inclinations by trotting a mile in 2:35 with shorter distances at a standard clip. He is by Keefer & Spencer's rising young sire, The Proof, and out of the producing matron Deviletta 2:10½ by Diablo 2:09¼, owned by W. S. Harkey of Gridley and now due to foal to the embrace of Robert Bingen.

◈ ◈ ◈

George Machado of Decoto, who trains for the local amateur patron, George J. Giannini, is at Pleasanton with a small stable that contains the bulk of the real sizzle now in evidence at the MacKenzie plant. Ella M. R., the big brown mare that came so fast late last season at the Stadium track, begins to loom as quite a bit better than a two-ten trotter, working Saturday in 2:15½, with the last half in 1:03½ and through the lane in :30½, the way she does it being even more convincing than the amount of speed displayed A futurity winner as a two-year-old, she ran out for some seasons and grew big and soft, so that for some time after commencing work again she came very slowly. She is a grand big trotter now, hard and fit, and as she is bred to be a good one the owner and trainer are both strong for her. She is by Lord Alwin (full brother to John A. McKerron 2:04½) and out of Excella by Monbells, grandam Expressive by Electioneer, then Esther by Express, etc., which right at this moment is breeding that suits the most finicky pedigree bug. Bradmont, Mr. Giannini's old favorite pacer who showed ability to win over the Stadium track last fall in 2:08¾, has put in an easy winter and is fat and hearty, just beginning to take a little light exercise of a regular nature. He is sound as a dollar and will probably figure pretty prominently again in the local matinees. The real speed merchant of the trio right at this moment, however, is the pacer Harry B., owned personally by Mr. Machado. An official ruling is required on this bird's name, as he is registered as Bold Harry and matineed last year here in this city, and surrounding towns, as Aerolite Junior, which seems a more fitting appellation than either of the others. He is an eight-year-old bay gelding by Aerolite and out of that famous old pacing mare Cricket 2:10 by Steinway, the mare being in her twenty-fourth year at the time of his foaling. "Pa Jim" Sutherland is authority for the fact that this horse always was a comical looking colt, and he very nearly fills that description to this moment, being abnormally stocky both fore and aft, with a back a trifle low, and a mane "hogged" like that of a saddle pony. However, he has the goods in the speed line and is coming along like a record breaker at present. Having been the last half of a mile in 2:18 in 1:01½ in previous work, George set out Saturday morning to see if he could get him away fast, taking him out in about third horse position at the stand and edging in to the pole rounding the first turn. He gets away poor, folks, poor, as the best he did Saturday was to go up the hill to the half in 1:01½, a trick that has been duplicated by but few pacers at any time of the year on that particular piece of footing. After passing the half George registered for a room with bath and went sound asleep, but at that the little fellow came home on his own responsibility in about 1:12, seeming to be up to a mile very close to 2:10. He will be raced at Dixon probably on May sixth and the horse that beats him in those halfmile heats will have to step that track very close to a minute.

◈ ◈ ◈

The busiest little bee at the Pleasanton course is one Henry Smith, Esquire, who is handling a dozen or more horses for various owners. His personal string in training is reduced to one solitary representative, the old standby Della H. 2:10 having been retired to the broodmare ranks, this sole hope being the five-year-old bay mare Gertie D. by Charley D. 2:06¼, out of Gertie A. by Diablo 2:09¼. She promises to live up to her pedigree by performance and has been a mile in 2:20 this spring, with a half at a two-ten clip. For S. S. Bailey Henry is just beginning to throw a little regular work into a string of five, including the futurity winner Bon Guy (3) 2:11¾ and the fast pacer O. U. C. 2:07¼, who has grown himself a nice new set of feet that look much better than those he carried last season. If they really carry him without causing him a good deal of pain it is believed that he will be a pretty useful sort of a sidewheeler, as Mr. Bailey had it demonstrated to his personal satisfaction last year that when the lad's feet did not burn him up alive he stayed on a pace and behaved as nicely as could be asked. The other three are green ones, the mare Bertie Seattle with previous trials better than 2:10, the three-year-old gelding Jim de Oro, full brother to the champion Rayo de Oro (3) 2:07¼ and now beginning to round out from an overgrown colt all head and hind legs into a pretty fair looking horse, and the trotting filly Bonita Guy by Bon Guy out of a mare by Zombro. Slow work has been the order of the day for these horses to date and they are coming nicely and looking good. Henry's principal patron is Mr. A. W. Longley of California and Chicago, and for that gentleman he is handling several head, a number of them green youngsters of whom little if anything has been asked as yet. The older ones which are to be raced this season, however, are farther along and can show quite a bit of step without hurting themselves in the least, the farthest advanced of the lot being the pacers Pedlar Direct (worked in 2:15 by Millard Sanders before coming into Henry's hands and now taking his miles from seventeen to twenty) and Star Dillon, the Star Pointer—Miss Harris gelding purchased by Mr. Longley at the last DeRyder sale, this boy being up to a mile in 2:16, with halves in 1:03 and quarters at the flat two minute gait. The gray trotter Kirkfield by Re-Election, bought cheap last summer on the chance that he might not stand the gaff, is going sound and working comfortably in 2:20 with occasional brushes at a clip that would carry him well into the charmed circle if persisted in. A three-year-old bay filly by Demonio is pacing in standard time, while the balance of the Longley stable, handled jointly by Henry and Hiram Rapelje, are in the kindergarten stage of track education. These include a pacing filly by Demonio, a nice big trotting gelding by True Kinney, the same age, the yearling Prince Ansel—Ella J. T. colt, now well broken and a nice gaited trotter, and one or two others recently arrived from the Bishop neighborhood. These, with the Tim Sexton pacing phenom described elsewhere, keep Henry fairly busy and apparently well fed and contented, as he wears the same old "Smitty smile" as of yore.

Thoroughbred Matters

TIA JUANA REOPENS TODAY.

Early this afternoon Starter Edward Tribe will spring the gate before a good field of thoroughbreds in the first race at Tia Juana, and the Lower California track will have commenced upon the second stage of its active career as the racing Mecca of the Pacific Coast. Insofar as the immediate premises of the track and grounds are concerned all traces of the recent flood have been removed and the course and buildings have been put in the pink of condition for the resumption of the sport. The original plans of Mr. Coffroth and his associates called for a hundred days of racing commencing January first, and the meeting will continue for at least the balance of eighty odd days of the time included in those plans, while racing may be continued right along for an even more extensive period.

The meeting commencing today will be more pretentious in every way than was the case in January, when there was a question in the minds of both horsemen and public as to whether the game would prove a success at the town on the border. Handicapped as was the opening by the worst weather that has visited that section of the coast in its history, the meeting proved beyond all doubt that racing there would be popular and profitable, so that with the plant rebuilt and a long stretch of good weather in sight, hundreds of horses have been shipped there to take in the sport, there being almost three times as many there now as in January. The management has also announced three hundred dollars as the minimum value of the purses, while there will be a series of handicaps which will have a considerably greater reward for the winners. The program for today features the Resumption Handicap at one mile, with another event over a like distance and two classes each at five and a half and six furlongs, respectively, six races in all. After the former custom, racing will be conducted on Sunday, but not on Monday.

Those who will officiate at the course are C. H. Pettingill of New York as presiding judge, Edward Tribe of Arlington, Maryland, as starter, L. J. Rose and Samuel J. McGibben as associate judges, S. J. McGibben as racing secretary and handicapper, J. S. Rothert as entry clerk and clerk of the scales, and John Millin as paddock and patrol judge.

FOALS AT SAN JOSE.

That the 1916 crop of thoroughbred foals at the establishment of Edward Cebrian at San Jose will add materially to the holdings of that gentleman is pretty conclusively proven by the rate at which the aristocratic babies have been making their appearance since the first of the present year. Three were foaled in January, two in February and fourteen in March, a total of nineteen to the first of April, while many more of the band of some seventy matrons are due to make delivery during this month and May. The foals to date, each one of which is a well-bred thing with great future possibilities, are as follows:

January 2—Chestnut colt by Joe Carey—Armadora by Gano.

January 30—Bay filly by Rey Hindoo—Sain Shot by Sain.

January 31—Bay colt by Von Tromp—Modesia by Imp. Canopus.

February 11—Chestnut filly by Von Tromp—Jourdain by Imp. Watercress.

February 20—Bay filly by Von Tromp—Du Barry by Imp. St. George.

March 8—Chestnut colt by Von Tromp—Ruth W. by Imp. Kings Counsel.

March 8—Bay colt by Rey Hindoo—Directa by Vinctor.

March 9—Chestnut filly by Rey Hindoo—Illusion by Mesmerist.

March 9—Bay filly by Joe Carey—Alondra by Emperor Norfolk.

March 10—Bay filly by Joe Carey—Glenco Maid by Emperor Norfolk.

March 12—Chestnut filly by Von Tromp—Andreweta by Imp. St. Andrew.

March 12—Bay colt by Joe Carey—Trained Nurse by Yo el Rey.

March 14—Chestnut colt by Joe Carey—Escarola by Amigo.

March 16—Chestnut filly by Marse Abe—Saliska by Salvation.

March 27—Bay colt by Von Tromp—Rose Gal by Imp. Galveston.

March 27—Bay filly by Tim Payne—Arcadia Belle by Emperor Norfolk.

March 27—Bay filly by Joe Carey—Mi Reina by Santiago.

March 28—Chestnut filly by Rey Hindoo—Zula H. by Rubicon.

March 28—Chestnut filly by Joe Carey—Dod Anderson by Commoner.

FAILED TO GET A RECEIVER APPOINTED.

New Orleans, La., April 3.—Efforts of Miss Jean Gordon, clubwoman and suffragette, and Alfred F. Page, former Auditor of the Business Men's Racing Association, to have a receiver appointed for the association which so successfully conducted the fifty-seven day meet at the Fair Grounds this year, failed today when E. K. Skinner, of the Civil District Court, held that Miss Gordon's complaint was not looked upon with favor by the bench and bar, and that Mr. Page was proved false, since the association was in first-class financial condition. The judge then dismissed both applications for the appointment of the receiver.

Today's court action followed what Miss Gordon tried to make a public upheaval against the races. Just before the close she caused a grand jury investigation by stating that the Locke law was being violated. The grand jurors found not a true bill against the racing body, and that the law was not being violated as charged. Page was one of the principal witnesses at this hearing, and it has been openly charged and alleged here that he gave evidence which tended to damage the racing association.

Shortly afterward his services were dispensed with by the racing association. In the meantime Miss Gordon had secured two shares of stock from Joseph Rittenberg, keeper of a pawnshop. With these two shares she went into court, claiming to be a stockholder, and asked for a receiver on the ground that the association was running a business contrary to law and in violation of the law.

Harry Payne Whtney has come forward with a generous offer for the continuance of the Whitney Memorial Steeplechase, which has been run annually as a mark of appreciation for the benefit the turf derived from the efforts of his father, the late William C. Whitney. The Whitney Memorial Steeplechase is to be run at the spring meeting of the Piping Rock Racing Association. For it Harry Payne Whitney offers a purse of $3,000 and a $500 cup for the owner winning the race twice. This liberal donation will make the race worth about $5,000 to the winner and will insure the best entries from cross-country division. The usual conditions will prevail, the entrance fee being $25, with $100 additional from starters. The distance of the race will be two miles and a half over the Piping Rock course.—Thoroughbred Record.

The successful revival of horse racing at New Orleans and Hot Springs has resulted in the formation of a Business Men's League in Memphis, Tenn., for the purpose of reopening the track which was closed by adverse legislation nearly ten years ago, states the Thoroughbred Record. The business interests of Memphis feel that horse racing will benefit their city in many ways. Although the laws of Tennessee prohibit bookmaking and pool selling it is believed that there can be no legal interference with individual betting and stake holders, which is the system successfully operated in Louisiana and Arkansas this winter.

Drink Jackson's Napa Soda.

THE SEASON'S WINNING TWO-YEAR-OLDS.

Practically a round hundred races have been contested by two-year-olds during the months of January, February and March on the running tracks of the United States, forty sires being represented in the table of winners. It is of especial interest to note, in view of the curtailed breeding and racing operations here in the far west, that the leading winner to date of the juveniles is a product of Napa Stock Farm, Lobelia by Dr. Leggo—Opthale, while the Golden State has other representatives by such sires as Chantilly, Dr. Leggo, General Roberts, Rey Hindoo, Solitaire II., Tim Payne and Vorhees. The complete list is as follows under their sires, with the dams in parenthesis, the number of races and the amount of money won:

ABE FRANK: Marie Miller (Burnie Bunton)	2	$ 450
ALVESCOT: Our Netta (Ilus)	2	600
BALLOT: Sister Emblem (Ave Marie)	1	325
BASSETLAW: Chemung (Brynwood)	1	300
BEN TROVATO: May W. (Belle of Mayfield)	3	675
Ida Trovato (S. G. P.)	1	225
BRYN MAWR: Gretchen R. (Tchoupetoulas)	1	300
Ophelia W. (Star Lady)	2	650
Lucile P. (Annoyance)	1	325
CHANTILLY: Aunt Liz (Antioch)	2	625
CHARLES EDWARD: Crankie (Killiecrankie)	1	225
CHUCTANUNDA: Riposta (Canastota)	1	225
CYCLADES: May Bock (Optional)	1	325
Cycleford (Anna Woodford)	1	225
DICK FINNELL: Westy Hogan (Carrie Jones)	1	300
DR. LEGGO: Burbank (Como)	2	650
Lantana (The Peeress)	1	325
Lobelia (Othale)	4	1,225
FIRST CHIP: Waremore (Gracie Gould)	3	675
GEN. ROBERTS: D. Roberts (Playful)	1	225
HANDSEL: Mico Girl (Niko)	3	900
HARRIGAN: Good Note (Top Note)	1	225
Jay Thummel (Alice Commoner)	1	225
HASTINGS: Hasty Cora (Northumbria)	2	650
HELMET: Helmet's Daughter (Lady Ornama)	2	650
HURST PARK: Wand (Fairy Story)	1	225
JACK ATKIN: Owaga (Divonne)	2	600
Lazy Lou (Mrs. F. G. Hogan)	1	225
JIM BENSON: Rosellis (Pourquoi Pas)	1	225
LEONID: Lytle (Chickadee)	1	225
LUCK AND CHARITY: Sir Richard (Lukeramus)	1	225
LUKE WARD: Nasledovatti (Succeed)	1	225
MADDALO: Seminole (Icaria)	1	325
MARTA SANTA: Bessanta (Bessie Simpson)	3	675
Solveig (Reality)	3	900
Bedtime Stories (Dancing Wave)	3	900
Wat (Anne Conyers)	1	225
MEELICK: Sybil (Belle Rankin)	1	225
Night Cap (Flash of Night)	1	225
Dunga Din (Gay and Festive)	1	300
PEEP O'DAY: Geo. C. Love (Evaline)	1	400
Frank Coleman (My Gyps)	1	400
PLAUDIT: Hondo (Blue Jacket)	1	225
RAPID WATER: Manokin (Little Buttercup)	1	325
Juanita Frederick (Lady Hildreth)	5	1,125
REY HINDOO: Little Ford (Dod Anderson)	1	325
Rey Ennis (Katherine Ennis)	1	225
SALVATION: Elizabeth McNaughton (La Reine Empress)	1	225
Rhymer (La Poeta)	2	700
SOLITAIRE II: Savilla (Salvatrix)	1	300
STALWART: Dental (Dentifrice)	3	975
STAR SHOOT: Norumbega (Noreen)	2	600
Flight's Fancy (Mamie Worth)	1	300
Yellow Sally (Frances McClelland)	1	300
Wistful (Wilfull)	1	300
No Friend (Queen Marguerite)	1	325
Golden Bantam (Autumn Leaves)	1	225
THE COMMONER: Conowingo (Hawksora)	2	600
TIM PAYNE: Cashup (El Sonora)	1	225
TODDINGTON: Cadillac (Winnie G.)	2	650
Otisco (Mrs. Sewall)	1	325
Opportunity (Miss Oertel)	1	300
TONY BONERO: Meddling Miss (Busy Miss)	3	1,000
Sang Bleu (O. Co. Ee)	1	225
Maud Bacon (Oviedo)	1	300
Bon Otis (Cain Chaser)	1	300
VOORHEES: Cruces (Chiffie)	1	325

PARI MUTUALS IN CANADA.

The prime feature of thoroughbred racing in Canada just now is the extended adoption of the mutual system of wagering—beyond cavil, the fairest and most desirable method of speculation on the ponies. At first, there was not only the opposition of the bookmakers to overcome, but also the unwillingness of a large section of the race-going public to take kindly to the system. Bettors said they liked to know what they were going to get if they won before staking their money. But, in view of the evident fairness of the mutuals, this latter feeling is gradually giving way, and the system is growing more and more in favor. Before the second meeting of the year, it is more than probable that the totalizator, as it is termed in Australia, will have been installed by all Canadian racing associations. Hamilton has been the most determined opponent, but the announcement has been made that installation of the iron man will have taken place before next spring.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

GREAT TROUT SEASON EXPECTED IN SOUTH.

[By Fred W. Thatcher, Secretary California Trout Association.]

With the opening of the trout season less than a month away the fishermen are passing through the usual stage of anxiety as to what the coming season will offer. The May first opening will without doubt be of great benefit as it will give the streams a chance to assume their normal conditions and the fish will run about an inch longer, as this is the average growth of trout per month. No doubt the greatest factor to be considered for a successful season is the amount of fry planted, and the following is the distribution for 1915 in the six Southern counties:

Los Angeles county	192,000
Riverside county	16,000
Orange county	22,000
San Bernardina county	725,000
Santa Barbara county	194,000
Ventura county	271,000
Making a total of	1,520,500

This is the largest plant that we have ever had in Southern California and at first glance appears to be a very liberal allowance, still when compared with the total output of the State hatcheries for 1915, it falls quite short of the proportion that the South should have had. The State hatcheries in 1915 produced a total of 52,500,000 fry, including trout and salmon.

The above mentioned counties last year contributed nearly 25 per cent of all the fishing licenses sold in the State and received less than 1-34 of the results.

Of the fish planted in Southern California Bear Valley hatchery produced 653,000; this output consisted of 240,000 black spotted, trout and 413,000 rainbow trout, which were planted as follows: 240,000 black spotted trout and 240,000 rainbow trout in Big Bear Lake, and the balance of 173,000 rainbow were placed in streams adjacent to Bear Valley as follows: Bear and Deer creeks, Upper Santa Ana, Houston and Seeley creeks, Dark Canyon and Grey Meadows.

There were also 8,000 Eastern Brook, 22,000 Loch Leven, and 42,000 Rainbow trout furnished by the Sisson Hatchery and planted in San Bernardino county in the following streams: Lytle Creek, Mill Creek, Waterman Canyon, Falls Creek, Upper Santa Ana, Devil Canyon, Fish Creek, Forest Home stream, etc.

The San Gabriel River and its tributaries received 152,000 fry; these included 60,000 Steelhead, 30,000 Loch Leven and 652,000 Rainbow trout. Branches that were stocked were as follows: East, North and West Forks, Bear and Cattle Canyons, and Soldier's Creek.

Balance of the fish planted in Los Angeles county as follows: Rio Hondo, 6,000 steelhead. Topongo Canyon, 8,000 steelhead. Big Tejunga, 4,000 steelhead and 16,000 Rainbow. Santa Anita, 2,000 Rainbow. San Dimas Canyon, 4,000 Rainbow.

The Santa Ynez River in Santa Barbara county received 90,000 fry; Ventura River and its tributaries received over 150,000 steelhead; in the Sespee River 20,000 of the same kind were planted.

During 1915 25,000 Quinnat salmon were planted in the Santa Ynez River.

This is the second year for the salmon plant and the same number will be planted next year. This is in the nature of an experiment, and if it proves a success we should enjoy an entirely new brand of sport about one year from next October, as salmon return to their native waters in four years, and every enthusiastic fisherman is looking forward with much interest to this event. Sizing up the situation, the prospects seem very good for the best season of a decade, as the streams are clear and nearly down to their normal level, and if there are no more rains up to May 1st you can be assured of a full creel on the opening day.

BRIGHT SEASON FOR FLY-CASTERS.

Interest in fly-casting throughout the United States has been distinctly furthered as a result of the international tournament held here in connection with the Panama-Pacific International Exposition last year. This tournament was conducted under the auspices of the San Francisco Fly Casting Club and in it several records were broken.

Great interest is being taken in the forthcoming national tournament which will be held in Newark, and San Francisco will undoubtedly be well represented there.

Many powerful fly-casting clubs have recently affiliated with the National Association of Scientific Anglers, under whose auspices the tournament will be held. The Seattle Fly and Bait Club with 150 members and a half dozen large Eastern clubs with membership lists amounting to more than a thousand in the aggregate are among the accessions.

The local casters are holding their first tournament of the season at Stow Lake today and tomorrow.

WINS ANGLER'S CUP IN HAWAII.

"The finest winter fishing in the world is to be found in Hawaii," said R. B. Jump, noted Southern California nimrod, who brought back from the islands the first cup ever given to a fisherman. He came in on the Great Northern last Sunday, accompanied by his wife, after a stay of three months in the islands.

"There are twenty-five varieties of game fish in Hawaiian waters," he said, "and the people are just coming into sport fishing in earnest. The tuna, ulua and swordfish are the gamest of the large fish, but there are many others that put up big fights."

Jump is proud of the silver cup given by George P. Cooke, and he won it by landing a thirty and one-half pound kaku after a lively fight.

NEW SPOT FOR BLACK BASS.

Bob Murdock, one of the most enthusiastic and best posted anglers of California, is enjoying himself these days by taking fishing trips. He is spending a sort of vacation and makes frequent trips to near-by points. Last Sunday he ran up to Middle River in San Joaquin Valley and was successful in landing some good-sized striped bass. His companion was Louis Gotthelf ,who gained fame last season by landing a 52-pound bass near the Napa drawbridge. They had a great outing and report that striped bass are running well in Middle River.

Murdock is looking forward with pleasure to a trip to Bass Lake, about 58 miles out of Fresno, when the season for black bass comes in on May first. Friends have informed him that Bass Lake is an ideal spot for black bass sport. It is a large body of water right in the pines and parties that have fished there tell glowing tales of the catches made.

Charles Urfer had the good fortune to make a big haul of striped bass at Wingo recently. He hooked a 31-pounder, 30, 15 and 10 pounder. He was accompanied by his wife, who is an ardent angler and assisted in making the catches.

* * * *

Salmon at Santa Cruz.—Mr. Robertson, well-known as a trap shot and rodster, was a visitor in San Francisco during the week. He makes his home in Santa Cruz and called on Billy Price to let the boys know that salmon are now running off Santa Cruz. "Tell the bunch to come down and they will be assured of big catches," was the word that he passed.

HIGH RATES TO SHIP LIVE BIRDS.

At the request of the members of the Spokane county game commission, Congressman C. C. Dill has applied to the Interstate Commerce Commission at Washington, D. C., asking that an investigation of the express and railroad rates on live birds shipped from Eastern points to the Pacific Coast be made.

As an example of the exorbitant charges, Congressman Dill pointed out to the Interstate Commerce Commission that it cost $300 to ship 856 partridges from Yardley, Pa., to Spokane, last fall, the charge being one and one-half times the first-class rate.

"We took the matter of live bird shipment up with Congressman Dill before he went to Washington," said Al Wieseman, a member of the Spokane county game commission. "The shipment of birds takes up no more room than ordinary goods for which a lower rate is charged, and we find that the birds are given little, if any, attention along the route. We don't feel that we should be charged the exorbitant rate, and hope for a change."

H. C. GOLCHER BACK IN BUSINESS.

Sportsmen will be interested and pleased to learn that H. C. Golcher is going back into business again. He will be at the old stand, 508 Market street, San Francisco, with a general sporting goods store. Workmen have been busy for three weeks past fitting up a place that will be modern and up-to-date in all respects. A general line of fishing, hunting and sporting goods of every description will be carried. The opening will take place one day this coming week.

For years Mr. Golcher was associated with his late brother in the sporting goods business and established a reputation for integrity and thoroughness. He is a true sportsman himself, being prominent with the rod and gun, on the golf links and in many other sporting competitions.

The Breeder and Sportsman takes pleasure in extending a welcome to Mr. Golcher and his associates and wishes them much success in the enterprise.

The San Francisco Striped Bass Club held its monthly meeting on Wednesday night. There were interesting talks of big catches and the like and everyone had a good time.

TROUT PLENTIFUL IN MARIN COUNTY.

If, as many a person has often observed, anticipation is half the pleasure of pleasure, a party of anglers who visited Marin county last Sunday had a great day's sport. The party went to Camp Taylor Saturday night to look over the Paper Mill Creek, one of the favorite trout streams of the north bay county.

Water conditions at the present time are ideal. The heavy flow of water that marked the opening of the trout season a year ago is not noticeable now. The stream is just low enough to insure good fishing. Below the dam at Camp Taylor several good sized trout were seen, and during the early hours of the morning many were observed breaking water in the stretches of the creek between that point and the pool at Taylorville, below the old paper mill.

The stream is exceptionally clear for this time of the year, and only a heavy fall of rain between now and the opening of the 1916 season on May 1st could possibly interfere with good fishing. A new and large pool has been formed beneath the bridge at Camp Taylor, which collapsed last year, and, though few small fish were seen, it is certain that many trout of no mean size lurk in the deep shadows of the hole.

All in all, it looks as though the angler who was disappointed because the season did not open this year, as in the past, on the first day of April, will be more than amply repaid for his added month of waiting and anticipating. On May 1st, barring the possibility of storm, every stream in Marin county should be at its best for trout fishing.

OFF TO STUDY TUNA FISHING.

With a view to making a study of the tuna-fishing industry and the newly inaugurated kelp-harvesting activity, Ernest Schaeffle, secretary of the State Fish and Game Commission, and N. B. Schofield, in charge of the commercial fisheries bureau of the Commission, have left for a visit to points in the south. San Pedro, Los Angeles and San Diego will be among the places visited.

The tuna fishing industry is one of the State's latest acquisitions, but has already assumed great proportions. It is estimated that this season's catch will total $2,500,000 wholesale, all of which is reported contracted for already. The industry has now exceeded the salmon industry by more than two and a half times.

In the matter of the harvesting of kelp, the representatives of the Commission are especially interested in the repressive measures said to have been adopted by several of the southern coast counties on the grounds that the harvesting of kelp is injurious to the kelp beds, fish beds and to the beaches. The Commission believes that the matter of regulation of kelp harvesting is entirely within the powers of the State and is not a county issue.

* * * *

River Ordered Closed.—The Fish Commission of Columbia county, Washington, has ordered the closing of five forks of the two principal streams of the county during the fishing season this year. Fish that are large enough to be lawfully retained by fishermen do not remain in these streams, so most of those caught there have to be thrown back, anyway, and it has been deemed advisable to close them altogether to more fully protect the young fish.

These streams are to be the planting grounds of the fish received from the State Fish Commission this year, and this new restriction will insure their growth to maturity. Rearing ponds are to be constructed in the city park this year.

* * * *

Hatchery at Canyon Dam.—A fish hatchery has been established at Canyon Dam by the State with James H. Vogt as Superintendent and A. E. Raycroft as chief assistant.

The old commissary building, used during the construction of the dam, has been fitted up for temporary headquarters and the catching and stripping of the trout for spawn is being carried on daily.

A fish ladder is being placed in position, making it possible for trout to get into Lake Almanor from below the dam. Thousands of trout can be seen in the stream below the dam and near the spillway.

The permanent location of the hatchery has not yet been absolutely determined but there are several ideal spots for such an industry between the dam and Chester, in the upper end of the Big Meadows.

It is declared that Lake Almanor and its tributaries form the finest fishing grounds in the State.

The road from Greenville to the Nevis Dam will be open for autos by May first.

MAY ABANDON GOOSE STEW.

Grass Valley (Nevada Co.), April 11.—There is a bare possibility that the annual camp stew of the Grass Valley Sportsmen's Club may be dropped from the social calendar this year.

For forty years these stews have been held every July, but a change in the game laws makes it impossible to hold the stew this year until September. The club met last week to discuss the matter, but no definite decision was arrived at.

New officers were elected as follows: President, Henry Walker; vice-president, J. T. Blight; secretary, J. J. Phillips; treasurer, C. M. Peck; trustees, A. B. Champion, Dr. I. W. Hays and E. C. Morgan.

Sportsmen's Row

Clarence H. Haight is making arrangements to make a tour of Nevada to see how the trap-shooting sport is booming in the Sage State. The secretary of the California-Nevada Association will endeavor to stir up interest in the State shoot to be held at San Jose next month.

* * * *

Frank Blum can be seen working every Saturday and Sunday scoring for the Golden Gate boys. Keep it up, Frank.

* * * *

Pete Ashcroft has more patience than a dog trainer. Please keep away from the shell room and let Pete use his own judgment.

* * * *

Ned Landry of the Family Club is another shooter that N. A. Howard will have a job to tuck away.

* * * *

M. S. Goodman, shooting with the Oakland Elks, shows that he has the ability. Now for the practice.

* * * *

W. J. Terry, from south of the Mason and Dixon line, is making his mark in the ranks of local blue rock busters. He is a newcomer who shows real ability in sighting the birds.

* * * *

It is quite possible that Canada will soon have a law for the protection of migratory waterfowl similar to the Weeks-McLean law in this country, as Dr. C. Gordon Hewitt of Ottawa, Canada, was recently in Washington, D. C., inquiring into the Federal Migratory Bird Law and holding conferences with the head of the administrative division of the Department of Agriculture. Should Canada enact a law similar to the Weeks-McLean law and the Supreme Court of the United States declare that law constitutional, there will be but few wildfowl killed in the spring of the year, and as a result there should be very many more birds in the fall.

W. C. ("Bill") Bristol is just as enthusiastic over his shooting with his 20-gauge gun as the shooter who uses the 12-gauge. "Bill," in the enthusiasm part, has a little shade over the other fellow, and as a result of his boosting he has two match shoots on his hands, the first against Walter Honeyman and the second against Ed Mathews. Last Sunday "Bill" trimmed Ed Morris.

* * * *

Ex-President Henry Everding of the Portland Gun Club is still at the Mineral Springs, but it is expected that he will return in the near future.

* * * *

The Golden Gate Gun Club is out with the program for the merchandise shoot to be held in Alameda on April 23rd. Over seventy prizes are on the list and members, friends and their families will get out to the traps to secure at least one or more trophies apiece. The trophies will be awarded by the grab-bag system.

* * * *

Do you remember the scores you and your friends made at the last monthly shoot? Then get the Breeder and Suortsman. This is the only publication on the Pacific Coast that publishes the scores and all the news of rod, kennel and gun every week. You are invited to send in scores and items pertaining to sporting events of all kinds.

* * * *

Our friend Captain A. W. duBray has started on his annual tour. Good luck and a quick return, Capt.

* * * *

President Miller of the Oakland Elks is stirring up interest in the ranks of the new club. He wants them to be fit and ready to trim their Alameda brothers.

* * * *

Judging from the interest H. P. Martine is taking in the shooting game the Golden Gate Club will have to form a championship class pretty soon.

* * * *

A. B. Thorning of the Alameda Elks and W. A. Plummer are striving hard for high honors. They are making progress, too.

* * * *

A. E. Stoneberger should develop into some shot before many months roll by. He has been in the game only a year and at present is right on top.

* * * *

Frank Moran, the aspirant for heavyweight honors, graced the platform of the Saratoga Gun Club after the big fight. Moran trains at Saratoga and while there took quite a fancy to trap shooting. He will include the "sport alluring" in his training from now on.

* * * *

C. J. Schilling is planning to make a special load for the 20-gauge gun. He will probably have the loads ready soon and he will give them a tryout at the traps.

* * * *

Fred M. Stephenson has lately registered Elchico, a young Llewellin setter by Paliacho ex La Besita. Paliacho was runner-up in the 1914 National Championship, while La Besita won last year. If there be anything in breeding on past performance, this one should be a wonder.

Sportsmen are pleased to welcome Harry C. Golcher back into business. He is popular in all branches of sporting competitions. We wish him success:

* * * *

The California Anglers' Association has what promises to be an enjoyable outing scheduled at Moss Beach tomorrow. It will be a basket picnic and prizes will be awarded for the best catches made. On May 30th a trip is scheduled to Feather River Canyon and members and their friends are invited to make reservations at the club rooms, 935 Market street, San Francisco. President F. Spence has outlined a number of outings for this summer to entertain the members.

ACTIVITY IN KENNEL CIRCLES.

Entries for the Golden Gate Kennel Club dog show to be held at Dreamland Rink, April 27, 28 and 29, closed today, April 15th. More than five hundred valuable dogs have been entered for the show. Walter H. Reeves, who will judge all breeds, will arrive here from Chicago this week. Mrs. Anita M. Baldwin, daughter of the late E. J. "Lucky" Baldwin, noted turfman, will have her entire kennel of crack terriers and bulldogs on exhibition. Mrs. E. F. Brown of Redwood City, owner of the Browndale collie kennels, will have twenty beautiful callies on exhibition.

‡ ‡ ‡

J. S. McCormick has entered his brace of Irish terriers, Paddy Whack and Biddy Whack, for the coming show.

‡ ‡ ‡

Jack Bradshaw is expected to arrive home from Boston and New York this week. Bradshaw is bringing with him a string of terriers and bulldogs.

‡ ‡ ‡

B. I. Bloch, the local French bulldog fancier, will show his noted little "Frenchie," Vendome Buno, at the Golden Gate show.

‡ ‡ ‡

Champion High Gear, one of the best wire-haired fox terriers ever imported to the Pacific Coast, will be shown by his owner, Walter W. Stettheimer, of Atherton, Cal., at the Golden Gate show.

‡ ‡ ‡

Mrs. C. Frederick Kohl and Mrs. Francis Carolan will exhibit their imported pack of Beagle hounds at the spring circuit of shows consisting of Golden Gate, San Mateo, Mill Valley and Oakland.

‡ ‡ ‡

Louis Meyer, one of San Francisco's best known Airedale breeders, reports to the Kennel Department that he will have several very fine Airedale terriers (home breds) on exhibition at the Golden Gate show.

‡ ‡ ‡

Mrs. C. J. Lindgren, of Burlingame, Cal., will show her imported French poodle dog along with several other varities of toy dogs at the San Mateo show to be held this summer.

St. Helens Club.—Two prominent members of the Portland Gun Club were visitors at the St. Helens Gun Club grounds on April 9. A. W. Strowger, president of the Portland organization, registered 86 per cent, while his clubmate, E. H. Keller, was high gun, with 88 per cent. Ten shooters were out trying the new traps. Following are the scores made:

E. H. Keller 88, A. W. Strowger 86, C. D. Sutherland 80, B. Devers 64, E. E. Lewis 62, E. Lenndgren 58, C. E. Stevens 58, H. Esterbrook 52, A. J. Kelly 64, and J. T. Tabor 36.

* * * *

Utah State Association.—Although a disappointment from the standpoint of attendance, the second registered tournament of the Utah State Sportsmen's Association, which was held under the auspices of the Cache Junction Gun Club on April 7th, was in every other respect one of the best shoots ever held in the State.

Despite the ideal shooting conditions, it seemed to be an off day for the boys, and D. N. Hood was about the only one who shot true to form. Breaking 145 out of 150, he easily won high general average, finishing five targets to the good over C. H. Reilly, Jr., who in turn had little trouble in topping the amateur list. The following are the scores for the day's program:

At 150 targets—Hood* 145, Stoney 123, Smith 132, Shook 100, Winchell 113, McGanney* 116, Bain 118, Browning 123, Siddoway 134, Anderson* 132, Kline 130, Reilley 140, Nelson 134, Borg 83. (*Professionals.)

* * * *

Vernon Club.—Firing in the hottest weather experienced this season, twenty-seven shooters lined up for competition at distance handicap at 50 targets at the Vernon Gun Club Sunday. The first leg was taken by Stanton A. Bruner with the good score of 47x50 made from twenty yards.

In addition to the Cline handicap the initial competitions for the William H. Hoegee trophy, the four silver loving cups and the 20-gauge cup, were held. These three contests will be held regularly every Sunday from now until July. The six high scores will win. The cups are in four classes of A. B. C and D.

The best score hung up in the Hoegee handicap was made by Dr. L. M. Packard with 48 shattered clays out of the 50. He also fired from 20 yards.

The keenest kind of competition was let loose in the 20-gauge shoot for the trophy cup, several of the cracks breaking as many as 22 out of 25.

The cup in class A was annexed by Packard with his 48x50 score and in the B., Bigg Dough, the club secretary, took away all honors with 43x50. Dierdoff was winner in C and Mrs. C. E. Groat, the champion woman shot of the south, in D.

Following are the scores in all events:

George T. Cline handicap—

Shooter.	Hdcp.	Targ.	Hits
Manderville	16	50	44
Van Nest	16	50	39
Peterson	17	50	38
Dierdoff	17	50	46
A. W. Bruner	16	50	42
Harry Hoyt	17	50	40
C. E. Groat	18	50	45
Mrs. C. E. Groat	16	50	45
C. W. Dougherty	17	50	41
Dr. Packard	20	50	44
William Pugh	18	50	45
Bob Bole	16	50	40
W. H. Wilshire	17	50	44
O. Evans	18	50	37
S. A. Bruner	20	50	47

W. H. Hoegee handicap—

Shooter.	Hdcp.	Targ.	Hits
Manderville	16	50	43
Van Nest	16	50	40
Peterson	17	50	45
Dierdoff	17	50	44
A. W. Bruner	16	50	41
Harry Hoyt	17	50	41
C. E. Groat	18	50	41
Mrs. Groat	16	50	44
C. W. Dougherty	17	50	42
Dr. Packard	20	50	48
William Pugh	18	50	43
Bob Bole	16	50	39
Wilshire	17	50	43
O. Evans	18	50	37
S. A. Bruner	20	50	47
White	18	50	43

Vernon Gun Club 20-gauge trophy at 25 birds, 16 yards—

Manderville 22, Peterson 21, Hedderly 22, Wilshire 22, C. W. Fisk 21.

Open event with 12-gauges at 16 yards—

Manderville 40x50, Peterson 22x25, Hedderly 50x60, A. W. Bruner 19x25, C. E. Groat 18x25, Carmon 16 25, McKeey 47x75, William Pugh 22x25, N. W. Smith 40x50, D. Llewellyn 47x50, B. J. Dougherty 37x50, Bole 40x50, C. W. Fisk 56x75, O. Evans 17x25, Bates 30x50, S. A. Bruner 21x25, Brawman 23x25, Sech 12x25, Mrs. Manderville 14x25.

* * * *

Portland Club.—The biggest weekly shoot attendance in the history of the Portland Gun Club was celebrated Sunday, April 2nd, during the second annual barbecue and merchandise shoot. President A. W. Strowger shook hands with more than fifty nimrods and some great scores were recorded.

Frank Troeh, of Vancouver, Wash., broke 100 straight, while James W. Seavey, who has been breaking the mud saucers with uncanny accuracy of late, dropped one bird in his first 20 then went straight, giving him a final average of 99 out of 100.

For third honors W. A. Hillis broke 98 per cent. The race between the women shooters in the handicap event furnished as pretty a match as has been seen in many days at the Everding Park traps near Jenna Station. Mrs. E. H. Keller, Mrs. James Reid, Miss Gladys Reid, Mrs. E. L. Matthews and Mrs. C. J. Schilling were the five to face the trap. A tie between Mrs. Reid and Mrs. Schilling occurred for the hand-painted china piece. The shoot-off for the tie brought forth considerable "nerve" from each Diana and not until nine successive shoot-off events had been completed did Mrs. Reid win.

The Portland men defeated the Spokane, Wash., Gun Club representatives in the telegraph contest, 121 to 107. Six members of the club scored one point on the Imperial Hotel diamond medal as follows: Al Seguin, J. W. Seavey, Miss Gladys Reid, A. W. Strowger, A. R. Parrott and A. L. Zichrison.

In the beginners' squad for women only, six entered the competition. Those shooting for the first time were Miss Regina Bitts, Mrs. H. W. MacLean, Mrs. A. W. Strowger, Mrs. George Bertz, Mrs. J. H. Joyce and Miss H. Koppe. Miss Bitts and Mrs. MacLean tied for first honors and in the shoot-off Miss Bitts won. Following are the scores at 100 targets:—

F. Troeh 100, J. W. Seavey 99, W. A. Hillis 98, F. Duncan 96, A. Parrott 95, A. S. Keeler 94, Charles Leith 94, A. Seguin 93, Mrs. C. J. Schilling 91, Abner Blair 90, E. G. Hawman 90, A. H. Keller 90, C. Sparks 89, Dr. O. D. Thornton 87, E. Bateman 85, H. Thielman 83, H. A. Pollock 83, A. W. Strowger 82, Joseph Stutt 81, Miss Gladys Reid 80, A. L. Zachrison 79, J. B. Hampton 77, F. O. Joy 77, C. B. Caldwell 76, A. I. Moulton 76, J. Madden 72, A. C. Stevens 72, A. Woelm 71, George Bertz 69, R. Thompson 67, J. S. Crane 67, B. E. Leonard 66, J. T. Murphy 65, W. C. Bristol (20-gauge) 64, B. Trenkman (20-gauge) 61, C. C. Kelly 64, Phil Metchan 14, J. H. Joyce 3, K. K. Kubli 29, J. S. Harkins (20-gauge) 37, R. C. Oglesby 48, P. C. Wood 22, J. V. Hough 35, J. H. Klosterman 43, H. H. Ott 50, Dr. Earl Henton 15, Dr. Humberstone 15, Dr. L. L. Langley 8, W. Leith 13, C. J. Schilling* 93, Jas. Reid* 92, P. J. Holohan* 92, E. B. Van Arnum* 35,

*Professional.

Merchandise winners:—Class A—F. M. Troeh first, J. W. Seavey second. Class B—A. Seguin first, Mrs. C. J. Schilling second. Class C—E. Bateman first, H. Thielman and H. A. Pollock tied for second. Class D—J. B. Hampton and J. O. Joy tied for first, A. I. Houlton and C. B. Cadwell tied for second. Class E—George Bertz first, R. Thompson and J. S. Crane tied for second.

Team shoot with Spokane Gun Club—

Portland—J. W. Seavy 25, W. A. Hillis 25, E. S. Keeler 24, Charles Leith 24, F. Duncan 23; total, 121. Spokane—Blosser 24, March 21, Gregory 21, Crommelin 21, Mathews 20; total, 107.

Trap-Shooters Now In Full Swing

COAST CLUBS ARE BUSY STAGING WEEKLY TOURNAMENTS

Alameda Elks Club.—The Elks are booming things along in the trap-shooting game around the bay. The Alameda Elks' Club held its second shoot on Sunday and it was attended with much success. Fifty gunners were out and the weather was ideal for good scores and a big time.

The Alameda Club, which took the lead in breaking into the sport alluring, realizes it will have to step right along in expectation of challenges. It is reported that the Richmond and San Jose Elks have organized blue-rock clubs and with Oakland already in the field the prospects are that some match contests will soon be staged.

W. J. Terry was high amateur on Sunday. He missed only one target out of 50. Barney Worthen was close behind with 48 and in practice he ran 102 straight. A majority of the boys who are recruits at the game are showing steady improvement and with a couple more events they will likely be right up with the leaders.

Among the professionals, Dick Reed was there with his old consistency to be high gun. He broke 49 out of 50. Al Cook was also in a happy mood to get 46. The scores were:—

Shooter.	10	10	15	15	Total
Jacobsen	8	6	14	8	36
Skinner	7	8	11	14	40
Nelson	8	8	12	15	43
Bradley	2	6	9	8	25

* * * *

Tacoma Club.—The Tacoma Gun Club held its regular shoot at Manitou on April 2, with a small attendance on account of the trout-fishing season just opening. Most of the members went fishing.

A .Riehl won the Majestic Cafe trophy after a shoot-off with L. S. Mellinger.

J. A. Holmes won the Mellinger medal after a shoot-off with F. L. Baker.

L. S. Mellinger and J. A. Dague were a tie for high average on the Diamond stickpin.

F. L. Baker won the White Flyer fob.

There were no spoons won as no one was able to break 25 straight.

The following scores were made on the Majestic Cafe trophy, out of 100 birds:—

	Broke.	Hdcp.	T'tl.
A. Riehl	89	5	94
J. Cooper	85	6	91
Dague	84	3	87
Baker	84	6	90
Young	84	8	92
L. Riehl	83	6	89
Holmes	77	16	93
Mellinger	76	18	94
Griffin	82	7	89

The following scores were made in the shoot for the Mellinger gold medal:—

	Broke.	Hdcp.	T'tl.
Baker	43	7	50
Holmes	39	11	50
Mellinger	38	11	49
J. Cooper	43	6	49
Griffin	45	3	48
Dague	42	5	47
A. Riehl	45	1	46
Young	42	4	46
L. Riehl	41	5	46

* * * *

Seattle Association.—The streams and lakes did not claim all the sportsmen April 2nd, as many of the "bugs" showed up at the traps and left Mr. Fish to be caught later on in the season. Harbor Island grounds of the Seattle Trapshooters' Association presented itself in spick and span order to over six squads of clay pigeon shooters.

Hugh Fleming shot the best amateur score, being high in both the regular and special programs. Forty-seven out of fifty and ninety-five out of 100 were his scores. L. H. Reid scored high professional, making forty-nine out of his fifty.

C. E. McKelvey and I. Fisher accepted the challenge of Les Reid and Hugh Fleming for a 50-target match which they shot off. The results showed the treats were on Reid and Fleming.

H. R. Smith, of Ephrata, Wash., visited and shot with the club. T. J. Holdridge, formerly of Kansas City but now living in Seattle, was on the grounds for the first time and although he had not shot for some time was up in the running. F. H. White surprised the bunch by coming out. He showed up too late for the regular program, but killed twenty-two out of the regular twenty-five he shot at.

Several new faces appeared in the squads, among whom were G. A. Cannuck, J. Hulbert, G. D. Horst, C. Ward, J. N. Robbins and E. C. Fellows. M. C. Lordshot with the club for the first time as a member.

The scores—50 targets:—

C. E. McKelvey 41, Tom Wilkes 38, J. H. Hopkins 38, F. Landwehr 44, Hugh Fleming 47, R. Kinzer 41, A. J. Gerrard 41, G. A. Cannuck 42, M. James 34, K. S. Lapp 32, A. Drake 39, J. Hulbert 37, G. D. Horst 19, L. H. Reid* 49, T. J. Holdridge 41, C. W. Bandy 37, G. H. Young 41, C. C. Ward 37, C. R. Sydman 37, H. R. Smith 44, I. Fisher* 46, C. Ward 24, W. B. Taft 43, F. Call 41, V. G. Kesner 37, George Hambright* 43, J. N. Robbins 7, M. C. Lard 22, J. H. Wilman 36.

100 targets:—C. E. McKelvey 88, Tom Wilkes 85, J. H. Hopkins 84, F. Landwehr 86, H. Fleming 95, R. Kinzer 85, A. J. Gerrard 88, L. H. Reid* 95, T. J. Holdridge 77, C. W. Bandy 78, I. Fisher* 95, W. B. Taft 84, George Hambright* 86. (*Professionals.)

* * * *

Green Lake Club.—The ideal weather April 2nd brought out a crowd of forty-seven shooters at the regular weekly meet of the Green Lake Club, including eleven of the fair sex, who took part in a special 15-target event.

Mrs. G. A. Conklin proved to be the best target smasher among the ladies, taking the first prize with 11 out of 15. The special trophy donated to the club by Mrs. Mary Ruppe for the lady making the longest straight run also fell into the hands of Mrs. Conklin with a straight run of nine. Mrs. L. S. Barnes and Mrs. E. Williamson tied for the second prize with seven, and in the shoot-off Mrs. Williamson came out one target to the good.

F. A. Richter of Minneapolis was a visitor at the Green Lake traps and incidentally carried off the high honors for the day with 47 out of 50. C. B. Fitzgerald was second with 46. Mr. Richter, who is making a tour of the Pacific Coast, broke his targets the previous Sunday over the traps of the Los Angeles club. Hhe pronounced the Green Lake grounds one of the best on the Coast.

In the first handicap for the City Hall trophy C. B. Fitzgerald came out in the lead, with W. H. Carsten, A. L. Hall, L. S. Barnes and E. R. Bacon right behind him.

Scores in the ladies' event:—

Mrs. G. A. Conklin 11, Mrs. L. S. Barnes 7, Mrs. E. Williamson 7, Mrs. G. D. Horst 5, Miss B. Mikkelsen 5, Mrs. R. V. Mills 4, Mrs. M. A. Winningham 3, Mrs. J. L. Millett 2, Mrs. W. C. Smith 1, Mrs. H. Muhl 0, Mrs. J. F. McNamara 0.

Scores in the regular events, 50 targets:—

F. A. Richter 47, C. B. Fitzgerald 46, L. S. Barnes 45, W. H. Carsten 45, George Garrison* 45, W. C. Smith 43, Dr. King 42, A. L. Hall 41, George Edling 40, A. Marvin 40, J. W. Geltz 39, G. A. Conklin 38, Dell Ingalls 36, E. R. Bacon 35, E. K. Van Vleck 34, Dr. A. B. Kidd 34, Dr. M. A. Winningham 34, Dr. J. F. Hill 33, W. M. Elliott 33, L. E. Woods 33, S. E. Bacon 31, Dr. R. V. Mills 30, M. A. Rosenfield 29, Dr. J. T. Millett 29, Dr. S .W. Case 28, H. E. Gleason 26, Fred Pries 24, D. Pease 23, Dr. S. W. Griffin 22, R. W. Brehm 15, Harry Muhl 17, V. L. Bauman 17, D. G. Huber 14, C. A. Van Alstyne 6, A. J. Copeland 6, A. E. Hall 4. (*Professional.)

* * * *

Los Angeles Club.—F. H. Nichols won the diamond stick pin Sunday in the Los Angeles Gun Club's regular weekly shoot at its new grounds near Eastlake Park. His score was 49x50. Nichols had things very much to himself in the event, as there was only one 48x50 and one 47x50 turned in. Over fifty shooters took part in the day's sport. The complete scores follow:

Shooter—	16 yds.	Hdcp. yds.	Hdcp. event.
F. H. Nichols	46x50	18	49x50
F. H. Mellus	47x50	22	46x50
H. Pfirrmann	48x50	22	41x50
J. F. Dodds	49x50	20	45x50
C. Vories	43x50	20	39x50
S. R. Smith	44x50	20	41x50
H. C. Cline	42x50	17	37x50
George Melford	44x50	16	41x50
C. D. Hagerman	47x50	17	47x50
E. C. Crossman	43x50	16	46x50
H. E. Sargent	48x50	17	46x50
C. F. Nichols	45x50	18	45x50

Astoria Club.—With 257 members, the Astoria Rod and Gun Club is going to branch out into one of the best trap shooting clubs in the state of Oregon. This is the opinion of Jim Bull, a Portland professional, who visited Astoria last week. Bull stated that the Astoria sportsmen are very enthusiastic over the bluerock game and they will install an automatic trap in the near future. Dr. C. V. Brown is president of the Astoria club and is an all-round sportsman.

Last Wednesday 28 members of the club participated in a shoot in which a hand trap was used. The following scores were registered: Halderman 65, Corbett 40, Grant 40, Hope 40, B. Van Dusen 40, Burlingame 80, Judd 60, A. Van Dusen 40, Gouch 60, Lutke 60, Spexarth 60, Haye 47, McLinn 40, Yount 60, Harrison 80, Lancaster 30, Mumphrey 50, Reed 40, Olson 80, McLean 40, Brown 77, Madison 80, Ford 80, Waetus 40, Lovell 83 and Leahy 40.

* * * *

Martinez Club.—The first field match of the Martinez Gun Club was held at the Fred K. Burnham ranch last Sunday and the handling of the guns by the local shots was mid-season style from A to Z. There was a good attendance present and Fred K. Burnham showed that he is better than ever. The popular sportsman got a leg on the cup by "killing" fifty straight clay birds. Burnham's work was classy, to say the least. He knocked every bird that was sent out of the traps.

William Sanborn and Dr. E. W. Merrithew also showed good form and got 48 out of each possible 50. J. J. Hauser, H. Veale and Fred K. Burnham each have a leg on the silver loving cup trophy. The score was as follows:

Harold Havens 43, Lee Durham 47, Wm. Sanborn 48, Dr. E. W. Merrithew 48, J. J. Hauser 36, C. Glass 40, Judge Hough 30, F. K. Burnham 50.

* * * *

We met Walter Nagle, the former Los Angeles pitcher, out at the ball park the other day. Walter is now secretary of the Santa Rosa Chamber of Commerce, and is interested in getting a blue rock club started. He declared that the sport would be booming now but that there had been some delay in finding suitable grounds.

COMING REGISTERED TOURNAMENTS.

California.

Fresno, April 29—Fresno Blue Rock Club, C. B. Jackson, Secretary.

Los Angeles, May 1, 2—Los Angeles Club, Fred H. Teeple, Secretary.

Los Angeles, May 8, 9.—Vernon Gun Club, William Pugh, Manager.

Alameda, May 20—Golden Gate Club, Clarence A. Haight, Secretary.

San Jose, May 28, 29, 30—California-Nevada Association Tournament, San Jose Blue Rock Club, O. N. Ford, Secretary.

Eureka, July 4—Eureka Blue Rock Club, H. A. Hine, President.

Oregon.

Portland, June 5, 6, 7—Sportsmen's Association of the Northwest Tournament, under the auspices of the Portland Gun Club, Frank Templeton, Secretary.

Portland, Sept. 12, 13, 14—Pacific Coast Handicap.

Washington.

Chehalis, May 30—Chehalis Rod and Gun Club, Gus T. Thacker, President.

Seattle, July 4—"Old Policy," Green Lake Gun Club, W. C. Smith, Secretary

Tacoma, July 18, 19, 20, 21—Pacific Indians, F. C. Riehl, Secretary.

HUNTING LAWS DEFINED.

Deer hunting was permitted in thirty-six states in 1915. Below is given the number of deer allowed each hunter during a season: In Alaska the limit is three, and in the eastern half of Maine and the southern half of New Hampshire one a season; in Alabama, Mississippi and Missouri the limit is one a day, and in Louisiana, two; in North Carolina limits are provided in a few counties only. No limits are provided in Kentucky or Virginia. The law of New Mexico requires that deer killed must have horns; Utah, that the horns must be visible above the head; Pennsylvania, that the horns must be two inches above the hair; New York and Vermont, that the horns must be at least three inches long, and in West Virginia that the horns must be four inches long. In California, does and spike bucks, and in Wisconsin bucks in the velvet, or in the red, blue or spotted coat, as well as does, are protected. In Louisiana, does are protected in the first month of the open season as fixed by the Conservation Commission.

* * * *

Limits On Quail.—Beginning on the west coast of the United States, the states which have bag limits on quail and the number of birds that may be lawfully killed in a day during the open season are as follows: Washington 10, Southwest Oregon 10 in seven consecutive days, California 10 and 15, Nevada 20, Idaho 18, Arizona 25, New Mexico 20, some parts of Utah 15, Nebraska 10, Oklahoma 10, Texas 15, Minnesota 10, Iowa 15, Missouri 10, Arkansas 15, Louisiana 15, Illinois 12, Mississippi 20, Indiana 15, Tennessee 20, Alabama 25, Georgia 25, Florida 20, South Carolina 25, West Virginia 12, Pennsylvania 8, Maryland 15, Delaware 12, New Jersey 10, Connecticut 5, Massachusetts 4, New Hampshire 5, and Vermont 4. No bag limit is provided in Kentucky, Rhode Island and Virginia. Parties who expect to hunt quail in states where there is a bag limit should cut this item out and paste it in their scrapbook, as it will prove of value to them and enable them to keep within the law.

FLY-CASTING AT LOS ANGELES.

Oscar Lane and Earl Kennedy divided honors in the monthly fly and bait casting tournament of the Southern California Rod and Reel Club which was pulled off before a large and enthusiastic crowd of spectators at Eastlake Park on Sunday.

Mr. Lane, with a score of 99 per cent in the quarter ounce accuracy event, and a cast of 168 feet in the distance heave with the same weight, easily ranked first among the bait casters, while Mr. Kennedy, who won three of the fly-casting events and tied with Jack Low for the third, demonstrated that he was rapidly rounding into championship form, and this with less than a year's experience.

Si Perkins was unfortunate, his line parting at the crucial moment several times, and Sherman Baker won the two and one-half ounce distance event with the poor average of 193.8 feet.

Joe Welch showed improved form, following Kennedy's 99 8-15 per cent in the dry fly accuracy event with a score of 99 7-15 per cent.

Jack Low made a mark of 85 feet in the light tackle distance event which shows that he is improving rapidly in the game.

The summaries are as follows:

Light Tackle Accuracy Fly, per cent—E. J. Kennedy, 99 1-15, J. J. Lowe 98 12-15, C. Van Horne 98 11-15, Joe Welsh 97 10-15.

Light Tackle Dry Fly Accuracy, per cent:—E. J. Kennedy 99 8-15, Joe Welch 99 7-15, C. Van Horn 99 4-15, J. J. Lowe 98 11-15.

Distance Roll Fly, feet—E. J. Kennedy 68, Charles Van Horn 62, Joe Welch 59, J. J. Lowe 56.

Light Tackle Distance Fly, feet—E. J. Kennedy 85, J. J. Lowe 85, C. Van Horn 70, Joe Welch 66.

Quarter Ounce Accuracy Bait, per cent—O. Lane 99.0, E. J. Kennedy 98.1, Sherman Baker 96.7, H. A. Dichey 95.6, E. J. Herman 94.9, A. E. Perkins 94.7, C. J. Lenarth 91.8, A. Greenbaum 88.1.

Quarter Ounce Distance Bait—O. Lane, 159 feet, 8 inches; E. J. Kennedy 90:8, C. J. Lenarth 86, Sherman Baker 66:1, A. Greenbaum 60:6, E. J. Herman 23:8. Longest cast, O. Lane, 168 feet.

Two and One-half Ounce Distance—Sherman Baker, 193 feet, 8 inches; C. E. King 161:9, A. E. Perkins 137:8, G. Griffey 94:5, Frank Kohler Jr. 70:4. Longest cast, A. E. Perkins, 265 feet, 2 inches.

CALIFORNIA SCHUETZEN CLUB PRIZES.

The California Schuetzen Club distributed the prizes won at the forty-first annual prize shoot last Saturday night in San Francisco Turner Hall. The distribution was attended by the members of the club, their families and friends, who cheered the winners as they stepped to the platform to choose their prize.

President John S. Leutenegger, on behalf of the club, welcomed the guests most cordially, and introduced Philo Jacoby, founder of the club, as chairman of the evening. A social dance followed the prize distribution. Following are the winners of the principal prizes in the most important events:

Honorary target—William F. Blasse, A. H. Pape, A. Bodenschatz, A. Schwarz, Martin F. Blasse, F. Hildebrandt, Chris Meyer, John Frey, Louis Wille, E. Helm, W. G. Hoffmann, B. Jonas, George A. Pattberg, C. M. Henderson, Otto A. Bremer, A. J. Brannagan, W. W. Housner, J. H. Lewis, L. H. Halder, Adolph Strecker, C. B. Morris, Carl Abraham, Charles Ott, E. Schierbaum, E. H. Hollinger, F. Muehlbach, A. W. Lillie, Captain Joseph Straub, C. W. Jensen, John S. Leutenegger.

Ten best tickets—William F. Blasse, George A. Pattberg, C. M. Henderson, John Frey, A. Bodenschatz, A. H. Pape, Otto A. Bremer, C. Meyer, L. Wille, A. Schwarz, E. Helm, F. Muehlbach, Captain Joseph Straub, first bullseye in the forenoon; first 25, Otto A. Bremer; last bullseye in the forenoon, C. B. Morris; first bullseye in the afternoon, C. W. Lillie; last of the day, E. Schierbaum.

Playing Nurse to A Robin

SPORTSMAN FINDS ORPHAN AND HAS JOB ON HIS HANDS

Once upon a time I violated the laws of my state, and all on account of a bird. Now, don't smile. She wore feathers. I mean all over. I am blaming her, and yet she really was not to blame. It was a case like that of the blind horse that was guaranteed to be without fault. It wasn't her fault; it was her misfortune. I have been saying "she." She hight have been a he. I am not certain. Well, he, she or it was nearly dead when I found him on the saturated ground after a torrential shower. He was so nearly unconscious that he apparently did not know that a monster was picking him up. Neither parent was near to sound an alarm and it is doubtful if he would have heard if there had been.

I carried him home, placed him in a warm place and went hunting for worms. When I returned to the house the gentle warmth had revived him so that he eagerly took the tidbits that I dropped into his pacacious mouth from a pair of tweezers. Then followed the occupation of most of my spare time hunting for food for the smallest members of my family, and apparently its greatest eater. All the meal-worms in the neighborhood granaries and barns were confiscated. Every white grub in my garden that I could find was dug up and dropped into the insatiable gullet. Earthworms were pulled into pieces and sent after the others. Berries were taken as readily as worms and were more easily obtained. I would give him all he apparently wanted and in five minutes he would be crying for more. The maximum number of worms fed in one day was some more than a hundred, and that was probably fewer than his parents would have given him. Before I finished with him the matter began to get a little monotonous. Parent birds have nothing to do but hunt for worms. I had. Of course the little fellow felt no fear of humanity. The opening of his door was followed by a hop to my hand in expectation of a repast. One day we were upon the piazza and he was enjoying a confidential meal when the alarm of an adult robin was heard in the distance. Immediately his mouth was hermetically closed, a wild look appeared for the first time in his eyes, and he left me as fast as his clumsy, untried wings would carry him. I had little difficulty in catching him, but it was some time in the quiet and seclusion of the house before he forgot the danger-cry and would eat from my hand as usual.

Old birds teach their young to pick up food by finding a worm and repeatedly picking it up and dropping it until the watching youngster yields to the temptation to imitate, finds that it has a tidbit in its bill and swallows it. I was not able to do it in precisely that way. I held the food gradually lower and lower till he was obliged to pick it up instead of catching it on the fly. Then mocking-bird food was used with success along with what worms I could find. By that time he could fly and I decided that it was my duty as a law-abiding citizen to let him go. I was morally certain that with his lack of knowledge of how to hunt for food, ignorance of cats and general innocence, I was sending him to inevitable destruction, but I didn't know what some over-zealous game-warden might do in case he found him in my possession. So I fed him well, took him out to the orchard, put him on a low limb and went away. For a few minutes he appeared bewildered. Then he heard the danger-cry of an adult robin. It was again the call of the wild, and again he obeyed. I tried to approach him, but he flew from me as from an enemy. The next day I heard a cry that I imagined was his. I never saw him again. I have little doubt that he succumbed to one of the many dangers that constantly surround our feathered friends and about which I could not teach him. I have often wondered whether, so far as he was concerned, it would not have been better if I had left him to die when I found him. For myself, I am perfectly willing to let parent birds feed their own young.—Wm. M. Huse—American Game Protective Association.

RABBIT DRIVES SUCCESSFUL.

The Sacramento valley turned out in force to two of the most successful rabbit drives in its history last Sunday.

District 1002, near Franklin, in that county, offered as an attraction free shotgun shells to all who would attend ,and as a result about 2,000 rabbits were slain.

Arbuckle, Colusa county, was the scene of the other drive, which was attended by about 2,500 outside visitors, and there was a heavy slaughter of the farmers' pests.

Arbuckle has been working on its rabbit drive for weeks, and the elaborate preparations were carried through without a hitch. More than 600 automobile parties from points as far distant as Sacramento, and even San Francisco, attended the drive, and it spread so far that the prizes for the most killing could not be awarded. It is believed that 1,000 rabbits fell. C. B. Boxkius of San Francisco dropped the first rabbit.

After the drive, 2,500 persons were served stew and beans beneath the oaks south of Arbuckle. The feed had been cooking since Saturday.

At Franklin the rabbits were so thick at times that the hunting became a massacre. Some were killed with clubs.

No serious accidents were reported on either drive.

THE SHOOTING COSTUME.

Time was, and not so very long ago either (for the sport of trapshooting is comparatively youthful—particularly the clay target branch of the sport), when any old clothes would do in which to attend a tournament. Moth-eaten sweaters were clung to, much as an old guncase is—for the purpose of distinguishing the old-timer from the novice in the game, and also for comfort. But nowadays it is fortunately fase becoming the thing to dress just as neatly for a tournament or a club shoot as for the street. The same costume for the latter would do very well for the former, with the possible exception of the coat or shooting jacket. The coat must be loose and easy across the shoulders and under the arms; anything in the shape of wearing apparel that tends to hinder absolutely free action on the part of the arms is to be eschewed when shooting. Some coats and shooting vests have accordion pleats under the arms with just that very object in view, and these accomplish part of the object very well. A sort of Norfolk jacket with a box pleat down the back is a good thing, the pleat being held together at the back with thin strips of elastic, which give easily when the gun is brought to the shoulder, but quickly pull the pleat back into place when the gun is taken down.

No one style of shooting coat, jacket or vest, or even sweater, can be said to be the proper thing. The style and make must be left to the taste of the individual; the only thing that should be borne in mind is that the presence of ladies, both as spectators and as comrades at the score, is much to be desired, and that consequently no shooting costume is too good or too neat for the occasion.

* * * *

Catfish for Utah.—Fred W. Chambers, State Fish and Game Commissioner, has been negotiating with the Kansas State Fish and Game Commission for the past month in the hope of getting several thousand blue channel cat fish for planting in Utah lake, and announced last week that he believes his efforts will be crowned with success.

These cats grow to immense size, some weighing close to a hundred pounds having been caught in the Mississippi and its tributaries. They are a good eating fish and Chambers believes that by planting about five thousand of them in Utah lake, that body of water will be stocked in the course of about two years.

They are also an enemy of the carp and would probably succeed in thinning the lake of this species to a great extent.

* * * *

Merced, April 1.—The Rev. Father McNamara, who will be remembered by coursing men as the owner of a world-renowned greyhound, has died suddenly in this city of paralysis. Father McNamara was well known throughout California.

Among the most notable of his dogs were Rosie R. and Johnny R., both of which raced at Ingleside and Union Parks in San Francisco, and were considered almost unbeatable on the plains. Both dogs were descendants of John Rex, who in his day was even more famous than any of his sons and daughters.

Father McNamara raised greyhounds for love of the animals, and the racing of them he left to his friends, who however, were instructed that they must not bet on the results of the races, nor must they permit the animals to engage in any race which was not absolutely "on the square."

* * * *

Clarence Studers has reported to President Newbert of the Fish and Game Commission that striped bass are running good in the Snodgrass Slough section, and that in spite of the high water good catches are being made. Studers succeeded in hooking eleven bass with eleven minnows one day last week, and the fish were from nineteen to twenty?eight inches in length. Owing to the muddy condition of the water the fish will not take artificial bait at this time. All reports received by the Commission are that striped bass fishing will be excellent as soon as the water clears this year.

* * * *

While patrolling for violators of the fish and game laws early Monday morning, M. S. Clark, warden of the Fish and Game Commission, was painfully injured when he was thrown from his motorcycle. The accident occurred near Salada. Clark received a compound facture of the right arm and a number of bruises on the face and body. J. L. Bundoch, a deputy who was riding with Clark, escaped with a few minor scratches.

THE FARM

CAN DUAL PURPOSE CATTLE BE BRED?

[Continued from last week.]

If it were true that there was inherent antagonism from start to finish between milk and meat production in the same animal, then we could imagine difficulty in maintaing equilibrium in the transmission. But up to a certain limit, there is no inherent antagonism between the functions of making flesh and producing milk in the same animal. If that were so, the same animal would carry within it two warring elements even under normal condition—a conclusion that would be absurd. It is when supreme development is sought in either direction that antagonism becomes manifest. Where normal production leaves and extreme production begins in the same animal, it may not be easy to determine, but that good, even excellent production in both lines may be attained before the evidences of antagonism become marked, is evident from the high excellence attained in both lines of production in England.

Observe, those who claim that reliable transmission on dual lines cannot be secured rest this claim on theory. Can they point to a single instance in which cattle were bred, on correct dual lines, in which the transmission was invariably, or even generally wobbly in character? If they can they would have in such transmission a strong prop to their contention. But they cannot do so. While they have been contending that such equilibrium in the transmission of dual qualities cannot be maintained, the cattlemen of Britain have been maintaining them in some instances for more than a century.

How then may dual cattle be bred? On lines followed by successful English breeders. The cows will be milked and records kept of the production. In this way animals that fall short of a fixed standard will be discarded. If the cows are of mixed breeding, having been chosen chiefly on the ground of the evidences of good milk-giving that were present, the transmission may be more or less variable, but such variation will be speedily reduced with each generation.

The English breeder is most particular in the choice of the males which he uses in breeding. These males must be the progeny of a dam, and of a grandam, each of which has been abundant milk producers. Some breeders go farther back in the female ancestry in the search for high milk production. In this way the guaranty of transmitting good milking qualities by such a sire is secured. But the other side of the question is guarded with equal care. He must be an animal of good scale.

[Concluded Next Week.]

THE BEST LINIMENT
OR PAIN KILLER FOR THE HUMAN BODY
Gombault's
Caustic Balsam
IT HAS NO EQUAL

For the Human Body —Is penetrating, soothing and healing, and for all Old Sores, Bruises, or Wounds, Falons, Exterior Cancers, Boils Corns and Bunions CAUSTIC BALSAM has no equal as a Liniment.

We would say to all who buy it that it does not contain a particle of poisonous substance and therefore no harm can result from its external use. Persistent, thorough use will cure many old or chronic ailments and it can be used on any case that requires an outward application with perfect safety.

A Perfectly Safe and Reliable Remedy for

Classified Advertising

HOUSEHOLD SUPPLIES:—

"SMITH'S PAY THE FREIGHT"—to reduce the high cost of living, send for our Wholesale to Consumer Catalogue. Smith's Cash Store, 110-B Clay street, San Francisco.

POSITION WANTED.—Can fill engagement as trainer and race driver and give satisfaction in any position. 20 years experience racing in New England and Canada. Can get highest references as to all-round qualifications, or would open public stable in any place that looked good.
Address C. E. BERRY, Gardena, Cal., Box 16.

FOR SALE.—MONTBAINE 48667, by the great stallion Moko 24457, dam Krem Marie, one of the greatest daughters of Kremlin. Montbaine is a bay horse, sixteen hands, eight years old, a high-class stallion in every respect. One of the best bred and best individuals on the Pacific Coast. For price and particulars address W. SLOANE, Hollister, Cal.

RACE TRACK FOR SALE.

The Ukiah race track, located a little less than a mile from the Court House at Ukiah and bounded by the State Highway on the west, the county road on the south, and the Northwestern Pacific Railroad nearly the entire length on the east side of the track. The property consists of twenty acres. Fifty-nine good box stalls, good grandstand, fencing in good order, and one of the best half mile tracks in the state. An excellent winter track and an ideal place to work horses during that season. Plenty of adjoining drives for jogging horses. Two wells on the premises as well as water from the city water works, with tanks conveniently arranged for sprinkling.

This is the only race track in Mendocino county and the location of the county fairs. Ukiah is the county seat and has a population of about 3000, is in a most fertile valley in which all kinds of fruit, vegetables, hay, grain and hops are grown. Has excellent water; no malaria or mosquitos. It has paved streets, good sewerage, and splendid gas and electric light works. There are many standard and thoroughbred horses in this county and the people are a race loving lot. This property is offered for sale at a less price than adjoining property is held at. For terms and further particulars address
F. W. KELLEY,
Care of Breeder and Sportsman.

WANTED TO BUY—Trotter or pacer that can step 3 miles on ½-mile track in 2:12 or better. Mark no objection. Green pacing prospect and a mile galloper. Mares preferred. Price must be right.
L. I. GILPIN,
Richfield, Utah.

FOR SALE

Abbie McNutward (dam of Greatness (3) 2:10¼, her only foal trained) by Guy McKinney 37625, dam Lady Irene 2:14½ by Diablo 2:09¾, second dam Geraldine 2:16¾ (dam of Leata J. 2:03, etc.) by Mount Vernon 2:15¼, third dam Edith C. by Gen. McClellan 144, etc.; brown mare, foaled 1902, weight 1150, registered under Rule 1, Vol. 21, sound, handsome, gentle, fine driver but never trained, stand anywhere without hitching, has eighth foal at foot, a brown filly foaled March 29; also her black yearling stud, large, handsome and a great speed prospect; both colts by Derbertha Bells 60907.

Also a fine black yearling stud by Rapallo trial 2:07 trotting, out of Beautiful Bertha by Moormont 44996, grandam Abbie McNutward as above. Also others, everything standard under Rule 1. Colts all entered in Breeders' Stakes and for sale at bargain prices. Mare will be bred to Derbertha Bells if desired. Address for all further information
J. W. PENDLETON,
1601 Seminary Ave. Oakland, Cal.

This colt was bred by Thomas Ronan of Pleasanton and will be sold cheap. Address JOHN SMITH, Care of Breeder and Sportsman.

FARMS FOR SALE
Choice Land in Idaho

Lewiston, Idaho, is situated at the forks of Clearwater and Snake rivers and has transportation to the coast.

960 acres 7½ miles from Lewiston, Idaho, 4½ from Lapwai, Idaho, on main traveled road, all in cultivation except about 15 acres, all level land, just a little rolling, 320 acres of fall wheat in, 225 acres fall plowed for spring crop, about 30 acres in alfalfa. All fenced and cross fenced. Two good springs with big cement water troughs, well, windmill and cement reservoir, water piped to house, 7 room house, hot and cold water and electric lights. Large horse barn with hay mow in the center, electric lights in barn; cow barn with two box stalls; hog pens, shade trees, chicken houses, blacksmith shop, wagon shed, granary, outdoor cellar with bunk house overhead. $85 per acre; will take one-third down, time on balance to suit purchaser, at 7 per cent interest. One-third of crop goes with place if sold any time up close to harvest. Mild climate, can raise all kinds of fruit, grain and vegetables. Wheat in this country goes from 35 to 65 bushels per acre, barley 40 to 80 bushels per acre.

320 acres 4½ miles south of Vollmer, Idaho, 275 acres in cultivation, balance in pasture and timber, farm land lays practically level, one-third of crop goes with place if sold before harvest. Some fall wheat already sown. All fenced and cross fenced. Quarter section of it fenced hog tight; good four-room house, wood shed, and out of door cellar, nice grove around house, well at house, fair stabling and out buildings, spring and spring creek close to barn, three springs on place. Price $70 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

238 acres 4½ miles from Lewiston, Idaho, 175 acres in cultivation, 25 more can be cultivated, balance good bunch grass pasture, fenced and cross-fenced, good spring creek runs across place, small house, station on place for Johnson R. R., two grain warehouses at station. Price $70 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

160 acres of timber land, good farm land when timber is cleared off, all can be farmed except about 2 or 3 acres. Good timber, yellow pine and fir. Price $4000. 40 miles from Lewiston, Idaho. Well located to log off.

240 acres 6 miles from Asotin, 12 miles from Lewiston, Idaho, about 75 acres in fall wheat, about 75 acres more can be cultivated, balance in bunch grass pasture, two springs, small house, all fenced. Price $40 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

TO WIN

You want your horse made **SO SOUND** that the **"CURED"** part will stand up through "slips," "twists," "clips" from opposite foot,—through jogging, training, fast work, heavy tracks,—in short through every ordeal allied with **"RACING TO WIN,"—NOT** once—but **EVERY** time.

SAVE-THE-HORSE

(Trade Mark Registered.)

sound STRONG, but the EVIDENCE does just **THAT!** Not by the "skin of the teeth," not once in a while, not through luck and chance, **BUT**—positively and with unvarying continuity, **BECAUSE** it proves to have the adequate power and properties required under all such tests. This may leaves no chance for doubt.

WE ARE THE ORIGINATORS of the plan of giving a Signed Contract to return money if Remedy fails on Ringbone, Thoroughpin, SPAVIN, or any Shoulder, Knee, Ankle, Hoof or Tendon Disease

Regardless of Price or Any Other Reason, Save-The-Horse is the cheapest remedy known. It goes through and through both bone and tissue—it works inside, not outside—and produces a cure that withstands every test.

No Scar or Loss of Hair. Horse Can Work as Usual.

DOUBLE SERVICE Automobile Tires

Guaranteed 7,000 Miles Service

Absolutely Punctureproof

Double Service Tires are made double the thickness of the best standard make tires.

This 100% greater wearing surface naturally gives that much more mileage and service. The average of 12 miles of tough fabric and one inch surface tread rubber makes these tires *absolutely punctureproof.*

These tires excel all others for use in the country over rough and rugged roads as well as on hard pavements. They are as easy riding and resilient as any other pneumatic tire—the air space and pressure being the same.

They are the *most economical* and "care free" tires made and are used where tires must be depended on and tire troubles cannot be tolerated. Many *Double Service* style tires are in use in the U. S. government and European War service.

Our output is limited to a certain amount, but for a short time we offer the following reduced special prices as an **Introductory Offer:**

PRICES

	Tires	Tubes		Tires	Tubes
30x3 in.	$ 8.60	$2.30	36x4 in.	$17.45	$4.65
30x3½ in.	10.85	3.10	35x4½ in.	21.20	5.60
32x3½ in.	12.75	3.20	36x4½ in.	22.50	5.75
33x4 in.	15.75	4.20	37x4½ in.	23.60	6.20
34x4 in.	16.70	4.35	37x5 in.	26.30	6.60

All other sizes not included in above list also furnished. Non-skids at 10% additional.

Terms: Payment with order at above special prices, a 10% discount allowed on orders for two or more tires. All personal checks must be certified.

Try these tires now and be convinced of their very high qualities. Sold direct to the consumer only. *Descriptive folder upon request. Write for it.*

Double Service Tire & Rubber Co., Akron, O. Dept.

Makes Them Sound **SMITH'S WONDER WORKER** **Keeps Them Sound**

Allays fever and inflammation at once, this must be done to effect a cure. UNEXCELLED AS A REMEDY for bone and bog spavins, curbs, splints, ringbones, capped hocks, shoe boils, wind puffs, thoroughpins and bunches of all kinds, bowed, strained and ruptured tendons, shoulder, hip and stifle lameness, weak joints, sweeny, cording up, throat trouble and rheumatism. Relieves pains and soreness without loss of hair or a day's let up. As a leg and body wash it has no equal, invigorates and restores the distressed horse between heats and after hard workouts.

Price $1.50 per bottle, prepaid on receipt of price. $12.00 per doz.; $7.00 per half-doz.; $8 per gal. F. O. B. Tiffin, Ohio.

Harpers Weekly and The Breeder and Sportsman

$5.50 WORTH FOR $3.25

Breeder and Sportsman

One Year, 52 Copies, Regular Price $3

THE BREEDER AND SPORTSMAN is the oldest weekly journal devoted to the Horse west of Chicago, having been established in 1882. This interest, together with the Kennel, Gun, Fishing, Coursing and kindred sports receiving the most attention in its columns; together with Agricultural and Dairying Departments, under whose headings especial attention is paid to the breeding, etc., of Cattle, Sheep, Hogs, Poultry, and all other animals connected with stock raising.

As an advertising medium to Racing Associations, Horsemen, Stock Breeders, Manufacturers of Sulkies, Carriages, Wagons, Agricultural and Dairying Implements and Machinery, Sporting Goods, Fanciers, Stock Foods, and all others desiring to bring their wares to the attention of the classes to whose interests the paper is devoted within the field mentioned above, the BREEDER AND SPORTSMAN will be found indispensable.

Harpers Weekly

Six Months, 26 Copies, Regular Price $2.50

At no time has it been so evident to Americans as now, that the most important thing in the lives of all of us is the progress of the European War.

Next to your daily bread the war interests you most vitally. It may even come to be the most important part of your problem of living.

The periodical of greatest fundamental interest to you today is the one that can best report those phases of the war that come closest to your country and you.

Because of connections abroad and at home, HARPER'S WEEKLY is that publication.

As a critical commentary that presents inside facts, it is the necessary bridge for intelligent readers between the daily newspaper and the monthly review.

You want HARPER'S WEEKLY now. You can get it now on trial at a remarkable reduction.

Send $3.25 Now and Get Them Both

THIS OFFER is made to all who will send us $3.25 before April 30th, 1916, whether for extension of subscription, renewal of subscription or a new subscription. Address:

REID'S REMARKABLE RECORD

Adds Further Evidence of the Superlative Quality of

Peters SHELLS

Shooting at Registered Tournaments during the past four years L. H. Reid of Seattle, has made a phenomenal Record of consistent High Scores

1912—	2115 ex	2200,	96.14%, Pacific Coast High General Average.
1913—	3843 ex	4005,	95.95%, Pacific Coast High General Average.
1914—	2146 ex	2225,	96.44%, Professional Average for United States.
1915—	2482 ex	2550,	97.33%, Pacific Coast High General Average.
Total,	10,586 ex	10,980,	96.46%

During the above four years, Mr. Reid has shot at nearly 30,000 Registered and non-registered targets, breaking an average practically equal to the above. In accomplishing these results, he used about two-thirds TARGET (medium grade) and one-third IDEAL (high grade) shells, all with

"STEEL WHERE STEEL BELONGS"

ARROW SPEED SHELLS

WHAT A FLOOD of real shooting memories that name conjures! At the traps, in tight, binding races, when each load must pattern perfectly to win, Arrow Speed Shells bring home the bacon.

IN THE FIELD

WHEN WHIZZING Bob White or Valley Quail, racing like glancing shadows, fold up at the bidding of Speed Shells. And those wonderful kills up in the kite country — teal, mallard, "can" or red-head drop headlong when Speed Shells command!

FOR VETERAN OR NOVICE

ARROW SPEED SHELLS appeal with a smashing, hard hitting logic that is the last word in preparedness for gun-pointing forays. In twin tubes, pump or autoloading, Arrow Speed Shells function with a silky smoothness that is merely another asset of this perfect product.

THE REMINGTON ARMS UNION METALLIC CARTRIDGE COMPANY
WOOLWORTH BUILDING. NEW YORK CITY.

The 20th Indoor Championship Match *and* Prize Shoot

WON WITH

WINCHESTER

.22 Caliber Rim Fire Cartridges

The winning of this — the most important indoor shooting of the year — means more than simply another addition to the long list of triumphs to Winchester — the **W** brand of guns, ammunition, etc. It is convincing proof that the long and firmly established policy of Quality First, followed so religiously in the manufacture of Winchester goods, has not been relinquished an iota, notwithstanding the unparalleled demands made upon the Winchester company for its products during the last twenty months. It plainly shows that, no matter how unusual the condition, Winchester goods can always be relied upon. The big winners at the Indoor Shoot were as follows:

100 SHOT CHAMPIONSHIP MATCH

Won by L. G. Buss, score 2473, with Winchester cartridges and Winchester Telescope Sight. All of the first six contestants used Winchester Telescope Sights, and four of them Winchester cartridges.

RING TARGET CONTINUOUS MATCH

G. W. Chesley and H. Hunziker, shooting Winchester cartridges, tied with two other shooters, making five 75s—perfect score. Three of the four contestants in this match used Winchester Telescope Sights.

ZIMMERMAN TROPHY MATCH

Won by G. W. Chesley. Second, H. Hunziker. Third, L. C. Buss. All shooting Winchester cartridges. Mr. Hunziker made a perfect target of 5 degrees in his string, and Mr. Chesley one of 6 degrees.

BULLSEYE MATCH

Won by S. Murphy with a target measuring 7 degrees. Second, J. J. Young with a 7½ degree target. Third, C. Zettler with an 8 degree target. Fourth, G. W. Chesley with an 8 degree target.
All four place winners used Winchester cartridges.

FOR RELIABILITY AND RESULTS USE THE **W** BRAND

PARAMOUNT PARKER GUNS

Mr. Woolfolk Henderson, an amateur, by scoring .9753% made the
HIGHEST OFFICIAL GENERAL AVERAGE FOR 1915

Look...

Mr. Lester German, a professional, by scoring .9742% made
SECOND OFFICIAL GENERAL AVERAGE FOR SAME PERIOD
CLEAN SWEEP ON DOUBLE TARGETS
Messrs. Guy V. Dering, S. A. Huntley and Woolfolk Henderson won
FIRST, SECOND and THIRD,
respectively, by scoring 9000%, 8666% and 8400%.
THE WORLD'S RECORD!!!

Read...

At Atlantic City Sept. 15 to 17 Mr Lester German broke all Tournament Records by scoring 647 OUT OF 650 TARGETS, with one run of 372 straight, which is longest for the year.
PARKER GUNS have won the Grand American Handicap 9 times out of 25 offers, once with 100 straight, only time made. Also 7 out of 9 Interstate Championship Events with highest scores ever made, twice with 198 x 200 at 18 yards rise.
PARKER PACIFIC COAST RECORDS

Remember

In California Mr. Henry Pfirrmann won the Pacific Coast Handicap and Mr. J. Foster Couts won the Championship of California.
In Portland, Oregon, Mr. P. H. O'Brien by scoring 241 straight made the record for the Pacific Coast.

If interested in small bore guns write for instructive booklet which will be sent free on request. For further particulars regarding guns from 8 to 28 gauge, address

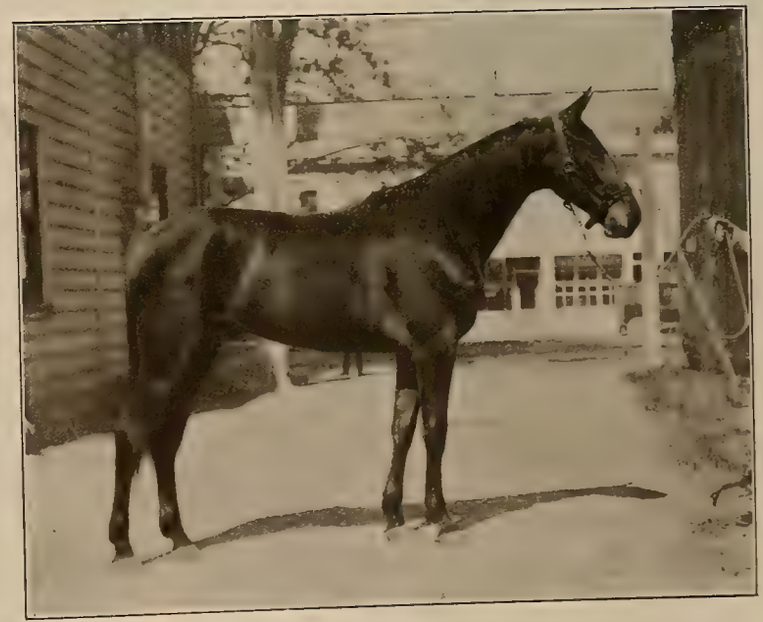
TRAINING THE HOUND

A PRACTICAL TREATISE ON THE TRAINING OF FOX HOUNDS, BEAGLES, AND COON HOUNDS.

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent. Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies. Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.



Price, in heavy paper cover, $1; $1.50, postpaid.

50 to Owner of Stallion, Sire of Winner of Three-Year-Old Pace when Mare was bred.

$150 in Special Cash Prizes was Paid to Stallion Owners in December, 1914.

ENTRANCE AND PAYMENTS.—$2 to nominate mare on December 1, 1914, when name, color, description of mare and stallion bred to must be given; $5 March 1, 1915; $5 November 1, 1915; $10 on Yearlings May 1, 1916; $10 on Two-Year-Olds February 1, 1917; $10 on Three-Year-Olds February 1, 1918.

STARTING PAYMENTS—$25 to start in the Two-Year-Old Pace; $35 to start in the Two-Year-Old Trot; $35 to start in the Three-Year-Old Pace; $50 to start in the Three-Year-Old Trot. All starting payments to be made ten days before the first day of the meeting at which the race is to take place.

SUBSTITUTIONS.

If a mare proves barren or slips or has a dead foal or twins; or if either the mare or foal dies before May 1, 1916, her nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there will be no return of a payment nor will any entry be liable for more than amount paid in or contracted for.

E. P. HEALD, President. F. W. KELLEY, Secretary,

P. O. Drawer 447. 366 Pacific Bldg., Cor. Market and Fourth Sts., San Francisco, Cal.

MR BROODMARE OWNER, do you realize the importance of the simple facts that sixty of McKinney's sons and nearly fifty of his daughters are producers of standard performers? That the McKinneys won more money than any other family in 1915? That the McKinneys won the largest percentage of the futurities, both east and west, in 1915? That McKinney has more sons to sire 2:10 performers than any other stallion living? Keep these facts in mind, and remember that I offer you the services of

THE VERY BEST SON OF McKINNEY

CARLOKIN 2:07 1-2

EXHIBITION MILE 2:05 1-4

Champion Trotter and Champion Sire of Trotters in the West

Reg. No. 36548. Licensed Pure Bred, Cert. No. 41.

Mahogany bay. Height 15.1½. Weight 1060.

Sire of ESPERANZA (3) 2:09, only three-year-old to win every trotting stake for that age on the Pacific coast, and also the following colt performers:

The Lark (4).....2:09½	Carsto (2) 2:22½
Ethel D. (3).....2:11	Helen Belle (2).....2:22½
Carl (3) 2:14¼	Carlschen (2) 2:23
Doctor S. 2:14½	Santiago (3) 2:24¼
Johnny Dugan p (3)2:16	May Marian p (3)..2:24¼
Hermes (2) 2:16½	Carlrich p (2).....2:24½
John Warwick (2) 2:17	El Carbine (2).....2:27½
Nicola B. (3).....2:18½	Eileen C. (3).....2:29
Miss Carlokin p....2:20	Carlos (2) 2:29¼
Carleta (2) 2:20¾	Fulton G. (2).....2:30

Carlokin is the best son of McKinney not only by performance but by breeding as well, his dam being the famous producer Carlotta Wilkes, whose ten performers include four with records below 2:10, while his grandam and great grandam were also producers, by Alcantara and Clark Chief. He has demonstrated that he sires more early and extreme speed than any other stallion in California, and his get are courageous race horses, endowed with soundness and wonderful vitality.

Fee: $75 the season, usual privileges; details on request.

W. G. DURFEE 2019 South Figueroa St. LOS ANGELES, CAL.

Saddle Horse Breeders are Respectfully Offered the Services of the Magnificent young Stallion

Le GRAND McDONALD

Reg. No. 6360, A. G. S. H. B. A. :: Licensed Purebred Cert. No. 2003.

Winnner WORLD'S JUNIOR CHAMPIONSHIP, P.-P. I. E.

Foaled in 1913, son of Grand McDonald 2228 (son of the world's champion Rex McDonald) winner of the championship of three states for the two years last shown; dam Queen Alice 10649 by Forest LeGrande 2107.

In service for the season of 1916 at the ranch of The Bridgford Company near Knightsen, Contra Costa County, at fifty dollars to a limited number of approved mares only

WILBUR LOU 2:10¼

Record made in third heat of winning race as 3-year-old.

A world's champion as a yearling, record (1) 2:19½; unbeaten as a two-year-old, a famous futurity winner at three, and at six years of age the "sire of the day" in California, his first crop of two-year-olds including

NATALDAY (2) 2:13½

Champion two-year-old race trotter of the Pacific Coast, winner of Pleasanton and State Fair Futurities, 1915

FIESTA LOU (1) 2:25, (2) 2:22½, pacer, halfmile track records, separately timed in a race in 2:14½.

GOLDSMITH LOU (2) 2:29, trotter, breeder's record on halfmile track.

BILLIE BOYD (2) 2:30, trotter, breeder's record on halfmile track.

SELMA PALEY (2) trial 2:26½, trotter, public trial on halfmile track.

Colts and Fillies by **WILBUR LOU** Always on Sale

Wilbur Lou is by the great race horse and sire Kinney Lou 2:07¾, out of the triple producer Louise Carter (3) 2:24, grandam the famous Ingar, dam of 6 including John A. McKerron 2:04½, etc.

Breed to him for "Horses that will race." Fee for 1916, seventy-five dollars with usual privilege or money refunded at our option. Write for detailed particulars, all information gladly furnished.—Licensed Pure Bred, Cert. 23.

HEMET, CAL.

Derbertha Bells

Licensed Pure Bred, Cert. No. 226

NO. 60907 :: A. T. R. RULE 1.

Derbertha Bells, foaled 1911, stands 15.3, weighs 1200 pounds and is a solid dark bay or brown of magnificent conformation, style and trotting action. His breeding, too, is of the best, tracing 20 times to Hambletonian 10—5 through Electioneer, 5 through George Wilkes, 4 through Strathmore and 4 through Abdallah 15 (the big four of the sons of Hambletonian) and twice through his daughters; balanced by 18 crosses to Mambrino Chief 11—five of these through his greatest son Mambrino Patchen 58 (leading progenitor of the dams of trotting sires); 25 crosses to Imp. Bellfounder, 8 to Henry Clay, 8 to Imp. Trustee, 5 to Pilot Jr. 12, and sustained by such other famous broodmare sires as The Moor, A. W. Richmond, Black Hawk, St. Clair, Geo. M. Patchen, Grey Eagle, Imp. Glencoe, Williamson's Belmont, etc. His broodmare inheritance is incomparably great—5 crosses to Green Mountain Maid (dam of 9 including a world's champion and 4 sires including Electioneer, the world's greatest trotting progenitor), 3 crosses to Alma Mater (dam of 8 and 7 sires, including Alcyone and Alcantara), and one each to Miss Russell (dam of 8 including Maud S. 2:08¾ and 6 sires including Nutwood, the world's greatest broodmare sire), Dolly (dam of 4 and 5 sires, including Director and Onward), Beautiful Bells (dam of 11 trotters including 4 world's champions and 9 sires) and Minnehaha (dam of 8 including a champion yearling and 6 sires). These are the greatest mares of history in number of descendants in the standard list, to which add two crosses to Bertha (the only mare with 2 in 2:04½, 5 in 2:10 and 13 in the list; with two 2:05 producing sons, five 2:10 producing sons and two other sons with produce only a fraction slower).

This pedigree contains the blood of 20 mares (counting duplicates) with an average of 9 performers each and presents an aggregation of family founding sires and dams unexcelled, if not unequaled. Neither is it necessary to confine ourselves to the standard or even to the 2:10 list, or go into the musty records of the distant past for examples of the prepotency of these blood lines in the production of speed, but we can easily and abundantly demonstrate their value in speed of the first flight in the present generation. He has 1 two-year-old and 2 yearlings that stamp him as a sire entirely worthy of his superlative antecedents, as they (like their sire) are uniformly large, handsome, intelligent, tractable and of great speed promise. Come and see them and the new crop and you will breed to him. Fee $25 the season with return privilege. Tabulated pedigree upon request.

J. W. PENDLETON,
1601 Seminary Avenue, Oakland, California

Don't Make a Mistake by not Breeding to the Great

KING LILLY POINTER

Registered No. 5223.

By the great Star Pointer 1:59¼, 3183, dam Lilly S. by Direct 2:05¼, 20113,—two world's champions for many years.

Second dam the great race and broodmare Lilly Stanley.

King Lilly Pointer is a green horse with remarkable speed. With very little work he has paced a mile on the Los Angeles track in 2:08¼ with ease. He goes without straps and has paced a half in 1:01¼ in third position all the way around, and has easily stepped quarters in 29 seconds. In another work out he went to the quarter in 30½ seconds, the second eighth in 14 seconds, finishing the last quarter in 30 seconds, going the seventh eighth in 14 seconds,—a 1:52 gait.

He is a seal brown in color, 15.2½ hands high, weighs 1100, and his get prove that he will be a sire of high-class race horses.

Fee $35 cash with return privilege, or right of substituting another mare. Best of care taken of mares, but no responsibility assumed for accidents of any kind.

Address for particulars, tabulated pedigree showing that he is the greatest bred pacing stallion in the United States,

W. H. NESMITH, 4218 S. Figueroa St., Los Angeles, Cal.

King Lilly Pointer can be seen at Los Angeles Exposition Park. Phone Home 28446.

Expressive Mac 2:25½

The Breeder and Sportsman has lost a valued and highly esteemed member of its staff. Mr. Will M. Neal, who has edited the horse department of this journal since the death of William G. Layng in November of 1914, has put aside the editorial pen to accept a position offered him by Mr. Andrew Albright Jr., owner of Prospect Farm, Hilton, New Jersey. Mr. Albright is largely interested in the Rubberset Brush Co., and Mr. Neal will be manager of the advertising department of that corporation and incidentally look after the farm's publicity matters.

Mr. Neal got his experience in harness horse matters in the office of the Western Horseman at Indianapolis, a journal of which his father, Dr. J. W. Neal, was formerly owner. During the time he was connected with the Breeder and Sportsman he not only acquired a host of friends among the California horse breeders and all others with whom he became acquainted but he made his department accurate and interesting. With a rare sense of humor and power of description that is seldom exceeded by a turf writer, he was always a gentleman and never unfair. That he may have taken a step that will lead to nothing but pleasant relations and a future fortune is the wish of everyone connected with this office.

The largest breeding establishment in the United States if not in the world devoted to the rearing of horses for racing purposes is that of John E. Madden, at Hamburg Place, near Lexington, Ky. The farm comprises 2,240 acres, on which there are now 235 broodmares. About thirty of these are trotters and the others are runners. In the campaign of 1915 the offspring of stallions and mares at Hamburg Place won 325 races, worth $295,000. In the last seven years the get of Mr. Madden's stallions have won $1,605,000 in purses and stakes. W. E. D. Stokes, the estate of L. V. Harkness and a good many other breeders have more trotting mares than are at Hamburg Place, and there are more thoroughbred mares in the Melton Stud, at Thetford, England, but it is believed that none of these establishments quite equals Mr. Madden's when it comes to the whole number of broodmares in use.

A most encouraging sign is that lists of entries in the early closing events offered by the eastern harness racing associations are filling with twenty-five per cent more nominations than were received last year.

J. W. Wakefield of Lodi has purchased from Fred T. Lauterwasser, of this city, the old hero of many hard fought battles on the mile and half-mile tracks, Happy Dentist 2:05¾. The Nutwood Wilkes gelding made his record six years ago but is still going sound and on a good day and track can pace right at his record. The warm climate of Lodi should agree with him and we do not doubt but Mr. Wakefield will ride in front in more than one matinee race this summer.

SANTA ROSA FAIR GETS BREEDERS' MEETING.

August 7th to 12th is the time and Santa Rosa the place where the Pacific Coast Trotting Horse Breeders' Association will hold its meeting this year. There will be eight or nine purses of $1000 each for trotters and pacers, in addition to the four divisions of the Pacific Breeders Futurity which are the big features in colt racing on this coast every season.

The big annual fair of the Sonoma, Marin, Mendocino and Humboldt Agricultural Association is to be held at Santa Rosa on the dates above mentioned, and on Tuesday of this week, President E. H. Brown of the Sonoma County Chamber of Commerce accompanied by Messrs. J. P. Overton, Joseph Grace and Ney L. Donovan, representing the association, came to San Francisco and met in conference with Directors John A. McKerron, Robert S. Brown, I. L. Borden, E. J. Molera, Chas. W. Paine and Secretary F. W. Kelley of the P. C. T. H. B. A., in regard to this association furnishing the harness racing program. The Breeders organization has agreed to give a four days' program of $1000 purses, and the biggest district fair held in California in years is now assured.

Those who attended the fair of 1913 given at Santa Rosa under the same management and auspices will recall the big success and splendid exhibits, speed contests and attendance. In fact the attendance broke all records for the Santa Rosa fair grounds. The plans laid out for this year insure an even greater success.

Agricultural fairs are being recognized all over the United States in progressive communities as big features in the development of all resources. When properly conducted they lead to improvement in all kinds of live stock, to the production and the marketing of better fruits and grains, to more thorough and more modern methods of farming, to the establishment of new manufacturing plants and the upbuilding of every enterprise pertaining to the advancement of the country.

In a New England state four years ago, the first extensive exhibit of draft stock ever seen at one of its successful fairs was made by a Chicago firm of importers. Heavy drafters had not been very popular in the hills of New England where the farms are generally small, but the aforesaid firm was induced to ship a big consignment of stallions and mares all the way from Chicago to the New England fair and the result was that 22 stallions and mares were sold in that section as a result of that exhibit, and the increase in the value of New England farm stock from those sales will run into hundreds of thousands of dollars within the next few years.

A California manufacturer of traction engines informed the writer recently that every exhibit he had ever made at California fairs, and he has never exhibited elsewhere, has resulted in enough sales (which he believed would not have been otherwise made) to pay for making the exhibits many times over.

The money appropriated by a city or a county for premiums to be paid exhibitors comes back to the community a hundred fold.

It is a matter for congratulation that the Santa Rosa association and the citizens of that county have from experience come to a realization of the fact that a good annual fair is an asset, and that it will bring in much more than it costs as well as make for improvement and advancement in every line of industry it encourages.

The Santa Rosa fair will be one of the big events of the coming season in California, and the Pacific Coast Trotting Horse Breeders Association pledges itself to make the amusement end of it which its races will furnish as clean and high class as the tracks of California have ever seen.

A SAFE INVESTMENT.

The editor of this paper has information at hand that one of the finest race tracks in the State of California is about to be cut up for city lots. This property should be kept intact as it is one of the fastest tracks in the United States and is conveniently located. The parties owning that track would rather see it kept in its present form as an adjunct to the town than to see it destroyed. Anyone interested in making a valuable investment will please communicate at once with the proprietor of this paper and he will obtain more information about the property.

SAN FRANCISCO HORSE SHOW.

The second annual Horse Show of San Francisco will be held at the San Francisco Riding School on April 27, 28 and 29, for the benefit of two of our most worthy charities, viz., the San Francisco Polyclinic and the People's Place.

It is extremely commendable for the two philanthropic organizations to foster the coming Horse Show in view of the fact that in many cities the horse interests have been diverted to the more rapid mode of transportation, the automobile, at the expense of the pleasure derived from man's best friend, the horse.

The first show which was held in February, 1915, for the benefit of the People's Place, was a great success, and all are looking forward to the second annual Horse Show being a far greater success, both from the point of entries and attendance.

The entries this year are of a much higher class than the previous year, for the reason that many of the horses that came here for the Panama-Pacific International Exposition were sold here and have remained and will be shown in many of the classes.

It is regretted that the army will not be so strongly represented as at the previous show for the reason that the officers of the cavalry troops are on the border of Mexico. It is, however, gratifying to know that the young folks are taking a keen interest in the equestrian art. The children's classes this year will more than double in number those of last year. The most interesting feature will take place on Saturday afternoon, when the two children's classes, commanded by Oscar Romander, will be presented, one class for children under 14 years and another for the young folks up to 18. The most important event will be the children's jumping classes. There is considerable rivalry in this class, and we are looking forward to very keen competition for the coveted blue ribbon when this class is called.

The Company B. Signal Corps will present a drill of 32 of their picked men, commanded by Captain Frank J. Sullivan.

The Monday Night Equestrian Club, commanded by Captain J. Dilhan, will present a drill by advanced riders.

A most interesting feature will be the polo games. There are four teams entered to play; two will play on Thursday night and two on Friday night. The victors of Thursday and Friday nights will play for the championship on Saturday night.

The San Francisco police will open the show with a drill by the mounted officers of the force, after which the other classes will be judged according to program.

There will be roadsters, heavy harness classes, combination horses, thoroughbred saddle horses, Kentucky five gaited saddle horses, California stock horses, hunters, jumpers, polo ponies, ladies' jumping classes, cavalry officers' mounts, a Marathon race to the Cliff House and return and the class for the best lady rider of the show.

There are 44 classes in all, and with the special features added, the program should be of good variety and give the horse-loving public an opportunity to see king horse in his glory where he rightfully belongs.

Among those who are exhibitors at the Horse Show are: Messrs F. E. Abecassis, George Armes, Dr. Geo. Boskowitz, John A. Coghlan, Edward Cebrian, Louis Cebrian, Arthur Dolan, J. L. Deahl, E. M. Doyle, Herbert Fleishhacker, Mortimer Fleishhacker, E. Courtney Ford, S. L. Goldstein, P. S. Grigsby, Ed. Graney, Martin Hanley, E. E. Hohfield, G. S. Hawkins, E. S. Heller, Jacob Stern, D. E. Hoffman, J. M. Kidd, H. Levy, Leon Liebes, G. A. Merchant, G. W. Mordecai, Thos. M. Nelson, A. W. Pike, J. F. Quinlan, Dr. J. C. Quinlan, Gus. Skeeley, Aaron L. Sapiro, Edgar J. DePue, S. J. Vally-Valenty, Captain J. Dilhan, Dr. Sol. Hyman, Joseph C. Meyerstein, Julius I. Cahn, Oscar Romander, Bilan von Feducha, C. Heller, Walter S. Heller, Dr. F. C. Keck, Henry Edwards, A. J. Titus, Everett N. Bee, M. S. Nickelsburg, A. Holmes, Samuel E. Kramer, Woodland Hackney Stud and San Francisco Riding School; Mesdames Sol. Hyman, Joseph Dilhan, Geo. E. Macdonald, Leota I. Zapp, C. H. Kirby, and the Misses Estelle Healy, Mary MacDonald, Grace Lane, Kate Brigham, Kathleen Long, Mary Andruss, Edith Goldstein, Jean Wheeler, Helen St. Goar, Jeanne Silverberg, Miss Helen and Master Blair Foster, Miss Ethel B. Davie, Miss Margaret C. Weigert, Miss T. M. O'Connor, Miss B. E. Davies.

The 2:10 Colt Trotters of 1915

Ever since colt trotters began entering the 2:10 list I have been particularly interested in that sort of speed for the reason that it seems to me only logical that some day our fastest trotter will be a three-year-old. In the matter of speed development, the English thoroughbred and his descendants easily outclass all other horses, and it is a fact established by centuries of breeding that the highest type of the thoroughbred is produced at three years.

It used to be argued that, while colt trotters (that is, two and three-year-olds) might eventually acquire as great a rate of speed as an aged horse, the youngsters never would be able to carry that speed as well for a mile, and, therefore, the record at the standard distance adopted for harness racing always would be held by a matured performer. When Arion, in 1891, took a two-year-old mark of 2:10¾ to high wheels, it was seen a new sort of colt trotter had arrived, and when, in 1893, Fantasy crossed the 2:10 line as a three-year-old, putting 2:08¾ on the blackboard, the additional fact that there were flying fillies as well as stallions of phenomenal speed among the colt trotters became apparent. In the succeeding two decades there has been a wonderful increase in the number of colt trotters of class for the reason that early speed meant quick sales at remunerative prices, and the idea became so dominant that the training of yearlings to perform over the mile distance was taken up seriously by both breeders and trainers, with the result that the record for that age gradually was lowered until we have a yearling trotting record of 2:15¾, and the unpleasant spectacle of hundreds of baby horses annually trained for a performance at which only one or two in a hundred possibly can excel, with the inevitable result that scores of them are crippled beyond repair.

But in the meantime the speed-carrying ability of the colt trotter has been nourished and developed until now we have a two-year-old stallion and two fillies of the same age with records, respectively, of 2:04½ and 2:07¾, while the three-year-old mark for colts is 2:03½, and for fillies, 2:05½. These figures clearly indicate the truth of the idea given to the public some time ago by Dr. J. C. McCoy, to-wit—that the male trotter—the stallion—eventually will be at the top in the matter of records. Also it goes a long ways in suggesting that the three-year-old trotter, following the path blazed by the thoroughbred of like age, eventually will be at the top in the speed department. For a time (when 2:10 by a three-year-old had not been achieved) a filly (Sunol) led decisively in the colt trotting world, her 2:18 at two years and 2:10½ at three (1888-1889) preceding the phenomenal performance of Arion. A filly (Fantasy) was the first three-year-old to beat 2:10, and another of the sex (Native Belle) was the first two-year-old to cross the line which their predecessors had found it impossible to reach. Also a filly (Miss Stokes) was the first yearling trotter to beat 2:20, but now the best records for yearlings and two and three-year-olds are held by colts, Airdale being the top yearling, while Peter Volo stars as the best two and three-year-old.

The results of the 1915 campaign in the matter of producing 2:10 or better trotters among the two and three-year-olds is very interesting when viewed in its entirety, since no less than nineteen three-year-olds performed in 2:10 or better, while a pair of two-year-olds were added to the select list, they being Volga 2:07¾, and Bingen Silk 2:08¾. One of those miles—that of Volga—tied the record for her age and sex, set some years ago by Native Belle, and the mile by Bingen Silk is the best by a two-year-old stallion, with the single exception of the 2:03½ of Peter Volo. And although the tale of Peter's surpassing greatness as a colt trotter has more than once been told in this column, it is only fair, in the present consideration of the matter of colt trotting, to repeat that he stands alone in that department, holding the champion records at one, two, three and four years, with only one of those marks (his 2:19 as a yearling) lowered. His 2:04½ at two, 2:03½ at three, and 2:02 at four stand out boldly among the records of the trotting turf with such unique prominence and are fortified by so many conditions which could have been created only by a giant among colt trotters that it is doubtful if, taken as a whole, they ever are beaten. That is, to merely equal them there must appear a colt trotter which not only shall hold as fast records at one, two and three years of age, but each of those performances must be a world's championship for the age when made. And that will prove the stickler. There are angles to this matter which seem to me of great interest, and some day I hope to find the time for the delving and the other dreary preludes to some varieties of literary effort that are indispensable to success.

As for this season's colt trotters of the 2:10 or better brand here is a list of them, all but Volga and Bingen Silk being three-year-olds. The sire of each and the family to which that side belongs is given.

Name.	Record.
Mary Putney	2:05½
Deroche	2:07½
Volga (2)	2:07¾
Binland	2:08¼
Rusticoat	2:08¼
Colorado Range	2:08½
Straight Sail	2:08¾
Bingen Silk (2)	2:08¾
Vincent Todd	2:08¾
Bacelli	2:09¼
Peter Belmont	2:09¼
Prinelda	2:09½
The Colorado Belle	2:09½
Onward Forbes	2:09½
Humfast	2:09¾
Northspur	2:09¾
Petress Burton	2:09¾
Miss Pierette	2:09¾
Henry Todd	2:10
The Exposer	2:10
The Royal Knight	2:10

The two outstanding features of the colt trotting of 1915 are the tieing of the records for two-year-old fillies (the 2:07¾ of Native Belle, made in 1909) by Volga, and the lowering of the mark for three-year-old fillies to 2:05½ by Mary Putney, and in her case as well it was a mark set by Native Belle (2:06½) that had to be overcome. And right here it is worth noting that both Native Belle and Mary Putney were bred at the same establishment, Walnut Hall Farm, and that the sires of the pair, Moko and San Francisco 2:07¾, still are owned there. And it is further worth observing that San Francisco, whose stud career has only just begun, not only has the champion three-year-old filly to his credit, but had another of the same age (Northspur) take a record of 2:09¾ this season, while his four-year-old son, St. Frisco 2:07¼, showed himself a veritable bulldog for gameness, as well as a speed merchant of extra quality.

Peter the Great 2:07¼ and Colorado E. 2:04¾ are the only stallions other than San Francisco to have two three-year-olds enter the 2:10 list this eason, and for this reason this trio of sires stand out from all the others. San Francisco had the undisputed champion among the three-year-olds, Mary Putney winning all her starts with ease, while, for the first time in many years, Peter the Great had no dominating son or daughter in that division of the colt stakes. But, on the other hand, his daughter, Volga, was just as much a champion among the two-year-olds as was the San Francisco filly in the elder division, while Peter Volo set a new record for four-year-olds. And as Bingen 2:06¼ furnished the fastest two-year-old stallion of the campaign, the honors in that respect are pretty well divided.

A number of the youngsters in the above list took their records in time trials, not being, for one reason or another, ready for racing in the big stakes, and among them there is likely to be a sensational performer, just as Mary Putney proved to be among the two-year-olds. Her two-year-old record was 2:24¼, and, when the season ended and speculation as to the probable best three-year-olds of 1915 was rife, her name was not mentioned, yet she won all her engagements and set a new record for her age and sex. Sparkle Watts 2:10½, who was generally acclaimed the best two-year-old of 1914, died. Native Spirit 2:09¾, who easily was second best, and who was the only two-year-old of the season to be marked under 2:10, was clearly off form at three, and the same can be said of Henry Todd (3) 2:10, who lowered the record for two-year-old geldings to 2:11¾, and, by trotting a half in 1:03, showed that for pure speed none of the others had anything on him. There were three exceptionally fast and game two-year-olds, and yet at three bad luck kept them in the shade.

Rusticoat, after he had won at Cleveland, trotting the last half of one heat in 1:02¼, and then breezed a mile in his winning race at Grand Rapids in 2:08¼, looked to be the best three-year-old by a considerable margin, but sickness kept him in the barn. Colorado Range 2:08½ is another member of the hard luck brigade. He is the steady going type of trotter that always gets some of the money, but in addition to these qualities he had speed of a high order, as McDonald timed him a half in a race in 1:02. A colthood injury, which affected his hind action, probably kept Colorado Range from being a 2:06 three-year-old, but he nevertheless is a great card for his dead sire, and he also is a fine example of the potency of the Prodigal blood in the female line, his dam, Erirange 2:21 at two, being a daughter of that horse. On account of his size and lack of finish, a good many

Border Knight	Electioneer

of the experts did not fancy Colorado E. as a sire, but Mr. A. B. Coxe took the big colt after his three-year-old campaign was ended, and, by mating him with a very choice lot of broodmares, gave the son of The Bondsman a wonderful start as a sire. To have a pair of three-year-old trotters enter the 2:10 list when their sire is but eight years old is a distinction acquired by but few stallions, and, while Colorado E. is dead and gone, the fact that he was a whale among sires of his age in the matter of begetting extreme colt speed should by no means be forgotten. Moreover, it calls attention to The Bondsman (sire of Colorado E.), himself a colt trotter of undoubted class, because that horse gave the turf Grace Bond 2:14¼ as a two-year-old, 2:09¼ at three, a winner of both divisions of the Kentucky Futurity. Then came Colorado E. 2:04¾, world's champion three-year-old trotter, so that The Bondsman must be credited with a son and daughter, each a marvel of colt trotting ability in its day, and one of them, on the showing of Colorado Range and The Colorado Belle as three-year-olds, has won high credentials in the breeding ranks, the entire episode once more showing what a truly great sire and progenitor Baron Wilkes (sire of The Bondsman) was, not overlooking the important fact that the dam of The Bondsman (Sorrento, by Grand Sentinel) is in the very front rank of broodmares, and that her sire, Grand Sentinel, gave us Santos, the dam of Peter the Great.

Humfast 2:09¾ is another of the three-year-olds whose real quality is likely to be overlooked by all but the first-class observers. She was a very close second to Mary Putney in that 2:05½ mile, and from the way Murphy drove the heat it is my impression he did not think his filly could win, so laid all his plans with the sole idea of beating the rest of the field, which he did handily enough. Humfast will have a lot to say about the races in which she starts as a four-year-old, and another one of this class is Deroche 2:07½, because I happen to know Mr. Geers regards the son of John A. McKerron 2:04½ very highly and is to have charge of him another year. I did not see enough of the others to have an opinion as to their merits, but Straight Sail, which went a time record mile at Lexington in 2:08¾, made a tremendous hit with a friend of mine who saw her perform, and his notion is that she will rank with any of the four-year-olds of 1916.

Of course, the talked about two-year-olds of the present season are Volga, Bingen Silk and Walnut Tree, with the daughter of Peter the Great always first choice, and it really does look as though she should hold her fields about as safe at three as she did at two. For, remember, Volga was not trained by Andrews to see how fast she could go, nor was she

raced in any way save that of winning each heat by a safe margin. On that programme she won a first heat in 2:07¾ and the next in 2:09¾, two faster consecutive miles than are to the credit of any other two-year-old filly, their average being 2:08¾. I am well aware that the 2:08¾ mile of Bingen Silk was an impressive performance, and that the last half in 1:03¼ carried a lot of people off their feet. In fact, the editor of one prominent turf journal, recording his impressions of the two-year-old Kentucky Futurity, calmly states, and tried to prove, that Bingen Silk was the sensation of the event, although Volga beat him all the time and Walnut Tree also took a hand at the game. I admired Bingen Silk greatly. His appearance compels admiration, and his gait is something to rave over. Also he has "the lick"—in other words, he is a wonderful colt trotter—but not so good by a considerable margin as Volga (in competition with him) showed herself to be. So, if all hands have decent luck in the matter of health, I look for Volga to be the best three-year-old. On the form of 1915 any other conclusion would be a joke.

[By H. T. White, American Horse Breeder.]

EXCESSIVE SCORING EVILS.

A vast amount of talk is being indulged in at frequent intervals regarding the establishing of a rule to do away with protracted and needless scoring. While it is not at all likely that anything will come from the discussion, it is nevertheless true that much valuable time is lost and great injustice done many horses by continued scoring. The writer is of the opinion that few persons connected with the turf have ever considered the matter of extra distance traveled by trotters or pacers while scoring. Had many writers given the subject due consideration we are quite certain that they would not dismiss the idea of lessing the number of false attempts at starting with the somewhat short and crusty expression, "It can't be done." Nothing of this nature is impossible, and the discussion of the subject may lead to improvement.

Taking an eighth of a mile as a basis, and the majority of horses cover this distance every time they come down for the word, we have prepared the following table, showing just how far a horse travels before he starts for the heat, provided, of course, that he is not sent away on the first score:

A horse scoring once trots	⅛ mile
A horse scoring twice trots	¼ mile
A horse scoring three times trots	⅜ mile
A horse scoring four times trots	½ mile
A horse scoring five times trots	⅝ mile
A horse scoring six times trots	¾ mile
A horse scoring seven times trots	⅞ mile
A horse scoring eight times trots	1 mile
A horse scoring ten times trots	1¼ miles
A horse scoring twelve times trots	1½ miles
A horse scoring fourteen times trots	1¾ miles
A horse scoring sixteen times trots	2 miles
A horse scoring twenty times trots	2½ miles

The writer calls to mind a four-year-old colt that, after scoring twenty-two times, laid down and died. It was reported at the time that the cause of death was heart failure, but as this much-abused term resembles charity, inasmuch as it covers many sins of ignorance, it might truthfully be written that he died from an overdose of damn foolishness.

As the above table applies only to the pole horse, it is evident that the fifth or sixth horse from the pole covers more ground. Ten feet is about as near to the pole as the second horse generally gets, which makes the distance which he covers in trotting a mile many feet greater than that trotted by the pole horse. Allowing seven feet between each of the horses engaged in scoring, and we find that the fifth horse while scoring eight times has actually trotted a hundred and twenty-one yards further than the pole horse. Should he be unfortunate enough to score twenty-one times, as did the colt referred to, the horse in question would trot three hundred and eight yards further than the pole horse before receiving the word "Go," and should he hold his position during the entire circuit of the track he would add an extra hundred and seventy-six feet to the distance traveled. Let a horse score six or eight times each heat of a long-drawn-out race, and it is quite evident that he will have needlessly traveled many a weary mile. If the horse had his say in the matter he would certainly be in favor of reducing the number of scores.—Exchange.

Drink Jackson's Napa Soda.

WHAT DOES THE PUBLIC WANT?

"Where ignorance is bliss, 'tis folly to be otherwise," said a modern wag in making fun of one of the ancient axioms. And I never realized just how forceful that was until quite recently when a certain well known trainer electrified a party of intelligent horsemen by declaring most emphatically that what the public really wants is the old fashioned three in five system of racing.

However when you understand that this trainer attends but one race meeting a year and that Lexington, you will perhaps agree with me that he was taking in altogether too much territory and that speaking so briskly for the whole wide world, he might possibly be in error.

I am not sure that any one or body of men, know all that all the public wants in the way of sports and amusements, but I believe I am safe in saying that there are a few of us, who have made a real study of the situation, who can give some interesting facts in connection with this much mooted subject.

In the year 1900, now sixteen years agone, I began to give some attention to this matter, becoming connected with the Memphis Trotting Association in 1902, since that date having been attached to various racing associations, turf papers and kindred harness horse organizations. It has been my mission during this run of the years to do a lot of daily newspaper work and I have "covered" among the outdoor sports harness races, running races, base ball games, hockey, athletic meets, etc. While basket ball, indoor base ball, roller polo, boxing and the like have demanded my attention indoors, through the fall and winter months.

Through a close association with these deversified sports and a constant mingling with the public that has paid its way in to witness them, I have come to one certain conclusion and that is that the public wants speed, action and a snappy, bang-up finish to everything in the sporting line.

Now let us go over several of these pastimes and see if we cannot ascertain why they are so popular with the great mass of people.

First take base ball. All the games are advertised to begin at a certain time and what is more that is when they begin. The public knows that nine innings is the most a game can go, unless something unexpected happens. Here is a sport that is figured down to a mathematic fine point, with action every minute of the game.

Then take boxing. Every fan who pays his way into a boxing tournament knows in advance just how many bouts he is to see and how many rounds each one is to go. He knows that the men box three minutes and rest one. No uncertainties, no delays, no foolishness.

The same thing applies to basket ball, indoor hockey, roller polo, etc. These games are played in periods of so many minutes each and the fan before going into the building knows just how long the game will last and how much time he will have to spend there.

Take the great college game of football and aside from the sentimental attachment to each game what is it that draws countless thousands to the gridiron? Nothing on earth but the quick, snappy, decisive action. And furthermore if at the end of the allotted period for playing the game, the contending teams are tied, that is where the game ends and spectators are not asked to wait far into the stilly night, as in the case of harness racing, for a verdict.

We are living in that kind of an age now. The New Yorker who has to go to Chicago on real business takes the Twentieth Century limited because it lands him in Chicago in record time, albeit that slower trains are just as finely equipped. In the days before the war, European travelers took passage on the Lusitania or the Mauretania because those ocean greyhounds were the speed merchants of the sea.

Scoff as you will at the thoroughbred game, but you cannot deny that the quick, up and away, soon settled race, is what attracts the devotees of this sport.

"Action, action, give us action" is what the public cries at all times and that is what the modern up-to-date amusements purveyors are endeavoring to provide. Each year the men who guide the destinies of the great outdoor pleasure resorts try to find some new, exhilarating, almost death-dealing ride, patterned after the old style roller coaster. Why do they do this? Simply because their patrons demand it.

And so should it be with those who promote harness race meetings. Cleveland had the courage to try the three heat system of racing, presenting it to a public that had been crammed with the old army game for half a century, and the results were startling. I ask you then, wherein does the public at any other Grand Circuit town differ from that of Cleveland? People are the same the world over.

If they are not, why do they attend every sport in every city, conducted along identically the same lines, and I reiterate, lest you forget: Baseball, football, boxing, tennis, golf, polo (ice and roller), basket ball, running races, etc. From New York to San Francisco and from Duluth to New Orleans all these sports, and many others that escape me now, are conducted in the same manner and the public attends in droves. What's the answer?

And now if you are not satisfied, let us consider the value of the three heat or dash system of racing from a speculative standpoint. There is not a track manager today who operates under the old three-in-five system, who does not honestly believe that he is giving his betting patrons a run for their money. But the truth is that he is not, for such a thing is a physical impossibility under the 1812 system of racing. I am not one of those who delude myself into believing that all of such racing is on the square. We all must admit that under the three-in-five system every driver wins when he gets good and ready to win. However, the track manager has invited the public in to wager on the heats, knowing in advance that they possibly cannot outguess the drivers. Result: THE TRACK MANAGER IS FLEECING THE PUBLIC.

But with the three heat system or dash racing in vogue, with a larger sum of money to be raced for each successive heat and an added sum given to the horse standing best in the final summary, sharp practice is reduced to a minimum and a track manager can ask his guests to wager on such events and still be able to sleep nights.

I guess this is about all. If you think I am romancing start out this summer and attend every sporting event of every kind you possibly can. Make more than a superficial study of the situation and learn for yourself WHAT THE PUBLIC WANTS.

I assure you it will be a revelation.—Ted H. Kline in the Breeders' Journal.

When the story of General Pershing's pursuit of the elusive Pancho Villa is told it is likely to rank among the greatest cavalry races on record. The horses of both pursuers and pursued seem to have done something remarkable in the way of forced marches through a country which must have tested the rustling qualities as well as the endurance of the equine warriors. Pershing's troopers are mounted on horses purchased for the most part in the open markets at Kansas City, St. Louis and Chicago for about $150 each. Villa's bandits are riding the hardy little ponies of the country through which they are retreating. They are surprisingly small as to height, many of them appearing to be well under 14 hands, while few seem to much exceed that size. For the rough, hard service they are in, with little to drink, less to eat and long distances to go, day after day, there is perhaps no creature of the equine race that can match them. The high bred horse of the European government studs may outpace them, but a ride that would kill him will not disable these little runts of the ranges. Their ancestors have had to struggle with too many hardships and endure too much grief for them to be easily killed, while the well bred horses have been warmly housed and artificially handled for so many generations that when they go to war they want a hay train to accompany them.

◈ ◈ ◈

Lady Dilham and Elegant Dilham, those pony hackneys that have been unbeatable in the eastern show rings for years, and are so far along in years that their ages cannot be determined by their teeth, were sold at auction in New York April 4th, for $4,800. The first named is the most perfect high stepper ever seen in a show ring in this country and is a perfect beauty in action.

◈ ◈ ◈

The American Saddle Horse Breeders' Association will probably restore that rule for registration to its stud book which permitted the registration of the progeny of a registered saddle stallion and a recorded thoroughbred mare, the rule to be effective January 1, 1917.

◈ ◈ ◈

At an annual sale of Percherons held by a Pennsylvania breeder during the first week of this month, 32 head averaged $458. There were 26 mares in the sale and they averaged $514, top price being $800, paid for a stylish black mare.

◈ ◈ ◈

$525 was the average obtained at a sale of Clydesdales held in Illinois this month.

◈ ◈ ◈

An average of $450 was obtained at a sale of thirty head of Percherons, Belgians and Shires held at Cedea Falls, Iowa, recently.

Notes and News

Breeders meeting goes to Santa Rosa.

◈ ◈ ◈

It will be held in conjunction with the Santa Rosa Fair.

◈ ◈ ◈

The dates are August 7th to 12th inclusive with racing the last four days.

◈ ◈ ◈

All the purses for trotters and pacers will be of the value of $1,000 each.

◈ ◈ ◈

All harness races at the Breeders meeting and the State Fair this year will be three heats and no more.

◈ ◈ ◈

Horses can thus be started oftener than under the old three in five plan and consequently earn more money.

◈ ◈ ◈

The total amount of purses and stakes to be hung up at the Santa Rosa meeting will be $15,500. The program will be out next week.

◈ ◈ ◈

Secretary Chas. Paine of the California State Agricultural Society is arranging a program of harness events that will be mighty attractive to horse owners. He will have it ready for publication shortly.

◈ ◈ ◈

Reamy Macey is now training for E. T. Bedford, proprietor of Green Farms, Connecticut.

◈ ◈ ◈

Walnut Hall Farm announces that the book of San Francisco 2:07¾ is full for the year 1916, and all further applications for services for this season must be refused.

◈ ◈ ◈

Every year about this season there is much expression of doubt as to whether there will be a California harness racing circuit extensive enough to warrant training a string of horses, and every year by the first of July a pretty fair circuit is arranged.

◈ ◈ ◈

The half-mile track just north of the Sixteenth street station at Oakland is being put in order again for the road drivers of that city who enjoy a brush with their horses once in awhile. It is not a "billiard table" half mile but the boys have a lot of sport there Sunday mornings.

◈ ◈ ◈

Eight weeks of racing for purses aggregating $75,000 is the attraction offered by the North Pacific Circuit this year. Entries for some of the events will close June 1st, and a postal card addressed to John Pace, Secretary, 1209 Alaska Building, Seattle, will bring you a stake book containing all particulars.

◈ ◈ ◈

The Messina Springs, New York, Driving Club offered early closing purses for two and three-year-olds, to race next September. Twenty-eight two-year-olds, and twenty-six three-year-olds were named when the events closed last month. There is no slump in the trotting game in that neck of the woods.

◈ ◈ ◈

J. Macy Willetts, of New Marlboro, Mass., has offered a $100 cup for the first pure bred Hackney that trots in three minutes over a regulation track, another cup valued at $150 for the horse of that breed that makes the best time under three minutes this year, and a third for the Hackney trotting the greatest distance in 30 minutes during 1916.

◈ ◈ ◈

American Saddle stallions predominate in Kentucky. Returns from 74 counties show that of 1,017 stallions licensed, 406 were American Saddle stallions, 73 Trotting stallions and 20 Thoroughbred stallions. 518 were grade and unclassified. There are estimated to be 41,000 mares in that state used for breeding.

◈ ◈ ◈

Over 600,000 horses have been shipped from the United States during the past year for use in the European war. The best that have been taken were for use in the field artillery. As these horses averaged about $150 each to the sellers, this means ninety million dollars spent for horses alone, to say nothing of the vast amount paid out to get them across the Atlantic and into service.

◈ ◈ ◈

Riverside District Fair will be held from October 10th to 14th, both dates inclusive. Mr. O. P. Sanders, secretary of this enterprising organization, writes that it has been holding back for over a month waiting for other organizations to select dates so that no conflict would occur, but feels that the printing and distribution of its premium lists cannot longer be delayed, and consequently has definitely fixed on the dates named above. Mr. Sanders adds that he "regrets exceedingly that there cannot be better organization of the fair officials throughout the state, as he feels there is much to be gained by full co-operation." This is true but the Riverside association has taken the only sensible course and if every fair organization would do likewise it would be better for all concerned. There is nothing gained by waiting for those who have not made up their minds whether they will get up and go to work or turn over and take another nap.

The Kentucky Futurity has 932 nominations, an increase of 82 over last year. Yes; the trotting horse business is looking up.

◈ ◈ ◈

Charley DeRyder left Pleasanton Thursday with two carloads of trotters and pacers consigned to the Indianapolis sale which opens the first week in May. Here's hoping for a safe trip and good prices.

◈ ◈ ◈

W. G. Durfee's horses are being liberally entered all through the Grand Circuit, and it is dollars to apples that they will bring home a fair share of "the bacon."

◈ ◈ ◈

Bids have been authorized by the United States Army for 5,000 cavalry and 1,200 artillery horses. The contract will be let May 7th, and inspections will be rigid.

◈ ◈ ◈

Al Boyle of Tacoma, Washington, owns a two-year-old filly by Almaden D. (Charley Durfee's former colt stake winner) that is said to be a very fast young trotter.

◈ ◈ ◈

Williams, a green pacer by Caution, dam Birdie by Meredith, owned by Dan Barclay of Walla Walla, is expected to be one of the good things of the season in the northwest. He worked in 2:09¼ last year.

◈ ◈ ◈

Despite Peter Mac, Mabel Trask, Trampright, etc., the Pastime Stable owners have an idea that Bacelli (3) 2:09¼ will win some races that will look well on paper, when the summaries are made out.

◈ ◈ ◈

Work horses are selling in France at the present time at from $400 to $500 for average animals. An embargo has been placed on the exportation of all horses, which will not be lifted until the war is over.

◈ ◈ ◈

R. J. Wilson, the Indiana horseman and starting judge, died at his home in Rushville April 1st, after a lingering illness from Bright's disease. He was a brother of Dick Wilson, the well known trainer who formerly resided in California.

◈ ◈ ◈

Mr. C. W. Shaw, secretary of the Alameda County Milk Dealers' Association, is looking with much admiration these fine spring days on a very handsome filly foal presented to him April 3rd by his brown mare, Baby by Tanglewood. The filly is by that elegantly bred stallion Derbertha Bells owned by J. W. Pendleton, of Oakland.

◈ ◈ ◈

Mr. G. Cuneo of 701 Washington street, Oakland, owns the promising colt Bond Boy, eligible to this year's Pacific Breeders Futurity Stake, that he would like to give to some responsible person to have trained for the event. A letter to Mr. Cuneo at the above address may lead to a deal that will be advantageous to both parties.

◈ ◈ ◈

From the manner in which Carlokin's 2:07½ standard list is growing year after year, this son of McKinney looks to be about the surest horse in the country to breed to to get a trotter. He has 21 in the list already, only one of them that was four years old when making its record, and the rest two and three year olds. That is surely "some" sire. Carlokin was himself a colt stake winner, a race horse afterwards, and is now a sire of race horses. What more is wanted in a sire?

◈ ◈ ◈

The old Sheepshead Bay race track property, which was recently converted into an automobile speedway, will be a "frontier village" next August. Harry S. Harkness, part owner of Walnut Hall Farm, Everard Thomson and E. A. Thomson, admirers of trotting horses, are at the head of a syndicate to convert the property into a typical western town of 60 years ago, showing the real ranch and camp life of those days. Fifty thousand dollars will be distributed as prizes in contests that will be arranged, including a cross-country, 1,000-mile race to determine the endurance of the present day range horses, each of the 25 participants being allowed to use but two mounts to cover the distance.

◈ ◈ ◈

There are more than 100 horses in training at the Goshen half-mile track at the present time, and when the season is in full swing there will probably be close to 150 located there. The weather has been such that training operations have not begun yet, says the Horse World, all of the work the horses have taken so far being on the roads. There is no denying the fact that Goshen sets the pace—and the fashions—for the double-O tracks, and the example she sets in the matter of stakes, purses, treatment of horsemen, etc., is one worthy of emulation by any and all half-mile track associations.

There are more wealthy men connected with the Goshen plant, perhaps, than any other track in America, and it is only natural that they should have only the best that money can buy and that capable men of experience can devise in the way of track and track equipment; but they are not selfish in their desires, and extend a free and cordial hand to the horsemen and the general public to come in and enjoy and participate in the pleasurable sport of light harness horse racing, over a track as good as can be made, and for purses with liberal conditions attached that have been made to accommodate all classes. It is proper to add also, that the invitation has not been overlooked or neglected by either the public or the horsemen.

W. J. Andrews has not yet resumed activity in the sulky, but his health is improving constantly, and his return to his profession is but a question of time.

◈ ◈ ◈

Expressive Mac 2:25½, sire of three with records below 2:08, is certainly a bargain at $25 for the season. He is in the stud at Selma where good pasturage can be had at $2 per month.

◈ ◈ ◈

A colt that is by The Bondsman out of one of Thomas Ronan's best bred mares is offered for sale cheap. He is three years old and worth much more than the price asked. Enquire at this office.

◈ ◈ ◈

It only costs $25 to breed a mare to Derbertha Bells 60907, oue of the best individuals as well as one of the most wonderfully bred stallions in America. See advertisement.

◈ ◈ ◈

If you like horseback riding you will never get the extreme pleasure out of it until you ride one of your breeding and rearing. Send a good mare to that magnificent young saddle stallion LeGrand McDonald this year and there is every likelihood that you will get a colt that it will be a pleasure to ride when it is grown. LeGrand McDonald is a grandson of the world's greatest champion saddle horse Rex McDonald, and himself a winner of the world's junior championship at the recent Panama Pacific International Exposition, besides being the champion of three states for the two years last shown. Look over his advertisement on the second page of this issue of the Breeder and Sportsman.

◈ ◈ ◈

A good investment for any farmer or other person who has a place for a few horses is offered by Mr. J. W. Pendleton, 1601 Seminary avenue, Oakland, who has more horses than he can afford to keep. The mare Abbie McNutward (dam of Greatness (3) 2:10¼ her only foal trained), with a filly foal at foot and a yearling stud, both by the elegantly bred horse Derbertha Bells. Also a yearling colt by that fast trotter Rapallo, trial 2:07, and from Beautiful Bertha by Moormont. Here are three youngsters that will grow into good money above the price asked for them and a producing mare that is bred in the very best of producing lines. The colts are all staked and the prices asked for them is ridiculously small. Drop Mr. Pendleton a line and get further information.

◈ ◈ ◈

It is so plain that it is difficult to pass without noticing the additional attention that secretaries are paying to the events for youngsters in this year's events, says Western Horseman. Not only are the associations with mile tracks including two, three or four events for two and three-year-olds in their programs, but half-mile track associations are including like events, which in former years failed to pay the slightest notice to the juveniles. It is a fine tribute to the growing importance of juvenile racing, and also a proof that owners and trainers are alive to the possibilities that lie therein, for there is no stimulus that lies within the reach of horsemen themselves that will exert such a beneficial influence on the breeding industry as more colt racing, both of trotting and pacing youngsters.

MR. HARRIMAN BUYS NALA.

That sentiment is not dead, at least in the hearts of sportsmen, was proven at the Durland sale in New York last week, when Mr. Joseph W. Harriman bought in his old favorite show horse, Nala, and turned him over to his former trainer, "Jack" Donnelly, to be shipped by him to Mr. Harriman's farm in New Jersey, where he will spend the remainder of his life at ease.

Although sadly blemished by an enlargement of one of his knees, the splendid old high-stepping champion showed up in fine form, and the query went round the auction block as to why a man having the means to possess so beautiful a creature should put him to the risk of possibly going into hands that would mean his degradation. No one let it be known, of course, but the friends of the consignor naturally felt that the latter must have made some provision against such an unsportsmanly contingency.

Nala is a standard and registered trotter and was regarded as the heavy-harness horse par excellence of the American trotting family, and was always cited as an illustration of the trotter's versatility, although advocates of the English Hackney maintained that he was one of the exceptions to the rule and therefore to be classified as an anomaly.

It has always been deeply regretted that he could not have been used in the stud and become the fountain source of an American breed of shapely, stylish carriage horses.

If Mr. Harriman had not been the one to obtain the horse, there were several fine sportsmen present, actuated by his same noble motives, who would have saved the animal from commercial hands.

Mr. Harriman's bid, and the only bid made, was $500.

Nala won the championship in heavy harness four times at the National Horse Show in Madison Square Garden.—Rider and Driver.

EIGHT WEEKS OF HARNESS RACING SURE.

A circuit of harness races that will be well worth training horses for is certain for California this year.

The Trotting Horse Breeders' Association will lead off at Santa Rosa during the week of August 7th to 12th, with $15,500 in purses and stakes.

Dixon, a real live horse center that has a good half mile track but has not given a regular meeting for twenty years, proposes taking the week following Santa Rosa and has definitely announced its dates as August 16, 17, 18 and 19.

Woodland, where one of the best and fastest mile tracks on the Pacific coast is located, and which has never yet given a poor meeting, will doubtless take the week following Dixon. No certain announcement has been made by the Yolo people but they have a live commercial organization which we understand is considering giving as good a fair as was ever held in that county, and of course a good race program will be the chief part of the amusement end.

The California State Fair with $20,000 already announced as the amount to be hung up for trotters, pacers and runners, has selected September 2nd to 9th inclusive as its dates and the fair will be the greatest ever held in California.

The Alameda County Fair will be held at Pleasanton the week following the State Fair, and there will be a program of harness races at California's training center or four-fifths of the people who live in that section of Alameda county will be too sick to attend the fair.

The big Fresno Fair will probably follow Alameda, then will come the Kings County Fair at Hanford, and the Riverside Fair in October.

Ventura will repeat its big success of 1915 this year and will take the same week as Pleasanton, but the two places are so far apart that they can easily occupy the same dates, there being plenty of horses in California to supply both programs.

The Arizona State Fair at Phoenix will open November 13th for a week's racing, which will give California horsemen an opportunity to race there after their home racing season has ended.

As nearly all the horses in California will be ready to race by the middle of July there is a splendid opportunity for enterprising towns where mile or half-mile tracks are located to give meetings that will attract large entry lists.

The California Circuit of 1916 will certainly provide eight or ten weeks of racing, and it can be made much longer with a little action and enterprise.

Racers bred in France do not understand English, and this fact is causing the trainers, hostlers and stable lads a heap of trouble. A few of the trainers and many of the older jockeys have been employed from time to time in France and their services are in demand as interpreters at the tracks these mornings. The situation would be wholly farcical but for the owners' fear that they will not have the highly valued imported horses properly groomed and ridden through the lack of understanding between the men and the French equines.

When an exercising boy wants a racer to stop he forgets his lessons and shouts, "Whoa!" The French horse understands only "Gardé" and breaks into a faster gallop unless the jockey is strong enough to check him by main strength, or, which is seldom the case, happens to recall the French word he needs.

"Get up!" shouts another boy, as he urges his mount from a walk into a canter, but the horse, who has his ears cocked to hear the order "Allons!" maintains a snail-like rate of progress. Then the boy starts something, and the trainer has an uneasy moment until he restores peace between horse and rider.

"Swipes," as the hostlers are always dubbed about the racing stables, have even greater woes. The French horses, in their ignorance of good old race-course slang, simply won't "get over there," or "come, back up now!" or "quit your kicking, dang you!" but continue to baffle by a stupid misunderstanding the painstaking efforts of the stable hands to currycomb, brush down or to saddle and bridle their charges.

No sign language has so far been discovered to bring about a mutual good understanding between the human beings and the French horses. The owners and trainers are in a quandary, for slow training will have the horses backward in condition when the time comes to send them to the post. Meantime, every barn o' nights is an experimental school of languages.

LIVE HORSE NEWS FROM SACRAMENTO.

Mr. John A. McKerron, who to the regret of every horseman on the Pacific Coast has retired from active business in making and selling the best harness and horse boots ever used in this country and who in an unguarded moment accepted an offer for his fine fruit farm in Santa Clara county, is finding it extremely difficult to "kill time" these days. After 40 years of active and successful life in San Francisco, he feels "like a fish out of water" with so much time on his hands. One day last week he, in company with the popular veterinary dentist, Dr. I. B. Dalziel, made an auto trip to Pleasanton, Stockton, Sacramento and other towns in the interior. Mr. McKerron says he was highly entertained at the State Fair track at Sacramento, where a large number of trotters and pacers are being put in condition for the races this year. The track is in fine shape and the horses are showing remarkable speed for this early in the season.

Lon Daniels has no less than 16 head in training for Charley Silva and they have about decided to try conclusions with the trotters and pacers on the other side of the Rocky Mountains this year. Mr. McKerron states that Daniels has more speed in his stable than he has ever developed this early and at the same time his horses are in good shape, strong and healthy. Potrero Boy 2:06¼ has only been a mile in 2:14 but he has paced a half in 1:01 so handily that Daniels is confident he will lower his record whenever it is necessary. The four-year-old Colonel Mazuma has paced a mile in 2:09 and a half in 1:02. Mr. McKerron saw him turn the track in 2:12 very handily, with Bondalean 2:06¼ behind him all the way. Little Jack, a three-year-old trotter, has shown a mile in 2:25, half in 1:11 and a quarter in 33½ seconds. Mr. Daniels says the best three-year-old pacer he has ever handled is Stanley Quinn, a brown gelding by Dan Logan 2:07½. He has been a mile in 2:13 so nicely and shows so much class that he looks to be a sensational member of a very sensational family. The two-year-old Col. Ansel has shown a quarter in 34 seconds. San Felipe 2:09¼ is as good and perhaps a little better than he ever was. He has trotted a nice mile in 2:13 with a half in 1:02 in which he acted like a race horse. Kid Cupid 2:08¼ is also in fine order; the fastest of his work has been a mile in 2:11, half in 1:02 and a quarter in 30 seconds. Bondalean 2:06¼ paced a workout mile in 2:12, and showed a half in 1:02 with a final quarter in 30¾ seconds that was not all she could do by considerable. John Malcolm 2:09¼, last year's fastest four-year-old gelding, looks to be this year's fastest five-year-old, as he showed the last half in 1:01 in a mile in 2:12, which is probably the fastest half any pacer has shown this year. The trotter Con Brino 2:10 has a lot of speed, a half in 1:04 being within his capacity. He has been a full mile in 2:12. The two-year-old pacer Merrill has shown a half handily in 1:10 and is most promising. These horses have all been at work since about the first of February.

Walter Tryon has Mr. S. H. Cowell's string in working order. Rastus 2:05¼ has paced a mile in 2:12¾ with the last quarter in 30½ seconds; John Mac 2:12¼ has worked a mile in 2:16, coming from the half mile pole easily in 1:06, and Albaloma 2:08¼ trotted a mile in 2:12¾ with the final quarter in 30½ seconds. Geo. Woodard 2:07½, Panama 2:10¼ and the two Peter the Great colts are all doing nicely. Dixon Boy, that son of The Patchen Boy that worked the Sacramento track last winter in 2:08, has not been asked to cover a mile this spring better than 2:15, but he paced a half in 1:02½ with the last quarter in 29½ seconds, the other day, and looks like a real race horse.

John Quinn has not given his charges any stiff miles as yet, but is occasionally letting them march through the stretch at racing speed. The green mare which Mr. M. L. Woy of Fresno sent him this spring and which had shown a mile close to 2:10 at the trot, is working nicely but has not yet been let down for any speedy miles. A three-year-old by Moko Hall has been a mile in 2:29, and Mr. G. W. Davis' mare by Demonio has shown 2:24 with a quarter in 31 seconds at the pace. W. A. Perley, a two-year-old by The Proof 2:10¾, is a very likely colt; then there is a four-year-old and a three-year-old by Ray o' Light 2:08¾ that have worked in 2:24 and 2:27 respectively. A green mare by Sir John S. is considered quite a prospect.

Wm. Ivey, Jay Frank, Chris Jorgensen, Tom Holmes, James Thompson and others have horses and colts in training that much could be said about, but Mr. McKerron was called away to attend a meeting of the P. C. T. H. B. A., of which he has been a director ever since that association was organized, before our representative could get any more notes from him. He and Dr. Dalziel both speak in the highest terms of the way in which the State Fair grounds and stables are being kept and believe the State Fair of 1916 will be the best ever.

A LITTLE CAYUSE MARE.

She was only a little cayuse mare. A present on his fourteenth birthday, some ten years before. She had been the companion of his boyhood. She carried him to high school. It was with the mare and the new red buggy, and right proud was he of both, that he ventured to call on his first girl. And in later years the little mare went with him to college and still later she was shipped to Montana to help in making that new home in the West.

Gentle, affectionate, always to be trusted, she had been the boy's best friend during those all-important years when childish illusions are laid away with tops and blocks and the other playthings of life's early days; she was still his comrade when the youth emerged into the man.

And now under the fitful, wintry sunlight, with the chill wind congealing the tears that slowly followed one another down his cheeks, he was slowly rounding up the frozen earth that marked her last resting place.

To the boys on the ranch she was only a cayuse mare, growing old and worthless; to him she was more than most people—comrade, companion of a hundred happy escapades of childhood, the last link which bound him to those boyhood days when life seemed so simple, the friend who never betrayed him.

To the ranch men her death was merely an incident. To him it was a tragedy. And who is there that shall call him less of a man because the tears welled up at the loss of this friend of the days when life was young? How often has this scene been repeated since the days when man and horse first came together?

Down from the days before history was first carved on Egyptian stone, from the days when legends and traditions were handed from father to son, from bard to harper, come tales of the love of a man and his horse.

Man wrought civilization, but not by himself alone. Ever at his side, working steadily, suffering with him and willing to give life itself in his service, was man's best friend—the horse.

No one could calculate what the world would have been without him. He alone made possible the conquest of the prairie. He brought the first men, hauled their food and supplies, rounded up their cattle and turned their sod. Even in this day of marvelous mechanical devices for performing farm work he is still indispensable as in the early days of the pioneer.

It is a far cry for some of us, from the heart of the dusty city to the vastness of a wind-swept plain; from the cushioned seat of a limousine to the swaying creak of a saddle, yet it comes to us all at times. At times it comes to the city bred man who has never bestrode a horse just as strongly as it comes to you and me, who were raised on horseback; it is that instinctive love, bred through the years of many centuries; the love of a man for his horse. The passing years take their toll from all of us, they destroy many of the illusions that are with us when first we start out in life; yet the love and trust of man and horse go hand in hand until the end.—Great Falls Farmer.

An instance of hitting the nail squarely on the head is the following from the New York Rider and Driver: "Efforts to prevent the 'reckless driving' of automobiles by licensing all drivers, men, women and children, professional and amateur, is like shooting the 'innocent spectator' in a riot of thugs. It is not the person with 'little experience in handling automobiles' who does the mischief but the very expert who will take chances which the others, through timidity, would never dream of risking. Police efficiency and not more legislation is what is needed—arresting the reckless driver the same as a disorderly person would be arrested in a peaceful assembly."

In answer to an inquiry by Howard D. Kerr of Sacramento: Little Brown Jug was a brown gelding foaled in 1875 and took a record of 2:11¾ at Hartford, Conn., August 24th, 1881. He was sired by Tom Hal Jr., dam Lizzie, dam of Brown Hal 2:12½, by John Netherland, grandam Blackie by John Hal.

Thoroughbred Matters

TWENTY LEADING SIRES IN AMERICA IN 1916.

So far this year the sons and daughters of Marta Santa have raced so industriously and so effectively for the credit of their daddy, that he is now leading the American sire list. Moreover, such a sum is already accumulated in his name that he is practically certain to figure high up in the list when the statistics of 1916 are compiled, says Daily Racing Form. For the whole of last year his progeny won a total of $49,007, which placed him ninth in the list of twenty. Now at this early date he stands credited with $20,345 and is far in advance of his nearest rival, which just now is Dick Welles. This latter old-time Chicago favorite has fared well of recent years and rumor has it some of his two-year-olds coming on are of great speed and promise. He begat a Kentucky Derby winner in Wintergreen early in his stud career. Next to Dick Welles is the reliable and ever prominent Star Shoot, and close up to him in money won, but only a few hundred in advance of McGee and Marathon. It is interesting to note that the two veterans, Cesarion and Sain, hold places in the select list of twenty, while the three-times premier, Broomstick, is not represented. However, so far as the latter is concerned, few of his progeny took part in the winter racing. He will be heard from presently when the big money of the turf is being contended for. Just now our twenty leading sires and the names and earnings of their representatives are:

Sire.	Performers.	Sts.	Races Won.	Amt.
Marta Santa	31	293	55	$20,345
Dick Welles	22	168	35	11,935
Star Shoot	27	191	27	10,580
McGee	16	154	28	10,385
Marathon	6	79	8	10,005
Plaudit	13	110	22	9,410
Peep O'Day	19	147	23	9,180
Cunard	13	149	22	8,970
Yankee	12	99	20	8,060
Hastings	14	154	17	7,760
Solitaire II.	16	138	21	7,655
Bonnie Joe	12	93	25	6,975
Abe Frank	11	111	19	6,880
Cesarion	10	85	17	6,350
Nasturtium	12	90	19	5,815
Sain	10	106	11	5,745
Stalwart	10	86	13	5,695
Mazagan	9	105	17	5,645
Dr. Leggo	11	93	15	5,300
Kenilworth	6	68	13	5,195
Totals (20)	280	2,519	428	$167,885

Marta Santa, b h, 1896, by Martley—Luxette, and his five largest winners are Doctor Larrick, $2,865; Jessie Louise, $1,300; Moller, $1,250; Talebearer, $1,235, and Skeets, $1,150.

The oldest horse racing in America at the present time is Budweiser, which won a couple of races during the Hot Springs meeting. He is sixteen years old and seems to be a marvel of the turf. The last time on record that Budweiser started before the late Hot Springs meeting was at New Orleans on March 26, 1906, and he ran eleventh in a race won by J. Ed Grillo. He was owned at that time by W. E. Walsh. Many inquiries have been received asking where the horse had been during this long interval. Lou and J. C. Cahn raced the horse around St. Louis, getting him from Captain J. C. Bunbury, who bought him from Joseph Lucas, who bred the horse in Missouri. Walsh is given as his last owner. George Moore, the present owner, bought him at Waco, Texas, from an unknown negro, who said he had raced the horse at Shreveport, Maringonin, La., and other places. So Budweiser must have been putting in that ten years racing at bush meetings in Louisiana and Texas. The horse was not permitted to start at Hot Springs until properly identified. Certain characteristics markings were readily noticeable and the Cahns quickly identified him.

The hunter Ravello brought $3,000 at auction in New York April 4th, and Sir Braxton, a weight carrying saddle horse, brought $2,650, at the same sale.

One of the aspects of the season's racing about New York that is expected to heighten the general interest of the public will be the appearance for the first time in every big race of horses bred in England or France. The animals had been hurried to this country because the war has put a stop to the racing activities of the owners abroad. In other seasons the appearance of an isolated starter with a foreign pedigree and reputation in any race has always been a potent attraction to racegoers, and, with the appearance of the French or English horses on the daily cards, every stake will become an international contest.

The fine weather of the week has enabled the trainers to begin moving their horses at fast gallops at Belmont Park, Gravesend and the Empire City tracks, and nearly two hundred foreign racehorses are in the strings being exercised. The two-year-olds predominate, the muster tallying to 140, but thus far, while conceding that there are some good looking ones in the invasion from abroad, the owners who have nothing but home breds to depend on have not become panic stricken at all.

No individual youngster or aged horse among the importations at work, in the opinion of owners of home-breds and trainers, may be favorably compared to such three-year-olds as H. P. Whitney's Bromo or August Belmont's Friar Rock, or with the four-year-olds Regret and Trojan. Everything that heightens the public appreciation of racing is an augury of bright hopes to the owners, whether they have only homebreds in their strings or not, and thus far they regard the unprecedented international racing complications as a straw to show the season is to be of exceptional brilliancy as to the attendance of the public and the class of the racing.

The owners of two-year-olds and older French or English bred horses in training at the three tracks include C. K. G. Billings, William R. Coe, James Butler, A. K. Macomber, H. P. Whitney, Irving Wheatcroft, Frederick Johnson, Grant Hugh Brown, Gifford A. Cochrane, Archibald Barklie and F. Watterson, of the Mirasoll Stable.

There are forty imported two-year-olds entered, to treat only of one division of the international aspect of racing, in the Jamaica stakes, fifty-eight in the Belmont Park events, sixty-six at Empire City and seventy-five at Caratoga. Each race day this season is likely to recall the thrills of the international polo cup matches.—Tribune, April 9.

Thomas Hitchcock who breeds all the steeplechase horses he races, trains them as two-year-olds although the racing rules prevent horses of that age being started in jumping events. He holds that a high rate of speed on a hard track is infinitely more injurious to the legs of colts than being put over the jumps. "I break and school my yearlings over the sticks," says Mr. Hitchcock, "at the same time of year that trainers are giving their youngsters destined for flat racing their first try-outs at that game. Even the best of these trainers express surprise when I assure them that my yearlings stand up better under cross-country schooling than the average of flat racers do. I average fewer horses which develop splints and bowed tendons among these youngsters than do the yearlings put to extreme speed for a quarter of a mile in their babyhood. It is the pace that kills, not the jumping.

"I am perfectly aware that experiments defy precedent. Regular army officers, hunting men, and breeders interested in the development of serviceable horses for officers' chargers, for cross-country riding, and for sport, have done me the honor to say they believe I am on the right track. They find my horses are sound, with good legs and feet, and that they take to jumping as naturally as a duck does to swimming, once they learn what is required of them. Horses broken as yearlings leap into their natural stride and very rarely stumble or 'come a cropper' unless rushed at a fence by a careless or overanxious groom or jockey.

"Taught to jump from the time it is bridle-wise, a horse is surer footed and more adept at going over obstacles cleanly than the older horses sent to 'chasing' after two or three seasons at flat racing. You find a parallel in golf. A boy will learn the game quickly, thoroughly, and play an almost perfect game before he is fairly out of knickerbockers. A man of my age rarely learns it so that he can compete with the youngster.

"The steeplechaser is trained in a field of soft sod; the racer on a made track which must be hard underneath in order to insure speed. Now a yearling must do his quarter in 23 or 24 seconds or better to be considered worth training. He stamps, frets and worries at the barrier before he gets a start. Then he literally pounds his way over a hard track to the end of his trial at top speed. The bones of the legs have not been fully formed. Which would naturally be the most trying, pounding over a hard track or jumping—a natural gait for a horse—on a soft field?

"I know—for I have tried both—that the quarter run at top speed on a hard track in 23 seconds hurts the bone more than a test over two hurdles in that same distance worked in 27 or 28 seconds. It is the pace that does it. I can play golf all day and come home tired, but not worn out. If I tried to run a hundred yards in 12 seconds I should be used up and 'all in' right after the trial. It is the pace that kills."

MR. BELMONT IS ENTHUSIASTIC.

New York, April 11.—August Belmont, who by virtue of his offices as chairman of The Jockey Club and President of the Westchester Racing Association, is particularly qualified to speak with authority about racing, is enthusiastic over the prospects of the coming season.

"We are, I believe, entering upon a new era in sport in this country," he said yesterday, "and those of us who are fond of racing look to the future with every degree of confidence. The turf has made a host of new friends who will play an important part in the development of the sport. The purchase of so many highly bred English and French horses will insure stronger competition. Entries everywhere for stake events show a gratifying increase over last year, and we shall now have a chance of testing the merits of our horses with those of foreign countries whose opportunities to breed high-class thoroughbreds have been greater than ours.

"The presence of upward of over 200 of these animals in this country is going to mean much to the future of the thoroughbred, especially in its relation to the breeding industry. The production of good horses has always been more or less of an obligation on the breeders of the United States, but in the light of what is transpiring in Mexico, where I note our cavalry is suffering because of a lack of horses that are capable of negotiating the rugged country, it becomes an imperative duty.

"We are all greatly impressed," continued Mr. Belmont, "by the testimonial given racing as it is conducted in this state by Governor Whitman, who, in reply to the recent query of Mr. Stone of Baltimore said that the Hughes legislation had accomplished all that could be done to prevent racetrack betting, and that the people of New York State did not believe that it had been a serious blow to decent racing. The attendance at the various tracks in the vicinity of New York and at Saratoga in 1915 would indicate that there are very many thousands of our best citizens who are in accord with the sentiments expressed by the Governor."

A good program of running races will be provided at the California State Fair this year.

Cavalry horses, to be first class, must have a large preponderance of thoroughbred blood in their veins, is the expert opinion of cavalry horse buyers in every country that has an army that amounts to anything.

Last Post, a Canadian bred mare by Martimas, dam Flicker by Derwentwater, that won several races last fall at various club meetings in and about New York, also distinguished herself by winning first prize in a class for horses ridden by children at the New York Riding Club. Last Post was ridden by little Miss Amy Sparks and showed perfect manners.

King George has presented his stallion Anmer to the Canadian Government at Ottawa, to be used as a sire of cavalry horses. This is the horse that was stopped in the Epsom Derby by a suffragette who lost her life in the action.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

ANGLERS—BETTER GET YOUR LICENSE.

Mr. and Mrs. Angler—your attention is respectfully called to the fact that the opening of the trout season will be here one week from Monday—May 1st—and the laws of California set forth that you require a license to whip the streams and lakes of the State. J. S. Hunter of the Fish and Game Commission reports that licenses have been taken out in numbers since January 1st but the real rush will come during the coming week.

Reports received are that trout conditions in the Coast range waters are excellent. In the mountainous counties it is feared that the streams and creeks are a bit high for the best sport right off the reel, but from the majority of favorite spots the word is passed that conditions were never more ideal.

The Commission has been having the streams carefully patrolled for some weeks past as a protective measure to guard against anglers fishing out of season and to protect the streams.

COL. E. R. CUTHBERT IN PANAMA.

The many friends of Col. E. R. Cuthbert, who number by the hundreds in rod and gun circles, will likely be interested to know of his doings in Panama. He left here several months ago for a hunting and fishing trip and tells of his experience in the following letter to W. H. Price:—

Pocri, Cocle, Panama, March 27, 1916

My dear Mr. Price:

I have been in this place just a month. I have been all over the Provences of Cocle, Los Santor and Veraguas on horseback. Some trip, I can tell you. I bought a mighty good horse when I arrived but he is pretty thin now, although I have fed him extra well. I have dropped about twenty-five pounds and can do my 35 or 40 miles a day all O. K. Some days I nearly melt in the saddle.

There are mighty few bridges in this country and some of the rivers are pretty deep and can only be crossed in a canoe, and the horses have to swim. I have enjoyed these long trips through the country, as I have seen a lot of things that were new to me and at the same time instructive. I have been going on farther up the country and will get to David Chiriqui. It will probably take me a month longer.

The people and country are all quite different from either Mexico or Guatemala. The names of many things are quite different. Most wonderful of all is the coloration. Of course, yon know that the Indian was the original inhabitant, then came the Spaniard who mixed with the Indian and then, in 1850, when they started to build the Panama Railroad, they brought a lot of West Indian negroes and they started another cross with that breed. Since then they have a lot of French from old canal-timers and the Americans came last. You never in your wildest imagination could conceive such a jungle that stands here as a race. Nearly white children with kinky hair and black ones with straight hair of every imaginable shade in between. It is beyond doubt that around Panama City and canal zone, 75 per cent of the inhabitants are negroes. But away up in the mountains in the interior of the country you can see traces of negro blood.

This is the original home of the hook-worm. The doctor here in charge tells me that 75 per cent of the people are affected. I can see it myself, especially among the children. The doctor says they are curing it, but as soon as they leave it will take hold of the people again, as no one can get them to change their ways of living.

I will write again to you some day.

Yours sincerely, E. R. CUTHBERT.

MAY PUT BOUNTY ON SPARROWS.

Unless action of an effective nature is taken at once, Southern California will be overrun with the "Curse of Peabody," commonly known as the English Sparrow.

Such is the warning given by the Fish and Game Commission, which has had reports from San Bernardino, Pasadena, Oceanside, Newhall and other outside cities telling of the presence of the pest.

Acting upon the Oceanside report, the San Diego county patrol was detailed to investigate, and reported the job was well beyond the capacity of any one man to handle. The birds had secured a foothold. Several were shot and mounted for identification purposes. An arrangement is being made whereby 5 cents bounty per bird brought in is to be paid to a shooter for cleaning up the little invaders.

Sparrows breed with great rapidity and are easily accommodated as to housing. The big fan palms, particularly the older ones with the dead leaves fallen to the trunks, are their delight.

The chief objection to the sparrow is its pugnacious habit of fighting away song and insectivorous birds. It does no good whatever.

Unless concerted effort is made to head off the sparrow before it becomes fully established it will have become impossible to eradicate it. The bird is most adaptable, and thrives in any moderate climate.

FLY-CASTING RECORD BROKEN.

W. D. Mansfield broke his heavy tackle fly-casting record of 134 feet, established at the international tournament at the exposition, twice in the opening tournament of the San Francisco Club at Stow Lake on Saturday and Sunday. On Saturday he made a cast of 150 feet, beating his old mark of 134 feet, and the following day duplicated the performance.

F. H. Reed made the highest score in delicacy and accuracy, with a creditable score of 5½ demerits. C. H. Kewell took first place in heavy tackle accuracy with only 5 demerits. C. H. Gardner came nearest the bullseye in ½-ounce accuracy with 9 demerits. F. J. Cooper made the longest single cast in ½-ounce lure distance, with 225 feet. C. H .Kewell was second, with 200 feet.

On Sunday, P. W. Shattuck, C. H. Kewell and Stanley Forbes were judges; F. J. Cooper referee, and Charles E. Hills Jr., clerk. The officers on Saturday were: F. J. Cooper, James Springer and C. H. Kewell, judges; P. W. Shattuck, referee, and Charles E. Hills, Jr., clerk.

Saturday's results—

Contestant.	—Delicacy— Accy.	Dlcy.	Net.	H. T. Accy.
F. H. Reed	9	5	7	20

FISHERMAN SNORES AND ROWS.

The discovery has been made that there resides in San Francisco the "wonder fisherman." He is so termed because of the marvelous fact that he can row a boat while sound asleep and thus save much valuable time that would otherwise be lost. You might set this down as another fish story, but it is vouched for by a man whose word cannot be doubted. The "wonder fisherman" is Louis Gotthelf. He is a good, strong oarsman, too, and keeps his stroke in with the snores. Louis, so they say, can get up in the middle of the night with but a few hours' slumber, climb into a boat and snore while pulling to the fishing point picked out. When he gets his rod out he can be fresh and wide awake ,as can be testified to by the fact that Louis landed a fifty-two-pound striped bass with light tackle last season at Napa drawbridge.

Cardover Lady, a bull bitch recently imported by Mrs. Anita M. Baldwin, will be one of the many crack dogs that will be shown under the Baldwin colors at the Golden Gate show.

SALMON FISHING IN OREGON.

While trout fishing continues the favorite sport of California's fishermen, reports from the Northwest indicate that there has been an unusual amount of interest taken in salmon fishing and it is reported that this particular brand of fish is likely to be in bad for a time this season, if preparations for the quest of the salmon in the various rod and reel clubs counts for anything.

Salmon fishing in the Willamette and other streams throughout Oregon has come to be one of the most popular pastimes of Portland sportsmen. The river below the Oregon City Falls is alive with small boats filled with fishermen who are endeavoring to land a fish that will bring them one of the many prizes that are being offered by various clubs. The tackle prescribed by the Oregon Salmon Club, which is given a large measure of the credit for popularizing the sport, consists of a line with an 18 pound manufacturer's test, and rod not shorter than five feet and weighing no more than six ounces.

400 DOGS FOR GOLDEN GATE SHOW.

When the Golden Gate Kennel Club dog show opens next Thursday at Dreamland Rink some of the best dogs on the Pacific Coast will be on exhibition. More than four hundred dogs have been entered for the event. Walter H. Reeves, who will judge all breeds, will arrive here from Chicago tomorrow or Monday. The following fanciers will have their dogs on exhibition: Mayor Rolph, Jack Bradshaw, O. F. Vedder, Walter W. Stettheimer, Irving C. Ackerman, Miss Lydia K. Hopkins, Mrs. C. J. Lindgren, Miss Edith Chesebrough, Mrs. E. F. Brown, Dr. T. Martin Smith, Mrs. Anita M. Baldwin and many others.

‡ ‡ ‡

Browndale Violet and Browndale Perry, two six-months-old blue-merle collie puppies, will be exhibited by Mrs. E. F. Brown of the Browndale kennels. International champion Seedley Blue Sky, the sire of the puppies, will also be exhibited.

‡ ‡ ‡

Jack Bradshaw is expected home today with the string of famous dogs that he imported from England. No one seems to know just what Jack has "under cover." But as every local fancier knows, he never has a "mut," some surprises are expected at the coming show.

‡ ‡ ‡

A. J. Molera is getting his crack little Scottish terrier, Butterscotch, in trim for the coming show. Laddie before coming to this country won many prizes in England and Scotland.

‡ ‡ ‡

Vinton P. Breese will be the all-rounder at the coming Ladies' Kennel Association of Massachusetts fixture, which takes place at Auburndale, Mass., on Sunday, June 7. Other judges selected to date are Joseph Komenda, president of the French Bulldog Club of New England, who is slated to take care of that breed, and Mr. Kinder, who will judge the Boston terriers.

‡ ‡ ‡

The heavyweight bulldog, Dundee Camperdown, which has been re-registered Camperdown—on-the-Path, has been bought by C. M. Robertson, of Montreal. He is coming from Dundee, Scotland, to his new owner.

‡ ‡ ‡

It must be very pleasing to the Californians after shipping their "apples" so far as a New York show, to find their sporty efforts meet with equally sporty success. Mr. Williams, with his now famous Illuminator pup Crack Shot, that did so well in Airedales at New York, and Mr. Ollard's Irish terrier that was in a crate ten days through some misunderstanding, is another example of pluck rewarded, especially when it is known that she was "unsung and unhandled," being in the hands of strangers.—American Fancier.

‡ ‡ ‡

Bulldog folks will be sorry to learn that the dam of Woodcraft Model, the famous little English bitch that was sent out to the Coast, Woodcraft Baroness, is dead. This is a great loss, for we believe she was in whelp to Model and was sent out to the Coast a short time ago.

DEER FOUND DEAD WHEN SNOW MELTS.

The snow having melted on the east side of McCloud river, from Redding Pool to Ghost Camp, the bodies of a great many dead deer are revealed.

Eighty-three carcasses were counted by forest rangers—sixty-three bucks and twenty does. The animals perished in the snow for want of food, for there is no evidence whatever that any of them were killed by mountain lions or coyotes.

The snow is still three feet deep between Sisson and McCloud. The first automobile made the trip between the two towns this week, but this was possible only after several days' work by teams, scrapers and snow shovelers.

* * * *

Rabbit With $25 Still Loose.—More than 5,000 jackrabbits were killed in a rabbit drive in fields near Escalon, twenty miles southwest of Stockton.

Participating in the shoot were mare than 2,000 hunters, and after the slaughter a picnic luncheon was served by the committee in charge of the affair. A $25 check had been tied to a ribbit which was turned loose, but that animal was not killed.

Sportsmen's Row

Trout season opens on May 1st. Only a few more days for you to pick out your favorite stream or lake.

* * * *

You do not want to miss the Breeder and Sportsman when the season gets under way. Reports will be carried every week of the fishing conditions in all sections.

* * * *

Seventy-three at the monthly shoot of the Golden Gate Club gives some idea of the interest taken in trapshooting around the bay.

* * * *

As you going to take in the Golden Gate merchandise shoot tomorrow? There's a chance to win a prize and a general good time.

* * * *

A. G. Flickinger, who was high amateur last Sunday with 49x50, did not shoot over his head. Last season he broke 1672 out of 1780 targets in registered tournaments for an average of .9393.

* * * *

O. N. Ford is enthusiastic over prospects for the best shoot the California-Nevada Association ever had. It will be staged at San Jose on May 28, 29, 30 and 31.

* * * *

W. A. Clark, a Tiburon boatman, reports good bass fishing in the bay there, having landed an average of eight to ten fish a day, ranging in weight from four to six pounds. The largest he caught weighed twenty-seven pounds and frequently he has hooked and brought to gaff fish of from eighteen to twenty pounds. He has been using a No. 5 all-silver spoon in his trolling instead of the usual brass and silver lure.

* * * *

During the last week Frank Carroll landed eleven fish at San Pablo, the bass weighing four or five pounds each. Because of the presence of many net fishermen the bass there have not been running large, though there are plenty of small ones.

* * * *

Adam Hackmeier last week caught an eleven-pounder from the bridge at Wingo. Fishing in this locality has not begun to get good yet. The fish do not seem to be present to be caught ,though those that have been taken have all been of good size.

* * * *

R. N. Rutzuist caught a 35-pound royal chinook salmon above Clackamas Rapids last week-end. For the catch he will receive a handsome reel offered by the Salmon Club of Oregon. This may be the largest fish caught this month, and if so, Rutzuist will land another prize for that honor.

* * * *

Mr. and Mrs. A. G. Wilkes, devotees of the traps, have departed for New York to spend a couple of weeks. They will be missed at local tournaments.

* * * *

C. D. Carmen is coming to the front in jumps. Clyde can hit the ducks but we did not know he could get the knack of blue rock shooting so quickly.

* * * *

The One-Barrel Pete Murphy showed up Sunday with his Elk head white sweater. Pete tried some of his old tricks and received lots of applause.

* * * *

A. H. Beetham is one of the simon-pure amateurs who abhors cash prizes. We hope he wins one of the champagne orders tomorrow.

* * * *

Game Warden Barnett, after a careful survey of the Ventura and Santa Clara rivers, says that there are more fish and larger fish this year than ever before. Barnett says there has been an unprecedented run of steelhead this season. Standing on the beach at the mouth of the Ventura and Santa Clara rivers one can see hundreds of the big fish swimming into the rivers, and the big holes in the rivers are full of trout, larger than at any time last season. Barnett believes that the delay of one month in opening the season will be of decided betterment to the sport. There will be more moss, but while this may inconvenience the fishermen it will protect the fish.

* * * *

The development of tuna and yellowtail fishing in the waters of the channel at Ventura will be given attention by local resort men and sportsmen this season, if plans of Game Warden Jack Barnett materialize. "The fishing for tuna, yellowtail and such fish is just as good here as in the Catalina district," said Game Warden Barnett; "the only difference being one of the period when they are running. If Ventura sportsmen would get together and have the necessary boating facilities the sport at Ventura in July would be found to be just as good as that in the waters about Catalina. Tuna and yellowtail abound in the channel here."

* * * *

The Du Pont trap shooting school at Atlantic City now attracts hundreds of persons every day. It is the only school of its kind in the world, and it attracts the experts as well as the beginners.

* * * *

The Lewiston, Idaho, Gun Club is holding its annual tournament in that city on April 24 and 25. This is a registered shoot. The club has put up $500 in cash and many valuable trophies.

MISS GENEVIEVE J. MEYERS

A fair San Francisco trap shot who distinguished herself at San Jose a couple of Sundays ago by breaking 83 out of a 100.

Fishing for Royal Chinook salmon is at its height, starting last Sunday at Oregon City. The Salmon Club of Oregon has offered 48 prizes for various kinds of catches within Oregon waters. The prizes are valued at more than $550 altogether.

* * * *

"Please give me a gun that does not buck." This was the request made of President Allan W. Strowger of the Portland Gun Club last Sunday by one of the women who participated in the beginners' event during the annual barbecue. Prexy Strowger did his best and succeeded in finding a gun that carried only a little "kick" in it.

* * * *

Harry E. Whitney of Anthony, Kan., and one of the best known trap shooters in Kansas, scratched the right thumb on a bone while dressing a duck quite recently, blood poison set in and he died several days later. He won the Denver sweepstakes in 1912 and the Elliott Interstate trophy in 1914.

* * * *

Throughout the country the trap shooting clubs are staging booster shoots and working up all sorts of schemes to make the tournaments all bigger than in former years. Everywhere the slogan is, "Bring a friend along."

* * * *

The Marin County Kennel Club announces its annual show for Decoration Day, Tuesday, May 30, 1916, with Chris Shuttleworth as the show secretary and superintendent. The club has already received assurances of a large number of specials, and, with a good slate of judges to be announced shortly, the club hopes to secure a large and representative entry.

Fessenden 29x50, F. H. Teeple 22x25.

* * * *

Green Lake Club.—Another record crowd was on hand April 9th at the regular weekly shoot of the Green Lake Club of Seattle, and while the strong wind interfered with good shooting, some very fine scores were hung up.

I. M. Fisher, professional, carried off high honors for the day with a straight run of fifty, which was remarkable shooting with the wind blowing as it did.

L. S. Barnes, with 48 out of 50, succeeded in nosing out Matt Grossman by one target for the high amateur score.

In the second contest for the city hall trophy, E. R. Bacon headed the list with Barnes, Grossman, Dr. Mills, Dr. Kidd, Rosenfield and Geltz close behind.

L. H. Reid turned in the high score Saturday by breaking 50 straight, and Judge Gordon, Tom Wilkes and C. E. McKelvey tied for second honors with 45. Mrs. Mills, Mrs. Barnes and Mrs. Conklin were also out warming up for the next ladies' event at the Green Lake grounds. The scores, at 50 targets:—

I. M. Fisher* 50, L. S. Barnes 48, M. Grossman 47, Dr. King 44, J. W. Geltz 44, C. E. McKelvey 44, L. H. Reid* 44, D. Rhodes* 44, E. R. Van Vleck 42, George H. Hambright* 41, C. B. Fitzgerald 41, W. C. Smith 41, F. C. Riehl* 40, J. H. Hopkins 40, Dr. A. B. Kidd 40, Dr. R. V. Mills 39, E. R. Bacon 39, J. C. Wright 37, G. D. Horst 37, G. A. Conklin 37, George Edling 37, M. G. Knight 36, C. Winslow 36, F. H. White 36, M. A. Rosenfield 35, Dr. J. F. Hill 35, J. V. Hough 33, Dr. M. A. Winningham 31, Fred Wing 30, N. Paschall 29, Harry Muhl 28, Dr. S. W. Giffin 28, Dr. S. W. Case 27, C. W. Bandy 27, S. E. Bacon 26, J. F. McRee 26, George Colwell 21, R. Earnest 12, L. A. Loomis 9, C. Wright 2.

Saturday's scores, 50 targets—

L. H. Reid* 50, Tom Wilkes 45, Judge Gordon 45, C. E. McKelvey 45, C. B. Fitzgerald 44, M. Holbridge 38, L. S. Barnes 42, G. A. Conklin 40, Jack Landon 38, Dan Landon 34, T. D. Bolton 31, Dr. R. V. Mills 32, Dr. S. W. Case 26, J. W. Geltz 24, P. MacRae 26, Mrs. Barnes 13, Mrs. Conklin 9, Mrs. Mills 8.

(*Professional.)

* * * *

Seattle Association.—Trapshooting received its share of the honors among the many sports on tap on April 9th, when seven squads of shooters shot from the new trap platforms out at Harbor Island. The Seattle Trapshooters' Association now has its club house and grounds in tip-top shape and everything is about in readiness for the state tournament, which is to take place next month. Several new features, now used by Eastern clubs, are to be installed, however.

The shooting saw the last event of the Everding trophy handicap, the results, owing to unfinished shooting, being between Searle, Bacher and Hemrich.

High scores for the day were divided between Mat Grossman and C. E. McKelvey with forty-six broken targets to their credit. L. H. Reid missed only one of the 50 and stood high professional.

Nat Paschall and J. F. McRee were on the grounds for the first time this season. Paschall showed the results of shooting with a hand trap. F. Phiscator was also a new man on the grounds this year.

Scores, 50 targets:—

Shooter—	15	15	20	Total
M. Grossman	13	14	19	46
H. Fleming	14	12	15	41
G. M. Valentine	12	12	15	39
W. B. Taft	10	10	17	37
J. H. Hopkins	10	15	16	41
C. R. Sydman	10	12	13	35
L. H. Reid*	15	15	19	49
R. Kinzer	11	13	15	39

A. E. Hall	1	1	5	7
A. F. Hemrich	14	14	17	45
H. Brehm	7	5	4	16
F. H. White	13	12	11	36
N. Paschall	8	7	14	29
J. F. McRee	9	10	10	29

100 targets—H. Fleming 88, G. M. Valentine 79, R. Kinzer 82.

Those shooting but not in the regular program were C. C. Ward, G. H. Young, H. Cullyford, William Schilpin and Mr. Beard. (*Professional.)

Preparations have been made and the club is practically in readiness to receive the many shooters that will participate in the State Tournament that is to be held on the Harbor Island grounds May 24-25. Practice day, May 23.

W. B. TAFT, Secretary,
By E. A. FRY.

Seventy-three At Golden Gate Shoot

RECORD NUMBER TURN OUT FOR MONTHLY CLUB EVENT

Golden Gate Club.—The Golden Gate Club did itself proud last Sunday by holding the biggest monthly shoot in the history of the organization. Seventy-three devotees of the blue rock sport were at the traps in Alameda, which is the largest number that ever turned out for a monthly event around the bay. At least that's what Bill Price says and he knows a thing or two about the sport alluring in this part of the country. It is a good indication of the interest and enthusiasm with which 1916 is starting off.

A. G. Flickinger of Vallejo dropped over to take the high amateur honors of the day by breaking 49 out of 50. O. N. Ford, who is boosting the California-Nevada shoot, scheduled at San Jose next month, was close behind with 48x50. Toney Prior, George Anderson, Dr. Barker, Barney Worthen, N. A. Howard, Henry Stelling, W. J. Terry and Clem Arques also turned in creditable scores.

Fred Willet led the professional ranks with 48x50. Clarence A. Haight and Dick Reed were next in line.

The Golden Gaters are now brushing up for the banner merchandise shoot at Alameda tomorrow (April 23rd). Over seventy prizes have been donated and they will be distributed via the grab-bag system. It is figured there will be over 100 shooters present.

The scores last Sunday were:—

Events—	20	20	10	Total
F. Blum	14	17	9	40
J. Nelson	15	15	9	39
P. R. Skinner	12	14	9	35

Porterville Club.—Considerable interest is being worked up in the handicap shoot which is now being held by the Porterville Gun Club, the first shoot in the handicap event taking place on April 9th.

Averages compiled show that the shoot resulted as follows:

Dr. S. A. Barber, 25 out of a possible 25. Earl Martin, 63 out of a possible 75. Dr. E. S. Lawson 73x75, Harry Casad 47x50, Georgh Murphy 68x75, James Rohlick 65x75, Harry Quinn 42x50, George Small 45x50, Richard Hoyt 21x25.

The contestants are shooting for a silver spoon which will be awarded to the marksman making the best average.

* * * *

Salt Lake Club.—Salt Lake, April 10.—Breeder and Sportsman: The club score at Salt Lake on April 9th was as follows, out of 50 birds—

Gardner 47, Mace 46, Moffatt 46, Klein 44, Tingly 43, Bain 42, Bray 38, Johnson 38, Luff 37, Heagren 36, Fisher 35, Mitchell 32, Edmonds 31, Hood 33, Engles 21, Anderson* 48, Hood* 46.

Yours, C. A. ANDERSON.

COMING REGISTERED TOURNAMENTS.

California.

Fresno, April 29—Fresno Blue Rock Club, C. B. Jackson, Secretary.

Los Angeles, May 1, 2—Los Angeles Club, Fred H. Teeple, Secretary.

Los Angeles, May 8, 9.—Vernon Gun Club, William Pugh, Manager.

Alameda, May 20—Golden Gate Club, Clarence A. Haight, Secretary.

San Jose, May 28, 29, 30—California-Nevada Association Tournament, San Jose Blue Rock Club, O. N. Ford, Secretary.

Eureka, July 4—Eureka Blue Rock Club, H. A. Hine, President.

Oregon.

Portland, June 5, 6, 7—Sportsmen's Association of the Northwest Tournament, under the auspices of the Portland Gun Club, Frank Templeton, Secretary.

Portland, Sept. 12, 13, 14—Pacific Coast Handicap.

Washington.

Spokane, May 8, 9 and 10—Spokane Gun Club.

Chehalis, May 30—Chehalis Rod and Gun Club, Gus T. Thacker, President.

Seattle, July 4—"Old Policy," Green Lake Gun Club, W. C. Smith, Secretary

Tacoma, July 18, 19, 20, 21—Pacific Indians, F. C. Riehl, Secretary.

Vernon Club.—Mrs. C. E. Groat, a woman trapshooter who has been plugging along for several years until she now shoots on a par with the best men shots, stepped up on a high plane Sunday morning when she captured her first win on the George T. Cline diamond medal by breaking 45 birds out of the half century thrown, from sixteen yards. The trophy was placed up for competition for the second time, 50 birds, distance handicaps, by the Vernon Gun Club.

Dr. L. M. Packard, who won the Billy Wilshire trophy, was second with the high scores, breaking 44 out of 50 from twenty yards. Bill Pugh, the club's secretary, and Stan Bruner tied for third place, each with a 43x50 score.

The second shoot on the William H. Hoegee handicap trophy was also staged, as well as the contest for the four loving-cups. Fifty targets covered both contests. Meek was high gun in the Hoegee competition with his 48x50 score. Mrs. Groat broke only 40 birds in this event.

Red Hedderly, the small-bore crack of the south, ran up another one of his good scores in the 20-gauge event for a cup, breaking 24 birds out of 25. Bruner was second with 19 out of 25. The contests on the cups, Hoegee trophy and the 20-gauge trophy will be held every Sunday until July. The six best scores will win.

Dr. Packard was high for a cup in class A, with a 47x50 tally. Pugh was high in B, Meek in C and Manderville in D. The scores:

* * * *

Big Time Club—At the shoot of the Big Time Gun Club Sunday on the grounds of the Schenck ranch, Frank Newbert proved that a winter of inactivity had not dimmed his eye nor spoiled his aim. Newbert broke 49 out of 50 birds in what was for him the first practice of the season. Lee Gorman broke 50 straight, and R. S. Irvine, candidate for city commissioner, was dubbed the Rip Van Winkle of the club when he let seven out of a string of ten go by. Irvine declared that he had not dropped a bird in 30 years. About 150 attended the shoot, and the committee had plenty of lunch on hand for all.

The other shooters who made one or more strings of ten were as follows: Ilgner 6, Lee Gorman 5, F. Ruhstaller 3, Dr. Goode 2, Egersdorf 2, Pearson 2, Higgins 2, D. Ruhstaller 2, F. Stahl 2, M. Newbert 1, Adams 1, D. Huth 1 and Conroy 1.

Mrs. Newbert and Mrs. Boulware were tied for first place in the ladies' shoot with six birds apiece.

* * * *

Temple Club.—About sixty-five persons attended a blue rock shoot of the Temple Blue Rock Club held on the club grounds on Van Ness boulevard last Sunday. The events lasted throughout the day and a lunch was served at noon. Members of the Fresno Blue Rock Club were guests. About forty-five took active part in the shooting. W. J. O'Neill and Dr. J. L. Martin were high gun men. The scores were:—

D. F. Appling 9x10, 16x20; Fred Appling 8x10, 8x10, 8x10, 12x20, 14x20, 15x20, 16x20, 17x20; Browning 8x10, 5x10, 15x20, 14x20, 12x20, 14x20; Foin 10x10, 10x10, 18x20, 10x10, 14x20, 14x20; O'Neill 17x20, 5x10, 17x20, 16x20, 18x20, 19x20, 18x20; Sorenson 8x10, 7x10, 19x20, 17x20, 18x20; Knight 7x10, 6x10, 14x20, 18x20, 17x20, 16x20; Madison 3x10, 10x20, 9x20; Turner 12x20, Stump 12x20, 5x10; Fleming 6x10, 16x20; Anderson 11x20; Holdshaw 5x10, 4x10; Schultz 10x20, 13x20; Martin 18x20, 17x20, 18x20, 19x20, 16x20, 18x20; Shepard 8x10; Tucker 6x10, 6x10, 6x20, 10x20; Gurner 9x10, 3x10, 4x10, 8x20; Hamlin 0x10; Farris 5x10, 7x10, 6x10, 6x10; Lord 4x10, 2x10, 5x10, 7x10, 13x20; J. Lord 2x10, 3x10, 2x10; Collins 7x10, 5x10, 7x20, 5x10; Belindge 7x10, 8x10, 15x20; Meachem 2x10, 6x10, 4x10; Skinner 4x10, 11x20, 4x10; Slocum 18x20, 15x20, 18x20, 16x20; Jackson 16x20, 17x20, 17x20; Otton 10x20, 14x20, 10x20, 10x20; Taber 19x20, 17x20; Chabot 7x20, 5x20, 9x20, 6x10; Stone 16x20, 18x20; Nevill 1x10, 3x20; Nook 11x20, 15x20, 14x20; E. Alameda Elks Club.—The class of the Alameda Elks Gun Club is rapidly developing. Following is a list of the first ten ranking members at the end of the first shoot and also a list of those ranking among the first ten at the end of the second shoot:—

First Shoot.	Second Shoot.
1. Bray Thorning	1. Henry Meinecke
2. Al Durney	2. Bray Thorning
3. Henry Meinecke	3. Ben Boyd
4. Walter Plummer	4. Al Durney
5. Tay Croll	5. Tay Croll
6. Ben Boyd	6. Clyde Carman
7. Jerry Brooks	7. Ned Williams
8. Bob Valleau	8. Lew Shroeder
9. Lew Shroeder	9. Bob Valleau
10. Jack Walker	10. Pete Noonan

President Tom Haskins, Secretary Fred Hillyer, Henry Martine, Chas. Hollywood, Chas. Linderman, Homer Craig and Ed Ward are all fighting hard to place their names among the first ten. Watch out you top-notchers! There is some lively competition in store for you.

* * * *

Southern Handicap.—The Interstate Association's eleventh southern trapshooting tournament will be held at Memphis, Tenn., May 9, 10 and 11, under the auspices of the Memphis Gun Club.

The tenth tournament, held at Memphis last year, was a success of such pronounced character as to preclude the possibility of the eleventh being held elsewhere. It was the second largest Southern Handicap tournament ever held and proved that the Memphians only needed sufficient elbow room to make anything, humanly possible, a go.

* * * *

Portland Club.—Following are the scores of Sunday's shoot, April 9th, on the Everding Park traps of the Portland Gun Club: The percentages:

F. M. VanAtta 93, O. D. Thornton 92, J. W. Seavey 90, A. Blair 90, Al. Seguin 86, M. Siddall 84, M. Abraham 82, E. B. VanArnam* 78, J. O. Joy 75, H. A. Pollock 77, C. C. Kelly 74, J. S. Crane 66, J. Morris 63, J. G. Clemson 57, N. Blumensaadt 54, George Bertz 53, Miss Gladys Reid 50, J. Murphy 47.

(*Professional.)

* * * *

Fresno Club.—Members of the Fresno Blue Rock Gun Club are planning an all-day merchandise shoot to be held Saturday, April 29th. It will be a registered tournament and about 75 to 80 sportsmen of the valley are expected to enter. There will be a merchandise prize for each man entering. In preparation for this event, a practice shoot was held by several of the members of the club Sunday a week ago.

ANIMALS THAT NEVER TAKE A DRINK.

Strange and impossible as it may seem, there are several kinds of animals living in various parts of the world that live entirely without water.

Out on some of the Western plains of North America lives and thrives a little mouse that never tastes a bit of moisture. This little animal, sometimes known as shrew, is about three and one-half inches long—the square-shaped tail taking up about half of this length. Its food consists of insects and their larvae, and it builds its quaint little nest of grass and leaves.

They are very rapacious, often killing and devouring each other. Its bite was once considered very poisonous, while its body, properly treated, was a panacea for many ailments. It thrives in desert places and never ventures far from its home. Its flesh is so tainted that no other animal except the owl will feed upon its carcass.

In London, in one of the zoological gardens, a parrakeet lived for over fifty years without a drop of water. It relished all its food, consisting of grasses, seeds, etc., but like a good teetotaler it "never took a drink." This little parrot is a native of Australia, but has been imported quite extensively to the United States. It is very affectionate in disposition, especially toward its mate, and is sometimes called the "love-bird."

From cows and goats that live in northern France is obtained the milk from which the celebrated roquefort cheese is made. These animals subsist entirely upon the grass, underbrush, etc., that they find in their vicinity, but never require water in any form.

The llama of Peru and Bolivia, used as a beast of burden, travels over the mountains from six to twelve miles a day, carrying a pack weighing from 100 to 200 pounds, needing only a small portion of grass for feed and requiring no water. Only the male llamas are used for pack purposes.

Entirely without water is spent the life of the beautiful gazelles of Arabia, and they adapt themselves readily to life on a desert waste. They are exceedingly fleet and also a beautiful animal. It is covered with a hide of satin, the colors varying from a golden brown to mauve—the legs below the knee are spotless white. It has wonderfully beautiful eyes and has curved annulated horns about fourteen inches in length. EVELYN K. BROOKS..

Waterloo, Iowa, April 2.

SIBERIANS WIN ALASKA SWEEPSTAKES.

Nome (Alaska), April 15.—Leonard Seppala, driving his team of seventeen Siberian wolf dogs with whom he won last year's race, late yesterday won the 412-mile all-Alaska sweepstakes race for dog teams. Sepala's time was 80 hours and 27 minutes. Fay Delzene's team of fourteen Alaska bred malamutes was second, and Fred Ayer's team of fourteen fox hounds third.

Seppala left Nome on his 412-mile drive to Candle and return at 1 minute after 9 o'clock Tuesday morning and it was just 5:28 last evening when his dogs trotted across the finish line in front of the Board of Trade saloon on Front Street. Seppala's time of 80:27 is 1 hour and 42 minutes, 23 seconds, slower than his time last year, and 6 hours, 12 minutes, 40 seconds, slower than the record set by John Johnson's Siberian "wolves" in 1910.

Seppala, who left Council an hour ahead of Delzene, won easily. He traveled the last eighty-five miles of the race in 10 hours, 41 minutes. His dogs finished in good condition, showing no ill effects from the three days' grind over the snow trail through a snowstorm which at times reached the proportions of a blizzard.

Seppala stood the strain of the race fully as well as his hardy Siberian wolf dogs and when he drove down Front Street toward the finish line the entire winter population of Nome, who had assembled to welcome the winner, cheered him wildly.

This is the fourth time in the last seven sweepstakes races that the Siberian wolf dogs have outdistanced the malamutes. Johnson, the record holder, who has won two races, and Seppala, have been staunch supporters of these wild-looking, but tractable animals.

A cross between the wild Siberian wolf and the Alaskan working dog, they have the appearance of the pure wolf, but through handling from the day of birth are developed into hard-working harness dogs. They are not as fast for short distances as the malamutes, but their wolf-like endurance gives them an advantage in the long-distance driving.

TO MAKE 1916 COUNT OF BIRDS.

Washington, D. C.—The third annual bird count of the United States will be made by the Bureau of Biological Survey of the U. S. Department of Agriculture during the breeding season in May and June. In making this survey the Bureau will rely largely on persons interested in bird life who agree to act as volunteer enumerators and count the different kinds of birds found in a 40 or 80 acre farm or woodland tract near their homes. The counts thus made by unpaid observers during the last two summers have furnished to the Department valuable data on the character, number, and distribution of the bird population.

This year the ornithologists of the Department wish particularly to secure a large number of volunteers in the West to report on the bird life in the plains, the semiarid regions, the deserts, and the mountains in that part of the United States. Especial attention also is to be given to securing data as to the birds in the fruit districts of the Pacific Coast and in the South Atlantic and Gulf States.

The information collected this year it is believed will be of special value in enabling the Department to test the effect of State and National bird laws and also in determining what relationship exists between bird life and the prevalence of locusts, grasshoppers, and other insect pests in different localities.

As it is impossible to make an actual count of all the birds in any extended district, each enumerator is asked to report only upon the number of birds breeding in a selected area of 40 to 80 acres in country or suburban districts. From the figures thus obtained, those in charge of the work are able to approximate the total number of birds of each kind in different sections of the country.

Enumerators who wish to report on birds on farms are asked to choose an area which includes farm buildings, shade trees, orchards, plowed land, pasture or meadow or swamp, but not very much woodland. The enumerator begins his survay at daylight some morning and zigzags back and forth in the selected area, counting the male birds. Early in the morning during the last of May or the first week of June every male bird should be full of song and therefore easily counted. The count of one day is to be verified by observation on several mornings.

The height of the breeding season should be chosen for this work. In the latitude of Washington May 30 is about the proper date for the count. In the latitude of Boston the work should begin a week later, and south of Washington even an earlier date should be selected.

In addition to reports on farms and suburbs, enumerators who can do so will be asked to report on the birds in a timber area of about 40 acres or in an isolated bit of woodland of from 10 to 20 acres. In the Northwestern States, separate reports on the number of birds found in the wilder portions of the farms, preferably those surveyed in the earlier counts, are desired.

Those wishing to take part in the survey can obtain complete instructions by writing to the Bureau of Biological Survey, U. S. Department of Agriculture, Washington, D. C. The work, however, calls for considerable knowledge of birds, and only those who can readily distinguish the different kinds should undertake to make returns for their localities.

SHAD FOR CONNECTICUT.

In carrying out the plan to furnish the state of Connecticut with 2,000,000 shag eggs, George Neale of the Fish and Game Commission has just visited Feather river to determine if the spawning fish had reached the point in that stream where it is proposed to establish the plant for taking and fertilizing the eggs. None have arrived, the shad now only just having reached the lower part of the Sacramento river in their annual migration. It is proposed to take the fish as far up river as possible so that the eggs will be ripe and will be more likely to give satisfactory results when planted. After being taken from the fish and fertilized, the roe will be loaded directly into cars furnished by the Connecticut Fish Commission.

* * * *

The German Shepherd dog, Lotti von Edelweiss, has arrived in New York from Germany and is now in the kennels of Mrs. Leo Wanner, Hempstead, L. I. Mr. and Mrs. Wanner purchased Lotti over a year ago, but great difficulty was experienced in getting delivery. This of course was because of the war in Europe. With Lotti came two of her sons, young dogs just over a year old. Lotti von Edelweiss was a winner in the fatherland.

Prospects Bright for Big Trout Season

CALIFORNIA ANGLERS ASSOCIATION IS MAKING PREPARATIONS

The California Anglers' Association, an organization for the propagation and preservation of game fishes, is showing signs of activity once again at its specious and comfortable club rooms, 935 Market street, San Francisco. For months past the members have been patiently awaiting the opening of the trout season, and now that it is call at home the boys planning trips and lending an attentive ear to the reports from the various nearby streams and lakes.

As a sort of preliminary training for the big opening on May 1st, the Association held an outing at Moss Beach last Sunday, and between 75 and 80 members had one glorious time. The day was warm and clear and did much to add to the success of the affair. It was a basket picnic.

Of course, there was some fishing and the competition was keen for the two prizes set up. William Eaton managed to land a 4½-pound black cod and drew down the trophy for the biggest catch of the day. James Gorman took the honors for the largest number caught.

When the trout season gets well under way the Association is going to run an excursion to the Feather River that promises a treat. It will have a private car that will be sidetracked along the famous fishing waters. A start will be made from San Francisco on Saturday, May 27th, and the return will be on Wednesday, May 31st. There is some room for a few outsiders and reservations can be made at the club rooms.

President F. Spence and the other officers of the Association — Charles Breidenstein, vice-president, James Gorman, second vice-president, George A. Wentworth, secretary, H. Cohn, treasurer—and L. T. Craig, J. Springer, M. Uri, Charles Gibbs, W. Ballantine and F. Ensinger, are going to make a concentrated effort this season to increase the membership. President Spence outlines a policy to band the anglers together in order to secure favorable legislation when the legislature meets in the spring.

"Anglers are in favor of the season opening on April 1st instead of a month later," says President Spence. "The conditions for fly-fishing during April are good and anglers are deprived of a whole month of high-class sport. Trout are through spawning by April 1st and when the water starts to recede the big fish return to the ocean. This leaves only the little fish in the streams to be caught when the season comes in."

There have been several reports made to members during the week. Dr. Earl S. Pomeroy of Capitola sends word that San Lorenzo and Waddell are low, clear and ideal for fly-fishing. They are apparently filled with trout, too.

A. B. Christensen and Robert McFarland say that Brismo, Lobitos, Trinitas and San Gregorio are in fine shape.

The Russian River and its tributaries are also said to be in good condition for fly-fishing.

The Feather River is normal for this time of the year, with all the snow gone save from the mountain tops.

SCORES OF SCHUETZEN CLUB.

The California Schuetzen Club held its opening picnic and shoot Sunday at the Park near San Rafael. There was a large attendance, with Vice-President J. S. Leutenegger delivering the address of welcome in the absence of President A. G. Oet. The scores:—

Re-entry—John Free 218, 217, 215, 215; Chris Meyer 213, 212, 203; L. Wille 207; G. Tammeyer 207; M. Flynn 204, 202. Avon Wyle 199, 178, 175; Charles Ott 195, 191; C. H. Morris 191; Captain J. Straub 185, 184; J. Capell 180, 172, 160, 155; H. Schroeder 164; F. J. Pape 160, 139.

Monthly bullseye—Charles B. Morris 344, A. Strecher 396, Captain J. Straub 437, J. Ross 662, E. Helm 708, H. Heissmer 723, C. Hartwig 831, A. von Whyte 841, G. Tammeyer 1000, C. Meyer 1087, J. Frei 1172, E. Zuest 1200, J. S. Leutenegger 1661, F. L. Pape 1755, A. Bertelsen 1781, Charles Ott 1991, George Heissner 2105, Philo Jacoby 2164, H. Schroeder 2549, L. Wille 2701.

Honor target—H. Schroeder 67, E. Helm 64, John Frei 63, Chris Meyer 62, C. B. Morris 61.

BE CAREFUL OF MOUNTAIN LIONS.

Fishermen who whip the remote Santa Clara county streams this year are advised to go armed on account of the unusually large number of mountain lions reported by six State game wardens who have been patrolling the hills seeking to prevent illegal fishing before May 1. Many tracks were seen around the remains of livestock and deer.

Two years ago a lion fatally wounded two boys swimming in Coyote creek and killed a Morgan Hill school teacher who came to their aid. At that time conditions were similar to the present state of affairs. A big lion, one of the largest ever seen around that section, was shot near Mount Hamilton Friday by Samuel Parks, a local lumberman.

* * * *

Den of Rattlesnakes—Weaverville, (Trinity Co.), April. 17—A den of rattlesnakes has been found near here by County Surveyor T. J. Montgomery, who discovered the reptiles while surveying. He estimated the number to be at least 100, some of them being four feet long.

The rattlers were lying in the sun, some of them in large bunches. Montgomery and his companions succeeded in killing several, but most of them escaped into crevices in the rocky ledge where they were enjoying the sunshine.

Rattlers are common in Trinity county, but are seldom found at this season of the year.

* * * *

Says Harold Ober, secretary of the Airedale Terrier Club of America: "There is a mistaken notion among some exhibitors that when a dog is a champion he should be retired to give the others a chance. Nothing can hurt a breed more than this, and I am not saying that on my own responsibility, but after discussing it with all the prominent men in the breeding industry. Interest in a breed will wane unless the best ones are shown, and I am speaking for the whole fancy when I say that I would rather win a V. H. C. against the best in the ring than a first with the best on the bench."

* * * *

The fifth annual tournament of the Lewiston Gun Club will be held April 24 and 25. Shooters from western Washington and all parts of Idaho are entered in this shoot, the first registered event of this section of the country.

THE FARM

CAN DUAL PURPOSE CATTLE BE BRED?

[Concluded from last week.]

The English breeder is most particular in the choice of the males which he uses in breeding. These males must be the progeny of a dam, and of a grandam, each of which has been abundant milk producers. Some breeders go farther back in the female ancestry in the search for high milk production. In this way the guaranty of transmitting good milking qualities by such a sire is secured. But the other side of the question is guarded with equal care. He must be an animal of good scale. He must carry a good covering of mellow flesh when in a normal condition and he must be the get of a sire possessed of similar fleshing properties. How many breeders, I ask, in this country have been trying thus to breed cattle on dual lines? When our experiment stations try out dual purpose breeding on those lines, there will be less of shouting that dual purpose cattle can't be bred. Shame on the teaching which claims that what has been done successfully for more than a century in England can't be done in America.—Thos. Shaw, N. W. Farmer and Stockman.

NEW MILK LAW WILL SAVE CHILDREN'S LIVES.

Many owners of small dairies are laboring under the impression that, under the new law, they must pasteurize milk, judging from inquiries received by the California State Board of Health. As a matter of fact, however, the new law does not require pasteurization, if the animal is found to be free from tuberculosis by the tuberculin test. This test must be made by a qualified veterinarian, acting under the supervision of the State Veterinarian. All cows, however, must be fed, watered, housed and milked under conditions approved by he inspecting department.

No doubt many of the large dairies in the state will resort to pasteurization, rather than to the tuberculin testing. Most owners of small dairies, however, will have their cows tuberculin tested, because it is impractical for them to distribute from acentral pasteurization plant. The tuberculin test will be made by the State free if all cost and none who have made application will be amenable to the law until after the required inspection has been made.

While the new milk law does not become effective until October, many dairymen throughout the State are already applying the provisions of the law in the preparation of milk supplies for market. If the new law were to go into effect immediately, no doubt a very great saving could be made in the numbers of babies' lives that are lostduring the summer months because of diseases contracted through the use of infected milk. Nearly all children under two years of age who die in California fall victims to intestinal diseases that are often contracted through milk. Typhoid fever, tuberculosis, scarlet fever and other diseases may also be carried in milk.

Dairymen who begin the application of the provisions of the new law at once, will not only aid in starting the machinery of the law, but they may be doing the greatest possible service in saving the lives of California children.

All is well that ends well is a happy conclusion when applied to the harvest of the crop. That is, the season is all right if it turns out that the harvest is good.

The irrigator is always cheerful. He knows that he can compel success, let the season be as it may. This is the blessing of water on the land.

For Greatest Satisfaction Use
DOUBLE SERVICE Automobile Tires
Guaranteed 7,000 Miles Service
Absolutely Puncturepoof

Double Service Tires are made double the thickness of the best standard make tires.

This 100% greater wearing surface naturally gives that much more mileage and service. The average of 12 miles of tough fabric and one inch surface tread rubber makes these tires *absolutely puncturepoof.*

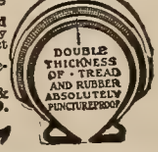
These tires excel all others for use in the country over rough and rugged roads as well as on hard pavements. They are as easy riding and resilient as any other pneumatic tire—the air space and pressure being the same.

They are the *most economical* and "care free" tires made and are used where tires must be depended on and tire troubles cannot be tolerated. Many *Double Service* style tires are in use in the U. S. government and European War service.

Our output is limited to a certain amount, but for a short time we offer the following reduced special prices as an Introductory Offer:

PRICES

	Tires	Tubes		Tires	Tubes
30x3 in.	$ 8.60	$2.30	36x4 in.	$17.45	$4.65
30x3½ in.	10.85	3.10	35x4½ in.	21.20	5.60
32x3½ in.	12.75	3.20	36x4½ in.	22.50	5.75
33x4 in.	15.75	4.20	37x4½ in.	23.60	6.20
34x4 in.	16.70	4.35	37x5 in.	26.30	6.60



All other sizes not included in above list also furnished. Non-skids at 10% additional.

Terms: Payment with order at above special prices, a 10% discount allowed on orders for two or more tires. All personal checks must be certified.

Try these tires now and be convinced of their very high qualities. Sold direct to the consumer only.

Descriptive folder upon request. Write for it.

SLOANE, Hollister, Cal.

RACE TRACK FOR SALE.

The Ukiah race track, located a little less than a mile from the Court House at Ukiah and bounded by the State Highway on the west, the county road on the south, and the Northwestern Pacific Railroad nearly the entire length on the east side of the track. The property consists of twenty acres. Fifty-nine good box stalls, good grandstand, fencing in good order, and one of the best half mile tracks in the state. An excellent winter track and an ideal place to work horses during that season. Plenty of adjoining drives for jogging horses. Two wells on the premises as well as water from the city water works, with tanks conveniently arranged for sprinkling.

This is the only race track in Mendocino county and the location of the county fairs. Ukiah is the county seat and has a population of about 3000, is in a most fertile valley in which all kinds of fruit, vegetables, hay, grain and hops are grown. Has excellent water; no malaria or mosquitos. It has paved streets, good sewerage, and splendid gas and electric light works. There are many standard and thoroughbred horses in this county and the people are a race loving lot. This property is offered for sale at a less price than adjoining property is held at. For terms and further particulars address

F. W. KELLEY,
Care of Breeder and Sportsman.

FARMS FOR SALE

Choice Land in Idaho

Lewiston, Idaho, is situated at the forks of Clearwater and Snake rivers and has transportation to the coast.

960 acres 7½ miles from Lewiston, Idaho, 4½ from Lapwai, Idaho, on main traveled road, all in cultivation except about 15 acres, all level land, just a little rolling, 320 acres of fall wheat in, 225 acres fall plowed for spring crop, about 30 acres in alfalfa. All fenced and cross fenced. Two good springs with big cement water troughs, well, windmill and cement reservoir, water piped to house, 7 room house, hot and cold water and electric lights. Large horse barn with hay mow in the center, electric lights in barn; cow barn with two box stalls; hog pens, shade trees, chicken houses, blacksmith shop, wagon shed, granary, outdoor cellar with bunk house overhead. $85 per acre; will take one-third down, time on balance to suit purchaser, at 7 per cent interest. One-third of crop goes with place if sold any time up close to harvest. Mild climate, can raise all kinds of fruit, grain and vegetables. Wheat in this country goes from 35 to 65 bushels per acre, barley 40 to 80 bushels per acre.

320 acres 4½ miles south of Vollmer, Idaho, 275 acres in cultivation, balance in pasture and timber, farm land lays practically level, one-third of crop goes with place if sold before harvest. Some fall wheat already sown. All fenced and cross fenced. Quarter section of it fenced hog tight; good four-room house, wood shed, and out of door cellar, nice grove around house, well at house, fair stabling and out buildings, spring and spring creek close to barn, three springs on place. Price $70 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

238 acres 4½ miles from Lewiston, Idaho, 175 acres in cultivation, 25 more can be cultivated, balance good bunch grass pasture, fenced and cross-fenced, good spring creek runs across place, small house, station on place for Johnson R. R., two grain warehouses at station. Price $70 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

160 acres of timber land, good farm land when timber is cleared off, all can be farmed except about 2 or 3 acres. Good timber, yellow pine and fir. Price $4000. 40 miles from Lewiston, Idaho. Well located to log off.

240 acres 6 miles from Asotin, 12 miles from Lewiston, Idaho, about 75 acres in fall wheat, about 75 acres more can be cultivated, balance in bunch grass pasture, two springs, small house, all fenced. Price $40 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

OFFER $2600 IN PRIZES FOR GOOD ROADS PHOTOGRAPHS

National Highways Association Announces Photo Contest Open to Everybody. Want Pictures to Start Exhibit In National Capital to Show Law Makers What Uncle Sam Should Do in the Good Roads Movement

COLONEL THEODORE ROOSEVELT, IDA TARBELL AND MARK SULLIVAN TO SERVE AS JUDGES IN CONTEST

OFFICERS OF NATIONAL HIGHWAYS ASSOCIATION WHO SUBSCRIBED FUNDS TO CARRY ON PHOTOGRAPHIC CONTEST

To secure for the National Highways Association photographs of roads, and in the hope of adding strength to its membership and means, so that the Association may prosecute its work for

"Good Roads Everywhere"

Photographs will be judged by THEODORE ROOSEVELT, MARK SULLIVAN, IDA M. TARBELL

One First Prize of $500.00	40 Fourth Prizes of $15.00 each
5 Second Prizes of $100.00 each	100 Fifth " " $ 5.00 "
20 Third " " $ 25.00 "	166 Prizes Totaling $2,600.00

Photographs will be judged first upon their merit in showing road conditions (good or bad); second, pictorial interest; third, photographic excellence. Any one may become a competitor. It is not required that competitors be members of the Association, and no preference will be given members over non-members in awarding the prizes. It is hoped by the Association that many will be sufficiently interested in its patriotic work to become members, and thus help the cause of "GOOD ROADS EVERYWHERE." This can be done by sending to the Association the dues of any class of membership, in cash (by registered mail), by money order or check to the order of the Association.

Classes of membership are as follows:—HIGHWAY MEMBERS, $5 PER ANNUM; SCOUT MEMBERS, 50 CENTS PER ANNUM; CAMP FIRE MEMBERS, 50 CENTS PER ANNUM.

Any boy under eighteen can become a Scout Member: any girl under eighteen a Camp Fire Member. All men and women eighteen and over are eligible to membership except in Scout and Camp Fire Classes. If you want further information regarding the National Highways Association, send nine cents in stamps to its "Work Shop" at South Yarmouth, Mass., and receive a beautiful three-color map, and a large sheet, also in three colors, giving all particulars about the Association. The nine cents is exact cost of map, information sheet, envelope and postage.

CONDITIONS OF CONTEST:—1. A contestant may submit any number of photographs, any one or all of which may receive a prize. 2. All photographs must be of some road within the United States. 3. Photographs receiving a prize shall thereby become the property of the Nat'l Highways Ass'n with full legal title and copyright vested therein. 4. The full name (do not use initials) and full address of the contestants must be upon the back of each and every photograph submitted. 5. No photograph can be returned. But none will be published by the Association or allowed by them to be published by others, save such as win prizes and are purchased by agreement after the contest is over. 6. Photographs should be addressed to "GOOD ROADS EVERYWHERE" Photograph Contest, Nat'l Highways Ass'n, Washington, D. C. 7. Contest closes at noon, Tuesday, November 7, 1916. Prizes will be awarded as soon thereafter as physically possible. There are no other conditions. There is no limitation as to the kind of photograph; size; when taken by whom; details shown; or number submitted by any contestant, and no correspondence will be entered into about the competition.

Roads will be paid for by the people, they are used by all the people and are free to all the people.

Harpers Weekly and The Breeder and Sportsman

$5.50 WORTH FOR $3.25

Breeder and Sportsman

One Year, 52 Copies, Regular Price $3

THE BREEDER AND SPORTSMAN is the oldest weekly journal devoted to the Horse west of Chicago, having been established in 1882. This interest, together with the Kennel, Gun, Fishing, Coursing and kindred sports receiving the most attention in its columns; together with Agricultural and Dairying Departments, under whose headings especial attention is paid to the breeding, etc., of Cattle, Sheep, Hogs, Poultry, and all other animals connected with stock raising.

As an advertising medium to Racing Associations, Horsemen, Stock Breeders, Manufacturers of Sulkies, Carriages, Wagons, Agricultural and Dairying Implements and Machinery, Sporting Goods, Fanciers, Stock Foods, and all others desiring to bring their wares to the attention of the classes to whose interests the paper is devoted within the field mentioned above, the BREEDER AND SPORTSMAN will be found indispensable.

Harpers Weekly

Six Months, 26 Copies, Regular Price $2.50

At no time has it been so evident to Americans as now, that the most important thing in the lives of all of us is the progress of the European War.

Next to your daily bread the war interests you most vitally. It may even come to be the most important part of your problem of living.

The periodical of greatest fundamental interest to you today is the one that can best report those phases of the war that come closest to your country and you.

Because of connections abroad and at home, HARPER'S WEEKLY is that publication.

As a critical commentary that presents inside facts, it is the necessary bridge for intelligent readers between the daily newspaper and the monthly review.

You want HARPER'S WEEKLY now. You can get it now on trial at a remarkable reduction.

Send $3.25 Now and Get Them Both

THIS OFFER is made to all who will send us $3.25 before April 30th, 1916, whether for extension of subscription, renewal of subscription or a new subscription. Address:

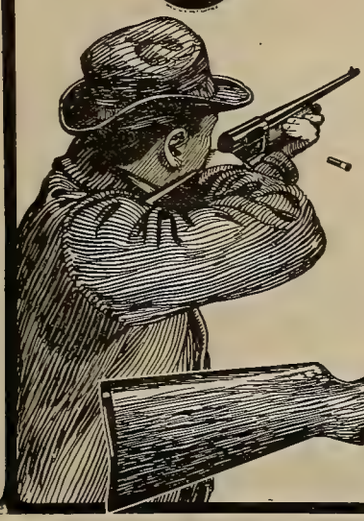
REID'S REMARKABLE RECORD

Adds Further Evidence of the Superlative Quality of

Peters SHELLS

Shooting at Registered Tournaments during the past four years L. H. Reid of Seattle, has made a phenomenal Record of consistent High Scores



1912—	2115 ex	2200, 96.14%,	Pacific Coast High General Average.
1913—	3843 ex	4005, 95.95%,	Pacific Coast High General Average.
1914—	2146 ex	2225, 96.44%,	Professional Average for United States.
1915—	2482 ex	2550, 97.33%,	Pacific Coast High General Average.
Total,	10,586 ex	10,980, 96.46%	

During the above four years, Mr. Reid has shot at nearly 30,000 Registered and non-registered targets, breaking an average practically equal to the above. In accomplishing these results, he used about two-thirds TARGET (medium grade) and one-third IDEAL (high grade) shells, all with

"STEEL WHERE STEEL BELONGS"

THE PETERS CARTRIDGE CO., — Pacific Coast Branch, — 585-587 Howard St., SAN FRANCISCO, CAL.

REMINGTON UMC

AND THE REFEREE CALLED "DEAD!"

There is a little stronger rallying to the traps this year from coast to coast. More clubs are being formed and more members of old clubs are active than in recent years.

Might it not be a good time now for you to get that Remington Autoloading Shotgun that you have long wanted?

One of the country's best known trapshots boosted his average from 90—where it seemed doomed to hang—to 95-plus after shooting this gun but a very short time. We can't all equal this feat, perhaps, but we all want to give our skill every advantage.

You'll like the Remington Auto as a single loader — you simply drop in a shell, press a button, and you're ready to fire. Action stays open after each shot. On "doubles" its superiority is even more pronounced. It's a natural pointer, recoil at a minimum and safe absolutely.

Let your dealer show you this "Autoloading Shotgun That Works" — Write for booklet.

THE REMINGTON ARMS UNION METALLIC CARTRIDGE CO.,

Woolworth Building New York City, N. Y.

The 20th Indoor Championship Match *and* Prize Shoot

WON WITH

WINCHESTER

.22 Caliber Rim Fire Cartridges

The winning of this — the most important indoor shooting of the year — means more than simply another addition to the long list of triumphs to Winchester — the **W** brand of guns, ammunition, etc. It is convincing proof that the long and firmly established policy of Quality First, followed so religiously in the manufacture of Winchester goods, has not been relinquished an iota, notwithstanding the unparalleled demands made upon the Winchester company for its products during the last twenty months. It plainly shows that, no matter how unusual the condition, Winchester goods can always be relied upon. The big winners at the Indoor Shoot were as follows:

100 SHOT CHAMPIONSHIP MATCH

Won by L. G. Buss, score 2473, with Winchester cartridges and Winchester Telescope Sight. All of the first six contestants used Winchester Telescope Sights, and four of them Winchester cartridges.

RING TARGET CONTINUOUS MATCH

G. W. Chesley and H. Hunziker, shooting Winchester cartridges, tied with two other shooters, making five 75s—perfect score. Three of the four contestants in this match used Winchester Telescope Sights.

ZIMMERMAN TROPHY MATCH

Won by G. W. Chesley. Second, H. Hunziker. Third, L. C. Buss. All shooting Winchester cartridges. Mr. Hunziker made a perfect target of 5 degrees in his string, and Mr. Chesley one of 6 degrees.

BULLSEYE MATCH

Won by S. Murphy with a target measuring 7 degrees. Second, J. J. Young with a 7½ degree target. Third, C. Zettler with an 8 degree target. Fourth, G. W. Chesley with an 8 degree target.
All four place winners used Winchester cartridges.

FOR RELIABILITY AND RESULTS USE THE **W** BRAND

PARAMOUNT PARKER GUNS

Mr. Woolfolk Henderson, an amateur, by scoring .9753% made the
HIGHEST OFFICIAL GENERAL AVERAGE FOR 1915

Look...

Mr. Lester German, a professional, by scoring .9742% made
SECOND OFFICIAL GENERAL AVERAGE FOR SAME PERIOD
CLEAN SWEEP ON DOUBLE TARGETS
Messrs. Guy V. Dering, S. A. Huntley and Woolfolk Henderson won
FIRST, SECOND and THIRD,
respectively, by scoring 9000%, 8666% and 8400%.

Read...

THE WORLD'S RECORD!!!

At Atlantic City Sept. 15 to 17 Mr Lester German broke all Tournament Records by scoring 647 **OUT OF 650 TARGETS**, with one run of 372 straight, which is longest for the year.
PARKER GUNS have won the Grand American Handicap 9 times out of 25 offers, once with 100 straight, only time made. Also 7 out of 9 Interstate Championship Events with highest scores ever made, twice with 198 x 200 at 18 yards rise.

Remember

PARKER PACIFIC COAST RECORDS

In California Mr. Henry Pfirrmann won the Pacific Coast Handicap and Mr. J. Foster Couts won the Championship of California.
In Portland, Oregon, Mr. P. H. O'Brien by scoring 241 straight made the record for the Pacific Coast.

If interested in small bore guns write for instructive booklet which will be sent free on request. For further particulars regarding guns from 8 to 28 gauge, address

TRAINING THE HOUND

A PRACTICAL TREATISE ON THE TRAINING OF FOX HOUNDS, BEAGLES, AND COON HOUNDS.

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; $1.50, postpaid.

STARTING PAYMENTS—$25 to start in the Two-Year-Old Pace; $35 to start in the Two-Year-Old Trot; $35 to start in the Three-Year-Old Pace; $50 to start in the Three-Year-Old Trot. All starting payments to be made ten days before the first day of the meeting at which the race is to take place.

SUBSTITUTIONS.

If a mare proves barren or slips or has a dead foal or twins; or if either the mare or foal dies before May 1, 1916, her nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there will be no return of a payment nor will any entry be liable for more than amount paid in or contracted for.

E. P. HEALD, President. F. W. KELLEY, Secretary,

P. O. Drawer 447. 366 Pacific Bldg., Cor. Market and Fourth Sts., San Francisco, Cal.

MR BROODMARE OWNER, do you realize the importance of the simple facts that sixty of McKinney's sons and nearly fifty of his daughters are producers of standard performers? That the McKinneys won more money than any other family in 1915? That the McKinneys won the largest percentage of the futurities, both east and west, in 1915? That McKinney has more sons to sire 2:10 performers than any other stallion living? Keep these facts in mind, and remember that I offer you the services of

THE VERY BEST SON OF McKINNEY

CARLOKIN 2:07 1-2 EXHIBITION MILE 2:05 1-4

Champion Trotter and Champion Sire of Trotters in the West

Reg. No. 36548. Licensed Pure Bred, Cert. No. 41.

Mahogany bay. Height 15.1½. Weight 1060.

Sire of ESPERANZA (3) 2:09, only three-year-old to win every trotting stake for that age on the Pacific coast, and also the following colt performers:

The Lark (4)	2:09½	Carsto (2)	2:22½
Ethel D. (3)	2:11	Helen Belle (2)	2:22½
Carl (3)	2:14¼	Carlschen (2)	2:23
Doctor S.	2:14½	Santiago (3)	2:24¼
Johnny Dugan p (3)	2:16	May Marian p (3)	2:24¼
Hermes (2)	2:16½	Carlrich p (2)	2:24½
John Warwick (2)	2:17	El Carbine (2)	2:27½
Nicola B. (3)	2:18½	Eileen C. (3)	2:29
Miss Carlokin p	2:20	Carlos (2)	2:29¼
Carleta (2)	2:20¾	Fulton G. (2)	2:30

Carlokin is the best son of McKinney not only by performance but by breeding as well, his dam being the famous producer Carlotta Wilkes, whose ten performers include four with records below 2:10, while his grandam and great grandam were also producers, by Alcantara and Clark Chief. He has demonstrated that he sires more early and extreme speed than any other stallion in California, and his get are courageous race horses, endowed with soundness and wonderful vitality.

Fee: $75 the season, usual privileges; details on request.

W. G. DURFEE 2019 South Figueroa St. LOS ANGELES, CAL.

Saddle Horse Breeders are Respectfully Offered the Services of the Magnificent young Stallion

Le GRAND McDONALD

Reg. No. 6360. A. G. S. H. B. A. :: Licensed Purebred Cert. No. 2003.

Winnner WORLD'S JUNIOR CHAMPIONSHIP, P.-P. I. E.

Foaled in 1913, son of Grand McDonald 2228 (son of the world's champion Rex McDonald) winner of the championship of three states for the two years last shown; dam Queen Alice 10649 by Forest LeGrande 2107.

In service for the season of 1916 at the ranch of The Bridgford Company near Knightsen, Contra Costa County, at fifty dollars to a limited number of approved mares only

For further particulars address:

WILBUR LOU 2:10¼

Record made in third heat of winning race as 3-year-old.

A world's champion as a yearling, record (1) 2:19½; unbeaten as a two-year-old, a famous futurity winner at three, and at six years of age the "sire of the day" in California, his first crop of two-year-olds including

NATALDAY (2) 2:13½

Champion two-year-old race trotter of the Pacific Coast, winner of Pleasanton and State Fair Futurities, 1915

FIESTA LOU (1) 2:25, (2) 2:22½, pacer, halfmile track records, separately timed in a race in 2:14½.
GOLDSMITH LOU (2) 2:29, trotter, breeder's record on halfmile track.
BILLIE BOYD (2) 2:30, trotter, breeder's record on halfmile track.
SELMA PALEY (2) trial 2:26¼, trotter, public trial on halfmile track.

Colts and Fillies by WILBUR LOU Always on Sale

Wilbur Lou is by the great race horse and sire Kinney Lou 2:07¾, out of the triple producer Louise Carter (3) 2:24, grandam the famous Ingar, dam of 6 including John A. McKerron 2:04½, etc.

Breed to him for "Horses that will race." Fee for 1916, seventy-five dollars with usual privilege or money refunded at our option. Write for detailed particulars, all information gladly furnished.—Licensed Pure Bred, Cert. 23.

HEMET, CAL.

Derbertha Bells

Licensed Pure Bred, Cert. No. 226

NO. 60907 :: A. T. R. RULE 1.

Derbertha Bells, foaled 1911, stands 15.3, weighs 1200 pounds and is a solid dark bay or brown of magnificent conformation, style and trotting action. His breeding, too, is of the best, tracing 20 times to Hambletonian 10—5 through Electioneer, 5 through George Wilkes, 4 through Strathmore and 4 through Abdallah 15 (the big four of the sons of Hambletonian) and twice through his daughters; balanced by 18 crosses to Mambrino Chief 11—five of these through his greatest son Mambrino Patchen 58 (leading progenitor of the dams of trotting sires); 25 crosses to Imp. Bellfounder, 8 to Henry Clay, 8 to Imp. Trustee, 5 to Pilot Jr. 12, and sustained by such other famous broodmare sires as The Moor, A. W. Richmond, Black Hawk, St. Clair, Geo. M. Patchen, Grey Eagle, Imp. Glencoe, Williamson's Belmont, etc. His broodmare inheritance is incomparably great—5 crosses to Green Mountain Maid (dam of 9 including a world's champion and 4 sires including Electioneer, the world's greatest trotting progenitor), 3 crosses to Alma Mater (dam of 8 and 7 sires, including Alcyone and Alcantara), and one each to Miss Russell (dam of 8 including Maud S. 2:08¾ and 6 sires including Nutwood, the world's greatest broodmare sire), Dolly (dam of 4 and 5 sires, including Director and Onward), Beautiful Bells (dam of 11 trotters including 4 world's champions and 9 sires) and Minnehaha (dam of 8 including a champion yearling and 6 sires). These are the greatest mares of history in number of descendants in the standard list, to which add two crosses to Bertha (the only mare with 2 in 2:04½, 5 in 2:10 and 13 in the list; with two 2:05 producing sons, five 2:10 producing sons and two other sons with produce only a fraction slower).

This pedigree contains the blood of 20 mares (counting duplicates) with an average of 9 performers each and presents an aggregation of family founding sires and dams unexcelled, if not unequaled. Neither is it necessary to confine ourselves to the standard or even to the 2:10 list, or go into the musty records of the distant past for examples of the prepotency of these blood lines in the production of speed, but we can easily and abundantly demonstrate their value in speed of the first flight in the present generation. He has 1 two-year-old and 2 yearlings that stamp him as a sire entirely worthy of his superlative antecedents, as they (like their sire) are uniformly large, handsome, intelligent, tractable and of great speed promise. Come and see them and the new crop and you will breed to him. Fee $25 the season with return privilege. Tabulated pedigree upon request.

J. W. PENDLETON,
1601 Seminary Avenue, Oakland, California

Don't Make a Mistake by not Breeding to the Great

KING LILLY POINTER

Registered No. 5223.

By the great Star Pointer 1:59¼, 3183, dam Lilly S. by Direct 2:05¼, 20113,—two world's champions for many years.

Second dam the great race and broodmare Lilly Stanley.

King Lilly Pointer is a green horse with remarkable speed. With very little work he has paced a mile on the Los Angeles track in 2:08¼ with ease. He goes without straps and has paced a half in 1:01¼ in third position all the way around, and has easily stepped quarters in 29 seconds. In another work out he went to the quarter in 30½ seconds, the second eighth in 14 seconds, finishing the last quarter in 30 seconds, going the seventh eighth in 14 seconds,—a 1:52 gait.

He is a seal brown in color, 15.2½ hands high, weighs 1100, and his get prove that he will be a sire of high-class race horses.

Fee $35 cash with return privilege, or right of substituting another mare. Best of care taken of mares, but no responsibility assumed for accidents of any kind.

Address for particulars, tabulated pedigree showing that he is the greatest bred pacing stallion in the United States,

W. H. NESMITH, 4218 S. Figueroa St., Los Angeles, Cal.

King Lilly Pointer can be seen at Los Angeles Exposition Park. Phone Home 28446.

Expressive Mac 2:25½

A. T. R. No. 41513. Licensed Pure Bred, Cert. No. 1041.

SIRE OF

Clara Mac 2:04½; Vera Hal 2:05; Madam Mac 2:07¼

Only stallion offered for service in California to sire two in 2:05, three in 2:10.

Also sire of Eddy Mac (3) 2:29½, trial 2:13; Nellie Mac trial 2:09½ trotting, 1915, and others with fast trials

Son of McKINNEY 2:11¼ (sire of 27 in 2:10) and the greatest living broodmare, EXPRESSIVE (3) 2:12½ (dam of 6 trotters, 2 in 2:10) by ELECTIONEER 125. Ideal in color, size and conformation—seal brown, height 16½ hands, weight 1275 pounds. Permanently in the stud at my ranch three miles south of Selma at $25 the season, usual return privilege, or $35 to insure. Good pasture at $2 per month and best of care given mares but no responsibility assumed for accidents or escapes. Address for all particulars,

J. H. NELSON, Selma, Cal.

The demand for space for exhibits at the California State Fair this year is greater than it has ever been at this season. Manufacturers and others who exhibited at the P.-P. I. E. for the first time at any exposition found that it paid, and they are now applying for space at Sacramento early so that they will be sure of getting it. Nothing has been more thoroughly proven than that exhibits at fairs are profitable if the exhibits are meritorious. The improvements made in the breeds of livestock and in farm machinery would never have reached their present standards in this country but for the ocular demonstrations that were made to farmers and stock men at the state and county fairs which have been held for many years from Maine to California. No description of an animal or a machine ever written will convey a knowledge of it to a person like an actual view and examination. A volume might be written describing the machine which sets the type used on the Breeder and Sportsman but a very faint idea of its marvelous work and construction will ever be attained by any person who has not actually stood by and seen it in operation. It is a great pleasure to know that applications for space at the California State Fair for 1916 are already coming in in greater numbers than usual at this time, as it presages a bigger and better fair than ever and, of course, a big increase in interest and attendance.

A Grand Circuit program of approximately twenty-eight events for a total amount of over $45,000 was the decision of the New York State Fair Commission at a special meeting held in Albany last week. In number of days exclusively for harness racing sport, nature of classes, amount of purses and stakes and divers varieties of events—professional, amateur and colt races—the Syracuse six-day program will surpass anything announced for the coming season, while in novelties in the system of racing, entrance fee payments and liberal concessions to owners it will outdo its former records.

The three heat plan under which the races at Santa Rosa and Sacramento will be conducted will be a boon to the horses as well as the horsemen. There will be no more of those long drawn races with none but exhausted horses in the final heats. Racing will be more snappy and miles will be faster. No horse properly trained will suffer from starting in such races three times in one week, as a three heat race is no more tiresome to a horse than the usual work-out he gets on Wednesdays and Saturdays at most training tracks.

$10 is due Monday next on yearlings named in the Pacific Breeders' Futurity. Don't let the foals of 1915 that are in this stake drop out by negligence or intention. Stake colts will be in demand in 1917 and 1918, the years the money in this stake will be raced for. A word to the wise is sufficient.

ONE BIG DAY AT DIXON.

I want to be,
I want to be,
I want to be right there in Dixon
When the horses start on the 6th of May.
Oh, I want to get a whiff of that new-mown hay
That lies around
All o'er the ground
Where the horses race at Dixon.

That's the song the horsemen who reside within a radius of 150 miles of the alfalfa centre of Solano county are now singing and on Saturday next they'll be at Dixon. May 6th is the date of this year's renewal of the annual picnic and race meeting that has been held at Dixon for thirty-five years. Attractive athletic and forensic features have been arranged. There'll be base ball and field sports of all kinds, four-round boxing exhibitions and an address by Governor Hiram Johnson. Several bands of music have been engaged and a big pageant with beautiful floral floats will parade the streets, while in the evening a big chorus will render a special program of music. But the big attraction will be the harness races for which purses have been hung up. One event will be the decision of the Dixon Futurity for two-year-olds which will have a good field of starters. There are usually between three and four thousand people present at the Dixon May Festival, but the managers think the crowd will reach five thousand this year. The new causeway across the tule marsh between Davis and Sacramento is now open for auto travel and the Sacramento people expect to send a thousand auto parties to Dixon next Saturday, May 6th; while Woodland, Vallejo, Suisun, Rio Vista, Winters and Davis will be depopulated on that day. All roads will lead to Dixon Saturday.

That some high class racing will be enjoyed by those who attend this May Festival the following list of entries for the races will show:

First Race—Colt Stake.

L. B. Daniels names Merrill by Teddy Bear.
M. C. Delano names Raymond by Teddy Bear.
Lou Mativia names The Lie by Palite.
H. A. Hershey names Galen Logan by Jim Logan.
J. E. Montgomery names Bay Colt by Jim Logan.
A. W. Longley names Monia by Demonio.
J. Coram names Mollie McCarthy by Vernon McKinney.

Second Race—2:20 Pace.

H. B. Rohen names Marie by Diablo.
J. E. Montgomery names Lock Logan by Zolock.
B. Cohen names Mabel Dillon by Sidney Dillon.
Geo. Machado names Bold Harry Aerolite by Aerolite.
Jos. Ryan names Hamburg Bell by Stillwell.
Dr. J. H. Haile names Palita by Palite.
M. C. Delano names Oro Moe by Demonio.
Sam Silvey names Graustark by Aerolite.

Third Race—Free-for-All.

L. B. Daniels names John Malcolm by Dan Logan.
M. C. Delano names Bondalean by The Bondsman.

Reports from manufacturers and dealers respecting the present demand for buggies and the prospects for future business vary quite a little according to the localities from which we receive them. This statement came from an official of the Carriage Builders' National Association. In some Central and Western States reports are of a very cheering character, not only as regards the amount of business already transacted, but also in reference to the immediate outlook.

A great many dealers state that their business has far exceeded their expectations, and that numbers of second orders have been necessitated by the clearing up of their first lots. In other cases dealers tell us that their trade so far this year has been about normal—no variation being noticeable, one way or the other.

As a matter of fact, there are undoubted signs of a considerable improvement in the horse-drawn vehicle business, and the preponderance of favorable reports over those of the opposite character is easily five to one.

"The demand for shafts and poles for horse-drawn vehicles has not been materially affected in the past five years," says an Ohio member of the Carriage Builders' National Association, who has exceptional opportunities for gathering information on the subject.

"The enormous increase of gasoline cars for both pleasure and commercial purposes, remarkable enough, has not caused a big slump in the sale of shafts and poles.

"This unusual fact is attributed to the great increase of population in the United States during the past five years. This increase has been able not only to absorb the increase in manufacture of automobiles, for both pleasure and commerce, but to take care of the old trade in horse-drawn vehicles as well.

"Very few of the big manufacturers of buggies and carriages make their own shafts and poles, because they can be more cheaply bought of a factory making them exclusively than made as a side line in the buggy factory.

"I know of specific instances where the farmer is going back from the automobile with its expensive upkeep to the old buggy or carriage. The trend of the farmers, as indicated by examples he can personally cite, seems to be toward the horse and buggy," said the same authority.

"The farmer, perhaps, at first does not realize the large expense of keeping an automobile in repair, although the initial cost may seem tempting. It is my opinion that in the future more buggies and carriages will be bought by the man on the farm. Especially will this be true, now that the price of gasoline has climbed so high, while the farmer can raise all the horse feed he requires on his own premises and at the minimum of cost."

THE HAY MARKET.

Scott, Magner & Miller's San Francisco hay market report of last Saturday says:

Receipts of hay for the past week were 1785 tons, the previous week 1884 tons. These receipts are nominal for this time of the year and hay has moved from the tracks freely.

Weather conditions throughout the week have been dry and a great deal of anxiety is being manifested in the country hay districts as moisture is very badly needed in practically all sections and most all reports are that crops will be decidedly short without rain almost immediately. This feeling throughout the country districts is commencing to react on the city market with the result that there has been during the week a much firmer tone than last week and we believe within the next week the market will show decided advances in price unless we receive the long-looked for rains in the meantime.

Another car of new alfalfa arrived and was of exceptionally good quality of first cutting hay, being absolutely clean and free from weeds and apparently well cured. This carload arrived to ourselves and was sold at $12 per ton, having been shipped from the lower San Joaquin valley, which would probably net the farmer in the neighborhood of $8.50 per ton f. o. b. cars, this being an exceptionally good price for first cutting alfalfa, which usually is sold in the neighborhood of $4 to $5 per ton f. o. b. cars at this time of year. No doubt this price was obtained on account of the old crop being practically exhausted.

Volunteer is being harvested in many sections and we look forward for receipts of this commodity in the course of two weeks' time.

Choice wheat hay in light bales and red oat hay are extremely scarce and eagerly sought and will bring in excess of our top quotations. There has been quite a movement of hay to northern coast ports. Southern California is now receiving from the Imperial Valley which curtails shipments from this city. There is a small amount of hay moving to interior points, but not much.

Demand for export is nominal.

Straw is without interest or inquiry.

We quote: Fancy wheat hay (light bales), $17 to $18; No. 1 wheat or wheat and oat, $13 to $16.50; No. 2 wheat or wheat and oat, $12 to $14.50; choice tame oat, $17 to $18; other tame oat, $12 to $15; barley, nominal; wild oat, $12 to $14; alfalfa, 12 to $15; stock hay, $6.50 to $8.50; No. 1 barley straw, $25c to 40c.

The condition of the Chicago draft horse market was summed up last week by the Breeders Gazette as follows: "Scarcity of good heavy drafters is a trade feature at all markets and such stock is in demand. Army trade is being done on the same basis, largely at $135@165. Southern buyers are taking light stuff at $50@100 and light farm workers are going out at $75@100, with medium weights at $110@130 and more desirable stuff at $140@155. There has been a trade in farm mares at $170@200. Plain and rough-haired commercial chunks are selling at $165@185, light chunks with quality and flesh at $185@200, medium weights $190@210 and heavy $200@240. Big horses if deficient in condition, are selling largely at $240@260, up to $285 if good, and where quality makes it possible."

W. B. Carpenter, of Kansas City, Mo., intends to produce a new breed of horses that he will call wagon horses. The stallions used must be registered Percherons. No known ancestry will be required for the dams, but they must have quality, handsome proportions with rich solid color. He desires to produce horses that will weigh from 1100 to 1400 pounds for use on express and delivery wagons, and from which artillery horses can be drafted when necessary.

Houchin & Anderson, Astral King Farm, Jefferson City, Missouri, held their annual sale of saddle bred horses on April 11th, at the farm. Thirty-one head were catalogued and sold. The highest price of the sale was $775 paid by Miss Helen Chubbuck, of Peoria, Illinois, for the mare May Dare by Raven Dare. But one horse brought less than $125 and that was knocked down for $110. The average for the 31 head was $280.

Heard and Seen Here and There

"When a man has learned from experience how to put a race track in condition it is very unwise for trainers to butt in and try to change his methods," said that veteran C. A. Durfee the other day when seated in the office of the Breeder and Sportsman.

"I distinctly recollect," he continued, "the howl that went up from the trainers (and we all know they can howl some when a track is not just to their liking) over the condition of the Stockton track when the Breeders held their meeting there in 1912. That's a black adobe track and it looked as dry as a tariff speech and as hard as a cement sidewalk when the horses reached there from Sacramento, where they raced the previous week.

"I was the head of the committee on track and on Monday morning I interviewed the old fellow who did the sprinkling and harrowing and suggested that more water was needed. He gave me a sort of pitiful look I thought, and said: 'I've worked this track for about forty years and have convinced myself that if it is well watered and the horses allowed to train over it it will look like an asphaltum street by the time racing begins.'

"I had come to the conclusion long before that day that it is very unwise to interfere with a man's business when he gives evidences of knowing it, so I said to him, 'Go ahead, old man, and I'll stay by you, but I'll have to stand a lot of abuse.'

"On Tuesday that track looked pretty bad and I was getting ready to resign and leave for home as the meeting opened next day. That night the old fellow got his water wagon out and began pouring water on the track until the trainers began to roar louder than ever. When he finished sprinkling he said to me, 'I'll put the chain up in the morning and no one must be allowed on the track before 11 o'clock.' I thought right then that if I held the place as chairman of the committee up to that time I would have to dig a trench and defend myself with a Gatling gun, but after consultation with the other members and getting their moral support I concluded to hold the fort.

"You should have heard the boys the next morning. It seemed as if every horse on the track and a lot of matinee and road horses from town and the surrounding country needed a track workout that morning and must get it before ten o'clock. They came at me singly, in twos and threes and in battalions. For the first time in my life I refused to argue the question, but stood pat on the chain staying up and refused to budge. The sun came out good and strong and about ten o'clock the track worker got out with his California harrow and cut a cushion about a half-inch deep. The track was just moist enough for the harrow to do this work well, and the old man kept going until about noon, when he had it to suit him.

"When the races were called and the horses began to warm up it was very noticeable that the pacers and trotters alike came through the stretch pretty fast and when the bell rang they began breaking records. Lottie Ansel, a two-year-old, took a record of 2:14¼, Lovelock paced in 2:05½, and the Big Train San Felipe won the first heat of the 2:15 trot in 2:10. The next day that little pacer Alberta took the first heat of the 2:05 pace in 2:03¾. Until the end of the meeting horses went faster than they ever had before and a good deal faster than many of them have gone since. It was a regular speed fest. I felt then that several of those trainers who had kicked the hardest owed me an apology, but I don't think any of them paid up. You know, the people in this world are divided into two classes, those who think they know how to run a hotel and those who are certain they understand how to put a race track in condition, but I realized early in life that the man who lives on and works an adobe race track is the only man who understands putting it in condition for racing, and whenever I am on the committee when we race at Stockton that same old man, if he is alive and on the job, will do the starting for the water wagon, the harrow and scraper events."

◈ ◈ ◈

It is a very common thing when the old time district fairs are up for discussion to hear the "large crowds that attended in those days," referred to. As a matter of fact the population was not very dense in the districts where the most successful of some of the old California fairs and race meetings were held and "the gate" was very seldom the most important item of the receipts. In one of these discussions recently a gentleman who had served quite an extended term as secretary of one of the best district fair associations twenty-five or more years ago gave the following as about the average figures for the receipts of a six days fair held in his district. Gate $1500, grand stand $600, pool privilege $2000, wheel of fortune $800, bar $800, program $50, other privileges $200. A total of nearly $6,000 without counting entrance money, which in "the old days" was ten per cent of the purses. At the last harness race meeting held a few years ago at the same track to which the foregoing figures refer, the gate receipts were very close to $2,000 for a four days meeting, the grand stand made $800, but there was of course nothing at all obtained for the betting or gaming privileges and the bar privilege brought only $150. Thus the receipts showed that the attendance had increased in about the same proportion as the population of the county, but the loss from the bar and gaming privileges (nearly $3,500) made the meeting a loser, so much so that no meeting has been given at that track since. All of which goes to show that when the last meeting was given the people of that section had not lost any of their interest in harness races, but that their chances to "bet a few dollars" and their appetite for "red liker" had been very much curtailed.

◈ ◈ ◈

Publicity and the harness horse is the subject of a leading article in last week's Western Horseman that will be read with a hearty endorsement by every owner and breeder of trotters and pacers. Baseball is instanced as one of the sports which is given great publicity by the daily press, and the statement made that "entire pages are taken up with stories of the team in big league towns, pictures of the stars are run by the score and in every conceivable way the gossip concerning the players, their individualities, habits, etc., is turned into capital to make the season a paying one for the men who are controlling the sport." Then the Horseman criticises the daily press for not devoting more attention to harness horse matters and suggests that horsemen organize for the purpose of securing proper representation in the news columns. The idea is an excellent one but until the horsemen realize that the Lord only helps those who help themselves they will continue to bemoan the fact that the harness horse is almost completely ignored by the public press. The sporting columns of the daily press in most big cities are not managed by men who cater to any particular sport, but are filled with the news that the editor from experience knows the people want. Is there anyone who supposes that the space devoted to automobiles every day would be thus filled if the automobile manufacturers were not vieing with each other in advertising for which they pay liberally? Is there a first-class amusement resort of any kind that does not have its press agent? Every grammar school baseball nine has a member who is required to send the score of every game played to the daily press. Publicity is considered a necessity and no effort is spared to get it. If the harness horse men will organize and employ a press agent to furnish prompt and reliable reports of the doings in horsedom to the daily press, they need not fear but they will be accepted, and the harness horse column be made a feature of nearly every leading journal. "It pays to advertise," but the people who run newspapers are not given to boosting any sport in which the participants show so little interest that they cannot find time to furnish the editor a few facts.

◈ ◈ ◈

If there is any person in this country who imagines that harness racing is losing its popularity with harness horse owners and breeders he should have his attention called to the lists of entries being received by the enterprising associations east of the Rocky Mountains. The Kentucky Futurity for two and three-year-olds sprung a surprise to the pessimists when it announced that this stake had received a total of 932 nominations, an increase of 82 over last year. Now comes the three half-mile track associations in Orange county, New York, with an average of from 35 to 40 entries in every race of a big program of harness races. Other associations are reporting a big increase in entries and there seems to be a general revival in harness horse affairs all along the line. The racing of trotting and pacing horses has been an American sport for so long that it is foolish to predict its demise because the automobile has taken the place of driving horses on the road. Few people who live near the water now use a row boat for the purpose of transportation, but the racing of oar-propelled boats and shells is still one of the biggest features of sport all over the world, and for a college man to make a place on the first eight is still and will continue to be one of the greatest honors in college athletics.

From California to Maine the state and county fairs find that harness racing is the most popular of all the amusements thus far devised, and every progressive fair association gives a good program of harness racing annually. There were nearly two thousand harness race meetings reported in the United States last year and there are more meetings advertised for 1916 to date than were announced up to this time in 1915. Contests between speed horses have drawn cheering and enthusiastic crowds since history began to be recorded and will continue so long as the equine race exists and any members of it are bred for speed.

◈ ◈ ◈

It is estimated that England has 800,000 horses in military service, France 600,000, Italy 300,000, Russia 800,000, and the central powers 1,500,000.

THREE HEATS TO THE RACE.

Three heats and three heats only is to be the rule at the Breeders' meeting to be held at Santa Rosa in August. In all class races a purse of $900 is offered, or $300 for each heat, divided 50, 25, 15 and 10 per cent. There will be no additional money for the horse standing best in the summary and if no horse acquires this honor neither will he acquire a winrace record. The new rule (Rule 2, Sec. 9) states: 'In races limited to a specified number of heats or dashes the horse standing best in the summary shall acquire a winrace." Consequently if no horse stands best no horse will get a winrace. The class events announced for the Santa Rosa meeting, the particulars and conditions of which will be found in the advertisement, are announced as follows:

Trotting		Pacing.	
2:09 class	$900	Free-for-all	$900
2:12 class	900	2:10 class	900
2:15 class	900	2:13 class	900
2:20 class	900	2:20 class	900

These races with the four divisions of the Pacific Breeders' Futurity will provide a program of racing that will not only attract all the best horses remaining California this year, but should also provide excellent contests in each and every event. Three heats only with every heat a race will make snappy and close racing. The horse that wins a position in a heat will get the money he earns, even though through accident or disability of some kind he may be prevented from starting or be distanced in a succeeding heat. The Santa Rosa track which is known as one of the best and fastest on the Pacific Coast will be in perfect condition for racing as it is now in the very best of shape for training, and the official announcement that the Pacific Coast Trotting Horse Breeders' Association will open the California circuit there in August will doubtless lead many trainers to move their horses to that track forthwith. Santa Rosa should be a lively place for the harness horse trainers from now to the close of the meeting and there is no finer climate in California than the city of roses can furnish during the intervening months.

EASTER RACES AT HANFORD.

The Kings County fair grounds was the scene of a race meeting Easter Sunday that would have done credit to one of the pretentious circuit tracks. Nearly six hundred enthusiasts were in attendance and all were satisfied at the completion of the program that this section of the State has some good harness horses and that the love of harness racing has not gone from Kings county.

Firebaugh, the good Fresno pacer, won the free-for-all pace with Leggett's Mollie a close contender and a winner of one heat.

Miss Brown by Altavela won the 2:30 trot after losing the first heat to Dexter W.

Sidney Borden, a very promising son of Guy Borden, performed like his illustrious sire and won the three-year-old pace in race horse style. Keep your eye on this bird.

Dr. S. E. Watkins, Monte McKay and T. N. West were the judges, while E. Gravatt and U. R. McKay took and recorded the time.

Clarence Johnson, of Sacramento fame, did the starting in clever style. Results:

First race—Free-for-all pace. Half-mile heats.

Firebaugh	(Brollier)	1	2	1
Mollie	(Leggett)	2	1	2
Charlie C.	(Gray)	3	4	3
Queen Mona	(Reynolds)	4	3	4

Time—1:05¼, 1:04½, 1:06.

Second race—2:40 class trot:

Miss Brown	(Brown)	2	1	1
Dexter W.	(Levine)	1	3	2
Grey Jenny	(Gallup)	3	2	3

Time—1:15, 1:16¼, 1:14½.

Third race—Three-year-old pace:

Sidney Borden	(Senter)	1	1	
Julia Direct	(Gallup)	2	2	
Guy Rock	(Gray)	3	3	

Time—1:11½, 1:10½.

MARJORIE AGUIRRE.

STANFORD-OCCIDENT FUTURITY No. 2.

Monday, May 15th, is the date set for closing the above named stake this year. In the trotting division $500 will be awarded in each event of the three heats, to which the race is limited unless no horse wins two of the three, in which event a fourth heat will be raced by the heat winners. The money will be divided 50, 25, 15 and 10 per cent in each heat, and an additional $300 will go to the horse standing best in the summary. In the pacing division there will be $350 for each heat, with $150 additional to the horse standing highest at the end of the race. It costs but $2 to nominate a mare in this stake. The late closing date this year will probably result in a loss in number of nominations, but this very fact should induce every owner of a prospective trotting or pacing bred colt to see that he is started in life with an eligibility to this rich stake as his percentage of chances to win will consequently be greater. Don't let Monday, May 15th, pass without nominating as many mares as you can possibly afford to in the Stanford-Occident Stake.

H. S. Hogoboom's fine colt by Robert Bingen has been declared out of the stakes in which it was entered owing to its being ruptured. This is not the only bad luck H. S. has had this year but bad luck never stopped him yet and he intends to win the stake for foals of 1915 with Beautiful Baby by Palo King.

THE EARLY DAY FAMILY OF THE AMERICAN TROTTER.

[P. M. Babcock, Breeders' Gazette.]

England having produced the Thoroughbred, Hackney, Shire and Suffolk, Scotland the Clydesdale, France the Percheron, Belgium the Belgian, and Russia the Orloff trotter, it remained for America to evolve the greatest families of trotting race horses the world has ever known. That imp. Messenger was the fountainhead from which has sprung practically all the American trotting families is a fact so well established by the records that it is not now and never has been disputed by intelligent American horsemen. He was as much the founder of the American trotting race horse as the Darley Arabian was of the Hackney, or the Godolphin Arabian of the English Thoroughbred.

Messenger was foaled in 1780, and was probably bred by John Pratt of Newmarket, England, although this fact is not known to a certainty. He was sired by Mambrino, he by Engineer, he by Sampson, he by Blaze, he by Flying Childers, and he by the Darley Arabian. Messenger first appeared upon the turf in 1783 when he was 3 years old and started in 2 races, which he won. He was raced in 1784 and 1785, but the names of his get while in England do not appear in the list of successful race horses, and it is fair to presume that they did not cut much of a figure on the English turf. In 1788 Messenger was purchased by some American horseman and imported into Philadelphia, but strange as it may appear the name of his importer is not given in the history of the horse as written by the most distinguished writers of that day. From 1788 to 1808 Messenger was in the stud at Philadelphia, at Noah Hunt's near Pennington, N. J., in Bucks county, Pa., on Long Island, in Ducthess county, N. Y., at Maidenhead, N. J., at Goshen, N. Y., at Cooper's Ferry opposite Philadelphia and in Westchester county, N. Y. The stud career of Messenger in this country covered a period of 20 years, during which he conferred greater benefits upon the breeding interests of America than any other horse that ever lived.

Messenger is described as having been a "grey that became lighter and flea-bitten with age. He was 15.3 hands high and for a Thoroughbred his appearance was coarse. He did not supply the mind with an idea of beauty, but he impressed upon it a conception of power."

Among the sons of Messenger that achieved distinction as a sire of trotting speed was Mambrino. This horse was foaled in 1806. The most prominent turf performer of his get was the famous Betsy Baker, which in her day was considered one of the best trotting race horses that had ever been seen on the Long Island racetracks. In 1822 Mambrino was bred to Amazonia, a granddaughter of Messenger, and one of the fastest trotters of her day, and the produce was Abdallah, which has been justly described as "king of trotting sires of his generation." It was this horse that sired Hambletonian 10, whose bloodlines are found in fully 90 per cent of the present-day trotting race horses.

Bishop's Hambletonian was another son that distinguished himself as a sire of trotting speed. This horse was foaled in 1804. His dam was by imp. Shark, a pure Thoroughbred. His latter years were spent in Vermont. While there he sired Harris's Hambletonian and this horse became the progenitor of a great family of trotters known as the "Vermont Hambletonians," some of which were very fast pacers, among them being the famous Hero, the fastest pacer of his generation. Bishop's Hambletonian was also the sire of Judson's Hambletonian, which sired the Andrus horse that sired the fast trotting mare Princess, which often raced against Flora Temple. He also sired the fast mare known as One Eye, the grandam of Hambletonian.

Still another son of Messenger that distinguished himself as a sire was Winthrop, or Maine Messenger. He was foaled in 1807. He was bred on Long Island and taken to Maine when 10 years old and kept there the rest of his life. While in that state he sired such noted performers as Fanny Pullen and Daniel D. Tompkins, and one of his sons sired the famous Zachary Taylor. No other horse that ever lived did as much for the horse breeding interests of Maine as this renowned son of Messenger. Many of the best horses of that state today trace their lineage back to this distinguished sire.

Of all the get of Messenger that distinguished themselves as trotting race horses the palm clearly belongs to Topgallant. This bay gelding was foaled in 1807 and was one of the last of the get of his famous sire. He was bred on Long Island and used upon the farm as a general-purpose horse until he was 14 years old. When he reached this age it was discovered that he possessed an unusual amount of trotting speed for a common work horse, and although he was spavined on both hind legs he was purchased by a gentleman in Philadelphia who developed him for racing purposes. In point of stamina at the age in which he raced it is doubtful if his equal was ever seen in this or any other country. When he was 22 years old he trotted a match race of 4-mile heats under saddle. He lost the first heat which was in 11:16. The second was a dead heat in 11:06. He won the next two heats in 11:17 and 12:15, thus making the 16 miles in 45 minutes and 54 seconds, being an average of 2:52⅛ minutes to the mile. When 24 years old he started in a field of 8 in a race of 3-mile heats, and although beaten in the race he won the second heat in 8:15 and was second in the last heat and stood second in the summaries. The next week after this race he trotted a match race of 3-mile heats with Whalebone, which he won.

In considering the wonderful showing made by Messenger in transmitting trotting speed to his progeny it must be remembered that he was a Thoroughbred, that most of the mares bred to him were Thoroughbreds, and that running races constituted the racing sport of that day. It is fair to presume that if any of his descendants were trained for speed it was primarily at the running gait and that the discovery of trotting speed was largely accidental.

From what source Messenger derived his ability to transmit trotting speed so uniformly to his descendants is one of those hidden mysteries. No other Thoroughbred in the world's history has ever been able to establish a family of trotting race horses of sufficient ability to warrant their training and racing. For racing purposes the descendants of Messenger so far eclipse all other breeds that they have been practically consigned to oblivion.

In the spring of 1822 John Tredwell, Queens Co., L. I., bred his famous pair of driving mares Amazonia and Sophonisba to Mambrino, a son of Messenger, and the next year each produced a bay colt that he named Abdallah and Almack. Sophonisba, the dam of Almack, was a superior road horse, but was not so fast as her mate. Her sire was a grandson of imported Baronet, but as the Baronets were not trotters of any considerable merit it is manifest that whatever trotting inheritance Almack possessed came to him from his sire. The most distinguished of the family founded by Almack was the horse known as Champion. He spent most of his days in Cayuga Co., N. Y., and the Champion Family was well known in that section for many years as trotters of great merit.

Amazonia, the dam of Abdallah, was purchased by B. T. Kissum, near Philadelphia, in 1814, when she was four years old. She was sired by a son of Messenger. The breeding of her dam has never been traced. Mr. Kissum used her but a short time when he sold her to Mr. Tredwell, who used her on the road for many years and occasionally raced her. While she was not phenomenally fast, she trotted several miles better than 3 minutes and her stamina and gameness made her one of the most famous road animals of her day. She is described as a sorrel in color, with rough hips and a rat tail.

Abdallah was a beautiful dark-bay, about 15.2 hands high, and there was a measure of coarseness about him that he could not well escape, as both his sire and dam were endowed with that undesirable quality in a more or less degree. His coat was fine and glossy when in healthy condition. His reputation as a sire of trotters was quite wide during a portion of his life, but his coarseness and rat tail, which he inherited from his dam, so impaired his acceptability with the public that he was never largely patronized. Besides this he possessed an evil temper, which he transmitted to his offspring. When he was four years old Mr. Tredwell undertook to break him to harness and train him for racing. But when put in harness he kicked everything to pieces, and all attempts to train him were abandoned. He was never in harness again until in extreme old age, when he was sold to a fish peddler for $5, and the fish peddler's wagon was soon reduced to kindling wood.

He was kept in the stud at different places on Long Island, and one season in New Jersey, until he was 16 years old, when he with Commodore, another son of Mambrino, was sold to John W. Hunt, Lexington, Ky., where he made the season of 1840. He was almost neglected in the stud in Kentucky, and only left about a half-dozen colts in that state. His progeny on Long Island, however, began to show their racing qualities; a company was formed and he was brought back from Kentucky and was afterwards in the stud on Long Island, at Freehold, N. J., Goshen and Chester, N. Y., and one season in New York City.

"After the period of his usefulness was passed," says a distinguished writer, "his inhuman owners turned him out on a bleak, sandy beach on the Long Island shore and there he starved to death in the piercing winds of November without a shelter or a friend."

Abdallah was the sire of Hambletonian 10. This fact alone has made his name imperishable in the annals of the trotting horse. In this connection it is curious to observe that of all the get of Abdallah, Hambletonian 10 was the only one to make a success as a sire of trotting speed. In 1848 while Abdallah was standing at Chester, Orange Co., N. Y., he was bred to the Kent mare and the produce was Hambletonian 10, foaled in 1849. At this stage of the process in tracing the bloodlines of Hambletonian 10 the Kent mare must be considered. This mare was bred by Josiah S. Jackson, Oxford, Orange Co., N. Y., and was foaled in 1833. She was sired by imp. Bellfounder, a purebred Hackney, and her dam was One Eye by Hambletonian, a son of Messenger; grandam Silvertail by imp. Messenger; great-grandam Black Jin, breeding unknown. When the Kent mare was three years old Mr. Jackson sold her to Peter Seeley, who sold her to Mr. Pray of New York. Mr. Pray sold her to William Shivis, who sold her to a broker in New York, who used her as one of a pair for road driving until the team ran away and she became lame. She was then sold to Charles Kent, a butcher of New York, who bred her to Webber's Tom Thumb. She was then (1843) sold to Jonas Seeley and returned to Orange county, where she spent her remaining years.

In 1849 she with her sucking colt, which developed into Hambletonian 10, was sold to William Rysdyk, Chester, N. Y., for $125. While she was never trained for racing an any considerable extent, it is said that she trotted a mile under saddle over the Union course in 2:41. During the time she was owned by Jonas Seeley and Mr. Rysdyk she produced 11 foals to different stallions, and not one of them except as a race horse or sire or a producer of speed. Some writers have claimed that the power of Hambletonian 10 to transmit trotting speed was derived from the Hackney blood which he inherited from the Kent mare. But an examination of her bloodlines in conjunction with those of Abdallah clearly indicates that such power came from the inexhaustible supply which imp. Messenger seemed to possess. This conclusion is strengthened by the fact that during all the years that Bellfounder was in the stud in this country, only the Kent mare and one other ever showed any symptoms of speed, and not one of his descendants ever sired an animal that acquired a standard record.

In searching for the reason why Hambletonian 10 was endowed to sire trotting speed with uniformity, the investigator is met with perplexing obstacles on every hand. For at least 150 years English breeders have been crossing the Thoroughbred with the Hackney of substantially the same blood as that possessed by Messenger and Bellfounder, and no animal has come from such breeding that has acquired a record of 2:30 or better. No other of the get of Abdallah or the produce of the Kent mare ever demonstrated an ability to transmit speed at the trotting gait. And in addition to this Abdallah was 25 years old when he sired Hambletonian 10, and the Kent mare was 16 when she produced him, thereby controverting the accepted theory of most breeders that stallions and mares of that age have passed the period of their prowess for siring or producing speed.

At the Brooklyn, New York, horse show held week before last the fifteen mile endurance test for army horses was won by a bay gelding ridden by C. V. Hicox, Jr., whose time was one hour and seven minutes for the distance, the horse coming in so fresh and fine that he was awarded the first prize over others that came in ahead of him in a rather exhausted condition.

Although reports from Thomasville, Ga., have been to the effect that W. J. Andrews would soon be seen in the sulky, a despatch from Cleveland states that he is not improving as rapidly as was generally thought, and that the entire burden of handling th Pastime Stable trotters this year will probably borne by Ben White.

Notes and News

Three heats to the race.

◈ ◈ ◈

And no more than three heats.

◈ ◈ ◈

Will be the rule in all class races at Santa Rosa.

◈ ◈ ◈

The State Fair will have the same rule in all its class events this year.

◈ ◈ ◈

There will be a total of $42,000 in purses and stakes raced for at the New York State Fair this year.

◈ ◈ ◈

Chocolate Soldier, champion of the pony Hackneys at the 1915 London Horse Show, has been imported to the United States by Truman's Stud Farm, Bushnell, Ill.

◈ ◈ ◈

It is said that the stallion, Wilkie Collins, who died several years ago, served fifty-four mares in his twenty-sixth year, sixty-five per cent of which proved in foal.

◈ ◈ ◈

Doc Tanner will leave Mr. C. K. G. Billings' Curles Neck Farm about May 1st with a string of horses to train at North Randall. The pacer William 1:58½ will be among them.

◈ ◈ ◈

J. O. Gerrety is at Lexington, Ky., with a big string of horses owned by H. J. Schlesinger, headed by Walnut Tree (2:10¾ as a two-year-old) by Siliko, dam by Peter the Great.

◈ ◈ ◈

August Belmont, chairman of the New York Jockey Club, has sent his trotting mare Gales Wintha 2:19¼, by Ramapoor, a son of Stamboul, to be bred to Belwin 2:06¾, son of McKinney.

◈ ◈ ◈

Will Fleming has arrived at the Indianapolis track with Joe Patchen II 2:03¼, The Beaver 2:05¾ and The Badger 2:15¼. All three are in fine shape and are confidently expected to reduce their records this season.

◈ ◈ ◈

The Orange County Driving Club has completed preparations for a big program of racing on the Santa Ana track Monday next, May 1st. There will be events for trotters, pacers and runners, as well as bicycle races and other amusements.

◈ ◈ ◈

There were 19 stallions of the Alcyone family of trotters which appeared for the first time in the table of producing sires in 1915. Of these 13 were of the McKinney family, there being nine sons, three grandsons and one great-grandson of that famous stallion.

◈ ◈ ◈

Louis Titus, of Piedmont, who purchased the historic Stony Ford Farm in Orange county, New York, about two years ago, has nominated 23 mares in the Kentucky Futurity for foals of 1916. Several of the mares named Mr. Titus purchased at the Woodland Stock Farm dispersal.

◈ ◈ ◈

The record price for a yearling mule in Missouri was paid at Paris in that state last week for a mare mule, 11 months old, the figure at which it changed hands being $265. The youngster was 15½ hands and a model in both body and bone, according to the Missouri Stockman.

◈ ◈ ◈

Kentucky Jew 5475, saddle stallion by Kentucky Choice, was sold recently by the Blue Grass Stock Farm, Kentucky, to P. J. Donnelly, of St. Louis, Missouri, for $2,500. The horse will be placed in the stud at Paris, Mo., at $25 to insure, and will then be trained for the show rings at the fall fairs.

◈ ◈ ◈

At the recent sales of the Lyons County (Iowa) Draft Horse Breeders' Association, Rock Rapids, Iowa, an average of $454.40 was made. The sales were topped by two Belgian mares, each of which brought $1,005, while a yearling daughter of one of these mares brought the snug sum of $400.

◈ ◈ ◈

Horsemen throughout the country will extend their sympathy to E. J. Tranter, president of the Fasig-Tipton Company, in the death of his mother, which occurred at Mr. Tipton's home in Flushing, L. I., April 8th. Interment was in Buffalo, the old home of the deceased and where she had a large circle of friends.

◈ ◈ ◈

Seventy-five head of saddle bred horses were sold at the annual Mexico, Missouri, auction sale April 8th. The high figure of the auction was $1,000 paid for the stallion Marshall Chief, that had 25 registered saddle mares booked to him before the day was over. Miss Loula Long consigned her gelding The Dude to the sale and he was snapped up by a dealer at $270 and sold by him to a patron for more than three times the amount within an hour. The mare Cigarette was sold at private sale for $1500, her owner putting that price on her and refusing to take a lower bid, although she was consigned to the sale but not offered at auction. H. C. Downing of Des Moines, Iowa, purchased the mare.

Messrs. Frederick Johnson and C. K. G. Billings will start the racing season of 1916 with practically a stable of imported horses picked from the English Farms by Charles T. Patterson of Ornament fame, with little regard to prices paid so long as the youngsters were up to his standard.

◈ ◈ ◈

Over four hundred trotters and pacers have been nominated for the Goshen, New York, meeting. There are ten events with an average of over 40 nominations in each class. At Monroe and Middletown, the average is over 35 for each of 11 events. These towns are all in Orange county and the tracks are all half-mile rings.

◈ ◈ ◈

Although the Simpson Bill, designed to turn the New York Speedway over to the automobilists, was passed in the New York Senate last Friday by a vote of 29 to 10, a despatch from Albany states that it is not believed the proposition will be advanced any further by the legislators, as it is almost sure to be defeated when it gets to the rules committee.

◈ ◈ ◈

Miss Vesta Stibbs, of Lebanon, Ohio, not only breeds horses, but she also is the champion reinswoman of the Buckeye State. The Orphan Boy 2:22½, with whom she was only one time "out of the money" last year, was broken, trained and driven in all his races by Miss Stibbs. At one race meeting last year she acted as timer, and at another she was one of the judges.

◈ ◈ ◈

Announcement is made of the death of the famous gaited saddle mare Emily, which Gen. Castleman rode to victory in the arena of the Columbian Exposition at Chicago. She was a wonderfully handsome mare, having the beauty, grace and spirit which is the ideal of breeders of the American Saddle horse, and was free from all coarseness. She was nearly thirty years old at the time of her death.

◈ ◈ ◈

Empire City Farm, William Simpson, owner, is to pass. All the horses in training, as well as the mares, colts and fillies, will be sold at auction during May by the Lexington Sales Company of Lexington, Kentucky. The stallions McKinney, now 29 years old, and Axworthy, 24, will not be sold, but will end their days on the Farm. There are about 75 head of choicely bred animals to be sold.

◈ ◈ ◈

The death of Colbert 2:07½, chestnut son of Onward, is announced at Palatine, Ill. He was in his 29th year, and for years had been a pensioner on the farm of Charley Dean. Colbert was quite a successful sire and his best son was probably Nervolo 2:04¼, sire of Nervolo Belle, dam of Peter Volo 2:02, the present world's champion two, three and four-year-old trotter, and also dam of Volga 2:07¾, the unbeaten two-year-old of 1915.

◈ ◈ ◈

Doc Tanner always contended that there were two kinds of game horses; the first, and by far the most numerous, are the ones which plod along and try as long as their drivers keep forcing them, and the other variety, which is scarce, are those which have the disposition born in them to make an everlasting struggle at the critical moment in a race. The latter kind will respond instantly on demand and continue to the point of exhaustion.

◈ ◈ ◈

That wild burros in the Grand Canyon of the Colorado are increasing rapidly is the report from a ranger on the Tusayan National Forest, who says the little animals in their search for forage are finding their way to the top in such numbers as to constitute a nuisance. Already there are thousands of the animals in the Grand Canyon from Supai to the mouth of the Little Colorado, according to the Forest ranger.

◈ ◈ ◈

A Kentucky thoroughbred mare called Lady, owned by William A. Wolfe of Beatrice, Nebraska, died recently at the age of thirty-six years. Mr. Wolfe purchased the mare in Kentucky in 1885 and immediately brought her to the west where she was used as a saddle horse for twenty-eight years and was then retired. She knew five gaits perfectly and Mr. Wolfe often traveled ninety miles in a day on her back. The mare was in almost perfect health up to the day of her death.

◈ ◈ ◈

Two world's records for April were hung up at Sacramento last Sunday. Charley Silva won the last heat of the free-for-all pace with Potrero Boy in 2:06¼ and H. S. Cowell took the first heat of the free-for-all trot with Albaloma in 2:08. These were matinee events but the times made have never been equaled this early in the season anywhere. Both drivers received the congratulations of the many horsemen present and it will be many an April before their records are beaten.

◈ ◈ ◈

Verbena Ansel 2:22, world's record for a yearling trotter on a half-mile track, died at Lafayette, Indiana, last week. Verbena was bred at Woodland Stock Farm and was by Prince Ansel, dam Verbena Mac by Directum Spier, and reduced her record to 2:22 on the mile track at Lexington last September. This filly with others was sold by Mr. C. A. Harrison to Crouch & Son of Lafayette, after she had made her record and was being well entered this year in the two-year-old events and was well staked besides. Although Mr. Harrison had parted with the filly, no one will regret her death more than he.

David West, the Fillmore street turf goods dealer, says Santa Maria must be quite a lively trotting horse town as the orders which came to him from there during the week for horse boots and harness were evidence that something more than ordinary must be doing in the speed line.

◈ ◈ ◈

A daughter of Diablo 2:09¼, with no mark, perfectly sound and without a blemish and with two-minute speed, is offered in our columns by a lady living at Everett, Washington. This mare with three months training paced a mile in 2:09 on a mile track and one in 2:12 on a half-mile track. Is in training now and in good condition.

◈ ◈ ◈

The Second Annual Horse Show for the benefit of the San Francisco Polyclinic and the Peoples Place opened Thursday at the San Francisco Riding Academy, Seventh avenue, with a good entry list and a large attendance. A full report of the show with list of prize winners will be published in the Breeder and Sportsman next week.

◈ ◈ ◈

Secretary Kline announces that a special weight condition will be attached to the 2:06 trotting class for the North Randall Grand Circuit meeting to read as follows: "All drivers must make the same weight. To arrive at this the bodily weight of the heaviest driver in the race must be made by all other drivers." The same condition will probably prevail with the 2:06 trot at the Grand Rapids meeting.

◈ ◈ ◈

It has been carefully computed that allowing for the variance in the price of feed a working farm horse will eat from $50 to $80 worth of hay and grain during the year, which of course is figured on the feed being produced on the farm. Horses can be pastured when not working at a cost of $2 per month per head in most California counties, although higher rates are asked where any attention must be given them.

◈ ◈ ◈

Monday next, May 1st, will be the last opportunity to secure a substitution in Pacific Breeders' Futurity for foals of 1915. There are a few to be had and those who apply first will be first served. The two-year-old divisions of this stake will be trotted and paced in 1917 and the three-year-old divisions the following year. If you have a foal of 1915 that is not staked now is the chance to get him started right. It will be too late after Monday, May 1st.

◈ ◈ ◈

J. H. Nelson of Selma, Cal., has a fine pair of blacks for sale. They are full brother and sister, eight and nine years old this spring, sired by Expressive Mac and their dam the grandam of Clara Mac 2:04½. They have been used as a hearse team for four years and Mr. Nelson thinks they are the best pair in California for that purpose or for a large fancy team for any purpose. They are 16.3 and weigh 2,535 pounds. Read further particulars in the advertisement on another page.

◈ ◈ ◈

This is the season when horse boots will be required more as the trotters and pacers begin moving faster. See that your horse is protected, and send to J. David West, 1018 Fillmore street, San Francisco, for anything you need in the line of horse clothing, bandages, liniments, coolers, etc. Mr. West is the only retail dealer in San Francisco that keeps a stock of everything in the line of horse accoutrements and supplies. His prices are right and satisfaction is guaranteed. Orders by mail receive prompt attention.

◈ ◈ ◈

As a rule, after a horse has been put in good condition, the mouth properly bridled and feet properly shod, there will be no further difficulty either with overreaching or the clicking of a horse in traveling. In some cases it may be necessary to employ artificial means. The principle is to hasten the action of the forefeet and to encourage a slow or dwelling movement of the hind ones, in order to allow the former to get out of the way of the latter. The action of the fore feet can often be hastened by slightly rounding off the toes of the front shoes, which has a tendency to encourage a horse to raise his feet quickly. On the other hand, the action of the hind feet can often be retarded by raising the toes of the hind shoes and lowering the heels, but the trainer of a trotter used for racing never desires to retard any speed that the horse has at either end.

◈ ◈ ◈

Mr. F. B. Dupree of Los Angeles has sent to W. G. Durfee's speed school his four-year-old filly Bonnie Treat by The Bondsman out of the famous broodmare Johanna Treat. She is a beautiful filly with all the earmarks of a trotter. Mr. Dupree's mare May Belle Treat by Neernut, dam Johanna Treat, has a filly foal by Kenneth C. at foot which Will Durfee liked so much when he first cast eyes on her that he remarked: "That filly looks good enough to be a Carlokin." Mr. Dupree thinks she must be some filly to get a rise like that from William. May Belle Treat is headed for as famous a name as her dam. She is the dam of Nutway 2:18¼ that was broke, trained and raced by an amateur, Mr. Bert Carpenter. She is also the dam of a full brother to Nutway that showed miles better than 2:16 last fall, and her only other foal living beside the one at her side is a three-year-old gelding by Kenneth C. that is considered a sure 2:10 trotter with luck and opportunity. May Belle Treat has been bred to Carlokin this year.

The Bard and The Barb

[Written for the Breeder and Sportsman by C. A. McCully.]

All the civilized world, especially that part of it which is not busy killing its neighbor, has united this week in paying tribute to the memory of William Shakespeare, by far the most gifted writer that the world has known. Last Sunday marked the three hundredth anniversary of the death of this transcendent genius, who had retired to his old home at Stratford-on-Avon in 1611 after a busy but comparatively short life in London, where he won his way to the front rank in the world of letters, as well as being a successful producer of his own plays.

This being the start of the active season for the owners and trainers on this side of the Rockies, they may not have time or inclination for reading any of the extended tributes that are being paid to this most remarkable Englishman, but it is fitting in this connection that brief reference be made to Shakespeare's knowledge of the horse, along with some of the comments made by him on the noblest of the brute creation. These are found in several of his plays and poems, and furnish another evidence that he was a "superman" among his fellows, in the variety and scope of his knowledge

The most familiar instance is where he makes Richard the Third cry out on Bosworth Field, with defeat and ruin staring him in the face, "A horse! a horse! My kingdom for a horse!" There are two more detailed passages, one in the poem Venus and Adonis, and another in a comedy, that show Shakespeare as a close observer, and having a keen eye for a good horse, or able to find the defects in a bad one.

The former, written in his salad days when he was fresh from the fields of Warwickshire, stands out by itself as a masterpiece of description, and while well known to every student is worth repeating. After a mention of the stallion that Adonis had used in the hunt, and then tethered to a tree while he rested and was wooed by the siren goddess, the merits of the animal are most vividly portrayed. He begins by preparing us for something out of the ordinary in these lines:

"Look when a painter would surpass the life,
In limning out a well proportioned steed,
His art with nature's workmanship at strife,
As if the dead the living should exceed;
So did this horse excel a common one
In shape and courage, colour, pace and bone."

Then, as if inspired by his own mental portrait he proceeds to create this gem of crisp and close detail, in the following verse, that has long ago become a classic of its kind:

"Round-hoof'd, short jointed, fetlocks shag and long
Round breast, full eye, small head and nostril wide,
High crest, short ears, straight legs and passing strong,
Thin mane, thick tail, broad buttocks, tender hide.
Look, what a horse should have he did not lack,
Save a proud rider on so proud a back."

In striking contrast to this master picture of a model type, is the one in "The Taming of the Shrew," describing the sorry-looking nag that Petruchio rode, when he went in his nondescript rig to wed the high strung virago Katherine. It is in the third Act of this great comedy that Biondello, servant to Lucentio, telling of Petruchio's most grotesque wedding gear, describes his mount in this graphic fashion:

"His horse hipped with an old mothy saddle, and stirrups of no kindred. Besides, possessed with glanders, and like to mose in the chine, troubled with the lampass, infected with the fashions, full of windgalls, sped with spavins, raied with the yellows, past cure of the fives, stark spoiled with the staggers, begnawn with the bots; swayed in the back and shoulder shotten."

It would puzzle the most cynical and eloquent of our old friend "Yarrum's" coterie of swipes to beat the above for a collection of physical defects and misery.

Scattered through many more of the plays are further evidences that Shakespeare was fond of a good horse, and by no means a novice regarding the breeding and handling of the type in fashion during his day. In his greatest tragedy, "Hamlet," the wicked king and uncle of the "melancholy Dane," speaking to Laertes of the latter's tour with his nephew, and its value as an education. says:

"Some two months since, here was a gentleman of Normandy,—I have seen myself and served against the French and they can well on horseback,—but this gallant had witchcraft in't; he grew unto his seat, and to such wondrous doing brought his horse, as he had been incorpsed and demi-natured with the brave beast."

Among the strange and often obscure sayings in the saddest of all the tragedies, "King Lear," is where one character says, "The dancing horse will tell you." This is not explained by the context but the reference is to a famous performing horse of remarkable intelligence that a showman named Bankes had on exhibition in 1589, first in London, and then on the continent. It is further recorded of this learned nag that while in France, the Capuchin order of monks came near to ending his usefulness as a money-getter for his master by denouncing him as a sorcerer that had assumed a horse's shape. In this same play there is humorous reference by the court jester who is trying to cheer up the heavy hearted monarch, to a cockney (cook) that did and said queer things, and according to this clever fool's conceit, "'Twas her brother that in pure kindness to his horse, buttered his hay."

Through the historical plays of King Henry Fourth and Eighth are several trite sayings and aphorisms derived from the horse lore of this master dramatist. In the former, Hotspur as Henry Percy the younger was nicknamed, tells the Earl of March that the latter's father bores him greatly and exclaims: "O, he's as tedious as is a tired horse." There are references to the disease called bots in this play also, when one of the carters at the inn yard in Rochester says, "Peas and beans are as dank here as a dog, and this the next way to give poor jades the bots." Finally, in Henry the Eighth, is a simile so full of sound sense that it is as applicable today as then. The Duke of Norfolk, speaking to Buckingham and trying to soothe his wrath against Cardinal Woolsey, says: "Anger is like a full, hot horse, who being allowed his way, self-mettle tires him."

It is no wonder that Shakespeare's greatest contemporary, Ben Jonson, wrote in the prefix to the first edition of the former's plays and poems ,in the famous First Folio of 1623, "He was not of an age but for all time." The French novelist Dumas went still further when he speaks of him as "Greatest of Creators, except God," but our own Ingersoll, in the peroration of his never-to-be-forgotten lecture, puts it much better when he said, "The mind of Shakespeare was an ocean, touching all the shores of thought, an ocean into which all the rivers of intellect ran."

Note.—The ailments ascribed to Petruchio's horse are in the main unfamiliar to modern popular terms. "Mose in the chine" means spots like measles on the backbone; "lampass" is the swelling in the roof of the mouth commonly called lampers; "fashions" is a corruption of farcins or farcy, technically called "equinia"—practically the same as glanders; "fives" is properly "vives," a swelling in the glands behind the ear common to young horses fed on new grass; "raied with the yellows" is the hardest nut of all, but raied is an old English word for defiled, and yellows may mean the discoloration that results from some intestinal poisoning. It will be seen that Shakespeare uses the popular or stable names for these various ailments and blemishes.

FASTEST EVER IN APRIL.

When some of the harness horse trainers read in last Saturday's Breeder and Sportsman an account of the fast work being done by the Sacramento horses in training, which were made under the experienced and reliable timepiece that John A. McKerron of San Francisco had held on them, many of the aforesaid trainers were of the opinion that such fast work so early in the season would prevent the horses from going fast miles when they were ready to start in races.

But on Sunday last the Sacramento Driving Club held its opening matinee of the year with a trot and a pace on the card. In the very first race in which four trotters started, all records for this time of the year were broken, by the three heats of the race being trotted under 2:10, H. C. Cowell's Albaloma winning the first heat in 2:08, C. F. Silva's San Felipe taking the second in 2:09 and F. J. Ruhstaller's Kid Cupid the third in 2:08½. Walter Tryon's John Mack was either second or third in each heat and beat 2:10 himself.

Then, just to show that all the speed on tap at Sacramento was not the sole property of the trotters, C. F. Silva's Potrero won the free-for-all pace in 2:12½ and 2:06¼, with H. C. Cowell's Rastus lapped on him all the way.

Of course these races were not for money and were arranged entirely on sport and exhibition purposes, but they were contests and the times show there was no loafing by any of the horses started.

The summaries of the events with the times for each heat are as follows:

First race, free-for-all trot:

San Felipe.....(C. F. Silva)	2	1	2
Kid Cupid .....(Wilbur Smith)	4	3	1
Albaloma .....(H. C. Cowell)	1	4	4
John Mack .....(Walter Tryon)	3	2	3

Time—2:08, 2:09, 2:08½.

Second race, free-for-all pace:

Potrero Boy .....(C. F. Silva)	1	1
Rastus .....(H. C. Cowell)	2	2

Time—2:12½, 2:06¼.

The judges were: F. J. Ruhstaller, Paul Tarpey, Edward Paine; starter, F. E. Wright; timers, W. J. Ivey, Dr. E. J. Weldon, John Quinn.

HUMBOLDT CO. FAIR IN SEPTEMBER.

The Humboldt County Fair will hold its twenty-first annual exposition at Ferndale this year as usual. There will be four days' racing, on Sept. 6th, 7th, 8th and 9th, with from three to five races a day. Running events will be free to all, but the harness events are for horses owned in Humboldt county on Jan. 1, 1916. All entries clase the day previous to the race. Four are required to enter and three to start. Purses are from $100 to $250. The Humboldt County Fair has been an annual success for many years owing to the enterprising citizens of the county who manage it. W. B. Alford is president and R. H. Smith secretary.

THE LAST SPIKE OR THE LAW'S DECREE.

Opportunia Hamiltonian had been her father's closest friend, as well as his oldest and only daughter, but now she looked at him while he sat there before the electric toaster on the cold January eve a great gulf seemed to have come up between them. For weeks he had sat thus, only varying his recumbent position to grab up his pencil and feverishly work on the large square pasteboard that he had hung suspended between him and the buffet. Dextrously, coyly, even maliciously, Opportunia had attempted to draw from her parent the mystery that shrouded him, but he only treated her coldly when approached. Now, as she stood with the glint from the dying embers throwing fantastic figures in bold relief on the marble wainscoting, she felt that she must know the truth else she would go out into the world and seek to support herself by picking cotton. Determinedly she shook her head, unloosing six feet of trailing tresses, while fourteen teeth that gleamed like ebony, bared themselves as if to prove that Opportunia wasn't fooling. She stepped forward, but e'en as she did, the eyes of the parent lifted and he spoke:

"Opportunia," he said, "I cannot conceal it longer. When I started out last summer with the pacer I called Staggering Jim, I had no higher ambition than to earn enough honest dollars to give you the schooling you deserved—to start you on a domestic science or veterinary career. Staggering Jim had never started under that name before, but the title of Cranberry Prince didn't sound just right, while the record of 2:26¼ which was attached apparently kept him out of all those 2:37 paces that had been opened on the Lone Pine Circuit. So for these reasons—dry your tears, Opportunia—I changed his name and got him in. Well, we didn't win much, as you know. They seemed to be a little too fast for him most everywhere, but in one race, and there we got the old horse to the front and took a winrace of 2:24½.

"Now, I've just been figuring up a little and the result is startling. Cranberry Prince had a winrace of 2:26¼, but it was made on a mile track, eight years ago, and he has gained one second allowance each year since. Then the circuit gave three seconds more to horses fourteen years or older, two seconds more when owners drove them, and country horses got two more, and I find that I could have got him into the 2:50 classes, or thereabouts, under his old name. It ain't that the old horse would have won any more under his first name, but when a man don't get any better returns for his efforts to turn an honest dollar or two, it's time to give the game up. It looks as if you'd go through life without the help of the education I had planned out for you."

With a low gurgling moan that came from his very heart, the old man cast the figure-covered pasteboard into the flames, tied a "for sale" sign on the piano, kissed his daughter fondly and wrapping his threadbare shawl about his trembling shoulders, went out to beg for bread.—Western Horseman.

MATINEE MAY 30TH AT HEMET.

There is to be a matinee at the Hemet Stock Farm track on Decoration day, May 30th, if present plans are carried out. Hemet has had few good matinees in the past several years, and the promise of one for Decoration day and several to follow will be accepted with general enthusiasm locally. At the present time some of the fastest horses in the state are in training at the local farm and they will be on the program for that day.

Great Northern 2:12½, Dr. Wayo 2:12½ and Bon Courage 2:08¼, owned by Fred E. Ward, manager of the farm, will appear. Three such horses as these should be a big drawing card in themselves. The stock farm will enter its best two-year-olds, and Hemet, Fiesta Lou, Allie Lou and others will probably give exhibitions. A complete racing card is being prepared for the day, and some thrills are promised the public.

The stock farm horses are all working well at the present time and some fast trotters will be developed for the coming season. The training of the past several weeks has shown that the farm has at least two two-year-old trotters that can beat 2:30 and one two-year-old pacing filly has a quarter in 36¼ seconds. Every one at the track is enthusiastic over the outlook for this season, and the Hemet Stock Farm is certain to make a great showing in the racing meets on the coast.—Hemet News.

RIO VISTA HORSE SHOW.

The Rio Vista Horse and Stock Association has been organized to take charge of the horse show to be held at that enterprising river town September 23rd. The show given last year was a success and aroused much interest in Rio Vista as the center of a horse breeding section, and it is proposed to hold a much larger show this year. Some of the best draft stock in the State is raised in that part of Solano county, Messrs. E. W. Westgate, the McCormack Brothers, Perry Anderson, and others being the owners of some splendid imported stallions and mares. The officers of the association are E. W. Westgate, president, Geo. P. Dozier, secretary, John McCormack, M. L. Isham and Perry Anderson, directors. Anyone interested in horses or horse breeding should make arrangements to be in Rio Vista September 23d this year as the show will be well worth seeing. Rio Vista is easily reached by the Sacramento river boats and also by auto stage from Suisun on the Southern Pacific railroad.

Thoroughbred Matters

AGED HORSES GOOD WINNERS.

In these days of training yearlings and racing two-year-olds the impression is very general among those not in close touch with turf affairs that thoroughbreds no longer last beyond the age of four or five years except in rare instances, but the turf guides show a great many horses of mature age to be still on the track, and still winning, while not a few real veterans are earning brackets. In racing a horse is deemed to be "aged" after his sixth year. Among ninety-two aged horses in a list of winners of $10,000 or more recently published in Racing Form there were thirty-two that added to their earnings last season at the age of seven, eighteen at eight, twenty-one at nine, eleven at ten, seven at eleven, one at twelve and two at thirteen years of age.

Convincing proof of the wear-and-tear qualities of some of the modern sprinters was afforded by the victory of a horse at Juarez, Mexico, a few weeks ago, when nineteen years old, and more recently by the double win of old Budweiser at Hot Springs, Ark. He is sixteen years old and has been trained ever since he was a two-year-old.

The record of the Texas horse No Quarter, by Viking, out of Sweet Danger, by Deceiver, is remarkable in the number of races he has run. Foaled in 1904, this bay thoroughbred had to the close of last season started 361 times, and had won sixty-one races, worth $16,342. Philip Stevenson's Lad of Langdon, the same age, has taken part in 249 races and Black Mate, another veteran of the vintage of 1904, is credited with 262 starts.

Herculoid, a New York horse owned by Peter Hauck, Jr., is one of the oldest two runners now in training that have earned $10,000 or more. The other is Caper Sauce, hero of 183 races. Both were foaled in 1902. Borrow (7), Guy Fisher (9), Sir John Johnson (10), Iron Mask (7) and some others in the list are recognized as high class horses in almost any company. Guy Fisher is credited wit 255 races, of which he won forty-nine, worth $34,000. Borrow's winnings in England and America exceed $60,000, putting him at the head of the list of aged winners now in training.

The Whitney Memorial Steeplechase, which will be run at Piping Rock on June 3rd, the second day of the Piping Rock Racing Association's meeting, promises to be of more than usual interest, for the reason that the number of jumpers in training this year is greater than ever and includes a much better class of horses than ever before. Not alone will all the old-time stars be seen at the post, but with them will be a number of aspirants for fame in this line of sport, many of them imported horses that have been purchased at big prices for the purpose. Another feature of the race is that it will be the richest of the year's prizes for the jumpers. Henry Payne Whitney adds $3,000 to the race. The Piping Rock Racing Association gives $500 in plate, and with the entrance and starting fees which go to the winner, the race will have a value of about $6,000.

Mr. Kennedy Jones, an English breeder, after a careful study of everything that is worth studying, has come to the conclusion that the breeding of a real good racehorse can only be a matter of finding the right method of inbreeding, but Mr. Jones would refrain from any inbreeding rather than practice such on the lines suggested by Bruce Lowe. In his opinion, also, in the breeding of good race horses the road to success leads over a series of disappointments and failures, and it behooves the breeder to study most carefully the causes which may have determined the failure, and to try again on a different line without, however, swerving from one's principle. Nobody knows before what a mare may breed to a given stallion carrying some of the same blood, but one should certainly be aware of either success or failure of the first attempt about twelve months after birth of the foal, and then be able to form an opinion as to whether, or not, the mare is a suitable individual for the purported principle of inbreeding.

THE $15,000 KENTUCKY HANDICAP.

On Saturday, June 3rd, the fourth renewal of America's greatest of all age races, the $15,000 Kentucky Handicap, will be decided at Douglas Park, Louisville, Kentucky.

The rich stake is the big feature race of the coming meeting this spring at this magnificent racing plant, the spring season there beginning on Monday, May 29th, and concluding on Monday, June 12th, a racing period of 13 days. There are 50 brilliant racers engaged in the Kentucky handicap this season, and an enormous percentage of them are being trained especially to fill their engagements in this rich stake.

Eastern turfmen are very prominent in the list of nominators for the Kentucky handicap this season, and the stars of all the great stables are eligible to this stake. Its running will be especially marked this year more than likely by Regret, H. P. Whitney's unbeaten filly, which is the only one of her sex to ever win the Kentucky derby, making her debut as a four-year-old in this race. She will be asked to try issue with Roamer, one of the most brilliant performers of recent years, and also be opposed by Waterblossom, excepting Regret the best of all racing mares racing on the American turf last season. If a race was devised that would draw only Regret, Roamer and Waterblossom together it would attract the attention of the entire racing world, but the magnitude of the Kentucky handicap looms up especially this year when the fact is taken into consideration that these three cracks will be opposed by all the sensational three-year-olds on which at present their owners are setting hopes to earn derby honors.

$3 TO SEE NEW YORK RACES.

August Belmont, president of the Westchester Racing Association, announces that the so-called Dollar Field at Belmont Park will not be thrown open when the spring meeting begins there next month. Belmont always has been a strong advocate of the cheap enclosure, believing that racegoers who cannot afford to pay the $3 tariff should not be deprived of the privilege of seeing high class thoroughbreds compete for rich stakes on the finest race track in the country. But it seems that Belmont has been compelled to yield to the wishes of the authorities in Nassau county.

The district attorney and the sheriff who have jurisdiction at Belmont Park feel that a continuance of the Dollar Field would make a rigid enforcement of the anti-bookmaking laws extremely difficult. They insist that a large majority of alleged violations of the law at the big track last year occurred in the smaller enclosure, where, they say, unscrupulous persons were hard to control.

For that reason the Nassau authorities asked Belmont the other day to bar the gates leading to the Dollar Field, so that they could devote their entire attention to the individual speculators who will pay $3 for badges admitting them to the regular grand stand enclosure.

The free field, however, will be open to race goers on certain days as usual. The public will be admitted to the space beyond the track rails, free of charge, but there will be no betting there, not even private wagers if the racetrack detectives can prevent it. In this way, accommodations will be provided for the persons who love race horses but cannot afford to spend money to see them run.

NEW ORGANIZATION IN KENTUCKY.

At a meeting held in Lexington April 15th, horsemen and others interested in the breeding and racing of thoroughbred horses and the general welfare of the turf, formed an organization to be known and incorporated as The Kentucky Thoroughbred Horse Association, with its principal offices at Lexington, sixty-three men signing the membership enrollment. There was much enthusiasm displayed.

Messrs. Milton Young, J. O. Keene, A. B. Hancock, John S. Barbee, Hal Price Headley, Thos. P. Hayes, Thos. C. McDowell, Charles H. Berryman, and F. A. Forsythe were elected a board of directors.

Hal Price Headley was elected president, Milton Young vice-president, Thos. B. Cromwell secretary, and the Phenix and Third National Bank, treasurer.

The lovers of the sport of racing in all sections of the country are eligible for membership. The membership fee is $10, no dues are collected the first year, after that the dues are $10 annually. Offices will be opened in the Hernando Building. The object of the organization is to do all lawful things for the improvement of the breed of horses and for the elevation of the turf and betterment of the sport of racing.

The 1916 rule books of the National Trotting Association are ready for distribution.

AS AN ENGLISHMAN SEES IT.

It has been made apparent in the last few seasons, writes a leading English authority on breeding, that the high-tide of St. Simon's fortunes has now set in. This statement in no way derogates from St. Simon's reputation as one of the greatest stallions of all time, but it simply acknowledges the natural and inevitable process by which nature after a while declines to perpetuate too much of a good thing. After a period of comparative quiescence we may probably find St. Simon surging up to the top again, but for the present the Stockwell line is in the ascendant, and mainly through Bend Or. The position of Polymelus in England is a very strong one indeed, for during the past two seasons he has been almost out by himself among winning stallions, and his two-year-olds look like maintaining his supremacy this year. Then Woodwinder, son of Martagon, has done great things on the Continent, while Martian, another Martagon horse, is the leading stallion in New Zealand. There are also descendants of Ormonde rapidly coming to the front, Orby, sire of Flash of Steel, being specially notable among these, and in this connection may be mentioned Adam Bede, whom breeders are apt to neglect on account of the thoughtless objection that he was bred in the United States. He was bred there, it is true, and so was Tracery, but neither horse has a single touch of native American blood in him. Adam Bede is by Adam (son of Flying Fox) out of Grace Gumberts, by Sainfoin, her dam Maid of Mentmore by Cameliard (son of Cremorne) out of Corisande (winner of the Cambrideshire), by King Tom out of Maybloom, by Newminster out of Lady Hawthorn. This is a splendid pedigree ,and Adam Bede was a right good racehorse. He is a thoroughly typical Stockwell, and should make a really great stallion. It must be remembered, however, that there are other lines of Stockwell besides that of Bend Or, Rock Sand, for instance, being very much in evidence with such sons as Tracery, Rochester and Rock Flint. For the time being, however, Polymelus is well in the lead, and he possesses the very great merit of siring stock very considerably superior to himself. It is a thousand pities that his three-parts brother, Ercildoune, was exiled to Uruguay, for in England he would probably have been as good a stallion as Mr. S. B. Joel's champion, Grafton, who was not in the same street with these other two sons of Maid Marian (Polymelus and Ercildoune), and a roarer to boot, but did wonders at the stud in Australia.

An English paper devoted to horse breeding says: At present there is no demand for young hunter-stock, the only marketable riding horse being the broken five-year-old under 16 hands, for the Army, and his top price for military purposes is £70. There is scarcely a bid for a blood colt if he is taken to a fair. On the other hand, so many heavy horses have been bought by the War Office for gunners and heavy draft purposes that there is a great shortage, and farmers are using two and three-year-olds of a heavy type for their ploughing. The demand for these is greater than the supply, and two-year-old and three-year-old hairy-legged horses are making more than ever the highest class blood colts will. The consequence is that farmers are deciding to put their mares to cart horses instead of to thoroughbreds. Last year, owners of cart stallions agreed that they had never had such a good season, while the reverse was the case with owners of thoroughbred sires, who had but few mares. This season there is an even keener desire apparent to breed cart horses.

J. D. Adkins reports that he has a dozen horses in training at Churchill Downs, all the property of R. J. MacKenzie. The latest additions to his string are eight two-year-olds recently purchased from A. B. Spreckels. They are Amazonian, Tinsel, Conservator, Siguaretta, Farewell, Macmonde, Lady Dunbar and Fairmonde. Adkins says he will put Buckhorn in training again at the close of the present breeding season.

The meeting at Tijuana seems to be doing very well, there being no dearth of horses. Fields are averaging about ten horses and as there are fifteen bookmakers doing business, the horses must have quite a following. Saturday last the $1000 Baron Long handicap was won by the old horse John Graham who staggered home winner by a head, carrying 120 pounds and as good as 25 to 1 against him.

An amendment has been proposed to the rules of the Jockey Club to read as follows: "After May 31, in each year, only one overnight race for a distance of less than a mile for horses three years and upward shall be given on any race day."

John Bullman, old-time jockey, who is riding at Bowie, has a son, Herbert Bullman, who will take up riding under his father's instructions. He is galloping horses now.

From New Zealand comes another official time record. When Goldsize won the South Auckland Cup at the recent South Auckland, R. C. meeting, he was credited with running a mile and a quarter in 2:05, an Australasian record. Private watches made the time 2:06 2-5, and an Auckland writer says this is more likely to be generally accepted. The time taken by the club official must go on the records.—Sydney Referee.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

TROUT SEASON OPENS MONDAY.

The opening of the trout season in California on Monday has stirred up a deal of interest and commotion. The season is coming in this season a month later than in former years and the anglers and rodsters have been impatient to get out to their favorite brook and stream. Sporting goods stores have been doing a land-office business during the past week and the indications are that a record turnout will be in evidence on Monday and the following Saturday and Sunday.

Licenses have been taken out by the hundreds and all is in readiness for some of the glorious sport. Prospects are for some good catches. Conditions in Coast range streams and lakes are reported as promising, with the exception that the water is low in some of the trout spots. In the mountainous sections good fly-fishing will not likely come in until a month or so later, as the heaviest snow storm in years was had last winter and the rivers and streams willi likely be a bit high. It looks bright for nearby places, however, and the angling fraternity can look forward to some pleasant week-end trips.

The season's opening on May 1st has caused some adverse criticism. Some enthusiasts claim that the bars should be let down on April 1st, as has been the custom. They set forth that they are deprived of angling during the month when the sport is best. The big fish return to the ocean when the water recedes and only the smaller trout are left in the stream, is their argument.

In answer to this, officials say that it is difficult to secure a law that pleases all. Conditions are different in the various districts and what may be good for one body of water is bad for another so that the late opening is better than having one that would open too soon. Furthermore, opponents to the earlier opening charge that the big fish that would be caught would not be in a good condition to eat and that it would provide little sport in catching them as they had just finished spawning. At all events there are two sides to the question and at present it looks like angling is going to be pretty fair anyhow.

The laws governing the limits of catches are fifty fish or ten pounds and one fish, or one fish weighing ten pounds or over. Conditions of streams and lakes and rivers throughout the State are given on another page. The Breeder and Sportsman will make an effort this season to secure from the railroad companies a complete telegraphic report of the condition of fishing along the lines of their routes.

* * * *

Trout in Goose Lake.—Lake trout are plentiful in Goose Lake, and the recent lengthening of the closed season will insure an increase in their numbers. The number of these fishes caught the past season was much less than in former years, since fishing for them is mostly over when they are running the streams tributary to the lake and they were practically through running when the season opened. Fishing for them was "too easy" before the season was changed.—Wm. S. Brown in Cal. Fish and Game.

TROUT IN NORTHERN COUNTIES.

Marysville.—Reports from the trout streams of Yuba, Butte, Plumas, Shasta and Tehama counties indicate that fair fishing will greet the anglers who whip the streams in district No. 1 on the opening day, May 1st.

A number of local sportsmen are preparing to open the season on the streams near Smartsville. Others will go to Butte and Plumas counties, where there are several streams famous for their early season fishing.

Big Chico creek, which flows through the center of the city of Chico, always is a favorite resort of the early season anglers.

Battle creek, Shasta county, is another good "early" stream.

Little or no fly fishing will be done successfully. Ground bait will be used by the successful angler. Salmon roe will be the most effective bait in Battle creek and other of the larger streams.

Local experts predict a good trout season. The streams, while still moderately high, are for the most part unusually clear.

SALMON FISHING IN OREGON.

Salmon fishing at Oregon City has come into its own at last. During the past several days hundreds of chinooks have been landed by Portland anglers. The fish are running good, and if the sunny weather continues Sunday will probably be the best day of the season.

Fishing at Shipherd's Springs is reported to be very good. Henry R. Everding and Ed Morris of Portland, landed 78 trout and Dr. F. M. Hurd caught 39. Robert Wetherall has had fine success in trout fishing near the falls. J. H. Erickson caught a 26-pound steelhead.

The upper fork of the Deschutes river is available for trout fishing now. A party of Culver anglers, using worms, landed 31 fine red sides early last week. Crooker River fishing is good.

Spinners are being used in the north fork of the Washougal river with great success. One catch of 59 was reported. The sport is reported to be very good also at Scappose.

FISH AND GAME COMMISSION ISSUES PUBLICATION ON SHAD.

The California Fish and Game Commission has just issued the April number of its publication. It is labeled the shad number and contains a wealth of information of interest to the angler and hunter. Its purpose is the conservation of wild life through education and copies are widely circulated.

The publication contains a number of interesting statistics besides instructive articles by experts. It is set forth that from January 1st to December 31st, 1915, bounties were paid on 162 mountain lions, making a total of 2,423. A total of 306 arrests were made for fish and game violations and the fines imposed amounted to $6,053.50. Seventy-six were apprehended for hunting without a license and fined $1,100, but only four anglers were arrested for not having their licenses. For using illegal nets 42 were arrested and taxed $2,005.

Seizures of fish, game and illegally used fishing apparatus from December 1st 1915, to February 29, 1916, were as follows:

Game—Ducks 385, geese 69, shore birds 12, doves 5, quail 48, quail traps 3, non-game birds 285, tree squirrels and skins 6, cottontail rabbits 17, deer meat, 79 pounds, deer hides, 1.

Fish.—Striped bass 580 pounds, steelhead 923 pounds, salmon 18 pounds, trout 14 pounds, black bass 117 pounds, crabs 805, clams 416, abalones 28, crawfish 106, miscellaneous fish 53 pounds, illegal nets and fishing apparatus 41.

Searches.—Illegal fish and game, 62.

ALL READY IN SOUTHERN CALIFORNIA.

Gradually the roads are being whipped into shape for the army of motoring trout-fishers that will begin the big job of getting into the mountains for the opening of the season in Southern California.

The new road leaving Santa Ana Canyon at the upper power house and traversing Monroe Flats, crossing the canyon at the concrete bridge and then going on up over the Clark Mountain switchbacks, is expected to be done by May 15, when two stages a day out of Redlands are contemplated by Max Green.

The road into Big Bear via Cushenberry Canyon is open as far as the China gardens east of Knight's. It is expected that the roads to the camps will be finished by May 1.

It is possible to get up the Santa Ana Canyon to the third powerhouse, but those going to Bear Creek will find plenty of hiking to do before they get that far.

Roads up the coast, Ventura and Santa Barbara way, are much less damaged by the winter rains, which were not so heavy up that way as east of town.

Fred Hartman of Ventura saw thousands of trout over nine inches in length the eleventh of the month while scouting, and predicts the greatest fishing ever. The same is true of the Sespe.

Plans are being made to install either a "fish elevator" or a fish-way of some other equally efficient type in the Gibraltar Dam of the Santa Ynez, so as to assure steelheads passing it another year.

Roads up the Ventura River are in passable shape and those desiring to go up to the side streams will be able to do so, but there will be some very rough going in getting very far back.

Reports from the Fish and Game Commission's field patrol covering the state of the roads and conditions of interest to sportsmen will be issued within the next few days. Two men were arrested late last week by the patrol in Western Santa Barbara county for "soonering" on trout, and paid fines in Lompoc.

Big trout still are plentiful in the Malibu pools, and are lingering in all the streams much later than usual, probably because the field patrolmen have taken full advantage of the deferring of the season, and prevented former interference with the "breeders" under the guise of legitimate angling.

* * * *

Anglers to Parade.—The sportsmen of Redlands in Lower California are making arrangements to open the fishing season with the "Anglers' Parade" on the Saturday night before the season opens. All the Izaak Waltons of the city, dressed in the old clothes that they wear on their fishing trips, will be in the parade and the line of march will be through the principal streets of the city.

The parade is held on Saturday night before the opening of the season so that all the anglers will have the next day to get to their favorite haunts to get started at the break of day on May 1. It is expected that over a hundred fishermen will take part in the parade.

The reports from all the streams indicate the best fishing season in years. The streams are well stocked and all conditions are favorable, so the experts say.

DATES FOR FLY-CASTING TOURNEYS.

The San Francisco Fly-Casting Club has announced dates for the season's tournaments. The list includes events at Stow Lake, today and tomorrow, and other regular programs will be staged on May 13 and 27; June 10, July 22, August 19, September 2, 16 and 30, and October 14 and 21. The club has started 1916 auspiciously with a large membership and a big year of sport is anticipated.

The Southern California Rod and Reel Club will promote a tournament on the Eastlake Park on Ma 7.

AT THE GOLDEN GATE DOG SHOW.

The seventh annual Golden Gate dog show now being held at Dreamland Rink closes tonight. Four hundred blue-blooded dogs of every popular breed are on exhibition. The winners of their respective breeds will be taken into the judging ring tonight where Walter H. Reeves will select the best dog of any breed in the show. More than fifty dogs will face the judge for the premier honor. The honors for the best decorated booth will undoubtedly go to the Anoakia kennels of Mrs. Anita M. Baldwin.

The Anoakia kennels, decorated in red and black with electric lighted Maltese crosses hung above the exhibit, with uniformed attendants stationed about the booth, loom out as the paramount attraction. The dogs in the Baldwin booth are Russian wolfhounds, bulldogs and Airedale terriers.

‡ ‡ ‡

Mrs. E. F. Brown, of the Browndale kennels, has a fine exhibit of collie dogs on exhibition; among the twelve benched are blue-merle, sable and tri-colors. The booth is decorated in purple and gold. Among the other dogs deserving of mention are: Jack Bradshaw's English bulldog, Country Model; A. J. Molera's Scottish terrier, Butterscotch; J. S. McCormick's Irish terrier, Paddy Whack; Dr. T. Martin Smith's Boston terrier, "Art" Smith, and Mrs. C. Frederick Kohl's pack of Beagle hounds.

‡ ‡ ‡

Jack Bradshaw's Sealyham terriers attracted considerable attention at the Golden Gate dog show, being the only representatives of their breed on the Pacific Coast at the present time. The bitch is a litter sister of the winner at the New York show last February.

‡ ‡ ‡

Fred B. McCay, of Cathay, Cal., who brought his pack of Beable hounds down to the show, made a creditable showing by winning several blue ribbons.

Mayor Rolph's kennel of cocker spaniels attracted many fanciers of the breed. The pride of the Kennel Mission Chief, was shown in fine form and made the desired impression on the judge to win a ribbon.

‡ ‡ ‡

Miss Beatrice Michelena's Russian wolfhound, Nicholas II, made a creditable showing and won a ribbon. Miss Michelena was delighted over Nick's showing and has decided to exhibit him at the Mill Valley show next month.

‡ ‡ ‡

Now that the Golden Gate Kennel Club show is over the next show of importance will be the Marin County Kennel Club show to be held May 30th.

‡ ‡ ‡

Failsworth White Knight, Mrs. Anita M. Baldwin's crack bulldog, is attracting considerable attention at the dog show.

‡ ‡ ‡

Miss C. B. Trask of Los Angeles, who witnessed considerable difficulty early in the week when she tried to rent a room at the Palace Hotel for her pet St. Bernard dog, won a blue ribbon with him at the show.

"Potting" a couple of quail along the roads near Vista, below Oceanside, cost a Los Angeles chauffeur, Percy O'Neill, $25 when the Fish and Game Commission's resident San Diego County field patrol came that way last week on investigation of reports that the breeding birds were being interfered with in just that way through the back country. The defendant was taken to Oceanside and "got his" quickly.

* * * *

Monte Rio, Cal., April 17th.

Breeder and Sportsman:—Arrived in town today to find Monte Rio in a great fever of excitement over the catching of an immense sturgeon. This fish is eight feet long and weighs 180 pounds and was caught by hook and line after a three-hour battle in the Russian river at Monte Rio by H. A. Stagg. A number nine line was used, and a sucker used for bait.

Yours truly,

A. VISITOR.

* * * *

Mrs. Gus Peret is one of Oregon's best women shots and big game hunters. Accompanied by her husband, Mrs. Peret goes into the Oregon woods with pack and rifle and attributes her splendid health to her outdoor exercise. This fair Oregonian has also an enviable record at the traps.

Drink Jackson's Napa Soda.

Sportsmen's Row

Trout-fishing day is almost here.

* * * *

On Monday the bars will be let down.

* * * *

Indications are for some banner sport all over the State.

* * * *

The trap-shooting ranks will likely lose some of their followers for a few Sundays.

* * * *

In the meantime, however, the boys have been keeping busy at the traps.

* * * *

Just think! 102 gunners in the Golden Gate merchandise shoot last Sunday.

* * * *

H. C. Golcher was over and sighted the blue rocks for the first time in months. His shoulder got pretty sore towards the close of the program. Harry was greeted by many friends.

* * * *

The Golden Gate Club, through Secretary Clarence H. Haight, has announced the program for the registered tournament at Alameda on May 20th.

* * * *

F. J. Rainey is one of the late recruits to the sport alluring who is showing promise. Sunday was his third time at the traps and he "busted" 41.

* * * *

D. D. Jones is showing the boys some class with his 20-gauge. He got 42 out of 60, which is traveling some.

* * * *

Tomorrow is an off-day in trap shooting around the bay. Shooters from all over the State are down at Fresno for the registered tourney.

* * * *

Gene Forster cut his finger on the trigger of his gun, but for all that made the presentable score of 45 out of 60.

* * * *

Billy Price, for a small fellow, can certainly get under a powerful lot of guns on his homeward journey.

* * * *

The annual meeting of the Wallace, Idaho, Rod and Gun Club was held last week. One of the club's principal objects is the replenishing of the nearby streams with trout fry and it also takes considerable interest in seeing that the game laws are strictly observed.

Plans were laid for securing a large number of fry and fingerlings from both the state and federal hatcheries during the coming season.

E. R. Denny was re-elected president and C. E. Clarke secretary-treasurer. District vice-presidents also were selected as follows: Walter J. Crim, Wallace; William H. Hoover, Burke; James A. Bean, Mul; Howard R. McBride, Kellogg, and S. S. Bonham, Wardner. The executive committee is composed of Stanley P. Fairweather, Dr. L. J. St. Jean, Franklin Pfirman and Norman Ebbley.

* * * *

Occupying a central point in the display in a Santa Ana window is a large swordfish, weighing 281 pounds, which was caught at Catalina by Chas. G. Twist of Santa Ana, who is a member of the Tuna Club at Catalina. This monster fish was landed after a 32-minute battle, during which it leaped thirty-nine times. It was caught with a 14-ounce rod and a 15-strand line. A large tuna, weighing 150½ pounds, was landed with the same rod by Mr. Twist after a battle of one hour and 50 minutes. A large yellowtail caught by Mr. Twist is also in the exhibit.

* * * *

The Pacific Indians will hold their ninth annual pow-wow and conclave at Tacoma, Wash., July 18th to 21st. This event has come to be looked upon by devotees of the traps in the Pacific Northwest as one of the finest and most important tournaments of the year.

* * * *

A new trap shooting club has been organized at Patterson, Cal., with a membership of twenty-five. H. L. Heintz is president, F. S. Harrison secretary and W. F. Byre vice-president. Bill Ellis was down and reports that the Patterson guns are going to get things started shortly in the right way.

* * * *

Salinas has a merchandise shoot scheduled for today and some shots from around the bay will be attracted there, as Salinas always shows its visitors a good time.

* * * *

A movement is on foot in Washington state whereby prison labor may be utilized in a manner by which it will not come into competition with any established industry and, at the same time, work to the advantage of sportsmen.

The idea is to establish a co-operative game farm at Walla Walla. The project would involve only the initial cost of installation, the labor thereafter costing nothing.

Those who are fathering the idea contend that here is a clean, healthful and interesting occupation for the prisoners which in no way will infringe on the rights of others in the way of competition.

Vernon Club.—Shooting neck and neck until the last frame was reached, Mrs. C. E. Groat, the champion woman trapshooter of the southwest, forged ahead of O. Evans in the shoot-off for the George T. Cline medal and broke 24 out of 25 to Evans' 21x25, making it her second consecutive win.

In the contest for the Cline trophy, placed up Sunday by the Vernon Gun Club at distance handicaps over the 50-target route, Mrs. Groat and Evans tied, each breaking 47 out of 50. Mrs. Groat shot from 16 yards and Evans from 18.

The William H. Hoegee handicap competition was also on for the third time Sunday at yardage handicaps. Mrs. Groat was the high gun in this event, breaking 49 birds. This placed her as high amateur for the day with 96 per cent.

The scores for all events follow:

George T. Cline Handicap—

	Hdcp.	Tgts.	Hits
Van Nest	16	50	40
A. W. Bruner	16	50	44

Open Event at 16 Yards—Van Nest 37x50, A. W. Bruner 41x50, Manderville 36x50, Hunt 36x50, Hedderly 39x50, C. E. Groat 19x25, S. A. Bruner 24x25, Reid 16x25, C. P. Smith 18x25, Bill Dougherty 24x25, Babcock 15x25, Dr. Acthon 13x25.

* * * *

Santa Barbara Club.—The Santa Barbara trapshooting club was host Sunday to teams from that county, Ventura and Los Angeles, in opening the new range beyond Goleta. Forty-six shooters contested, Los Angeles sending a team of fifteen, several of whom made high scores. A feature was the shooting by Alfred Hartman of Los Angeles, 14 years of age, who broke 113 pigeons out of a possible 150. All the visitors pronounced the traps and field perfect.

* * * *

Santa Rosa Club.—Enthusiasm marked the meeting called for Tuesday night of last week to revive the sport of trap shooting and to resuscitate the Santa Rosa Gun Club. This was successfully done, a good membership is in sight and the first shoot of the season was announced for April 30th.

New members to the number of twenty-five were elected to membership at the meeting, and it is expected that a number of others will come in within the next few days. The second and fourth Sundays of the month have been designated as the days upon which the club will enjoy the shoots.

At the Tuesday night meeting officers were elected as follows: T. Virgil Butts, president; E. W. Beatty, secretary; W. E. Morrow, treasurer; W. E. Saunders, field captain.

Directors—W. H. Nagle, Marvin Robinson and Paul Fehrmann.

* * * *

Porterville Club.—The Porterville Gun Club held another enthusiastic shoot on April 16th at its trapshooting grounds west of the town. The results in the 300 bird handicap shoot for the trophy spoon now stands as follows:

Dr. Barber 25x25, Earl Martin 108x125, Dr. E. S. Lawson 108x125, Harry Casad 92x100, Geo. Murphy 110x125, Jas. Rohlick 113x125, Harry Quinn 90x100, Geo. Small 93x100, Richard Hoyt 46x50, I. Jay Boothe 47x50, Guy Knupp 50x50, H. F. Elliott 66x75, Bert Blanchard 70x75, Howard Estes 47x50.

* * * *

Spokane Club.—The Spokane Gun Club won the Spokane-Portland interclub championship April 16th when it defeated the Portland shooters in the fifth and deciding match of the telegraphic competition which has been in progress during the past two months, 117 to 113, over the Moran Prairie traps. Before the match the clubs were on an even basis, each having won two.

The day was ideal for the trap game and the large number of shooters who turned out made excellent scores. George K. March finished high with 49 out of 50, getting 25 straight in the telegraphic event. E. J. Chingren, Hugh McElroy, James Schriver and R. A. Mills, the other members of the team, each made 22.

Shooting from the 20-yard mark, March and Chingren tied for high honors in the Everding watch handicap event, each getting 24 out of 25. Each got a coupon for the trophy.

* * * *

Green Lake Club.—Thirty-two shooters participated in the regular weekly shoot of the Green Lake Gun Club April 16th, and some very fine scores were hung up during the day.

L. S. Barnes was high man, turning in a perfect score of fifty straight. E. K. Van Vleck was the runner-up with another remarkable score of 49 out of 50. Barnes has shown a consistent improvement in all the shoots this year and promises to give some of the crack shots who will attend the State shoot on May 21st and 22d a great run for the State championship. Several other members of the club have signified their intention of competing in the State shoot.

L. S. Barnes, E. R. Bacon, E. K. Van Vleck, A. Hansen and M. A. Rosenfield all tied with perfect scores of 50. Only two more Sunday remain in which to shoot for the City Hall trophy.

About fifteen members stayed after the program was finished and installed the new trap; the lady members of the club doing their share by furnishing a fine lunch. This fine spirit of co-operation has done more than anything else to make the Green Lake Club one of the best shooting clubs on the Coast.

The scores, at fifty targets:—

L. S. Barnes 50, E. K. Van Vleck 49, I. M. Fisher* 47, C. C. Ward 47, J. W. Geltz 47, W. C. Smith 47, G. A. Conklin 45, A. Hansen 45, E. R. Bacon 43, Geo. Edling 43, H. Junker 41, C. B. Fitzgerald 41, A. Marvin 41, M. A. Rosenfield 40, Dr. King 39, E. M. Hansen 39, W. A. Burrell 39, R. V. Mills 39, D. Pease 38, Dr. Winningham 37, S. Burt 36, C. W. Bandy 35, S. E. Bacon 34, G. D. Horst 33, H. E. Gleason 33, H. Cosgrove 33, Dr. S. W. Giffin 32, M. G. Knight 31, C. C. Giffin 31, L. A. Taylor 31, W. M. Easter 21, Fred McGonagle 20, M. Marvin 19, R. L. Woodman 18, Dr. S. W. Case 17, Dell Ingalls 14, R. Anderson 12.

(*Professional.)

* * * *

Seattle Association.—With ideal weather favoring them, the shooters that wended their way out to Harbor Island on April 16th shot until they were tired. John Ruppe offered the high score of the day, smashing 46, with Joe Bacher and Fred Call close on his heels with scores of 45 targets out of the 50 in the regular program.

Many old timers showed up for the first time this season, among whom were: John Considine, this being his first day at the traps in this city for several years; R. H. Miller, of the Mutual Paper Company, who is one of the "daddies" of trapshooting in this city; J. G. Heath, of San Francisco, district manager of one of the large gun and ammunition companies, and H. P. Martine, member of the Alameda, California, Elks' Gun Club.

Two special fifty-target matches were shot off. One, a two-man match between Ralph Kinzer and W. B. Taft, which resulted in Kinzer's winning. The other was a three-cornered match between Joe Bacher, John Ruppe and Fred Landwehr. This match, which was for "blood," resulted in a tie between two of the shooters and will be reshot tomorrow. A great deal of good-natured rivalry exists between several of the shooters and there has been some very interesting matches proposed.

The last man shooting off his last event of the Everding trophy handicap, the gold pin trophy goes to R. S. Searle. This has been a very interesting handicap and was won by Searle, who is a persistent shooter.

The scores, at fifty targets:—

J. Ruppe 46, Joe Bacher 45, Fred Call 45, C. E. McKelvey 44, G. H. Young 44, R. H. Miller 44, Hugh Fleming 43, R. Kinzer 42, Tom Wilkes 42, C. W. Bandy 42, J. H. Hopkins 41, A. J. Gerrard 41, J. G. Heath* 41, G. A. Canuck 39, Frank Landwehr 38, John Considine 38, T. J. Holdridge 38, W. B. Taft 37, R. S. Searle 36, A. W. Mathis 30, W. F. Coleman 28, M. Jahes 26, Dr. Isham 23, A. E. Hall 13.

At one hundred targets—

R. H. Miller 80, Hugh Fleming 88, C. E. McKelvey 87, Tom Wilkes 87, J. G. Heath 86, J. H. Hopkins 83, R. Kinzer 83, W. B. Taft 75, John Considine 71, G. A. Canuck 67, W. F. Coleman 55, Dr. Isham 42, L. Landwehr 83, Joe Bacher 83, John Ruppe 91, T. J. Holdridge 72, F. G. White 73. E. B. Chinn, F. G. White, George Garrison*, A. E. Gibson, E. W. Soergel, D. D. McMaster, H. P. Martine, Ralph Boyker, J. E. Dafter and Dr. Sturgis did not shoot in the regular program.

Bright Prospects for Good Trout Season

SOME COAST STREAMS ARE LOW BUT OTHERS ARE IDEAL for FLY-FISHING

Stream conditions good—the best in years, in fact—is the general report on the eve of the opening of the trout season. From up and down the Coast word is being passed that the streams are excellent for some interesting sport. It is especially promising in nearby streams and creeks and many parties are going to start out on Monday, in spite of the opening falling on a week day.

Railroad companies with offices in San Francisco have received telegraphic reports from their agents and they set forth the different conditions at the points of the lines. They are as follows:—

NORTHWESTERN PACIFIC.

Streams up to Eureka and beyond are exceptionally good this year. The streams are all clear. Dobbins Creek near Fort Seward and Austin Creek and Duncan Mills should be choice spots.

Paper Mill Creek from Lagunitas to Pt. Reyes will be an early stream.

Sonoma Creek near Glen Ellen is a good early stream close by.

WESTERN PACIFIC.

Belden, April 27.—Yellow Creek is clear and trout are taking salmon fly. Chip Creek clear, trout taking salmon fly and Hellgamite. Feather River high, medium clear—taking grasshopper, salmon fly and hellgamite but not spoon. Indications for good season.

Big Bar, April 27—Water high, river and weather conditions are quite favorable.

Keddie, April 27—Fishing season not yet open, streams muddy. Outlook for bait fishing is favorable.

Blairsden, April 26—Fishing in small streams with salmon eggs and bait should be very good when season opens. Feather River is too high on account of melting snow. In about two weeks it should be O.K. Lakes are inaccessible on account of snow.

SANTA FE.

Middle River, near Stockton—Striped bass reported in abundance.

SOUTHERN PACIFIC.

Salmon are running off Monterey.

Water not too high and fishing this year promises to be exceptionally good in the creeks around Dunsmuir and Castle Crag.

Santa Cruz, April 27.—More fish this year in San Lorenzo than in 1915.

F. Spence, president of the California Anglers' Association, declares that fishing conditions are the best he has ever observed. He says, "Conditions are most favorable, as the streams are low and clear. Weather has been warm and it is believed that the trout will readily rise to the fly, even this early in the season.

"A number of the members of the California Anglers' Association are going to fish their favorite stream on the opening day. Greater numbers will follow on Saturday and Sunday."

A. D. Ferguson, field agent of the Fish and Game Commission, dispatched word to J. S. Hunter, assistant executive officer, that the streams around Redding are favorable for fly-fishing.

* * * *

Enough rainbow trout eggs to assure operation of the Bear valley hatchery to its capacity without importation of any from Tahoe, at the high cost of last year, have been assured, unless the eggs thus far taken prove subject to the same strange infertility of a part of last year's gathering. The men have tried to make a record by taking all eggs possible, and have proved up exactly what is the capacity of Bear valley for an egg-taking station under the favorable "run" conditions of this year.

HATCHERIES IN FULL OPERATION.

There are approximately 18,000,000 quinnat salmon fry at Sisson hatchery at the present time. The Commission is planning to hold and feed from twelve to fifteen million of these salmon fry at Sisson hatchery and at the proper time distribute them in the Sacramento and Klamath rivers. Approximately 4,000,000 Loch Leven and Eastern brook trout eggs are being hatched out at this hatchery for distribution in the streams of the State during the coming summer. The rainbow trout egg collection stations on the Klamath river have been opened up, and everything is now in readiness for the egg collecting operations. On account of the very severe storms, the water in the Klamath river and tributaries is very high. The streams are flowing bank full and the water is very roily. Under these conditions the spawning fish will not enter the tributary streams where our racks and traps are located. Every effort is being made to collect a large number of rainbow trout eggs this season, and if weather conditions are favorable from now on there is still a chance that a fair take of eggs may be secured. In addition to the spawning stations on the Klamath river, the board is contemplating opening up the egg collecting station at Burney Creek during the coming month.

The steelhead egg collecting stations at Snow Mountain dam, Mendocino county, and Scott Creek, Santa Cruz county, were opened up during January and February. To date about 500,000 steelhead trout eggs have been taken at Snow Mountain and there are 570,000 eggs on hand at the brookdale hatchery from Scott Creek Station.

The Ukiah hatchery was opened up last December and there are 750,000 quinnat salmon fry now ready for distribution. The fry will be distributed in Eel River and tributaries and in Mad River, Humboldt county.

The old Price Creek hatchery, located near Grizzly Bluff, Humboldt county, is being removed to a site on Fort Seward Creek, a tributary of the Eel River, on the line of the Northwestern Pacific railroad. A modern hatchery will be erected on the new site. With the improved water supply system and better transportation facilities, the Commission will be enabled to do far better work in keeping the streams of the northwest coast stocked with fish. Both quinnat salmon and trout will be propagated at the new hatchery. It is expected that the hatchery will be ready for operation by April 15.

About 50,000 Eastern brook trout fry are being held at the Verdi hatchery for distribution in the streams and lakes of the Tahoe region during the coming season. An additional 50,000 fish of the same species are being held at this hatchery for planting in Marlett Lake, to keep up the supply of breeders.

The plans for the large hatchery to be located on Oak Creek in Inyo county were approved by the Board of Fish and Game Commissioners at a meeting held March 10. Work on the structure will be commenced at once. The building will be constructed of granite boulders and when completed will have all the latest and most improved apparatus used in modern fish culture. This fine hatchery, designed for the purpose of supplying the streams of southern California and the district as far north as Fresno, as well as the streams and lakes of Inyo, Mono, and Alpine counties, is the result of the untiring efforts of Commissioner M. J. Connell to establish a hatchery that will supply the wants of the people of the district mentioned above for a quarter of a century. The people of the State of California should be proud of what will be the finest hatchery in the world.

what will be the finest hatchery in the world.—California Fish and Game.

STRIPED BASS FISHING.

Members of the San Francisco Striped Bass Club continue to enjoy interesting sport in Raccoon Straits and off Angel Island. Good catches have been reported during the past week. Up at San Antonio and Napa, however, the sport has not been so good of late.

* * * *

Striped bass fishermen report great sport near Sacramento, for the run of this game fish now is in its height at this point, while the bass are taking bait freely. The best fishing so far reported is to be had between the mouth of the American river and the Western Pacific bridge on the American, and between the mouth of the American and the P. G. and E. power plant on the Sacramento. One fisherman took 18 large bass Wednesday of last week, fishing on the American, using shrimp and clams as bait.

Advices from down river are to the effect that the run of striped bass now has passed Courtland and that the fish all have moved out of Snodgrass slough on up stream.

ANOTHER ELKS SHOOTING CLUB.

The Elks are certainly booming things along in the the trap-shooting game. Another club was organized during the week. The San Rafael boys are going to turn out at the traps and show the Alameda and Oaklanders that they can bust the rocks. Robert Johnson and John Foge are lining up members. The first shoot will be tomorrow. A beautiful grounds has been located on the golf links at Santa Venetia. O. N. Jones, the promising and popular young professional shot, has been assisting the San Rafael club in getting started. The members are mostly new at the trap-shooting game but are enthusiastic.

In the near future a three-cornered trap shoot will be held at Santa Rosa with the Eureka, Santa Rosa and Alameda Elks in competition. When the Oakland and San Rafael boys get a little more settled and in practice a trap shooting league will likely be organized.

CAMPAIGNING AGAINST SPARROWS.

Campaigning against the English sparrow as a public menace, the San Diego city authorities are cooperating with the warning issued to Southern California municipalities by the Fish and Game Commission calling attention to the danger of its increase. Secretary Ernest Schaeffle of the Commission reports that the sparrow, as a bearer of the dread coccidiosis, or "quail disease" of the East, similar to or identical with the "white diarrhoe," that carries off baby chicks, and the "blackhead" of tame turkeys, may become a most serious enemy of our native quail if it extends to the resorts thereof, which is a reason ample to interest all sportsmen in its extermination while possible. Sparrows increase so rapidly that they must be gotten rid of before they get a foothold, if ever.—Los Angeles Tribune.

DEVICE FOR TRAP SCORES.

A device which has been used successfully by the DuPont Trapshooting Club at Wilmington, Del., is known as the "Score Keeper's Combination Desk and Chair" and enables the person scoring a squad of trapshooters to remain comfortably seated while at his work. The desk provides him with a smooth, hard surface on which to place his score sheet.

The lid of this desk may be hinged, thus permitting it to be raised and lowered at will, or it may be made of one solid piece of wood. The advantage of a hinged lid is, however, apparent. The scorer is then provided with a drawer in which he can keep score pads, pencils, shells or other materials which he may have use for during the afternoon. Secretaries, if they so desire, may fit a lock to the lid so that articles can be kept in the desk drawer from one shoot to another without fear of molestation.

If the club is equipped with two or more traps, it is probable that at least one of them is some distance from the club house, and a permanent device like this desk placed behind the trap would be of great convenience to the scorer. His materials are always at hand, and frequent walks to and from the office are eliminated. A large umbrella or some other protection may be easily set up, and the person scoring thus protected from the hot sun or inclement weather. With these conveniences, the scorer is able to give his undivided attention to the squad shooting.

The Combination Desk and Chair is made of yellow pine, and can be constructed by any carpenter or secretary, who possesses a little skill with hammer and saw. The cost of this trapshooting device, including lumber, nails, and labor is approximately $5.00.

Blueprints have been prepared outlining in detail the construction of this desk and chair. Any gun club secretary, or club member may readily secure one of them. Applications for blueprints should be addressed direct to this magazine or to the Trapshooting Division, DuPont Powder Company, Wilmington, Del.

* * * *

Pastime Club.—San Diego gunmen will burn incense at the altar of Nimrod May 5th and 6th, which are the dates set by the Pastime Gun Club for its clay-bird carnival next month. Prominent trapmen from coast points will be in attendance and a repetition of last summer's clever gunplay will be seen at Dirtbird Roost, home of Clan Pastime.

The Arizona bunch has promised to come and among them are some hard shooting hombres. Headed by "Beech" Twitchell, the massayampa squad includes Tom Edens, H. P. De Mund, Ray De Mund, Del Morrell, Bill Mullen and a number of new birds from Apacheland.

Several squads are due from Los Angeles and this time they will come. Not to mention any names, Heinie Pfirrmann doubtless will be chosen big chief of the Angel City gang. Of course, the two Bruners, "Big Ed" Mitchell, Comedian George Oliver, Walter Clement and twelve or fifteen others from the northern town will be here.

O. N. Ford of San Jose, who really is a shooting star, announces that he has written in his date book: "May 5 and 6 me and five or six others will trek to San Diego."

With all this array of talent, and many others not mentioned, the poor little baked birds are in for anything but a frolic. The war chest will contain $500 added money and a part of this will be devoted to merchandise prizes.

The menu, as partially decided on, shows that there will be ten events of twenty birds each, $15 added, making $150 for the day, and in addition a merchandise event with $75 worth of prizes. This is the card for each day, although there doubtless will be sessions with twin targets and the joker trap. The complete program will be issued this week.

* * * *

Lewiston Club.—At the traps of the Lewiston Gun Club on April 16th 18 shooters practiced. D. S. Wallace is leading in the Everding gold watch trophy event with 69. Hahn and Johnson are tied, with 65. Wallace broke 25 targets straight from the 21-yard line. In the practice shoot Wallace, Johnson, Beckman and Hill all secured 90 per cent from the 16-yard line.

* * * *

Skyhomish Club.—The Skyhomish Gun Club of Washington has been organized for several weeks and is holding Sunday shoots that attract many of the "gun bugs" in that locality. J. G. Henry made the start last year and the club is now progressing with all the success of the large gun clubs throughout the State. A rifle club was also recently formed, which is associated with the national club. Scores of the shoot, at 50 targets, are: Himebaugh 44, Williams 41, Fournier 42, McAvoy 31, Kirkland 38, Farr 35, and Henry 38.

* * * *

C. E. Leavy, one of Seattle's Boston and Bull Terrier fanciers, who for the past year has been in California, attended the recent Seattle show with his pal, Edgecote Buttons, for exhibition only.

Banner Team Race at San Jose, Cal., On May 14th

MODESTO AND PERHAPS GOLDEN GATE AND FAMILY CLUBS WILL PARTICIPATE

San Jose, Cal.—Breeder and Sportsman: On May 14th the Modesto boys are going to come to San Jose to shoot with our club and practice over the grounds where the State shoot will be held next month. They have challenged our club to a five-man team race for the dinners. We accepted and we hereby challenge the Golden Gate Club and the Family Club to a five-man match on May 14th, the losing team to pay for the dinners for the members of the other teams. We should have a deal of sport and enjoyment out of the team competition. We will shoot 100 targets in the team race.

I am getting the grounds in fine shape for the State shoot. Everything looks as if it will be the biggest tournament ever held on the Pacific Coast. Men are coming from Arizona, Nevada, Utah and Oregon. I have decided to install four Leggett traps. We thought three would be enough but have decided to put in four so that there will be accommodations for all who wish to participate.

A squad from the San Jose Blue Rock Club will be at Fresno on April 29th and 30th. We are going to make a number of visits to California clubs. On May 1st and 2nd we go to Los Angeles for the registered tournament and to San Diego on May 5th and 6th, and we will have two full squads at the Golden Gate registered shoot on May 20th.

Yours respectfully,
O. N .FORD, Secretary,
San Jose Blue Rock Club.

* * * *

Golden Gate Club.—Sunday, April 23rd was a glorious day for the trap-shooting enthusiasts about the bay. They swarmed over the Alameda grounds to the number of 102 to participate in the merchandise shoot, and this is a record for an event of that kind. Secretary Clarence A. Haight, manager Pete Ashcroft and their co-workers were kept busy as bees running off the events and they accomplished their tasks without a hitch.

In the competition of 60 targets, Toney Prior of San Francisco and H. Lorenson of Newman turned in high scores of 59 and they had to divide the honors. Frank M. Newbert, N. A. Howard and Barney Worthen were close behind with 58 apiece. Henry Stelling and W. J. Terry did well to get 57. Of the professionals, Charley Knight cracked 57 and led L. Hawxhurst by one target.

There were prizes for every one who participated. They were drawn for by the grab bag system. The high men had first choice but some of those who drew toward the last were rewarded with very suitable and valuable presents. The club donated prizes so that every one would have something to bring home.

As early as nine in the morning the firing started and at 10:30 the competition commenced. It was over early in the afternoon and a luncheon was enjoyed by those present. The scores were:

* * * *

Pastime Club.—Capitan Jack Merrill was a real sensation at the complimentary trap matinee given for Messrs. Applegate, Morse and Beckwith on April 21st. He started in with an unfinished run of 37 and in cool, easy fashion finished his century string without a miss, 137 straight.

The visitors were away off, failing to deliver what was expected. Archie Julian blew up during his third string of 20, dropping four in a row, but at that he smashed 94. Quartermaster Williams of the cruiser San Diego had 95.

It is planned to take a 10-man team to Los Angeles to compete in the tournament there May 1 and 2.

The scores, fifty targets:—

Merrill 100, Barber 94, C. Julian 93, H. Justin 88, Burns 89, Williams 95, A. Julian 94, Dunn 88, Clements 90, Johnson 56, Andrews 55, Applegate 65, Morse 64, Beckwith 63.

COMING REGISTERED TOURNAMENTS.

California.

Fresno, April 29—Fresno Blue Rock Club, C. B. Jackson, Secretary.

Los Angeles, May 1, 2—Los Angeles Club, Fred H. Teeple, Secretary.

Los Angeles, May 8, 9.—Vernon Gun Club, William Pugh, Manager.

Alameda, May 20—Golden Gate Club, Clarence A. Haight, Secretary.

San Jose, May 28, 29, 30—California-Nevada Association Tournament, San Jose Blue Rock Club, O. N. Ford, Secretary.

Eureka, July 4—Eureka Blue Rock Club, H. A. Hine, President.

Oregon.

Portland, June 5, 6, 7—Sportsmen's Association of the Northwest Tournament, under the auspices of the Portland Gun Club, Frank Templeton, Secretary.

Portland, Sept. 12, 13, 14—Pacific Coast Handicap.

Washington.

Spokane, May 8, 9 and 10—Spokane Gun Club.

Chehalis, May 30—Chehalis Rod and Gun Club, Gus T. Thacker, President.

Seattle, July 4—"Old Policy," Green Lake Gun Club, W. C. Smith, Secretary

Tacoma, July 18, 19, 20, 21—Pacific Indians, F. C. Riehl, Secretary.

Salt Lake Club.—The eighteen shooters who attended on April 16th at the Salt Lake Gun Club were treated to one of the best races of the season, when Edmunds, Bray, Reilley, Bain and Bishop tied in the cup shoot.

In the shoot-off Bain and Reilley were eliminated, leaving the other three men again tied.

In this shoot Reilley, who made fifty straight breaks without handicap, dropped only one bird, making a record for the day of 74 out of 75 birds.

As he was shooting from scratch, however, the handicap was hard to overcome.

In the second shoot-off Edmunds dropped out, leaving Bray and Bishop tied. Before this tie could be decided it was necessary for the boys to shoot fifty birds. Bishop won with a score of 43 to 44. Bishop is the first man to secure his name on the cup for a second time this season. The scores were—

Shooter.	Bke.	Hdcp.	Ttl.
Reilley	50	..	50
Gardner	45	..	45

Tacoma Club.—The Tacoma Gun Club held its regular shoot at Manitou on April 16th. A. Riehl won the Mellinger gold medal; J. A. Dague won the Majestic cafe trophy after a shoot-off with A. Riehl; Griffin, A. Riehl and Young all tied for high average on the Everding diamond pin. Young won the White Flyer fob; J. Cooper and Dague tied for high average on the Hercules Powder Co. trophy. A. Riehl won the J. A. Dague challenge cup. The following scores were made out of 50 birds for the Mellinger gold medal:—

Shooter.	Bke.	Hdcp.	Ttl.
Frank Riehl	48	0	84
Turnbull	40	9	49
A. Riehl	48	1	49
Bales	41	7	48

SLOANE, Hollister, Cal.

FOR SALE.

ELFREADA D., bay mare with black points, 9 years old, weighs 1080 lbs. Paced last year on half-mile track in 2:12 and on mile-track in 2:09 with only three months training. This mare can show two minute speed. Sired by Diablo 2:09¼, dam Bell Onward 2:14. This mare is guaranteed to be perfectly sound and not a blemish on her. Has no mark; is in training at present and in good condition. For price and particulars address Mrs. F. H. HERMAN.
2805 Rucker Ave., Everett, Wash.

FOR SALE.

Very handsome, splendidly matched team of blacks. Sired by Expressive Mac 2:25½, dam the grandam of Clara Mac 2.04½. Team weighs 2555 pounds, height 16.3, sound. Full brother and sister, eight and nine years old in May. Stylish, high-headed, fine action. Intelligent, kind disposition- a child or a lady can handle them. Used for a hearse team for four years. I think it is the best team in California for that business or for a fancy large team for any purpose. Must be seen to be appreciated. $500 was offered and refused for the gelding to go to the Chicago sale three years ago. Will pay fare to anyone who will come and see this team if they are not as represented. Address J. H. NELSON.
Phone 40 F 5. Box 361, Selma, Cal.

DELINQUENT SALE NOTICE.

MAY DAY GOLD MINING COMPANY.—Location of principal place of business, San Francisco, California. Location of works, Calaveras County, California.

NOTICE:—There are delinquent upon the following described stock, on account of assessment (No. 4), levied on the 24th day of February, 1916, the several amounts set opposite the names of the respective shareholders, as follows:

And in accordance with law and an order of the Board of Directors made on the 24th day of February, 1916, so many shares of each parcel of such stock as may be necessary will be sold at public auction at the office of the company, 1215 Van Ness Avenue, San Francisco, California, on Friday the 19th day of May, 1916, at the hour of 2 o'clock p. m. of said day, to pay said delinquent assessment thereon, together with costs of advertising and expenses of the sale.

C. E. HEALD, Secretary.
Office 1215 Van Ness Ave., San Francisco, California.

RACE TRACK FOR SALE.

The Ukiah race track, located a little less than a mile from the Court House at Ukiah and bounded by the State Highway on the west, the county road on the south, and the Northwestern Pacific Railroad nearly the entire length on the east side of the track. The property consists of twenty acres. Fifty-nine good box stalls, good grandstand, fencing in good order, and one of the best half mile tracks in the state. An excellent winter track and an ideal place to work horses during that season. Plenty of adjoining drives for jogging horses. Two wells on the premises as well as water from the city water works, with tanks conveniently arranged for sprinkling.

This is the only race track in Mendocino county and the location of the county fairs. Ukiah is the county seat and has a population of about 3000, is in a most fertile valley in which all kinds of fruit, vegetables, hay, grain and hops are grown. Has excellent water; no malaria or mosquitos. It has paved streets, good sewerage, and splendid gas and electric light works. There are many standard and thoroughbred horses in this county and the people are a race loving lot. This property is offered for sale at a less price than adjoining property is held at. For terms and further particulars address

F. W. KELLEY,
Care of Breeder and Sportsman.

FARMS FOR SALE

Choice Land in Idaho

Lewiston, Idaho, is situated at the forks of Clearwater and Snake rivers and has transportation to the coast.

960 acres 7½ miles from Lewiston, Idaho, 4½ from Lapwai, Idaho, on main traveled road, all in cultivation except about 15 acres, all level land, just a little rolling, 320 acres of fall wheat in, 225 acres fall plowed for spring crop, about 30 acres in alfalfa. All fenced and cross fenced. Two good springs with big cement water troughs, well, windmill and cement reservoir, water piped to house, 7 room house, hot and cold water and electric lights. Large horse barn with hay mow in the center, electric lights in barn; cow barn with two box stalls; hog pens, shade trees, chicken houses, blacksmith shop, wagon shed, granary, outdoor cellar with bunk house overhead. $85 per acre; will take one-third down, time on balance to suit purchaser, at 7 per cent interest. One-third of crop goes with place if sold any time up close to harvest. Mild climate, can raise all kinds of fruit, grain and vegetables. Wheat in this country goes from 35 to 65 bushels per acre, barley 40 to 80 bushels per acre.

320 acres 4½ miles south of Vollmer, Idaho, 275 acres in cultivation, balance in pasture and timber, farm land lays practically level, one-third of crop goes with place if sold before harvest. Some fall wheat already sown. All fenced and cross fenced. Quarter section of it fenced hog tight; good four-room house, wood shed, and out of door cellar, nice grove around house, well at house, fair stabling and out buildings, spring and spring creek close to barn, three springs on place. Price $70 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

238 acres 4½ miles from Lewiston, Idaho, 175 acres in cultivation, 25 more can be cultivated, balance good bunch grass pasture, fenced and cross-fenced, good spring creek runs across place, small house, station on place for Johnson R. R., two grain warehouses at station. Price $70 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

160 acres of timber land, good farm land when timber is cleared off, all can be farmed except about 2 or 3 acres. Good timber, yellow pine and fir. Price $4000. 40 miles from Lewiston, Idaho. Well located to log off.

240 acres 6 miles from Asotin, 12 miles from Lewiston, Idaho, about 75 acres in fall wheat, about 75 acres more can be cultivated, balance in bunch grass pasture, two springs, small house, all fenced. Price $40 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

8—Three-year-old trotting division, Futurity Stake No. 13 (closed 1912) 3300

9—2:13 class, pacing..... 900

FOURTH DAY

10—2:12 class, trotting.....$ 900

11—Free-for-all class, pacing.... 900

12—2:20 class, trotting..... 900

Guaranteed Stakes Nos. 2, 3, 5, 6, 9, 10, 11, and 12 $900 each, three heats, money divided $300 to the first heat, $300 to the second heat, $300 to the third heat. Money in each division divided 50, 25, 15 and 10 per cent. A horse having won the first two heats and drawn or distanced in the third heat shall not lose position in the summary.

Nominators have the right of entering two horses in one ownership in any race by the payment of two per cent. additional, but only one of the two horses so entered to be started in the race, and the starter is to be named by 5 o'clock p. m. the day before the race is to take place.

Entrance fee five per cent. to start, three per cent. due at time entries close, two per cent. additional if not declared out on or before July 1, 1916. Declarations must be paid in full at time of declaring out. Usual five per cent. additional from winners in all races except Futurity Stakes.

Horses are to be named and eligible when entries close to the classes in which they are entered.

The Association reserves the right to declare two starters a walkover. When only two start they may contest for the entrance money paid in, divided 66 2-3 per cent. to the first and 33 1-3 per cent. to the second horse. A horse distancing the field shall be entitled to first and fourth money only and in no other case will a horse be entitled to more than one money.

The Association reserves the right to change the hour and day of any race, except when it becomes necessary to antedate a race, in which instance the nominators will receive three days' notice by mail to address of entry.

The right reserved to reject any or all entries and declare off or postpone any or all races on account of weather or other sufficient cause.

Entries not declared out by 5 o'clock p. m. the day preceding the race shall be required to start and declarations must be in writing and made at the office of the Secretary at the track.

Racing colors must be named by 5 o'clock p. m. the day preceding the race, and must be worn upon the track, in all races. Colors will be registered in the order in which they are received, and when not named or when said colors conflict, drivers will be required to wear colors designated by the Association.

The Association reserves the right to start any heat after the fourth score, regardless of the position of the horses.

All Stakes are guaranteed for the amount offered and are for the amount offered only.

MEMBERS.

Under the By-Laws of this Association, none but horses belonging to members of the Association are allowed to start in the regular races at its meetings. Membership fee $25, which includes annual dues for the first year and entitles members to all privileges. Those who are not members of the Association should send membership fee at the time of making entries.

THE STANFORD—OCCIDENT FUTURITY NO. 2.

(Foals of mares covered in 1915)

TO TROT AND PACE AT THREE YEARS OLD

$1,800.00 FOR TROTTING FOALS $1,200.00 FOR PACING FOALS

To be Given Under the Direction of the

California State Agricultural Society, 1919

Entries to Close May 15, 1916

Money Divided as Follows:

TROTTING DIVISION

$500.00 to 1st heat.
$500.00 to 2d heat.
$500.00 to 3d heat.
$300.00 to horse standing highest in Summary.

PACING DIVISION

$350.00 to 1st heat.
$350.00 to 2d heat.
$350.00 to 3d heat.
$150.00 to horse standing highest in Summary.

ENTRANCE AND PAYMENTS—$2.00 to nominate mare on May 15, 1916, when name, color, description of mare and stallion bred to must be given; $3.00 July 1, 1916; $5.00 December 1, 1916; $5.00 on yearlings April 1, 1917; $10.00 on two-year-olds April 1, 1918; $10.00 on three-year-olds April 1, 1919.

STARTING PAYMENTS—$25.00 to start in pacing division; $55.00 to start in trotting division. All starting payments to be made ten days before the first day of the State Fair at which the race is to take place.

NOMINATORS must designate when making payments to start whether the horse is a Trotter or Pacer.

CONDITIONS

The race in each division will be for three heats; if no horse wins two of the three heats a fourth heat must be raced by the heat winners to decide the winner of the race; all other horses to go to the barn.

Trotting division heat purses $500.00. Total purse $1,800.00.

Pacing division heat purses $350.00. Total purse $1,200.00.

Heat purses divided 50, 25, 15 and 10 per cent; the extra $150.00 in pacing and $300.00 in trotting division goes to the horse standing highest in the summary; distance 100 yards. A distanced horse shall be entitled to money already won.

If a mare proves barren or slips or has a dead foal or twins, or if either the mare or the foal dies before December 1, 1916, her Nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there will be no return of a payment nor will any entry be liable for more than the amount paid in or contracted for. In entries, the name, color and pedigree of mare must be given; also the name of the horse to which she was bred in 1915.

Entries must be accompanied by the entrance fee. Nominators are liable for amounts paid in only. Failure to make any payment forfeits all previous payments. This Association is liable for $3,000.00, the amount of the guarantee only.

Hobbles will be barred in trotting and pacing divisions.

Rights reserved to declare off or re-open these stakes in case the number of entries received is not satisfactory to the Board of Directors. There will be no more moneys in each division or heat than there are starters. No horse shall receive more than one money in each heat.

Entries open to the world.

Other than exceptions made in this entry blank, rules of National Trotting Association to govern.

JOHN M. PERRY, President. CHAS. W. PAINE, Secretary, Sacramento, California.

For Greatest Satisfaction Use
DOUBLE SERVICE Automobile Tires
Guaranteed 7,000 Miles Service
Absolutely Punctureproof

Double Service Tires are made double the thickness of the best standard make tires.

This 100% greater wearing surface naturally gives that much more mileage and service. The average of 12 miles of tough fabric and one inch surface tread rubber makes these tires *absolutely punctureproof*.

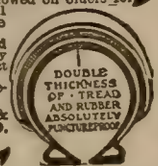
These tires excel all others for use in the country over rough and rugged roads as well as on hard pavements. They are as easy riding and resilient as any other pneumatic tire—same air space and pressure being the same.

They are the *most economical* and "care free" tires made and are used where tires must be depended on and tire troubles cannot be tolerated. Many *Double Service* style tires are in use in the U. S. government and European War service.

Our output is limited to a certain amount, but for a short time we offer the following reduced special prices as an introductory Offer:

PRICES

	Tires	Tubes		Tires	Tubes
30x3 in.	$ 8.60	$2.30	36x4 in.	$17.45	$4.65
30x3½ in.	10.85	3.10	35x4½ in.	21.30	5.60
32x3½ in.	12.75	3.20	36x4½ in.	22.50	5.75
32x4 in.	15.75	4.20	37x4½ in.	23.60	6.20
34x4 in.	16.70	4.35	37x5 in.	26.30	6.60



All other sizes not included in above list also furnished. Non-skids at 10% additional.

Terms: Payment with order at above special prices, a 10% discount allowed on orders for two or more tires. All personal checks must be certified.

Try these tires now and be convinced of their very high qualities. Sold direct to the consumer only.

Descriptive folder upon request. Write for it.

OFFER $2600 IN PRIZES FOR GOOD ROADS PHOTOGRAPHS

National Highways Association Announces Photo Contest Open to Everybody. Want Pictures to Start Exhibit In National Capital to Show Law Makers What Uncle Sam Should Do in the Good Roads Movement

COLONEL THEODORE ROOSEVELT, IDA TARBELL AND MARK SULLIVAN TO SERVE AS JUDGES IN CONTEST

OFFICERS OF NATIONAL HIGHWAYS ASSOCIATION WHO SUBSCRIBED FUNDS TO CARRY ON PHOTOGRAPHIC CONTEST

To secure for the National Highways Association photographs of roads, and in the hope of adding strength to its membership and means, so that the Association may prosecute its work for

"Good Roads Everywhere"

Photographs will be judged by THEODORE ROOSEVELT, MARK SULLIVAN, IDA M. TARBELL

One First Prize of $500.00	40 Fourth Prizes of $15.00 each
5 Second Prizes of $100.00 each	100 Fifth " " $ 5.00 "
20 Third " " $ 25.00 "	166 Prizes Totaling $2,600.00

Photographs will be judged first upon their merit in showing road conditions (good or bad); second, pictorial interest; third, photographic excellence. Any one may become a competitor. It is not required that competitors be members of the Association, and no preference will be given members over non-members in awarding the prizes. It is hoped by the Association that many will be sufficiently interested in its patriotic work to become members, and thus help the cause of "GOOD ROADS EVERYWHERE." This can be done by sending to the Association the dues of any class of membership, in cash (by registered mail), by money order or check to the order of the Association.

Classes of membership are as follows:—HIGHWAY MEMBERS, $5 PER ANNUM; SCOUT MEMBERS, 50 CENTS PER ANNUM; CAMP FIRE MEMBERS, 50 CENTS PER ANNUM.

Any boy under eighteen can become a Scout Member; any girl under eighteen a Camp Fire Member. All men and women eighteen and over are eligible to membership except in Scout and Camp Fire Classes. If you want further information regarding the National Highways Association, send nine cents in stamps to its "Work Shop" at South Yarmouth, Mass., and receive a beautiful three-color map, and a large sheet, also in three colors, giving all particulars about the Association. The nine cents is exact cost of map, information sheet, envelope and postage.

CONDITIONS OF CONTEST:—1. A contestant may submit any number of photographs, any one or all of which may receive a prize. 2. All photographs must be of some road within the United States. 3. Photographs receiving a prize shall thereby become the property of the Nat'l Highways Ass'n with full legal title and copyright vested therein. 4. The full name (do not use initials) and full address of the contestants must be upon the back of each and every photograph submitted. 5. No photograph can be returned. But none will be published by the Association or allowed by them to be published by others, save such as win prizes and are purchased by agreement after the contest is over. 6. Photographs should be addressed to "GOOD ROADS EVERYWHERE" Photograph Contest, Nat'l Highways Ass'n, Washington, D. C. 7. Contest closes at noon, Tuesday, November 7, 1916. Prizes will be awarded as soon thereafter as physically possible. There are no other conditions. There is no limitation as to the kind of photograph; size; when taken by whom; details shown; or number submitted by any contestant, and no correspondence will be entered into about the competition.

Roads will be paid for by the people, they are used by all the people and are free to all the people.

COLEMAN Du PONT. CHARLES H. DAVIS.

Harpers Weekly and The Breeder and Sportsman

$5.50 WORTH FOR $3.25

Breeder and Sportsman

One Year, 52 Copies, Regular Price $3

THE BREEDER AND SPORTSMAN is the oldest weekly journal devoted to the Horse west of Chicago, having been established in 1882. This interest, together with the Kennel, Gun, Fishing, Coursing and kindred sports receiving the most attention in its columns; together with Agricultural and Dairying Departments, under whose headings especial attention is paid to the breeding, etc., of Cattle, Sheep, Hogs, Poultry, and all other animals connected with stock raising.

As an advertising medium to Racing Associations, Horsemen, Stock Breeders, Manufacturers of Sulkies, Carriages, Wagons, Agricultural and Dairying Implements and Machinery, Sporting Goods, Fanciers, Stock Foods, and all others desiring to bring their wares to the attention of the classes to whose interests the paper is devoted within the field mentioned above, the BREEDER AND SPORTSMAN will be found indispensable.

Harpers Weekly

Six Months, 26 Copies, Regular Price $2.50

At no time has it been so evident to Americans as now, that the most important thing in the lives of all of us is the progress of the European War.

Next to your daily bread the war interests you most vitally. It may even come to be the most important part of your problem of living.

The periodical of greatest fundamental interest to you today is the one that can best report those phases of the war that come closest to your country and you.

Because of connections abroad and at home, HARPER'S WEEKLY is that publication.

As a critical commentary that presents inside facts, it is the necessary bridge for intelligent readers between the daily newspaper and the monthly review.

You want HARPER'S WEEKLY now. You can get it now on trial at a remarkable reduction.

Send $3.25 Now and Get Them Both

THIS OFFER is made to all who will send us $3.25 before April 30th, 1916, whether for extension of subscription, renewal of subscription or a new subscription. Address:

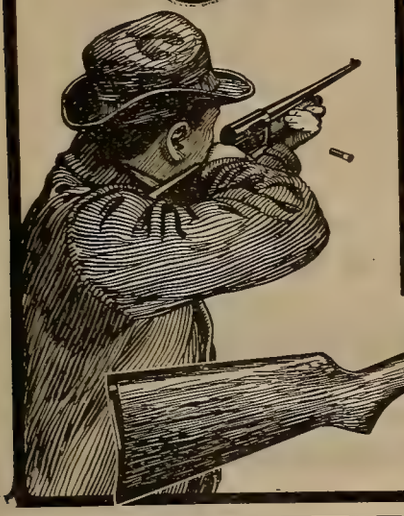
REID'S REMARKABLE RECORD

Adds Further Evidence of the Superlative Quality of

Peters SHELLS

Shooting at Registered Tournaments during the past four years L. H. Reid of Seattle, has made a phenomenal Record of consistent High Scores



1912—	2115 ex	2200, 96.14%,	Pacific Coast High General Average.
1913—	3843 ex	4005, 95.95%,	Pacific Coast High General Average.
1914—	2146 ex	2225, 96.44%,	Professional Average for United States.
1915—	2482 ex	2550, 97.33%,	Pacific Coast High General Average.
Total,	10,586 ex	10,980, 96.46%	

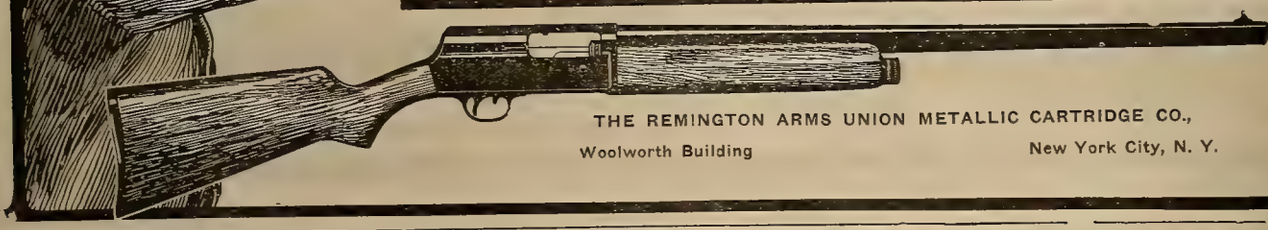
During the above four years, Mr. Reid has shot at nearly 30,000 Registered and non-registered targets, breaking an average practically equal to the above. In accomplishing these results, he used about two-thirds TARGET (medium grade) and one-third IDEAL (high grade) shells, all with

"STEEL WHERE STEEL BELONGS"

THE PETERS CARTRIDGE CO., — Pacific Coast Branch, — 585-587 Howard St., SAN FRANCISCO, CAL.

REMINGTON U.M.C.

AND THE REFEREE CALLED "DEAD!"



There is a little stronger rallying to the traps this year from coast to coast. More clubs are being formed and more members of old clubs are active than in recent years.

Might it not be a good time now for you to get that Remington Autoloading Shotgun that you have long wanted?

One of the country's best known trapshots boosted his average from 90—where it seemed doomed to hang—to 95-plus after shooting this gun but a very short time. We can't all equal this feat, perhaps, but we all want to give our skill every advantage.

You'll like the Remington Auto as a single loader — you simply drop in a shell, press a button, and you're ready to fire. Action stays open after each shot. On "doubles" its superiority is even more pronounced. It's a natural pointer, recoil at a minimum and safe absolutely.

Let your dealer show you this "Autoloading Shotgun That Works" — Write for booklet.

The 20th Indoor Championship Match *and* Prize Shoot

WON WITH

WINCHESTER

.22 Caliber Rim Fire Cartridges

The winning of this — the most important indoor shooting of the year — means more than simply another addition to the long list of triumphs to Winchester — the **W** brand of guns, ammunition, etc. It is convincing proof that the long and firmly established policy of Quality First, followed so religiously in the manufacture of Winchester goods, has not been relinquished an iota, notwithstanding the unparalleled demands made upon the Winchester company for its products during the last twenty months. It plainly shows that, no matter how unusual the condition, Winchester goods can always be relied upon. The big winners at the Indoor Shoot were as follows:

100 SHOT CHAMPIONSHIP MATCH

Won by L. G. Buss, score 2473, with Winchester cartridges and Winchester Telescope Sight. All of the first six contestants used Winchester Telescope Sights, and four of them Winchester cartridges.

RING TARGET CONTINUOUS MATCH

G. W. Chesley and H. Hunziker, shooting Winchester cartridges, tied with two other shooters, making five 75s—perfect score. Three of the four contestants in this match used Winchester Telescope Sights.

ZIMMERMAN TROPHY MATCH

Won by G. W. Chesley. Second, H. Hunziker. Third, L. C. Buss. All shooting Winchester cartridges. Mr. Hunziker made a perfect target of 5 degrees in his string, and Mr. Chesley one of 6 degrees.

BULLSEYE MATCH

Won by S. Murphy with a target measuring 7 degrees. Second, J. J. Young with a 7½ degree target. Third, C. Zettler with an 8 degree target. Fourth, G. W. Chesley with an 8 degree target.
All four place winners used Winchester cartridges.

FOR RELIABILITY AND RESULTS USE THE **W** BRAND

PARAMOUNT PARKER GUNS

Look...

Mr. Woolfolk Henderson, an amateur, by scoring .9753% made the **HIGHEST OFFICIAL GENERAL AVERAGE FOR 1915**

Read...

Mr. Lester German, a professional, by scoring .9742% made **SECOND OFFICIAL GENERAL AVERAGE FOR SAME PERIOD**

CLEAN SWEEP ON DOUBLE TARGETS

Messrs. Guy V. Dering, S. A. Huntley and Woolfolk Henderson won **FIRST, SECOND and THIRD,**
respectively, by scoring 9000%, 8666% and 8400%.

THE WORLD'S RECORD!!!

At Atlantic City Sept. 15 to 17 Mr Lester German broke all Tournament Records by scoring **647 OUT OF 650 TARGETS,** with one run of 372 straight, which is longest for the year.
PARKER GUNS have won the Grand American Handicap 9 times out of 25 offers, once with 100 straight, only time made. Also 7 out of 9 Interstate Championship Events with highest scores ever made, twice with 198 x 200 at 18 yards rise.

Remember

PARKER PACIFIC COAST RECORDS

In California Mr. Henry Pfirrmann won the Pacific Coast Handicap and Mr. J. Foster Couts won the Championship of California.
In Portland, Oregon, Mr. P. H. O'Brien by scoring 241 straight made the record for the Pacific Coast.

If interested in small bore guns write for instructive booklet which will be sent free on request. For further particulars regarding guns from 8 to 28 gauge, address

TRAINING THE HOUND

A PRACTICAL TREATISE ON THE TRAINING OF FOX HOUNDS, BEAGLES, AND COON HOUNDS.

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; $1.50, postpaid.

HERE'S A GOOD CATCH AT SUSANVILLE

Percy A. Chappreis of Susanville, who is pictured on left, writes that the sport is good in nearby streams. Harold L. Atkinson of San Francisco was in the party with Chappreis to pull out the trout.

TROUBADOUR
Two-year-old brother to Esperanza (3) 2:09, C. J. Berry's colt in stakes for age this year.

$3,000.00 GUARANTEED **$3,000.00 GUARANTEED**

THE STANFORD—OCCIDENT FUTURITY NO. 2.

(Foals of mares covered in 1915)

TO TROT AND PACE AT THREE YEARS OLD

$1,800.00 FOR TROTTING FOALS $1,200.00 FOR PACING FOALS

To be Given Under the Direction of the

California State Agricultural Society, 1919

Entries to Close May 15, 1916

Money Divided as Follows:

TROTTING DIVISION	PACING DIVISION
$500.00 to 1st heat..	$350.00 to 1st heat.
$500.00 to 2d heat.	$350.00 to 2d heat.
$500.00 to 3d heat.	$350.00 to 3d heat.
$300.00 to horse standing highest in Summary.	$150.00 to horse standing highest in Summary.

ENTRANCE AND PAYMENTS—$2.00 to nominate mare on May 15, 1916, when name, color, description of mare and stallion bred to must be given; $3.00 July 1, 1916; $5.00 December 1, 1916; $5.00 on yearlings April 1, 1917; $10.00 on two-year-olds April 1, 1918; $10.00 on three-year-olds April 1, 1919.

STARTING PAYMENTS—$25.00 to start in pacing division; $55.00 to start in trotting division. All starting payments to be made ten days before the first day of the State Fair at which the race is to take place.

NOMINATORS must designate when making payments to start whether the horse is a Trotter or Pacer.

CONDITIONS

The race in each division will be for three heats; if no horse wins two of the three heats a fourth heat must be raced by the heat winners to decide the winner of the race; all other horses to go to the barn.

Trotting division heat purses $500.00. Total purse $1,800.00.

Pacing division heat purses $350.00. Total purse $1,200.00.

Heat purses divided 50, 25, 15 and 10 per cent; the extra $150.00 in pacing and $300.00 in trotting division goes to the horse standing highest in the summary; distance 100 yards. A distanced horse shall be entitled to money already won.

If a mare proves barren or slips or has a dead foal or twins, or if either the mare or the foal dies before December 1, 1916, her Nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there will be no return of a payment nor will any entry be liable for more than the amount paid in or contracted for. In entries, the name, color and pedigree of mare must be given; also the name of the horse to which she was bred in 1915.

Entries must be accompanied by the entrance fee. Nominators are liable for amounts paid in only. Failure to make any payment forfeits all previous payments. This Association is liable for $3,000.00, the amount of the guarantee only.

Hobbles will be barred in trotting and pacing divisions.

Rights reserved to declare off or re-open these stakes in case the number of entries received is not satisfactory to the Board of Directors. There will be no more moneys in each division or heat than there are starters. No horse shall receive more than one money in each heat.

Entries open to the world.

Other than exceptions made in this entry blank, rules of National Trotting Association to govern.

JOHN M. PERRY, President. CHAS. W. PAINE, Secretary, Sacramento.

MR BROODMARE OWNER, do you realize the importance of the simple facts that sixty of McKinney's sons and nearly fifty of his daughters are producers of standard performers? That the McKinneys won more money than any other family in 1915? That the McKinneys won the largest percentage of the futurities, both east and west, in 1915? That McKinney has more sons to sire 2:10 performers than any other stallion living? Keep these facts in mind, and remember that I offer you the services of

THE VERY BEST SON OF McKINNEY

CARLOKIN 2:07 1-2 EXHIBITION MILE 2:05 1-4

Champion Trotter and Champion Sire of Trotters in the West

Reg. No. 36548. Licensed Pure Bred, Cert. No. 41.

Mahogany bay. Height 15.1½. Weight 1060.

Sire of ESPERANZA (3) 2:09, only three-year-old to win every trotting stake for that age on the Pacific coast, and also the following colt performers:

The Lark (4)	2:09½	Carsto (2)	2:22½
Ethel D. (3)	2:11	Helen Belle (2)	2:22½
Carl (3)	2:14¼	Carlschen (2)	2:23
Doctor S.	2:14½	Santiago (3)	2:24¼
Johnny Dugan p (3)	2:16	May Marian p (3)	2:24¼
Hermes (2)	2:16½	Carlrich p (2)	2:24½
John Warwick (2)	2:17	El Carbine (2)	2:27½
Nicola B. (3)	2:18½	Eileen C. (3)	2:29
Miss Carlokin p	2:20	Carlos (2)	2:29¾
Carleta (2)	2:20¾	Fulton G. (2)	2:30

Carlokin is the best son of McKinney not only by performance but by breeding as well, his dam being the famous producer Carlotta Wilkes, whose ten performers include four with records below 2:10, while his grandam and great grandam were also producers, by Alcantara and Clark Chief. He has demonstrated that he sires more early and extreme speed than any other stallion in California, and his get are courageous race horses, endowed with soundness and wonderful vitality.

Fee: $75 the season, usual privileges; details on request.

Colts and Fillies by WILBUR LOU Always on Sale

Wilbur Lou is by the great race horse and sire Kinney Lou 2:07¾, out of the triple producer Louise Carter (3) 2:24, grandam the famous Ingar, dam of 6 including John A. McKerron 2:04½, etc.

Breed to him for "Horses that will race." Fee for 1916, seventy-five dollars with usual privilege or money refunded at our option. Write for detailed particulars, all information gladly furnished.—Licensed Pure Bred, Cert. 23.

HEMET, CAL.

Don't Make a Mistake by not Breeding to the Great

KING LILLY POINTER

Registered No. 5223.

By the great Star Pointer 1:59¼, 3183, dam Lilly S. by Direct 2:05¼, 20113,—two world's champions for many years.

Second dam the great race and broodmare Lilly Stanley.

King Lilly Pointer is a green horse with remarkable speed. With very little work he has paced a mile on the Los Angeles track in 2:08¼ with ease. He goes without straps and has paced a half in 1:01¼ in third position all the way around, and has easily stepped quarters in 29 seconds. In another work out he went to the quarter in 30½ seconds, the second eighth in 14 seconds, finishing the last quarter in 30 seconds, going the seventh eighth in 14 seconds,—a 1:52 gait.

He is a seal brown in color, 15.2½ hands high, weighs 1100, and his get prove that he will be a sire of high-class race horses.

Fee $35 cash with return privilege, or right of substituting another mare. Best of care taken of mares, but no responsibility assumed for accidents of any kind.

Address for particulars, tabulated pedigree showing that he is the greatest bred pacing stallion in the United States,

W. H. NESMITH, 4218 S. Figueroa St., Los Angeles, Cal.

King Lilly Pointer can be seen at Los Angeles Exposition Park. Phone Home 28446.

Expressive Mac 2:25½

A. T. R. No. 41513. Licensed Pure Bred, Cert. No. 1041.

SIRE OF

Clara Mac 2:04½; Vera Hal 2:05; Madam Mac 2:07¼

Only stallion offered for service in California to sire two in 2:05, three in 2:10.

Also sire of Eddy Mac (3) 2:29½, trial 2:13; Nellie Mac trial 2:09½ trotting, 1915, and others with fast trials

Son of McKINNEY 2:11¼ (sire of 27 in 2:10) and the greatest living broodmare, EXPRESSIVE (3) 2:12½ (dam of 6 trotters, 2 in 2:10) by ELECTIONEER 125. Ideal in color, size and conformation—seal brown, height 16½ hands, weight 1275 pounds. Permanently in the stud at my ranch three miles south of Selma at $25 the season, usual return privilege, or $35 to insure. Good pasture at $2 per month and best of care given mares but no responsibility assumed for accidents or escapes. Address for all particulars,

The Registered Horse Breeders' Association of which Mr. Ed R. Smith is secretary has concluded to abandon its idea of placing an initiatory measure before the voters of California at the November election, as will be seen from a letter from Mr. Smith which appears in another column. We think the association is wise in this action, as should such a measure be voted on and defeated this year it would doubtless be very many years before any relief whatever could be obtained from the drastic law against betting which is now on the statutes. It will be very difficult to draft a law which will permit wagering on races and other events that will not be taken advantage of by the professional gamblers and others who wish to conduct race meetings solely for their individual profit. An effort is now being made to have the California legislature next winter pass a law similar to the Kentucky law, and if it can be so safeguarded as to prevent meetings of more than 30 days per year in any one section of the State it will have the hearty support of horsemen generally. If however a provision permitting 30 days in each county should result in tracks in San Francisco, San Mateo, Marin, Contra Costa, and Alameda being granted a month each, it would be very difficult to prevent five or six months of continuous running racing around the San Francisco bay, which would doubtless lead to all the evils which the old order of things brought about and which led to the total prohibition of all wagering on races within this State. The breeding of thoroughbreds and trotting horses in California was fostered and brought to its highest development under the plan in which a circuit of race meetings was provided by a circuit of fairs and meetings of not over two weeks' duration that were held summer and fall in San Francisco by the Pacific Coast Blood Horse and Pacific Coast Trotting Horse Breeders' Associations. Racing under the same conditions and which will greatly encourage and promote the breeding of horses is all that is desired by the horse breeders and those who race horses for the sport's sake. It is to be hoped that a bill modeled after the Kentucky law and safeguarded as suggested will be passed by the next legislature and be approved by the Governor of the State.

A dispatch from New York gives the welcome news that differences among the three organizations in control of harness horse breeding and racing, which have occupied the attention of the eastern and middle west turf press for the past month, have been virtually settled. The arrangement calls for the united publication, distribution and sale of the Year Book. It was agreed that the National and American Associations will entrust the duty of amending rules to a joint committee to consist of six members. It is to be hoped the statements in the dispatch are true, as nothing but evil to the trotting horse breeding and racing industry could result from the bickerings and accusations that were being made by those who had or imagined they had grievances. It is well to remember that charges founded on suspicion are usually hard to prove and that the continual airing of fancied wrongs before the public instead of settling them in private has wrecked many meritorious organizations as well as families. There is seldom an instance in any organization where a presentation of facts regarding an alleged evil will not result in a remedy that will be complete, but there are hundreds of cases where associations have been wrecked solely on suspicions that had no foundation in truth, but were fully believed by those uttering them. Jurors are instructed by the courts to weigh the actual evidence before rendering a verdict and it would be well if all expressed opinions were withheld until they were established by actual facts.

The "continuous stake," which was first evolved by Mr. Harry Devereux of Cleveland, is being tried by the Grand Circuit associations this year and is getting a good entry list so far. The provisions of the stake are such that it has opened up a field for horses that have not been the topnotchers in their classes. For the Detroit Blue Ribbon meeting this stake is called the Pontchartrain, its value is $3,000 and it is for 2:15 class trotters that never have beaten 2:14¼ in a heat in a race or against time and never have won $2,000 during all their races. It received 23 entries, one more than the M. and M. That all these stakes shall not go to the same horse throughout the circuit the conditions provide that when a horse has won $7,000 gross he must step aside and let the others fight it out until some other horse reaches that figure. Thus if the horses do not mix it up among themselves the conditions will do as much for them.

Where there is a regular circuit of meetings this plan should work well, but the great need is for some plan of racing that will provide, at any meeting, for the horses that are not fast enough to meet the topnotchers. Selling races for trotters and pacers have been suggested many times but whenever advertised few entries have been received. The race manager who can get up a race whose conditions will be such as to almost guarantee that the race will not be trotted or paced in faster time than the class named will prove himself a friend of the horsemen. If, for instance, a 2:15 class pace could be opened for a small purse, say $400 or $500, with a reasonable certainty that the horse winning would be driven to his best to win his heats right around 2:15, a big list of entries and a big field of starters would be sure to result. It is a knowledge of the fact that a 2:15 class is usually won in from four to ten seconds faster time that keeps the owners of horses with records they cannot lower from racing them except in matinee events where classification is not difficult as all the horses are known to the classification committees. It seems to be impractical to classify horses in purse races, consequently some plan is necessary that will prevent horses being entered in classes that are much slower than their speed. The editor of this journal would like every horseman in California who has given the subject any thought to send in suggestions for conditions that will bring horses of about the same relative speed together. The prevailing conditions provide liberally for the best and fastest horses on every circuit, and if there is any horseman in California who thinks he can make conditions that will bring horses nearer together at the finish, we should like to hear from him.

◈◈◈

The Grand Rapids Sweepstakes for trotting foals of 1915 has been announced by the Furniture City Driving Club with a guaranteed value of $5,000. The money is to be raced for by the two-year-olds in 1917 and closes on June 1st this year with only $1 required for each entry, after which there are four payments increasing from $5 due Jan. 2, 1917, to $50 due July 17, 1917. Thus $1 will carry the entry through to the opening of the year of its two-year-old form. The conditions of the race are novel:

"If final payment is made on twenty or more colts, the field will be divided so as to make three races and each race will be for one-third of the total amount of the purse. If final payment is made on enough colts to make four races with six starters in each then there will be four races, or as many races with not more than seven starters in each as there are colts to make them. The races to consist of two heats only, half of the purse allotted to a division to be raced for in each heat and divided 50, 25, 15 and 10 per cent. Any starter may be drawn before the second heat, but will retain what money it has already won. No distance flag for the second heat. A heat winner in any division is barred from starting in any other division at the same meeting. No extra charge to money winners."

While the association has put the guarantee value of this stake at $5,000, if more than that sum is paid in it will all go to the stake. The plan provides for at least three races, each purse of which will be worth at least $1,666.66, with an entrance fee of a very little over 5 per cent at the most, and which may be as low as 3 per cent. The idea is to classify the colts according to their speed, and if other associations on the Grand Circuit follow the plan and give sweepstakes for two-year-olds the colts will be classified at each succeeding meeting. The point is to make purses for the 2:25 two-year-old as well as for the 2:10 two-year-old. It deserves a big entry.

INITIATIVE MEASURE ABANDONED.

Breeder and Sportsman—Gentlemen: After much consideration, we have decided not to place our proposed amendment to the California Racing Laws before the people of the state with an initiative measure.

Subsequent to the publication of our letters to you on the subject, and your articles regarding the same, we have been in receipt of a great many communications, some favoring and some opposing our project.

We felt, and still feel, that our scheme of procedure would have been successful, but the majority of those interested in breeding in California seem to disagree with us.

We feel, therefore, that we will be consulting the best interests of everyone interested in the breeding industry of this state if we withdraw our measure for further consideration. We have, therefore, notified the Attorney General and Secretary of State to that effect.

At this time we wish to thank you for your kindness and courtesy in opening up your columns as you did to discussion of the matter, and we wish at the same time, to express our appreciation through your publication to all those who offered their aid both financially and otherwise to us.

We wish also to state that if an act is presented to the Legislature of California in the next session, similar to ours, for adoption, that it will have our hearty support. The fact that some of us may disagree between ourselves as to the correct method of proceeding with a measure of this kind should not in any way be a hindrance to concerted action when one method of procedure is determined upon. Therefore, we think that we, as well as all others interested in breeding in the state of California, should present a united front when the occasion demands it.

Very truly yours,
REGISTERED HORSE BREEDERS' ASS'N,
Per ED. R. SMITH.

SAN FRANCISCO HAY MARKET.

Receipts of hay for the past week have been almost double those of the week previous, dealers in the country doubtless wishing to clean up before the new hay comes in. Considerable alfalfa of the first cutting has reached this market and prices weakened a little, though the continued dry weather will probably prevent any great slump. A considerable proportion of the land planted for grain will be cut for hay if the dry weather continues, which may keep the prices down. Wholesale prices in car load lots are as follows:

Fancy wheat hay, light bales, $17 to $18; No. 1 wheat or wheat and oat $13 to $16.50; No. 2 wheat or wheat and oat $12 to $14.50; choice tame oat $17 to $18; other tame oat $12 to $15; wild oat 12 to $14; alfalfa, first cutting, new $8 to $12; stock hay $6.50 to $8.50; No. 1 barley straw 25c to 40c.

MAY DAY AT SANTA ANA.

A fair crowd witnessed the May Day races at the Santa Ana track. The events were exciting as there were a number of close finishes and the sport was clean and well managed. Results:

Special match race—Zella D. won in straight heats. Buster L. second. Time, 2:20, 2:21.

2:30 Pace—Black Diamond won. Time, 2:34.

2:30 Trot—Sylvia McKinney won. Pelee second. Best time, 2:36.

Orange County Saddle Horses—Lankey, first; Peter Pan, second; Pogy, third.

Half-mile thoroughbred dash—Lankey, first; Dutch, second; Light Comedy, third. Time, :53.

Potato race—Horse owned by John Bergman, first, Ginger, second.

Ted Kline of the Breeders' Journal figures that there is at least $10,000,000 invested in trotting and pacing horses and $40,000,000 invested in tracks, stables and training grounds in the United States. There are 1,000 towns where regular harness meetings are given every year for purses ranging from $200 to $10,000. In 1915 more than ten thousand horses either raced for money or records, and probably five times that number were in training that were not raced. It is a big business when the figures are known.

A FEW NOTES FROM VANCOUVER.

At Minoru track, near Vancouver, E. C. Lewis is training quite a string of trotters and pacers.

The first and most highly regarded is the pacing stallion King Bond 2:10¼, by The Bondsman, first dam Cecilian, second dam by Lord Russell, third dam by Princeps, fourth dam by Hamlet, fifth dam by Bignolia. This is a very handsome and well made stallion with white ankles behind, and is regarded as a fast pacer. He could show three miles in 2:11 or thereabouts on a poor half-mile track last season and is reported to have shown a quarter in 29 seconds on the trot in his three-year-old form. He certainly is a handsome fellow and much is expected of him. His breeding would indicate that considerable can be expected of him.

Walter F. 2:12¼, by Simmons, is the only other record holder in the lot.

The gray gelding called Jimmy Osborne by Jim Kyle, dam a full sister to Annie Gould, that has been a saddle horse and up to a few weeks ago did nothing to show any indication of speed, has, by having 15-oz. put on his front feet and a form of shoeing peculiar to himself, been converted into what looks like a promising pacer.

The two-year-old gray filly by Peter Preston, whose dam has a record of 2:15¼, is a very attractive looking filly that is now getting her preliminary education, as are the two-year-old brown stallion by a son of Sable Wilkes, dam by Rexall, and the bay filly three-year-old by Ed. Fletcher, son of Ed. Custer, dam by Five Points. This is a very handsome filly and a trotter. The three-year-old trotting colt by Quintell 2:12½ out of the record mare already mentioned, stands next to this one and is a well made, attractive colt. A small chestnut horse by King Entertainer 2:10¼, dam Peggy P., is highly regarded. A black roan filly by D. J. McDonald, son of Baronmore, dam by Jim Kyle, and a bay filly by the same sire, dam unknown, complete the string of Mr. Lewis' own horses. He also has the two horses owned by Dixon Bros. formerly mentioned, both of which are showing speed.

The weather has been so backward, however, that little real work has been done.

Mr. Loomis still has five horses. The aged ones are Frank D. Nichol 2:20½, by Cresceus 2:02¼, dam Silpan by Silver Bow, and Prince Malone by Kinney Lou, dam Princess Bessum. The balance consist of a three-year-old trotting stallion by Zobona 2:18, dam Mona, who is particularly good gaited but is so wilful and has so many bad habits to overcome that he will probably make speed slowly; the three-year-old Red Squirrel by Bland S. 2:03½, dam Chipmunk, has grown and is a handsome animal, and the three-year-old bay stallion mentioned recently as belonging to D. K. Campbell, and as to whose breeding I find it difficult to get details. I think he is by Direcho and that his dam was Nealy Stanley by On Stanley. He is a very compact but small colt and up to date has not been given sufficient handling to predict much about his speed qualities.

I am sorry to hear Mr. Neal is leaving you. His virile and pointed style, together with the newsiness of his matter made his contributions very welcome.

Yours truly,

W. C. BROWN.

CALIFORNIA HORSEMEN HAVE THRILLING RIDE.

[From The Siwash Argus, April 24.]

When the east bound train Number 104 on the Union Pacific pulled into Siwash yesterday afternoon two badly scared men dropped off and to the depot reporter of this paper, told a story that had thrills in it—in fact, it sounded like a story for the movies. It seems that these men (they gave their names as Charley DeRyder and Harry Ruthford) were on their way from Pleasanton, Cal., to Indianapolis with a couple of carloads of fair grounds horses. They had bedded the stalls with a lot of straw before leaving and while the train was running at seventy miles an hour, about fifty miles west of Siwash, sparks from the engine set fire to the straw in one end of the car. DeRyder, who is a big husky, stated that he looked for the bell rope but that the motorman was evidently using it for there was none to pull. "And here we were," he said, "in a car filled with smoke and flame—no way to get out unless the train stopped, the engineer trying to hit up seventy-five miles an hour and Siwash, the next stop, fifty miles away. Things looked pretty gloomy. Horses were getting loose, crazed by the smoke, and my partner and I began to think about all the cuss words we had used in our younger days, when a happy thought struck me. How would it do to throw some water on the fire? There was one pail of water and I handed it to Ruthford, who was trying to keep the flames from getting a firm hold on his sweater. Taking the pail of water he threw it onto the flames and luckily for myself, Ruthford, the railroad company, a car full of horses and Frank Kenney, it did the work. But all the water was now gone and we had to go without anything to drink until we got to the pump, here." Quite a crowd gathered around the horse jockeys as they told their blood-curdling tale.

Fifty-nine entries were received by the Monroe, Orange county, New York, association in a purse offered for three-year-old trotters, and fifty-two entries in a purse for two-year-olds.

GETS BIG PRICES FOR GOOD HORSES.

Walter Cox, who hails from New Hampshire and has been one of the leading reinsmen of the Grand Circuit for the last ten years, started racing horses on half-mile tracks, where he won so many races at long odds that he became known as "Long Shot" and the appellation has clung to him ever since.

A clever trainer and a good race driver, Cox also is a good business man. He manages to win a lot of money each season with his big string of horses, but whenever he sees a chance to make a good sale, Cox always casts aside any personal feeling or pride in order that the owner of the horse may make money.

Several times Cox has taken a horse throughout the circuit without getting him out of his class, winning considerable money, and then selling him for a substantial price at the close of the campaign, or before the opening of the next. This was true of the pony pacer George Gano. During the season of 1908 Cox raced Gano, and no matter how fast winners went Gano was second or third. He looked so good for the stakes that he sold him to Tom Murphy for $15,000 and Murphy instead of Cox was the big winner of the pacing events that year.

In 1910 Cox raced Branham Baughman, and while Branham was able to win $7,000 he failed to head a summary. The next year Cox raced him to victories that netted $15,000, the largest amount won by a pacer that season.

After Mabel Trask worked in 2:04 last fall Barton Pardee, who owns the mare, was offered $25,000 for her. Cox pleaded with Mr. Pardee to sell, but the owner said he wanted Mabel to trot for his money. It is believed that Mabel Trask will be one of the contenders in the big events this season and possibly the season's biggest winner; still Cox was willing to forego the chance for glory to make a good sale for the owner.

The tall New England trainer owns the Granite State track at Dover, N. H., which perhaps may become a member of the Grand Circuit some time. Cox trains about sixty horses over this track annually and no doubt some day will be able to sell it for much more than it cost him.

Another example of Cox's preference for sure money rather than any other kind, is shown in the fact that a few years ago he bought some good horses, banded the owners of those equines into a syndicate and agreed to train the stable for $4,000. There was a special arrangement, it is understood, by which Cox was to get $2,000 more, so that he realized $6,000 on those few horses that year.

Margaret Druien proved a good investment for Cox and to Druien, who bred her. Cox won more than $25,000 with Margaret, and then sold her to C. K. G. Billings for $7,500.

Last season Cox had several three-year-olds in his string. He could not race all of them, and when Chauncey M. Sears, Fall River, Mass., offered $5,000 for Mary Putney, Cox advised the owner to take it. Mary developed into the leading futurity candidate of the year, while the colt Cox retained to race got only a fair portion of the money. However, $5,000 was a fair price for Mary at the time she was sold and everyone was satisfied with the deal. This is shown by the fact that Mary Putney is back in Cox's stable this year.

Worthy Prince, the leading stake candidate of the Cox stable last season, won considerable money, but opposed to Peter Scott, Lee Axworthy and other faster trotters he failed to win a heat. He has a good sum of money to his credit now and is eligible to all of the big stakes in which he will be raced this summer. He has a chance of proving one of Cox's more lucrative investments.

Belvasia proved a good investment for Cox and one of his clients. The trotter had won nine races and been undefeated on the eastern half-mile tracks when Cox bought her. She looked so good in the early part of the Grand Circuit campaign the year following that Tom Murphy paid $12,500 for the mare to lessen his competition.

Cox's biggest sale was that of the star trotter Peter Scott. Cox paid $10,000 for Scott, raced him a few times on the Grand Circuit, getting part of the $10,000 M. & M. stake, and then sold him to Tom Murphy for $30,000. The leading driver raced Peter Scott last year in a sensational campaign, winning more than $50,000 with him, but Cox was well satisfied.

The Cox system is to sell whenever you get a good price. Horses may die, may be crippled or may fool the best of judges, is the way the New Hampshire horseman argues.—Guy Rockwell in Cleveland Plaindealer.

It has been stated that the estate of Mr. L. V. Harkness, who died in California last January, has been appraised at over $100,000,000. This fact was indicated when a list of Harkness' stock-holdings was filed in the surrogate's court in New York, on an application to determine whether or not Harkness was a resident of New York at the time of his death, and therefore subject to a tax there on his extensive holdings in Standard Oil and other immense blocks of stocks. His estate claims that he was a resident of Lexington, Kentucky. Although the owner of Walnut Hall Stock Farm was past 75 years old when he died and had been in poor health, he left no will and the bulk of his property will go to his son Harry Harkness, and his daughters, Mrs. Lile H. Edwards of Pittsburg and Mrs. Myrtle Macomber of Paicines Rancho near Hollister, Cal.

TROTTING IN AUSTRALIA.

There are several items that will interest American horsemen in the annual report of President Brennan of the West Australia Trotting Association which appears in the last number of the West Australia Sportsman. Among other things President Brennan states that "the breeding of the trotting horse has been given much attention, and the liberal stakes offered has attracted to this State some of the finest stallions and mares obtainable. To encourage the breeding of the class of horse that will be of the greatest advantage to the country—commercially and otherwise—events have been included in programs which are exclusively for W. A. bred horses. In the near years when dozens of the speedy mares and stallions that now grace our tracks have been relegated to the stud there will come to the forefront that class of horse which we have been looking for, and they will come in large numbers—in such numbers, in fact, that Western Australia will be classed among the leading States in which the most desirable type of horse is produced.

"The resort to night-racing, with its peculiar advantages, has been greatly responsible for the progress that has been made. It has enabled us to give big stakes, and has given the people their sport at a minimum of cost with a maximum of pleasure. To retain it we have had to put up a strenuous fight since the last annual meeting, for an attempt was made to introduce legislation with the object of stemming our progress. By putting up a vigorous campaign and honestly placing the true position before the representatives of the people we were able to win a severe fight and to demonstrate that trotting is deserving of greater consideration at the hands of the people than any other form of horse-racing.

"We have not been unmindful of the necessity for the encouragement of the country clubs. The untoward position which the devastating war in which our Empire is engaged has demanded of our country patrons a neglect of sport for the time being, but clubs in York and Northam have been kept in existence, and the members of those bodies have the assurance that when the time is ripe they will be given the fullest support by the Association. During the year—the period covered by the balance sheet—there have been distributed over £18,000 in stakes. There were meetings on 61 occasions. The number of horses registered in the time was 183, bringing the total number of registered horses on the Association's books up to 669. In donations and profits from race meetings specially held, the sum of £876 was distributed to charities and benefits. The amount invested in the totalisators during the period was £135,000, and in totalisator tax we paid £3,465, while in totalisator license fees we paid £69. The taxes paid on stakes amounted to £294. There are registered with the Association 267 reinsmen and 27 trainers. In regard to the efforts put forward on behalf of charities I may mention that it is the intention of the executive to put forward even greater efforts in this direction during the coming year.

"It is a remarkable fact that, despite the demands that the Empire's great struggle is making upon our people and the resources of the country generally, the patronage given our sport continues to increase. We have done all as an organization to assist in the national movements that have been made both in the contribution of moneys to patriotic funds and in the formation of a rifle club. Added to that, all the employees of the association make weekly contributions towards a special fund for the assistance of maimed returned soldiers. There is always in front of us the question as to whether the continuance of our sport is in any way harmful to the interest of our country's war needs. So far we have not found it so. Should it ever be shown that the conduct of trotting or any other form of sport or amusement is calculated in any way to hamper or weaken enlistment or to prevent men from entering in the country's defense, I feel that I can speak for all members when I say that steps will be immediately taken to place trotting in position secondary to that of the demands of the Empire."

No horse has yet won the Newmarket Handicap and Australian Cup in the same year, says the Australian Sportsman, but Lochiel and Carbine, second and third respectively to Sedition in 1889, were first and second in the Australian Cup that season. Lochiel carried 119 pounds to Carbine's 118 pounds in the last-mentioned race, and beat him three parts of a length. Coil, third to Carlton and Wait-a-Bit in 1897, won the cup the following Tuesday, with Wait-a-Bit in third place; while Lord Ullin's Daughter, second to her stable-companion, Playaway, in the 1905 Newmarket Handicap, pulled off the cup at the same meeting.

◈◈◈

"Sam," a horse of Morgan stock, is still lively and in service at Portland, Maine, at the ripe age of 43 years. He is neither lame, blind nor toothless, but carries as much flesh and moves with as much agility as horses one-half his age.

◈◈◈

Jas. A. Houchin, president of the Missouri Saddle Horse Breeders' Association, will judge the saddle classes at the Oregon State Fair to be held at Salem from Sept. 26th to 29th this year.

◈◈◈

Charles Dean, Jr., of Palatine, Ill., son of the well known trainer Charles Dean, was recently married to Miss Myrtle Bicknaise, of Lake Zurich, Ill.

HOW MR. FORBES BOUGHT PETER THE GREAT.

C. C. Streeter, the one time owner of Peter the Great, told the following story back in 1899, of the sale of the son of Pilot Medium to J. Malcolm Forbes:

"I did not see Peter the Great win the Futurity, as I was doing some railroad work in Ohio, and could not get away. Along the following winter I got a letter from a man named Hall, living near Boston, who asked if the colt was for sale, and if so, what my price was. I answered that before the matter went any further I should like to know whether Mr. Hall was acting as principal, or was a broker, and if the latter was the case, whether he expected me to pay him a commission if the horse was sold. I added that I had no thought of selling, as up to that time nobody had talked serious business, although one man had made an offer at $10,000, which I did not consider. In conclusion, I said that the horse was for sale, but that the price would be a round one.

"In answer to this a letter came from Mr. J. Malcolm Forbes, and I then learned that Mr. Hall was superintendent of the Forbes farm. Mr. Forbes asked a price on the colt, and I replied that I would take $25,000, 10 services to the horse, and I also wanted some sort of an interest in the horse's winnings the following season in the 2:13 class, but just what that part of the proposition was I do not now recall. Mr. Forbes wrote me that he would give $20,000 and 10 services to the horse. This letter was sent to Kalamazoo, and in the meantime I had gone to New York; it did not reach me until some days later than it should, having been forwarded.

"I at once wrote Mr. Forbes that his offer was a generous one, but that I did not want to either accept or reject it just then, but would decide on my return to Michigan if he would keep it open until then. In the meantime Mr. Forbes had evidently become impatient at the delay, of course not knowing why his letter was delayed, and wired me at Kalamazoo that unless his offer was accepted by three o'clock that afternoon, it would be withdrawn. The telegram, like the letter, followed me to New York, and when it came to hand it was long after three o'clock. However, I wired Mr. Forbes, explaining the case, and saying that I was starting for home, and that if he chose to leave the offer open I would decide as soon as I got there.

"Then I left for Kalamazoo, and on reaching there went at once to the barn. The horse was running out in a little yard, and, as the day was cold, there was a good deal of ice on the ground. When I thought how easily that $20,000 colt could slip and hurt himself it gave me a little shock, and I said to Johnston that we would put Peter in the barn and not take him out until we knew whether or no he was sold. Mr. Forbes answered my telegram, saying he would take the horse.

"In my New York letter I had asked him how, in case of a sale, he wanted the horse delivered, also in what manner he desired to pay for him. In a letter that came to Kalamazoo confirming the purchase Mr. Forbes said to ship the horse to Boston and draw on him at sight with bill of lading attached. How was that for businesslike methods? Mr. Forbes added that he expected nothing with the horse but a halter and blanket, but that if anything else was needed I should get them and send the bill to him."

ARABIAN HORSES WITH THE ARMY IN MEXICO.

Among the stories that have come back from our "punitive expedition" into Mexico, is one revealing the fact that some of the officers are riding Arab mounts. Major Tompkins had his Arab mare, Imp. Mahal, badly wounded in the fighting at Parral, and later changed to Kingfisher, a four-year-old by the Arab, Imp. Imamzabad and out of Halcyon, the mare that won the Vermont endurance ride of 154 miles, a few years ago. The part which Major Tompkins has taken in various horse shows in the United States adds interest to the news.

Other Arabs mentioned among officers' mounts are the colt by Imp. Imamzabad ridden by Lieut. Byram of the Tenth Cavalry; Imp. Halim, ridden by Major Harbord of the First Cavalry; Scimeter, ridden by Captain Vidmer of the Eighth Cavalry.

Most of the horses named, as well as others, were presented to the army, or the officers by Col. Borden, a breeder of Arabs at Fall River, Mass. Col. Borden sought a demonstration of the fitness of Arabian horses for army use.

Current prices for draft horses in the Middle West indicate that breeders there expect to reap a harvest in the next few years. A recent public sale at Fremont, Iowa, attracted a crowd of 3,500 horsemen, who paid from $400 to $1,325 for Percheron mares, thirty-eight making an average of $640. All were bought for breeding purposes.

◈ ◈ ◈

A party of six residents of Monterey county, comprising Mrs. Elton Hebbron, Misses A. Hawkins, H. Hawkins, Hazel Robinson, Arnia Elmer and Frank Hebbron left Salinas last Saturday morning at 6:30 and rode to the top of Fremont Peak by 11 a. m. They had a most wonderful trip through the green slopes of the Gabilan mountains, getting the trail in the canyon back of the Hartnell adobe on the Bardin ranch. At some places the trail was very narrow and precipitous but they reached the spot where Fremont hoisted the American flag for the first time in California, without accident.

LAST WEEK'S CHICAGO MARKET.

For everything of top grade the demand has been active and not enough of that variety came to hand to satisfy the calls of the buyers. For strong, rugged, deep-flanked chunks for city work, also, the outlet has been wide, while for near-good horses with considerable weight and approximate soundness the buyers have considerable use. It is on the medium grades of the rejects that the stick has been wielded most strenuously, that kind having been hard hit by the buyers.

The difference between the market of this and other years prior to 1912 is that the demand today is radically different, which balls the situation up and places on the market an undue proportion of horses bought for the artillery job, which after rejection are at the mercy of the dealers. Such a proportion of similar horses, weighing mostly less than 1300 lbs., would in any former year have lowered the quotations on that weight materially—probably to their present range. As it is, prices on all but the best specimens in all the market classes have worked back to about the old level.

Chunks weighing from 1300 to 1400 lbs. and of common grade, $165@185; best 1300-lb. weights to $200; medium weight chunks with extra flesh and quality, $190@215; heavy chunks, same class, $200@235. Big horses have sold at a wider range than could be quoted at the time of this writing, some stated to weigh 1600 lbs. having made but $190, others from $195@210, but they were thin and not at all in market shape, though right out of the harness. Horses weighing 1600 lbs. or more, in decent flesh and ready to go to work in the city and look decent while at it have brought from $250@275, heavier and better grades all the way from $285@325, an occasional show specimen still higher. One bunch, all heavy, was put together at an average right at $290, but they were the best of the week. Eastern dealers taking stock to be retailed to farmers have been paying mostly from $75@95 for light grades, and from $100@125 for mediums, very decent selections among the rejects from $130@140 and tops, mostly mares, around $150, but only a few above $125. Farm mares, wanted with weight and quality, had to be selected from the commercial classes and have cost from $175@200, according to the ideas of the buyer. A few with extra weight have cost as high as $240.

ARMY VETERINARY HOSPITALS.

When one considers that in each infantry divsion of 21,000 men there are 6,250 horses, some idea can be reached of the importance of the veterinary and farriery service in modern warfare. A recent statement from Ottawa shows that there are approximately 15,000 horses with the Canadian army corps now in France. The horses of a division are taken care of by 12 veterinary officers and a mobile veterinary section of 27 men. The latter takes care of the horses on the firing line. Slightly wounded or indisposed horses are cared for and returned to duty. If the troops are on the move wounded horses are collected and sent in groups back to the nearest veterinary base hospital. When fit for duty they are classed "remounts" and are reissued by the remount detachment.

One Canadian veterinary field hospital in France is composed of 387 men and six officers. It can handle a hundred wounded animals, and the work done there is wonderful. Horses which in previous wars would have been killed to save them agony are taken in, treated and returned to the firing line. After one engagement 607 cases were received by this field hospital, and only 12 horses died of that large number. The balance were made fit for duty and drafted back to service by the remount detachment.

To do this veterinary Red Cross work is exceedingly dangerous. The veterinary corps must work in the open, often under fire. They are all expert horsemen. Pain maddened horses must be rounded up and attended to. During a battle the corps are hard at work behind the lines treating superficial wounds and despatching serious cases to the field hospital. Any horse that is fit to walk is rushed to the latter, and fresh horses must always be ready in reserve. So thorough was the system of horse reserves at the battle of Ypres that battery and transport animals were steadily reinforced, under heavy shell fire. The Canadian guns were only 300 yards from the enemy, but there was not a wagon or gun lost—largely due to the efficiency of the horse supply.

Fred Merry of this city owned an old family driving horse which had been the faithful servitor of the household for many years. Finally it was concluded not to keep the steed any longer and accordingly it was taken out to an auction sale in the country the other day and sold. The buyer was a man who lived more than twenty miles from Fairmont over the line in Iowa. Two or three days later Mr. Merry went out to the stable in the morning and there was the old horse comfortably munching fodder in the stall. It seems the animal got homesick, broke away from the premises of its new owner and by instinct found its way back home. We imagine it was pretty hard for the Merrys to send the horse back to its new owner after such an exhibition of devotion.—Fairmont (Minn.) Sentinel.

Later Date for New York Horse Show.

There is said to be a strong probability that the National Horse Show of 1916 will be held at a later date than last year or any other year since the first exhibition took place in 1883, says the New York Herald. Nearly always heretofore the dates chosen were early in November, and last year the opening was on the sixth of that month. The Horse Show of 1915 came right in the middle of the autumn hunting season, and the result was a rather light entry list in this division of the big show at Madison Square Garden. Fox hunting and drag hunting have grown from an acorn to an oak in the thirty-three years since the Horse Show was established, and with all conditions favorable the jumping competitions should now attract more horses than any other classes on the week's program. But the men and women who ride to hounds are reluctant to give up their horses and their sport for a week or ten days in the height of the season in order to exhibit at the Garden. Alfred B. Maclay, chairman of the Executive Committee of the National Horse Show Association, and himself a hunting man, foresaw the result of the early dates last year and favored a later show, but the directors wished to avoid a clash with the opening of the Metropolitan opera season and so decided on the week of November 6. This year, if Mr. Maclay has his way, the exhibition may not take place until the end of November, or even the beginning of December, when the opera, election, football and hunting are all ended or on the wane.

§ § §

Few Good Riders in the East.

"Seldom," writes a New York turf scribe, "has racing been so seriously handicapped by bad riders as is the case this season, and there does not appear to be much chance for a bettering of conditions. Several of the jockeys who have been riding long enough to know how have gone back until they have no form at all, while a majority of the apprentices that have been shown are not fit to gallop horses, much less ride races.

" The system seems to be all wrong now that all a trainer needs is two endorsers to obtain a license. With so many incompetent trainers it is natural there should be a bad crop of jockeys, and if this end of the sport is going to improve The Jockey Club will have to establish some sort of a civil service examination before issuing licenses to train. A man who is not capable of training a horse cannot be expected to teach a boy how to ride him, and the trainer is the natural instructor of the jockeys."

§ § §

A thoroughbred aristocrat, born in the purple, arrived on Wednesday, April 19th, at East View Farm, the property of James Butler, when Climber dropped her first foal, a remarkably strong and well built bay colt by Imported Out of Reach. Climber was one of the star two-year-olds of the James Butler racing stable in 1914, winning five stake races and a total of about $7,000. Her sire is imported Voter, a stake winner of twenty races and $27,435. Her dam is Stepping Stone, now in the stud of W. K. Vanderbilt, sired by Ben Brush, a stake winner at 2, 3 and 4 years of $67,697. Stepping Stone is out of Running Stream (dam of Pebbles, two-year-old winner of $14,550; Ultimus, Runnymede, Cataract, etc.), by Domino, winner of $193,550, the largest money winner in America.

§ § §

Fine roads are one of the important features of preparedness. The highway system around Paris is very fine, and it is claimed that the skillful use of these roads enabled the French army to save the city from the advance of the German troops. The commander, General Joffre, commandeered every sort of auto vehicle available, and poured the soldiers and equipment out to strategic points with wonderful facility and without delay.

Two hundred and seventy entries of thoroughbred horses, owned by upward of two score prominent Americans, have been received for the annual Spring two-day race meeting of the United Hunts Racing Association to be held at Belmont Park Terminal on May 13 and 17. This is by a wide margin the largest number of entries ever received for an amateur race meet in this country, and has been rarely exceeded in the history of American thoroughbred racing.

◈ ◈ ◈

Blades & Holman, of Holliday, Mo., has recently purchased the saddle gelding Vernon Castle by Rex Chief A., paying $2,000. While this is a large price for a gelding Vernon Castle is said to be a very handsome horse, exquisitely modeled and a horse that it will be hard to beat in any show ring. He will be exhibited at the principal middle west shows this season.

◈ ◈ ◈

The stewards of the Jockey Club in England have issued an edict that no jockeys or trainers will be issued a license this year unless they have "presented themselves for attestation," or in other words, enrolled their names with the volunteers who are ready to join the army when called upon.

◈ ◈ ◈

Wembly Sensation, a famous hackney stallion owned by Reginald C. Vanderbilt, is dead from an accident at Mr. Vanderbilt's Sandy Point Farm stables. Wembly Sensation was many times a blue ribbon winner and one of the foremost stallions of his breed in America.

Notes and News

All roads lead to Dixon today.

◈◈◈

Some fast half miles will be paced and trotted there.

◈◈◈

The San Francisco matinee season will open at the Park Stadium track Sunday, May 14th.

◈◈◈

Mr. I. L. Borden has a two-year-old by Albaloma at the San Jose track that is showing up mighty well.

◈◈◈

Five early closing $1,000 purses at Ithaca, New York, have received an average of 25 entries each.

◈◈◈

The number of trotters and pacers to take new records during the season of 1915 was 2,080, of which 1,078 were trotters.

◈◈◈

J. Janson Jr. of Pleasanton carries a full line of everything for the harness horse. Horse boots made to order is a specialty and will give satisfaction.

◈◈◈

If Bold Harry Aerolite gets away good on that Dixon half mile he will make the home folks think he has his daddy's speed rigging on.

◈◈◈

Will DeRyder has shipped his horses to San Jose and will train them over that track until ready to ship east.

◈◈◈

The Poughkeepsie grand circuit meeting has received an average of a little over 23 entries for each of its seven early closing events. The 2:00 pace has ten entries.

◈◈◈

Berta Mac 2:08, the McKinney mare that Henry Helman raced and marked, dropped a brown colt by The Harvester 2:01 at Mr. Billings' Curles Neck Farm, April 16th.

◈◈◈

California has produced six trotters to beat 2:05. They are Lou Dillon 1:58½, Sweet Marie 2:02, Sonoma Girl 2:04¼, John A. McKerron 2:04½, Maymack 2:04½ and Azote 2:04¾.

◈◈◈

Secretary Bain did a nervy thing when he offered a purse for the 2:00 pace at Poughkeepsie, but when the stake closed with ten entries it was found he knew what he was about and his nerve was rewarded.

◈◈◈

Bernice R. 2:07¼, the Dexter Prince mare, raced to her record by Keefer & Spencer, and sold by them to Mr. C. K. G. Billings for use as a broodmare, foaled a bay filly by The Harvester 2:01 on the 4th of March.

◈◈◈

The San Jose round-up and celebration to be held during the first four days of July offers $100 for the "wildest, wooliest outlaw" horse that can be found, and when procured an additional prize will be offered to anyone who can ride him.

◈◈◈

Drop David West a line at 1018 Fillmore street, San Francisco, if you want anything for your trotter or pacer. He has a fine line of coolers, also hobbles that won't break. Quality of the best and prices that are right, is his motto.

◈◈◈

It is said that the inspectorate of the imperial royal horse breeding establishment in Vienna, Austria, has announced that fifteen thousand broodmares will be bought in this country just as soon as they can be transported.

◈◈◈

The Napa County Fair will be held Sept. 13-16 under auspices of the Farm Bureau and Livestock Association. Admission will be free. As there is no track, racing will not be provided for, but a good exhibit of horses of all breeds will be staged.

◈◈◈

Geo. Y. Bollinger's pacer by Nearest McKinney out of a daughter of the dam of Vic Schiller 2:11¼, Our Boy 2:12¼, etc., is working very fast at the San Jose track for Jack Villar. He worked in 2:09 last year with a half in 1:02 and his been an eighth in 14 seconds.

◈◈◈

David Shaw, who made a fortune in steel at Pittsburg and took to driving horses for his health, and among whose first trotters was the mare Lillian R. 2:04¼, will have a strong stable out this year. Among them will be the six-year-old stallion Peter Mc 2:03½, son of Peter the Great. Despite the fact that Capt. Shaw is near 80 years of age he drove Peter Mc several great miles last season, establishing records with him to wagon as well as to sulky. At Lexington Mr. Shaw started Peter Mc in an effort to beat the 2:04½ mark of Lillian R.'s and in performing that stunt the young trotter breezed the mile in 2:03½. Peter Mc has been wanted so badly by horse lovers since then that Mr. Shaw has refused one offer of $50,000 and a later one of $60,000 for the handsome speed marvel. Peter Mc is entered in about all of the stakes to which he is eligible on the Grand Circuit and is rated as the class of the entrants.

In the annual parade of the New York Road Drivers' Association held last week nearly two hundred horses were in line, all hitched to appropriate vehicles. The turnout was one of the largest in recent years, as was also the crowd which lined up on the speedway. At the close of the parade a horse show was held at which ribbons were awarded.

◈◈◈

Horsemen will regret to learn of the death of Charles Marley of Woodland, which occurred two weeks ago. Mr. Marley was an enthusiastic though not extensive breeder of horses and an active member of the Woodland Driving Club. He had been in ill health for over a year and spent several weeks last year in a San Francisco hospital.

◈◈◈

The total number of mares that have trotted to records of 2:10 or better is 309, and of these only 11 have produced 2:10 performers, but as a very large number of these mares are young and their life as matrons just beginning, the percentage of 2:10 mares producing 2:10 performers will greatly increase as the years go on.

◈◈◈

Of the eight horses that have paced to records inside the two-minute mark, six are stallions and two geldings. No mare has yet crossed the 2:00 mark. The stallions are Dan Patch 1:55¼, Directum I. 1:56¾, Minor Heir 1:58½, William 1:58½, Audubon Boy 1:59¼ and Star Pointer 1:59¼. The geldings are Frank Bogash Jr. 1:59¾ and Prince Alert 1:59½. The fastest pacing mare is Dariel 2:00¼.

◈◈◈

Still healthy and vigorous at the advanced age of 29 years, McKinney 2:11¼, owned by Empire City Farms, Cuba, New York, has 196 standard performers, 16 trotters with records of 2:10 or better, 61 producing sons and 43 producing daughters. Although all the horses of Empire Farms are to be dispersed by auction Mr. Simpson will keep McKinney in comfort for the rest of the stallion's days.

◈◈◈

A very handsome two-year-old is the one pictured on our title page this week. He is the property of C. J. Berry and is in the W. G. Durfee stables at Los Angeles. Troubadour is his name and like all the get of Durfee's great speed getter Carlokin, looks and acts very much like a race horse. As his dam is My Irene S. by Petigru, he is a full brother to that wonderfully fast mare Esperanza (3) 2:09.

◈◈◈

William 1:58½, the champion race pacer that has been wintered at the Curles Neck, Va., farm of his owner, C. K. G. Billings, is at the Cleveland track to be prepared for his trials against the present best mark by a pacer "in the open," the 1:56¾ of Directum I. Charles Tanner, who fitted and drove the trotter Uhlan to the best record by a horse of that gait, 1:58, will get William ready for his task.

◈◈◈

Gate receipts furnish convincing proof, year after year, that the public finds more pleasure in witnessing harness races on half-mile than on mile tracks. Perhaps it is because the "twice around" gives it more for its money, and then again it may be for the same reason that there is more close companionship and good feeling where horses and people are not spread out over so much territory. At any rate, the half-mile tracks draw the crowds.

◈◈◈

There are at least 75 trainers now at work with trotters and pacers at the different California tracks which they expect to start at the Breeders' Santa Rosa meeting, the State Fair and any other meetings where purses are offered this year. Associations that contemplate giving meetings should announce their programs as early as possible and send them in to the Breeder and Sportsman so that horsemen will be notified.

◈◈◈

Walter Chinn, of Manteca, sends us a snapshot of four mares of McKinney stock hitched to a gang plow which is turning over the soil on his farm and they seem to be doing the work and thriving on it. Mr. Chinn says each member of the team is a good worker and can trot in three minutes or better on the road. We regret the picture is not clear enough for reproduction, as it is good evidence of the utility of the trotting bred horse.

◈◈◈

Before leaving Seattle last week for the Indianapolis sale, that enterprising and always alive horse lover Mr. C. A. Harrison dropped us a line to say that a fair ground and race track is being built at Burlington, Skagit county, Washington, which is a point between Seattle and Vancouver on the Great Northern railroad and a thriving town in a first-class farming district. Bellingham, Wash., is also building a half-mile track for this season's use.

◈◈◈

Harry Doty worked W. Detels' mare Petrina by Nutwood Wilkes a nice mile in 2:16¼ at Pleasanton last week. Four started in the workout, Harry Bell with Grattan Boy, and Doty with Petrina, having the trotting portion of the field, while Al McDonald with his Bondsman colt and Henry Smith with Mr. A. W. Longley's Pedlar Direct, teaming the pacing division of the quartet. The four went away with the agreement to work a mile around 2:15 and they hit the mark closely. Doty says Petrina's mile was in 2:16¼ and there were two in front of him at the finish. Petrina is now eleven years old and looks as if she would do to race, as she has no mark and is sound and all right every way.

Jess Willard, champion pugilist, has purchased the famous stock farm at Dubuque, Iowa, formerly the home of Nutwood. This farm with its magnificent residence and fine stables and over 100 acres of land was formerly one of the show places of that section when trotters were bred there. It was sold to Willard by the Stout Estate for $50,000, about one-fourth the price offered for it some years ago.

◈◈◈

Mr. C. A. Durfee expects to leave for Los Angeles today to look over the horses which his son, W. G., desires him to race in California this year. There are colts entered in the two and three-year-old events of the Pacific Breeders and California State Fair futurities, and one or two aged horses which may be entered at Santa Rosa and elsewhere. C. A. says he will look them all over before he decides to race them, but it is a pretty good bet that he will be seen behind some money winners on the California circuit this year.

◈◈◈

A very encouraging sign is an advertisement which appears in this week's Breeder and Sportsman. A buyer wants to purchase four yearlings. He wants one each sired by Vernon McKinney, Wilbur Lou, or Prince Ansel, and a fourth by some other good stallion. Yearlings entered in futurity stakes preferred. As these yearlings are to be trained and raced, the better bred they are the better it will suit the gentleman who is looking for them. Those having yearlings for sale should make prompt reply to this advertisement.

◈◈◈

A new plan for a claiming race is to be tried at one of the Maryland tracks. The purse is to be $600, of which $100 goes to second horse and $50 to third. All starters in the race, including the winner, may be claimed by the owners of horses running in the race, or their authorized agents, for $700 and the winner's share of the purse. There is no auction as in a selling race, and should an owner claim the winner the horse would change ownership at $1600, while any other horse claimed from the race would be sold at $1150.

◈◈◈

Secretary Paine of the California State Agricultural Society writes the Breeder and Sportsman that the racing program for the 1916 fair will be ready for announcement in this paper next week. It will be a high class one and will provide for all the horses in training on this coast whose owners desire to race them. The purses will be liberal and the classes have been so ordered as to give owners an opportunity to start their horses several times during the eight days on which the fair will be held. Everything points to one of the greatest fairs ever held in California to be given at Sacramento in September.

◈◈◈

The 2:12 class at Goshen should bring together the most sensational field of performers ever seen on a half-mile track in the world, as among those named are such celebrities as Spriggan 2:08¼, winner of the $20,000 2:10 trot at San Francisco last year; Humfast (3) 2:09¾, second to Mary Putney in the Kentucky Futurity last fall and winner of second money; Azora Axworthy 2:15¼, unbeaten in 13 races last season; Ima Jay 2:11¼, winner of 11 straight races, most of them for $1,000 purses last summer, and who worked a mile in 2:04½ on a slow track last fall; Nowaday Girl 2:08¾, Al Mack 2:09¼, Harry J. S. 2:08¼, the little game-cock trotter from Delaware, and thirty-three others of similar distinction.

◈◈◈

In a little town in Western New York, says the Horse World, the wonder of the community was the way in which a brown mare, owned by a local butcher stood up under the work of drawing a meat wagon over a long route of surrounding territory every other day and doing odd jobs about the village on the intervening days. She thrived under work that would kill many horses and seemed never to know what it was to be tired. Her owner bought her with no regard to her breeding, but so many of his friends made inquiries as to her origin that he sought information in that respect and found that she was a registered daughter of McKinney 2:11¼. The same qualities that make for courage, determination and stamina on the turf make this mare noticeable in the humbler, but no less onerous role of butcher's horse.

◈◈◈

Eighteen head of horses from Woodland Hackey Stud were shipped by express to New York on Wednesday of this week where they are to be sold by auction at Durland's famous riding academy. Several prize winners are in the consignment, among them being the mares Delight and Emmaline, which have won many blue ribbons under saddle and in harness, singly and together. There is also a finely matched carriage team which will attract attention. The latest news from the New York market for fancy horses is that good horses for either riding or driving are in demand, while hunters are bringing big figures, an average of $1403 being obtained in a sale of a consignment of these horses recently. The consignment of these horses from Woodland Hackney Stud to the auction block does not mean that Mr. E. J. DePue is closing out his breeding farm, but simply that he has started an annual consignment to the New York market. The mares at the Woodland farm are mostly of Hackney and Trotting blood and on these he is using this year a fine young Kentucky saddle stallion which should produce good results.

Thoroughbred Matters

RACING AND BREEDING IN THE GOLDEN STATE

"Kit" Chinn's Ideas As to How They Can Be Restored and Put on a Right Plane.—Professional Turfmen and Booking Must Go.

[By Ralph H. Tozier.]

Christopher C. Chinn, more than a dozen years ago a prominent Kentucky breeder of race horses, a starter for many seasons on the big tracks of Kentucky, Chicago and St. Louis and farther west, was met on the Oakland boat by the writer last Saturday. He looked not a day older than when he was active on the turf, and still has the same strong liking for the kingly sport that all true Kentuckians have. "Kit" is the eldest son of the famous "Colonel Jack" Chinn, who in the State senate of Kentucky framed the bill for a racing commission and pari-mutuels, which measure saved the day for the breeders. The Chinns of Harrodsburg, breeders of Leonatus, High Private, Ban Fox, Lissak and other celebrities, have been racing men and breeders ever since the Grand Old Commonwealth became a State, and though "Kit" is a long-time resident of Oro Paradiso, and has been paying more attention to wheat-raising as, he says, "for the allies," and to buying and selling city and country property in his San Francisco office, his thoughts go back to racing and race horses very, very often. While retired for fully a dozen years from "the game" in which he was such a prominent and highly-regarded player, no one in California would be better pleased than "Kit" Chinn to see racing and breeding restored to the Golden State than the gentleman from the Bluegrass region. He knew California when she vied with his native State in the production of great race horses, and he has viewed with awe the incineration (through adverse legislation) of racing plants and grand stock farms. Mr. Chinn believes restoration can come, and these are his ideas regarding the way it can be brought about:

"Many things are necessary before racing and breeding can be re-established in California on the right plane. The 'professional turfman' and the bookmaker must go, and racing must become a sport, and not a business. I believe that a Racing Commission of the best men obtainable would be the first step in the right direction. Then auction pools and pari-mutuels must come. They remove the incentive for cheating and thereby give confidence to the minds of the public as to the integrity of the sport. Financial profit to an owner then can only come by winning races. In the bookmaking days the 'laying up in the books' of horses that figured to win by a goodly margin was as common as fleas on the back of a lame dog. Bookmakers would 'split the sheet' (fifty-fifty) almost any time with a dishonest owner and simply filch from the public that supported the sport the money wagered upon the favorite that ought, by every right, to have won. Thus it was that the dishonest bookmaker and owner, or trainer or jockey, brought racing into disrepute. These disgraces would be eliminated at one fell swoop by the auction pools and pari-mutuels system of wagering, and when confidence in the sport came there would be nothing to compare with it in point of popularity.

"In Australia, England, France, Germany, Russia and Austria, where it is under government direction, and everyone knows it is conducted honestly, every man, woman and child in the country, nearly, takes an interest in the 'sport of kings,' as it is rightly called. You seldom hear any cry of fraud in those countries. Why? Because, the stakes and purses are so large and the owners in such affluent circumstances that the element of sport towers far over the monetary part, and instead of hearing that 'Mr. Vanderbilt wagered $10,000 on his horse and lost through a bad ride' you hear people talking about the beauties of the race, the gameness and speed of the different horses, the skill of the riders—unswayed and not blinded by a wager, the winning of which in this part of the world was of paramount importance; the beauties of the race, if noted at all, forgotten in a moment. To be frank, it would be better if those who only went for financial gain could be kept off the race track, but it would take the genius of an Edison to devise a scheme to keep them on the outside of the fence of the race course.

"Speaking of Mr. Vanderbilt—and also of Messrs. Harry Payne Whitney and Herman Duryea—do you know what made them forsake the turf of the United States and go to France and England to race? The newspapers. If one of these gentlemen wagered $500 on one of his own horses the wager was so enormously exaggerated that by the time the last scribe had a fling at the matter they had them betting $50,000 on their flyer. And, if it had been $50,000, what is that sum to one of these gentlemen, whose income is nearly that much per day? The newspapers could do the turf an immense amount of good if they would just leave the betting news (which is really a private matter) out of their columns altogether.

"What the Racing Commission, auction pools and pari-mutuels can do for Kentucky they can do for California. In my old home (I am now almost a Native Son) they have completely hushed the cries of formless racing and raised the stakes and purses more than two-fold. The good they have done the breeder can scarcely be estimated. But for the Racing Commission and pari-mutuels I believe grass would be growing waist high upon the time-honored Lexington and Churchill Downs courses and the breeders and lovers of racing in Kentucky would long since have died from grief.

"I understand Governor Hiram Johnson is a great lover of all sports, racing in particular—and baseball. He doubtless realizes that the adverse legislation enacted has ruined breeders, taken away the joy of race-goers and millions of dollars out of the State.

"The good these anti-betting laws have done is not discernible to one armed with even a Lick telescope. Tell the average human being that he can't do anything, and it only makes the resolution stronger in him that he will. These laws have not stopped betting. People simply bet now on races far away from home that they never have the pleasure of seeing.

"If I had the power I would urge the passage of a law providing for:

"A Racing Commission of three members to have entire charge of the racing, allotment of dates and punishment of all turf offenders in their jurisdiction—the State of California. (In Kentucky ex-United States Senator Camden, a big breeder, has been the chairman of the Racing Commission since its formation, and just resigned on account of ill health.)

"Five per cent. of the gate receipts of each racing association to go to the State, out of which the salaries of the Racing Commission are to be paid, the surplus to be divided between State Fair, State Farm at Davis, and improvement of State highways.

"Racing limited to 30 days per year in any county.

"No person to be allowed to purchase stock in more than one race course in the State.

"No person ever having any connection with the promotion of prize fighting or wrestling or having any interest in a book on a race track to be allowed to purchase any stock in a race course, or have any say in the management of one.

"Speculation on the chances of horses in a race in the State to be through the medium of pari-mutuels and auction pools only.

"No information as to entries in races, riders, in races, horses withdrawn (scratched), mutuel prices or probable prices, to be allowed to any man or company or sent out by telegraph or telephone to anyone upon pain of the sender being incarcerated in jail. (This would eradicate the pool-room evil and make people go to the race course if they cared anything for racing.)

"Following out the above plans," said Mr. Chinn, "we would soon find our turf the most popular of all institutions, with a different class of men conducting the meetings and owning horses, the breeding of great racers would be resumed in California, wealthy men would become patrons of the sport and many breed the horses that carried their own colors, the cry of unfairness and fraud would never be heard, the State would reap some solid financial benefit from the racing, and the professional horse-owner and money-hunter would give way to the real sportsman in for the honor of winning and not for the dollars that could be piled up. The pool-room would be an unpleasant memory, the habitues would come to their senses and seek honorable fields of endeavor, Governor Johnson would be blessed by all true lovers of honest sport, and California would soon resume her place at the head of the racing procession."

An Incident of Tia Juana.

Parachute!

A little, fretting pony that pawed and pawed and pawned until a thick coating of perspiration oozed out of his silken hide; a little woman that moved about nervously, patting its neck with her gloved hands; a hundred throats that became hoarse as that same little pony flew to victory in that fifth race. Such is the prologue of a story which, if fictionized, would read like a fairy tale.

Parachute, a three-year-old chestnut, son of Aeronaut out of Brilliancy, made history at Tia Juana yesterday when he defeated a cracking field of sprinters. He was despised at one time during the betting at 100 to 1. Some one knew of Parachute. Some one was told by that little woman with the white gloves, Mrs. M. E. Munson. And there was a rush. From 100 to 1 he was played and played and when they were away at the post, 25 to 1 was the best quotation obtainable.

There may have been other 100 to 1 shots win on the great American turf. But never, no never, was there ever such a pathetic scene as when that little pony came home. The frail woman with the white gloves cried. She cried through mere joy.

"Really, I didn't have a dollar in the world on my little pony. It is too sweet, too sweet," she cried.

Isn't it a tragedy that she didn't bet? But there was a reason. These persons of the turf feel the ups and downs of this world probably more than any other class.

Parachute ran a remarkable race. He was away slowly. Master Mason, that promising apprentice, did not become flurried, but instead he settled down to ride the race of a master and slowly he brought the little pony down to win going away.—Leon Wing in San Diego Union.

The new mile track at Atlanta, Ga., where the Grand Circuit meeting will be held this fall, is built around a beautiful lake.

Meddler Dies in France.

Meddler, Clarence H. Mackay's great stallion and sire of many famous racers, died Friday, April 21st, at the Haras de Fresnay stud in Normandy, France. The cause of his unexpected end is not known, and the news came as a surprise, for though in his twenty-fourth year the son of St. Gatien was considered hale and hearty.

Meddler long ranked with the leading sires of the United States, England and on the Continent, and in 1904 and 1906 he topped the list of winning stallions in this country. In 1904 his get accounted for $220,000, while in 1906 he took the lead, when his progeny earned $151,243. From 1897 to 1914 inclusive the get of Meddler have won $932,561 in this country, and their European winnings would bring this sum to a total of about $1,200,000.

The best known of Meddler's get who raced in this country were Mediant, Colonial Girl, Tanya, Go Between, Brookdale Nymph, Tangle, Detective, Goldsmith, Bedouin, Ironsides, Perverse, Hylas and Armenia. In England he sent to the races such sterling performers as Bobin II., Miss Malaprop, Spiked, Sassenach and Troubled Waters.

Meddler made his first bow to lovers of the thoroughbred in this country in 1893, when he was purchased from the G. Abingdon Baird estate in England by W. H. Forbes of Boston for $72,500 and brought to the United States. Then in his three-year-old form he was sent to the Neponset Stud near Boston, but had little chance to prove his worth.

After the death of his owner Meddler was again thrown on the market, and this time he was offered at auction in New York. Sidney Paget, acting for the late William C. Whitney, bought in the son of St. Gatien for $49,000. Mated with the best of the Whitney mares, Meddler soon proved his worth, but when that sportsman died the stallion was homeless for the third time. He passed under the hammer again, and this time was sold to Mattie Corbett for $51,000.

The investment proved a most fortunate one for Corbett, as he shortly afterward sold the stallion to Clarence Mackay for a sum said to have been $70,000.. Meddler made his second trip across the Atlantic and was placed at the head of the Haras de Fresnay stud. There he continued to show the worth that had placed him in the front rank of American sires and his progeny quickly made a great name for him in England and on the Continent.

§ § §

Thoroughbreds in Hawaii.

The Hawaii Polo and Racing Association will give a meeting at Kapialani Park, near Honolu, June 10th and 12th.

Judging from the number of horses in training for the coming races some fine sport should be witnessed.

Welcome Boy, Tom Hollinger's pacer, is in training at his owner's place at Kapiolani Park, in charge of Jack Gibson. Harvester, the well-known runner, is also working at the park.

Down the line at the Oahu Railroad's ranch at Kawailoa, the following runners are in training: Umpqua, Oneonta, Lizzie Moore and several two and three-year-olds from the Honouliuli ranch.

Walter F. Dillingham is "prepping" a two-year-old filly by Umpqua—Yellow Girl, a mare that was brought to these islands by John O'Rouke.

Lincoln Achieu has in training a Hawaiian-bred runner out of a thoroughbred mare that he owns and which has run on the local tracks.

On the Parker ranch at Waimea six promising youngsters are reported to be in training, while on Maui, Louis von Tempsky is getting his good colt Wallaby in shape for the coming meeting.

The Valley Isle will be well represented next June, for beside Wallaby, there is said to be quite a lengthy string of runners in steady work at Spreckels' Park, and which will be entered in the Baldwin interests.

The Baldwin string includes: Senator B., Francis B., Copra, Advance Guard II and some two-year-olds.

On the Parker ranch a colt by St. Avon—Springban is reported to be showing considerable promise.—Hawaiian Gazette.

§ § §

Young Widener Buys Erdenheim Farm.

News of the purchase of the famous old Erdenheim Farm by George D. Widener, Jr., of Philadelphia, is another and one of the most important turf happenings of the year. It was at Erdenheim that Iroquois, the first American horse to win the English Derby, saw the light of day and it was the birthplace of many another thoroughbred that has played a most important part in turf history. Mr. Widener became the possessor of Erdenheim last Tuesday, and it is the first important step in a plan to breed thoroughbred horses on a large scale.

Andrew Jackson Joyner has been engaged for a long term to train the Widener horses and his success on both side of the Atlantic makes him a most valuable acquisition. Many important purchases have been made and Mr. Widener has bought carefully, with breeding as the ultimate purpose to which his horses will be put.

Other purchaser have been made purely for breeding and no expense has been spared to obtain the very best blood lines available. Under such a policy Erdenheim is destined to come back to much of its old fame, and its return to the thoroughbred industry will work an incalculable benefit to the breeding interests of the country.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

MONSTER SEA LION ON RED ROCK.

The largest sea lion ever found on this coast was washed up on Red Rock, below San Quentin, last week and found by Max Schafer.

The fishermen notified Mr. Schafer that the animal was on the rock and he immediately proceeded to bring the dead sea lion to his factory. The carcass weighed 1565 pounds.

According to the scientific department of the University of California, the largest sea lion ever found on the coast weighed 1500 pounds.

Mr. Schafer, in discussing the find said: "The lion was the largest ever found on the coast. Old fishermen state that it was one of the family that was in the habit of staying on Seal Rocks at the Cliff House. The head weighed 57 pounds. It was 12 feet long, and the teeth were worn down and very loose. When the head was rolled the teeth would rattle. I extracted a barrel, or 400 pounds of oil from the carcass. In the stomach was 150 pounds of fish bones."

The sea lion destroys more rock cod than any other known fish, and one can imagine the amount of rock cod that 150 pounds of bones represented. It would be better if all the sea lions on the coast were exterminated. It is estimated that a sea lion of the size of this one consumes half a ton of fish in a day.

ROD AND GUN IN NORTHWEST.

In accordance with permission granted by State Game Warden Carl D. Shoemaker of Oregon the Newport Rod and Gun Club spent a day recently on Yaquina Bay shooting shags. These birds are said to annually destroy thousands of fish . Launches from Newport, Toledo and Elk City, with members of the club, patrolled the bay until noon, bagging thirty birds.

* * * *

A battery consisting of a 1,000-candle power searchlight has been mounted on the point of the island below the Willamette falls at Oregon City, Ore., and will be used under the direction of Carl D. Shoemaker, game warden, and his deputies in catching would-be violators of the law operating at night. Mr. Shoemaker states that this place has been a favorite one for setting nets at night.

* * * *

A rainbow trout weighing seven and one-half pounds and measuring thirty-one inches in length was captured at Lake Tapps a few days ago by James E. Macpherson of Tacoma, Wash. It required fifteen minutes of skillful playing to land the fish.

* * * *

A party of anglers from Tacoma, consisting of Allan H. Gilchrist, James Neil, G. Campbell, Arthur Miller and Dr. O. F. Norris, opened the season with a two days' outing at Roy Lake, a private fishing preserve near Roy. Using artificial flies as a lure, they returned with a record catch of trout. The fish ranged from ten to eighteen inches in length. Gilchrist headed the list with forty-one, Campbell and Norris each got forty, Neil thirty-nine and Miller thirty-six, totaling 196 trout.

FEDERAL PROTECTION FOR GAME FISH.

That Federal protection of California's salt water game and food fishes is an absolute necessity was the statement made by Dr. J. Auburn Wiborn, a well-known California sportsman, who has for many years put in the summer months fishing at Catalina.

That this great natural resource, a much more valuable asset to the State than the migratory birds now under Federal protection, will surely follow the path of the wild pigeons and buffalo to total extermination unless accorded national protection, is Dr. Wiborn's prediction.

"The wild pigeons have been wholly exterminated," says Dr. Wiborn. "The buffalo and fur-bearing animals have been slaughtered, and now comes the wanton, reckless interference with the spawning of game and food fishes, while the prices of foodstuffs soar upward."

The finding of two nets set, in open violation of the law at Empire Landing, Catalina, with the waters full of spawn and spawning fish, has provided the wrath of sportsmen and food conservationists.

* * * *

New Angling Wrinkle.—Fishermen who whipped the Llagas brought back a story of a new angling wrinkle tried by a couple of distinguished looking gentlemen along that creek. Armed with lighted candles this pair walked up and down at the water's edge during the night for the purpose, they stated, of drawing all of the fish in the creek to the stretch they wished to fish in the morning. Whether the ruse was successful, narrator sayeth not.

Among the successful fishermen who fished on the Llagas were Percy Henderson of San Francisco and Gus Brosius of San Jose, who each basketed a limit.

The genial Daniel J. Flannery was quite unsuccessful. His reward for several hours of hard work was three small fish.

TUNA FISHING OFF GOLDEN GATE.

That the waters off the Golden Gate, Monterey and Santa Cruz offer all the advantages for tuna and other fishing, such as has made the waters around Catalina island in the south world famous, is the assertion of N. B. Schofield, in charge of the department of commercial fisheries for the State Fish and Game Commission. Schofield has just returned from a trip in the south, where he investigated the tuna fishing industry.

"Deep-sea fishermen have demonstrated that we have practically all of the fish that have made the waters around Catalina Island known all over the world to sportsmen," said Schofield. "The leaping tuna ,the white sea bass, the barracuda, rock bass, swordfish and long-finned tuna or albacore cal all be caught in the waters off shore between Monterey and San Francisco. Fishermen have to go ten or fifteen miles off shore here to get some of these fish, but I believe this adds more to the sport, if anything.

"In the south the island offers more or less shelter from the open water. Here one has to be a good boatman. The fishing grounds in the south have been widely exploited and every year they attract sportsmen from as far away as South Africa. Some of the same sort of exploitation would attract many sportsmen to the fishing grounds here."

SAN FRANCISCO YACHT PARTY HUNTS BIG GAME AT HONDURAS.

While hunting last month on the coast of Honduras, Mrs. D. C. Jackling, wife of the millionaire copper king and formerly Miss Virginia Joliffe of this city, shot with her rifle a lizard six feet long. The trophy to her prowess was an Iguana, a denizen of the American tropics.

This was only one of the many interesting adventures that befell Colonel Jackling and his party, who made the cruise of the Pacific coast of all the Americas in his palatial yacht Cyrus.

The first of the party to return and relate the incidents of what is described as a most delightful voyage is Charles N. Black, vice-president and general manager of the United Railroads, who arrived in San Francisco last week, via New York. Black left the yachting party at the Panama canal. The Cyprus continued on her long cruise south to Valparaiso, where Colonel and Mrs. Jackling and their guests were to cross the Andes to Buenos Ayres and thence re-embark for a further cruise to the West Indies.

It cost Jackling $35,000, Guatemala money, to make the trip by special train to Guatemala City. With the prodigality of an American millionaire Colonel Jackling dazzled the natives by engaging a band to play for his guests while en route to the interior.

The Cyprus sailed from Los Angeles March 12th last and made its first stop in Magdalena Bay. Thence it made its way leisurely to Acapulco, where it found the city cut off from communication with the outside world, the Mexican government permitting no private use of the telegraph wires.

In a special car, the party traveled to Salina Cruz. At Acajutla, the port of San Salvador, the people were too busy hauling coffee to spare an engine, so the party had to forego the trip to the capital. Fearing a long quarantine, the yacht did not stop on the coast of Nicaragua.

The sights of San San Jose, Costa Rica, were seen, whence the party made a trop to the monkey-populated island of Coiba. The party was taken in a launch by General Edwards through the Panama canal.

Black, parting from the Jacklings, embarked at Colon on a Fruit-line steamer for Havana, thence went to Key West and by train from there to New York.

Among the guests of the Jacklings were Charles N. Black, Mr. an.d Mrs. Walter Martin, Sherwood Aldrich and Mrs. Aldrich, Mr. and Mrs. H. G. Tooker, General Bulkley Wells, Miss Marjorie G. oJsslyn, Judge K. R. Babbitt and Charles Hayden.

Four Anglers Drown.—Four fishermen of a party of nine which went to Little Bear lake in the San Bernardino foothills for the opening of the trout season were drowned on Monday when a power launch overturned. The five survivors swam ashore.

The dead: Dr. C. M. Trumpower, Long Beach, dentist; Ben M. Rapp, Long Beach, insurance agent; Harry Tharp, Los Angeles, chaffeur; Merton Wearne, Los Angeles.

* * * *

Indians to Fish.—A decision that gives the Indians of the Yakima nations the right to fish in the Columbia river above The Dalles and that enjoins Seufert Brothers Company from interfering was handed down by the United States District Court at Portland during the week. The suit was brought by the United States Government as guardian of the Yakima confederacy.

The company tried to prevent the Indians from fishing at a point on the river which it claimed it owned, but the Government contended that by the treaty of 1855 its wards had a right to fish at any point. During the hearing two Indians over 100 years old, who were present at the signing of the treaty, appeared as witnesses.

AT THE GOLDEN GATE DOG SHOW.

The Golden Gate Kennel Club dog show that closed last Saturday at Dreamland Rink, was one of the most successful of its kind ever held here. Walter H. Reeves, who came out from Chicago to judge all breeds, proved to be an expert in his line. Reeves handled the job in an admirable fashion and finished up Saturday night without any one disputing his ability. Mrs. Anita M. Baldwin's crack bulldog, Failsworth White Knight, was adjudged the best dog of any breed in the show, defeating many famous champions for the premier honor.

‡ ‡ ‡

Among other dogs deserving of mention are: Mrs. Anita M. Baldwin's crack kennel of Airedale terriers; Jack Bradshaw's brace of Sealyham terriers, Bromley Star and Bromley Vixon; Mrs. E. F. Brown's display of collie dogs; Dr. T. Martin Smith's Boston terrier, "Art" Smith; Peter B. Kyne's brace of English bulldogs; C. Fetcheimer's wire-haired fox terrier Mulomah Crosspatch; and Mrs. Norwood B. Smith's exhibit of St. Bernard dogs.

‡ ‡ ‡

George Stedman Thomas, of Hamilton, Mass., the only man to ever make a million dollars out of dogs, was one of the many prominent dog fanciers to attend the show.

‡ ‡ ‡

Sam Crabtree, of Failsworth, England, who came out to show Failsworth White Knight, Anita M. Baldwin's famous bulldog, has decided to remain in California. It is rumored that he has been engaged by Mrs. Baldwin as kennel manager for her Anoakia kennels.

‡ ‡ ‡

Sam Crabtree of England will be the all-rounder at the Mill Valley dog show to be held Decoration Day.

There were a couple of unfortunate disputes during the three days of the show. Jack Bradshaw refused to show his bulldog Country Model because he charged that Sam Crabtree, who was showing Failsworth White Knight, was a friend of Judge Reeves. Leon Roos and the superintendent of the show, O. F. Vedder, became involved in a controversy that may come up before the club.

‡ ‡ ‡

The Fortuna Kennels of Los Angeles, Cal., have just received from Mrs. Williams of England a miniature Pomeranian (orange), which they consider the grandest ever imported. In writing of him they say he has a wonderful coat, grand little head with the smallest ears possible. He is just a ball of wool, weighs three pounds and is splendid throughout. His registered name is Flaming Flamboi, and his sire is Ch. Flaming June, a son of Ch. Young Dragon Fly. He was a winner in London shows. Several good females are already booked to him. This three-pound orange and the three-pound black, Aberdare Tiny Blackie, give Fortuna Kennels the smallest brace on the coast, not to mention their lovely chocolate, Lord Collingwood.

New Name For Bass.—A new name has been selected for the Pomoxis Annularis by the State Fish and Game Commission in an effort to make more popular what is said to be one of the best fresh water game and food fishes. The task of choosing a new name was delegated to N. B. Schofield of the commercial fisheries department, and Schofield has selected the name of "sharp-eared bass" as a substitute for Pomoxis Annularis. Deputies of the Commission throughout the State have been informed of the official change in name.

The sharp-eared bass belongs to the sunfish family and was introduced into California waters from the Middle West a few years ago. It has multiplied rapidly. At the same time the Commission introduced the blue-gilled sun fish, also from the Middle West. By an accident a few strawberry or calico bass got into the shipment. All three fish have prospered in their new environment and are said to be a valuable addition to the fishing resources of the State.

* * * *

O. P. Brownlow, the deputy game warden for the Porterville district, has returned from Mariposa county, where he aided in arresting nine offenders against the game laws. Nearly all of those arrested were taken up for violation of the provision against having deer meat in their possession illegally.

* * * *

The Clansmen is the name of a San Pedro organization in which bullets are ballots for membership. To be initiated into the inner circles, the candidates must be able to make a score of at least 275 perfect shots out of a possible 400. The organization is composed of crack shots of the San Pedro police force. A new range, fitted up with moving targets on the government reservation, through co-operation of Capt. W. H. Sage, Jr., who is himself an enthusiastic revolver shot. He is in charge of the construction work at Fort McArthur for the government.

Drink Jackson's Napa Soda.

Shooters Busy in Registered Tournaments

HIGH SCORES MADE AT FRESNO AND LOS ANGELES TRAPS

Fresno Club.—More than 500 persons witnessed the Fresno Blue Rock "money shoot" Sunday at the club grounds, near Roeding Park. It was the largest and most successful shoot in the history of the San Joaquin Valley. More than $600 in cash prizes was distributed to the shooters from all parts of California and Nevada. Several fine scores were made.

Under the auspices of the same club, the "merchandise shoot" was held Saturday with 300 present. This was the first annual Raisin Day shoot, a registered tournament for amateurs. The results of the two-day shoot follow:

Merchandise shoot—

Shooter.	Broke.	Targets.
Harry Ogilvie, Lindsay	143	150
Tony Prior, San Francisco	138	150
O. N. Ford, San Jose	137	150
A. Flickinger, Vallejo	137	150
*R. C. Reed, San Francisco	133	150
*L. Hawxhurst, Alameda	133	150
A. P. Haliburton, Lindsay	132	150
Dr. R. N. Fuller, Tulare	132	150
G. A. Adams, Fresno	131	150
C. H. Nash, San Jose	131	150

All the above received merchandise prizes. The other scores were:

J. A. Cook, Tacoma, Wash	130	150
W. E. Willett, San Francisco	129	150
Henry Garrison, Modesto	129	150
W. J. Eilert, Fresno	127	150
*C. A. Haight, San Francisco	127	150
H. Havens, San Francisco	126	150
Guy Lovelace, Dinuba	126	150
H. D. Blanchard	123	150
A. M. Barker, San Jose	123	150
H. Thompson, Tulare	122	150
Chas. Huber, Newman	121	150
L. W. Slocum, Fresno	121	150
N. A. Howard, San Francisco	120	150
F. K. Burnham, Martinez	117	150
Dr. J. L. Martin, Fresno	117	150
C. B. Jackson, Fresno	116	150
Fred Appling, Fresno	115	150
J. R. Brennon, Sacramento	112	...
C. R. Arques, San Jose	110	150
C. Foin, Fresno	110	150
R. D. Robinson, Fresno	110	150
Miss G. J. Meyers, San Francisco	109	150
*W. R. Ellis, San Francisco	108	...
L. J. Mook, Fresno	103	...
G. H. Anderson, San Jose	101	150
D. A. Cowan, Fresno	98	...

Registered tourney—

Shooter.	Broke.	Targets.
Tony Prior, San Francisco	196	200
A. Flickinger, Vallejo	195	200
A. P. Haliburton, Lindsay	192	200
H. Garrison, Modesto	191	200
D. Davinson, Modesto	191	200
G. A. Adams, Fresno	188	200
H. Lareson, Newman	188	200
Fred Stone, Fresno	186	200
W. J. Eilert, Fresno	186	200
L. W. Slocum, Fresno	186	200
Guy Lovelace, Dinuba	186	200
O. N. Ford, San Jose	186	200
C. H. Nash, San Jose	186	200
A. M. Barker, San Jose	186	200
D. O. Ostendorf, Lindsay	186	200
C. O. Barieau, Lindsay	184	200
Dr. R. N. Fuller, Tulare	183	200
Dr. J. L. Martin, Fresno	177	200
C. R. Arques, San Francisco	174	200
H. D. Blanchard, Tulare	173	200
N. Thompson, Tulare	170	200
C. B. Jackson, Fresno	162	200
H. Thompson, Tulare	162	200

Trade representatives—

Fred Willett, San Francisco	190	200
R. C. Reed, San Francisco	189	200
A. L. Cook, Tacoma, Wash	186	200
C. A. Haight, San Francisco	182	200
J. R. Bennon, Sacramento	162	200
W. Ellis, San Francisco	161	200

Three having the highest runs—Henry Larnson, 102, Tony Prior 102, Flickinger 106.

* * * *

Big Time Club.—Dr. J. H. Stineman of Roseville and Lee Gorman of Sacramento were tied for first in the Big Time Gun Club's shoot for the Klune and Floberg cup Sunday, each breaking 22 birds out of 25 chances. There were 30 shooters participating in the event, which was staged at the traps on the Schenk ranch. M. Priest, last year's cup winner, finished second with 91.

Among the professional shooters in the 25-bird event E. L. Ilgner finished first with 23. William Higgins was second with 22.

A practice event for 10-bird strings was staged and the following made one or more strings of 10 straight: Gorman, M. Newbert and Ilgner, three each; A. E. Pearson, two; F. Biewener, F. Ruhstaller, F. Egersdorf, M. Priest and D. Ruhstaller, one each.

The day's shoot closed with a nine-man team shoot, each man shooting five birds. Judge March and Joe Davey captained the respective teams. March won the first contest, breaking 30 to 27. In the second shoot the result was a tie with 30 birds each. The first shoot-off was also a tie with 25 birds each. In the final shoot-off Davey's team won, 31 to 28.

A ladies' ten-bird event was held and Mrs. Newbert and Miss Baker had high scores with 6 each.

* * * *

Lewiston, Idaho.—Hugh Poston, the San Francisco professional, was winner of a special match over the Lewiston, Idaho, club's traps last week. Poston made the creditable score of 297 out of 300. Other scores were: *F. Riehl 290x300, *L. H. Reid 287x300, A. Troeh 294x300 and A. McElroy 291x300. It was close competition between five of the best shots who have ever faced the traps in Lewiston.

* * * *

San Rafael Elks' Club.—The newly organized San Rafael Elks' Club staged its first event on Sunday. A number of San Francisco professionals were over to assist in staging the shoot. The San Rafael Elks have a beautiful grounds on the golf links. There was some trouble with the new traps but the new members took to the trapshooting game right off the reel.

A practice event was staged and the first scores would indicate that San Rafael is going to have some crack performers. The faulty working of the traps held down the tallies. The results were:

Twenty-five targets—John Fagan 18, J. Fallon 20, R. Johnson 17, H. G. Ridgeway 14, E. Butler 16, John Schlosser 11, J. Kapperman 17, *H. Trescott 9, J. Arata 11, T. Gable 13, R. Mecci 19, *Larry Middleton 17, W. Stadfeldt 20, *J. W. Moore 14. (*Professional)

Others who shot were R. Dufficy, T. P. Boyd, P. Larney, F. H. Smith and Dr. Halsey.

A big trap shoot under the auspices of the new club will be one of the many athletic features at the four-day Flower Carnival at San Rafael, starting May 21.

* * * *

Seattle Association.—On the first day's shoot of the Hercules Powder Trophy handicap, which was held April 23d at the Harbor Island grounds of the Seattle Trapshooting Association, C. E. McKelvey hit 44 out of 50 targets and stood high man in the regular program, breaking 89 targets out of his 100. He also stood high in the 100-target program. J. H. Hopkins came strong after McKelvey with a 43 score to his credit. D. Rhodes was the only professional on the grounds, and scored 41 out of his 50 targets.

The club was honored with Florenzo Constantino, the noted tenor, who paid a visit to the grounds and stayed throughout the first program. Constantino is much interested in the Sport Alluring, and although he did not shoot, stated that trapshooting was one of his greatest amusements.

Many of the shooters have started practice work for the coming state tournament, to be held on the Harbor Island grounds May 23 and 24. This year's event is expected to draw a great many more shooters to the city than ever before.

The scores, at 50 targets—

C. E. McKelvey 44, J. H. Hopkins 43, Hugh Fleming 41, *D. Rhodes 41, Wm. Schilpin 38, G. A. Canuck 37, C. R. Sydman 37, W. B. Taft 36, Joe Bacher 35, Tom Wilkes 34, C. W. Bandy 34, John Considine 31, W. F. Zwick 26, A. E. Hall 17.

At 100 targets—

C. E. McKelvey 89, Hugh Fleming 87, *D. Rhodes 83, W. B. Taft 76, G. A. Canuck 75, Joe Bacher 75, John Considine 71, Tom Wilkes 71. (*Professional.)

Messrs Lord and Bogle shot with the club, but did not take part in the regular program.

* * * *

Portland Club.—Harry Pollock and Abner Blair carried off the trophies in the handicap trapshooting tournament of the Portland Gun Club on April 23d. Pollock won two trophies, the Hercules and the Du Pont, beating Frank Templeton in the shoot off for the Du Pont spoon. Blair won the western trophy after a shoot off with Al Seguin.

Two dozen shooters were out and some very good scores were registered from back of the 16 yard line. Al Seguin broke 94 from the 20 yard line and Jim Seavey and Abner Blair cracked 90 from the 21 yard mark. The percentages:

	Score.	Hdcp.
A. Blair	90	21
J. S. Crane	60	16
J. Morris	76	17
E. B. Van Arnam	68	21
Al Seguin	94	20
J. T. Murphy	60	18
C. Sparks	68	18
A. Parrott	82	21
R. Thompson	72	16
F. Van Atta	82	21
A. L. Zichrisson	72	17
H. A. Pollock	84	17
A. W. Strowger	62	17
J. Stutt	73	17
J. W. Seavey	90	21
E. H. Keller	82	20
M. G. McCardle	60	16
J. P. Beall	78	21
W. C. Bristol (20-gauge)	51	19
James Reid	62	21
Miss Gladys Reid	64	16
O. D. Thornton	80	20
Mrs. A. Schilling	82	18
C. J. Schilling	54	21

* * * *

Santa Rosa Club.—The opening shoot of the Santa Rosa Gun Club was largely attended Sunday, over 1,000 clay birds being broken during the day by the sportsmen. There were a number of ladies present and the day was passed very pleasantly.

This being the opening shoot, there was no attempt made to keep scores, and it was not a match event in the full sense of the word. In the future scores will be kept carefully and will be given due publication.

Taken all in all, the day was what the most sanguine hopes had painted it in expectation. The sport promises to become very popular in the future and the membership of the club is bound to grow rapidly, as the delights of breaking the clay birds become better known.

* * * *

Salt Lake Club.—By defeating a field of twenty-two shooters at the local traps on April 23, Mitchell succeeded in placing his name on the cup for the second time. Mitchell is now the second man to have two wins to his credit.

Charles Reilley led the amateurs in actual breaks by smashing forty-seven out of his fifty targets.

The scores follow:—

	Broke.	Hdcp.	Tt'l
Reilley	47	..	47
Gardner	46	..	46
Klein	45	2	47
Mitchell	45	5	50
Irvine	45	..	45
Bishop	44	3	47
Fisher	42	8	50
Barney, R. A.	42	..	42
Heagren	42	6	48
Bray	41	2	43
Welch	41	2	43
Galligher	39	5	44
Cowan, J. F.	39	4	43
Shepperd	37	6	43
Johnson	35	5	40
Engle	33	8	41
Barney, R. T.	32	..	32
Hart (shot 25)	23	..	23

*Professionals.

* * * *

Missouri State Tourney.—St. Louis, May 2—The first regular program in the Missouri State Trapshooting Tournament was held here today. The sun did not shine during the entire day, and at times a cold drizzle was falling. Art Killiam of St. Louis, in the professional two 100-targets event, was high with 193. Summaries:

Two 100-target shoot, processional: Art Killiam, St. Louis, 193; J. W. Barre, Louisiana, Mo., 191; H. Kennicott, St. Louis, and Fred Gilbert, Spirit Lake, Iowa, 190.

Amateur: First, L. C. Larsen, Kansas City, Mo., 191; second, J. F. Dodd, San Diego, Cal., 190; third, J. W. Bell, St. Louis, 189.

Double target shoot, professional: First, B. Lewis, 42; second, F. Gilbert, 41; third, A. Killiam, 38.

Amateur: First, George Nicolai, 44; second, Mark Arie, 43; third, William Wittleaf, 42.

Two-men team shoot, amateur: First, J. W. Bell and W. Petermann of St. Louis, 47 out of 50; second, L. C. Larsen and H. E. Snyder, Kansas City, 46.

Amateurs—J. F. Dodds, 97; L. C. Larsen, 96; W. S. Spencer, 95.

100 single targets, professional, afternoon: First, J. W. Barre, 98; second, A. Killiam, 96; third, W. B. Barton, 95.

Amateur—First, Mark Arie, 97; second, J. W. Bell, 96; third, William Wittleaf and T. M. Ehler, 96.

COMING REGISTERED TOURNAMENTS.

California.

Los Angeles, May 8, 9.—Vernon Gun Club, William Pugh, Manager.

Alameda, May 20—Golden Gate Club, Clarence A. Haight, Secretary.

San Jose, May 28, 29, 30—California-Nevada Association Tournament, San Jose Blue Rock Club, O. N. Ford, Secretary.

Eureka, July 4—Eureka Blue Rock Club, H. A. Hine, President.

Oregon.

Portland, June 5, 6, 7—Sportsmen's Association of the Northwest Tournament, under the auspices of the Portland Gun Club, Frank Templeton, Secretary.

Portland, Sept. 12, 13, 14—Pacific Coast Handicap.

Washington.

Spokane, May 8, 9 and 10—Spokane Gun Club.

Seattle, May 23, 24.—Washington State tourney, Seattle, Association.

Chehalis, May 30—Chehalis Rod and Gun Club, Gus T. Thacker, President.

Seattle, July 4—"Old Policy," Green Lake Gun Club, W. C. Smith, Secretary

Tacoma, July 18, 19, 20, 21—Pacific Indians, F. C. Riehl, Secretary.

Sportsmen's Row

Just remember this when some one starts an argument with you, that 282,475 shots were fired in the Grand American Handicap trapshooting tournament in Chicago last August.

* * * *

William K. Vandervilt and George Gould each have had two hand traps attached to their yachts, so that they and their guests may enjoy trapshooting while the yachts are on the "briny."

* * * *

Two hundred and seventy-five thousand shots were fired on beginners' day last year, and nearly 7000 new trapshooters made their appearance. The numbers will be greatly swollen on beginners' day this year.

* * * *

Eight hundred and fifty gun clubs were formed in 1913; 1100 in 1914 and 1500 in 1915. How many will be organized in 1916?

* * * *

Bordeaux, Washington, is the home of a new trapshooting organization. It goe under way with 50 members.

* * * *

O. N. Ford, secretary of the San Jose, Cal., Blue Rock Club, has shot at 800 targets this year and broken 97 per cent of them.

* * * *

The idea of setting one day aside for a salute to the memory of the late George I. Lyon, of Durham, N. C., seems to meet with the approval of the trapshooters the country over, but no organization has taken hold of the movement and it now looks as if it would fall flat.

Two of the best shots in the Boise Gun Club are women—Mrs. W. A. Reason and Mrs. E. C. Grice. They participate in all the tournaments of the club and always fare well.

* * * *

Four hundred and sixty-four tournaments have been registered by the Interstate Association for the Encouragement of Trapshooting for the 1916 season. The 1915 number was 333.

* * * *

Only 700 of the 4,500 gun and trapshooting clubs in the United States are members of the State Associations. It behooves the secretaries of the State Associations and the Interstate Association to find out why such a condition exists, and then show the clubs that are outside of the fold the light.

* * * *

Wonder what Charlie Knight did to those two quarts of champagne he won at the merchandise shoot? Can a duck swim?

* * * *

George Thomas is thinking of starting a fruit store. He has twenty pounds of cherries coming for his skill with the gun.

* * * *

Champion Harold Havens is going to have some fun with his friend Fred Burnham when he gets that jitney flyer which he won.

* * * *

One of the pleasing features of club programs in recent years is the substitution of trophies instead of cash prizes. The Golden Gate Club is going to give 21 beautiful cups this season.

* * * *

The Oakland Elks' Club holds its monthly shoot at the Alameda grounds on Sunday. Next Sunday the Alameda Elks fire away and the third Sunday will find the Golden Gate Club in action. On Saturday, May 20th, the Golden Gate Club will stage a registered tournament.

* * * *

George Stupp was one of the successful fishermen. He fished on the Paper Mill creek, where he succeeded in hooking the limit. In his basket was a three-pound rainbow. Ed Weiser was Stupp's companion and he had a basket of thirty-five. Otto Simon, Chris Juimme and Louis Ritter, fishing the same water, all got good baskets.

* * * *

Walter Arp, who fished the San Gregorio, had one of the prettiets baskets of the day. He was one of the few anglers who had any confidence in this stream, and, fishing with common garden worms, he had the limit in a few hours. Among them were several measuring over twelve inches.

* * * *

Charles W. Arp, Otto Stolberg, Joe Hubbel and George Soares were among those who fished the White House pool. Arp got a nice basket of thirty-six fish, but the others had only fair luck. Edgar Liebes, William Weber and Joe Soleski fished the Lagunitas for good baskets, though the fish were small as a rule.

* * * *

Seveal readers haveremarked on the crowing of pheasants during the explosions of bombs in the last raid of Zeppelins. The remarkable thing is the wonderful hearing of the pheasant, which gives alarm of an explosion when a human ear cannot detect the slightest sound. It is a question of vibration of the air or the actual sound reaches the bird; but we are inclined to think it is the former. On the occasion of powder mills blowing up, the crowing of pheasants has been remarked far out of the range of human hearing, and a comparison of times has shown that the birds have been effected by the explosion. Other birds do not seem so sensitive, nor do animals betray an alarm.

* * * *

Wonder what Mrs. Houghawout is going to do with that gallon of paint she won at the shoot? Her complexion is O. K. right now.

* * * *

Advices from the Imperial Valley would indicate about two squads of cotton planters will appear at the Pastime tournament. Among them are several real gunpointers.

* * * *

Julie Weisser, cool, phlegmatic old Julie, is rapidly rounding into his old-time form.

* * *

Stanley Andrews is another San Diegan who will bear watching. Any time a gunman slams those screaming left angles, jumping high, or stops a racing right quarterer, he's about due. "Stan" is coming fast and should get his share of prizes at the coming tournament.

* * *

Foster Couts seems to have passed up the shooting game. Too bad! There's a blazing star of rare brilliance. Nick in, Foster, the gang's waiting for you with the glad hand.

* * *

Los Angeles Club.—After striving for several years and never been able to hang up better than a 99x100 score, Frank H. Mellus, president of the Los Angeles Gun Club and a veteran trap shooter, shot his way to victory in the practice day shoot preliminary to the fifth annual registered tournament staged Sunday by the Los Angeles Gun Club by breaking 100 targets straight. This gives Mellus high money in the tournament, which was a 100-bird optional sweepstake event, and placed him high amateur for the day.

The affair was blessed with a perfect day and about 60 shooters, both local and visitors, competed. Visiting shooters were N. A. Howard of San Francisco, 96; L. S. Hawxhurst, Peters professional from San Francisco, 98; William Mullen of Ray, Ariz.; T. D. Riley of San Francisco, 82; Milt Barber of the Pastime Gun Club of San Diego; Charles Julian, also of San Diego; Capt. J. H. Merrill of San Diego, and A. L. Rowe of Whittier.

Hawxhurst and Mitchell were tied for high professional average in the 100-bird event with 98 per cent. Gold bars for long runs were given to Mellus, with a straight of 117, and Ed. Mitchell with 70, by the Du Pont Company. Hercules trophies for runs were won by Hawxhurst with 68 and Howard with 57.

Following the 100-bird event, a 50-bird handicap competition was on for eight prizes. All prizes were tied for. The first, a diamond scarf pin, was won by N. A. Howard after the shoot-off with Fred Grewell. Each had 48x50. Howard had 19x20 in the shoot-off.

Dr. J. L. Martin is president of the Fresno Blue Rock Club and G. B. Jackson is secretary and treasurer. The officials were prominent last week in promoting the successful registered and merchandise shoots.

Frank H. Mellus, in the first day's shoot of the fifth registered trapshooting tournament, staged by the Los Angeles Gun Club, broke 118 straight out of the eight 15-bird events in the ten-event shoot. Out of the 150 birds he succeeded in breaking 148. This again placed him as high amateur for the day's competition.

Three women shooters, Mrs. Heine Pfirrman, Mrs. C. E. Groat and Mrs. E. C. Crossman competed in the contest and fired through the entire 150 birds.

High professional average in this competition was hung up by Guy Holohan, Du Pont professional, with 148 per cent. Second high professional average was achieved by R. C. Reed, a Remington professional.

H. M. Williams of the United States Navy, who arrived the previous day from San Francisco with the rest of the northern stars, was high amateur in the 50-bird handicap event at 16 to 23 yards.

Event 1.—Jack Rabbit shoot in ten events of 15 birds each from sixteen yards, 150 targets:—

*Holohan 148, Fuller 140, Sam Smith 138, N. A. Howard 143, Beckwith 136, *Ed Mitchell 142, F. H. Mellus 148, H. Pfirrmann 144, Vories 138, Mullen 129, Council 122, *G. Oliver 122, Grewell 138, Mrs. Pfirrmann 113, E. D. Crossman 138, M. Barber 131, Fish 105, Parker 46, Chas. Julian 139, Merrill 135, O. N. Ford 146, *Hawxhurst 145, Anderson 142, *Reed 146, Ogilvie 143, Haess 142, H. Cline 130, Llewellyn 120, Williams 136, Reger 115, Blanchard 142, Barto 128, Manderville 125, *Hoyt 132, *Evans 133, *Haight 134, *Cook 140, Rossbach 125, Mrs. Crossman 115, Groat 130, Mrs. Groat 134, Packard 140, Cornelius 139, Riley 46, Bungay 132, Free 108.

*Contenders shot for targets only.

Event 2.—Fifty targets, distance handicap, class shooting, 16 to 23 yards:—

Shooter.	Hdcp.	Score.
*Guy Holohan	22	47x50
Heine Pfirrmann	21	47x50
Frank H. Mellus	21	48x50
O. N. Ford	22	46x50
*R. C. Reed	22	50x50
N. A. Howard	21	39x50
*Hawxhurst	22	39x50
Anderson	20	45x50
Ogilvie	20	46x50
*Mitchell	22	43x50
Borto	19	48x50
Rossbach	19	46x50
Williams	19	49x50
Vories	19	47x50
Fuller	19	48x50
Merrill	19	44x50
Julian	19	45x50
Barber	18	45x50
*Hoyt	18	48x50

Blanchard	18	43x50
Bungay	20	45x50
*Oliver	17	38x50
Rowe	17	36x50
Free	17	43x50
Melford	17	39x50
Harry Cline	16	39x50
Parker	16	34x50

*Contenders shot for targets only.

Frank H. Mellus shattered 148 birds out of 150, making a total of 296 out of 300 shot at during the event. Healso accomplished another straight run of 118.

Three handsome Interstate Trapshooting Association trophies were awarded to Mellus for high amateur for the first day, the second day and for high total for both days.

O. N. Ford of San Jose shot his way from twenty-two yards to the high plane of the new Los Angeles handicap champion by breaking 95x100 in the 100-bird shoot for the title at distance handicaps, 16 to 22 yards. He also tied for second high amateur in the 150-bird shoot for the two days with N. A. Howard of San Francisco with 290x300.

R. C. Reed, a Remington-UMC professional, hung up the high professional average with 148x150 and was high for the tournament with 294x300.

Long run trophies put up by the Hercules Powder Company were won by Hawxhurst with 3 high runs, 67, 78 and 84; Howard with 3 runs, 68, 92 and 62; Vories with 1, 66; Grewell of the Hoegee Company with 1, 54; Capt. J. G. Merrill with 1, 65, and H. M. Williams with 2, 57 and 50.

Many of the shooters were successful in annexing Du Pont gold bars for long runs. Mellus won 4 with runs of 117, 118, 118 and 55; Mitchell 2, with70 and 55; Pfirrmann 1 with 62; Guy Holohan 3 with 81, 88 and 59; R. N. Fuller 2 with 50 and 66; O. N. Ford 3 with 62, 55 and 59; R. C. Reed 3 with 55, 65 and 94; Cornelius 1 with 70, W. Beckwith 1 with 59, and Harry Ogilvie 1 with 58.

Jackrabbit system shoot in 10 events of 15 targets each from 16 yards—

*Holohan 144, Fuller 140, Smith 135, Howard 147, Haese 145, Mitchell 141, Mellus 148, Pfirrmann 145, Vories 139, Mullen 130, Council 130, Oliver 131, Grewell 141, Barto 140, Crossman 137, Barber 115, Julian 134, Merrill 133, Williams 141, Beckwith 132, Ford 144, *Hawxhurst 146, Anderson 134, *Reed 148, Ogilvie 141, H. Cline 139, Groat 123, *Haight 136, *Cook 133, C. E. Groat 137, *Hoyt 130, Evans 135, Packard 145, Free 49, Blanchard 138, Manderville 127, Crossman 116, Fish 128, Arneal 136.

*Contenders shot for targets only.

Los Angeles Handicap Championship—100 birds in four events, 16 to 23 yards class shooting:—

Thousands of Anglers Out for Sport

TROUT FOUND PLENTIFUL BUT RATHER SMALL IN NEARBY STREAMS

The trout season came in with a bang. It is doubtful if there was ever a bigger turnout. Election Day coming right after the opener gave the boys a chance for an outing and the streams throughout the State were visited in numbers. Reports of catches set forth good, bad and indifferent sport. Limits were frequent but in some favorite spots the complaint went up that the trout were small. This was especially true over in Marin county, where anglers stood shoulder to shoulder in some places. Down in Santa Clara and Santa Cruz counties better catches and luck was in order and over in Alameda county it was never better.

On all sides the streams and creeks were very low, due to the fact that there have been no late rains, and the fear is now expressed that the pools will be fished out in a hurry. However, the rodsters will have to hunt for some new nooks.

It is estimated that over 100,000 anglers' licenses have been taken out. Around San Francisco the number was 5,650 up to Wednesday and Los Angeles reported the sale of 8,000. As the season goes on the number will be increased. It looks like angling is now at the height of its popularity. The beauty of the trout season so far is that there have been but few violations of the law. There were a couple of cases of anglers being out without licenses but they are rare and far between, considering the number that were out.

Reports of the conditions of streams up and down the Coast, as furnished by the railroad companies, follow:

WESTERN PACIFIC

Big Bar—Fishing conditions reported good by agent. Mayaro Lodge also said to be favorable. Helgamite, salmon eggs and salmon flies most attractive.

Blairsden, May 4.—Fishing in creeks very good. Experts have been taking limits easily, using mostly salmon eggs for bait. Feather River still high and only a few catches. Lakes not open. Weather generally clear and warm.

Keddie, May 4.—Streams at present very muddy. No large catches as yet reported.

Belden, May 4.—River clear—trout taking helgamites and grasshoppers. Good catches being made on North Fork, which is clear. Fish are taking helgamites. Chips Creek is clear and fish biting. East Branch water still high. Fine trolling at Three Lakes.

FROM AGENTS OF NORTHWESTERN PACIFIC.

Fort Seward.—Good catches reported Larabee Creek and Conley Creek, six and seven inches. About the limit being easily taken.

Cloverdale.—Fish are plentiful, and fishermen report they all had good luck and returned with well filled baskets.

Healdsburg.—Fishing has been good in vicinity of Healdsburg.

Shellville.—Have heard of a number of catches of trout since May 1st, Sonoma Creek, each being of from 25 to 30 trout.

Glen Ellen.—Many good baskets fish caught in waters near Glen Ellen. Eight fishermen have caught the limit, and others near it.

Vineburg.—Two parties from here caught 96 trout in Caliente Creek north of Sonoma; also some smaller catches.

* * *

Big Rush For Licenses.—J. P. Fisher, in charge of the licenses for the Fish and Game Commission, reports the greatest business he has ever experienced. From all sides requests are coming in for licenses and Fisher believes there will be over 100,000 issued before the season is very much older.

During 1915 and so far this year 133,750 hunting licenses have been purchased. When the hunting season opens in the fall the number will easily jump to 150,000. The figures give an idea of the interest taken in rod and gun in California.

* * *

Fred Thatcher, secretary of the Southern California Trout Association, believes the present season will be far ahead of any of the past. The fish are larger and the streams cleaner than they were at this time a year ago. The late storms of the spring of 1915 kept the streams roiled and the fish remained near their headwaters until fairly late in the season. The later opening this yearalso has had its effect on the fishing. The extra month has made the fish larger and the streams in nearly every case are clear.

* * *

W. C. Wood of San Francisco and E. C. Graff of Oakland fished in the overflow from Lake Chabot in the Berkeley hills for an hour Monday morning. Graff took two fish of two pounds each from the pool, which is known locally as "Sucker Pool."

* * *

Irving Mosely, a lad from San Rafael, fished the Paper Mill near Camp Taylor, and took twenty-eight trout on the fly. All the fish were of small size, not running over eight inches in length.

* * *

Ben Blagg, a local angler, landed over thirty fish from the Paper Mill in the vicinity of Irvings and Camp Berkeley. The fish were rising readily to a fly of dull plumage, he says, and a blue dun caught the majority of his trout.

GOOD CATCHES IN SOUTHERN CALIFORNIA.

The biggest and most successful trout season opening in the history of Southern California took place on Monday. Estimates varied as to the number of fishermen who whipped the streams on the opening day, but over 7,000 licenses had been issued in that section up to Saturday and the list was far from complete, with reports to come in from many points and on Saturday's sales at the local sporting goods stores. In all probability there were more than 9,000 scattered along the banks of the trout streams and lakes, and the majority got what they went after—trout.

Comparatively few of those who went out Saturday or Sunday planned to return on Monday, but will stay on for a few more days of sport. The majority of the reports from all points indicated that the fish were plentiful and biting well. The few poor reports which did come in apparently came from fishermen of little experience, for the more experienced came in with limit catches and many big fish early in the day.

Among the prominent anglers who were at Pine Knot were Bernal Dyas, Louis Nikrent, N. T. Powell, city treasurer of Los Angeles; H. S. Wood and J. M. Bohanan, who drove up in "Cactus Kate," Hugh McDowell and daughter; Mr. and Mrs. Dwight Lefferts of Redlands, who entertained Mr. and Mrs. Russell Burrage of Boston; Mont. P. Chubb of Redlands, Mrs. W. M. Merriman, and Mrs. F. A. Rowe; A. S. (Duffy) Swartz and Walter Leeds of Los Angeles; Fred W. Sewell and James L. Burley of Los Angeles, and others. The Cactus Kate party left at eight o'clock with three limits.

* * *

Knights Camp, Bear Valley, May 1.—More fish were brought into Knight's Camp this morning than ever before and the largest crowd of anglers who have ever helped open the trout season was present.

Owing to the high wind and rough water, the lake fishing was poor but the angling in Bear Creek and Van Duzen Creek was above the average. Among those who visited Knight's Camp were T. J. Beaudet, the racing driver; E. T. McConners; Fred Thatcher of the Tufts-Lyon Arms Co., Joe Waddell and J. H. Clayton; James J. Jeffries, Clarence Kolb, Mel Nordlinger, Dr. Moore and Si Myrick; Billy Cline and party; Mr. and Mrs. McGue and party; Joe Strosser, Joe Ingersoll and party; Charles Reed and party; Tom Nicholson and party; George Clarkson and party; W. N. Palmer and party; Don Smith and party; Mr. and Mrs. Robert Cathcart, Mr. and Mrs. Charles Monahan, Jack Lankershim and Mrs. C. N. Goodhue; Dr. George Holcomb and party; Will Gunnison; L. Holland; Charles Wagner; W. J. Hughes; William Algers; U. W. Hall and others.

SCHOOL CHILDREN GO FISHING.

Santa Cruz, May 1.—The Sunday salmon catches: William Silva 30, William Johnson 15, O. Bedell and party 4, A. H. Raht of San Francisco 9, Carrol Uhden caught 200 pounds and Ed. Rhodes 100 pounds.

Millions of tiny shrimps and squid are in the bay at present and darken its waters. This is unusual on this side of the bay.

A fire has been raging in the woods back of Cowell's lime kiln.

The schools closed today for the opening of the trout season and the streams were all lined with fishermen, especially the San Lorenzo and tributaries, Soquel creek and the branches and the coast streams.

The finest catch brought to town was by Van O'Lind, who was in by 9 o'clock. He had 28 fish, which weighed 22 pounds. The largest was 22 inches and weighed 4¾ pounds. The smallest was nine inches long and the rest were from ten to twelve inches.

At Brookdale there were many fishermen. Norman Kooser of San Jose had 37 before breakfast, two of which weighed two pounds. His wife had 41 and Mrs. Clara Staffler of San Jose 47. Mrs. J. F. Helms, who was with the party, caught the limit.

C. H. MacBride of San Jose also succeeded in getting the number allowed by law.

Jack Sinnot, a lad, caught a ten and 11-inch trout in a small stream in the city limits, and Randolph Mayo a 1¼-pound fish. Other catches reported were: Mrs. F. Shebley 38, C. J. Dake the limit, including a 19½-inch fish, weighing 2 pounds, and J. F. Hill 50.

The fish are large this year, the water clear and much of the fine fishing is due to the season opening a month later.

* * *

Salinas Club.—Shooting in great form, Dave McFadden took first honors in the big prize shoot of the Salinas Rodeo Gun Club Sunday at Sherwood Park when he made a 48 out of a possible 50, taking a handsome Ford & Sanborn Company's fishing rod for his first choice of prizes.

There were two professionals, Rickelson of the Winchester Arms Company, shooting 44, and Janes of the DuPont Powder Company, shooting 39.

Next Sunday the gun club at Watsonville is to stage a big shoot, and the Salinas members have been invited to attend. Watsonville, Hollister, Monterey, San Francisco, San Jose, were among the outside places represented at the shoot Sunday.

The scores, at 50 targets, were as follows:

D. McFadden 48, Jim Douglas Jr. 46, Charles McFadden 44, B. Varian 44, Ashley Walker 43, Roland Vierra 42, F. Brewington 42, F. Tholcke 42, F. Morebeck 42, ArRt Horton 41, F. Johnson 41, F. Pura 41, Phillips 39, Earls 37, Pete Breschini 37, Jenkins 36, Henry Gross 36, Earl Horigan 34, V. Massera 34, H. Brewington 32.

Jim Douglas, Jr., and Dave McFadden made runs of 25 straight during the shoot, while Douglass in a special shoot of 25 birds, made a clean score after the big shoot.

Following the shoot and the distribution of the prizes, many of the shooters left immediately for the streams nearby, to take in the first day's trout fishing on Monday morning.

FLY-CASTING AT STOW LAKE.

Two new club records were established by members of the San Francisco Fly Casting Club in the Saturday and Sunday medal contests at Stow Lake. On Saturday J. F. Burgin's score of three demerits in heavy tackle accuracy established a brand-new performance. Walter D. Mansfield set a new figure in delicacy and accuracy, with a score of 2½, leaving something for the casters to shoot at in the future.

The officers on Saturday were Stanley Forbes, P. W. Shattuck and H. A. Thomsen, Jr., judges; F. J. Cooper, referee; Charles E. Hills, Jr., clerk. On Sunday P. W. Shattuck, F. J. Cooper and Stanley Forbes officiated as judges, C. H. Kewell, referee, and Charles E. Hills, Jr., as the clerk. The scores:

* * *

The boys were pleased to see our old friend James J. Maynard Jr. out at the traps.

Trade Notes.—An interesting shoot was held recently by the San Jose Blue Rock Club. Tony Prior, shooting Arrow "Speed Shells," won high general average, missing but three of his 100 birds.

J. Ball and J. H. Noel won first and second places respectively at a shoot held recently by the Nashville (Tenn.) Gun Club. Both these gentlemen shot the perfect shooting combination of Remington pump gun and UMC shells.

THE FARM

FEEDING ROOTS.

The feeding of sugar beets, mangels, carrots, turnips and other succulent roots has never gained the favor in this country that it has in some European countries where great excellence has been secured in various types of farm animals. Our farmers have not felt that they need to furnish such feed to their livestock and have favored feeds requiring less labor to produce and place before the stock. Of late years silage has been found to add the desired succulence to the livestock ration. Where good silage is not available, however, farmers should not overlook the advantages of feeding roots.

The common run of roots contain from 70 to 90 per cent water, and the proportion of real food in roots is low when compared with alfalfa hay or grain, but the benefits from feeding roots are not so much in the food contents of the roots as in the effect they have on the balance of the ration and the favorable condition they effect on the organism of the animal.

Fed to dairy cows during the winter months roots increase the milk flow and assist in keeping the hard working digestive organs in prime condition. Fed to sheep with a fattening ration the benefits are readily apparent as the dangers of constipation are obviated and a relish for the balance of the ration is maintained. Care should be exercised in feeding roots to horses, particularly horses that are being worked, as the laxative effect will be found objectionable. A few carrots each day, however, will be greatly enjoyed by the horse and good will result.

For hogs and cattle being fattened it is well to start the fattening period with a liberal supply of sugar beets, mangels, or possibly, turnips, as it will be found that better results will be had from the high priced concentrater used in the latter part of the feeding period after the roots are to a great extent taken from the ration.

Experiments have shown that the flesh of animals fed heavily on roots is much softer than that of animals not receiving succulent food, and on that account there is objection on the part of some people to feeding roots. It will be found, however, that if the feeding of roots is properly regulated as to quantity and gradually decreased as the feeding period advances there will be no objection to this feed on account of making soft meat.

Because of the softening effect roots may have on the flesh of animals, they are particularly valuable when fed in proper amounts to brood sows, mares, ewes and cows as the pliable flesh appears to be a condition favoring the easy birth of lusty young animals.

Don't try to make a full ration of roots alone; use them to supplement the high priced feeds.

Don't be misled by statistics showing that more feed units may be secured at less cost by growing grain or forage than is possible by growing roots. As stated, the main benefit from feeding roots is the effiency given to other and high priced feeds and the good effects of succulent food on the digestive organs of the live stock.

If you are not in position to furnish your stock with good silage you should plan to grow some roots to add to your feeding rations next winter.—I. D. O'Donnell.

Harrows, disks and also cultivators should be looked over carefully. Dull harrows are very inefficient tools to use. The blades of the disk should be sharpened and the bearings should not be neglected. Renew them when necessary. Dull shovels on cultivators cannot be expected to do efficient work.

The right kind of a dairy cow will repay with interest every cent invested for her comfort—for warmth, light, ventilation and feed, and if not comfortably housed her returns will be cut down in proportion to her discomfort.

Look upon the bright side of life. In farming look upon the irrigated side where things are green and growing. The only guarantee of a crop every single year is water on the land.

ACCESSIBLE TROUT STREAMS

Anglers devoting their week ends to rod and reel should not overlook the streams of Marin and Sonoma counties, accessible at small expense but assuring a day of rea lsport, and a basket of fish.

Good streams within walking distance of Lagunitas, Point Reyes, Duncan Mills, Cazadero, Glen Ellen and Cloverdale.

Mendocino, Humboldt, Trinity and Lake Counties abound with streams where large fish are plentiful and await the angler.

The Lower stretches of the Eel River in Humboldt County afford the angler the greatest sport and those content with fly fishing for the gamey steelhead should plan their outing to visit the famous Greigs, Fortuna, Van Duzen or Weymouth pools when the steelhead are running.

For Greatest Satisfaction Use
DOUBLE SERVICE Automobile Tires
Guaranteed 7,000 Miles Service
Absolutely Puncture proof
Double Service Tires are made double the thickness of the best standard make tires.
This 100% greater wearing surface naturally gives that much more mileage and service. The average of 12 miles of tough fabric and one inch surface tread rubber makes these tires *absolutely punctureproof*.
These tires excel all others for use in the country over rough and rugged roads as well as on hard pavements. They are as easy riding and resilient as any other pneumatic tire—the air space and pressure being the same.
They are the *most economical* and "care free" tires made and are used where tires must be depended on and tire troubles cannot be tolerated. Many *Double Service* style tires are in use in the U. S. government and European War service.
Our output is limited to a certain amount, but for a short time we offer the following reduced special prices as an Introductory Offer:

PRICES

	Tires	Tubes		Tires	Tubes
30x3 in.	$ 8.60	$2.80	36x4 in.	$17.45	$4.65
30x3½ in.	10.85	3.10	35x4½ in.	21.20	5.60
32x3½ in.	12.75	3.20	36x4½ in.	22.50	5.75
33x4 in.	15.75	4.20	37x4½ in.	23.60	6.20
34x4 in.	16.70	4.35	37x5 in.	26.30	6.60

All other sizes not included in above list also furnished. Non-skids at 10% additional.
Terms: Payment with order at above special prices, a 10% discount allowed on orders for two or more tires. All personal checks must be certified.
Try these tires now and be convinced of their very high qualities. Sold direct to the consumer only.
Descriptive folder upon request. Write for it.

A "365" Day Liniment

YOU ARE SAYING TO YOURSELF—"If I only knew of something to stop that Backache—help my Rheumatism—cure my Neuralgia, I would send and get it at once."
Get It. Relief. Gombault's Caustic Balsam will give you immediate relief. A Marvelous Human Flesh Healer and a never failing remedy for every known pain that can be relieved or cured by several applications. Thousands testify to the wonderful healing and curing powers of this great French Remedy. A Liniment that will soothe, heal and cure your every day pains, wounds and bruises.

Gombault's Caustic Balsam
The Great French Remedy
Will Do It

It Helps Nature to Heal and Cure. Penetrates, acts quickly, yet is perfectly harmless. Kills all Germs and prevents Blood Poison. Nothing so good known as an application for Sores, Wounds, Felons, Exterior Cancers, Burns, Carbuncles and Swellings.

"I had a bad hand with four running sores on it. The more I doctored the worse it got. I used Caustic Balsam and never needed a doctor after that." —Ed. Rosenburg, St. Ansgat, Ia.

Mrs. James McKenzie, Edina, Mo., says: "Just ten applications of Caustic Balsam relieved me of goitre. My husband also cured eczema with it, and we use it for corns, bunions, colds, sore throat and pain in the chest."

A Safe, Reliable Remedy for Sore Throat, Chest Cold, Backache, Neuralgia, Sprains, Rheumatism and Stiff Joints. Whenever and wherever a Liniment is needed Caustic Balsam has no Equal.

Dr. Higley, Whitewater, Wis., writes: "I have been using Caustic Balsam for ten years for different ailments. It has never failed me yet."

A liniment that not only heals and cures Human Flesh, but for years the accepted Standard veterinary remedy of the world.

Price, $1.50 per bottle at all Druggists or sent by us express prepaid. Write for Free Booklet and read what others say.

THE LAWRENCE WILLIAMS CO., Cleveland, Ohio

Makes Them Sound SMITH'S WONDER WORKER Keeps Them Sound

Allays fever and inflammation at once, this must be done to effect a cure. UNEXCELLED AS A REMEDY for bone and bog spavins, curbs, splints, ringbones, capped hocks, shoe boils, wind puffs, thoroughpins and bunches of all kinds, bowed, strained and ruptured tendons, shoulder, hip and stifle lameness, weak joints, sweeny, cording up, throat trouble and rheumatism. Relieves pains and soreness without loss of hair or a day's let up. As a leg and body wash it has no equal, invigorates and restores the distressed horse between heats and after hard workouts.

WANTED TO BUY—One each, yearling by Vernon McKinney, Wilbur Lou, Prince Ansel, and some other good stallion. Entries in futurity stakes preferred. Give lowest price, breeding, particulars, where colt can be seen. Address
F. W. KELLEY,
Care Breeder and Sportsman.

FOR SALE.—MONTBAINE 48667, by the great stallion Moko 24457, dam Krem Marie, one of the greatest daughters of Kremlin. Montbaine is a bay horse, sixteen hands, eight years old, a high-class stallion in every respect. One of the best bred and best individuals on the Pacific Coast. For price and particulars address
W. SLOANE, Hollister, Cal.

FOR SALE.

ELFREADA D., bay mare with black points. 9 years old, weighs 1080 lbs. Paced last year on half-mile track in 2:12 and on mile-track in 2:09 with only three months training. This mare can show two minute speed. Sired by Diablo 2:09¼, dam Bell Onward 2:14. This mare is guaranteed to be perfectly sound and not a blemish on her. Has no mark; is in training at present and in good condition. For price and particulars address Mrs. F. H. HERMAN.
2805 Rucker Ave., Everett, Wash.

FOR SALE.

Very handsome, splendidly matched team of blacks. Sired by Expressive Mac 2:25½, dam the grandam of Clara Mac 2.01½. Team weighs 2535 pounds, height 16.3, sound. Full brother and sister, eight and nine years old in May. Stylish, high-headed, fine action. Intelligent, kind disposition-a child or a lady can handle them. Used for a hearse team for four years. I think it is the best team in California for that business or for a fancy large team for any purpose. Must be seen to be appreciated. $500 was offered and refused for the gelding to go to the Chicago sale three years ago. Will pay fare to anyone who will come and see this team if they are not as represented. Address J. H. NELSON.
Phone 40 F 5. Box 361, Selma, Cal.

C. E. HEALD, Secretary.
Office 1215 Van Ness Ave., San Francisco, California.

RACE TRACK FOR SALE.

The Ukiah race track, located a little less than a mile from the Court House at Ukiah and bounded by the State Highway on the west, the county road on the south, and the Northwestern Pacific Railroad nearly the entire length on the east side of the track. The property consists of twenty acres. Fifty-nine good box stalls, good grandstand, fencing in good order, and one of the best half mile tracks in the state. An excellent winter track and an ideal place to work horses during that season. Plenty of adjoining drives for jogging horses. Two wells on the premises as well as water from the city water works, with tanks conveniently arranged for sprinkling.

This is the only race track in Mendocino county and the location of the county fairs. Ukiah is the county seat and has a population of about 3000, is in a most fertile valley in which all kinds of fruit, vegetables, hay, grain and hops are grown. Has excellent water; no malaria or mosquitos. It has paved streets, good sewerage, and splendid gas and electric light works. There are many standard and thoroughbred horses in this county and the people are a race loving lot. This property is offered for sale at a less price than adjoining property is held at. For terms and further particulars address
F. W. KELLEY,
Care of Breeder and Sportsman.

FARMS FOR SALE
Choice Land in Idaho

Lewiston, Idaho, is situated at the forks of Clearwater and Snake rivers and has transportation to the coast.

960 acres 7½ miles from Lewiston, Idaho, 4½ from Lapwai, Idaho, on main traveled road, all in cultivation except about 15 acres, all level land, just a little rolling, 320 acres of fall wheat in, 225 acres fall plowed for spring crop, about 30 acres in alfalfa. All fenced and cross fenced. Two good springs with big cement water troughs, well, windmill and cement reservoir, water piped to house, 7 room house, hot and cold water and electric lights. Large horse barn with hay mow in the center, electric lights in barn; cow barn with two box stalls; hog pens, shade trees, chicken houses, blacksmith shop, wagon shed, granary, outdoor cellar with bunk house overhead. $85 per acre; will take one-third down, time on balance to suit purchaser, at 7 per cent interest. One-third of crop goes with place if sold any time up close to harvest. Mild climate, can raise all kinds of fruit, grain and vegetables. Wheat in this country goes from 35 to 65 bushels per acre, barley 40 to 80 bushels per acre.

320 acres 4½ miles south of Vollmer, Idaho, 275 acres in cultivation, balance in pasture and timber, farm land lays practically level, one-third of crop goes with place if sold before harvest. Some fall wheat already sown. All fenced and cross fenced. Quarter section of it fenced hog tight; good four-room house, wood shed, and out of door cellar, nice grove around house, well at house, fair stabling and out buildings, spring and spring creek close to barn, three springs on place. Price $70 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

238 acres 4½ miles from Lewiston, Idaho, 175 acres in cultivation, 25 more can be cultivated, balance good bunch grass pasture, fenced and cross-fenced, good spring creek runs across place, small house, station on place for Johnson R. R., two grain warehouses at station. Price $70 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

160 acres of timber land, good farm land when timber is cleared off, all can be farmed except about 2 or 3 acres. Good timber, yellow pine and fir. Price $4000. 40 miles from Lewiston, Idaho. Well located to log off.

240 acres 6 miles from Asotin, 12 miles from Lewiston, Idaho, about 75 acres in fall wheat, about 75 acres more can be cultivated, balance in bunch grass pasture, two springs, small house, all fenced. Price $40 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

5—2:15 class, trotting..... 900
6—2:10 class, pacing 900

THIRD DAY

7—Two-year-old pacing division, Futurity Stake No. 14 (closed 1913) $1100
8—Three-year-old trotting division, Futurity Stake No. 13 (closed 1912) 3300
9—2:13 class, pacing..... 900

FOURTH DAY

10—2:12 class, trotting.....$ 900
11—Free-for-all class, pacing.... 900
12—2:20 class, trotting..... 900

Guaranteed Stakes Nos. 2, 3, 5, 6, 9, 10, 11, and 12 $900 each, three heats, money divided $300 to the first heat, $300 to the second heat, $300 to the third heat. Money in each division divided 50, 25, 15 and 10 per cent. A horse having won the first two heats and drawn or distanced in the third heat shall not lose position in the summary.

Nominators have the right of entering two horses in one ownership in any race by the payment of two per cent. additional, but only one of the two horses so entered to be started in the race, and the starter is to be named by 5 o'clock p. m. the day before the race is to take place.

Entrance fee five per cent. to start, three per cent. due at time entries close, two per cent. additional if not declared out on or before July 1, 1916. Declarations must be paid in full at time of declaring out. Usual five per cent. additional from winners in all races except Futurity Stakes.

Horses are to be named and eligible when entries close to the classes in which they are entered.

The Association reserves the right to declare two starters a walkover. When only two start they may contest for the entrance money paid in, divided 66 2-3 per cent. to the first and 33 1-3 per cent. to the second horse. A horse distancing the field shall be entitled to first and fourth money only and in no other case will a horse be entitled to more than one money.

The Association reserves the right to change the hour and day of any race, except when it becomes necessary to antedate a race, in which instance the nominators will receive three days' notice by mail to address of entry.

The right reserved to reject any or all entries and declare off or postpone any or all races on account of weather or other sufficient cause.

Entries not declared out by 5 o'clock p. m. the day preceding the race shall be required to start and declarations must be in writing and made at the office of the Secretary at the track.

Racing colors must be named by 5 o'clock p. m. the day preceding the race, and must be worn upon the track, in all races. Colors will be registered in the order in which they are received, and when not named or when said colors conflict, drivers will be required to wear colors designated by the Association.

The Association reserves the right to start any heat after the fourth score, regardless of the position of the horses.

All Stakes are guaranteed for the amount offered and are for the amount offered only.

MEMBERS.

Under the By-Laws of this Association, none but horses belonging to members of the Association are allowed to start in the regular races at its meetings. Membership fee $25, which includes annual dues for the first year and entitles members to all privileges. Those who are not members of the Association should send membership fee at the time of making entries.

Member of the National Trotting Association.
Address all communications to the Secretary.

E. P. HEALD,
President.

BEAUTIFUL BELVEDERE

LOTS FOR SALE

CORINTHIAN ISLAND Subdivision to Belvedere is the most beautiful spot on the shores of San Francisco Bay for a suburban home. It commands an extensive view of the City of San Francisco, Alcatraz and Angel Islands, Raccoon Straits, San Francisco Bay, Richardson's Bay, the Berkeley shore, beautiful Belvedere and Mt. Tamalpais. It is in Marin County, directly opposite San Francisco, and forms the eastern shore of Belvedere cove. It has a naturally terraced, sunny, western slope that is well adapted for many choice residence sites, every one affording most picturesque views of the bay and mountain. It is protected from the prevailing western trade winds in summer by Belvedere Island, and from the southerly storms in winter by Angel Island. The soil is fertile and part of the island is well wooded.

It is less subject to fog than any other place near San Francisco. The summer fog, as it rolls in from the ocean, splits on the western slope of Sausalito, part of it flowing in a line with Angel Island towards the Berkeley shore, and part of it along the southern slope of Mt. Tamalpais, leaving Belvedere, Corinthian Island and Raccoon Straits in the bright sunlight, while the fog banks can be seen as a white wall both to the north and the south.

There is very little available land about the shores of San Francisco Bay that is desirable for homes, especially for those who love boating and kindred sports. The Alameda and Contra Costa shores of the bay are the lee shores and receive the full brunt of the boisterous trade winds which lash the shoal waters near the land into muddy waves, making boating both unpleasant and dangerous. To the north of the city and in Marin County the land from Sausalito to the entrance of the bay is a Government reservation and will never be placed on the market. The shores of Richardson's Bay are not at present convenient to boat service and, aside from Belvedere and Corinthian Island, there is little or no land near any ferry landing that possesses the natural advantages, improvements and possibilities that are offered on Corinthian Island. Concrete roads, pure water, telephone service and electric light wires are already installed. It is only ten minutes' walk from any point on the property to Tiburon boats, and but forty-three minutes' ride to the foot of Market Street.

On the point of Corinthian Island the Corinthian Yacht Club has had its home for many years, and on any summer day the white sails of its numerous fleet add to the charming scene, as the trim yachts glide about the cove. Excellent fishing of all kinds for bay fish, including salmon, the gamey striped bass, rock fish and the toothsome silver smelt, is to be had in the cove. There is probably no spot so accessible and in such close proximity to any large city in the world that offers the attractions of climate, magnificent scenery, fishing and boating as will here be found.

Harpers Weekly and The Breeder and Sportsman

$5.50 WORTH FOR $3.25

Breeder and Sportsman

One Year, 52 Copies, Regular Price $3

THE BREEDER AND SPORTSMAN is the oldest weekly journal devoted to the Horse west of Chicago, having been established in 1882. This interest, together with the Kennel, Gun, Fishing, Coursing and kindred sports receiving the most attention in its columns; together with Agricultural and Dairying Departments, under whose headings especial attention is paid to the breeding, etc., of Cattle, Sheep, Hogs, Poultry, and all other animals connected with stock raising.

As an advertising medium to Racing Associations, Horsemen, Stock Breeders, Manufacturers of Sulkies, Carriages, Wagons, Agricultural and Dairying Implements and Machinery, Sporting Goods, Fanciers, Stock Foods, and all others desiring to bring their wares to the attention of the classes to whose interests the paper is devoted within the field mentioned above, the BREEDER AND SPORTSMAN will be found indispensable.

Harpers Weekly

Six Months, 26 Copies, Regular Price $2.50

At no time has it been so evident to Americans as now, that the most important thing in the lives of all of us is the progress of the European War.

Next to your daily bread the war interests you most vitally. It may even come to be the most important part of your problem of living.

The periodical of greatest fundamental interest to you today is the one that can best report those phases of the war that come closest to your country and you.

Because of connections abroad and at home, HARPER'S WEEKLY is that publication.

As a critical commentary that presents inside facts, it is the necessary bridge for intelligent readers between the daily newspaper and the monthly review.

You want HARPER'S WEEKLY now. You can get it now on trial at a remarkable reduction.

Send $3.25 Now and Get Them Both

THIS OFFER is made to all who will send us $3.25 before May 31st, 1916, whether for extension of subscription, renewal of subscription or a new subscription. Address:

REID'S REMARKABLE RECORD

Adds Further Evidence of the Superlative Quality of

Peters SHELLS

Shooting at Registered Tournaments during the past four years L. H. Reid of Seattle, has made a phenomenal Record of consistent High Scores

1912—	2115 ex	2200,	96.14%, Pacific Coast High General Average.
1913—	3843 ex	4005,	95.95%, Pacific Coast High General Average.
1914—	2146 ex	2225,	96.44%, Professional Average for United States.
1915—	2482 ex	2550,	97.33%, Pacific Coast High General Average.
Total,	10,586 ex	10,980,	96.46%

During the above four years, Mr. Reid has shot at nearly 30,000 Registered and non-registered targets, breaking an average practically equal to the above. In accomplishing these results, he used about two-thirds TARGET (medium grade) and one-third IDEAL (high grade) shells, all with

"STEEL WHERE STEEL BELONGS"

THE PETERS CARTRIDGE CO., — Pacific Coast Branch, — 585-587 Howard St., SAN FRANCISCO, CAL.

.....And Now For The Traps!

These are the days when Mr. Enthusiastic Sportsman's blood runs just a little quicker. He's cleaning and polishing that autoloading or pump gun — smelling the powder from afar. He's getting ready to "start something" over at the trapshooting club. He's going to make last year's scores look cheap.

This sportsman—if he's keen for RESULTS—will select Remington UMC ammunition. He will use "Arrow" or "Nitro Club" Speed Shells exclusively. These shells are reinforced with a steel lining that puts all of the force back of the shot. Moreover, if he's in the market for a gun, he will choose a Remington UMC Autoloading Shotgun or Pump Gun. They're dependable, accurate, well-balanced arms. Ask the dealer showing the Remington UMC Red Ball Sign of Sportsmen's Headquarters.

Sixteen of the twenty-three GRAND AMERICAN HANDICAPS held since 1893 have been won by shooters using either Remington UMC guns ar ammunition, or both.

The 20th Indoor Championship Match and Prize Shoot

WON WITH

WINCHESTER

.22 Caliber Rim Fire Cartridges

The winning of this — the most important indoor shooting of the year — means more than simply another addition to the long list of triumphs to Winchester — the **W** brand of guns, ammunition, etc. It is convincing proof that the long and firmly established policy of Quality First, followed so religiously in the manufacture of Winchester goods, has not been relinquished an iota, notwithstanding the unparalleled demands made upon the Winchester company for its products during the last twenty months. It plainly shows that, no matter how unusual the condition, Winchester goods can always be relied upon. The big winners at the Indoor Shoot were as follows:

100 SHOT CHAMPIONSHIP MATCH

Won by L. G. Buss, score 2473, with Winchester cartridges and Winchester Telescope Sight. All of the first six contestants used Winchester Telescope Sights, and four of them Winchester cartridges.

RING TARGET CONTINUOUS MATCH

G. W. Chesley and H. Hunziker, shooting Winchester cartridges, tied with two other shooters, making five 75s—perfect score. Three of the four contestants in this match used Winchester Telescope Sights.

ZIMMERMAN TROPHY MATCH

Won by G. W. Chesley. Second, H. Hunziker. Third, L. C. Buss. All shooting Winchester cartridges. Mr. Hunziker made a perfect target of 5 degrees in his string, and Mr. Chesley one of 6 degrees.

BULLSEYE MATCH

Won by S. Murphy with a target measuring 7 degrees. Second, J. J. Young with a 7½ degree target. Third, C. Zettler with an 8 degree target. Fourth, G. W. Chesley with an 8 degree target.
All four place winners used Winchester cartridges.

FOR RELIABILITY AND RESULTS USE THE **W** BRAND

PARAMOUNT PARKER GUNS

Mr. Woolfolk Henderson, an amateur, by scoring .9753% made the
HIGHEST OFFICIAL GENERAL AVERAGE FOR 1915

Look...

Mr. Lester German, a professional, by scoring .9742% made
SECOND OFFICIAL GENERAL AVERAGE FOR SAME PERIOD
CLEAN SWEEP ON DOUBLE TARGETS
Messrs. Guy V. Dering, S. A. Huntley and Woolfolk Henderson won
FIRST, SECOND and THIRD,
respectively, by scoring 9000%, 8666% and 8400%.

Read...

THE WORLD'S RECORD!!!
At Atlantic City Sept. 15 to 17 Mr Lester German broke all Tournament Records by scoring 647 OUT OF 650 TARGETS, with one run of 372 straight, which is longest for the year.
PARKER GUNS have won the Grand American Handicap 9 times out of 25 offers, once with 100 straight, only time made. Also 7 out of 9 Interstate Championship Events with highest scores ever made, twice with 198 x 200 at 18 yards rise.

Remember

PARKER PACIFIC COAST RECORDS
In California Mr. Henry Pfirrmann won the Pacific Coast Handicap and Mr. J. Foster Couts won the Championship of California.
In Portland, Oregon, Mr. P. H. O'Brien by scoring 241 straight made the record for the Pacific Coast.

If interested in small bore guns write for instructive booklet which will be sent free on request. For further particulars regarding guns from 8 to 28 gauge, address

TRAINING THE HOUND

A PRACTICAL TREATISE ON THE TRAINING OF FOX HOUNDS, BEAGLES, AND COON HOUNDS.

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; $1.50, postpaid.

OFFERS THE FOLLOWING

Guaranteed Stakes for Harness Horses

TO BE GIVEN AT THE

California State Fair, Sacramento, Sept. 2 to 9, 1916, inc.

ENTRIES TO CLOSE THURSDAY, JUNE 1st, 1916

ALL RACES THREE HEATS

SATURDAY, SEPTEMBER 2d.

No. 1. Occident Stake, 3 year old Trotters, about $2300.00.....(Closed)
No. 2. 2:14 Class Pacing $1000.00

MONDAY, SEPTEMBER 4th.

No. 3. State Fair Futurity, 3 year old Pacers, Guaranteed $1100.00..(Closed)
No. 4. 2:30 Class Trot 1000.00

TUESDAY, SEPTEMBER 5th.

No. 5. State Fair Futurity, 3 year old Trotters, Guaranteed $1400.00 (Closed)
No. 6. 2:20 Class Pace 1000.00

WEDNESDAY, SEPTEMBER 6th.

No. 7. Stanford Stake, 3 year old Pacers, Guaranteed $1000.00.....(Closed)
No. 8. 2:15 Class Trot 1000.00

THURSDAY, SEPTEMBER 7th.

No. 9. Free for All Pace 1000.00
No. 10. 2:09 Class Trot 1000.00

FRIDAY, SEPTEMBER 8th.

No. 11. Stanford Stake, 3 year old Trotters, Guaranteed $1500.00.....(Closed)
No. 12. 2:13 Class Special, Pace, horses with no records or slower than 2:20 not eligible 1000.00

SATURDAY, SEPTEMBER 9th.

No. 13. 2:20 Class Trot 1000.00
No. 14. 2:10 Class Pace 1000.00

Consolation State Fair Futurity Pace, for 3 year olds, Guaranteed $300.00 (Closed).
Consolation State Fair Futurity Trot, for 3 year olds, Guaranteed $400.00 (Closed).

Entrance and payments on these stakes will be due and payable as follows:—2% June 1st, 1% Aug. 1st, and 2% before five o'clock the night before the race.

GENERAL CONDITIONS.

ALL RACES THREE HEATS—Money divided 25% to the first heat, 25% to the second heat, 25% to the third heat, and 25% to the race according to the rank in the summary. Money in each division 50, 25, 15 and 10 percent. Should two or more horses be tied for first place at the completion of the third heat, such horses only shall contest in a fourth heat and money divided according to rank in the summary at the termination of that heat. A horse having won the first two heats and drawn or distanced in the third heat shall not lose position in the summary.

Nominators have the right of entering two or more horses in any race by the payment of 2% additional on each horse, but only one of the horses so entered to be started in the race, and the starter is to be named by 5 o'clock P. M. the day before the race is to take place.

ENTRIES TO CLOSE JUNE 1st, 1916.

Usual 5% additional from winners in all except Futurity Stakes, Occident and Stanford Stakes.

The Society reserves the right to declare two starters a walkover. When only two start they may contest for the entrance money paid in, divided 66 2-3% to the first, and 33 1-3% to the second horse. A horse distancing the field shall be entitled to first and fourth money only and in no other case will a horse be entitled to more than one money.

The Society reserves the right to change the hour and day of any race, except when it becomes necessary to antedate a race, in which instance the nominators will receive three days' notice by mail to address of entry.

The right reserved to reject any or all entries and declare off or postpone any or all races on account of weather or other sufficient cause.

Entries not declared out by 5 o'clock P. M. the day preceding the race shall be required to start and declarations must be in writing and made at the office of the Secretary at the track.

The Society reserves the right to start any heat after the fourth score, regardless of the position of the horses.

Any horse that started in 1915 without improving its record, equaling its record, and not winning a race, shall be entitled to one second.

Address all communications to the Secretary.

JOHN M. PERRY, President.

CHAS. W. PAINE, Secretary,
Sacramento, California.

$14,250 — 27th ANNUAL RACE MEETING — $14,250

of the

PACIFIC COAST TROTTING HORSE BREEDERS ASSOCIATION

to be given in conjunction with the District Agricultural Fair at

Santa Rosa, August 9, 10, 11 and 12, 1916

Entries Close Thursday, June 1st, 1916

All Races Except Colt Stakes Limited to 3 Heats,

TIME ALLLOWANCES.

1st. Horses that have started anywhere in 1914 or 1915 without winning a race shall be allowed one second for each year raced.
2nd. Horses that have started two or more times in either 1914 or 1915 without winning a race shall be allowed two seconds.
3rd. Horses whose winning race records were made prior to 1914 shall be allowed two seconds, provided they have not won a race in 1914 or 1915.
Time allowances must be claimed when entry is made; also it must be stated why the horse entered is entitled to time allowance under above conditions.

PROGRAM

FIRST DAY	SECOND DAY	THIRD DAY	FOURTH DAY
1—Three-year-old pacing division, Futurity Stake No. 13 (closed 1912) $1300	4—Two-year-old trotting division, Futurity Stake No. 14 (closed 1913) $1350	7—Two-year-old pacing division, Futurity Stake No. 14 (closed 1913) $1100	10—2:12 class, trotting.....$ 900
2—2:09 class, trotting..... 900	5—2:15 class, trotting..... 900	8—Three-year-old trotting division, Futurity Stake No. 13 (closed 1912) 3300	11—Free-for-all class, pacing.... 900
3—2:20 class, pacing 900	6—2:10 class, pacing 900	9—2:13 class, pacing..... 900	12—2:20 class, trotting..... 900

Guaranteed Stakes Nos. 2, 3, 5, 6, 9, 10, 11, and 12 $900 each, three heats, money divided $300 to the first heat, $300 to the second heat, $300 to the third heat. Money in each division divided 50, 25, 15 and 10 per cent. A horse having won the first two heats and drawn or distanced in the third heat shall not lose position in the summary.

Nominators have the right of entering two horses in one ownership in any race by the payment of two per cent. additional, but only one of the two horses so entered to be started in the race, and the starter is to be named by 5 o'clock p. m. the day before the race is to take place.

Entrance fee five per cent. to start, three per cent. due at time entries close, two per cent. additional if not declared out on or before July 1, 1916. Declarations must be paid in full at time of declaring out. Usual five per cent. additional from winners in all races except Futurity Stakes.

Horses are to be named and eligible when entries close to the classes in which they are entered.

The Association reserves the right to declare two starters a walkover. When only two start they may contest for the entrance money paid in, divided 66 2-3 per cent. to the first and 33 1-3 per cent. to the second horse. A horse distancing the field shall be entitled to first and fourth money only and in no other case will a horse be entitled to more than one money.

The Association reserves the right to change the hour and day of any race, except when it becomes necessary to antedate a race, in which instance the nominators will receive three days' notice by mail to address of entry.

The right reserved to reject any or all entries and declare off or postpone any or all races on account of weather or other sufficient cause.

Entries not declared out by 5 o'clock p. m. the day preceding the race shall be required to start and declarations must be in writing and made at the office of the Secretary at the track.

Racing colors must be named by 5 o'clock p. m. the day preceding the race, and must be worn upon the track, in all races. Colors will be registered in the order in which they are received, and when not named or when said colors conflict, drivers will be required to wear colors designated by the Association.

The Association reserves the right to start any heat after the fourth score, regardless of the position of the horses.

All Stakes are guaranteed for the amount offered and are for the amount offered only.

MEMBERS.

Under the By-Laws of this Association, none but horses belonging to members of the Association are allowed to start in the regular races at its meetings. Membership fee $25, which includes annual dues for the first year and entitles members to all privileges. Those who are not members of the Association should send membership fee at the time of making entries.

Member of the National Trotting Association.

WILBUR LOU 2:10¼.....Hemet Stock Farm, Hemet

Congratulations to the California State Board of Agriculture and its efficient Secretary, Charles Paine. The program of harness races this association announces this week for the annual fair in September is high class in every respect. $1000 purses are offered in every class on the three heat system, which will provide a splendid seven days of racing if the California horsemen now do their part and make liberal entries. While it is a fact that three or four of the largest stables of light harness horses will be taken east to race on the Grand and other circuits across the Rockies this year there are plenty of high class horses remaining here and perhaps the time will be just as fast on the State Fair track as if these "big stables" remained here to race. Certainly the chances of winning for those racing in California will be increased which should induce every owner of a good horse to see that he is named in his class at Sacramento on June 1st, the date on which entries close. Entries in the purses offered by the progressive associations in the East and Middle West were never more numerous than they are this year, which will give a boost to the game that cannot help but extend the revival to this coast. There will be six or seven weeks of good racing in California this year and it may lengthen out to eight or ten, as several good towns are contemplating holding meetings that have not yet decided on dates. However the State Fair and the Santa Rosa Fair will be the big events and horsemen should not delay making entries at both. Their dates for closing are the same—June 1st.

The famous race mare Bubbling Water, probably the most popular mare that ever raced over the Emeryville course, died at San Jose last week. She was owned by Joseph & Molera of San Francisco and was bred by Col. D. M. Burns at the Candelaria Stock Farm, Sonoma county. Her sire was Col. Wheeler and her dam the famous race winner Shasta Water by imp. Maxim, second dam Tyranny by imp. Great Tom, third dam Moselle by Jack Malone, fourth dam Gazelle by imp. Albion. Bubbling Water won at nearly all distances and was so highly prized by her owners that they once refused an offer of $20,000 for her.

At a three days auction of trotting and pacing bred horses, held in Ohio last month and at which no really high class horses were offered, an average of $243.50 was obtained for the 289 head sold. As the high price was $1010, the average was a good one. Homer S. 2:11¼, a gray pacing gelding that has raced for two or three years and is eight years old was the horse that brought the top price.

Mr. W. H. Gocher has been unanimously re-elected Secretary-Treasurer of the National Trotting Register Association for the ensuing term of four years.

The San Francisco-California Driving Club has conferred an honorary life membership upon Mr. John A. McKerron of this city, a deserved tribute.

A LETTER FROM THE BOARD OF REVIEW.

New York City, May 2, 1916.

To Members of the National Trotting Association:

As your officers and trustees, we deem it but fair to ourselves and all concerned that a brief statement be made of the actions of the last Congress, in view of certain press comments.

The Board of Review at its December meeting, by Resolution duly passed, instructed the then President of the Association to appoint all Committees from the officers of our members, being between two and three thousand in number, thereby giving the President the right to appoint the Committees from the officials of the Associations which were members of the National Trotting Association, they being the stockholders of this Association, and for whom the Board of Review are its Directors and Trustees.

The then President disregarded the action of the Board of Review and defied its power, relying upon the fact that the prior Congress had authorized him to appoint Committees and that, therefore, the Board of Review was powerless to direct the President in the appointments.

In the absence of an express authority to the contrary, the President would necessarily be obliged to appoint all Committees from the members just the same as Boards of Directors of private institutions appoint their committees from its members or stockholders.

The By-Laws in force at the time the authority was given to the President to appoint the Committees contain a provision that the Board of Review should have the power and authority to "exercise all the powers of the corporation" and such Board of Review should have "both original and appellate jurisdiction," and further, under Article IX, Section 4 of the By-Laws, the Board of Review shall "exercise all powers of the corporation; and upon it is conferred the management, direction and control of all the business and affairs of the corporation." This we believe sufficient to satisfy any fair minded person that the Board of Review had the right to pass the resolution in question.

Was it not, we ask you, the proper and right action to take to provide that those persons who have taken enough interest in the success of the light harness horse to give the meetings and become the officers of the Associations that they should be named upon those committees? If the officers of the different members, who are in the active control and management of the different Associations do not know what rules they need and are not qualified to become members of the different Committees, including the Rule Committee, then we are badly deceived and would of necessity have to conclude that they are incompetent officials. This is not our experience.

Complaint has been made of the treatment given to the Committees named by the ex-President at the Congress. The Committees were appointed by the President in direct violation of the Resolution of the Board of Review. The Congress could not recognize the right of the President to defy and disregard the orders of the Board of Review, and to have recognized those Committees would have been putting the seal of approval upon the violation of the Board's order by the President. With what consistency could the Association ask persons having business with the Board of Review to obey the orders and decrees of the Board when its President would not obey them? That would lead to but one end, that of lawlessness.

No fair minded person could take exception to the provisions of the Resolution and therefore, the Congress could not do otherwise than to refuse to recognize the Committees thus appointed in violation of the orders of your Board of Directors.

Not recognizing the Committees did not in any way deprive the individual members of the Committees who were delegates from participating in the Congress nor in presenting the reports of the Committees to the Congress, but all members were permitted the fullest expression and consideration by the Congress.

The action of the Board of Review at its present session should be a complete and satisfactory answer to all criticism concerning the attitude of this Association to the Year Book, and we leave that action to speak as our complete reply and answer to any alarm regarding the alleged unfriendly attitude of this Association to the Year Book.

There need be no fear upon the part of any one that the National Trotting Association will not carefully protect the interests of the light harness horse, both in his breeding and development.

This Association is the parent one and always will be, and our purpose is to be active but conservative and at the same time progressive in its truest sense.

We have confidence in the Associations we represent and the officers in control and are willing to be judged by our acts.

By order of the Board of Review,

JOHN C. WELTY,
President.

The feat of the Eleventh cavalry in Mexico last month, if correctly reported, ought to put an end to criticisms of Uncle Sam's army horses and horsemen. It is stated that the troops under Major Howze covered 570 miles in twenty-one days through one of the worst stretches of country in North America. The horses that made the performance were supplied by dealers to the War Department for something less than $150 each.

SAN FRANCISCO-CALIFORNIA DRIVING CLUB.

At the annual meeting of the above named club held on Tuesday evening of this week the following officers were elected for the ensuing year:

President, G. J. Giannini; Vice-President, J. C. Welsh; Treasurer, Dr. I. B. Dalziel; Secretary, W. J. Kenney; Sergeant-at-Arms, William Malough. Board of Directors — T. Sexton, Bert Edwards, J. J. Ryan, J. M. Kidd.

During the evening Mr. Adolph Ottinger took the floor and addressing his remarks to President Giannini, who had just been re-elected, in an eloquent speech presented him on behalf of the members of the club with a handsome gold stop watch, Mr. Giannini responding with much feeling.

It was then decided to hold the opening matinee of the club on Sunday, May 14th, at the Golden Gate Park Stadium track and the following horses were named for the different events:

First race—2:18 Pace. For Claremont Hotel Cup:
H. Campodonnci's King Pointer.
G. J. Giannini's Bradmont.
Geo. Conlan's Little Jack.
E. T. Ayre's Dr. Davidson.
J. W. Kidd's Senator H.

Second Race—2:30 Pace. For S. F.-Cal. Driving Club's trophy:
Jackson Martin's John Campbell.
J. Vermet's Cookie.
L. A. Gidelow's Black Mack.
A. P. Scott's Little Dick.

Third Race—Free-for-All Pace. For G. J. Giannini's trophy:
William Malough's Emma M.
J. M. Kidd's Pointer Bell.
B. Cohn's Mabel Dillon.
W. J. Kenney's W. J. K.
G. P. Machado's Bold Harry Aerolite.
Joe Ryan's Hamburg Bell.

Fourth Race — 2:30 Trot. For John Nowlan's trophy:
M. Ford's Minequa.
J. M. Kidd's Alto Trix.
A. Gravanetti's Yoncalla.
Wm. Newman's Dolly Casine.

The officers of the day will be: Judges, John A. McKerron, A. Ottinger, Dan Keating; Timers, J. A. Wilkins, Fred Clotere, F. P. Lauterwasser, Sr.; and Starter, J. J. Ryan.

A DESERVED TRIBUTE.

The following is from the New York Trotter and Pacer of May 4th and will be read with pleasure and approval by all California horsemen:

"The announcement that Budd Doble has resigned from the management of the Hemet Stock Farm, in southern California, and from all connection with racing and breeding save that of sentiment, deserves a passing notice, at the least. If any man has ever won the right to retire and enjoy the laurels of an active, honorable, well spent life it is Budd Doble. For more than fifty years his name has been one more closely associated with harness racing, more widely known to every man with even the most remote interest in the trotting horse, than any other during that long period. Contemporaneous with Hiram Woodruff, Dan Mace and others among the giants of the sulky in the foundation days of the sport, he has outlived them all and reached a higher pinnacle of fame than any who preceded him, any who have been coeval with him or any who will probably succeed him. To merely enumerate the famous horses which have been trained and driven to world distinction by his hands would entail many hours of research and require many columns of space. It will suffice to say that they embrace Goldsmith Maid, Dexter, Nancy Hanks, and many others whose names will endure as long as the American trotter exists. But better than all—better than the renown he has reaped and any riches that he may have garnered, is the priceless reputation he has achieved in the varied experiences of his career. His name has been a synonym for good repute in harness racing, his example an inspiration to all who would dignify the sport and make it meet the conceptions of right-minded people. His fame is broad and high and will endure because it has been wrought on right principles. In half a century of active participation in racing not a stain has dimmed the glory of his achievements, not a blot has tarnished his fair name, and in laying down the reins now at more than three score and ten years he will have the gracious approbation of every sport-lover in America, with the hope that his days may linger and be peaceful and happy to the end.

Harness racing lost an enthusiastic supporter when the death of Mr. W. H. McDoel, prominent railroad man and amateur reinsman, occurred in Chicago last month. Mr. McDoel visited California on several occasions and made many friends here among the horsemen who will regret to hear of his death. Among many horses that he had owned was his namesake McDoel 2:15¼, winner of the Transylvania in 1890, driven by Budd Doble, in which race he defeated the future champion, Allerton 2:09¼. He also owned the leading money winning pacer of 1903, Allerson 2:05¼ and the two-year-old filly Noma 2:19¼ when she won the Horse Breeder Futurity, she being the first of the get of Walnut Hall 2:08¼ to show prominence.

MAY DAY AT DIXON.

Between three and four thousand people attended the 39th annual renewal of the May Festival at Dixon, Solano county, last Saturday, and had the early morning hours not threatened rain the crowd would have been twice as big. While a slight rain fell early in the forenoon and there were clouds in the sky and a cool breeze blowing until nearly midday, the sun came out bright and warm by that time and the afternoon was simply perfect so far as weather conditions were concerned.

After the usual parade, crowning of a May queen and literary exercises in town, the crowd headed for the driving park to witness the harness races which were the chief attraction of the afternoon. The half mile track was in fair condition, although it was not quite dry enough for anyone to predict its record of 1:01¼, held by Teddy Bear 2:05, would be broken, and by the time the first race was called there was not a seat vacant in the grand stand or on the big open stand adjoining, while hundreds had to join the "standing committee," perch on the fences or remain in their autos, there being no less than 243 of these vehicles parked in the infield and as many more scattered about in the grove of beautiful trees which makes the Dixon Park such an ideal picnic ground.

Three races were on the card and all were for pacers. A quartette of high class two-year-olds were starters in the first event, the Dixon stake which had a money value of $320. They were Merrill by Teddy Bear, driven by L. B. Daniels, Raymond by Teddy Bear, driven by C. Silva, Mollie McCarthy by Vernon McKinney, driven by J. Doran and Marshall Logan by Jim Logan, driven by Elmo Montgomery. The race was half mile heats, best two in three, and Marshall Logan won in straight heats without much difficulty in the good time of 1:10½ and 1:11. Marshall Logan is a tall, rangy colt that has a world of speed, a good racing head and the gameness of his sire. He is the second of the get of Jim Logan 2:01¾ to start in a race, the other one being Maxine 2:15, winner of the three-year-old pacing division of the Pacific Breeders' Futurity in 1914, a race that went to five heats. The stout little filly Mollie McCarthy was the principal contender against Marshall Logan and in the first heat looked like a winner as she led into the back stretch after Marshall Logan had gone to a break just after rounding the first turn, but the son of Jim Logan settled to his work like a veteran and, pacing very fast, caught Mollie at the far turn and beat her to the wire by a good open length. He won the second heat as handily, the crowd standing up and cheering the Dixon bred colt to the echo. Marshall Logan was bred by James W. Marshall, of Dixon, who since he bred and raced Mona Wilkes 2:03¼ seems to have acquired the habit of breeding pacers that win with great regularity. The colt's dam is Leota 2:23 by Diablo 2:09¼, next dam the famous broodmare Trix Marshall by Nutwood Wilkes. Merrill, Raymond and Mollie McCarthy all raced well and showed speed, and while Marshall Logan outclassed them they are much more than ordinary colt pacers, and the race was an interesting one.

The 2:20 pace, with seven starters, furnished the thrills of the afternoon, one of which had a serious result. There were seven starters, Marie, Lock Logan, Hamburg Bell, Bold Harry Aerolite, Graustark, Oro Mo, and Palitea. In the first heat, as Elmo Montgomery, coming very fast, turned into the stretch slightly in the lead with Lock Logan, his horse went to a running break. William Ivey with Palitea and L. B. Daniels with Oro Mo were on either side of him, so close that sulky wheels were almost touching, while two other horses in the race were just behind the three leaders. The Dixon track is very narrow and Montgomery coolly took in the dangerous situation and concluded it were better to be set back for running than to slacken the gait of Lock Logan in an endeavor to pull him to pacing, and thereby cause an almost certain dangerous mix-up. So he let his horse gallop through to the wire and was heartily commended by every person who saw the predicament in which he was placed. The heat was awarded to Palatea with Oro Mo only a short head behind in second place.

When the horses were sent away to a good start in the second heat something happened just as they entered the first turn and Oro Mo driven by Daniels went down, the roan horse Graustark was on his feet but up against the fence, while Palatea, Hamburg Bell, Lock Logan and Bold Harry Aerolite went on (Marie having been withdrawn after the first heat). The crowd rushed onto the track and surrounded the fallen horse and driver. Daniels was quickly on his feet but had been severely bruised and was assisted into an auto and rushed to a physician. Oro Mo was seen to be dying, and after examination by a veterinarian was ordered shot. He was a chestnut horse by Demonio and had a record of 2:09¼ made at Salinas in 1914. He was the property of C. F. Silva of Sacramento.

It was at first thought that Daniels had suffered a dislocation of the shoulder but examination showed that outside of some severe bruises that will keep the popular trainer out of the sulky for a few days he is not injured. Just what caused the accident it is hard to say. There are about as many explanations as there were witnesses to the unfortunate occurrence, but as there was no intentional fouling, the sharpness of the turn, narrowness of the track and the fact that six fast pacers were all being driven at top speed in an effort by each driver to get into the lead and win the heat, are sufficient reasons to account for a lamentable accident which resulted in the death of a good horse and the injury of a popular driver. There is cause for congratulation, however, that Daniels has suffered no more serious injury than bad bruises, as his forced retirement from the sulky would be a distinct loss to the harness horse interests of California, as no trainer is held in higher esteem than L. B. Daniels.

Palatea won the heat in four and one-half seconds slower time than the first heat, and then Bold Harry Aerolite, heretofore known as Aerolite Jr., took the next three heats, pacing one of them in 1:04.

The free-for-all had two starters, and was really an exhibition, both horses, Bondalean and John Malcolm, being in the Silva stables. Chas. Silva had the mount behind Bondalean and Smith drove Malcolm. Neither horse was in good shape for a really fast mile, but Bondalean won both heats easily. In the first heat both horses broke going round the far turn and in the second heat Malcolm repeated the trick, but Silva drove Bondalean the half mile in 1:04, coming the last quarter in 31 seconds.

Outside of the serious accident the sport furnished by the pacers was greatly enjoyed and the crowd remained until the close. The people of Solano county are great lovers of the light harness horse and a good program of harness races is to be provided for the Solano County Fair which is to be held at Dixon this fall.

* * *

Palitea, winner of two heats in the 2:20 pace, was bred and is owned by Dr. J. R. Haile of Winters, Yolo county and is by E. D. Dudley's stallion Palite, and his dam a favorite road mare of the Doctor's that was by a son of Alex Button. For the work Palitea has had he made a good showing in the race and was well driven by William Ivey.

* * *

James Sutherland of Pleasanton and Dr. I. B. Dalziel and Dan Hoffman of San Francisco were the judges, and William Higginbottom did the starting. The latter got the horses away in good order in almost every heat and there was no complaint. The Dixon track is a mighty fast half mile, but the track is very narrow and but four sulkies can line up abreast in the stretch, which makes the starting of a field of six or seven horses a very difficult proposition. The fact that there was no complaint about either the starting or the judging speaks well for the gentlemen who were in the stand.

* * *

Lou Mativia had charge of putting the track in order and but for the sudden storm which came up Friday night and threatened until nearly noon of Saturday it would have been even faster than last year when Vera Hal and Teddy Bear (the latter at the pole) raced the half mile neck and neck, the Bear winning in 1:01¼, which is only one-half second slower than the world's record for a half mile track. As it was the footing was about as near perfect as any track ever gets. A mile of such soil would make the fastest track in America, and Mativia is the man that could put it in order for smashing all records.

GOOD PURSES IN THE NORTHWEST.

The North Pacific Fair Association's circuit of seven weeks of harness racing is in our advertising columns this week, and there will be a regular feast for those who take their horses to that section this year provided the said horses are fast enough to win a fair share of the many purses hung up. Starting at Vancouver, Canada, August 14th, there are early closing purses of from $500 to $700 to trot and pace for, as well as purses ranging from $200 to $500 that close later. August 28th is the date for opening the Southwest Washington Fair at Chehalis and here the purses are all of $500 each. The Spokane Interstate Fair, beginning Sept. 4th, offers uniform purses of $750 each, and the Grays Harbor County Fair will be held at the same time with $250 purses on its program. Sept. 11th the Walla Walla County Fair opens with purses of from $500 to $700, then comes the Washington State Fair, beginning Sept. 18th, with purses ranging from $500 to $700, and on Sept. 25th the Oregon State Fair begins at which there will be a 2:12 trot for $2000, and a 2:08 pace for the same amount, with plenty of other classes at $600 to $700 for each.

Stake books giving all the particulars, conditions, rules, etc., are yours for the asking if you will only drop a postal to any of the secretaries or to John W. Pace, Seattle, Washington, giving the address to which you desire the stake book sent.

If you want to race up north, send immediately for the stake book and then send in your entries by the first of June to the early closers. Read the advertisement in this issue carefully. There is "good picking" for a fair horse on that circuit this year.

William Weightman, a resident of California, has recently purchased the farm known as Melrose Castle Farm, at Cassanova, Virginia, together with its stud of hackney horses, headed by the stallion Seaham Stoker, an imported son of Fire Boy, one of England's greatest sires of this now very popular breed.

We shall have to wait another week for a complete report of the Indianapolis sale, but in the meanwhile it is known that the average of the two days' sale was considered very good, although the highest priced horse was a colt that sold for $2,000.

PACIFIC BREEDERS' FUTURITY STAKE No. 1

The following fifty-seven fourth payments wer made on May 1st in Pacific Breeders' Futurity Stak No. 15, for foals of 1915:

D. A. Allen's br c Leonid McKinney by Leonid, dai Almah McKinney by McKinney.

E. T. Barnette's b f by Carlokin, dam Zephyr b Zombro; b c by Copa de Oro, dam Phyllis Ba nette by The Director General.

C. J. Berry's b c by Carlokin, dam De Ora by Cop de Oro.

I. L. Borden's b f by Major's By Guy, dam C. D. K b f by Ed. McKinney, dam Miss Nutwood by Nut wood Wilkes.

S. Christenson's br c King Albert by The Bondsman dam Reina Directum by Rey Direct.

John N. Colomb's b f Mary McKinney by Vernon McKinney, dam Mary Gordon by Gordon.

Chas. Cook's b f Goldie McGregor by Onward Mc Gregor, dam Gypsy C. by Nutwood Wilkes.

S. H. Cowell's foal by Panama, dam Harvest Queen by Silver Arrow; foal by Panama, dam Zaza by Henry Nutwood.

Wm. C. DeRyder's b f Kilo Watts by General Watts dam Miss Douglas by Cochato.

Wm. E. Detels' b f by Onward McGregor, dam Bonnie Melba by Bon Guy.

Dr. Wm. Dodge's b c Bon Rex by Bon McKinney, dam Johanna R. by Limonero.

Jas. F. Dunne's bl f Prieta by Tom Smith, dam Lette B. Jr. by Benton Boy; b f Viola Watts by General Watts, dam Native Bidwell by The Native.

V. K. Dunne's ch c The General Bond by General Watts, dam Bourbon Bond by The Bondsman.

W. G. Durfee's ch f by Copa de Oro, dam Christianita by Zolock; b f by Carlokin, dam My Irene S. by Petigru; b f by Copa de Oro, dam Dixie W. by Zolock; b f by Carlokin, dam Honey Healey by Zombro.

E. A. Gammon's b c The Meteor by Peter McKlyo, dam Cleo Dillon by Sidney Dillon.

Alex. Grant's br f Margaretta Lou by Wilbur Lou, dam Sona by McKinney.

H. H. Helman's b c Baron Mowry by The Bondsman, dam Lady Mowry by McKinney.

Hemet Stock Farm's ch c by Wilbur Lou, dam Eradiate by Geo. W. McKinney; b c by Wilbur Lou, dam Fiesta Queen by On Stanley; b f by Wilbur Lou, dam Hemet Girl by Geo. W. McKinney; b c by Wilbur Lou, dam Lady Zombro by Zombro; ch f by Kinney de Lopez, dam Louise Carter by Chestnut Tom.

H. A. Hershey's b f Skye Ball by Jim Logan, dam by Falrose.

H. S. Hogoboom's ch f Beautiful Baby by Palo King, dam Beautiful Morn by Iran Alto; b c Bingen the Great by Robert Bingen, dam Beautiful Bird by Nutwood Wilkes.

R. S. Irvine's b c Vannan by The Bondsman, dam The Bloom by Nushagak; b f Bonnetta by The Bondsman, dam Beretta by Searchlight.

Abe W. Johnson's b c W. J. K. by Directum Penn, dam Belle Raymon by Raymon; br f by Directum Penn, dam Anna Elton by Elton.

Ed. Lavin's b c by George Hammett, dam Stella McKinney by Ed. McKinney.

Wm. Loftus' b f by Copa de Oro, dam Leonor McKay by McKinney; b c by Copa de Oro, dam Annabelle L. by Hamb. Wilkes; b f by Carlokin, dam Iran Belle by Iran Alto.

A. W. Longley's b c by Prince Ansel, dam Ella J. by Bob Mason.

R. J. MacKenzie's b c Terry Patchen by Joe Patchen II., dam Zombro Belle by Zombro; b c Carl Vernon by Vernon McKinney, dam by Carlokin.

Carey Montgomery's b c Tennessee Bill by Jim Logan, dam Lela H. L. by Nutwood Wilkes.

J. W. Pendleton's bl c Bertrey Bells by Derbertha Bells, dam Abbie McNutward by Guy McKinney; bl c Louniska Berbells by Rapallo, dam Beautiful Bertha by Moormont.

Dr. M. F. Schaltenbrandt's b c Wm. McKinney by Scott McKinney, dam Kate by Antevolo.

W. L. Scott's ch c Wilbur Lou 2nd by Wilbur Lou, dam Lady Lou by Stanton Wilkes.

W. L. Selman's br f by Prince Zombro, dam Bessie Mack by Herman.

T. D. Sexton's bl f Vernon McKinney, dam by Oh So.

J. E. Short's b c Tom Morris by Skidoo Wilkes, dam Honda Girl by Rubino.

Chas. F. Silva's bl c by Teddy Bear, dam by Zombro.

C. F. M. Stone's b f Lady Harriet by Carlokin, dam Cora Jane by Del Coronado.

L. H. Todhunter's foal by Peter McKlyo, dam Zombowyette by Zombro; foal by Peter McKlyo, dam Osmuda by Bon Voyage.

M. L. Woy's br c Strathalie Hall by Black Hall, dam Strathalie by Strathway.

O. H. Wright's bl c Jake Mosier by Reflector, dam Rosie Wilkes by Falrose.

Senator Ben F. Rush of Solano county, who still owns a small band of highly bred trotting stock, made up in part of several broodmares that have produced horses with low records and race winning abilities, is using on a number of his best mares this year that royally bred and grand looking trotter Moko Hall 2:10, owned by Mr. Frank Ruhstaller of Sacramento. Moko Hall is by that great sire Walnut Hall 2:08¼ and his dam is by Moko, another wonderful sire of speed. Some extra good colts should come from the use of this horse at Senator Rush's stock farm.

THE PREVENTION OF PULLING.

In a most interesting article on "Pulling and Its Causes" by "Marque" in the Horse Review, of April 26th, he relates some interesting facts about several world's champion trotters and incidentally pays a deserved tribute to our California trainer, Millard Sanders. In that portion of the article relating to over-ambitious horses that are inclined to pull, he says: "Champions achieved their honors largely because they were given an over plus of vitality and a great amount of nervous force—in other words, they are ambitious and highly organized in a temperamental respect. To make them what they were required the utmost skill and patience, and to utterly ruin them was as easy as eating strawberry shortcake.

"Take Lou Dillon as an example. Did you ever have the pleasure of seeing Millard Sanders work and fuss with her? Well, if you had you would, like myself, give this trainer a world of credit. She was a bundle of nerves, so high-strung that only one trainer in one thousand could have got along with her. I didn't see her when Millard first took charge of her in California, but I did see a lot of her when he brought her over to the Grand Circuit in 1901 in her four-year-old form. The trainers used to pass sarcastic remarks every time that she appeared for a work-out, and the stock question was, "What does Sanders hope to do with that speed crazy filly?" But Millard kept on with his tedious task, evidencing the patience of Job, and never for an instant losing either his head or his faith in Lou. He worked her many miles the wrong way of the track, sitting calmly while she cantered and hand-galloped, always addressing her with soothing words, and never letting her know that she was doing things for which nearly any other trainer would have severely punished her. He was conscious of the jibes and jokes of which he was the victim, for often he used to remark to me, "Just wait till I am ready and I will show them such a trotter as they never dreamed of." He won the mare's confidence, conquered her by letting her have her own way, and in the end had as finished a pupil as any trainer ever turned out. Lou never made a single break or spoiled a score for either her trainer or for her owner, Mr. C. K. G. Billings, and while a lot of people still say that she was 'speed crazy,' I cannot figure upon what grounds they base their belief. She wore a lip strap, but, as Mr. Billings, who broke all world's records worth while with her, will tell you, she never pulled him and was throughout as steady as a clock. There is no doubt in my mind that there were a number of minor 'Lou Dillons' foaled which, through incapable training, were relegated to the discard as crazy and worthless.

"Take Uhlan as another example—a gelding so full of spirit that he was always, in his stall and out of it, on the point of bubbling over. He was amenable to kindness and persuasion, but start to cross him, or fight him, would be immediately to stir up a fuss. Bob Proctor was his original trainer, but it was the 'champion maker,' 'Doc' Tanner, that brought him to the post in form to achieve his unprecedented honors. Uhlan always insisted upon having his play out before he was willing to undertake anything serious. Time and again I have seen him come out for his morning jog stepping higher than any show ring winner, his tail held high and snort after snort coming from him as if to notify the onlookers how good he felt. Reaching the track he would frequently pass around it several times, cutting capers, and suddenly he would drop his head and sprint at a 2:00 clip or better. All the while 'Doc' would sit with loose lines and let the gelding do as he pleased, declining to take hold of him even when he shot away in one of his spasmodic flights of speed. What would have happened had 'Doc' sought to restrain Uhlan, or have refused to let him have his fill of play? There would be no trotting record of 1:58 in the open, and instead of being the best of friends, trainer and horse would have come to grips with one another.

"It's a cinch that hot-headed, willful, high-strung horses make champions, and it's equally pertinent that it is much easier to spoil them than it is to make the utmost use of their splendid qualifications. The Harvester 2:01 came to Mr. Geers with a vicious reputation, and the G. O. M. transformed him into a champion of almost perfect deportment. In his early work he would have loved nothing so much as to fight and resent efforts to conquer him, but, fortunately, that pleasure was denied him. The story of the making of Mary Putney, the world's champion three-year-old trotting filly, is a replica of that of practically all our champions. She was full of iron, full of determination, wanted her own way, and became tractable after she was permitted, for weeks at a time, to indulge her temperamental fancies. I had her story from her trainer, Walter Cox, and from her former owner, James Powers. Walter used to instruct Mr. Powers to take her out in the country and let her do as she pleased, and it was this sort of treatment that made it possible to subsequently use her great speed. It requires no fine perception to figure what a 'rough-house' trainer would have made of Mary, and what would have transpired had she been turned over to one of those dead-armed drivers to be raced—that is where Dick McMahon came in for glory. While I am on the subject of Mary Putney I want to state that I believe she will get a record of 2:00 or better, for I know of no other young trotter that offers so many of the required qualifications. Chauncey Sears, of Fall River, Mass., her owner, is a lucky man, and luck, you know, plays a part in every prospective champion's success."

THE WORLD SUPPLY OF HORSES.

Horse breeding is a world problem and must be considered as such, for horses are produced and used all over the world.

The latest available world census figures are given by the United States Department of Agriculture in its annual report for 1914. These, while admittedly incomplete for some of the less important countries, are believed to be fairly accurate as to the number of horses existing in all leading nations. According to this data, the world had in 1914 slightly more than one hundred and five million horses. Russia (including both European and Asiatic) had a little over thirty-five millions. South America possessed a trifle over ten million head. Central America and the West Indies are credited with 2,400,000, 859,000 of which were in Mexico. Canada is credited with 2,058,000; the British Isles with 2,233,000; Australia, South Africa and New Zealand combined, with 3,628,000; France with 3,231,000 and Italy with 956,000 head. Germany had 4,523,000 and Austria-Hungary 4,374,000 horses prior to the outbreak of the war. Figures given by the London Live Stock Journal, considered an authority, show that the total number of horses in France was reduced from 3,231,000 to 2,227,000 head within the first eleven months of the war, or a decrease of 31 per cent between August 1, 1914, and July 1, 1915. The reduction in number of horses in the other nations engaged is probably as great.

Through the courtesy of Jacob DeGeus of Michigan, whose brother is one of the leading horsemen in Holland, the following, from a letter written January 15, 1915, is taken:

"The Germans have been buying all the horses they can possibly obtain in Holland. Good geldings of common work stock only 18 months old are bringing $250 to $300 per head."

The following extract (also furnished by Mr. DeGeus) from DeVeldbode, one of the leading agricultural newspapers in Holland, issue of February 5, 1916, is direct testimony:

"Prices on horses are real war prices. The average prices paid for fair work horses, not too old, is never less than 2000 marks ($475) per head. There are not horses enough to do the work of farmers, and it seems as though we were turning back to the days when oxen were most used for farm draft power."

Whatever may have been the ideas of army men prior to the war, it took but a very brief time to convince them that however valuable motor trucks and tractors may be in transport work, horses alone could be relied upon to put men and artillery in position where needed, and when needed.

Russia's surplus, most of which was too small, was shut off from other nations. South America's supply was limited and nearly all the horses were too small in size. The United States was the only nation with an available surplus of the right kind of horses; and there can be no more conclusive evidence of the indispensability of horses than is visible in the cold figures regarding exports. From September 1, 1914, to February 1, 1916, 542,602 head of horses, valued at $114,999,223, and 139,929 mules, valued at $26,803,506, were actually exported from the United States. This exceeds, in dollars and cents, our total exports of horses and mules for the sixteen years preceding the outbreak of the present war, and is unanswerable evidence of the need for horses and mules, despite the admitted value of trucks and tractors in transport work.—Wayne Dinsmore, in Percheron Review.

HORSES AT HEMET STOCK FARM.

Frank Rees of the Hemet Stock Farm sends the Breeder and Sportsman a few items about the trotters and pacers that Fred Ward has in his speed school.

Hemet has been a mile in 2:13¾, a half in 1:08; Sterling Lou (4) trotted a mile in 2:19 and a quarter in 32¼ seconds; Oro Lou (4) a pacer, has shown a mile in 2:19 and a quarter in :32; Fiesta Lou (3) a mile in 2:17½, quarter in :31¼; Harry R., pacer, mile in 2:11¾, quarter in :31½; Bon Courage a mile in 2:17½, quarter in :31½; Great Northern mile in 2:19. The rest of the aged horses have just been started up. Amongst the younger division is a pair of two-year-old trotters that look at present a little the best youngsters ever on the farm, namely: Louise de Lopez, daughter of Kinney de Lopez and Louise Carter. She has been a mile in 2:23½ with a quarter in 33¼ seconds. The other is Zeta Louwill, by Wilbur Lou, dam Zeta W. by Nutwood Wilkes, and she has been a mile easily in 2:29 with a quarter in 34 seconds. The two-year-old pacing filly by Wilbur Lou, Lady Zombro, has shown a mile in 2:26½, a half in 1:10½. The yearling Wilbur Lou—Eradiate a quarter in 39¾ seconds and the yearling Kinney de Lopez—Louise Carter an eighth in 20 seconds.

Burton Carpenter of San Diego has four head in training at Hemet Farm track: A trotter by Zombro that has been a mile in 2:17¾, a pacer by Vassar with a mile in 2:15 and an eighth in :14¾; a pacer by Strathway with a mile in 2:20, also Nutway 2:18¼ that he has raced the last three seasons and not been outside the money.

Sam C. Fuller, who drove the famous chestnut mare Kentucky Union 2:07¼ to her record in 1896, just twenty years ago, when she was a rival of that great California trotter Directum 2:05¼, has recently been elected judge of the Sedalia, Mo., police court.

WALLA WALLA HORSE NEWS.

Billy Hogoboom is a natural-born optimist. He never looks on the dark side, and whether he or some brother race driver has an off day, a lame horse or any other of the many trials that beset the driver's path, he always expects to see things get better. And they generally do. Billy is at the Walla Walla track, together with the finest bunch of drivers in the Pacific Northwest. Less complaint of racing conditions and a more hopeful expression regarding present racing conditions and future prospects was found here than at any other track yet visited. The track was a little wet, but the boys found good jogging roads outside, and in a few days the track will be in fine shape. They all had horses that can win and are going to win. And this is the spirit that is good for the racing game.

Billy Rowe, a green three-year-old pacer by Prince Axworthy, dam Zepherine by Antrim, owned by William Rowe of Walla Walla, is in Hogoboom's stable, and is a good prospect.

A sweet three-year-old pacing filly by Blue Peter, dam by Antrim, is owned by Clyde Weatherford, of Walla Walla.

Florence H., a bay three-year-old by Blue Peter, dam Lida Carter 2:12½ by Stam B., out of the dam of Nutwood Wilkes, is a fine speed prospect. So is Bessie K., a two-year-old full sister, both owned by James Dacres of Walla Walla.

Billy also has two very promising green mares owned by Arthur Remington, of Olympia, a man who loves the harness race horse for the horse's sake. One of these, Florimel, is by Martin's Florida, dam Birdie. She is a full sister to Irene 2:19¼, trial 2:12, trotting. The other, Atazo, is by Zombrook, son of Zombro, dam Altie by Antamont, son of Altamont. These are both good prospects and should be heard from this season.

J. A. Bush has his good trotter, A. McK. 2:23¼ by Bonnie McK., dam Rose Caution by Caution. His mark lets him in about right to be a good money winner.

Bush owns jointly with Mr. Gimble, of Spokane, Miss Spokane by Blue Peter, dam by Zombro, a green pacer that has worked in 2:18, half in 1:06.

Babe Patch by Junior Dan Patch, dam by Zombro, is another good pacing prospect, owned by John Taylor of Spokane.

Monty Carlyne by Carlisle, dam Ferrona by Arronaux, a green trotter, is owned by D. W. Barclay and is starting his work well.

George A. Kelly has his good old stallion, Bonnie McK., that has eight in the list, including Bonnie Antrim (4) 2:12, that was also the fastest two-year-old gelding out the year he raced in his two-year-old form.

Kelly also has Baby Lila by Bonnie McK., dam Lady Linmont. She has been miles in 2:16 in a fast race, but has only a breeder's mark of 2:29¼.

L. C. Shell has Hobo, a green stallion by Teddy A., dam Cayuse Mollie, dam of Lady W. and Bonnie M., both 2:13¼. He also has a very promising two-year-old by Hobo out of Lady W.

J. H. Pridemore has his good stallion Lou Crellin 2:23 by C. The Limit, dam Moscovita, dam of Bon Guy by Guy Wilkes. He is a great show horse and has never been defeated in the show ring. Pridemore's other horses are Patsy L. by Zolock, dam by Caution, a green trotter; Lou Deckers by Lou Crellin, dam by Salte, and Joe Buckly, a green pacer by Bonnie McK., dam by Linmont, that has been a half in 1:09.

W. H. Franklin has Carlyle F. 2:15 by Lyle, dam Lady Franklin 2d, and Senator H. Jr. by Senator H., dam Angerine by Antrim. Franklin will race both horses, and is the one man here who seriously considers going East for the racing season.

J. M. Floyd has M. Stubblefield's mare Mattie McK. by Bonnie McK., dam Harriet Gooch by Pricemont, a good prospect.

J. E. Johnson has Maud Defiance, a pacer by Prolong, dam Phenela by Phyllis; a four-year-old trotter by Exaris, dam Minoca by Mendocino, and Morris E., a green trotter by King Alexis.

Practically every one of these horses that meet with no mishap or setback will race.

There are also at the track several runners. Earl E. Smith has Handsome Ted, a Sovereign colt, a good three-fourths or seven-eighths horse; a two-year-old stallion by Bellweather, out of Angel, and Marta Mac, a grand five-year-old stallion, good for a mile race, by imported Marta Santa and out of imported Lutie Mac.

E. A. Armstrong has at the track Sleepland, a good mile horse, and Henry L., a green colt, and will soon have two more.

F. Heavner has Ducal Crown, Lillian Ray and Sorrowful, all good campaigners.

Samuel Gray still has his mare Dorothy Alton by Alton B., a full brother to Chehalis, dam by Westfield. Mr. Gray still drives her, and she is still a goer. She has a fine colt by Crelen.

There are still a number of well bred horses used in Walla Walla, despite the number of automobiles, and apparently there is more interest in racing this spring than for several years.—Corr. Rural Spirit.

The measuring standard at horse shows must be grievously inadequate to determine the height of a horse, as at a recent New York show the saddle mare Patsy Newman won second prize in the class for saddle horses under 14.2 and the next night was placed first in the class for saddle horses over 14.2.

Notes and News

San Francisco's matinee season will open tomorrow at the track in Golden Gate Park.

◈ ◈ ◈

Good weather will result in a big crowd, as all are anxious to see the horses again, after a let-up of several months.

◈ ◈ ◈

The track is said to be in good condition so some fast miles may be expected, as the road driving has been good for two months and the horses should be fit.

◈ ◈ ◈

There are good purses up north this season. The North Pacific Fair circuit announces a fine list of purses which are advertised this week.

◈ ◈ ◈

There is a full page of interesting reading about "Save-the-Horse" in this issue. Better turn to it and read some of the testimony presented.

◈ ◈ ◈

Fifty-seven yearlings are paid up on in the Pacific Breeders' Futurity for foals of 1915. If you have an entry in it, look them over and see what you will have to beat.

◈ ◈ ◈

The new book of by-laws, rules and regulations of the National Trotting Association has been received and can be supplied from this office. These are new rules in force since February 9th, 1916. In paper covers, 25 cents; in morocco, 50 cents.

◈ ◈ ◈

Henry Helman, who won all his starts at the P.-P. I. E. last year, has the two pacers Prince Zolock and Mack Fitzsimmons at work at Salinas and hopes there will be classes for them at the different coast meetings. They are eligible to the 2:08 class.

◈ ◈ ◈

Get in the swim. The saddle horse is just entering on a boom. Breed a mare to that handsome specimen of the famous Kentucky breed—Le Grand McDonald, winner of the world's junior championship. Write to E. A. Bridgeford, 519 California street, for particulars.

◈ ◈ ◈

The Stanford-Occident Futurity, value $3000, for foals of mares covered in 1915, will close for entries Monday next. Only $2 to nominate mare. Read the conditions of this stake in the advertisement on another page. Don't forget that the stake closes Monday next, May 15th.

◈ ◈ ◈

Deviletta 2:10½ by Diablo 2:09¼, that fast and handsome mare owned by Mr. W. S. Harkey of Gridley, Cal., foaled a bay colt May 2d, by Robert Bingen 2:11¼, that arrived pacing and seems to know no other gait. It is a bay without any marks and Mr. Harkey is already figuring on how fast this colt should go as a three-year-old and thinks the colt record for that age at the pacing gait should not be too low a mark for it to get with good luck, a good day and a good track.

◈ ◈ ◈

The California State Fair program of harness races is on the second page of today's Breeder and Sportsman. $1000 purses all through. Every horseman in the State will be interested in a program like that. Entries are to close June 1st, when only 2 per cent of purse will be due. The program is a most liberal one. This looks to be the year when it will not be quite so hard to win as the best of the horses are going east to try conclusions with the best in the world on the Grand Circuit.

◈ ◈ ◈

Secretary Paine of the California State Agricultural Society offers a regular banquet with trimmings to the harness horse owners this year. $1000 purses are hung up for the 2:09, 2:15, 2:20 and 2:30 trotters and the free-for-all. 2:10, 2:14 and 2:20 pacers, with a special purse of $1000 for 2:13 class pacers in which horses with no records or slower than 2:20 are not eligible. Do you get that last race? The aim is to provide a race for horses that can race around 2:13 but to keep out those with speed enough to go in the 2:10 or free-for-all classes. The entire program is in this week's "Breeder" on the second page. Remember, the date of closing is June 1st.

◈ ◈ ◈

The top prices of the Indianapolis sale were obtained for two youngsters consigned by C. A. Harrison, the champion horse enthusiast of the northwest. They were the two-year-old Senator O'Brien, yearling record 2:29, by Peter the Great, dam Carrietta 2:18 by Directman, that went to Amos Whitely of Muncie, Indiana, for $2000, and the three-year-old colt Suldine (2) 2:12, holder of world's half mile track trotting two-year-old record of 2:13¼, by Worthy McKinney, that was knocked down to Joseph Kleckner of Philadelphia for $1975. Very meagre reports of the sale have come to hand and we will have to wait until next week to learn just what the horses from the Pacific Coast brought individually. Among the horses heard from, however, Rapallo brought $550 and Sis Bodaker $600. In spite of the fact that no very high prices were obtained the average was very good, it is said.

H. W. Williams of 28 East Clay street, Stockton, one of the Breeder and Sportsman's old subscribers, writes that there is in his stable two green horses that he thinks are pretty good prospects. One is a pacer that wears no hopples and only a pair of quarter boots for protection that he has only had thirty days and has shown a quarter in 30¾ seconds. The other is a seal brown mare, four years old, that after one month of breaking and training trotted a mile in 2:25¼. Mr. Williams does not give the breeding of these horses but says they are well bred, and the young man who owns them desires to sell as he has no money to train them.

◈ ◈ ◈

When A. Ottinger of this city concluded to dispose of his matinee horses, Dick W. 2:06¼, Frances S. (mat.) 2:11½, and Agnes Carter 2:15¾, he offered the three for $1000 to anyone who would take them. To one or two friends who were members of the San Francisco Driving Club he knocked $200 from the first named figure and to Charley DeRyder he offered to transfer ownership of the three for $600. Charley said he was boosting instead of knocking the horse market, so induced Ottinger to consign them to the Indianapolis sale, and last week the three brought nearly $1600 at the big auction held at the Hoosier metropolis. According to the Indianapolis News, Agnes Carter brought $630, Frances S. $360 and Dick W. $440, a total of $1530 for the three.

◈ ◈ ◈

J. R. Smith, the Pleasanton Driving Park horseshoer, is an artist in his way. He has recently been making horse shoe pins, brooches and watch fobs of gold, silver or copper that have attracted much attention and that are really splendid and artistic specimens of his handiwork. Horse shoe stick pins, finger rings, brooches, etc., are designed and worked from any metal in a manner that will please anyone who wishes to retain as a souvenir any old gold or silver they may own. A watch fob can be made from a horse shoe or any piece of silver or gold and Mr. Smith will submit designs when requested. Write to J. R. Smith, horseshoer, Pleasanton, and he will send you an illustrated circular containing many of the designs in pins, brooches, fobs, etc., he is making.

◈ ◈ ◈

For some time Walter Tryon, the well known Sacramento horseman, has owned in partnership with J. W. Marshall of Dixon, the colt Dixon Boy and last week became the sole owner by buying Mr. Marshall's interest in the colt. Dixon Boy is now a four-year-old and is by that successful sire of good looks and speed The Patchen Boy 2:10¼ out of Leota 2:23 by Diablo 2:09¼, second dam the great broodmare Trix Marshall (dam of Mona Wilkes 2:03¼, Aerolite 2:06¾, etc.) by Nutwood Wilkes. Dixon Boy's half-brother, Marshall Logan, won the two-year-old pace at Dixon last Saturday and looks like a real race horse. Dixon Boy has been a mile in 2:06¼, a half in 1:02½ and a quarter in 30½ seconds as a three-year-old. He was not in good shape when he made his only start last year as a three-year-old at the P.-P. I. E. races, but got fourth money in a race paced in from 2:09¼ to 2:13½, and he shows every sign of being a very fast horse. He will be carefully trained by Mr. Tryon and should be able to win in the classes to which he will be eligible on almost any circuit.

◈ ◈ ◈

S. H. Hoy, whose almond grove just outside the town of Winters, Yolo county, is one of the prettiest orchards in that section of nut and fruit-bearing trees, has a three-year-old trotter that is attracting much attention from the horse loving people of the Putah creek region. This young trotter is a bay stallion without marks of any kind and is as perfect a specimen as Mr. Hoy ever owned and he has bred quite a number with records at the pace and trot. The colt is by that elegantly bred stallion The Proof 2:10³⁄₄ (son of The Exponent) and his dam is by Zolock 2:05¼, second dam Satanilla by McKinney 2:11¼, third dam Laurell Inca, the dam of Sir Gird 2:24¼ by Inca, fourth dam Fairy Queen (dam of Pink 2:23½) by Echo. This colt is a square trotter, with splendid conformation and great resolution. He worked a very handy mile in 2:37½ as a two-year-old, but as he has no stake engagements will only be given easy training this year and not be keyed up for racing. Mr. Hoy says he never had a young trotter he liked better than this one and expects him to grow into a valuable horse. He has lots of natural speed, is good gaited, level headed and looks like a splendid prospect.

◈ ◈ ◈

Lou B. Taylor of Newhall, who trains his horses over the Los Angeles track, writes that he has worked his pacer Baxter Lou 2:14¼ a mile in 2:13, last half in 1:03 and last quarter in 31 seconds. Baxter Lou started three times last year and won three races, only losing one heat. His slowest heat was paced in 2:17½, which shows that he was a consistent race horse and he is headed for a low record. He is by Kinney Lou 2:07¾, as is Luana 2:16½, a good trotting mare also belonging to Mr. Taylor, who has been a mile in 2:20 with her this year, the last half in 1:08 and the last quarter in 32½ seconds, which shows that she has speed enough to win races in her class. Luana also won three races in three starts last year and her heats were in from 2:16¼ to 2:22¼. That she is a handsome trotter can be readily seen from her picture which adorns our title page this week. Luana is by Kinney Lou 2:07¾ and her dam is Benita B. 2:27½ by Stam B. 2:11¼, second dam Salinas Maid 2:30, a great broodmare by Junio, third dam Mamie V. by Carr's Mambrino.

A subscriber asks if the time made in a match race for $20 where judges and a timer were in the stand, but the race not advertised and no money taken at the gate is a record or a bar. A horse winning a heat in such a race will acquire a bar, but unless the race is officially and duly reported he will not be given a record. In other words a horse winning under those circumstances will not be credited with a record in the Year Book, but will be barred from starting on any association track in classes slower than his record upon proof that he won such bet or race.

◈ ◈ ◈

The great brood mare Lottie 2:15, registered as Lottie Whippleton, owned by Woodland Stock Farm, was found dead in pasture at Meadowbrook Stock Farm, near Pleasanton, one morning last week. Lottie was the property of Woodland Stock Farm and her death adds another to the many deaths that have befallen the horses of that farm since its sale and the dispersal of its stock. Lottie was a brown mare foaled 1892 and was bred by the late H. W. Crabb of Oakville, Napa county, who sold her to Alex Brown of Walnut Grove, who in turn hold her to the Woodland Stock Farm, Inc. of Woodland. . Lottie obtained a record of 2:15 trotting at Stockton when she was eight years old when she won the first heat of the 2:15 trot. As a brood mare she was quite successful, as she was the dam of four standard performers, as follows: Prince Lot 2:07¼, Lottie Ansel 2:14¼, Ruth Ansel 2:21 and Anselot 2:28½, all by Prince Ansel. Lottie was by San Diego 8776, and her dam was Flora B. 2:27 by Whippleton 1883, second dam Kate, a mare of untraced breeding who was queen of the road when owned by John Tychson of Alameda county. Mr. S. Christenson, proprietor of Meadowbrook Farm, informs us that Lottie was in good condition when last seen alive, and was due to foal in a short time to Robert Bingen.

◈ ◈ ◈

A Breeder and Sportsman scribe accepted the invitation of Dr. I. B. Dalziel of this city to accompany him in his "Overland" to the May Festival and races at Dixon last Saturday. David West, the popular Fillmore street harness dealer, and photographer Richardson were also of the party which left San Francisco by the 6 a. m. creek boat for the Alameda side of the bay, and thence by way of Richmond and Pinole to Martinez, where the Carquinez straits were crossed by ferry, the route thence leading from Benicia over the state highway through Cordelia, Fairfield and Vacaville to Dixon. There were portions of the road between Oakland and Martinez that were a little rough, but could not be called bad, while the highway from Benicia to Dixon is as smooth as a floor. The ride through the undulating hills of Contra Costa county is very picturesque while the fruit orchards in the Vacaville section are most beautiful at this time of the year. Dr. Dalziel has a pride in obeying the laws of the road and never exceeded the state limit of 30 miles an hour, which in the soft spring air made the ride a most delightful one. The speedometer showed 73 miles as the distance run, and Dixon was reached a few minutes after 11 o'clock. The country along the entire route presents a beautiful appearance at this time of the year, although the lack of rain has caused the hay crop, much of which was being cut, to be very light, and a great deal of the late sown grain will not make a crop this year. Barley that was sown and up in February looked very thrifty and with ordinary cool weather will produce well. Outside of the slight sprinkle of Saturday morning, which was not enough to register in a rain gauge, there has been no rain in this section of California since the middle of February, something that has not happened before in 45 years. The heavy rainfall during the winter months has left the ground full of water, however, and six inches below the surface the soil is moist and insures good orchard crops and plenty of water in the wells. The ride to Dixon and return with the fine program of sports at the festival and the excellent racing, made the day one long to be remembered by those who were Dr. Dalziel's guests on that occasion.

DEATH OF SANTOS.

The noted broodmare, Santos, by Grand Sentinel 2:27¼, died on April 15th at the farm of her owner, Mrs. D. D. Streeter, of Kalamazoo, Michigan, says the Horse Breeder. The mare was twenty-nine years old and had been in the possession of the Streeter family ever since she was four years old. When Mr. Streeter died in 1909 all of his horses were sold except Santos, Mrs. Streter deciding to keep the famous matron as long as she lived. Santos was best known as the dam of Peter the Great 2:07¼ and J. Malcolm Forbes 2:08, undoubtedly two of the greatest stallions living today out of one mare. Her produce are as follows:

1892—Episode 2:18, br m, by Ambassador 2:21¼. Dam of two performers, one sire and one dam.
1895—Peter the Great (4) 2:07¼, b h, by Pilot Medium. Sire of 231 performers, twenty-six sires and eighteen dams.
1897—Barzaleel 2:23¼, br g, by Spottswood, 26283.
1900—Chimes of Normandy 2:16¼, br m, by Chimes. Dam of one performer.
1901—Anvil Chorus, br m, by Chimes. Dam of two performers and one dam.
1903—Nautilus, br m, by Chimes.
1905—Music Master 2:29¾, b h, by Moko. Sire of two performers.
1906—Shultsworthy 2:16¾, ch h, by Maxworthy. Exported.
1907—J. Malcolm Forbes (4) 2:08, br h, by Bingen 2:06¼. Sire of twenty-four performers.

Thoroughbred Matters

EIGHT STAKES AT RENO.

The Nevada derby at a mile and an eighth and a purse of $2500 will be the leading event of the Reno race meet which opens July 1st.

There will be eight stake races and entries will be closed on June 15th. The events in the order of their value follow:

Nevada derby, three-year-olds; value $2500; one and one-eighth miles.

Reno Business Men's handicap; three-year-olds and over; value $2,000; one mile.

Opening handicap; three-year-olds and over; value $2000; three-quarters mile.

Independence handicap; three-year-olds and over; value $1000; one mile.

Golden Gate stakes; two-year-olds; value $1000; four and one-half furlongs.

Juvenile stakes; two-year-olds; value $1000; five-eighths mile.

Overland handicap; three-year-olds and over; value $500; three-quarters mile.

Riverside handicap; three-year-olds and over; value $500; one mile.

Purses will be $300 on those days on which no stake races are to be run, overnight special races of $500 will be provided.

—o—

There is no doubt that A. K. Macomber's royally-bred Kentucky Derby candidate, Star Hawk, is daily growing more in favor among the horsemen at the Churchill Downs track as a dangerous quantity in the $15,000 classic which will be run off on May 13, says the Thoroughbred Record.

Star Hawk is by Sunstar, out of Sweet Finch (sister to Cunard). Sweet Finch was bred by the late James B. Haggin. She was foaled in 1903 and sent to England in 1904, got by Goldfinch, out of Lucania, by Sir Modred; second dam School Girl, by Pat Malloy; third dam Glenluine, by Glenelg; fourth dam Lute, by Lexington; fifth dam Lula Horton, by Albion; sixth dam Martha Dunn, by Sovereign, etc.

Old Rosebud, which won the Kentucky Derby of 1914 and set the record for the race, 2:03 2-5, comes from this family. To this family also belongs that remarkable three-year-old Claude, which won the California, Tennessee, St. Louis and Canadian Derbies, and ran second to The Picket in the American Derby, giving that horse twelve pounds. Other famous horses tracing to the dam's side of Star Hawk are the American Derby winner, Wyett; the two Suburban Handicap winners, Troubadour and Go Between; the wonderful race mare, Ida Pickwick, and such other superior performers as Virginius, Kildare, Lizzie Krepps, Pupil, Lucania, Keenan, Patron, Lismony, Trolly, Sheriff Bell, Ascender, Sister Mary, Dr. Catlett, Ten Booker, T. M. Greene, Ten Candles, Louise, etc.

◈◈◈

The spring meeting of the New Louisville Jockey Club opens today at the famous Churchill Downs course, the $15,000 Derby being the day's big event. There are 56 entries to this race and a big field is expected to start. J. W. Parrish's crack colt Bulse may be the favorite as there is much talk about the wonderful work this chestnut son of Disguise II has been doing, although John Sanford's colt George Smith will probably divide the honors with him. George Smith was bred by Chinn & Forsythe and when sold at auction as a yearling brought but $600, but the present owners paid $25,000 for him. James Rowe is training five or six good three-year-olds for H. P. Whitney and this stable will probably be the favorite when the mutuals close. Walter Jennings has Mr. A. K. Macomber's entries in good shape and will probably start Star Hawk and The Cock in the race. This will be the forty-second running of the Kentucky Derby, one of America's greatest races.

◈◈◈

The Kentucky saddle horse is taking the New York market by storm and the sales are numerous and at good prices. As the three gaited horse has the call among New York buyers, the Kentucky breeders were wise enough to meet the demand and train their horses at the walk, trot and canter gaits, well knowing that their conformation and style were more desirable than that of the hackneys for saddle uses.

◈◈◈

Advertising of the kind that was done by the associations at Goshen, Monroe and Middletown, New York, which resulted in an entry list of from 35 to 45 for each race, cannot help but boost the sport. As Guy Rockwell says: "All of the successful half-mile track secretaries are not down in Orange county, but there are many secretaries who try to keep a secret the fact that they are going to stage races at their tracks. If racing officials were prone to let the public in on their plans to the extent of a little advance information about the events, some dope about the star entrants and a liberal distribution of general news about their meeting, perhaps people who did not know a race meeting was scheduled would be enlightened and would attend. This scheme attracts capacity crowds in New York state and probably would work in other sections of the country."

ARABIAN HORSE CLUB ACTIVITIES.

The Arabian Horse Club of America is about to issue a revised edition of Volume I. of its Stud Book in the form required by the United States Government. The members of the Arabian Horse Club, believing that the crossing of Arabs on other well established breeds would prove of value, has two registration sections in its Stud Book—one for the pure bred, or desert bred Arab, and the other for the crossbred Arab in which latter section the crossbred produce of an Arab must always appear.

That the Arab crossed on other breeds is a distinct success has been amply demonstrated in the last two years. What the members of the Arabian Horse Club have been hoping to do has been accomplished. Take J. A. P. Ramsdell's successful saddle horses, Bella, Stella, Natasha and Aloui, some by trotting bred stallions out of Arab mares and others by saddle bred stallions out of Arab mares. Look at C. E. Perkins' winning horses of his own breeding, Bamboo, Pantomime, Joe Hardy and Tango, by his Arab sire out of trotting bred mares and hunter mares. Some of these half-bred Arabs would be hard to improve as hunter and saddle types, and they show that the beauty and quality of the pure Arab are wonderfully potent to refine and improve the common run of horse stock.

The Arabian Horse Club is not as large as the Percheron Horse Society, but what it lacks in numbers is more than made up in the enthusiasm, not to say devotion, of its members. Devoted is the better word, for no other class of horsemen can quite rival those who are breeding the desert courser when it comes to devotion to their equine idol. Peter B. Bradley, of Boston, is president of the organization; C. E. Perkins, of Burlington, Ia., is the vice-president, and H. K. Bush-Brown, of Washington, is the secretary and treasurer. Lately the club has elected Miss Ethel Boyd Bowers, of New York, as recording secretary and custodian of the stud book. Miss Bowers is widely known among horse show exhibitors as the painstaking compiler of "Ribbon Winning Show Horses," a hand printed book in which the performances and often the pedigrees of prize winning horses are preserved at the expense of infinite and unrequited labor.—N. Y. Herald.

—o—

FROM A SOUTH AMERICAN READER.

From a subscriber who has been a constant reader of the Breeder and Sportsman for many years we have received the following:

Mahaiconey, British Guiana, April 14, 1916.

Dear B. and S.—Please find money order enclosed for $4 for another year's subscription. It is about the best four dollars' worth I get. The war surely has brought our friend, the horse, into wonderful prominence again. I heard from a friend just back from the war (he does not know much about horses) that they do not like the Irish horses as leaders in the gun teams as they are apt to jump all the ditches, etc., and as a result throw down the wheelers. I suppose they were hunters pressed into unaccustomed harness. I suppose those good Ardenne ponies and colts must be all gone. I used to know them pretty well 30 odd years ago. Handsome, sound, active little horses, up to any amount of weight. Too good to carry Germans—bad horsemen.

Yours faithfully,

PHILIP MacADAM.

—o—

GOOD PRICES FOR SADDLE HORSES.

Eighteen well bred Kentucky saddle horses consigned by S. T. Harbinson & Co. were sold at Durland's in New York April 21st. They were high class, broken to harness as well as saddle, and there were several show prospects among them. They averaged $550. The chestnut mare Miss Fanny Francis was sold to B. L. Bell for $1,600, and the bay mare Dona Burnett to W. A. McGibbon for $1,175. Mr. McGibbon also purchased the brown gelding Short Hose for $825. Twin Six, a highly finished black gelding, was bought by Mr. DeRys for $775. The chestnut chestnut gelding Chambun sold to T. Collins, Philadelphia, for $800. The gray mare Irish Linen was purchased by Miss Margaret Whitney for $600 and the bay mare Gay Heart was sold to L. J. Horowitz for $600.

—o—

William Carr, of New York, who is an Englishman and has seen nearly all the best hackneys exhibited in that country and in New York in recent years, says that American breeders are now showing the best hackney ponies in the world. The American ponies have more quality than any found abroad and in Mr. Carr's opinion American breeders have only to make the best of their opportunities to be exporting hackney ponies to England in a few years.

◈◈◈

R. S. Skinner has been promoted from assistant secretary to secretary of the Montana State Fair. He succeeds P. B. Sheldon, an able and well known newspaper man who resigned recently to become editor of the Helena Daily Record.

◈◈◈

T. H. Dudley of Santa Monica, Los Angeles county, has been appointed by Governor Hiram W. Johnson a member of the State Board of Agriculture to succeed A. L. Scott of San Francisco, who recently resigned his office because of pressure of business. Dudley's appointment takes effect immediately.

THE SUMMER SESSION AT OUR UNIVERSITY.

How to raise chickens as well as economics and theories of social reform, how to run a milk business as well as art, music, Browning, and Shakespeare; how to plan and conduct home or school gardens as well as French, German, Italian and Spanish, will be taught in the approaching summer session of the University of California, from June 26 to August 5, for Agriculture is to be made an important part of the summer session curriculum.

A number of these agricultural courses will be planned especially to aid teachers of agriculture in the high schools, including courses on agencies for rural progress, rural school administration, general science, and first-year agriculture, nature study and school gardens, agriculture in secondary schools, and work for graduate students who are specializing in agricultural education.

There will be fundamental scientific courses such as those in general agricultural chemistry, soils, fertilizers, and entomology, including systematic entomology, economic entomology, field and laboratory work in collecting and identifying the common insects of the San Francisco bay region, and a "mosquito survey," for which a party of summer session students will spend six weeks traveling about California studying the habits of the mosquitoes responsible for malaria, and means for their control.

There will be a course in veterinary science in which students will be shown how to examine horses for soundness, age, and physical fitness; how to dissect a horse, and how meat is inspected for market purposes; the prevention and treatment of the common diseases of cattle including field work in cattle surgery, milk, meat, and market inspection from a veterinary standpoint; field work in tuberculin-testing of cattle, prevention of infectious diseases of animals, and field work in immunizing swine against hog cholera.

The more common diseases of California crops will also be studied, with opportunity for graduate work on special problems in plant pathology. There will be courses in forestry principles and forestry methods. The course in poultry husbandry will take up such practical problems of a commercial poultry ranch as poultry-feeding; the feeding of chicks, growing-stock, laying hens, and fowls being fattened for market; the selecting and laying out of a poultry ranch; incubation and brooding; the laws of breeding and how to practice selection so as to develop flocks of heavy layers or choice meat fowls; the construction of a poultry house; poultry equipment such as trap nests and mash hoppers; killing and picking, crating eggs for market, caponizing, the management of breeding fowls, poultry diseases and parasites; sanitation, and the general care and management of a poultry farm.

All California is to be used as a laboratory by the students of the University of California this summer, for besides the summer session work for four or five thousand students at Berkeley from June 26 to August 5 there will be a Summer School of Surveying at Swanton, a Summer Assembly of Science at the Scripps Institution for Biological Research at La Jolla, a poultry short course at Riverside, and a number of field expeditions, beginning shortly after Commencement and lasting for six weeks, in which the students of the College of Agriculture will get practice at the University Farm at Davis in general agriculture or poultry or animal husbandry; visit the principal citrus-growing regions of California; study in an entomological summer camp at the southern end of Fallen Leaf Lake problems of the insects affecting man and the domestic animals; study in typical orchards the growing and handling of the chief California deciduous fruits, and visit vineyards, wineries, and packing-houses for observation of viticultural methods, and visit different farming regions of central California to study problems of plant pathology.

—o—

The Percheron Review, authorized by the Percheron Society of America, has just been received from its compiler, Secretary Wayne Dinsmore of Chicago. It is beautifully printed and handsomely illustrated, contains a number of well written articles on the Percheron draft horse and special articles on the outlook for draft horse breeding in America and France. There is also an official report giving the registered names and numbers of all Percherons winning prizes at shows recognized by the Percheron Society of America in 1915. Secretary Dinsmore writes that a few hundred extra copies of the Percheron Review are available that he would like to place in the hands of farmers who are good prospects as purchasers of Percherons. They will only be sent upon direct application by letter from those interested who must give size of their farm, its location and the number of horses used. Any farmer directly interested in the Percheron horse should write Secretary Wayne Dinsmore, Union Stock Yards, Chicago, and secure a copy.

◈◈◈

A number of responses have been received by the advertiser who desires to purchase four yearlings by "Wilbur Lou, Prince Ansel, Vernon McKinney and some other good horse." Many of the yearlings offered are not staked and the gentleman has ordered the ad in for another week in hopes of getting a few more replies from owners who have yearlings with stake engagements that they are willing to sell. It behooves breeders to stake their colts, as the above instance clearly demonstrates.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

AGAINST PRISON GAME FARM.

A plan for the utilization of prison labor in the operation of fish and game farms, which has been advanced in the state of Washington, would not be feasible in Utah, in the opinion of Fred W. Chambers, state fish and game commissioner. Mr. Chambers will oppose its being adopted in Utah. The Washington plan has attracted considerable attention on the part of sportsmen.

The idea is to establish at Walla Walla, Wash., a co-operative fish and game farm to be operated with convict labor for supplying with fish and game counties which are too poor to establish fish and game farms of their own.

"The plan is unwise in the first place, because prisoners at that class of work would not be learning anything that would be of use to them after they were released," says Mr. Chambers. "As a means for the employment of convicts it is of little value as fish and game farms would offer work for only a few men.

"There is no need for such a system in Utah as our plan for establishment of game sanctuaries when placed in operation will adequately supply the state with fish and game. We expect to have the sanctuaries created this season and an enormous quantity of fish and game will be propagated at little cost to the state.

"Game farms are of value only when an effort is made to propagate game birds, which are not natives of the state in which the farm is established. It is the policy of this department to propagate only the native birds. If reared in sufficient quantities they will meet the desires of the Utah sportsmen."

CHANCE TO COLLECT BOUNTIES.

The guns which have been laid up by sportsmen with the closing of all game hunting seasons might do beneficial as well as profitable service for their owners if they are taken out after predatory game. Coyote, mountain lion and wildcat hunting furnish exciting sport, and in many counties of the State there are bounties offered ranging as high as $10 a scalp for these pests, with additional bounties offered by sheep and cattle men, which vary from $20 to $40.

Ground squirrels, too, are legitimate prey, and to the crack shot might offer a living in certain counties where bounties of from 3 to 5 cents are offered.

The State Fish and Game Commission has just compiled a list of counties, showing which pay bounties and the amounts paid. Though not yet complete, most of the counties of the State have filed their reports with the Commission. The list follows:

Sutter County—Coyotes, $5 each.

Shasta County—Mountain lions, $5; coyotes, $2.50.

Yuba County—Coyotes, $5.

Yolo County—Coyotes, over four months old, $10; under four months, $5.

Tehama County—Coyotes, $2.50; wildcats, $1.

Kern County—Mountain lions, $5.

Colusa County—Mountain lions, $5; coyotes, $5; coyote pups, $2.50; swift fox, $2.50.

Solano County—Coyotes, $10.

Tulare County—Coyotes, $2 in December, January and February; ground squirrels, 3 cents each.

Madera County—Coyotes, $1.50.

Merced County—Coyotes, $2.

Butte County—Coyotes, $3.

San Luis Obispo County—Ground squirrels, 5 cents each; coyotes, $2.

Humboldt County—Coyotes, $8.

Lake County—Coyotes, $5.

Sonoma County—Coyotes, $5.

Napa County—Coyotes, $10.

Trinity County—Coyotes, $3.

Nevada County—Coyotes, $2.50.

Mendocino County—Coyotes, $6. In some districts sheepmen pay as high as $40 a scalp for coyotes.

Mariposa County—Coyotes, $1.50; wildcats, $1.

At the time this list was compiled, Alpine, Calaveras, Del Norte, Glenn, Modoc, Santa Barbara, Siskiyou and Tuolumne counties had not been heard from. Some of these are known to pay liberal bounties, while others pay none. The counties not mentioned pay no bounties.

STATE TO DESTROY BIRD PEST.

The Fish and Game Commission, to which is delegated the function of protecting and preserving the wild life of the State, has declared war on the English Sparrow. Throughout the United States this bird has proved to be a pest and many eastern cities have waged war against it for many years past. Here in California, as elsewhere, the English sparrow is not only filthy in its habits and destructive to crops, but in addition drives out the native insectivorous and song birds which are beneficial to man's interests. The campaign to be instituted by the Commission will probably constitute the first united effort toward this end to be made by State in the Union. A leaflet giving methods of identifying English sparrows and means of destroying them will soon be issued. In addition a statewide campaign of publicity will be undertaken to encourage a united effort to rid California of this bird pest. A week will be set aside during which everyone will be asked to co-operate in the destruction of sparrows and all of the deputies of the Fish and Game Commission will be set to work killing sparrows and directing others in the work.

TACOMA FLY-CASTING TOURNEY.

The weather man favored the Tacoma Bait and Fly Casting Club on April 30th by giving ideal weather for the first formal event of the season. About 15 members of the club were present and took part in five bait events and two fly casting events, which aroused considerable enthusiasm both among the members and a large audience of friends.

R. B. Nason, the club's president, showed good form for the first of the season by winning both quarter-ounce events. William J. Bailey, captain, carried off the honors in the half-ounce distance event with the creditable average of 127 feet 9 inches. B. B. Perrow, vice-president of the club, won the half-ounce salmon event with a single cast of 152 feet 8 inches.

The management of the club is very anxious that all of those interested in the game communicate with the secretary, H. J. Nason, at 302 Equitable Building, within the next two weeks, in order to take part in the club series. The full scores follow:

Quarter-ounce Accuracy, Percentage—R. B. Nason 96.0, William J. Bailey 94.3, Dr. R. Hutchison 93.0, H. J. Nason 91.9, C. R. Werner 88.1, D. E. Gilkey 87.0, Carl Coon 80.1, J. H. Purdy 78.6, J. D. Kalb 77.1.

Half-ounce Accuracy—C. R. Werner 97.7, William J. Bailey 96.9, B. B. Perrow 95.8, R. B. Nason 95.6, Dr. R. Hutchison 95.1, H. J. Nason 93.6, Carl Coon 92.5, W. L. Richards 86.9, D. E. Gilkey 77.9, J. H. Purdy 70.0.

Quarter-ounce Distance Bait—R. B. Nason, 97 feet 7 2-5 inches; H. J. Nason 89:8 25, Dr. R. Hutchison 57:9 3-5, C. R. Werner 49:6, William J. Bailey 41:1 1-5, D. E. Gilkey 30:4 4-5, Carl Coon 27:7 1-5.

Half-ounce Distance Bait—William J. Bailey, 127 feet 9 inches; C. R. Werner 109: 2-5, B. B. Perrow 99:6 2-5, H. J. Nason 82:3 4-5, W. L. Richards 74:1 1-5, Dr. R. Hutchison 72: 2-5, Carl Coon 52:7 1-5, D. E. Gilkey 43:7 1-5.

Half-ounce Salmon Bait—Won by B. B. Perrow, 152 feet 8 inches.

Heavy Tackle Accuracy Fly, percentage—Dr. R. Hutchison 95.60, B. B. Perrow 89.06, W. C. Phinny 89.05, C. R. Werner 89.03, J. H. Purdy 87.07.

Light Tackle Accuracy Fly—W. C. Phinny 98.08, B. B. Perrow 98.07, Dr. R. Hutchison 98.06, C. R. Werner 98.06, J. D. Thompson 98.04, William J. Bailey 97.02, Ralph Vanderkinter 96.11.

DU PONT CARDS BEGINNERS' DAY SHOOT.

The Du Pont Company of Wilmington, Delaware, has decided to hold another Beginners' Day Shoot. Clubs may hold their Beginners' Shoots any time during the month of June.

The rules for this year's event are somewhat different from last year, in that a beginner is classed as anyone who has shot at less than 500 targets prior to May 1st. This enables any one who has not shot at over 500 targets to shoot up to that number by May 1st, and to shoot as many as he wishes after that date. Permission to practice for the Beginners' Day program was thought advisable because it will tend to keep a prospect interested.

The event calls for 25 targets, and a sterling silver watch fob showing a shooter in shooting positios will be donated to each club holding a Beginners' Shoot, and they in turn will give it to the man making the best score.

A sterling silver spoon will be donated to the club having five ladies participating, same to be awarded to the lady with the best score.

While practically all clubs will hold Beginners' Shoots in June, one can be held later if absolutely necessary.

Great interest is being taken in this year's Beginners' Day. Club secretaries, prominent trapshooters and dealers and jobbers are boosting the affair. The sociability connected with such shoots is a great factor. On such occasions the trapshooter can bring to the club his closest friend, knowing that on that day above all others, he will not feel timid.

Last year's records show that 6,784 men and 522 fomen participated in Beginners' Day Shoots. From present indications this year's event will be the biggest thing of its kind ever held.

The Du Pont Company mill furnish any one who is interested with full particulars.

Drink Jackson's Napa Soda.

FISH LINES FROM THE SOUTH.

While Southland pin-fishermen were salmon-egging the 1916 crop of trout to their doom the last few days, the "regular" anglers were not by any means idle. Two season's record fish were caught at Catalina—one, a yellowtail, weighing 28¼ pounds, being brought to gaff by Dr. W. E. Sawyer, and the other, a 16-pound bonita, being placed to the credit of William Farnum.

The bonita, in addition to being the largest of the winter angling season, is the largest that has been taken for several years in Southern California waters, though they run up to thirty pounds in Hawaiian waters.

* * * *

John Beckwith and Jack Irwin trawled out of San Pedro last Sunday and landed fourteen barracuda and thirty rock bass. Mr. Beckwith reported the ocean to bealive with yellowtail and that they were feeding at the surface, but would not pay any attention to any of the many different lines that he offered.

* * * *

John Schott and Bert Fry trekked to Agra on Sunday and after a strenuous climb to arrive at the right spot were rewarded with some very good fishing—while it lasted. Schott landed a four and one-half pound croaker, one yellowfin, one China croaker and two corbina. Fry caught a three-pound China croaker.

* * * *

A new species of tuna, at least new to these waters, was brought to gaff by James W. Pump in his recent Hawaiian trip. It is known to science as the "Tuna Sibi," and has a shape and coloring similar to the bluefin, but with the anal and second dorsal fins greatly elongated. This gives the tuna sibi a speedy, streamline appearance which is borne out in fact by the long, fast runs he makes when hooked, only a small percentage of those that are fastened ever being brought to gaff.

* * * *

Exceptionally good fishing is reported by the Ocean Shore Railroad on its five creeks, the Purissima, Lobitos, Tunitas, San Gregorio and Pescadero. The five streams were well stocked last year with more than 300,000 young fish and it is said that the fish in the creeks are larger than in almost any other section of the State. Purissima Creek is 34 miles from this city and the Pescadero is 54 miles; the other three creeks lie between.

GOOD FISHING AT BEAR VALLEY.

Opening week at Bear Valley was the best since the lake was stocked with trout, according to information received here. Both the lake and stream fishing were excellent. Bear Creek and Van Duzen Creek abound with good pools, which are filled with large trout.

Feminine anglers have established quite a record in the valley during the week. One party, consisting of Mrs. E. M. Dickey, Mrs. A. H. White, Mrs. Charles White and Mrs. Russell McD. Taylor of Los Angeles, caught limits every day they were at the lake.

Those at Pine Knot Lodge who reported limit catches included A. S. (Duffy) Swartz and Walter Leeds of Los Angeles, Mrs. E. M. Dickey, Mrs. A. H. White, Mrs. Charles White and Mrs. Russell McD. Taylor of Los Angeles; Charles Hastings of New York, Fred W. Sewell and J. L. Burley of Los Angeles, Mr. and Mrs. Reginald Frost and Mrs. W. L. Porter and daughter of Boston, Charles Phillips, J. L. Alabastor and H. F. Groat of Riverside and Dr. Clarence Moore of Los Angeles and party of five.

James J. Jeffries, Si Myrick, Clarence Kolb and Mel Nordlinger, who spent the week at Knight's Camp, returned to Los Angeles Saturday after getting limit catches every day. Others who reported limit catches at Knight's Camp included Mr. and Mrs. Robert Cathcart, Mr. and Mrs. Charles Monahan, Jack Lankershim and Mrs. C. N. Goodhue of Los Angeles, Dr. George Holcomb and party of Los Angeles, Tom Nicholson and party, Charles Reed and party, W. N. Palmer and party, William Gunnisan and many others.

* * * *

Try This System.—The women of Samoa often fish in the sea without nets, boats or hooks. They simply wade into the water and form themselves into a ring. The fishes being so plentiful, they are almost sure to have imprisoned some in the ring. These women are very quick and active, and every time they catch a fish with their hands they simply throw it alive into the basket on their back.—Exchange.

* * * *

G. F. Putnam, P. H. Gaumitz, E. C. Butler and L. L. Neal, all of Hoquiam, Wash., recently made what is said to be the largest single day's rod catch of fresh water fish ever made in that vicinity. They took twenty-two Dolly Varden trout, totaling 105 pounds, in five hours' fishing at Lake Queniult. Mr. Putnam caught the largest fish, which was twenty-seven inches in length and weighed eight and one-half pounds. The anglers used light fly rods.

* * * *

John Meeter, Cecil Buckley and Eddie Pepper had a good fishing trip in the Gabilans. They fished in the waters of Bardin Creek with considerable success. Pepper got the largest basket—40 trout. Buckley landed 25 and Meeker 15. The boys left Hollister at midnight in a buggy, reaching their destination at 6 in the morning.

Championship Trap Shoots on The Tapis

COAST BLUE ROCK BUSTERS GETTING READY FOR ATTRACTIVE EVENTS

San Jose Club.—As a preliminary to the California-Nevada tournament at San Jose, on May 28, 29, 30 and 31, there will be a team match on Sunday, May 14th. The Golden Gate Club and Family Club of San Francisco, Modesto and the San Jose Club will meet in competition and the squad with the lowest score will have to foot the bill for dinner for the whole party. A royal good time is expected.

The Family Club is going to have two teams. Such crack shots as H. O. Harrison, Dr. C. D. McGettigan, H. Brickell, W. H. Landry, E. R. Diamond, Colonel Dorsey, William H. Sanborn, Frederick K. Burnham, Joseph Holmes and John C. Brickell will call "pull" for the club. The Golden Gaters will have Toney Prior, N. A. Howard, Barney Worthen, W. J. Terry and Andy Flickinger on the firing line. The San Jose standbys will be O. N. Ford, Charles H. Nash, Dr. A. M. Barker, A. F. Baumgartner and George H. Anderson. Modesto can be counted on for a strong aggregation.

The five-men team competition will give the powder burners some practice over the grounds where the California-Nevada state championship event will be shot. A number of other out-of-town visitors are expected to put in an appearance to sight the blue rocks.

* * * *

Pastime Club.—High gun honors at the opening of the Pastime Gun Club's tournament on May 4th were divided by Dick Reed of San Francisco and R. J. Morse of Chicago. They quit with 93x100. Scores of 100 targets were:

Morse 93, Reed 93, Mellus 91, A. Julian 88, Holohan 88, Justins 87, Barber 85, Mullen 84, Mitchell 83, Beckwith 83, A. L. Cook 80, Mrs. C. E. Groat 80, C. A. Haight 80, C. Julian 78, Groat 77, Cline 77, Hoyt 75, Dunn 70, Oliver 63. Other scores were: Vories70x80, Drummond 51x60, Rossbach 44x60, Gray 44x60, Baldwin 21x60, W. Y. Wetzell 32x45, Kelly 28x40.

Along about quitting time one of the hired hands in Secretary Millison's office announced that a husky from San Diego named Julie Weisser had won amateur high average for the second day and that the kaisermen also had pinched the $25 bank account given by President E. M. Barber of Clan Pastime.

The merchandise prizes were won as follows:

Mellus, Remington rifle; Vories, auto stove; Justins, $5 laundry account; Weisser, the Frank Greene special prize; Morse, stein; Dr. Fuller, ukelele; Mullin, silver buckle belt; Pfirrmann, aluminum roaster; Mrs. C. E. Groat, toilet set; Lee Couts, sweater; Hinckley, hat; Stanton Bruner, box cigars, and O. N. Ford, pair shoes.

Professional high average was won by Len Hawxhurst, who carded 194x200. Dick Reed and Ed Mitchell tied for second high with 191x200. These men are with the Peters, Remington and Selby ammunition companies, respectively.

Mrs. C. E. Groat of Los Angeles made a record for herself by breaking 90x100. Mrs. Groat is touted as the greatest amateur woman trapshot in America today. In the merchandise shoot-off to break the 23-tie, Mrs. Groat defeated a squad of good ones in O. N. Ford, Hip Justins, Archie Julian, Jack Merrill and H. M. Williams, the sailorman, and she did it with 9 straight.

Class shooting, percentage system, 10 events of 20 birds each—scores:

Mitchell 191, Mellus 189, Pfirrmann 186, Mullen 175, Vories 185, Ford 189, Hawxhurst 194, Anderson 165, Reed 191, S. A. Bruner 188, Holohan 180, Fuller 180, Cline 165, Beckwith 178, Barber 173, A. Julian 182, Sargent 179, C. Julian 159, Merrill 179, Morse 181, Walsh 144, Rossbach 164, Haight 179, Justins 171, Hoyt 148, Couts 174, Cook 183, Oliver 131, Arneill 172, Weisser 191, Williams 184, Dunn 184, A. W. Bruner 164, Mrs. Groat 175, C. E. Groat 170, Mrs. Pfirrmann 82, Burns 88.

The feature of getaway day at the Pastime Club's trap tournament on Saturday was the high wind that swept over the traps. The dirtbirds took to the going with little regard for trap reputations and the result was that long runs and classy scores were rather minus. High gun honors for the tournament, among the amateurs, were divided by Julie Weisser of San Diego and Heinie Pfirrmann of Los Angeles, with scores of 377x400. Frank Mellus was second with 376x400. The two Dutchmen had the British stock on the run both days and cinched the tournament glory under wraps.

Among the professionals Len Hawxhurst of the Peters Cartridge Company won rather easily, 386x400. Dick Reed, Remington-UMC expert, 373x400, and Guy Holohan of the DuPont squad, 359x400, were next up.

Long runs were made by Ed Mitchell, 51; Julie Weisser, 67; Frank Mellus, 71* Len Hawxhurst, 59. Which would indicate that the sea breeze would not be denied.

The diamond medal event saw Los Angeles and San Diego blazing to break a tie. Joe Hinckley of the Pastimers and W. A. Cornelius, an Angel City revenue man, tied with 46 each. On the shoot-off at 25 birds Joe had his man four down, at one stage of the game, and then "Cousin Joe" towered worse than the tarhawks, dropping five and losing the fine trophy. Cornelius was mighty lucky.

COMING REGISTERED TOURNAMENTS.

California.

Alameda, May 20—Golden Gate Club, Clarence A. Haight, Secretary.

San Jose, May 28, 29, 30—California-Nevada Association Tournament, San Jose Blue Rock Club, O. N. Ford, Secretary.

Eureka, July 4—Eureka Blue Rock Club, H. A. Hine, President.

Oregon.

Portland, June 5, 6, 7—Sportsmen's Association of the Northwest Tournament, under the auspices of the Portland Gun Club, Frank Templeton, Secretary.

Portland, Sept. 12, 13, 14—Pacific Coast Handicap.

Washington.

Seattle, May 23, 24.—Washington State tourney, Seattle, Association.

Chehalis, May 30—Chehalis Rod and Gun Club, Gus T. Thacker, President.

Seattle, July 4—"Old Policy," Green Lake Gun Club, W. C. Smith, Secretary

Tacoma, July 18, 19, 20, 21—Pacific Indians, F. C. Riehl, Secretary.

In the added event H. E. Sargent's "handsome trophy" proved to be a grand new $10 gold piece, to which the gun club added $10, in the event at doubles. Foster Couts won this with 25 in 15 pairs, Heinie Pfirrmann second with 21.

Mrs. C. E. Groat laced two points of a 90 per cent clip at 200 targets, and considering the shooting conditions her work was remarkably good. Mrs. Ad Topperwein, the great professional, could have bettered the fair Angeleno's score. The scores follow. At 200 targets:—

Hawxhurst 192, Mitchell 164, Mellus 187, Pfirrmann 191, Mullen 168, Vories 178, Ford 183, Andrews 178, Reed 182, S. A. Bruner 177, Holohan 179, Fuller 182, Harry Cline 166, Beckwith 184, Barber 150, A. Julian 183, Sargent 165, C. Julian 164, Merrill 164, Williams 187, Walsh 159, Rossbach 159, Haight 175, Mrs. Pfirrmann 97x150, Hoyt 143, Lee Couts 178, Cook 168, Oliver 160, Arneil 158, Weisser 186, Andrews 163, A. W. Bruner 153, Mrs. C. E. Groat 176, Groat 72x100, Hinckley 167, Willie Wetzell 150, Cornelius 178, Grewell 122x140.

* * * *

Oakland Elks.—The Oakland Elks' Gun Club were at the traps in Alameda on Sunday for their second monthly shoot. W. J. Terry came through high gun with the creditable score of 49 out of 50. H. Havens was close behind and Barney Worthen, H. Lorenson, N. A. Howard and F. Blum sighted well.

The Alameda Elks will hold the center of the stage tomorrow and with many of the local powder-burners home from participating in outside tournaments, quite a gathering is expected. The scores were, 50 targets:—

W. J. Terry 49, N. A. Howard 42, H. Havens 48, B. Worthen 45, H. C. Peet 41, W. H. Price 39, H. Lorenson 45, L. Tesio 34, F. Miller 30, Dr. Pruett 8, *J. W. F. Moore 26, M. S. Goodman 41, *F. Blum 42, *L. Middleton 29, "Pop" Merrill 33, F. M. Carter 37, L. E. Carter 30, Martini 35, Al Durney 30, Higby 28, Dr. Hamlin 33, C. D. Hamlin Jr. 27, George Feldman 33, E. Korn 37, A. B. Jordon 23, *H. Tuscott 20.

*Professionals.

* * * *

Shoot at Woodbridge.—The trigger pullers had a good meet at Woodbridge last Sunday. Stockton gunners were well represented. The following are the scores, made on fifty birds—

H. G. Balkwill 48, L. Woods 46, M. Leffler 45, F. Sollars 40, George Ellis 39, H. Lonjers 39, R. Buckingham 38, R. McCoy 38, W. Garrison 41, J. R. Ross 40, L. Jackson 37, H. J. Lockey 34, Dr. S. F. Priestley 33, A. Covell 33, E. Shinn 26, O. S. Neuman 25, B. Woods 24.

Next Sunday the Woodbridge and Modesto Gun Club members will visit the Stockton Gun Club quarters which have recently been remodeled.

* * * *

Vernon Club.—Although a number of the local blue rock busters remained over night at San Diego, a good percentage of the Vernonite cracks turned up Sunday to compete in the George T. Cline handicap, staged by the Vernon Gun Club.

The Los Angeles Gun Club also had a fairly good crowd at the regular Sunday morning shoot. F. Free accomplished high gun honors, breaking 109x125. Other scores made were: Frank H. Nichols, 24x25, Charlie Nichols 23x25, Rowe 51x75, Louis Mellus 65x75, and George Melford 43x50.

C. E. Groat, president of the Vernon Gun Club, won his first leg on the Cline trophy with the good score of 48x50 from sixteen yards. Groat, accompanied by his wife and son, left San Diego in the afternoon and, considering the hard drive for one-third of the distance back, his 48x50 score is remarkable. He broke 47 out of 50 in the W. H. Hoegee trophy contest from the same distance, making a total of 95 out of 100. He popped 17x25 in the 20-gauge competition.

Twenty-two shooters competed in Vernon. Dierdoff broke high in the Hoegee shoot with 49 dead targets out of the half century.

Mrs. Groat tied her husband for high amateur average for the day with 95x100. Mrs. Groat made some excellent scores at the San Diego tournament.

L. M. Hawxhurst, the Peters professional from San Diego, hung high professional score with 97 out of 100. He broke 49x50 from twenty yards and 48 out of 50 from nineteen yards. He was the high gun over all at the San Diego shoot.

The 20-gauge cracks were led by Fish. His score was 22x25. He also hung up the good score of 47x50 with a 20-gauge in the Hoegee competition.

George T. Cline handicap—

	Hdcp.	Score
Council	17	46x50
Manderville	16	41x50
R. L. Hall	16	40x50
Rause	16	39x50
Smith	16	42x50
Reid	16	41x50
C. E. Groat	16	48x50
Mrs. Groat	17	47x50
Fish	16	47x50
Hawxhurst	20	49x50
A. W. Bruner	16	43x50
Dr. Packard	20	47x50
Pugh	18	42x50
Meek	17	43x50
White	18	45x50
Van Ness	16	38x50

William H. Hoegee handicap—

Twenty-gauge competition, 20 targets—

C. E. Groat 17, C. W. Fish 22, Hawxhurst 18, Hedderly 19, Kimble 13.

* * * *

Salt Lake Club.—Bert Bain again placed his name on the cup at the traps on April 30th by defeating a field of about twenty shooters. A high wind which began shortly after the shooting started made a difference in the scores, and several of the boys who started out strong soon fell by the wayside.

The complete standing of the boys who are competing in the marchandise shoot, which has been running several weeks, is as follows: Bishop 30, Bain 28, Tingey 22, Heagren 20, Mitchell 20, Bray 19, Reilley 19, Klein 18, Fisher 17, Moffatt 17.

The scores for April 30th were as follows:

Moffatt	46	2	48
Becker	46	..	46
Tingey	45	2	47
Reilley	45	..	45
Bain	45	4	49
Stoney	43	..	43
Bishop	42	1	43
Klein	41	3	44
Fisher	39	3	41
Edmunds	38	8	46
Mitchell	22	2	40
Bray	37	5	42
Palm	35	7	42
Galligher	34	4	38
Engles	30	9	39
Springer	17	..	17
*Bert Brown	10	3	13
*Cummings	48	..	48
*Hood	45	..	45

*Professional.

* * * *

Green Lake Club.—C. E. McKelvey turned in the high score on April 30th at the Green Lake Gun Club with forty-six out of his fifty, while L. S. Barnes and E. K. van Vleck tied for second honors with forty-five. Van Vleck was shooting his new Ithaca trap gun for the first time and can feel proud of his score of forty-five.

McKelvey, who had shot earlier in the day at Harbor Island, arrived at the Green Lake traps rather late, but is laying claim to the road record between the two trap grounds, while "Dusty" Rhodes and G. A. Conklin are willing to swear that he saved considerable money by not meeting a speed cop on the way.

The scores, at 50 targets:—

C. E. McKelvey 46, L. S. Barnes 45, E. K. van Vleck 45, Don R. Baker 44, W. C. Smith 44, *D. Rhodes 44, G. A. Conklin 42, George B. Baker 41, C. B. Fitzgerald 41, Dr. J. F. Hill 41, E. R. Bacon 40, J. W. Geltz 40, Dr. M. A. Winningham 40, Gus Peterson 39, S. A. Martin 38, Hi Follrich 38, George D. Horst 38, Fred Pries 37, Dr. A. B. Kidd 35, Dr. R. V. Mills 35, Dr. S. W. Case 32, Dr. S. W. Giffin 29, S. E. Bacon 29, R. W. Brehm 29, L. A. Taylor 27, George O. Colwell 23, Dr. C. H. Will 21. (*Professional.)

Sportsmen's Row

Dr. Henry Abrahm of San Francisco is one of the devotees of the rod and gun. He never misses an opportunity of getting out to a stream or on hill or dell during the season. Together with Henry Kleversahl he made an interesting trip to the headwaters of the Garcia river. The trip was made by automobile and conditions were found ideal for fly-fishing. March brown and gray hackle with yellow body were the best killers for limit baskets.

* * * *

Carl Westerfeld, the Fish and Game Commissioner for the San Francisco district, fished Coyote Creek last week with Steve Hauser and John C. Piver and managed to land about fifty trout. There was a big delegation of anglers in that district.

* * * *

Did you notice what Dick Reed did in Los Angeles? Stationed away back on the 22-yard mark he cracked fifty out of fifty. He was high professional with 290 out of 300.

* * * *

O. N. Ford is beginning to hit his true form. He distinguished himself by taking the Los Angeles championship with a score of 95x100.

* * * *

How would you like to go fishing and while catching the limit, pick up a number of gold nuggets weighing from $5 to $25 apiece? Kind of pleasant, eh? Well, that's what they say James C. Stinnett did last Sunday while trying his luck on the East Branch of the Feather River about half a mile above Rich, formerly known as Rich Bar. He got the limit of trout, too. Great "Fisherman's Luck."

* * * *

The San Francisco Fly-Casting Club has a tournament scheduled for Stow Lake on Saturday and Sunday. The local casters have been breaking records right and left this season.

* * * *

Trapshooting minus an arm holds no discomforts for George W. Maxwell of Hastings, Neb. He is not only able to better the 90 per cent mark annually, but is rated one of the best shots in America at the doubles. He controls his gun with his right arm, the left being cut off at the shoulder. During the year 1913 Maxwell shot at 5000 targets and scored an average of 93 per cent. In 1914 he shot at 5325 targets, earning an average of 95 per cent.

* * * *

J. M. Walker won the championship of Oklahoma in the State tournament, breaking 94 out of 100 thrown targets. Tulsa, Okla., will conduct the 1917 championship shoot.

* * * *

Toledo, Ohio, announces that it desires the 1917 Grand American Handicap. There is nothing like making the announcement early so that the Interstate Association will know who is interested.

* * * *

H. R. Everding, ex-president of the Portland Gun Club, who was operated on last month, is gradually getting back his old-time strength. He has planned on leaving for Shipherd's Springs.

* * * *

Albany, Oregon, will be the mecca of Portland trapshooters next week. The annual state tourney for 1915 is to be under the auspices of the Albany Rod and Gun Club May 15 and 16. The winner of the main event represents Oregon at the Grand American Handicap, this year slated for St. Louis, Mo. Two or three squads from the Portland Gun Club are considering taking in the events.

* * * *

C. E. McKelvey, president of the Seattle, Wash., Gun Club and Trapshooters' Association, has sent invitations asking for representatives to attend the shoot May 22, 23 and 24. The Washington state championship will be held on May 24th.

* * * *

The Family Club, one of the exclusive social organizations of San Francisco, is strong for the "sport alluring." The club has a beautiful trap shooting grounds down on the "farm" on the peninsular, and the crack shots keep their hand in there. The Family boys will have two squads in the team match at San Jose tomorrow.

* * * *

J. S. Hunter, assistant executive officer of the Fish and Game Commission, and A. D. Ferguson, field agent, are on a tour of inspection down through the San Joaquin district.

* * * *

K. E. Feusie showed H. C. Golcher a fine limit basket of trout he took in Alameda county last Sunday. He was accompanied on the trip by C. M. Courtwright and Bob Marple.

* * * *

J. G. Hoopes, a young settler of the Viewpoint vicinity, arrived in Lakeview, Oregon, recently with 20 coyote and 10 wildcat pelts strapped on his back, for which he received $100 in bounties. Hoopes at once started to make arrangements for the sale of the pelts. Present quotations show coyote pelts are worth $8 each and a wildcat pelt sells for $3, making a total of $280 returned from his side-line of three months.

TRAP-SHOOTING IS PROVING ATTRACTIVE SPORT FOR THE LADIES

It is one competition where the fair sex can hold their own against the men. There are a number of lady shots on the Pacific Coast who are making names for themselves as blue rock busters. The squad pictured here is evidence that the presence of women in the game add beauty and class to the "sport alluring."

SONG-BIRDS ARE KILLED.

A number of flagrant violations of the law protecting the song-birds of the State have taken place this winter. Convictions have been obtained in practically every case. Between December 1 and March 1, sixty-five arrests were made and $793.50 in fines imposed. A large proportion of the hunters arrested were Italians who had been shooting robins. Forty-eight robins, a red-shafted flicker, and a California towhee were taken from two men who had been hunting in Contra Costa county, and twenty-eight robins, ready to be roasted, were confiscated from two men in Sacramento.—Fish and Game Commission.

* * * *

Astoria Club—Seventeen members of the Astoria Rod and Gun Club participated in the semi-weekly shoot at the port docks. Dr. Vaughn, who has only recently started shooting at the traps, led the shooting, breaking 19 out of 25 targets. Charles Halderman, Charles Anet and Charles Burlingame took second honors with 18, and Allan Fulton and S. S. Sovey third with 17.

Following are the percentages of the shoot: Dr. Vaughn .760, Charles Halderman .720, Chas. Anet .720, Charles Burlingame .720, A. C. Fulton and S. S. Sovey .680, Dr. Casey and W. N. Ford .640, E. C. Judd .600, Sherman Lovell and Dr. Forsstrom .560, Capt. Tonneson .520, Dr. Logan and W. A. Harrison .480, A. W. Kinney .320, Norris Staples, Dr. Hartman and Ben Hay, .160.

In the doubles the percentages were: Charles Burlingame and W. A. Harrison, .520; Ben Hay, .480, Dr. Forsstrom and W. N. Ford, .440.

* * * *

Portland Club.—Abner Blair won the Dupont trophy on April 30th at the Everding Park traps of the Portland Gun Club by breaking 94 per cent of the bluerocks released for him. Four nimrods recorded points on the Imperial Hotel diamond medal, all making 25. They are: Archie Parrott, W. C. Bristol with 20-gauge gun, James Morris and Al Seguin.

The annual tournament of the Northwest Sportsmen's Trapshooting Association will be held under the auspices of the Portland Gun Club next month during the Rose Festival and A. W. Strowger, president of the club, is making an active campaign to have the largest attendance in the history of the tourney when the first bird is sent from the trap-house, June 5th.

H. R. Everding, former president of the Portland Gun Club, who was operated on recently by Dr. Sandford Whiting at Good Samaritan Hospital, expects to leave the hospital this week for Shipherds Springs, Wash., where he will remain for several weeks. He plans to return in time to witness the Northwest shoot June 4-7.

Following are the Sunday scores:

John T. Murphy 82, J. G. Clewson 83, H. A. Pollock 93, H. L. Streeter 87, A. Blair 94, A. Seguin 93, J. S. Crane 83, A. W. Strowger 83, George Butz 86, James Morris 87, E. B. Van Arnam 88, W. C. Bristol 79, J. Ball 93, C. C. Kelly 82, E. H. Keller 92, F. Randall 70, A. L. Zichrisson 84, P. J. Holohan 92, A. G. Mayers 78, A. Parrott 84, J. L. Bitts 42, Miss R. Bitts 43, O. D. Thornton 90 and M. Jensen 66.

* * * *

Tacoma Club.—The Tacoma Gun Club held its regular shoot at Manito on April 30. Dave Bales won the Majestic Cafe trophy. J. Cooper won the L. S. Mellinger gold medal. Dague, L. Riehl and J. Cooper were all tied for high average on the Everding diamond pin. J. A. Dague won the white flyer fob. J. Cooper won the high average on the Dupont trophy. Fred Griffin and J. Cooper were tied for high average on the Hercules powder trophy. J. A. Dague won the challenge cup after a shoot off with A. Riehl, J. Cooper, Dave Bales and Young.

There were no spoons won, as no one was able to break 25 straight. The following scores were made out of 100 birds for the Majestic Cafe trophy:—

	Broke.	Hdcp.	Ttl.
J. Cooper	90	5	95
Campbell	87	4	91
L. Riehl	87	1	88
Griffin	85	6	91
Bales	85	11	96
A. Riehl	85	5	90
Dague	84	2	86
Young	81	7	88

The following scores were made on the L. S. Mellinger medal out of 50 birds:—

	Broke.	Hdcp.	Ttl.
J. Cooper	46	4	50
Dague	46	3	49
Young	40	9	49
L. Riehl	46	2	48
Campbell	45	3	48
Griffin	43	3	46
Bales	41	5	46
A. Riehl	44	1	45

* * *

Seattle Association.—With good weather favoring the bunch and the State Tournament approaching, a record crowd of shooters turned out for the regular program shoot of the Seattle Trapshooters' Ass'n.

Les. Reid was high professional and also scored high for the day, hitting a pace of 49 out of 50 and 99 out of 100 targets. Hugh Fleming ran high amateur, marking up 48, and 95 out of 100 targets.

R. S. Searle, Matt Grossman, C. E. McKelvey and Deskin Reid all four shooters ranked in second place with 46 to their credit.

The State Tournament, which is to be held on the Harbor Island grounds, is creating considerable interest this season and the largest crowd of out-of-town shooters ever assembled is expected to be in the line-up.

H. C. Kirkland, of Leavenworth, Wash., shot with the club. Kirkland stated that the "sport alluring" was going strong over in his section.

H. W. Bunker, D. R. McDonald and O. E. Evans shot with the club for the first time. Fred Sumner showed up and did his first shooting of the season. Dr. Grant and Dr. T. R. Clark came out late in the program, but shot enough to show that they had not lost their old form.

Several of the fair sex graced the spectators' seats among whom were Miss Fish, Mrs. Root, Mrs. E. A. Fry and Mrs. Virgil Piper.

The scores, at 50 targets—

*L. H. Reid 49, Hugh Fleming 48, Matt Grossman 46, C. E. McKelvey 46, R. S. Searle 46, *D. Rhodes 44, G. H. Young 44, Ralph Kinzer 43, Tom Wilkes 43, Joe Bacher 42, C. R. Sydman 42, J. H. Wilman 41, H. W. Bunker 41, J. M. Valentine 41, J. H. Hopkins 40, Fred Sumner 40, Fred Landwehr 40, William Schilpin 37, Robert Tyler 37, H. C. Kirkland 37, S. Burt 37, John Considine 36, G. A. Conklin 36, W. B. Taft 35, Mr. Steel 35, J. V. Hough 35, F. Soergel 33, C. W. Bandy 29. D. R. McDonald 26, Deskin Reid 46.

100 targets—*L. H. Reid 99, Hugh Fleming 95, Matt Grossman 91, *D. Rhodes 91, Deskin Reid 91, C. E. McKelvey 89, Tom Wilkes 88, Joe Bacher 87, Ralph Kinzer 87, Fred Landwehr 84, G. A. Conklin 82, Fred Sumner 81, W. B. Taft 79, John Considine 79, J. H. Hopkins 77, Mr. Steel 77, J. H. Wilman 75, J. M. Valentine 74, J. V. Hough 73, H. W. Bunker 69, C. W. Bandy 66, D. R. McDonald 54. (*Professional.)

O. E. Evans, Dr. T. R. Clark and Dr. Grant did not shoot in the regular program. E. A. FRY.

* * *

SkyKomish Club.—The members of the Skykomish Gun Club enjoyed a pleasant program at their club grounds on April 30th. The scores:

Williams 70, Hinebaugh 71, Fournier 68, Farr 63, Henry 41, Hove 45, Rohde 39, Brodburn 42, McAvoy 35, Dean 20.

MOUNTAIN QUAIL PROSPERING.

W. J. Moore, the fish and game deputy at Napa, makes the report that there are plenty of quail left in his district and that they are prospering. John Terra of Akell Ranch has four flocks of mountain quail and they are doing nicely. During the past winter Terra killed 21 foxes, seven coyotes, and skunks and coons galore. He has realized something like $300 through trapping the animals. No rain has fallen in Napa and the streams are accordingly low with trout fishing not the best.

J. E. Newsame of Newman says that fishing is pretty good in his district and E. W. Smalley of Hanford reports good catches. Paul Smith of Guerneville found but few limits during the opening week of the season. Henry Lenciono of Santa Rosa writes that Austin Creek provided a number of limits.

* * * *

Proposes Feeding Stations.—J. W. Jameson of Dutch Rock has written to the Fish and Game Commission, proposing that feeding stations be set up and maintained in the Sierras for the protection and welfare of wild game. He wants two-story sheds with racks of alfalfa for the deer and grain for quail. A plan may be worked out next season to assist the game in finding food when the snow falls.

* * * *

Open McCloud's River—Anglers and sportsmen in the northern section of the State have not given up their fight for the opening of a passage way onto the McCloud river for fishing purposes. The Siskiyou County Sportsmen's Association recently held a meeting to discuss ways and means of opening up the stream to the public. The land is privately owned and the public has been prohibited from fishing one of the finest streams any place in the country.

* * * *

Loses License In Wind—J. E. Perrot of Filmore, Ventura county, has a hard-luck story to tell about the opening of the trout season. He was out on his favorite stream when along came a deputy who wanted to look over his license. Perrot knew the law and promptly obeyed. While passing over the license to deputy A. H. Brown a gust of wind carried it into the Mendota Dam and along with it Perrot's hat. Both were lost and Perrot says that the next time he goes fishing he is going to have a string on both his hat and license.

* * * *

Snow In Sierras.—A fall of snow in the Sierras last Saturday is reported to have taken place. This will be bad news to the anglers who were looking forward to getting off the ground the heavy fall that took place last winter. It was not heavy and will likely not interfere with the sport to any material degree. Still, it is figured that it will take until June before all of the snow runs off in the mountainous country.

* * * *

High water in the San Joaquin river is still a detriment to the making of good catches, according to Fresno fishermen. Good results have been reported from the North Fork and Big Creek regions and other mountain points. Bass fishing is good at Shaver Lake and also at the California Hot Springs in Tulare county. The high water also is holding back the season for sale and striped bass in the rivers. Should the cool weather continue for a few days the catches should be good at Mendota dam. Excellent fishing for the summer is expected back in the mountains, where the trout anglers will be unusually successful this year, according to predictions.

MARIN COUNTY KENNEL SHOW

The Marin County Kennel Club will hold its annual show in Mill Valley on Decoration Day, May 30th. Indications are that about 100 dogs will be on exhibition. Sam Crabtree, of Failsworth, England, will judge all breeds excepting Boston terriers. It has not been decided as yet who will pass on the latter breed.

‡ ‡ ‡

Mrs. Jack Bradshaw's crack brace of Sealyham terriers, Bromley Star and Bromley Yixon, who attracted considerable attention at the recent Golden Gate show, will be shown over the Southern circuit this summer. Both dogs are well known in England, having won at several large shows.

‡ ‡ ‡

Hal Walker has decided to take an Airedale terrier with him on his trip to Maine. Walker will motor there and back and he figures that he will need a bow-wow to watch the bus.

‡ ‡ ‡

Sam Crabtree, who will judge the Mill Valley show, is well known across the pond as a breeder of bulldogs. Crabtree is considered to be one of the most successful breeders of bulldogs in England, having raised such fliers as Failsworth White Knight, White Marquis, Moray King and many others who have made the Failsworth kennels known.

‡ ‡ ‡

Don Alhambra, the winning bulldog which Harry Rushton, of Ashbury Park, recently purchased from D. S. Anderson, a well known breeder of Dundee, Scotland, died the night after his arrival at Liverpool. The dog was said to be in good condition and the cause of his death is unknown.

‡ ‡ ‡

The Irish Terrier Club of America will hold its annual show this year in conjunction with the all-terrier show of the Wissahickon Kennel Club, but will change the venue to the Biltmore Hotel. This exhibition will take place on June 2. D. D. Bush, of Wilmington, Del., will be the judge. Four points will go to the winners at the Biltmore and an additional point may be earned the next day at Chestnut Hill. William L. Barclay will judge at Wissahickon.

‡ ‡ ‡

The officers of the Bulldog Breeders' Association met last week at the Vanderbilt Hotel and presented Alfred Benjamin, president of the London Bulldog Club, with a gold medal in commemoration of his visit to this country.

‡ ‡ ‡

The Bulldog Club of America will hold its quarterly meeting May 16th at Gregorian. Several important matters are to be decided on.

‡ ‡ ‡

There were 475 shows held last year in Great Britain under Kennel Club rules.

‡ ‡ ‡

Among the women who have consented to act as patrons of the Blue Cross dog show to be held at Belmont Park May 20 are the following: Mrs. Reginald C. Vanderbilt, Mrs. August Belmont, Mrs. James Speyer, Baroness de Graffenreid, Mrs. French Vanderbilt, Mrs. W. Ross Proctor, Mrs. Frances Roche, Mrs. O. H. Kahn, Mrs. Jefferson Seligman, Mrs. W. Butler Duncan, Mrs. Joseph B. Thomas, Mrs. O. C. Harriman, Mrs. Alfred du Pont, Mrs. W. Seward Webb, Jr., Mrs. F. L. Hutton, Mrs. Jasper Lynch and Mrs. Laihrop Brown.

BUTTE HAS OLD AND PROSPEROUS CLUB.

The Butte (Mont.) Rod and Gun Club, which has held shoots as often as once a month since 1881, claims the distinction of being one of the oldest regularly organized gun clubs in the United States. From the time of its incorporation up to the present the Butte club has never been in debt. While the policy has been to assess the members sufficient to cover the expense of each shoot, yet by careful management the club has now more than $2,000 in its treasury; owns its own club house and has a large supply of ammunition and targets on hand. Many of the best trapshooters in the country have journeyed to Butte to meet the local cracks and most of them left satisfied that the club had a number of fine marksmen. The officers of the club at the present time are as follows: President, A. J. Walker; vice-president, W. A. Willoughby; secretary-treasurer, C. H. Smith. Mr. Smith is quite proud of the fact that he has held the office of secretary-treasurer of the club for thirty-two years, or since March 4, 1884. Among the charter members of the club who are still living are the following: Dan Jaeger, Schurz, Nev.; E. S. Paxson, Missoula, Mont.; John F. Cowan, Salt Lake City, Utah; A. Wehl, Butte, Mont.; Harry A. Sheads, Grand Forks, B. C.; P. W. Jones, Hamilton, Mont.; C. J. Wood, Divide, Mont.; Fred Gilbert, Lola, Mont., and C. H. Smith, Butte, Mont.

Trout Fishing Continues Popular

ANGLERS WHIP STREAMS UP AND DOWN THE COAST

If the crowds that were out last Sunday and during the week are any criterion, the sport of trout angling continues to be popular. It is doubtful if nearby streams and fishing nooks ever attracted larger numbers of anglers. In San Mateo, Santa Clara, Santa Cruz, Alameda and Marin counties there were thousands trying to land trout.

Reports varied relative to catches. Some got limits while others complained about the lack of fish. All agreed that the trout are running smaller this season than in the past and that the streams are very low. Conditions for fishinfi are good, however, and excellent sport has been had. The trouble seems to be that so many splash around in the streams that the fish are scared and do not rise to the fly.

Railroad companies have received the following reports from their agents:—

NORTHWESTERN PACIFIC.

Healdsburg, May 11.—Trout streams in this vicinity are in good shape. Catches, however, have been poor lately.

Dos Rios, May 11.—Very poor success so far in trout streams nearby, probably on account of extremely cold nights.

Willits, May 11.—Some very good catches being made in this vicinity but trout are small.

Cazadero, May 11—Streams here are fairly good with some limit catches.

Duncan's Mills, May 11.—Anglers have been getting the limit of trout every day at Willow Creek and Russian Gulch, about three-quarters of a mile from Duncan's Mills.

Hopland, May 11.—Fishing in Pieta Creek is fine. Fishermen report no trouble at all to get limit. Two men were caught with ninety each.

Trinidad, May 11.—Fishing in Big Lagoon fairly good at present. Some pretty good catches have been made with some of the fish weighing as high as seven and eight pounds.

WESTERN PACIFIC.

Big Bar, May 11.—Fishing good. Many limit catches made this week. Limits also taken at Shady Rest Camp. Cresto advises good catches. Salmon flies, salmon eggs and helgamites are the preferred baits and have been used with best results.

Belden, May 11. North fork Yellow Creek and Chip Creek clear. Trout taking helgamites and salmon flies. Do not rise to artificial flies as yet. Feather River not very clear and poor fishing. Large catches being made daily in all except Feather River. Trout are weighing around 3½ pounds.

Blairsden, May 11.—Fishing in streams and river now very good. Feather River is clear and normal. Using salmon eggs, and spinners and following flies: Brown and gray hackle, royal coachman, and alder. No reports of any extra large sized trout being caught. Lakes not open for at least two weeks. Weather clear and warm.

Keddie, May 11.—Fishing not very good in this vicinity. Only few catches made this week. The principal bait is salmon flies. Streams are still quite muddy.

SOUTHERN PACIFIC.

Santa Cruz, May 11.—Trout and salmon season reported very good. Large sized trout being caught daily and are numerous. Salmon run getting better and in another two weeks will be at its height.

Sisson, May 11.—Fishing poor: weather is too cold and windy.

Inyskern, Cal., May 11.—Fishing not at best yet on account of high water. Will not be at its best until about June 1st. From that time on and until close of trout season excellent fishing should be had in mountains in the vicinity of Brown. The fishing streams may be reached by pack outfits, which can be obtained at Brown. This country is perhaps the least known of any in California and abounds with wild game such as deer and bear, and a great quantity of smaller game such as quail. The game is in the Sequoia National Forest and is reached by pack outfit and saddle horses.

CALIFORNIA WING CLUB SHOOT.

Edgar Foster, the local wing shot, at the last shoot of the California Wing Club made a record which his fellow members consider the best ever made on the coast. In four races and one practice shoot Foster dropped sixty straight white flyers in spite of the fact that the wind blew all day long.

Foster first got twelve birds in the practice event and followed this with a pair of halves, a six and an eighteen without a miss. The regular champion of the club, Clarence Naumann, only missed once in the regular events, and during the day made a straight string of 44.

Eugene Foster's 44 out of 48 was worthy of comment. The best scores of the day were:—

Birds—	12	12	6	18
Edgar Foster	12	12	6	18
Clarence Naumann	12	12	6	17
Eugene Foster	12	9	5	18
Ed Hoag	11	11	5	17
H. Stelling	10	11	5	14
P. Walsh	11	11	..	..
Jack Nelson	9	12	..	..
Joe Nelson	9	6	..	..

* * *

Watsonville Club.—One of the best bluerock shoots ever held in this section of the State was enjoyed by a large crowd Sunday morning and afternoon on the Watsonville Bluerock Club grounds near Freedom. Dr. Barker of San Jose was the champion shot of the day, hitting 94 birds out of 100.

Refreshments were served to the crowd and everybody had a jolly time. The committee in charge of the affair was composed of Messrs. C. A. Palmtag, William Whitton, E. B. Walling and H. C. Rasmussen, who deserve credit for the success of the shoot.

The scores:—

W. R. Ellis 96x105, O. N. Jones 86x1125, A. Feudner 93x125, B. R. Byers 26x50, E. H. Phillips 30x50, C. Rasmussen 47x100, B. F. Crews 42x75, Fred Kooher 11x25, William Whitton 19x25, Frank Brewington 57x75, F. Tholcke 80x100, D. McFadden 85x100, J. Douglas 76x100, C. McFadden 76x100, V. Massirra 70x100, Dr. Barker 94x100, W. Baumgartner 90x100, J. O'Connors 18x50, O. S. Blodgett 32x50, A. L. Lent 69x100, Walter Jenkins 43x75, A. L. Lightford 15x25, C. Ross 9x50, J. W. Miller 57x75, Harry Brewington 12x25, C. A. Palmtag 16x25, C. Connors 3x25.

* * * *

Taft Club.—The handicap shoots of the Taft Gun Club are attracting much attention, visitors coming from as far away as Lost Hills. Each Sunday a prize is given to the one making the best score. The scores made at the last shoot were as follows:

At 20 targets—Bontadelli 14, Hartman 9, Setarns 16, J. J. Gallman 14, Tedford 12, W. Gallman 14, Taylor 7, Harris 11, Kennison 6, McKeon 17, Randolph 14, Hall 4, McKissick 8.

The Utah Sportsmen's Association held a registered shoot over the traps of the Cache Junction Gun Club. The four high men all shot Nitro Club shells. C. H. Reilley won the tournament, scoring 140x150.

THE FARM

FARM TELEPHONES.

As a social necessity on the farm a telephone has won a place years ago. As a business proposition it has a place, but not what it might have, and not what it will have.

The place the telephone has in the business end of farming is related to the disposing of farm products—the sales end. There are times when a good many days pass without any such work presenting itself that would make use of the phone. On the other hand, when it is wanted it is wanted pretty bad.

One of the places where the average farmer, who sells the usual farm crops besides the staples of corn, wheat and oats, loses is in taking stuff to the markets without a previous sale. Here is where the phone can and must be used if the top price is realized by the salesman. Suppose that there are a dozen bushels of good apples to sell. Maybe there are all of one kind—Baldwins. The market is paying 75 cents for such apples. You drive to town without a sale by phone, and the grocery or dealer knows that you won't be apt to haul them back to the farm again, so he says they're full of apples but they'll give you 50 cents or possibly 60 cents for the bunch. What do you do? Why, you sell. What did you lose? Just enough to pay for a couple of months' telephone rent.

Now there's another side to this. Every time a foreign or even a home farmer drives to town with a few bushels of apples or other truck that isn't sold, he sets a lower price for the other farmers in the section. That is not fair for him and surely not fair for the remainder of us. That's another place where all farmers are too far apart. This phone plan will eventually be a step toward co-operation. If all of us farmers would stick by the regular price there wouldn't be other prices offered. And nobody would lose except the dealer, who makes enough anyway.

But there is one important point to be watched carefully—very carefully—and that is the description of the goods that you have to sell. There can be no misrepresentation of the goods to be delivered. If you have fancy stuff to sell over the phone, then say it is fancy and arrange a price accordingly. Then deliver the fancy goods. But if it is only medium grade, be sure to say that. Soon the dealer will know that what you say is what will be delivered, and it won't be long until he'll be phoning out to you for some of the things he wants—Rocky Mountain Husbandman.

THE FARM INVENTORY.

The best business farmers, like business men in other lines, take inventories regularly. Spring or late winter is the best time for taking the farm inventory as there is usually less feed on hand.

The inventory is the first step in any good system of farm accounts and will give more information in proportion to the time spent on it than any other record. The cash balance is a poor indication of the success of the year's business, but when the inventory is added it is possible to tell a great deal about the success of the year's operations.

Boys on the farm should help in making the farm inventory every year as it establishes a good habit and makes them watch the financial side more carefully and offers one of the very best possible lessons in practical arithmetic.—R. M. Green, Missouri Experiment Station.

Eggs and Meat.—No one should start into the growing of poultry on a large scale with the idea of getting much out of fancy breeding and showing. Better start with the production of a fine line of table eggs and dressed poultry and in the course of years branch out into the fancy business. It takes much more knowledge and experience to handle the fancy side than it does thepractical side.

GOMBAULT'S
CAUSTIC BALSAM

A safe, speedy and positive cure for

Curb, Splint, Sweeny, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable.

Every bottle of Caustic Balsam sold is Warranted to give satisfaction. Price $1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

ACCESSIBLE TROUT STREAMS

Anglers devoting their week ends to rod and reel should not overlook the streams of Marin and Sonoma counties, accessible at small expense but assuring a day of real sport, and a basket of fish.

Good streams within walking distance of Lagunitas, Point Reyes, Duncan Mills, Cazadero, Glen Ellen and Cloverdale.

Mendocino, Humboldt, Trinity and Lake Counties abound with streams where large fish are plentiful and await the angler.

The Lower stretches of the Eel River in Humboldt County afford the angler the greatest sport and those content with fly fishing for the gamey steelhead should plan their outing to visit the famous Greigs, Fortuna, Van Duzen or Weymouth pools when the steelhead are running.

WANTED TO BUY—One each, yearling by Vernon McKinney, Wilbur Lou, Prince Ansel, and some other good stallion. Entries in futurity stakes preferred. Give lowest price, breeding, particulars, where colt can be seen. Address
F. W. KELLEY,
Care Breeder and Sportsman.

FOR SALE.

Very handsome, splendidly matched team of blacks. Sired by Expressive Mac 2:25½, dam the grandam of Clara Mac 2:04½. Team weighs 2535 pounds, height 16.3, sound. Full brother and sister, eight and nine years old in May. Stylish, high-headed, fine action. Intelligent, kind disposition- a child or a lady can handle them. Used for a hearse team for four years. I think it is the best team in California for that business or for a fancy large team for any purpose. Must be seen to be appreciated. $500 was offered and refused for the gelding to go to the Chicago sale three years ago. Will pay fare to anyone who will come and see this team if they are not as represented. Address J. H. NELSON,
Phone 40 F 5. Box 361, Selma, Cal.

DELINQUENT SALE NOTICE.

C. E. HEALD, Secretary.
Office 1215 Van Ness Ave., San Francisco, California.

FOR SALE.

ELFREADA D., bay mare with black points. 9 years old, weighs 1080 lbs. Paced last year on half-mile track in 2:12 and on mile-track in 2:09 with only three months training. This mare can show two minute speed. Sired by Diablo 2:09¼, dam Bell Onward 2:14. This mare is guaranteed to be perfectly sound and not a blemish on her. Has no mark; is in training at present and in good condition. For price and particulars address Mrs. F. H. HERMAN,
2805 Rucker Ave., Everett, Wash.

RACE TRACK FOR SALE.

The Ukiah race track, located a little less than a mile from the Court House at Ukiah and bounded by the State Highway on the west, the county road on the south, and the Northwestern Pacific Railroad nearly the entire length on the east side of the track. The property consists of twenty acres. Fifty-nine good box stalls, good grandstand, fencing in good order, and one of the best half mile tracks in the state. An excellent winter track and an ideal place to work horses during that season. Plenty of adjoining drives for jogging horses. Two wells on the premises as well as water from the city water works, with tanks conveniently arranged for sprinkling.

This is the only race track in Mendocino county and the location of the county fairs. Ukiah is the county seat and has a population of about 3000, is in a most fertile valley in which all kinds of fruit, vegetables, hay, grain and hops are grown. Has excellent water; no malaria or mosquitos. It has paved streets, good sewerage, and splendid gas and electric light works. There are many standard and thoroughbred horses in this county and the people are a race loving lot. This property is offered for sale at a less price than adjoining property is held at. For terms and further particulars address
F. W. KELLEY,
Care of Breeder and Sportsman.

FARMS FOR SALE

Choice Land In Idaho

Lewiston, Idaho, is situated at the forks of Clearwater and Snake rivers and has transportation to the coast.

960 acres 7½ miles from Lewiston, Idaho, 4½ from Lapwai, Idaho, on main traveled road, all in cultivation except about 15 acres, all level land, just a little rolling, 320 acres of fall wheat in, 225 acres fall plowed for spring crop, about 30 acres in alfalfa. All fenced and cross fenced. Two good springs with big cement water troughs, well, windmill and cement reservoir, water piped to house, 7 room house, hot and cold water and electric lights. Large horse barn with hay mow in the center, electric lights in barn; cow barn with two box stalls; hog pens, shade trees, chicken houses, blacksmith shop, wagon shed, granary, outdoor cellar with bunk house overhead. $85 per acre; will take one-third down, time on balance to suit purchaser, at 7 per cent interest. One-third of crop goes with place if sold any time up close to harvest. Mild climate, can raise all kinds of fruit, grain and vegetables. Wheat in this country goes from 35 to 65 bushels per acre, barley 40 to 80 bushels per acre.

320 acres 4½ miles south of Vollmer, Idaho, 275 acres in cultivation, balance in pasture and timber, farm land lays practically level, one-third of crop goes with place if sold before harvest. Some fall wheat already sown. All fenced and cross fenced. Quarter section of it fenced hog tight; good four-room house, wood shed, and out of door cellar, nice grove around house, well at house, fair stabling and out buildings, spring and spring creek close to barn, three springs on place. Price $70 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

238 acres 4½ miles from Lewiston, Idaho, 175 acres in cultivation, 25 more can be cultivated, balance good bunch grass pasture, fenced and cross-fenced, good spring creek runs across place, small house, station on place for Johnson R. R., two grain warehouses at station. Price $70 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

160 acres of timber land, good farm land when timber is cleared off, all can be farmed except about 2 or 3 acres. Good timber, yellow pine and fir. Price $4000. 40 miles from Lewiston, Idaho. Well located to log off.

240 acres 6 miles from Asotin, 12 miles from Lewiston, Idaho, about 75 acres in fall wheat, about 75 acres more can be cultivated, balance in bunch grass pasture, two springs, small house, all fenced. Price $40 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

Be With the Winners

The Lame Horse

Can do it too if cured with Save-the-Horse, **BECAUSE**

this remedy will make that horse *So Sound* that the "CURED" part will "STAND UP" through "slips," "twists," "clips" from opposite foot, through jogging, training, fast work, heavy tracks--in short through every ordeal allied with "RACING TO WIN--not once--but EVERY TIME.

SAVE-THE-HORSE does just that! Not by the "skin of the teeth," not once in a while, not through luck and chance, BUT positively and with unvarying continuity, BECAUSE it proves to have the adequate power, and properties required under all such tests. This may sound STRONG, but the EVIDENCE and PROOFS leave no chance for doubt. Exactly like in these instances:

MAKES A VALUABLE DISCOVERY.

A. M. Thayer, Supt. Oak Hill Farms, Canastota, N. Y.—Please send another bottle of Save-The-Horse remedy—would not be without it for twice the cost. I find also an excellent wash is made by using it with equal parts of New England Rum and Wormwood—fine for bathing racing colts after heats—they are never stiff next day.

Elmer B. Cole, Franklin, N. Y., September 16th, 1915, writes:—Some time ago I purchased a bottle of Save-The-Horse for the treatment of contracted foot, said to be Navicular Disease. It made the horse entirely sound.

E. T. Bentley, Plainfield, Wis.—Your Spavin Remedy has taken the swelled leg down to normal size, and has removed two small round puffs.

O. C. Williams, R. F. D. Carrier, Modesto, Ill., November 7, 1915, writes:—I bought a bottle three years ago for a bad Bone Spavin. He went lame all the time before using Save-The-Horse. After the first week he has never taken a lame step. I work him to big loads through mud, snow drifts and rough frozen ground. Your remedy is all you claim for it.

C. H. Bates, Brook Farm Herd, Breeder of Holstein-Friesian Cattle, Morris Plains, N. J., R. D., October 4th, 1915, writes:—Enclosed find check, for which send me a bottle of Save-The-Horse with guarantee to cure ringbone, or lameness between the hoof and ankle. About twelve years ago I used your Save-The-Horse on a saddle mare that threw her tendon out. I got a complete cure and rode the mare for eight years afterwards, and she stayed all right. This is the reason for sending for another bottle. Kindly send me your Save-The-Horse BOOK.

Dr. O. T. Atwell, Zanesville, Ohio, September 4th, 1915, writes:—Having used your Save-The-Horse on my driving horse with remarkable result in removing a pastern joint enlargement, I naturally turn to you when in trouble again, etc. I wish your advice and a remedy for him; please mail or express same and I shall send you the price by return mail.

John E. Lingo & Son, Spar Makers, Flag Poles, Derricks, Ship & Yacht Spars. Yard & Office Foot of Elm Street, Camden, N. J., August 18th, 1915.—Troy Chemical Co., Binghamton, N. Y.—Gentlemen—The Mare, Troublesome, was very lame in the hip about three years ago and one bottle put her to the races again in less than two weeks. She has never taken a lame step since, and has done a lot of racing. I would appreciate very much your opinion on another case,—etc.

R. F. Huddy Furniture Co., 113 West Main St., Independence, Kan., writes:—Enclosed check| Ship at once two bottles of Save-The-Horse Spavin Remedy. We wish to state that the horse Lexel that we treated last year is racing this year, and his hock joint is standing the strain splendidly. We cannot say too much for Save-The-Horse.

After using Save-The-Horse for two weeks on a Bone Spavin he did not go lame. I will say it is a great remedy, says Albert Stoll, 915 S. 4th Ave., Ann Arbor, Mich.

One Half Bottle of Save-The-Horse cures horse of corn.—Mrs. Jennie Parks, Lawton, Okla., writes:—Our horse had a corn and he is well of that. It got better right away and we didn't have to use half of a bottle, etc.

$5 Every bottle of Save-The-Horse is sold with a binding contract to refund money or cure any case of Bone and Bog Spavin, Thoroughpin, Ringbone, (except low), Curb, Splint, Capped Hock, Wind Puff, Shoe Boil, Broken Down, Injured Tendon and Other Lameness. No blister or loss of hair.

ORDER IT TODAY!

OR WRITE—Do it today, if only a postal, it will cost you nothing for information and ADVICE; copy of contract and BOOK, and there'll be no string to them.

OUR 96 Page **SAVE-THE-HORSE** (Trade Mark Registered.) BOOK is the Quintessence and last word of Up-to-Date knowledge and practice on All Lameness. This book contains things that are new, helpful, and reliable—nowhere else found. It is our 20 years' Discoveries—Treating Every Kind of Ringbone—Thoroughpin—Spavin—and All—Shoulder, Knee, Ankle, Hoof and Tendon diseases. It is a mind settler—Tells how to locate and treat 58 forms of Lameness—Illustrated.

THE STANFORD—OCCIDENT FUTURITY NO. 2.

(Foals of mares covered in 1915)

TO TROT AND PACE AT THREE YEARS OLD

$1,800.00 FOR TROTTING FOALS $1,200.00 FOR PACING FOALS

To be Given Under the Direction of the

California State Agricultural Society, 1919

Entries to Close May 15, 1916

Money Divided as Follows:

TROTTING DIVISION	PACING DIVISION
$500.00 to 1st heat..	$350.00 to 1st heat.
$500.00 to 2d heat.	$350.00 to 2d heat.
$503.00 to 3d heat.	$350.00 to 3d heat.
$300.00 to horse standing highest in Summary.	$150.00 to horse standing highest in Summary.

ENTRANCE AND PAYMENTS—$2.00 to nominate mare on May 15, 1916, when name, color, description of mare and stallion bred to must be given; $3.00 July 1, 1916; $5.00 December 1, 1916; $5.00 on yearlings April 1, 1917; $10.00 on two-year-olds April 1, 1918; $10.00 on three-year-olds April 1, 1919.

STARTING PAYMENTS—$25.00 to start in pacing division; $55.00 to start in trotting division. All starting payments to be made ten days before the first day of the State Fair at which the race is to take place.

NOMINATORS must designate when making payments to start whether the horse is a Trotter or Pacer.

CONDITIONS

The race in each division will be for three heats; if no horse wins two of the three heats a fourth heat must be raced by the heat winners to decide the winner of the race; all other horses to go to the barn.

Trotting division heat purses $500.00. Total purse $1,800.00.

Pacing division heat purses $350.00. Total purse $1,200.00.

Heat purses divided 50, 25, 15 and 10 per cent; the extra $150.00 in pacing and $300.00 in trotting division goes to the horse standing highest in the summary; distance 100 yards. A distanced horse shall be entitled to money already won.

If a mare proves barren or slips or has a dead foal or twins, or if either the mare or the foal dies before December 1, 1916, her Nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there will be no return of a payment nor will any entry be liable for more than the amount paid in or contracted for. In entries, the name, color and pedigree of mare must be given; also the name of the horse to which she was bred in 1915.

Entries must be accompanied by the entrance fee. Nominators are liable for amounts paid in only. Failure to make any payment forfeits all previous payments. This Association is liable for $3,000.00, the amount of the guarantee only.

Hobbles will be barred in trotting and pacing divisions.

Rights reserved to declare off or re-open these stakes in case the number of entries received is not satisfactory to the Board of Directors. There will be no more moneys in each division or heat than there are starters. No horse shall receive more than one money in each heat.

Entries open to the world.

Other than exceptions made in this entry blank, rules of National Trotting Association to govern.

JOHN M. PERRY, President. CHAS. W. PAINE, Secretary, Sacramento.

MR BROODMARE OWNER, do you realize the importance of the simple facts that sixty of McKinney's sons and nearly fifty of his daughters are producers of standard performers? That the McKinneys won more money than any other family in 1915? That the McKinneys won the largest percentage of the futurities, both east and west, in 1915? That McKinney has more sons to sire 2:10 performers than any other stallion living? Keep these facts in mind, and remember that I offer you the services of

THE VERY BEST SON OF McKINNEY

CARLOKIN 2:07 1-2 EXHIBITION MILE 2:05 1-4

Champion Trotter and Champion Sire of Trotters in the West

Reg. No. 36548. Licensed Pure Bred, Cert. No. 41.

Mahogany bay. Height 15.1½. Weight 1060.

Sire of ESPERANZA (3) 2:08, only three-year-old to win every trotting stake for that age on the Pacific coast, and also the following colt performers:

The Lark (4).....2:09½	Carsto (2) 2:22½
Ethel D. (3).....2:11	Helen Belle (2).....2:22½
Carl (3) 2:14¼	Carlschen (2) 2:23
Doctor S. 2:14½	Santiago (3) 2:24¼
Johnny Dugan p (3)2:16	May Marian p (3)..2:24¼
Hermes (2) 2:16½	Carlrich p (2).....2:24½
John Warwick (2) 2:17	El Carbine (2).....2:27½
Nicola B. (3).....2:18½	Eileen C. (3).....2:29
Miss Carlokin p....2:20	Carlos (2) 2:29¼
Carleta (2) 2:20¾	Fulton G. (2).....2:30

Carlokin is the best son of McKinney not only by performance but by breeding as well, his dam being the famous producer Carlotta Wilkes, whose ten performers include four with records below 2:10, while his grandam and great grandam were also producers, by Alcantara and Clark Chief. He has demonstrated that he sires more early and extreme speed than any other stallion in California, and his get are courageous race horses, endowed with soundness and wonderful vitality.

Fee: $75 the season, usual privileges; details on request.

For Greatest Satisfaction Use

DOUBLE SERVICE Automobile Tires

Guaranteed 7,000 Miles Service

Absolutely Punctureproof

Double Service Tires are made double the thickness of the best standard make tires.

This 100% greater wearing surface naturally gives that much more mileage and service. The average of 12 miles of tough fabric and one inch surface tread rubber makes these tires *absolutely puncturepoof*.

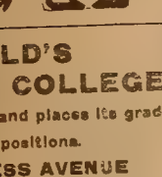
These tires excel all others for use in the country over rough and rugged roads as well as on hard pavements. They are as easy riding and resilient as any other pneumatic tire—the air space and pressure being the same.

They are the *most economical* and "care free" tires made and are used where tires must be depended on and tire troubles cannot be tolerated. Many *Double Service* style tires are in use in the U. S. government and European War service.

Our output is limited to a certain amount, but for a short time we offer the following reduced special prices as an **Introductory Offer:**

PRICES

	Tires	Tubes		Tires	Tubes
30x3 in.	$ 8.60	$2.30	36x4 in.	$17.45	$4.65
30x3½ in.	10.50	3.10	35x4½ in.	21.20	5.60
32x3½ in.	12.75	3.20	36x4½ in.	22.50	5.75
33x3½ in.	15.75	4.20	37x4½ in.	23.60	6.20
34x4 in.	16.70	4.55	37x5 in.	26.30	6.60



All other sizes not included in above list also furnished. Non-skids at 10% additional.

Terms: Payment with order at above special prices, a 10% discount allowed on orders for two or more tires. All personal checks must be certified.

Try these tires now and be convinced of their very high qualities. Sold direct to the consumer only.

Descriptive folder upon request. Write for it.

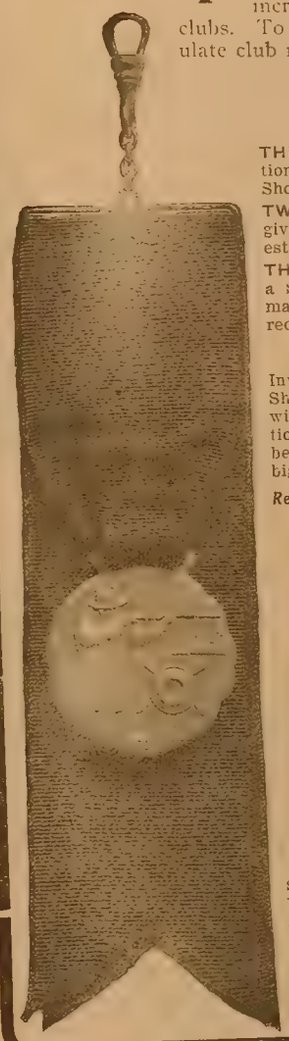
SECOND ANNUAL BEGINNERS' SHOOTS



LAST YEAR'S EVENTS ADDED THOUSANDS OF MEN and WOMEN to TRAPSHOOTING'S RANKS

THE 1916 Beginners' Shoots are scheduled for June. These events secure new members, increase enthusiasm and instill new life into clubs. To make the events more popular and stimulate club members and officials to greater activity,

WE ARE GIVING HANDSOME

Trophies to Clubs and Beginners

THE STERLING SILVER FOB is given to the club for presentation to the beginner making the highest score in the Beginners' Shoot.

TWO SILVER CUPS, 9 and 7½ inches high, respectively, will be given to the two clubs in each state or province having the greatest number of beginners participating.

THE STERLING SILVER TEASPOON is given to clubs having a Special Event for women on Beginners' Day, — the woman making the highest score in accordance with the club's rules to receive the spoon.

Club Members,—GET BUSY

Invite your neighbor, brother or sister to enter your Beginners' Shoot. "Round up" the visitors. 'Phone your friends,—go in to win the cups. Make your club the livest trapshooting organization in your state. This practical plan will increase your membership, put more vim into your organization and make it a bigger and better club.

Remember Beginners Shoots are scheduled for June,—select your date and send your application for watch fob and spoon at once to

—Peters SHELLS

HIGH OVER ALL at Los Angeles, Cal., May 1st and 2nd

High on all targets, including handicap events, Mr.Guy Holohan	433 x 450
Second on all targets, including handicap events, Mr. O. N. Ford	431 x 450
Los Angeles Handicap won by Mr. O. N. Ford, from 22 yards	95 x 100
Los Angeles Handicap, High Professional, Mr. Guy Holohan, 22 yards	94 x 100
B. H. Dyas Co. Loving Cup won by Mr. O. N. Ford, 22 yards (tie)	45 x 50

Shoot-Off, 19 x 20 — 20 x 20

The shooting quality of Peters "steel where steel belongs" shells is being demonstrated anew every day. The shooter who insists on taking the benefit of this superiority will invariably finish with a better score than would otherwise be possible.

THE PETERS CARTRIDGE CO., PACIFIC COAST BRANCH . . . . 585-587 Howard Street, SAN FRANCISCO, CAL.

.....And Now For The Traps!

These are the days when Mr. Enthusiastic Sportsman's blood runs just a little quicker. He's cleaning and polishing that autoloading or pump gun — smelling the powder from afar. He's getting ready to "start something" over at the trapshooting club. He's going to make last year's scores look cheap.

This sportsman—if he's keen for RESULTS—will select Remington UMC ammunition. He will use "Arrow" or "Nitro Club" Speed Shells exclusively. These shells are reinforced with a steel lining that puts all of the force back of the shot. Moreover, if he's in the market for a gun, he will choose a Remington UMC Autoloading Shotgun or Pump Gun. They're dependable, accurate, well-balanced arms. Ask the dealer showing the Remington UMC Red Ball Sign of Sportsmen's Headquarters.

Sixteen of the twenty-three GRAND AMERICAN HANDICAPS held since 1893 have been won by shooters using either Remington UMC guns ar ammunition, or both.

The 20th Indoor Championship Match *and* Prize Shoot

WON WITH

WINCHESTER

.22 Caliber Rim Fire Cartridges

The winning of this — the most important indoor shooting of the year — means more than simply another addition to the long list of triumphs to Winchester — the **W** brand of guns, ammunition, etc. It is convincing proof that the long and firmly established policy of Quality First, followed so religiously in the manufacture of Winchester goods, has not been relinquished an iota, notwithstanding the unparalleled demands made upon the Winchester company for its products during the last twenty months. It plainly shows that, no matter how unusual the condition, Winchester goods can always be relied upon. The big winners at the Indoor Shoot were as follows:

100 SHOT CHAMPIONSHIP MATCH

Won by L. G. Buss, score 2473, with Winchester cartridges and Winchester Telescope Sight. All of the first six contestants used Winchester Telescope Sights, and four of them Winchester cartridges.

RING TARGET CONTINUOUS MATCH

G. W. Chesley and H. Hunziker, shooting Winchester cartridges, tied with two other shooters, making five 75s—perfect score. Three of the four contestants in this match used Winchester Telescope Sights.

ZIMMERMAN TROPHY MATCH

Won by G. W. Chesley. Second, H. Hunziker. Third, L. C. Buss. All shooting Winchester cartridges. Mr. Hunziker made a perfect target of 5 degrees in his string, and Mr. Chesley one of 6 degrees.

BULLSEYE MATCH

Won by S. Murphy with a target measuring 7 degrees. Second, J. J. Young with a 7½ degree target. Third, C. Zettler with an 8 degree target. Fourth, G. W. Chesley with an 8 degree target.
All four place winners used Winchester cartridges.

FOR RELIABILITY AND RESULTS USE THE **W** BRAND

PARAMOUNT PARKER GUNS

Look...

Mr. Woolfolk Henderson, an amateur, by scoring .9753% made the
HIGHEST OFFICIAL GENERAL AVERAGE FOR 1915

Mr. Lester German, a professional, by scoring .9742% made
SECOND OFFICIAL GENERAL AVERAGE FOR SAME PERIOD

CLEAN SWEEP ON DOUBLE TARGETS
Messrs. Guy V. Dering, S. A. Huntley and Woolfolk Henderson won
FIRST, SECOND and THIRD,
respectively, by scoring 9000%, 8666% and 8400%.

Read...

THE WORLD'S RECORD!!!
At Atlantic City Sept. 15 to 17 Mr Lester German broke all Tournament Records by scoring 647 OUT OF 650 TARGETS, with one run of 372 straight, which is longest for the year.
PARKER GUNS have won the Grand American Handicap 9 times out of 25 offers, once with 100 straight, only time made. Also 7 out of 9 Interstate Championship Events with highest scores ever made, twice with 198 x 200 at 18 yards rise.

Remember

PARKER PACIFIC COAST RECORDS
In California Mr. Henry Pfirrmann won the Pacific Coast Handicap and Mr. J. Foster Couts won the Championship of California.
In Portland, Oregon, Mr. P. H. O'Brien by scoring 241 straight made the record for the Pacific Coast.

If interested in small bore guns write for instructive booklet which will be sent free on request. For further particulars regarding guns from 8 to 28 gauge, address

TRAINING THE HOUND

A PRACTICAL TREATISE ON THE TRAINING OF FOX-HOUNDS, BEAGLES, AND COON HOUNDS.

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; $1.50, postpaid.

No. 12. 2:13 Class Special, Pace, horses with no records or slower than 2:20 not eligible 1000.00

SATURDAY, SEPTEMBER 9th.

No. 13. 2:20 Class Trot 1000.00
No. 14. 2:10 Class Pace 1000.00

Consolation State Fair Futurity Pace, for 3 year olds, Guaranteed $300.00 (Closed).
Consolation State Fair Futurity Trot, for 3 year olds, Guaranteed $400.00 (Closed).

Entrance and payments on these stakes will be due and payable as follows:—2% June 1st, 1% Aug. 1st, and 2% before five o'clock the night before the race.

GENERAL CONDITIONS.

ALL RACES THREE HEATS—Money divided 25% to the first heat, 25% to the second heat, 25% to the third heat, and 25% to the race according to the rank in the summary. Money in each division 50, 25, 15 and 10 percent. Should two or more horses be tied for first place at the completion of the third heat, such horses only shall contest in a fourth heat and money divided according to rank in the summary at the termination of that heat. A horse having won the first two heats and drawn or distanced in the third heat shall not lose position in the summary.

Nominators have the right of entering two or more horses in any race by the payment of 2% additional on each horse, but only one of the horses so entered to be started in the race, and the starter is to be named by 5 o'clock P. M. the day before the race is to take place.

ENTRIES TO CLOSE JUNE 1st, 1916.

Usual 5% additional from winners in all except Futurity Stakes, Occident and Stanford Stakes.

The Society reserves the right to declare two starters a walkover. When only two start they may contest for the entrance money paid in, divided 66 2-3% to the first, and 33 1-3% to the second horse. A horse distancing the field shall be entitled to first and fourth money only and in no other case will a horse be entitled to more than one money.

The Society reserves the right to change the hour and day of any race, except when it becomes necessary to antedate a race, in which instance the nominators will receive three days' notice by mail to address of entry.

The right reserved to reject any or all entries and declare off or postpone any or all races on account of weather or other sufficient cause.

Entries not declared out by 5 o'clock P. M. the day preceding the race shall be required to start and declarations must be in writing and made at the office of the Secretary at the track.

The Society reserves the right to start any heat after the fourth score, regardless of the position of the horses.

Any horse that started in 1915 without improving its record, equaling its record, and not winning a race, shall be entitled to one second.

Address all communications to the Secretary.

JOHN M. PERRY, President.

CHAS. W. PAINE, Secretary,
Sacramento, California.

$14,250 — 27th ANNUAL RACE MEETING — $14,250

of the

PACIFIC COAST TROTTING HORSE BREEDERS ASSOCIATION

to be given in conjunction with the District Agricultural Fair at

Santa Rosa, August 9, 10, 11 and 12, 1916

Entries Close Thursday, June 1st, 1916

All Races Except Colt Stakes Limited to 3 Heats,

TIME ALLLOWANCES.

1st. Horses that have started anywhere in 1914 or 1915 without winning a race shall be allowed one second for each year raced.
2nd. Horses that have started two or more times in either 1914 or 1915 without winning a race shall be allowed two seconds.
3rd. Horses whose winning race records were made prior to 1914 shall be allowed two seconds, provided they have not won a race in 1914 or 1915.
Time allowances must be claimed when entry is made; also it must be stated why the horse entered is entitled to time allowance under above conditions.

PROGRAM

FIRST DAY		SECOND DAY		THIRD DAY		FOURTH DAY	
1—Three-year-old pacing division, Futurity Stake No. 13 (closed 1912)	$1300	4—Two-year-old trotting division, Futurity Stake No. 14 (closed 1913)	$1350	7—Two-year-old pacing division, Futurity Stake No. 14 (closed 1913)	$1100	10—2:12 class, trotting	$ 900
2—2:09 class, trotting	900	5—2:15 class, trotting	900	8—Three-year-old trotting division, Futurity Stake No. 13 (closed 1912)	3300	11—Free-for-all class, pacing	900
3—2:20 class, pacing	900	6—2:10 class, pacing	900	9—2:13 class, pacing	900	12—2:20 class, trotting	900

Guaranteed Stakes Nos. 2, 3, 5, 6, 9, 10, 11, and 12 $900 each, three heats, money divided $300 to the first heat, $300 to the second heat, $300 to the third heat. Money in each division divided 50, 25, 15 and 10 per cent. A horse having won the first two heats and drawn or distanced in the third heat shall not lose position in the summary.

Nominators have the right of entering two horses in one ownership in any race by the payment of two per cent. additional, but only one of the two horses so entered to be started in the race, and the starter is to be named by 5 o'clock p. m. the day before the race is to take place.

Entrance fee five per cent. to start, three per cent. due at time entries close, two per cent. additional if not declared out on or before July 1, 1916. Declarations must be paid in full at time of declaring out. Usual five per cent. additional from winners in all races except Futurity Stakes.

Horses are to be named and eligible when entries close to the classes in which they are entered.

The Association reserves the right to declare two starters a walkover. When only two start they may contest for the entrance money paid in, divided 66 2-3 per cent. to the first and 33 1-3 per cent. to the second horse. A horse distancing the field shall be entitled to first and fourth money only and in no other case will a horse be entitled to more than one money.

The Association reserves the right to change the hour and day of any race, except when it becomes necessary to antedate a race, in which instance the nominators will receive three days' notice by mail to address of entry.

The right reserved to reject any or all entries and declare off or postpone any or all races on account of weather or other sufficient cause.

Entries not declared out by 5 o'clock p. m. the day preceding the race shall be required to start and declarations must be in writing and made at the office of the Secretary at the track.

Racing colors must be named by 5 o'clock p. m. the day preceding the race, and must be worn upon the track, in all races. Colors will be registered in the order in which they are received, and when not named or when said colors conflict, drivers will be required to wear colors designated by the Association.

The Association reserves the right to start any heat after the fourth score, regardless of the position of the horses.

All Stakes are guaranteed for the amount offered and are for the amount offered only.

MEMBERS.

Under the By-Laws of this Association, none but horses belonging to members of the Association are allowed to start in the regular races at its meetings. Membership fee $25, which includes annual dues for the first year and entitles members to all privileges. Those who are not members of the Association should send membership fee at the time of making entries.

Member of the National Trotting Association.

STALLIONS ADVERTISED

CARLOKIN 2:07¼.....W. G. Durfee, Los Angeles
LeGRAND McDONALD.....Bridgford Co., San Francisco

JUNE FIRST will be a very important date to California owners and trainers of trotting and pacing horses. On that date nine $1000 purses offered by the California State Agricultural Society, and eight $900 purses offered by the Pacific Coast Trotting Horse Breeders' Association will close for entry. The complete programs with conditions, etc., are to be found in our advertising columns today and we advise every horse owner and trainer to look them over carefully and get ready to have the entries made out and mailed by Thursday, June 1st. There are a half dozen other meetings to be advertised later and the associations are probably waiting to see how the State Fair and Breeders' races fill before announcing just how much money and how many days' racing they can afford to give. But even though there should be no other meetings held in California this year, the owner who can win a race at each of the above meetings can more than pay expenses for the season. The associations in the east seem to be receiving very large lists of entries this spring, and that harness racing is to be more popular than ever this year is admitted by all who live on the other side of the mountains. Good lists of entries for the State Fair and the Breeders will encourage other associations to be liberal and prompt in offering their programs to the horsemen. The track at Santa Rosa where the Breeders' meeting is to be held is one of the best and fastest on the coast, while the climate of Sonoma county cannot be excelled anywhere. The hotels of the city of roses are first class—there is no better hay than the red oat hay that grows round about that thriving city, and in fact everything there seems made to order and is kept in order for the horsemen and their horses. Sacramento, where the State Fair has been held since 1857 with only one miss (which was last year on account of the big exposition in this city) is the Mecca of horsemen every season. Its splendid track, well appointed stables, big and enthusiastic crowds that enjoy the races, make the State Fair one of the meetings which every horseman aims to attend without fail. We do not doubt but good lists of entries will be received by the Breeders and the State Fair, and we hope that there will be no owner who, after entries close, will bemoan the fact that his horses are not entered. The purses are generous and the chances to win are greater than they have been for years owing to the fact that so many horses of all classes are to be raced across the mountains this year.

THE WAR ON GAMBLING which a prominent San Francisco daily newspaper is conducting with such vigor would seem to a "visitor from Mars" more consistent if the aforesaid daily did not publish with great care and for the exclusive benefit of the "gamblers" that piece of news called the "form chart" of the running races. These form charts on races run hundreds of miles from San Francisco telegraphed daily and put into type at much expense are only of use to those who make a daily practice of "playing the races" at the "pool rooms." And the "selections"! What are they but alleged sure tips from the journal's salaried expert?

SECRETARY PAINE'S PROPOSAL to provide races for thoroughbreds at the California State Fair this year has met the endorsement of all breeders and owners on the coast and a program of such events will doubtless be soon announced. The State Board of Agriculture will however ask for the co-operation of the thoroughbred owners in preventing any and all bookmaking, as the State laws are very strict and the Board cannot afford to permit gambling of any kind at Agricultural Park. It has become generally known that from twenty to thirty handbooks were on daily at the running meeting held at the P.-P. I. E. last year, and that the bookmakers paid some one for the privilege, although the casual visitor who was not looking for a chance to bet probably never suspected that illegal wagering was going on. As the obtaining of the State appropriation for the fair depends upon the laws of the State being strictly observed the State Board of Agriculture desires to have assurances from the recognized organization controlling running turf affairs in California that it will give the State Board every assistance in its enforcement of these laws. With this co-operation there will be no reason why a good program of running races cannot be arranged and carried out in a manner that will prove the popularity of this great sport, and do much toward inducing the incoming legislature to amend the present drastic laws against wagering on racing.

THE HORSE MARKET is rather dull at present. Small horses of the milk wagon sort bring little more at auction than $75 for good ones and many are sold for much less. A car load of all purpose horses from Lassen county were disposed of this week at J. B. Horan's stock yard, W. H. Hord auctioneer, the 900 to 1200 pound horses being slow sale. A number of really fine looking drafters weighing right around 1500, brought better prices, a handsome gray mare weighing 1500 sired by a Percheron stallion bringing $220, a splendid 1450 pound gelding bringing $170 and another $165. There are no 1800 and ton horses in the market at present. That there is some demand for the horses sold at auction however is shown by the fact that dealers are the principal buyers at the auction sales and they manage to turn their purchases over at a profit. Really good horses of any class bring fair figures, but the ordinary horse seems to go begging for bids when led into the salesring.

WILL YOU RACE up north this year? The North Pacific Circuit offers a very generous lot of purses to close Thursday, June 1st, and a lot more to close at a later date. Beginning at Vancouver August 14th there will be seven weeks of racing, ending the week of Sept. 25 to 30 at the Oregon State Fair. We advise every owner who contemplates racing out of the State this year to study the North Pacific Fair Association's advertisement in this issue and to remember that the first closing date for a number of important races is June 1st.

RIDER AND DRIVER of New York celebrates its twenty-fifth anniversary with a special number, which is a triumph of both the printer's and engraver's art. The cover illustration in colors is one of the most beautiful things we have seen. Congratulations to Rider and Driver. May it live long and prosper.

MATINEE SEASON OPENS.

There was a most successful opening of the matinee season of harness racing at the three-quarter mile oval in Golden Gate Park, San Francisco, last Sunday. Between three and four thousand devotees of the game were present, the day being delightful and the track fast. Starters in the four events were numerous enough and evenly enough classified to make each of the four events a most interesting race. The races were all two best heats in three at three-fourths of a mile, which is the most popular distance at this track, as the crowd has a view of both start and finish.

Credit must be given the offcial management of the San Francisco-California Driving Club for the very efficient manner in which all the details of the matinees are aranged and carried out. There are seldom any delays and the program is completed "as advertised" without change or excuse.

The fastest heat of the day was paced by George Machado's Bold Harry which won the free-for-all from a field of the best pacers in the club. Coming down the stretch in the first heat well in the lead Machado eased up on his horse until Bold Harry was only jogging when W. Malough with his mare Emma M. made a dash for the front and got to the wire before Machado was awake to the fact that a heat is never won until the wire is reached. Emma M. was awarded the heat in the time of 1:41, but in the next two heats Machado took no chances and landed Bold Harry in front in 1:36½ and 1:36¼, good time for thus early in the season.

President Giannini's Bradmont was the winner of the opening race of the meeting, winning the first and third heats after a contest with King Pointer, but in the second heat J. M. Kidd's Senator H. got his nose in front of Bradmont at the wire after a hot brush down the stretch.

A. Scott's Little Dick, the chestnut gelding by Dictatus that won a record of 2:18 as long ago as the summer of 1907, and whose mark of 2:09¾ was made in 1910, was returned a winner of the second race after J. Vermet's Cookie had won the first heat and cut his quarter so badly in the second heat as to necessitate his withdrawal. Little Dick is certainly an iron horse as he has been raced continuously for the past ten years and is still a good horse on the road.

The only trotting event on Sunday's card had the last place on the program. It proved an easy race for M. Ford's Minequa that won in straight heats. A. Giavonetti's Yoncalla was the contending horse in both heats, and as this was Yoncalla's first race he made a commendable showing. Yoncalla's name is variously spelled on the program and in the papers, but he is a registered horse and his cognomen is properly given here. Yoncalla was bred by the late Mrs. F. H. Burke of the Vendome Stock Farm and the colt's name is of Indian derivation. While Mr. and Mrs. Burke were touring in Oregon in 1911 they passed a little railroad station which had the name of Yoncalla. Mrs. Burke concluded to name the colt by Bon Voyage which the mare Birdie by Jay Bird then had at foot after this station, remarking, when afterwards making out its registration papers: "There will be no other horse by that name already registered, consequently it is not necessary to select any alternates." Yoncalla is now a five-year-old and may yet prove to be a fast trotter, as his breeding certainly gives him license for being.

The success of the opening matinee was complete and as the club has concluded to hold one every Sunday during the summer we shall expect the interest in this sport to increase and the track records to be broken before the summer is over. The club is in a most flourishing condition with a large list of enthusiastic members. Summaries:

First race—2:18 pace:

Bradmont	(G. J. Giannini)	1	2	1
Senator H.	(J. M. Kidd)	4	1	5
King Pointer	(H. Campodonico)	2	3	2
Little Jack	(G. Conlan)	3	5	3
Dr. Dawson	(E. T. Ayres)	5	4	4

Time—1:37, 1:38½.

Second race—2:30 pace:

Little Dick	(A. Scott)	2	1	1
John Campbell	(J. Martin)	4	3	2
Black Mack	(F. A. Gielow)	3	4	3
Cookie	(J. Vermet)	1	2	d

Time—1:44, 1:44½, 1:53.

Third race—Free-for-all pace:

Bold Harry	(G. Machado)	2	1	1
Emma M.	(W. Malough)	1	5	2
Mabel Dillon	(B. Cohen)	4	2	4
W. J. K.	(W. J. Kenney)	5	3	3
Pointer Belle	(J. M. Kidd)	3	4	5

Time—1:41½, 1:36½, 1:36¾.

Fourth race—2:30 trot:

Minequa	(M. Ford)	1	1	
Yoncalla	(A. Giavonetti)	2	2	
Alto Trix	(J. M. Kidd)	3	3	
Dolly Cassini	(W. Newman)	4	d	

Time—1:52½, 1:49¼.

Five races are carded for the matinee tomorrow. The events have filled well, several horses that did not start last Sunday being in line. The entries and officials for the day are as follows:

First race, 2:20 trot—J. McNamara's Matawan, M. Ford's Minequa, J. A. Wilkins' Merrylina.

Second race, 2:18 pace—Logan Healey's Silver, G. Collins' Little Jack, E. T. Ayres' Dr. Dawson, A. P. Scott's Little Dick, D. Keating's Victor Pointer, J. Vermet's Cookey.

Third race, free-for-all pace—G. J. Giannini's Bradmont, W. J. Kenney's W. J. K., William Malough's Emma M., J. M. Kidd's Pointer.

Fourth race, free-for-all trot—G. J. Giannini's Ella M. R., Harold Cohn's Harold C.

Fifth race, 2:15 pace—B. Cohen's Mable Dillon, J. M. Kidd's Senator, H. Campodonico's King Pointer.

Officials—Judges, John A. McKerron, Dan Keating and A. Ottinger; timers, J. A. Wilkins, Fred Clotere and T. P. Lauterwasser; starter, James J. Ryan.

Nearly 100,000 horses have been sold since January 1st at the National Stock Yards, says the N. Y. Herald. The trade a year ago was almost wholly confined to war horses, but the home demand is now the main thing, and good, big, sound work horses command higher prices than when the French army contractors were buying them for artillery service. The French, Italian and Belgian governments are still buying, though not as heavily as last year. They are now discriminating in favor of mares, the apparent purpose being to have a large number on hand for breeding purposes when peace is restored in Europe. The army inspectors are paying only $160 for gunners and $130 for riders.

◆ ◆ ◆

A firm of Illinois Percheron breeders sold a ten-year-old mare recently for $1000, and refused $4000 for a pair of four-year-old mares. A nine months old colt was sold for $500 and another breeder got $1175 for four weanlings. This speaks well for the condition of the market for pure bred Percherons.

◆ ◆ ◆

Zomblack 2:10¼ is in the stud at Charley Dean's stable at Palatine, Ill., at $25 the season, and many good mares are being booked to him.

NATIONAL TROTTING ASSOCIATION.

At the special meeting of the Board of Review of the N. T. A. held in New York May 2d and 3d, no cases of particular interest to Pacific Coast horsemen were before the Board. The following miscellaneous business was transacted, however, that is of much interest to all members of the association and to harness horsemen everywhere:

Year Book.

On motion of Morgan G. Bulkeley, second by John Early, the following preamble and resolution in regard to the Year Book was unanimously adopted:

"Whereas, In 1896, the National Trotting Association made an agreement with the American Trotting Association to exchange summaries of all races contested on the courses of the members with the understanding that all matter sent by the National Trotting Association should be turned over to the American Trotting Register Association free for publication in the Year Book. This agreement which is still in force was made on the initiative of the National Trotting Association, and under it the American Trotting Register Association has received this service free for twenty years. Rule 62, Section1, under which the American Trotting Register Association was required to pay for the cost of copying these summaries was also after a full explanation, struck out at the last Congress so that no charge could be made therefor.

"The Year Book is a valuable work for breeders and horse owners and with the addition of the winrace list would make it a great convenience to the Secretaries of Racing Associations, and an early and prompt publication will add materially to its value:

"Therefore Be It Resolved, That: In order to put the Year Book on a permanent basis and also with the object of continuing it as the official publication, the President of the National Trotting Association is hereby appointed as a Committee of One, to confer with the President of the American Trotting Association, and the President of the American Trotting Register Association with the power to enter into and to conclude a contract that shall be binding on this Association and also on the other two parties to it, to publish jointly by these Associations the said Year Book, which is now published by the American Trotting Register Association.

"The three parties named above should each contribute to the work of compilation and publication, and it seems that a nearly equitable division of the work would be as follows: The National Trotting Association to furnish to the American Trotting Register Association in the shape of copy ready for the printer, the summaries of all races contested over tracks of its members; also to send the American Trotting Association a manifold copy of same and also to furnish a Winrace and Eligibility list of horses performing over the tracks of members of the National Trotting Association and of the American Trotting Association; The American Trotting Association to furnish the American Trotting Register Association in the shape of copy ready for the printer, the summaries of all races contested over tracks of its members; also send the National Trotting Association a manifold copy of same and also to furnish the copy ready for the printers for the index (as is now published in the Year Book) over tracks of the members of the National Trotting Association and over tracks of members of the American Trotting Association and over non-association tracks; and the American Trotting Register Association to furnish all the rest of the work and copy, ready for the printer to complete the book.

The said three Associations, the National Trotting Association, the American Trotting Association and the American Trotting Register Association are in addition to pay each one-third of the total expense of composition, printing and binding the said Year Book, and each of the said three Associations is to own and to have exclusive control of one-third of each edition of said Year Book when completed, each one-third to be received from the printer at the price of publication."

Uniform Rules.

The following in regard to a uniform code of Rules was unanimously adopted:

"In order to establish a code of uniform rules for the National and American Trotting Associations, it is recommended that at the next and subsequent Biennial Congresses of these Associations that instead of amending the rules or enacting new ones, the delegates assembled at each Congress shall elect a Rule Committee of six members which shall constitute a Joint Rule Commitee, with power to draft a set of rules that shall be a code for all race meetings until their successors are appointed at the next Biennial Congresses and a new code adopted. It is further recommended that this Committee shall meet alternately in New York and Chicago within one week after the Congress of the American Trotting Association which is held the week following the Congress of the National Trotting Association. It is also further recommended that after a uniform code is adopted, no changes shall be made in same, or no new rules enacted, except upon a two-thirds vote of the entire Joint Rule Committee at its regular meeting.

"As the next regular Congresses will not be held until 1918, in order to expedite this matter, if the American Trotting Association agrees with this proposition, the President is given the power to call a special Congress to meet in December, 1916, to appoint such a rule committee so that a code of uniform rules can be made for the racing season of 1917.

Secretary and Treasurer's Report.

The Secretary laid before the Board printed copies of the Secretary and Treasurer's report of receipts and disbursements of the Association from November 1, 1915, to May 1, 1916, together with certificate of audit and a statement from Percy Rothwell & Company, certified public accountants, to the correctness of the accounts of the Treasurer from September 15, 1915, to May 1, 1916. Said reports were accepted, and the Secretary instructed to send a copy of the Secretary and Treasurer's report to each member.

Eligibility.

The following explanation of the Eligibility Rule was approved, adopted and ordered sent to members:

"Eligibility to compete in races is fixed by the winrace. It is the fastest time made by the winning horse in a public race, or in an event in which he stood best in the summary. Records are not considered in determining eligibility except in special events which are governed by published conditions. Also in the same manner a member, or several members linked together in a circuit, can fix the date after which, or prior to which, winraces shall or shall not be considered in determining eligibility at their meetings."

Election of Secretary and Treasurer.

The term of office of Secretary and Treasurer having expired, the Board proceeded to the election of the Secretary and Treasurer for the next ensuing four years. W. H. Gocher of Hartford, Connecticut, was unanimously elected Secretary and Treasurer of the National Trotting Association.

THE INDIANAPOLIS SPEED SALE.

An official report of the sale has been sent to the Breeder and Sportsman by Manager Frank D. Kenney which shows an average for the entire sale of about $250. As stated last week, the young trotters, Suldine and Senator O'Brien, consigned by C. A. Harrison, topped the sale, bringing $1975 and $2000 respectively. The next highest prices were paid for the pacer Baron Watts 2:07½, that brought $1025, and the trotter Clipper Jr. 2:14¼, trial 2:08½, that sold for $1000. We give below a record of the Pacific Coast horses sold, from which it will be seen that the official figures vary somewhat from the figures sent over the wire and published last week:

Consignment of C. A. Harrison, Seattle:

Suldine (1) 2:24¾, (3) 2:12, b c foaled 1913, by Worthy McKinney, dam Carrietta by Directman, to Jos. Kleckner, Philadelphia, $1975.

Senator O'Brien (1) 2:29, b c foaled 1914, by Peter the Great, dam Carrietta by Directman, to Amos Mutely, Jr., Muncie, Ind., $2000.

Tosora 2:26½, br m (4) by The Patchen Boy 2:10¾, dam Niquee 2:13¾, by Joe Patchen 2:01¼, John Larrick, Darlington, Ind., $270.

Boniquee, br f (3) by Count Boni, dam Niquee 2:13¾ by Joe Patchen 2:01¼, L. G. Van Hook, Frankfort, Ind., $200.

Consignment of J. B. Stetson, Salem, Oregon.

Novela 2:15¼, b m (8) by Letrado 2:25, dam Navajo by Alaska, J. E. Hoover, Indianapolis, Ind., $510.

Consignment of Chas. L. DeRyder, Pleasanton.

Rapallo, b h (9) by Greco B., dam Oniska by Nutwood Wilkes 2:16½, Chas. E. Dean, Palatine, Ill., $550.

Agnes Carter 2:15¾, b m (6) by Nutwood Wilkes 2:16½, dam Excella by Monbells, W. L. Snyder, Springfield, Ohio, $530.

Dick W. 2:06¼, b g (9) by Athadon 2:27—breeding of dam unknown, Frank Long, Chicago, Ill., $270.

Frances S., ch m (6) by King S., dam Lady Loc by Lochinvar, E. D. Gould, Kearney, Neb., $360.

The Earnest 2:21¼, b g (7) by The Exponent 2:11¾, dam Mardella by Del Mar 2:16¾, Frank C. Caine, Knoxville, Ill., $165.

Sis Bodaker, b m (5) by Bodaker 2:13, dam Sis Meridian 2:16¼ by Meridian 2:12¼, George McCrea, Columbus, Ohio, $600.

Asa Pointer, b g (7) by Star Pointer 1:59¼, dam Eva H. by Washington McKinney 2:17½, J. W. Gyles, Cortland, N. Y., $185.

Vernon Diablo, b g (5) by Vernon McKinney 2:01½ dam (unnamed) by Diablo 2:09¼, Chas. E. Dean, Palatine, Ill., $200.

Papers were served on the National Trotting Association and Secretary W. H. Gocher when the Board of Review was in executive session in New York two weeks ago, in a suit for $25,000 damages, the complainant being Robert M. Williams, former manager of the Greater New York Fair and Exposition Company and lessees of the Empire City track at Yonkers. In 1913 while holding a trotting meeting under the rules of the National Association, the management failed to pay the purses and was stopped from holding a mile track meeting in membership with the Grand Circuit. For this violation of racing rules the association was suspended, but later reinstated with the exception of Mr. Williams, the manager, who was suspended and the suspension was not removed for a year. The complainant claims that this unjust suspension barred him from participating in racing affairs, and even excluded him from racetracks and that he was damaged to the extent of $25,000. The suit is filed in the United States District Court. Lee Parsons Davis, of White Plains, and Ernest P. Hoes, of New York, are Williams' attorneys.

AT THE SPOKANE TRACK.

[Rural Spirit, May 10.]

The number of men and horses at the Spokane, Wash., track indicates that there may be things doing this fall. No real fast workouts have gone yet, but all the horses seem to be coming on well.

D. H. Young, of Sprague, Wash., has Don Carlos by Gyr Falcon, dam Maud Hanley, a four-year-old pacer that can step an eighth in sixteen seconds, without straps.

Sonnie Jim 2:21¼ as a three-year-old, by Gyr Falcon, dam Babe by Encounter, is another good prospect.

May Online by Sprague Mason, dam Carrie by Online, owned by Jack Tormey, of Cheney, and a green pacing chestnut mare by Jr. Dan Patch, owned by John Gilmore, of Spokane, both with a good way of going, make up Young's string.

Lou Childs has Greatness 2:10¼ as a three-year-old at last year's San Francisco races, by Peter Wilton, dam by Mt. Vernon, and Mildred Direct 2:14¼ by George Direct. Both these will race, and they will probably go on the Great Western Circuit, with Marvin Childs as driver.

William Shaw has Lottie Dishman, a gray mare of uncertain breeding but giving much promise of speed, and Garvin Wilkes 2:18¼ by Babant, dam Susie Wilkes by Wild Wilkes. The latter will be raced this year. It is as yet uncertain about the mare.

J. V. Shaw has T. R. Gregor, a promising green pacer by Ben Reisdeik, dam Blanch McGregor by Remark, a son of Robert McGregor. Young Shaw also has Robert, a Thoroughbred mile horse that has been a successful campaigner.

C. J. Maxwell has Sister Norte 2:20¼ by Del Norte, dam Trilby by Big Bird, owned by William Gummers. He also has Champ Clark by Sherlock Holmes, out of the same dam, a great four-year-old that has stepped a half in 1:15. Maxwell also has in Cyrus Custer, a yearling colt of much promise by Sirius Pointer, dam a full sister to Sister Norte. He is also caring for the old broodmare Clara, dam of Edgar Boy 2:08¼.

The veteran trainer, Lute Lindsay, now past 80 years old, is this year caring for the standard bred stallion Mike Shine. Mike is twelve years old and has no mark, but Lindsay plans to give him one this fall. The old horse was first prize standard bred stallion here last fall and is sire of Mike Shine Jr., that was a sensational winning pacer on the ice at Minneapolis in something like 2:08 or better last winter. Dan Island by Mike Shine, dam by Red Wilkes, is a three-year-old pacer that is a good prospect. Lindsay has a fine yearling in charge by the old horse. Mike Shine is sire of a pair of horses that were taken to England, where they won first place in a horse show, and Lute thinks much of him.

Oscar Wills, after being out of the game fifteen years, has broken in again. He has Lady Ottoman by Ottoman Boy, dam by Orion, that was the two-year-old champion, with a record of 2:07½. She is owned by J. C. O'Connor, of Spokane, and Wills, as well as a good many others, thinks he has something extra good.

S. C. Payne has E. N. Jones' great mare Big Squaw 2:10¼ by Kewanee Boy, dam Argive Helen. He has two very promising and handsome colts from her by Judge Dillard, and she is again in foal to him. Squaw Dillard is her three-year-old filly, and Gladys Dillard is her two-year-old gelding, both coal-black, big, strong, beautiful steppers for their ages. Payne also has Miss Jerusha 2:08¼ and two colts out of her by Judge Dillard. These are also black, of good size, and give promise of speed. They are Jerusha Dillard, the three-year-old, and D. W. Maloney, a two-year-old gelding.

John P. Boileau is a familiar figure at the track; occasionally helps with a work-out, especially with the Jones horses, and takes more interest in and knows more about racing conditions than any other man in the city. If there were more Boileaus, the racing game would be better.

John Roberts, who for many years has been a conductor on the Northern Pacific railroad, has recently leased his mare, Glenrose by Beaumont, dam Brownie by Bellfounder 73, to John Blackman, of Miles City, Mont. Glenrose has a breeder's mark of 2:14¼. Blackman intends to race her on the North Pacific circuit, beginning in June, and then come on into Montana. It is an interesting fact that Glenrose's dam was 25 years old when she was foaled, and Glenrose is her only colt.

Judge Dillard 2:12¼ by Hal Dillard, sire of Hal B. and other great horses, dam Vignette, by Onward, owned by D. W. Maloney, is again making a fairly good season. Maloney has a yearling out of Miss Jerusha 2:08¾, that he thinks so much of, he is saving him for a stud. The colt is big and strong, good acting and bay in color, while most of Judge Dillard's colts are black.

The Kentucky Trotting Horse Breeders' Association has withdrawn from the National Trotting Association and has announced that the fall trots will be conducted under the rules of the American Trotting Association.

◈◈◈

At the annual parade of the Road Horse Association of New Jersey, held last week at Newark, over 600 horses were in line. This looks as if there are still a few horsemen left in that section.

SADDLE HORSE STAKES AT CALIFORNIA STATE FAIR

Large fields and close contests promise to be the rule in the saddle classes at the California State Fair in September next. The Pacific Coast Saddle Horse Breeders' stake for three-year-olds will very probably have no less than eight starters, and it will be as classy a lot of youngsters as ever paraded and showed gaits before a judge. Among them will be the Bridgford Company's Missouri bred colt Le Grand McDonald, winner of the two-year-old and junior championships at the Panama-Pacific Industrial Exposition last year, Dr. J. W. Smyth's Peg o' My Heart, winner of the junior championship for mares at the same show, also entries by Miss Adelaide Gillis of Los Angeles, Revel Lindsay English (Sierra Vista Stock Farm), Chino, California, Mr. Bernstein of Stanislaus county, W. E. Creed of Piedmont and others. The stake is worth about $800 and is divided into five moneys: 50, 20, 15, 10 and five per cent.

The California State Fair two-year-old futurity is worth about the same amount and will also draw a big field of colts. There will be six prizes in this stake, viz.: 35, 20, 15, 12½, 10 and 5 per cent. F. J. Bork of Sawtelle has a colt by Don Castano in the stake that is already spoken of as a likely winner, as he is a classy fellow and greatly improved over his yearling form. California's Best, that was second to Miss Loula Long's winner of last year's yearling prize, will represent the Bridgford Company.

President T. L. Johnson of the Saddle Horse Breeders' Association, will have entries in the yearling stake by his handsome stallion Lord Denmark, and Martha Freeman of Los Angeles has one by Highland Monarch that is highly spoken of. The regular classes for aged stallions and mares will fill well and the saddle horse show promises to be one of the big features of the California State Fair of 1916.

The suggestion is here made that the fair associations at Santa Rosa and Dixon offer prizes for the saddle classes this year. These horses are always a drawing card for the fairs and as their breeding should be encouraged the best way to accomplish it is to hang up prizes for them at the county and state fairs. Representatives of the California Saddle Horse Breeders' Association will visit several of the towns where fairs are to be held this year in the hope of securing recognition for this breed of horses.

◈◈◈

The Bridgford Company reports that three foals sired by its Junior Champion, Le Grand McDonald, when he was a two-year-old have made their appearance this year on the farm near Knightsen. One is from Black Belle, a winner of many prizes in the show ring, another is from Dorothy Green by Artist Jr., and another from Lady Fashion 2d by Artist Jr. As a three-year-old Le Grand McDonald has developed into a grand horse and promises to repeat his triumphs of last year when he won every time he was shown.

◈◈◈

Dr. W. J. Smyth of Oakland sometimes drives his saddle horses Peg o' My Heart and The Candy Kid to a light road wagon and they make a spanking pair. The mare is a three-year-old and the gelding five. Peg o' My Heart was bred in Kentucky while The Candy Kid was bred at the Bridgford Company's farm and is by Artist Jr., a Missouri bred stallion that had wonderful prospects as a show winner before he received an injury which ruined him for show purposes.

◈◈◈

Mr. H. C. Ahlers, the Post street jeweler, is taking much pleasure on the bridle paths of Golden Gate Park with his mare Mavis that he purchased from Thornberry & Shropshire last year after she had won first prize for saddle mares three years and under four, and also the Reserve Senior Championship and Reserve Grand Championship at the P.-P. I. E. Mavis is a highly formed mare of the true saddle type and is being ridden at walk, trot and canter, Mr. Ahlers not caring for the other gaits.

◈◈◈

It being very noticeable that New Yorkers do not care for all the gaits to which the Kentucky Saddle Horses are trained but are very partial to the type of animal, and the Kentucky breeders are consequently taking consignments of these horses that are trained to but three gaits and securing good prices for them in New York.

◈◈◈

The saddle mare My Idol, by Lord Highland, dam Lady McDonald by Rex McDonald, was sold by Mr. E. D. Moore of Columbus, Missouri, two weeks ago, for $3000, said to be the highest price ever paid for a saddle mare in Missouri. W. J. Thubron of Pittsburg, Pa., was the buyer. My Idol was shown at the P.-P. I. E. and won the senior and grand championship honors in those classes for saddle mares. Mr. Thurbron says My Idol was not purchased for show purposes but will be used as a pleasure horse by a young lady.

Mr. Wm. P. Stark, of Stark City, Mo., has several mares sired by the Homer Davenport importation of Arab stallions. He is breeding these mares to Black Knight, one of the largest, classiest and best bred saddle stallions owned in Missouri.

THE AMERICAN SADDLE HORSE.

There are two major families within the breed, the Denmarks and the Chiefs. The first of these is descended from Denmark, a Thoroughbred, and the second is from Mambrino Chief, an American Trotter.

Denmark was the breed pillar or founder of greatest importance. He was by imported Hedgeford and his dam was Betsy Harrison by Aratus, second dam by Old Potomac, third dam by imported Saltram, fourth dam by Symme's Wildair, fifth dam by Driver, and sixth dam by imported Fallower. Denmark is duly registered as a thoroughbred in the American Stud Book. He was foaled in 1839 and stood in Fayette county, Kentucky. Thrice mated with the Stevenson Mare, whose pidegree was unknown, Denmark sired Rob Roy, Gaines Denmark, and Muirs Denmark. Rob Roy died at four years, and Muirs Denmark was not much known, so that modern pedigrees trace to Denmark through Gaines Denmark. Of the 5,980 horses registered in the first two volumes of the stud book, closing in 1909, 4,031 or 67.4 per cent trace to Denmark in the male line—in other words, belong to the Denmark family. Of these 4,031 horses, 4,019 trace through Gaines Denmark.

Gaines Denmark's four greatest sons were Washington Denmark, Diamond Denmark, Star Denmark, and Sumpter Denmark. About three-fourths of all present Saddlers trace to Washington Denmark. He was foaled in 1855 and lived thirteen years.

Black Squirrel, Montrose and Rex Denmark are among the most noted sires of the breed. They were all Denmarks. Highland Denmark, foaled in 1890, by Black Squirrel, was another great sire of the Denmark line. Chester Dare, by Black Squirrel, made a wonderful reputation as a sire of brood mares, and in the male line has left some noted progeny.

Probably the greatest saddle stallion that ever lived, judged by his records as a show horse and sire, was Rex McDonald, foaled in 1890, and owned in Missouri. He was by Rex Denmark, and his dam was by Black Squirrel.

The Chief family is the great rival line to that of the Denmarks. The founder of this line was Mambrino Chief, an American Trotter, foaled in New York in 1844 and taken to Kentucky in 1854 where he remained until he died in 1862. His sire was Mambrino Paymaster, a son of the thoroughbred horse Mambrino, and his dam by imported Paymaster. Mambrino Chief's dam was a mare of unknown breeding.

Mambrino Chief sired Clark Chief, and he in turn sired Harrison Chief. The latter left eight noted sons, the best of which was Bourbon Chief and Wilson's King. Bourbon Chief was the greatest progenitor of this family. He sired great sires and great show horses. His best son was Bourbon King, foaled in 1900, dam by Wilson's King. He sired many famous three-gaited and combination horses as well as five-gaited individuals.

The most prominent Morgan infusion came through Indian Chief, foaled in 1857. No prominent sire traces to him in the male line, but his name occurs frequently in pedigrees. He was by Blood's Black Hawk, by Vermont Black Hawk, by Sherman Morgan, by Justin Morgan.

Up to the time of the Civil War the demand for these horses was only moderate. When the war broke out these horses, both mares and stallions, were pressed into service. The war was the first check on the breed. Following the war the Trotter became popular throughout the country, and this gave the Saddler a second setback, because many saddle mares were mated with trotting sires. Following this, however, the saddle blood was gradually gotten together and an endeavor made to keep it pure.

In 1891 the National Saddle Horses Breeders' Association published their first stud book. The name of the association has since been changed to the American Saddle Horse Association.

A leading Kentucky breeder presents the points of typical American saddle horses in the following brief paragragh:

"The typical saddle horse does not differ materially from other light horses in conformation. The characteristics peculiar to the type are a long, clean neck, sloping pasterns and shoulders, withers moderately high and narrow, smoothly turned quarters, and a well-set, high-carried tail. In action there should be promptness, ease and precision in going from gait to gait, and absolute straightness and evenness in each. The rack should be smooth, swift and without side motion of the body or legs, the trot should be fast and without offensive flashiness, the canter should be slow with no increasing speed, the flat-footed walk should be springy and reasonably fast, while the running walk or fox trot should be easy and comfortable and equal to about five miles an hour."

This horse must know five or more gaits if he is to be called typical of his breed. Four of these gaits must be the walk, trot, canter and rack; in addition to these four the horse must have one or more of three slow gaits—the running walk, fox trot and slow pace.

The height is usually from 15.1 to 15.3 hands, and the weight from 1,000 to 1,150 pounds. This horse wears a natural mane and tail, in contrast to the other types of saddle horses. Breeders lay stress upon loftiness of carriage, airiness of movement, refinement, intelligence, docility with high spirit and courage—withal, great beauty in every detail of conformation, without any sacrifice of those qualities which insure durability and creditable performance of the work demanded of a saddle horse. The most common and best liked colors are bay, brown, chestnut and black.

An ideal saddler will naturally have a head showing unusually kind disposition and high intelligence. The head should be set at the right angle on a very long, refined neck that is nicely arched. Much attention should be given to the slope of pastern and shoulder, for straight pasterns and shoulders are almost certain to make the horse a hard rider. Height and refinement of withers are necessary for a similar reason and also in order that the saddle may be made secure. The extension of the shoulder into the back, and shortness and strength of coupling are very important. The saddle horse is somewhat upstanding, and the head and tail should be smartly carried.

The saddle horse should possess a high degree of quality, and lots of smoothness from end to end. Rotundity of body is a highly desirable feature. Levelness of croup is more important in the saddle horse than in any other type; if a horse has a steep croup, the defect is magnified a great deal when the saddle is placed on his back, and he presents a plain appearance.

The disposition should be kind, willing, honest and courageous. There should be docility with high spirit and animation.—American Breeder.

BOOK NOTICES.

No matter how good a horseman one may be there is none that cannot derive much information and knowledge from the perusal of "Modern Horse Management," a book from the press of Cassell & Co., London, and which can be obtained through the Breeder and Sportsman. The author of the work, Capt. R. S. Timmis of the Royal Canadian Dragoons, is now with the English army "somewhere in France." There have been many volumes written and printed on horse management, but this from the pen of Capt. Timmis is on modern lines and more practical in every way than most works on the horse. The author has had years of practical experience and in fact prepared the greater part of this book while sojourning in Canada, where conditions as regards horse management are much the same as in the United States. The work opens with an interesting history of the horse from the earliest dates and the headings of the succeeding chapters will give some idea of the ground covered: Psychology of the Horse; Foods and Feeding, Exercise and Transport; Grooming and Stable Management; Driving and Harness; Riding and Saddles; Stable Construction and Circulatory System; Surgical Diseases, Lameness, Teeth and Conformation; Pharmacopœia and Uses of Medicine; General Diseases, Organic, Functional and Contagious; Anatomy and Use of the Horse's Tail; The Crime of Docking; Opinions of Eminent Men, Books and the Press on Docking; Humane Education, the Law; Anaesthetics and Anaesthesia, Humane Destruction; Bacteriology, Antiseptics and the Theory of Disease; On Shoeing and the Care of Feet, and the Use and Abuse of Reins. In short, there is hardly any question relating to horse management that is not covered in this work. There are nearly 500 illustrations made from photographs or drawings and the book is a royal quarto of 316 pages. The price of the book by mail postpaid is $5, and it can be ordered through this office.

§ § §

The Veterinary Handbook and Visiting List, just received from the publishers, J. B. Lippincott Co., Philadelphia, is exactly what its name implies—a handbook for constant use. It is a pocket volume of a size which can be easily slipped into the inside or outside pocket of a coat or ulster. The content gives a variety of tables of much value to the veterinarian or druggist, and also a large number of carefully annotated pages for records of charges or visits. The body of the book is devoted to prescription writing. It is well-night an impossibility to hold in your memory the mass of detailed information presented in these tables, but a splendid substitute for poor memory is to have in your pocket a table of over 350 drugs with the proper bases, adjuvants, corrections and vehicles, and amounts for safe doses for the horse, the cow, the sheep, the calf or foal, the pig, the dog, and with notes upon variations. As a first aid to the proper writing of prescriptions it will be impossible to find a more handy and reliable work. Its author is Thos. B. Rogers, D.V.D., a member of the Pennsylvania State Board of Veterinary Medical Examiners. The price of the book is $1.50.

Geo. K. Barton, a leading dry goods merchant and horseman of Cedar Rapids, Iowa, who came to California a few months ago in search of health, died May 10th, aged 62 years. He owned Waveland, one of the show places of Iowa, which was stocked with prize cattle and horses, trotters and saddle horses being his favorites. He owned the show mare Cigarette, winner of many prizes at the Missouri and Iowa shows of last year, and recently sold at a big price.

◈◈◈

Entries for the four steeplechase stakes to be run at Saratoga during August showed an increase of 122 over last year at their closing with Racing Secretary A. McL. Earlocker. For these four events last year there were 117 nominations. This season there are 239. The largest increase is shown in the Shillelah Handicap, with $1,000 added. Last year this event was run under selling conditions and the distance was two and one-half miles. The course has been changed to two miles.

Notes and News

DATES OF FAIRS.

CALIFORNIA.

Butte Co. Fair at Chico	May 22-28
Monterey Co. Fair at Salinas	July 10-11
Sonoma, Marin, Mendocino and Humboldt Fair, (P. C. T. H. B. A. Meeting) at Santa Rosa,	Aug. 9-12
Solano Co. Fair at Dixon	Aug. 16-19
Yolo Co. Fair at Woodland (date not fixed).	
State Fair at Sacramento	Sept. 2- 9
Alameda Co. Fair at Pleasanton	Sept. 13-16
Ventura Co. Fair at Ventura	Sept. 13-16
Community Fair at Ripon	Sept. 15-16
Fresno Co. Fair at Fresno	Sept. 26-30
Kings Co. Fair at Hanford	Oct. 2- 7
Kern Co. Fair at Bakersfield (date not fixed).	
Riverside Co. Fair at Riverside	Oct. 10-14

ARIZONA.

Arizona State Fair at Phoenix	Nov. 13-18

NORTH PACIFIC FAIR ASSOCIATION.

Vancouver, Can., Exhibition at Vancouver,	Aug. 14-19
Southwest Washington Fair at Chehalis	Aug. 28-Sept. 2
Interestate Fair at Spokane	Sept. 4- 9
Grays Harbor Co. Fair at Elma	Sept. 6-10
Walla Walla Co. Fair at Walla Walla	Sept. 11-13
Washington State Fair at North Yakima	Sept. 18-23
Oregon State Fair at Salem	Sept. 25-30

INTER-MOUNTAIN FAIR CIRCUIT.

Montpelier, Idaho	August 14
Rexburg, Idaho	August 21
Blackfoot, Idaho	August 28
LaGrande, Oregon	September 4
Baker, Oregon	September 11
Ontario, Oregon	September 18
Boise, Idaho	September 25
Salt Lake, Utah	October 2

Roy Carruthers, manager of the Palace and Fairmont Hotels, was in Louisville last Saturday to see the Kentucky Derby.

◈◈◈

The Iowa State College sold a crossbred Clydesdale-Shire gray gelding weighing 2050 pounds last week for $400.

◈◈◈

Mr. Edgar J. DePue, who is now in New York with 17 head of ride and drive horses from the Woodland Hackney Stud, has placed them on private sale at Durland's Riding Academy.

◈◈◈

The Board of Supervisors of Monterey county has appropriated $1000 for premiums at the agricultural fair which will be held on Monday and Tuesday, July 10th and 11th, at the Salinas race track.

◈◈◈

The matinee races of the Sonoma Driving Club, which were scheduled for Sunday, May 28th, have been postponed until a date to be selected in the early part of June.

◈◈◈

According to the records of the Shire Horse Society of England only 36 Shires were exported to the United States in 1915, 17 to Argentina and 6 to Canada. And if the war continues there will be fewer exported during 1916.

◈◈◈

Why not have a half mile saddle race for the saddle bred horses at the State and other fairs this year? They could trot or single foot according to prearranged conditions and should show some speed as well as make an interesting race.

◈◈◈

The second annual Community Fair of southern San Joaquin county will be held at Ripon Sept. 15th and 16th. The departments will include cattle, horses, swine, sheep, poultry, etc., and only the products of Southern San Joaquin county will be entitled to enter and compete for premiums.

◈◈◈

A breeder's meeting held to give time records to a number of trotters and pacers was being held at Exposition Park, Los Angeles as we went to press yesterday (Friday). The Los Angeles Harness Horse Association had charge of the meeting and nine or ten horses were carded to start. We hope to have the official results in time for our next issue.

◈◈◈

Beautiful Bertha by Moormont, dam Abbie McNutward (dam of Greatness (3) 2:10¼) by Guy McKinney, foaled April 5th a large, handsome, chestnut trotting filly by Silkworthy which has been named Silky Berbells in commemoration of the union of the Silk, Bertha and Beautiful Bells families. Here is also united the blood of Bingen, Axworthy and McKinney. Beautiful Bertha is being bred this year to Electric Forbes, son of Malcolm Forbes 47353 (son of Bingen and Nancy Hanks, brother to Admiral Dewey 2:04) and Allie Paine 2:18¼ by Rensselaer Wilkes 2:11¼, etc. This royally bred and beautifully gaited young trotting stallion belongs to Mr. L. M. Paine of Hayward, his breeder, who gave his dam her record and still owns her.

In the $10,000 2:08 trot at Kalamazoo and the $5000 2:08 trot at Grand Rapids, Spriggan and Virginia Barnette will trot for California.

◈◈◈

M. W. Savage says that when he paid $60,000 for Dan Patch it was all cash and that he has yet to buy a horse when part of the price is trade.

◈◈◈

The Black Hawk Stock Ranch of Burlingame has sent six of its representative Shires—three stallions and three mares—to the Butte County Fair which opens at Chico next Monday.

◈◈◈

Well, well! What do you know about this? No less than five four-in-hand equipages, all of them very imposing as to horses, coaches and appointments, were seen on the west drive in Central Park, New York, one day last week.

◈◈◈

The New York State Fair has received 210 entries for the nine trotting and pacing events announced for its fair this year. The $10,000 purse for 2:08 class trotters has no less than 34 horses nominated. The $5,000 purse for 2:11 class pacers has received 22 nominations.

◈◈◈

It is dollars to apples that the Solano County Fair to be held at Dixon August 16th to 19th will draw a big crowd every day of the four. Dixon is the center of one of the richest agricultural, dairy and stock breeding sections of the United States. $1000 has been appropriated by the county supervisors for premiums.

◈◈◈

Lon Daniels is getting ready to start from Sacramento Tuesday next and will ship direct to Cleveland with Chas. Silva's string of horses. Will DeRyder will ship Spriggan 2:08¼ and Dicto 2:09¼, both the property of Dunne & Lowery, in the same car. Harry Bell will probably go along with Grattan Boy 2:09½. Good luck to them all.

◈◈◈

Senator O'Brien (1) 2:29 by Peter the Great, and Suldine (2) 2:12 by Worthy McKinney, the colts that C. A. Harrison topped the Indianapolis sale with, will both go into training for their stake engagements. The Senator will go into the stable of Everett Osborn at Muncie, Ind., and Suldine into Walter Trainer's stable.

◈◈◈

The Central New York Association of Agricultural Societies, composed of twenty-one fairs at which harness racing is a prominent feature, passed a resolution at its annual meeting in Cortland, N. Y., the other day censuring the trade papers of the trotting turf for their attacks on the present management of the National Trotting Association.

◈◈◈

The Intermountain Fair and Racing Circuit will furnish eight weeks of harness and running racing from August 15th to October 7th this year. The full program of purses and classes will be found in our advertising pages. There are short ships between the different points and the purses are liberal. Send to Joseph Waddell, Secretary-Treasurer of the circuit at Baker, Oregon, for the stake book and entry blanks.

◈◈◈

Henry Rutherford, who shipped to Indianapolis with Charley DeRyder, is now located at that track with three head. The trio consists of the four-year-old trotter, George N. Patterson (3) 2:12¼, by On Voyage, a green pacing mare by Charley D., dam Cricket 2:10, and a two-year-old trotting colt called Sequoia, by The Bondsman, and out of Yu Tu, the dam of George N. Patterson. Rutherford thinks well of the latter and has named him in some of the early closing events on the Orange County Circuit.

◈◈◈

It is stated that S. A. Fletcher of Indianapolis, who recently paid $50,000 for Peter the Great 2:07¼, has now purchased the wonderful young broodmare Nervolo Belle, that at 10 years of age is the dam of Peter Volo 2:02, Volga (2) 2:07¾, Donna Volo (p) 2:18¼ and Petress Volo 2:27¼. Mr. Fletcher paid $10,000 to G. L. Knight of Kentucky for the mare. She is in foal to Moko and will be bred to Peter the Great again this year.

◈◈◈

According to an official entry list sent by Secretary Pearson of Hartford, the five early closing events of the Charter Oak Park Grand Circuit meeting, exclusively for mile track horses, have received a total of 94 entries, or an average of a shade less than 19 per event. The classes are the $5,000 Charter Oak Stake, 2:08 trot, 18; the 2:08 pace, 11; the Devereux Limited, 14; the three-year-old trot, 21, and the two-year-old trot, 20, the total value of the five being $14,000.

◈◈◈

Mr. J. H. Booth of Roseburg, Oregon, member of the Board of Review of the National Trotting Association, dropped into the Breeder and Sportsman office last week for a short visit on his return from the meeting of the Board held in New York May 2d. Mr. Booth is very sanguine that the recent "tempest in a teapot" in National and American affairs has passed and that it has been succeeded by a calm in which the two associations will be brought closer together, and work for the best interests of trotting horse breeding, and racing will go on with more earnest co-operation than ever before. Mr. Booth's friends will be pleased to know that he has greatly improved in health during the past few months.

California horsemen will take a pardonable pride in the fact that Star Hawk, who made such a remarkable showing in the Kentucky Derby last week, is owned by a resident of California, Mr. A. K. Macomber of Burlingame, was trained by another resident of California, the well known turfman Walter Jennings, and while an English bred colt, Star Hawk is bred in the stoutest of American lines on his dam's side. He is by Sunstar and his dam Sweet Finch was bred by the late J. B. Haggin. Sweet Finch was by imported Goldfinch, second dam Luciana by imported Sir Modred, third dam Schoolgirl by Pat Malloy, fourth dam Glenluine by imported Glenelg, fifth dam Lute by Lexington.

◈◈◈

That good broodmare Daphne McKinney, dam of the pacer Frank N. 2:07¼, and of the sire Bon McKinney 2:24¼, sire of Bon Courage 2:08¼, is the dam of a two-year-old filly now being given her first work over the Pleasanton track that gives great promise. The filly was found to be very lame last fall when running at pasture and on examination a long splinter was found in her ankle. When after much treatment the wound finally healed it left an enlargement which by patient work has been reduced until it is scarcely noticeable. The filly has been driven a little this spring by her owner, W. E. Detels, and on Wednesday of last week trotted a mile in 2:39½ with the last quarter the fastest of the four. The sire is Graham Bellini 2:11¼ and as she is well staked Detels is rather congratulating himself that he did not chloroform her, which he was inclined to do when he first saw her after her injury.

◈◈◈

A lot of conversation is being carried on these days, whenever two or more harness horsemen are gathered together, with the black five-year-old pacer All McKinney as the subject. As a majority of our readers are doubtless aware, this black fellow is owned by T. W. Barstow of San Jose, who bred and is training him. We believe All McKinney never started in a race, but if those who have witnessed his recent work are not mistaken he is fit to enter in almost any company. Geo. W. Lowery remarked the other day, "He looks more like a race horse right now than any horse I have seen for some time." Lowery was at San Jose last week watching his horse Spriggan 2:08¼ at work and says DeRyder with "the winner of the $20,000" and Barstow with All McKinney worked together. They went a mile in 2:18 or thereabouts and Spriggan stepped the last quarter in 30 seconds flat, but in the last hundred yards Barstow gave the pacer his head just to show the boys how he could step and he left Spriggan as though the latter was tied. Lowery says he never saw such speed in a green horse. He thought right then that he could afford to pay $1750 for a horse of that sort and made Barstow that offer for All McKinney, and when the offer was politely refused he raised it a hundred although he said he could not afford it, and that also was given a genteel turn-down, Mr. Barstow saying another person is interested in the horse with him and they must have $2500 for All McKinney or they would race him. Lowery came back to San Francisco and sent a friend down to look the pacer over and try to buy him. What the result was we have not learned. All McKinney is inbred to McKinney, his sire and dam both being by that horse. He is by Nearest McKinney 2:13¼, dam Mrs. Weller by McKinney, second dam that speed whirlwind of 1898 Much Better 2:07¼, by Charles Derby.

MATINEE AT HOLLISTER.

The light harness season of 1916 opened last Sunday at the Riverside track, under the auspices of the Hollister Driving Club.

A fair sized crowd was present to see the sport, but only two contests were carded, the buggy horse race, one-half mile heats, three in five, and the 2:30 class trot, two in three.

R. I. Orr, president of the club, officiated as starting judge, while Robert Orr Jr. acted as secretary. The timers were John Soares and John Cruz, of Watsonville.

The first race had three starters: Geo. Cagney's Dan Patch, Jerry Wright's Stanford White and Geo. E. Shaw's Little Nell. It was the latter's first start in a race, and in addition to being slightly outclassed, she was nervous and flighty, although she was ably driven by the old veteran Mat. Zahner. Dan Patch was driven in the first heat by his owner and in the other two by Frank J. Neilson. Stanford White was piloted by Al. G. Willson. The two latter horses made a close and interesting race, but Stanford White had the foot of Patch and came in the winner in all three heats. Time for the half-mile being 1:20, 1:22½ and 1:19.

Patch was second and Nell third in each heat.

The next race, a two in three affair, had as starters Jack Kydd's Ben Alto with Joe Sanchez as driver, Jerry Wright's Oro Guy with Al. Willson up, and William McLeod's Benito B with Mat Zahner at the helm.

This was a very close race, Ben Alto breaking in both heats and allowing the old horse Oro Guy to come in first in each, with Ben second and Benito B., who also broke badly, coming in third. Time, 1:15, 1:15.

The track was in fine shape and the club will give another afternoon in the near future.

Thoroughbred Matters

GEORGE SMITH WINS KENTUCKY DERBY.

Sixty thousand people, the largest crowd ever seen at Churchill Downs, saw a little black horse with the unromantic name of George Smith win the romantic Kentucky Derby at the famous Louisville course last Saturday. It was a hard-earned victory and there will always be plenty of argument to support the claim that Star Hawk, the imported son of Sunfast, owned by Mr. A. K. Macomber of Burlingame, California, was the best horse as he was left standing flat-footed when the barrier was raised and was coming with a rush at the finish, gaining at every stride. The mile and a quarter was run in 2:04, which time has never been beaten or equaled but once in this event and that was when Old Rosebud won it in 2:03 2-5. The first quarter was run in :22 2-5, the half mile in :46 2-5, the six furlongs in 1:12 1-5, and the mile in 1:38 4-5.

The Derby was the fifth race on the card, and it was 5:15 o'clock when the horses reached the post. There was but little delay at the barrier, and within a minute they were on their way. Dodge, who ran coupled with Franklin as the Weber & Ward entry, was the first to show colors, and his stablemate dashed away right behind him. Dominant, who was coupled with Thunderer as the Harry Payne Whitney entry, followed the Weber & Ward pair, and he immediately dashed into a long lead.

Passing the stand for the first time Dominant had a big lead and appeared to be running easily, but after reaching the back side of the track it was evident that he was not good enough to last it out. Franklin was running close to him and appeared to be ready to run over him. George Smith was in third position, and Jockey Johnny Loftus was carefully nursing him along, reserving his speed for the gruelling drive through the stretch, which he knew must come. Nearing the three furlong pole Dominant gave it up and then Loftus called on George Smith.

The Sanford colt bounded to the front at a rapid rate and soon had a lead of a length over his field, with Franklin closest to him. Then it was that Star Hawk loomed up as a dangerous contender as he finally found his stride and had clear sailing. In the stretch, though, Loftus kept hard at work on George Smith, while Jockey Walter Lilley, who rode Star Hawk, was making vigorous efforts to get him up.

Between the sixteenth pole and the finish it looked as though Star Hawk could make it, but Loftus's experience served him well and he never drove a horse harder than he drove George Smith.

Without detracting from the brilliant performance of the winner, it was the concensus of opinion that Star Hawk was the better horse, and that only racing luck brought about his defeat. Lilley had failed to have him going away well, and all through the running he appeared unable to make the colt give up his best. Then through the stretch Loftus outrode him when the final pinch came.

The showing of the Whitney pair was disappointing to the Eastern contingent and to Trainer Jimmy Rowe himself, who was the picture of confidence before the race. Thunderer did not show to advantage at any stage of the race, but he finally managed to beat his stablemate, he finishing fifth, and Dominant seventh.

Nine 3-year-old colts contested for the race, which was worth $12,745 gross. Of this amount the winner received $9,750, the second horse $2,000, the third horse $1,000, and the fourth horse saved starting and nomination fees, which amounted to $225.

Mr. Sanford was on hand to see his high priced colt perform. There was not a happier person at the track than Mr. Sanford after the finish, and not a more nervous person, according to his own statement, while the horses were racing through the stretch.

A. K. Macomber, owner of Star Hawk, saw the big race with a party of friends, and after the event was over said that while he hated to lose the race under such circumstances, he knew that his crack imported English horse was not disgraced. His other horse, The Cock, did not run such a bad race, finishing sixth.

The Whitney entry was favorite in the race, being 105 to 100 in the pari mutuels. George Smith was second choice at 415 to 100. Everything in the race was well played, Lena Misha, the longest-priced horse in the race, being 3,530 to 100.

The Kentucky Derby for three-year-olds—one mile and a quarter, value to winner $9,750, second $2,000, third $1,000. Won driving. Winner blk. c. George Smith by Out of Reach—Consuello III; Star Hawk second, Franklin third. Dodge, Thunderer, The Cock, Dominant, Kinney and Lena Misha finished as named.

George Smith was given a great demonstration when he walked back, a little blown but still full of fire, into the circle in front of the judges' stand.

He was greeted with cheer after cheer while he stood quietly as a wreath was placed about his neck. His owner, John Sanford, who has seen his horses win many a stake, was the happiest man on the track. He had paid $22,500 for the colt last year just to win the Derby with him this spring, and the colt had lived up to his promise. It was also the first time Mr. Sanford ever scored in the big stake.

The day was ideal for racing. There was just enough haze in the air to counteract the scorching rays of the sun. The track was very fast. Everything had been done to make the great crowd comfortable, and though the inclosure was packed, no real discomfort was felt, except in the betting shed, where men fought to get in line.

Royal Racing at Reno.

The Reno meeting of nineteen days beginning July 1st bids fair to be even more phenomenally successful than the one of 1915, which is saying, in Piute, "heap much." The stakes, which close June 20th, are eight in number, with the Nevada Derby worth $2,500, the Business Men's Handicap $2,000, with several of $1,000 value. This will insure the coming of a host of really good horses to Reno, which is a delightful place at this time of the year. The racing-lovers can thrill over the fishing at beautiful Lake Tahoe in the morning and enthuse over the kingly sport in the afternoon—enjoy an outing such as no place in the world affords, in all probability, and in balmy air found in few places like that at Reno.

The horses of George Wingfield, Charles W. Clark, Charles T. Boots, Alfred Joseph and Edward Cebrian would alone furnish plenty of good sport, but when are added the hundreds now at Tijuana (expected to close down about June 25th) there will certainly be horse-racing reminding one of the racing at Louisville, Bowie or even New York.

Among the speed-burners almost sure to sport silk there we can mention Celesta, Star Shooter, Washoe Belle, Frisky, Aunt Liz, Brynlimah, Rash, Seneca, Brando, Vesta, Hyki, Ed Cudihee, Fascinating, Gordon Russell, Orange Blossom, Parachute, Loftus, John Graham, Foeman, Prince Conrad, Adalid and Magic.

The program of stakes was distributed at Tijuana several days ago. Entries to these close June 20th, and their conditions are suitable to both sprinters and distance horses. The program for the nineteen days is in the hands of the printer and will be out in a very short time. J. A. Schas, an old turfman, is the manager of the Reno meet, J. B. Duncan is President and Ralph H. Tozer Racing Secretary.

◈◈◈

Belmont Park Opens Next Week.

An unusually high-class program of sport has been arranged for the eighteen-day session of the Westchester Racing Association which opens on May 25 at Belmont Park, New York. Seventeen stakes will be decided during the period, while many overnight handicaps and races for the better class of selling platers have been planned.

For the opening day the Metropolitan Handicap, at one mile, with $2,000 added, and the New York Steeplechase are companion features. Judging from the list of eligibles the best performers in their respective classes will compete for these rich stakes. There will also be two events for juveniles, while platers of the first rank will test their speed over the six-furlong and mile routes.

Last year Eddie Dugan sigalized his return to the saddle in this country by winning the Metropolitan Handicap with August Belmont's Stromboli. The chestnut son of Fair Play and St. Priscilla, which ranked second to Roamer in 1915, will be met by much sterner opposition than that which he vanquished last year. The Suburban Handicap, another of the stellar attractions of the meeting, will be decided on Decoration Day, with the International Steeplechase Handicap as a companion feature.

In the Suburban, which has an added value of $2,,500, the pick of distance runners in the country have been named, and it is significant that August Belmont's Stromboli also won this event a year ago. He is again eligible, but will be forced to match strides with such performers as Roamer, Borrow, Star Hawk, Pebbles, The Finn, Sharpshooter, George Smith, Clapperbill, Chicle, and Bromo.

Another feature of the meeting will be the appearance of the numerous high-bred imported horses which were purchased in England last Autumn. Many royally bred juveniles from across the water have been named for the rich two-year-old stakes, and not a small number of older horses which gained their education in England and on the Continent will sport silks.

The rule adopted last spring in reference to scratching will be continued this season, and 10 per cent of the purse will be charged for any withdrawals below six.

◈◈◈

Thoroughbreds From France.

A cargo of thoroughbred horses, all bred at Haras de Villers, France, the thoroughbred breeding farm of August Belmont, reached New York last week, consigned to that gentleman. These horses are some of the best bred that have ever been brought to this country. In the lot are eight three-year-old colts. The French Government refused to permit the exportation of fillies, owing to the war, as they desire to keep within their borders a nucleus from which their great breeding studs may be rehabilitated after peace has been declared. The older horses will be sent to Belmont Park, where they will be prepared by Trainer Sam Hildreth for the coming campaign on the metropolitan circuit. The three-year-olds include Ampere, a bay colt by Ethelbert and Viewpoint, a full brother to the good performer Rockview. Among the yearlings are Beaumarais, a brown colt by Alcantara, out of Qu'elle est Bistouri, winner of the French Oaks, and Bistouri, a boy colt by Tracery, out of Ballot Bred, the first foal of the famous Beldame.

Racing at Tijuana.

Big fields are starting in nearly every race at the tamale track below San Diego and while there are few horses of class, the racing has been very good and favorites and second choices have been winning very frequently. Stories float up from there that the books are being hard hit, but as these rumors are always prevalent whenever horses run anywhere near to form, they may be taken ("I speak no language but mine own") cum grano salis.

Parachute is regarded as one of the best three-year-olds on the track, his winning of the Dupee handicap last Saturday—one mile in 1:39 4-5, the track record—making him the topic of conversation since. He is being pointed for the Tijuana Derby which will be run in June.

Leon Wing writes that, as a matter of fact only a few long shots have gone through at the meeting with an unusual amount of support. The other day when Miss Sherwood won at 30 to 1, one bookmaker lost $1000 to the race instead of holding the majority of the money. These are the breaks that have caused them to holler. The play continues on the improve, and they say $90,000 was handled in the ring Sunday. There were thirteen books in operation, and the money takers had their troubles keeping up with the rush.

B. A. Jones, whose two-year-old racers have won many purses at Tijuana will leave shortly for his big breeding ranch at Parnell, Mo., to see that his coming crop of juveniles are being put in condition for racing early next year. This is Jones' first trip to the Pacific coast with horses to race and sell and he is pleased with the results. Juanita Frederick, Peep Again, Gulf Stream, Old Harry and other winners now at Tijuana are products of the Jones breeding farm. He has 40 highly bred broodmares and four sires in Harrigan, Blues, Waldo and Seth, the last named by the valuable imported Adam.

◈◈◈

Death of Ornament.

Ornament, a truly great horse, is dead at the age of twenty-two years. His life ended at Beaumont Farm, Kentucky, April 26th and he died the property of the man who bred him, Mr. H. P. Headley. Ornament was a chestnut horse, foaled 1894, sired by imported Order, dam Victorine by Onondaga, second dam Maria D. by Lisbon, third dam Crucifix by Lexington, fourth dam Lightsome by imported Glencoe. From his first appearance as a two-year-old, when he won impressively from a good field of youngsters, until his retirement after having won the Brighton Handicap at one and a quarter miles with 120 pounds up, his racing career was a series of great victories. Ornament won four Derbies, the Clark Stakes, Twin City Handicap, both ends of the Double Event, Flatbush Stakes, Brooklyn Handicap carrying top weight, 127 pounds, Brighton Handicap, Himyar Stakes, and eight other races, twenty wins in all and nearly $90,000. He was the best two-year-old of 1896 and the best three-year-old of 1897, and the best horse of the all aged division as a four-year-old. He was retired absolutely sound and at the stud his success was such that he occupied a prominent place on the Twenty List from the time his get were three-year-olds in 1903, until he was taken out of active service. Among the many good horses sired by Ornament are Sheriff Bell, Montreson, John Carroll, Princess Orne, Stroller, Gallavant, Merlingo, Raleigh P. D., Reidmoore, King's Daughter, Aletheno, Montfort, Beaucoup, etc.

◈◈◈

Death of La Fleche.

The death of that wonderful race mare La Fleche was announced in England during April. She was a brown mare by St. Simon out of Quiver by Toxopholite and was sold as a yearling for £5,500, then sold in 1896 when a broodmare for £12,500. She raced from two to five and won £34,703. Since the late Sir Tatton Sykes acquired the mare, five of her produce have been sold as yearlings at public auction, and they realized an aggregate of 17,900 guineas, Baroness Le Fleche making 5200 guineas, Arc de Triomphe 4700 guineas, John o' Gaunt 3000 guineas, Strong Bow 2700 guineas, and Sagitta 2300 guineas. Le Fleche, however, like many another great racer, cannot be described as a really successful brood mare, although she handsomely repaid the outlay made by Sir Tatton.

◈◈◈

E. R. Bradley, who purchased Consuello II, the dam of George Smith, at a Lexington sale for $1300 sold her to John Sanford afterwards for $9,000. It was several months after that Sanford bought George Smith.

◈◈◈

Governor Stanley of Kentucky attended the opening at Louisville and picked four winners, all of which he backed for a small amount in the pari mutuels.

◈◈◈

O. A. Bianchi has received several flattering offers for his good sire, Jim Gaffney, but he is holding out for a bigger price. Gaffney has not had much chance in the stud, but has turned out some remarkable race horses.

◈◈◈

The management of the Louisville Jockey Club refused to sell the moving picture privilege for Derby day and told all the film companies to go to it. At least 20 motion picture operators were scattered about the grounds.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

CHANGES TO FISHING LAWS.

When the California State Legislature meets after the first of the year there will be some proposals made to change the present laws governing fishing. The California Anglers' Association will wage a campaign to switch the opening of the trout season back to the original date of April 1st, instead of a month later, as was the case this year. Another suggestion is that no trout less than five inches minimum length will be lawful to catch.

The argument against opening the season as late as May 1st is that the water at that time is so low in the streams that the large trout had gone with the receding waters and it leaves only the smaller fish. It is especially true this season in view of the fact that no rain fell in April and the latter part of March. In April this season the fishing would have b een excellent while the reports as a whole have been disappointing. The Fish and Game Commission will not likely oppose the earlier opening.

The question about the size of the trout taken has been brought up because of the wholesale number of limit baskets of tiny fish. A five-inch law, it is thought, will correct this evil to some degree. Practically every state in the Union has similar regulations and it was only abolished in California about four years ago on the ground that little fish hooked and thrown back into the stream die anyhow. Experiments have shown that 72 per cent of the fish that are hooked and thrown back die within twenty-four hours. If the law was in effect, however, many fishermen would not fish when the conditions were not right to make big catches. Cases have also come to notice where small trout have been used for striped bass bait.

One of the pleasing features of the fishing season so far has been the small percentage of violations of the law. Of the thousands who have turned out all over the state since May 1st only eight arrests for fishing without license or catching more than the limit were made. The deputies have been active as the weekly reports indicate, but it is evidence that the people are getting educated to the laws in effect. During April violations were more frequent. There were twenty-four cases of fishing out of season. Many of these were due to the fact that the season had opened in previous years on April first and there was a misunderstanding.

* * * *

Although black bass fishing came in on May 1st there have been few big catches recorded. The reason is given that the water is too high as yet in the popular black bass streams and rivers. In the San Joaquin district the deputies state that few if any bass have been taken so far.

* * * *

Wild Horse Lake, the water supply of Vallejo, proved a good trout spot the opening week of the season. Two hundred and twenty anglers took out 1800 pounds of trout, which gave some fairly large individual catches.

* * * *

If you happen to make a big trout catch, do not brag unless you are fortified with an angler's license and are otherwise keeping within the law. This bit of free advice is given because a Southern Californian, Sorter by name, hooked a 30-inch steelhead trout on opening day and proceeded to claim the trophy that had been set up by a Los Angeles paper for that honor. Sortor was accordingly given a deal of publicity and it led to the fact that he hooked said prize trout without having a license. He was duly arrested and now the other anglers are protesting about awarding the trophy to Sortor on the ground that he caught the trout illegally.

BEAR HUNT IN ALASKA.

To hunt, with gun and camera, the Kodiak grizzly bear, regarded by naturalists America's most ferocious mammal, A. J. Buzard, Spokane county game commissioner, Al Smith, moving picture man, both of Spokane; W. A. Hilles, a rifle shot of national reputation, and W. A. Wright, a naturalist, left Seattle Thursday for Kodiak island, Alaska. The hunt will last two months.

It is reported from the Kodiak district that the tracks of bears measuring 18 inches have been found on the island. Such a track could be made only by a bear of 2500 pounds estimated weight. Smith will take a number of pictures of the hunt. Hilles and Buzard will do the shooting.

* * * *

The Spokane county game commission is about to turn Mount Spokane into a deer pasture. Already Big Game Commissioner A. G. Gray has seen to the removal of 10 deer from Manito park to the slopes of the high peak and six more will be taken out to be liberated on the mountain-side within a few days. In addition to the deer, arrangements are being made to liberate six elk, three females and three males, in the county. "These deer will be under protection on Mount Spokane," said Mr. Gray.

BASS PLANTED IN THE SOUTH.

Silver Lake is closed to fishermen, and is to remain so until further notice. Chief Engineer Mulholland of the water board is a sportsman and does not believe in turning loose fishermen among artificially-planted bass when the fish are trying to establish themselves by spawning. Mr. Mulholland put the forefathers—and mothers—of those same bass in Buena Vista reservoir 25 years ago, and he hauled them 25 miles in a wagon behind Chapman's reservoir. So he feels a fatherly interest as well as a sportsmanlike interest in their preservation. The public will be given a full chance at them when the time is ripe and the fish are spent. More signs forbidding fishing have been posted.

* * *

Croakers and yellowfins have been running at Sunset Beach briskly mornings and evenings of late. There is little sport in the middle of the day, but after 6 o'clock and before sun-up in the morning, after the fashion of croakers and yellowfins, handsome catches have been reported.

One man basketed six fish scaling 14 pounds. There has been a fair supply of clams in town all week.

Good sport is reported from the zeach also near Los Patos.

In the effort to repeat in Southern California the splendid success already attained by the Fish and Game Commission's efforts at introducing and propagating choice varieties of sporting and food-fish from the Atlantic coast, heavy plantings of striped bass will be brought down from San Francisco next fall and placed in ....ewport, Anaheim, Alamitos and False and San Diego bays.

Even if the bass do not prove sufficiently suited by this environment to propagate themselves, it may be possible to make heavy shipments of young every year and artificially keep up something of a stock in the bays by way of adding to the list of alongshore game fish, should it prove impossible to bring them to the plenty of the North, where they are a food of importance.

Striped bass require considerable volumes of fresh water entering the bays, as they run up rivers to spawn, and this year, owing to the Southern rivers being so much stronger than usual, is thought to be a particularly favorable time to try the experiment.

* * * *

Small plantings were made in Newport bay a number of years ago, and a considerable proportion of the fish apparently took hold, as some of 20 pounds have been taken and every year several small ones are reported which suggests that they breed somewhat. One of 39 inches' length full of spawn was seen at Anaheim Landing several years ago, taken in a net from which the captors tried to free it, without success, the fish dying in the haul to the sand. Evidently it was trying to get into fresh water to spawn.

All surf-casters in the South are vitally interested in the striped bass, which is the premier alongshore fish of the Atlantic coast, and every effort has been promised to aid the Fish and Game Commission in establishing it by reporting fish seen subsequently, and informing upon any illegal captors.

A few shad have wandered down South also, and the theory is advanced that these striped bass taken occasionally are stragglers also like the salmon sometimes caught, but no one knows. Great interest has been taken by San Diego surf-fishermen in the plantings.

PROGRAM FOR WASHINGTON STATE SHOOT.

The twenty-second annual tournament of the Washington State Sportsman's Association will be held at Seattle, Wash., on May 22, 23 and 24, with $450 added money. On May 22, preliminary day, the shooting will begin at 1:30 p. m., the program to consist of five 20-target events with an optional sweepstake of $2 on each event, purses divided into four moneys, per cent. plan. On the second day, May 23, there will be ten 15-target events, $1.50 entrance to each, $1 optional sweepstake on each event, and $15 added to the purse in each event; also a 25-target handicap event for the P. I. gold medal, and a 25-target handicap event for the Spokesman-Review medal. On May 24, the last day of the tournament, the program will consist of two 15 and one 20 target events, the Interstate Association's amateur state championship at 100 targets, the contest for the Smith gun trophy, 25 targets, the contest for the Rainer trophy, 25 targets, and a three-man team race, 25 targets each man, winning team receiving individual trophies and 50 per cent of the purse, the balance of the purse to go to second and third high teams, 30 and 20 per cent. The Squier money-back system will be used in order to protect the poorer shots. The annual meeting of the association will be held at the Washington Apartments, at 8 o'clock on the evening of May 22. The shooting will commence promptly each morning at 9 o'clock. For programs address the association's secretary, Hugh Fleming, Seattle, Wash.

NATIONAL SMALL BORE RIFLE MATCH.

To Secretaries of Rifle Clubs:

The attention of your club is called to the fact that entries should now be made for the Inter-Club Outdoor Small Bore Short Range Competition for 1916. The match will begin the week ending June 3d and conclude the week of August 5th, for a series of ten matches. Each club in good standing with the Association can enter one team, to consist of ten men, the five highest scores to count for the team's record. Prizes will go to the three highest teams, according to aggregate scores for all matches.

The entry fee is $5 per team and the entries will close May 30th. Conditions of the matches are being sent, with entry blanks attached. Last year there were 34 entries and it is hoped the list will be larger this year on account of the increased interest and number of clubs.

Trusting to receive an entry from your club, I am,

Yours very truly,

FRED H. PHILLIPS, Jr.,
Sec'y National Rifle Ass'n.

SCORES OF S. F. FLY-CASTING CLUB.

Members of the San Francisco Fly Casting Club participated in the regular Saturday and Sunday events, and some good performances were noted. C. H. Kewell's score of but two demerits in heavy tackle accuracy establishes a new record in this event.

F. J. Cooper made the longest single cast in half-ounce lure distance with a cast of 240 feet, his average being 207. The officials were as follows:

Sunday—W. J. Davis Jr., Joe Springer and J. F. Burgin, judges; F. J. Cooper, referee; Charles E. Hills Jr., clerk.

Saturday—P. W. Shattuck, Joe Springer and Colonel Edwards, judges; C. H. Kewell, referee; Charles E. Hills Jr., clerk. The scores for Saturday:—

Contestant.	—Delicacy— Accy.	Dicy.	Net.	H. T. Accy.
Col. G. C. Edwards	7	20	13½	15
C. H. Kekell	13	20	16½	5
F. A. Webster	22	15	18½	6
Col. C. G. Young	30	35	32½	15
A. H. Gardner	37	40	38½	18
J. F. Burgin	45	35	40	..
Joe Springer	28	60	44	25
P. W. Shattuck	56	45	50½	11
F. J. Cooper	..	..	..	14

Re-Entries:—

Heavy tackle, distance—Colonel Edwards 95, C. H. Kewell 111, F. A. Webster 101, Colonel Young 95, C. H. Gardner 83, J. F. Burgin 111, Joe Springer 86, P. W. Shattuck 116, F. J. Cooper 99, C. H. Kewell (re-entry), 113.

Half-ounce lure, accuracy—Colonel Edwards 54, C. H. Kewell 14, F. A. Webster 22, Colonel Young 19, C. H. Gardner 8, Joe Springer 32, P. W. Shattuck 31, F. J. Cooper 16. Re-entry—Joe Springer 31, C. H. Kewell 26, F. A. Webster 38.

Half-ounce lure, acuracy—C. H. Kewell 109.5; J. F. Burgin 86; Joe Springer 68; F. J. Cooper 177.7.

Sunday results:—

Contestant.	—Delicacy— Accy.	Dicy.	Net.	H. T. Accy.
C. H. Gardner	17	10	13½	18
Col. C. G. Young	22	15	18½	17
W. J. Davis Jr.	21	30	25½	11

C. H. Kewell	25	30	27½	2
H. Sperry	28	30	29	12
J. F. Burgin	40	20	30	..
Joe Springer	16	50	33	24
William Crawford	51	25	38	30
Dr. O. Westerfeld	28	55	41½	40
F. J. Cooper	..	..	..	14
P. W. Shattuck	..	..	..	12

Re-Entry List—

Heavy tackle, distance—C. H. Gardner, 88, W. J. Davis Jr. 97, Austin Sperry 93, C. H. Kewell 103, H. Sperry 104, J. F. Burgin 91, Joe Springer 89; William Crawford 90, F. J. Cooper 100, P. W. Shattuck 99. Re-entry list—Joe Springer 91.

Half-ounce lure, accuracy—C. H. Gardner 18, Colonel Young 29, W. J. Davis Jr. 15, Austin Sperry 34, C. H. Kewell 27, H. Sperry 25, J. F. Burgin 12, Joe Springer 28, William Crawford 21, Dr. O. Westerfeld 35, F. J. Cooper 40, P. W. Shattuck 14. Re-entry list—W. J. Davis Jr. 19, H. B. Sperry 38, Joe Springer 69.

Half-ounce lure, distance, average—C. H. Gardner 165, W. J. Davis Jr. 121, C. H. Kewell 148, William Crawford 130, F. J. Cooper 207.

Big Bear Valley.—Three high school boys have the record in stream fishing for this season, having snagged 350 trout after three days whipping of Bear Creek between the big dam and Slide Lake. The boys are Davenport Smith, Clio Burris and Harold Lineau, all of Redlands. The trout they caught run in length from six to ten inches. There is something queer about the stream fishing this year as it is good only in spots. In the Upper Santa Ana and headwaters of Bear Creek the fishing has been good but in the lower Santa Ana, from the mouth of the canyan to the Edison intake, there has not been a trout taken out this season. Old-timers say that the fish below the intake were all swept away in the heavy floods of January.

Drink Jackson's Napa Soda.

Coast Shots In State Championships

OREGON, WASHINGTON, CALIFORNIA AND NEVADA WILL HOLD TOURNAMENTS THIS MONTH

Big Time Club.—The Causeway Challenge Cup, which was contested for for the first time at the Big Time Gun Club's shoot Sunday, was won by Dr. W. W. Goode of Sacramento, who broke 47 out of 50 blue rocks. Priest and Tharp were tied for second with 46 breaks. Ilgner shot 48, but his score did not count because he is a professional. Higgins and Brennan, also professionals, shot 46 and 40 respectively.

An interesting shoot was staged between three-men teams from the Ruhstaller and Newbert families, the Ruhstallers winning, 27 to 26 out of 30 birds each. Frank, Dave and A. Ruhstaller each broke nine out of ten. Frank Newbert broke the straight, while Monty and George broke eight each.

Mrs. D. E. Newbert won the women's shoot for the Kimball-Upson cup, breaking five out of ten rocks.

Dr. J. H. Stineman and Lee Gorman shot off the tie for the Klune & Floberg cup, the former winning with 23 birds out of 25. Gorman broke 18.

In practice Frank Newbert broke 64 straight rocks.

The best shooting for the Causeway Cup was as follows—50 targets:—

Ilgner 48, Goode 47, Tharp 46, Priest 46, Higgins 46, Stineman 45, F. Ruhstaller 44, D. Ruhstaller 44, Joerger 44, Criswell 44, F. Newbert 44, Gorman 43, Pearson 43, D. E. Newbert 41, F. Stahl 41, Brennan 40, Egersdorff 40.

* * * *

Sugartown Club.—Amateurs shot better than professionals in the blue rock shoot for Southern California sportsmen, held Sunday at Oxnard, Cal. In the 200-bird contest twenty-four competitors entered. There were 47 shooters in the field. Many of the visitors were from Los Angeles and neighboring towns.

High amateur average was made by Arnold, who broke 189 out of 200; F. Mellus was second with 188, and Pfirrmann and Witman tied for third, each breaking 182. High professional average was taken by Cook, with 181 out of 200. The Los Angeles Gun Club diamond medal was won by Witman, 182; second and third prizes of White Flyer fobs were won by Arneill, 177, and Blackstock, 175, respectively. The scores of those making 200 shots are:—

Arnold 189, F. Mellus 188, Mitchell 188, Pfirrmann 182, Witman 182, Cook 181, Glenn 181, Arneill 177, Hoit 176, Blackstock 175, Milligan 175, Council 175, Justin 175, Mullen 173, Rice 170, McCaffrey 166, Oliver 168, L. Mellus 165, Austin 155, Rossbach 153, Clement 152, Haese 138, Dunn 133, Cline 147.

* * * *

Los Angeles Club.—Charlie Nichols, one of the "shootin' gang" from the Los Angeles Athletic Club, came out on top in the 50-bird handicap for a handsome diamond pin at the Los Angeles Gun Club Sunday. Nichols broke 46 out of 50 from eighteen yards. The next best score was made by C. H. Bitz with 44x50. The handicap is known as "Event ," and a handsome diamond pin was the prize. The complete results in all events follow:—

Event 1—Season Trophies, at 50 birds: A. G. Wilkes50, Mrs. Wilkes 46, C. M. Wood 45, Seth Hart 41, M. D. Towne 38, J. P. Aaestoy 38, H. B. McDowell 33, Wm. Kennedy 27, F. R. Strong 23, Miss A. Wheeler 38, Charlie Vories 47, H. E. Sargent 44, F. Free 41, F. H. Nichols 42, F. H. Teeple 43, C. H. Bitz 44, L. C. Forest 41, A. Pachmeyr 41.

Event 2—Diamond Trophy Handicap, at 50 targets:

	Hdcp.	Score.
Charlie Vories	19	42x50
H. E. Sargent	17	41x50
F. Free	16	42x50
F. H. Teeple	19	42x50
F. H. Nichols	18	41x50
C. H. Bitz	16	44x50
L. C. Forest	18	41x50
A. Pachmeyr	16	42x50
C. F. Nichols	18	46x50
W. L. Cooper	16	37x50
W. E. Harvey	16	42x50

Practice Shooting: A. G. Wilkes 97x100, C. A. Haight 88x-00, Mrs. A. G. Wilkes 86x100, Dr. S. B. Friend 67x75, F. D. Putzer 64x75, Miss A. Wheeler 57x75, E. W. Mueller 18x25, W. B. Harvey 21x25, F. Free 20x25, M. Mallard 22x25, S. W. Clark 20x25.

* * * *

San Jose Club.—The San Jose Blue Rock Club held its inter-club shoot Sunday on its range at Santa Clara avenue and the King road, the affair being attended by prominent shooters from near-by counties. There was a large number of visitors on the grounds who took much interest in the shooting of the contestants. Over 10,000 blue rocks were sprung from the traps and excellent scores predominated throughout the day's shoot. Len Hawxhurst, of San Francisco, a professional, made the remarkable score of 100 straight targets, while H. Lorenson, an amateur shot from Newman, Stanislaus county, broke 99 rocks without missing. In the miss-and-out event Stamper of Newman won with a score of 24. W. J. McKagney of San Jose won the second prize by breaking 23, thus defeating the best amateur shots of the Pacific coast. McKagney's score of 96 out of a possible 100 is a remarkable showing for an amateur, and places him at the top of the local shooters.

COMING REGISTERED TOURNAMENTS.

California.

Alameda, May 20—Golden Gate Club, Clarence A. Haight, Secretary.

San Jose, May 28, 29, 30—California-Nevada Association Tournament, San Jose Blue Rock Club, O. N. Ford, Secretary.

Los Angeles, July 3, 4—Vernon Gun Club.

Eureka, July 4—Eureka Blue Rock Club, H. A. Hine, President.

Oregon.

Portland, June 5, 6, 7—Sportsmen's Association of the Northwest Tournament, under the auspices of the Portland Gun Club, Frank Templeton, Secretary.

Portland, Sept. 12, 13, 14—Pacific Coast Handicap.

Washington.

Seattle, May 23, 24.—Washington State tourney, Seattle, Association.

Chehalis, May 30—Chehalis Rod and Gun Club, Gus T. Thacker, President.

Seattle, July 4—"Old Policy," Green Lake Gun Club, W. C. Smith, Secretary

Tacoma, July 18, 19, 20, 21—Pacific Indians, F. C. Riehl, Secretary.

In the five-man team contest the Golden Gate Gun Club of San Francisco succeeded in winning first honors. Miss Geneva Meyers of the same city shot in splendid form and broke 60 blue rocks out of 100 sprung from the traps. Following is the score of the various shooters for the day's shoot, 100 targets:—

H. Lorenson, Newman, 99; A. Flickinger, Vallejo, 98; Toney Prior, San Francisco, 97; D. Davidson, Modesto, 97; Wm. McKagney, San Jose, 96; A. F. Baumgartner, San Jose, 95; Fred Burnham, Vallejo, 96; O. N. Ford, San Jose, 94; W. Garrison, Modesto, 94; B. Worthen, San Francisco, 93; H. Garrison, Modesto, 93; D. McFadden, Salinas, 93; D. C. Wood, Modesto, 92; W. H. Landry, San Francisco, 92; C. H. Nash, San Jose, 91; G. Thalke, Salinas, 91; A. M. Barker, San Jose, 90; H. O. Harrison, San Francisco, 90; C. McFadden, Salinas, 90; N. A. Howard, San Francisco, 89; W. J. Terry, Oakland, 89; Chappel, Salinas, 89; H. Havens, Oakland, 87; A. Diamond, San Francisco, 87; H. Brickel, San Francisco, 86; A. Pura, Salinas, 86; J. Douglas Jr., Salinas, 86; B. Holmes, San Francisco, 85; C. R. Arques, San Jose, 84; Dr. Falk, Modesto, 84; A. Sanborn, San Francisco, 84; J. Brickell Jr., San Francisco, 80; Miss G. Meyers, San Francisco, 80; A. Massera, Salinas, 77; B. Hammatt, Salinas, 75; A. Walker, San Francisco, 72; R. C. Hogg, San Jose, 46; A. Vierra, Salinas, 45; A. Stamper, Newman, 40.

Professionals—Len Hawxhurst, Oakland, 100; R. C. Reed, San Francisco, 96; C. A. Haight, San Francisco, 92; Fred Willet, San Francisco, 92; H. H. Rickelsen, San Francisco, 90; W. Ellis, San Francisco, 89.

Team Race, 100 targets per man, 500 per team:—

Golden Gate of San Francisco, 466; Modesto of Modesto, 460; San Jose of San Jose, 454; Salinas, of Salinas, 449; Family Club No. 1 of San Francisco, 432; Family Club No. 2 of San Francisco, 428.

It is thought that not less than 150 shooters will enter and participate in the great California-Nevada state shoot which takes place May 28, 29, 30 and 31. In this tournament $1200 in cash will be distributed amongst the shooters and trophies valued at over $2000 will be awarded the successful contestants. If there should be but 125 entries in this shoot it would bring the entrance money alone up to a sum exceeding $10,000 which would be divided with the winning team, and individual shooters.

* * * *

Astoria Club.—Though the weather conditions were not the most favorable in the world for shooting, the semi-weekly matches of the Astoria Rod and Gun Club, which were held May 10th, attracted a large and enthusiastic crowd. Eighteen out of 25 targets was the best score made, Charles V. Brown, Charles Anet and S. S. Sovey each breaking that number of blue rocks.

A feature of the shoot was the squad of five dentists participating. This squad was composed of Drs. Kinney, Casey, Hoskins, Logan and Vaughn. There is much rivalry between the dentists and they furnished an added interest to the event. Kinney led the dentists in shooting, with Logan second, Casey third, Vaughn fourth and Hoskins fifth. Following are the percentages at the shoot:

C. V. Brown, Charles Anet and S. S. Sovey, each .720; Charles Halderman .680, Dr. A. W. Kinney .600, Dr. Logan .560, Dr. Casey, James L. Hope and Enos Burlingame, each .520; Dr. Vaughn .480, W. H. Fellman, W. N. Ford, Dr. Hartman and Enos Burlingame, .440; W. A. Harrison and Dr. Forstrom, .360; A. G. Spexarth Jr. and Norris Staples, .200; Dr. Hoskins, .160, and Ben Hay .120.

* * * *

Seattle Association.—Although the wind, rain and no small amount of the famous Harbor Island loose sand worked a handicap on the shooters that turned out May 7th to the regular program shoot of the Seattle Trapshooting Association, there were some good scores tallied up.

Frank C. Riehl of Tacoma busted them all in the 50-target event and held high professional score for the day. R. S. Searle and C. E. McKelvey tied for the high amateur honors with 45 targets to their credit. McKelvey stood high in the 100-bird race, there being 91 chalked up for him when he finished shooting. Searle offered the surprise of the day. Shooting in good form and at the rate he is going he is apt to make a strong race in the coming state tournament.

Several new guns were in evidence Sunday. May 7. J. H. Hopkins and John Considine both came out with new "shooting irons."

The trophy races are becoming interesting. Two of last Sunday's high men in class A and class B were high again at this shoot, and with the exception of Searle, who tied with McKelvey, they will only have to stand high once more to become the owners of the handsome cups that President C. E. McKelvey has put up for the four classes.

In class A Hugh Fleming was the high man; class B., R. S. Searle tied with McKelvey; class C, J. V. Hough was high, and class D was not represented.

Mr. Greenbaum, of San Francisco, was on the grounds, but did not shoot. The scores, at 50 targets: *Frank Rhodes 50, *D. Rhodes 46, R. S. Searle 45, C. E. McKelvey 45, Hugh Fleming 44, Matt Grossman 43, R. Kinzer 42, J. H. Hulbert 42, J. V. Hough 42, *George Hambright 41, A. Drake 41, W. B. Taft 40, Tom Wilkes 40, John Considine 39, J. H. Hopkins 38, G. H. Young 38, A. W. Mathis 31, C. W. Bandy 26.

At 100 targets:—C. E. McKelvey 91, Matt Grossman 89, *D. Rhodes 89, Hugh Fleming 87, R. Kinzer 85, W. B. Taft 83, John Considine 81, J. H. Hopkins 75, C. W. Bandy 57. (*Professional.)

* * * *

Golden Gate Club.—The Golden Gate Club opened three days of shooting on Friday. Practice events were first on the card and today a registered tournament is being run off. The regular monthly shoot will be staged tomorrow. Shooters from all around the bay points and from as far south as San Diego are on hand to participate. Secretary Clarence A. Haight figures there will be seventy-five in the competition today.

* * * *

Alameda Elks' Club.—H. P. Martine started off Sunday by missing the first bird but he recovered and distinguished himself by tying with Henry Stelling for high honors. They scored 46 out of 50 apiece. H. C. Peet was second. O. N. Jones led the professionals. The scores were as follows:—

Events.	10	15	10	15	Total
*L. Middleton	4	8	5	7	24
*O. N. Jones	7	14	6	12	39
E. B. Thorning	7	12	9	11	39

* * * *

Portland Club.—Wind and rain did not prevent a score of trapshooters from making the trip to the Everding Park traps of the Portland Gun Club on May 7th. Frank W. Templeton, secretary-treasurer of the Portland Gun Club, was high man of the day, breaking 98 out of 100 birds thrown to him. Mrs. Ada Schilling was second, with 91 per cent to her credit.

Following are the scores recorded: J. S. Crane 66, Al. Seguin 78, E. B. Van Arnam 85, J. C. Morris 69, A. L. Zachrisson 63, F. M. Templeton 98, A. W. Strowger 80, E. B. Morris 69, H. A. Pollock 78, Dr. O. D. Thornton 87, Miss Gladys Reid 61, James Bull 86, Mrs. Ada Schilling 91, Archie Parrott 81, C. J. Schilling 89, James W. Seavey 89, E. Young 85, N. C. Jensen 61, and Wade Strowger (with 28-gauge gun) 24.

Sportsmen's Row

Salem has been chosen as the place for holding next year's tournament of the Oregon State trapshooters' association. H. H. Veatch of Cottage Grove was re-elected president of the association and W. G. Ballack of Albany, secretary-treasurer.

* * * *

Mountain Lions Killed.—Seventeen mountain lions were killed in April for which the State paid a total bounty of $340. Five were slain in Monterey. One each was killed in El Dorado, Lake, Mendocino, Mono, San Benito, Santa Clara and Santa Barbara counties.

* * * *

The Spokane county game commission is removing about 10,000 trout spawn daily from Kalez and Thompson creeks, tributaries to Liberty and Newman lakes, respectively. Game Commissioner A. G. Gray announced yesterday that spawn will be taken care of at the county fish hatchery on Little Spokane river.

* * * *

Predict some record scores at San Jose when the State shoot is held on May 28, 29, 30 and 31. The San Francisco shooters who were down there Sunday declare that the rocks fly well and conditions are ideal for long runs.

* * * *

One hundred straight for Len Hawxhurst. The professional shot is showing in his best form.

* * * *

The Golden Gate Club is going to stage a Beginners' Day shoot in June. Any shooter who has shot at less than 500 targets is eligible.

* * * *

For a class A badger fighter, they say Al Cook is a wonder. Ask some of the San Diego visitors for further information.

* * * *

Fred Willet is stealing some of Andy Flickinger's stuff. He used a freshly baked doughnut on the end of his gun at San Jose on Sunday and never missed one. The trouble was that the doughnut broke too soon.

* * * *

H. P. Martine broke 25 straight in practice the other day and showed it was no fluke by tying for high honors at the Alameda Elks' Club shoot. Martine takes his time in pointing and shows much promise as he only started shooting the rocks this season. M. S. Goodman, Al Durney and Clem Carmen will have to step some to keep pace with H. P.

* * * *

John W. Considine is getting to be a regular at the traps. He was over to Alameda Sunday but did not shoot. He will break in shortly, however, and the boys had better watch him.

* * * *

Mr. and Mrs. A. G. Wilkes have returned from an extensive visit in the East. They shot in many of the tournaments around New York and set up creditable scores.

* * * *

Officers of the Ben Ficklin Fishing Club of San Angelo, Texas, for the ensuing year have been selected as follows: W. A. Alberthal, president; R. V. Perrine, vice-president; Vernon Key, secretary; W. H. West, treasurer; J. T. Thomson, S. L. Ogle and Roy Winn, directors. The club has fine grounds near San Angelo for fishing and recreation.

* * * *

Gun clubs will find their empty shells are worth money if they will gather them up after each shoot, and sell them when they get a barrel or so. A gun club secretary informed us a few days ago that he had secured 95 pounds of brass from two barrels of empty shells. The bross he sold at 11 cents per pound, or $10.45 for the lot, proving that it surely pays to save the empty shells.

* * * *

Two one-armed shooters, George K. Gilmore of Wallace and W. E. Ingersoll of Kellogg, were among the contestants at Spokane. Gilmore broke 115 out of 150. Both were followed throughout the day by a large number of spectators.

* * * *

C. W. Gibbs, M. L. Werkheiser, F. R. Venable, G. K. Kilmore, J. H. Scott and F. C. Moore, members of the Wallace Gun Club, were among those who took part in the Spokane shoot.

* * * *

"I've shot all over the country for 20 years," said Frank Riehl, the Tacoma professional, "but the wind at Spokane takes the cake for making the targets sail bad." Riehl is a southpaw and had to half face the wind, which he claimed was continually putting him off his balance.

* * * *

The office work at Spokane was handled by Chas. Dockendork of Stanwood, who does his work with accuracy and speed. The Cour d'Alene shooters were so much impressed by Dockendork's work that they engaged him to "cashier" for the shoot which they will hold in August.

* * * *

Five states and 20 towns were represented, there being as many visiting as Spokane shooters competing.

* * * *

Attorney D. R. Gale and Aubrey Barham have returned from a delightful fishing and recreation trip, which took them to the vicinity of the Elk Range Club above Cloverdale. They went by automobile a greater portion of the distance and then took their packs on their backs and wandered six or eight miles almost straight up the mountain side. They sought and found two of the best trout streams in that section and caught and ate so many fish that they became surfeited on this article of food.

* * * *

Thirty-two fine steelhead trout, among the largest displayed in Santa Ana this season, were brought by C. S. Schumaker, Elmer Whitson, Bill Stevens and "Duke" Haines, who formed a party which left in Mr. Schumaker's auto for Big Bear Lake. It was necessary to make the trip via Porterville, making a 150-mile jaunt to the fishing grounds. Later in the season, a shorter route will be available.

* * * *

L. A. Lodge tried Alameda Creek in Niles Canyon and he has a complaint about the absence of trout. His catch consisted of 45 pike, five trout and one turtle.

* * * *

Charles Urfer, who would rather fish than eat, whipped the streams of Alameda county last Sunday. He made some catches but reports that the good streams are too hard to get at. He had to force his way through the brush and had little opportunity to use the fly. At times he had to work with only an 18-inch line. At that you can count on Charlie bringing home some fish, no matter where he goes.

* * * *

Fred Koch of Phillipsburg, Ohio, won the trapshooting championship of the South in the final event of the tournament at Memphis, Tenn., on May 11th, by breaking 39 out of a possible 40 targets in a shootoff with R. E. Duvall of Bellville, Ills., who had tied the Ohio gunner with a score of 95 breaks in the regular 100 target event. Duvall broke 35 in the shoot-off.

* * * *

Extensive preparations are being made by the officials of the Portland Gun Club for the annual tournament of the Northwest Sportsmen's Association, scheduled for the Jenne Station grounds during the Rose Festival week. Practice day has been placed for June 4, with the final and Rose Festival 100-bird race on Wednesday, June 7, the opening day of the annual Rose Festival celebration.

* * * *

A late report from Australia indicates that the great smooth-coated fox terrier, Champion Levenside Luke, has about recovered from the unfortunate accident sustained at the time of his arrival and he bids fair to have a long and successful career in the Antipodes.

FEMALE DEER IN PERIL IN NEW YORK.

New York.—The Kasson Deer bill, now before Governor Whiman, is far more drastic in its purpose than was the recent decision of the Conservation Commission which threatened the extinction of the Shelter Island deer.

While that decision involved the killing of between 100 and 200 animals, the Kasson bill means the killing of 20,000 female deer. It takes out of the present game law the preserving clause, "wild deer having horns not less than three inches in length," and gives permission to every sportsman to kill all female deer except fawns.

New York at the present time is lined up with some other States in which only buck deer may be killed. Hounding deer, killing bucks in the water, jack lighting and netting, under enlightened sportsmanship, no longer continue. Only last week Governor Whitman signed the Voorhees bill prohibiting the shooting of game from automobiles and the use of automobile lights in hunting.

The American bison was exterminated by millions because unwise legislation protected the female bison when it was too late. Kill the mothers and you kill the race.

Rattler Climbs Tree.—A rattled rattler "clumb" a juniper tree up at Big Bear Lake. This feat, from which feet were entirely absent, is vouched for by three normally truthful and conscientious citizens of Pomona, viz., J. W. Hutchinson, H. C. Ludden and C. E. George.

Never before has a rattler scaled anything other than itself, and especially not a tree. There is a standing reward offered to any rattler that will furnish satisfactory evidence that it ever shinned any specimen of the genus arboris, juniper or otherwise. The reptile lies dead under the tree which constituted the medium for its miracle, and therefore is in no mental state to demand the honororium.

Messrs. Hutchinson, Ludden and George have just returned to Pomona with an exact description of the snake running up the side of the juniper. After reaching the top, a distance of ten feet from the ground, it hissed at them. Hist! That one hiss was its last. Hutchinson drew his revolver and shot it as he would a bird or a squirrel. Here is what he said:

"It ran up the tree on the south side of the lake. I'd have given a hundred dollars for a kodak then, just to prove that rattlers can climb."

* * * *

Skykomish Club.—The Skykomish Gun Club held an interesting shoot on May 7th. The following is the program shot, at 50 targets:—

Hihebaugh 42, Henry 38, Williams 40, Kirkland 36, Bradburn 33, Hove 44, McEvoy 36, Farr 44, Andrews 13, Schaff 15x25, Martin 13x25. Hove and Farr stood high score in the 50-target events, hitting 44 each.

Vernon Club.—Exactly twenty marksmen were present to witness Dr. Packard annex his first leg on the George T. Kline trophy Sunday, at the Vernon Gun Club's weekly shoot. These same twenty would have been immensely pleased to have won this event themselves, but Packard's 47 out of 50 was a little too good for the rest of his competitors. Packard's blasting was done from the 21-yard mark.

Mrs. Groat secured her usual enviable score. In the match for the William H. Hoegee trophy she was high shot, with 46 kills out of 50. Mrs. Groat was intrenched at the 18-yard mark. She has developed into one of the most consistent shots in local scattergun circles, and is rated as one of the best marksmen in the country. The results:

REPORTS ON FISHING CONDITIONS.

Agents of railroads make the following reports on fishing conditions:—

WESTERN PACIFIC.

Big Bar.—River clear and low. Weather partly overcast and cool. Many limits have been made during week. Shady Rest of Crest reports good results with 20 and 23-inch fish being taken. Salmon flies and eggs being used for bait. No flies used to date.

Belden.—Water in Feather River medium clear and nearing its level. Fishing near here poor at present but north fork after east branch cuts out has been providing good fishing. Nothing but bait being used. Yellow Creek and Chipps Creek fairly good. Three Lakes not tried but understand from Indians that there are plenty of fish. Live helgamite flies, which can be obtained here, are being used. Weather, raining and calm.

Blairsden.—Fishing in Feather River and streams reported good. River is about normal. Lakes still closed. Weather generally clear and warm.

SOUTHERN PACIFIC.

Sisson.—Fishing fair. Weather still cool but getting warmer.

Hot Springs, Tulare County.—Bait fishing is good in Deer Creek, limit catches are frequent. Tyler Creek is clear but rather high. Fly fishing fair in this stream. In about two weeks fishing will be good in Tobias and Parker Meadow Creeks.

Felton.—Fishermen have been catching the limit in this section since the season opened but they run small in size.

Santa Cruz.—Week-end parties have been having great sport. Limit catches of trout and salmon. Latter now running good.

Calistoga.—Fishing poor on account of low water.

NORTHWESTERN PACIFIC.

Dos Rios.—Local parties advise that bait fishing is good in Berger Creek.

Longvale.—Fair catches made regularly; no exceptional catches reported in this vicinity.

Cazadero.—Trout streams this vicinity very good.

Healdsburg.—Streams in good condition; no large catches lately.

Shively.—Fishing in Larabee Creek is reported good; several catches of fifty have been made, all small trout.

Fort Seward.—No catches to speak of here; weather unsettled; better fishing later in season.

At Los Angeles, Cal., May 1-2, Mr. O. N. Ford won the B. H. Dyas cup with a score of 46x50 and 58x60 in the shootoff. Mr. Ford also won the Los Angeles Handicap, 95x100 from the 22-yard mark, and second amateur average, 290x300. Mr. Ford shot Peters factory loaded shells.

The three big honors of the Missouri State tournament at St. Louis, Mo., May 2-4, were won by users of Peters shells, a very significant circumstance. Mr. C. B. Eaton won high amateur average, 481x500, and the Missouri Inter-State Championship, 98x100, and Mr. F. R. Correll of Perry, Mo., won the Grand Missouri Handicap, 95x100, at 17 yards.

* * * *

Oregon State Winners.—Telegraphic reports from Albany, where the Oregon State shoot was held on Monday and Tuesday, are to the effect that Pete O'Brien of Portland was returned winner with a score of 384 out of 400. He also won the State championship with 98x100 and took the trophy event with 25 straight in the shootoff after tying at 46x50 from the 20-yard mark. Hugh Poston and Les Reid tied for the professional honors with 387x400 apiece. Reid made the long run of 141.

Spokane Club.—The largest crowd of shooters that ever faced the traps in the Inland Empire took places on the firing line to compete in the first regular events of the Inland Empire handicap tournament on May 9th at Moran Prairie. Seventy-one contestants, among them three women, made up the 14 squads, and they kept the trap pullers busy from nine in the morning until seven o'clock in the evening, the sun just barely showing when the last squad left the marks in the Inland Empire handicap, the feature event.

Northwest marksmen are accustomed to variable weather conditions, but it is doubtful if ever they were called upon to shoot under more trying conditions. The weather ran the gamut of rain, snow and hail with a heavy wind blowing from the southwest continually. Most of the time the temperature was close to the freezing point and the minute a squad would finish an event, its members would hurry to the clubhouse, where a great sheetiron stove dispensed welcome heat.

The feature event, the Inland Empire handicap, for 50 birds, was the most closely contested of the day. E. J. Chingren, western Spokane amateur, broke 25 straight on his second string, after getting 22 on his first, for a total of 47. Schnack, however, judged his time perfectly and cracked them one after another until he broke the 25th straight, thereby tying Chingren.

The Oldsmobile trophy for 25 birds, the only other trophy even on the card, was won by C. A. Couplin of Palouse, who broke 25 straight from the 16-yard mark. A noteworthy feature of the Oldsmobile event was the shooting of Mrs. Charles A. O'Connor, wife of the president of the Spokane Gun Club.

In the regular 16-yard events, the scores of which count in the official average of the shooters, Frank M. Troeh, the crack Vancouver (Wash.) shooter, topped the amateurs with 140 out of 150. Hugh McElroy, Spokane reliable, was second with 138 out of 150, being tied with Frank Templeton of the Portland Gun Club.

Fred Dryden, Spokane professional, was probably never in better form, and he made the pace for the company representatives with 144 out of 150. The scores May 9th follow:—

(*Professionals.)

The bright feature of the first day's shooting in the first annual Inland Empire handicap tournament, which was concluded May 10th at the Moran Prairie traps, was the work of C. E. Owens, an amateur shooter of Wenatchee, who broke 146 out of 150 bluerocks under the most trying conditions.

The weather was abominable. At one time during the afternoon snow fell steadily for an hour, the flakes coming down so thick that they almost obscured the targets. A full inch of snow fell. At other times the wind played all kinds of didos and the rain and hail fell every now and then to add to the general bad weather conditions.

The winners were:—

High Amateurs—F. M. Troeh, Vancouver, 284; Hugh McElroy, Spokane, 277; Frank Templeton, Portland, 275.

High Professionals—Hugh Poston, San Francisco, 286, Fred Dryden, Spokane, 282; Les Reid, Seattle, 278.

Trophy Winners—E. D. Farmin, Sandpoint, San Galland, cup; C. A. O'Connor, Spokane, Scott trophy; Portland team, team trophy; Mrs. C. A. O'Connor, women's event.

Standing on the 21-yard mark, E. J. Chingren, who is known to every one who follows the trap-shooting game in this part of the country, defeated H. Schnack of Deer Lodge, Mont., in the shootoff for the Inland Empire handicap trophy, when hebroke 23 to his opponent's 22. Schnack was standing on the 16-yard mark.

The team shoot furnished keen competition. Eleven three-man teams, five of whom were composed of members of the Spokane Gun Club, were entered. The scores of the team shoot:—

Portland—Total, 72. Templeton 23, O'Brien 25, Seavey 24.

Kellog—Total, 64. Thomas 22, Sebastian 21, Porter 21.

Spokane, 3—Total, 68. Gregory 23, Garkow 24, Blosser 21.

Wenatchee—Total, 69. C. Owens 23, J. Owens 23, L. Ovenden 23.

Palouse—Total, 65. Joslin 25, Couplin 21, Jewett 20.

Spokane 5—Total 64. Farmin 23, Geesey 23, Mrs. O'Connor 19.

Wallace—Total 63. Scott 22, Gilmore 22, Moore 19.

Spokane 2—Total 63. O'Connor 22, March 24, Fleming 17.

Deer Lodge—Total 65. Renfrow 21, McMullen 20, Larabie 24.

Spokane 1—Total 71. McElroy 25, Chingren 22, Ware 24.

Spokane 4—Total 65. Clarke 21, Shriver 23, Mann 21.

Utah State Association.—Sixteen scatter gun enthusiasts took part in the one-day tournament of the Utah State Sportsmen's Association on the grounds of the Salt Lake Gun Club on May 5th. The weather conditions were adverse either to attendance or good shooting.

Dr. F. Dunn of Springville set the pace in the amateur class by breaking 137 out of 150, which is a very creditable score under the conditions.

The Lewis class system was used in the distribution of the Interstate trophies with the following results:

Class A—First prize, Dr. Fred Dunn, Springville; second, Dr. J. F. Sharp, Salt Lake; third, Glen Bishop, Salt Lake.

Class B—First, Gail Moffat, Salt Lake; John Browning, Ogden, and Marriner Browning of Ogden tied for second.

This is the fourth and last of the one-day tournaments of the association for the season. The big state tourney will be held at Springville May 29, 30, and 31. The Utah State Amateur Tournament for a number of years has been the biggest shooting event of the kind held in the intermountain country and always draws the best shots in the west. The scores:

At 150 targets—*Cummings 143, Bain 117, Moffat 124, M. Browning 116, J. Browning 122, *Hood 137, Dunn 137, Bishop 131, *Morgan 140, Sharp 134, Becker 125, Mitchell 107, *Anderson 127, Reilley 134, Sumpsion 86. Lamb, 47 out of 75.

*Professionals.

Salt Lake Gun Club.—On account of so many shooters attending the registered shoot Friday, May 5th, the crowd at the regular Sunday morning shoot of the Salt Lake Gun Club on May 7th was much smaller than usual, but the enthusiasts who did attend enjoyed one of the best tournaments of the season.

G. H. Johnson demonstrated his ability as a scatter gun artist in the handicap event by winning with a score of 49x50. This places Mr. Johnston's name on the cup for the first time.

Some of the boys who had already secured two wins to their credit had high hopes of securing permanent possession of the cup by making a third win, but Johnston shooting in the form he displayed, their hopes were soon wrecked. The scores:

	Broke.	Hdcp.	Tt'l.
Bishop	44	4	48
Klein	44	4	48
Johnston	42	7	49
Fisher	36	7	43
Heagren	36	5	41
Bain	32	1	33
Bert Brown	23	7	30
*Morgan	48	..	..
*Cummings	47	..	..
*Hood	44	..	..

*Professionals.

* * * *

Green Lake Club.—The trapshooting grounds of the Green Lake Gun Club have been a busy spot during the past two days, with twenty shooters attending the special program Saturday afternoon and thirty-four shooters competing in the regular weekly events May 7th.

W. H. Carsten led the field, breaking 48 out of his 50, with E. K. Van Vleck, J. W. Geltz and L. S. Barnes shooting a tie for second place with 47. This was remarkable shooting with the wind blowing a gale across the field.

George H. Garrison was on the firing line again, having fully recovered from his recent illness, and turned in the very good score of 46, breaking his last 37 straight.

C. E. McKelvey headed the Saturday crowd with 45 out of 50, Dr. Hill and Carsten each getting 44 for second place. W. M. Elliott, shooting a 20-gauge gun, broke 39 out of his 50, which is mighty good scoring for the toy weapon.

Four of the club's lady members took part in the program, Mrs. Conkling breaking 18 out of 25 and Mrs. Barnes getting 14 in 25. Miss Mikkelsen broke 5 and Miss Kleven 2 out of 15. Ladies are always welcome at the north end grounds, and a special event is being planned for them the last Sunday in May. The scores, at 50 targets:—

W. H. Carsten 48, E. K. Van Vleck 47, L. S. Barnes 47, J. W. Geltz 47, *George H. Garrison 46, S. A. Martin 44, Hi Follrich 43, W. C. Smith 43, D. G. Huber 43, C. B. Fitzgerald 40, M. A. Rosenfield 39, Don R. Baker 39, Dr. J. F. Hill 39, Dr. M. A. Winningham 38, J. H. Willman 37, G. A. Conklin 37, E. W. Soergel 37, Dr. R. V. Mills 36, George B. Baker 36, Dr. C. H. Will 33, S. E. Bacon 31, H. E. Gleason 31, Dr. A. B. Kidd 31, George D. Horst 30, D. D. McMaster 30, Dr. S. W. Case 30, R. W. Brehm 26, R. E. Benjamin 25, A. E. Gibson 21, E. P. Buck 19, A. E. Hall 17, T. H. Bolton 16. (*Professional.)

THE FARM

TO MUSHROOM GROWERS.

As the result of a serious case of mushroom poisoning in a mushroom grower's family recently, the mushroom specialists of the United States department of agriculture have issued a warning to commercial and other growers of mushrooms to regard with suspicion any abnormal mushrooms which appear in their beds. It seems that occasionally sporadic forms appear in mushroom beds, persist for a day or two, and then disappear. These are generally manure-inhabiting species and may be observed shortly after the beds have been cased. In the instances cited, however, these fungi appeared in considerable numbers at the time the edible Agaricus Campestris should have been ready for the market, and the dealer supposed it was probably a new brown variety and tried it in his own family. As a result, five persons were rendered absolutely helpless and were saved after several hours only with the assistance of a second physician who has had experience with this type of poisoning.

In the opinion of the department, this case is peculiarly significant and demonstrates that the grower must be able to distinguish Agaricus Campestris from any of the wild forms of mushrooms that may appear in the beds. Under the circumstances, the department strongly urges growers to make themselves thoroughly familiar with the cultivated species. Complete descriptions with pictures of poisonous and cultivated species are contained in department bulletin 175, "Mushrooms and Other Fungi," which can be purchased for 30 cents from the superintendent of documents, at Washington, D. C.

MILK AS A BRACER.

According to the Philadelphia Press the Pasteur institute of Paris has just made the declaration that one of the most powerful stimulants known is milk. It has been in use for months now as the one stimulant for the French soldiers in the trenches, and its effect on them has amply justified the statement made by the famous institute in regard to it.

Milk has been used liberally to stimulate the French soldiers before they go into battle and its effects have been such that the French government has urged the sale of milk in preference to other soft drinks behind the trenches when the soldiers go off duty for their spells of rest and recreation.

That the qualities of stimulation should be demonstrated in the fighting men should commend the beverage to those engaged in the pursuits of peace in those parts of the world where Mars does not now rule. While alcohol may fire the brain and dull the sensibilities and thus impart a false courage, milk, according to the learned scientists of the Pasteur Institute, performs the work of keying up the individual without affecting the keenness of his senses or the coolness of his judgment. This is necessary to the mode of warfare which this war has exemplified, but it is no less necessary to the man working in the office, in the studio, in the battle for a living. High courage and a clear perception of what they are doing is necessary for the best work in all the handicrafts and in trade.

The fluid has hitherto been considered synonymous with all that is mild and peaceful. Advocates of preparedness have referred to "those milk-and-water pacifists." The "milk of human kindness" has no suggestion of powerful stimulation.

But science has discovered, among its many wonders, that the patient cow has a punch in milk that necessitates the addition of no produce of the still to make itself felt on the human system. It has discovered a new and harmless "bracer."

Upon the success of the farmer's operations in April depends the success of the season. If the seeding is done early then the farmer has done all he can toward the insuring of the crop.

THE BEST LINIMENT

OR PAIN KILLER FOR THE HUMAN BODY

Gombault's

Caustic Balsam

IT HAS NO EQUAL

For the Human Body —It is penetrating, soothing and healing, and for all Old Sores, Bruises or Wounds, Felons Exterior Cancers, Boils Corns and Bunions, CAUSTIC BALSAM has no equal as a Liniment.

We would say to all who buy it that it does not contain a particle of poisonous substance and therefore no harm can result from its external use. Persistent, thorough use will cure many old or chronic ailments and it can be used on any case that requires an outward application with perfect safety.

ACCESSIBLE TROUT STREAMS

Anglers devoting their week ends to rod and reel should not overlook the streams of Marin and Sonoma counties, accessible at small expense but assuring a day of real sport, and a basket of fish. Good streams within walking distance of Lagunitas, Point Reyes, Duncan Mills, Cazadero, Glen Ellen and Cloverdale.

Mendocino, Humboldt, Trinity and Lake Counties abound with streams where large fish are plentiful and await the angler.

The Lower stretches of the Eel River in Humboldt County afford the angler the greatest sport and those content with fly fishing for the gamey steelhead should plan their outing to visit the famous Greigs, Fortuna, Van Duzen or Weymouth pools when the steelhead are running.

FOR SALE.

Very handsome, splendidly matched team of blacks. Sired by Expressive Mac 2:25½, dam the grandam of Clara Mac 2:04½. Team weighs 2535 pounds, height 16.3, sound. Full brother and sister, eight and nine years old in May. Stylish, high-headed, fine action. Intelligent, kind disposition- a child or a lady can handle them. Used for a hearse team for four years. I think it is the best team in California for that business or for a fancy large team for any purpose. Must be seen to be appreciated. $500 was offered and refused for the gelding to go to the Chicago sale three years ago. Will pay fare to anyone who will come and see this team if they are not as represented. Address J. H. NELSON,

Phone 40 F 5. Box 361, Selma, Cal.

FOR SALE.

ELFREADA D., bay mare with black points. 9 years old, weighs 1080 lbs. Paced last year on half-mile track in 2:12 and on mile-track in 2:09 with only three months training. This mare can show two minute speed. Sired by Diablo 2:09¼, dam Bell Onward 2:14. This mare is guaranteed to be perfectly sound and not a blemish on her. Has no mark; is in training at present and in good condition. For price and particulars address Mrs. F. H. HERMAN,

2805 Rucker Ave., Everett, Wash.

RACE TRACK FOR SALE.

The Ukiah race track, located a little less than a mile from the Court House at Ukiah and bounded by the State Highway on the west, the county road on the south, and the Northwestern Pacific Railroad nearly the entire length on the east side of the track. The property consists of twenty acres. Fifty-nine good box stalls, good grandstand, fencing in good order, and one of the best half mile tracks in the state. An excellent winter track and an ideal place to work horses during that season. Plenty of adjoining drives for jogging horses. Two wells on the premises as well as water from the city water works, with tanks conveniently arranged for sprinkling.

This is the only race track in Mendocino county and the location of the county fairs. Ukiah is the county seat and has a population of about 3000, is in a most fertile valley in which all kinds of fruit, vegetables, hay, grain and hops are grown. Has excellent water; no malaria or mosquitos. It has paved streets, good sewerage, and splendid gas and electric light works. There are many standard and thoroughbred horses in this county and the people are a race loving lot. This property is offered for sale at a less price than adjoining property is held at. For terms and further particulars address

F. W. KELLEY,
Care of Breeder and Sportsman.

FARMS FOR SALE

Choice Land In Idaho

Lewiston, Idaho, is situated at the forks of Clearwater and Snake rivers and has transportation to the coast.

960 acres 7½ miles from Lewiston, Idaho, 4½ from Lapwai, Idaho, on main traveled road, all in cultivation except about 15 acres, all level land, just a little rolling, 320 acres of fall wheat in, 225 acres fall plowed for spring crop, about 30 acres in alfalfa. All fenced and cross fenced. Two good springs with big cement water troughs, well, windmill and cement reservoir, water piped to house, 7 room house, hot and cold water and electric lights. Large horse barn with hay mow in the center, electric lights in barn; cow barn with two box stalls; hog pens, shade trees, chicken houses, blacksmith shop, wagon shed, granary, outdoor cellar with bunk house overhead. $85 per acre; will take one-third down, time on balance to suit purchaser, at 7 per cent interest. One-third of crop goes with place if sold any time up close to harvest. Mild climate, can raise all kinds of fruit, grain and vegetables. Wheat in this country goes from 35 to 65 bushels per acre, barley 40 to 80 bushels per acre.

320 acres 4½ miles south of Vollmer, Idaho, 275 acres in cultivation, balance in pasture and timber, farm land lays practically level, one-third of crop goes with place if sold before harvest. Some fall wheat already sown. All fenced and cross fenced. Quarter section of it fenced hog tight; good four-room house, wood shed, and out of door cellar, nice grove around house, well at house, fair stabling and out buildings, spring and spring creek close to barn, three springs on place. Price $70 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

238 acres 4½ miles from Lewiston, Idaho, 175 acres in cultivation, 25 more can be cultivated, balance good bunch grass pasture, fenced and cross-fenced, good spring creek runs across place, small house, station on place for Johnson R. R., two grain warehouses at station. Price $70 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

160 acres of timber land, good farm land when timber is cleared off, all can be farmed except about 2 or 3 acres. Good timber, yellow pine and fir. Price $4000. 40 miles from Lewiston, Idaho. Well located to log off.

240 acres 6 miles from Asotin, 12 miles from Lewiston, Idaho, about 75 acres in fall wheat, about 75 acres more can be cultivated, balance in bunch grass pasture, two springs, small house, all fenced. Price $40 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

The rules as adopted by the Nevada State Racing Commission govern all races run under the auspices of the Reno Fair and Racing Association.

No entry will be received for any of these stakes except upon this condition: That all disputes, claims and objections arising out of the racing, or with respect to the interpretation of the conditions of any stake, shall be decided by a majority of the stewards present, or those whom they may appoint, and their decision upon all points shall be final.

Every person or horse expelled or ruled off by any reputable turf authority for fraud, or by the American or National Trotting Association, shall stand ruled off the courses running under licenses issued by Nevada State Racing Commission.

SPECIAL NOTICES:

More than two horses may be nominated for Selling Stakes, but only two can start.

Winner or non-winner of a stated sum means winner or non-winner of a single race of that value to first horse.

Horses penalized in a race shall not be entitled to any of the allowances in such race.

Horses not entitled to the first allowance in a race shall not be entitled to the second, and if not to the second, then to no subsequent allowance.

Send Entries to
HORACE S. ENSIGN, Sec'y,
Salt Lake City, Utah.

CONDITIONS FOR HARNESS RACES.—All members of the Intermountain Fair and Racing Circuit are members of The American Trotting Association, whose rules will govern, except as herein otherwise stated.

Entries close July 1, 1916, for all harness races throughout the entire Circuit. Entry fee, Five Per Cent, must be paid on or before 12 o'clock noon the day before the race. Rule 23, stating how entries shall be made, will be enforced.

Time allowances will be granted according to Rule 51, provided same is claimed by nominator when making the entry.

Also, if a horse while racing on the Intermountain Fair and Racing Circuit has started in two consecutive races in this Circuit and has won no money, he shall be allowed to start in his next race in a class two seconds slower than his best record. If he has started in three consecutive races in the Intermountain Fair and Racing Circuit and has won no money, he shall be allowed to start in a class four seconds slower than his best record, which shall be the limit of time allowance. It is expressly understood that the above two and four seconds allowances are in addition to the one second for each year, as stated in Rule 51. Entries made at any meeting by reason of above time allowances shall be made on a regular entry blank and shall set forth the allowance claimed, shall state the name of the Association and the class where the horse started, said entry to be filed with the Racing Secretary not later than noon the day preceding the race in which he desires to compete. A horse winning a race under the above time allowances takes his original record until again being entitled to an allowance under the above provisions.

If a horse is entered in a class to which his winning performances renders him ineligible, he shall be entitled to start in any class to which he is eligible.

All Races Three Heats (except colt races), of one mile each.

In the $400 purses money divided 25% to first heat, 25% to second heat, 25% to third heat and 25% to the horses standing best in the final summary according to the old placing system.

Money in each division 50, 25, 15 and 10 per cent. In case there are three heat winners remaining (not withdrawn or distanced), at the end of the third heat, or in case of tie, the heat winners or the horses making the tie must race a fourth heat to determine the winner of the race.

In the $500 purses, $150 will be raced for in every heat and divided 50, 25, 15 and 10 per cent.

The sum of $50 will be awarded to the horse standing best in the final summary, that horse to be declared the winner of the race, old placing system to govern. In case there are three heat winners remaining (not withdrawn or distanced), at the end of the third heat, or in case of tie, the heat winners or the horses making the tie must race a fourth heat to determine who wins the $50.

From the winnings of each horse in every heat five per cent of the sum raced for in that heat will be deducted. A distanced or withdrawn horse retains what money he has won, but loses his position in the race. Positions must be drawn for before every heat.

One horse may be entered in two classes, according to Rule 38. Owners may enter and start two or more horses from the same stable.

Owners and agents will be required to comply with Rules 59 and 128. Four starters required in each and every race. No starter in any heat can win more than one money in that heat.

Colt races to be mile heats, two in three, old placing system.

The right is reserved to reject any or all entries, to change the order of events when deemed expedient and declare off or postpone any or all races on account of weather or other sufficient cause.

Each member reserves the right to start any heat after the fourth score, regardless of the position of the horses.

Free stalls and free badges will be furnished horsemen at each meeting.

CONDITIONS FOR RUNNING RACES.—Entries to close at noon the day before the race. Entrance fee 5 per cent of purse. No entry will be accepted unless entry fee is paid. Five per cent will be deducted from money winners. Five required to fill, and four to start; money divided 70, 20, and 10 per cent. Right is reserved to declare off any race that does not fill satisfactorily, to change order of program or postpone. Pacific Jockey Club Rules to govern, unless otherwise specified. The Association reserves the right to accept or decline any entry. Owners failing to supply the jockeys with correct colors that are clean and in good condition may be fined or not allowed to start, as the Judges may elect. No entry will be received for any race except upon the condition that all disputes and claims arising out of the racing shall be decided by the judges and their decision upon all points shall be final.

Makes Them Sound **SMITH'S WONDER WORKER** Keeps Them Sound

Allays fever and inflammation at once, this must be done to effect a cure. UNEXCELLED AS A REMEDY for bone and bog spavins, curbs, splints, ringbones, capped hocks, shoe boils, wind puffs, thoroughpins and bunches of all kinds, bowed, strained and ruptured tendons, shoulder, hip and stifle lameness, weak joints, sweeny, cording up, throat trouble and rheumatism. Relieves pains and soreness without loss of hair or a day's let up. As a leg and body wash it has no equal, invigorates and restores the distressed horse between heats and after hard workouts.

Price $1.50 per bottle, prepaid on receipt of price. $12.00 per doz.; $7.00 per half-doz.; $8 per gal. F. O. B. Tiffin, Ohio.

W. K. SMITH & CO., Tiffin, Ohio.

W. E. DETELS, Pleasanton Cal., Distributing Agent, for the Pacific Coast.

MR BROODMARE OWNER, do you realize the importance of the simple facts that sixty of McKinney's sons and nearly fifty of his daughters are producers of standard performers? That the McKinneys won more money than any other family in 1915? That the McKinneys won the largest percentage of the futurities, both east and west, in 1915? That McKinney has more sons to sire 2:10 performers than any other stallion living? Keep these facts in mind, and remember that I offer you the services of

THE VERY BEST SON OF McKINNEY

CARLOKIN 2:07 1-2 EXHIBITION MILE 2:05 1-4

Champion Trotter and Champion Sire of Trotters in the West

Reg. No. 36548. Licensed Pure Bred, Cert. No. 41.
Mahogany bay. Height 15.1½. Weight 1060.

Sire of ESPERANZA (3) 2:09, only three-year-old to win every trotting stake for that age on the Pacific coast, and also the following colt performers:

The Lark (4).....2:09½	Carsto (2) 2:22½
Ethel D. (3).....2:11	Helen Belle (2).....2:22½
Carl (3) 2:14¼	Carlschen (2) 2:23
Doctor S. 2:14½	Santiago (3) 2:24¼
Johnny Dugan p (3)2:16	May Marian p (3)..2:24¼
Hermes (2) 2:16½	Carlrich p (2).....2:24½
John Warwick (2) 2:17	El Carbine (2).....2:27½
Nicola B. (3).....2:18½	Eileen C. (3).....2:29
Miss Carlokin p....2:20	Carlos (2) 2:29¼
Carleta (2) 2:20¾	Fulton G. (2).....2:30

Carlokin is the best son of McKinney not only by performance but by breeding as well, his dam being the famous producer Carlotta Wilkes, whose ten performers include four with records below 2:10, while his grandam and great grandam were also producers, by Alcantara and Clark Chief. He has demonstrated that he sires more early and extreme speed than any other stallion in California, and his get are courageous race horses, endowed with soundness and wonderful vitality.

Fee: $75 the season, usual privileges; details on request.

W. G. DURFEE 2019 South Figueroa St. LOS ANGELES, CAL.

For Greatest Satisfaction Use
DOUBLE SERVICE Automobile Tires
Guaranteed 7,000 Miles Service
Absolutely Punctureproof

Double Service Tires are made double the thickness of the best standard make tires.

This 100% greater wearing surface naturally gives that much more mileage and service. The average of 12 miles of tough fabric and one inch surface tread rubber makes these tires *absolutely punctureproof*.

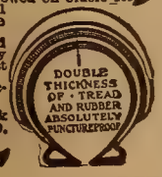
These tires excel all others for use in the country over rough and rugged roads as well as on hard pavements. They are as easy riding and resilient as any other pneumatic tire—the air space and pressure being the same.

They are the *most economical* and "care free" tires made and are used where tires must be depended on and tire troubles cannot be tolerated. Many *Double Service* style tires are in use in the U. S. government and European War service.

Our output is limited to a certain amount, but for a short time we offer the following reduced special prices as an Introductory Offer:

PRICES

	Tires	Tubes		Tires	Tubes
30x3 in.	$ 8.60	$2.30	36x4 in.	$17.45	$4.65
30x3½ in.	10.85	3.10	35x4½ in.	21.20	5.60
32x3½ in.	12.75	3.20	36x4½ in.	22.50	5.75
33x4 in.	15.75	4.20	37x4½ in.	23.60	6.20
34x4 in.	16.70	4.35	37x5 in.	26.30	6.60



All other sizes not included in above list also furnished. Non-skids at 10% additional.

Terms: Payment with order at above special prices, a 10% discount allowed on orders for two or more tires. All personal checks must be certified.

Try these tires now and be convinced of their very high qualities. Sold direct to the consumer only.

Descriptive folder upon request. Write for it.

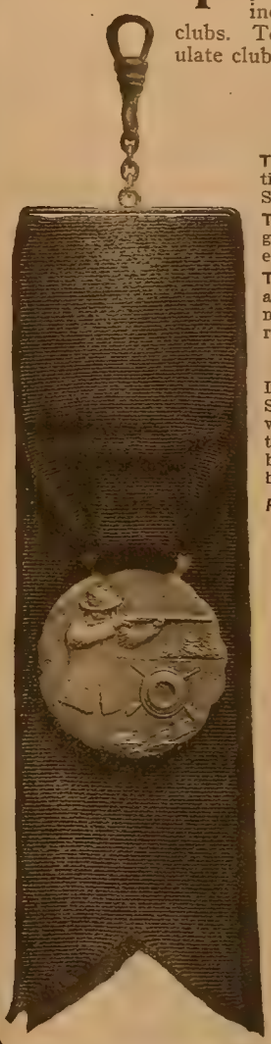
SECOND ANNUAL BEGINNERS' SHOOTS



LAST YEAR'S EVENTS ADDED THOUSANDS OF MEN and WOMEN to TRAPSHOOTING'S RANKS

THE 1916 Beginners' Shoots are scheduled for June. These events secure new members, increase enthusiasm and instill new life into clubs. To make the events more popular and stimulate club members and officials to greater activity,

WE ARE GIVING HANDSOME

Trophies to Clubs and Beginners

THE STERLING SILVER FOB is given to the club for presentation to the beginner making the highest score in the Beginners' Shoot.

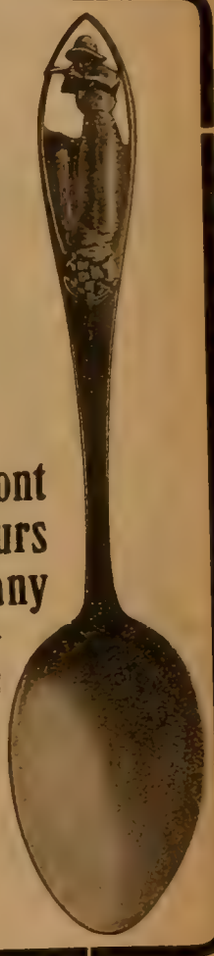
TWO SILVER CUPS, 9 and 7½ inches high, respectively, will be given to the two clubs in each state or province having the greatest number of beginners participating.

THE STERLING SILVER TEASPOON is given to clubs having a Special Event for women on Beginners' Day,—the woman making the highest score in accordance with the club's rules to receive the spoon.

Club Members,—GET BUSY

Invite your neighbor, brother or sister to enter your Beginners' Shoot. "Round up" the visitors. 'Phone your friends,—go in to win the cups. Make your club the livest trapshooting organization in your state. This practical plan will increase your membership, put more vim into your organization and make it a bigger and better club.

Remember Beginners Shoots are scheduled for June,—select your date and send your application for watch fob and spoon at once to SPORTING POWDER DIVISION



Sterling Silver Watch Fob Actual Size

Silver Cups, Sizes 9 and 7½ inches, Respectively, to be Given to the Two Clubs of Each State or Province Having the Greatets Number of Participants in BEGINNERS' SHOOTS.

E. I. du Pont de Nemours & Company

Le GRAND McDONALD

Reg. No. 6360, A. G. S. H. B. A. :: Licensed Purebred Cert. No. 2003.

Winnner WORLD'S JUNIOR CHAMPIONSHIP, P.-P. I. E.

Foaled in 1913, son of Grand McDonald 2228 (son of the world's champion Rex McDonald) winner of the championship of three states for the two years last shown; dam Queen Alice 10649 by Forest LeGrande 2107.

In service for the season of 1916 at the ranch of The Bridgford Company near Knightsen, Contra Costa County, at fifty dollars to a limited number of approved mares only

For further particulars address:

E. A. BRIDGFORD, 519 California St., SAN FRANCISCO

TRAINING DISTEMPER. Ever hear of this? Yes, of course you did, but under different name. You have seen it in cases where the horse was "overtrained," worked a little too fast and regular. The nervous system gets the shock, after the voluntary muscular system has been taxed too heavily. The trouble starts in the mucous surfaces and the digestive apparatus, too, must then be impaired. He begins to cough when the glands are materially affected.

"SPOHNS" is your true salvation. It restores the appetite and normal functions of the whole system. The action in such cases is remarkably rapid and sure for recovery when you use this remedy according to instructions with each bottle. Only 50c and $1 a bottle; $5 and $10 a dozen. Sold by all druggists, horse goods houses, or express prepaid by manufacturers.

WINCHESTER

.22 Caliber Rim Fire Cartridges

The winning of this — the most important indoor shooting of the year — means more than simply another addition to the long list of triumphs to Winchester — the **W** brand of guns, ammunition, etc. It is convincing proof that the long and firmly established policy of Quality First, followed so religiously in the manufacture of Winchester goods, has not been relinquished an iota, notwithstanding the unparalleled demands made upon the Winchester company for its products during the last twenty months. It plainly shows that, no matter how unusual the condition, Winchester goods can always be relied upon. The big winners at the Indoor Shoot were as follows:

100 SHOT CHAMPIONSHIP MATCH

Won by L. G. Buss, score 2473, with Winchester cartridges and Winchester Telescope Sight. All of the first six contestants used Winchester Telescope Sights, and four of them Winchester cartridges.

RING TARGET CONTINUOUS MATCH

G. W. Chesley and H. Hunziker, shooting Winchester cartridges, tied with two other shooters, making five 75s—perfect score. Three of the four contestants in this match used Winchester Telescope Sights.

ZIMMERMAN TROPHY MATCH

Won by G. W. Chesley. Second, H. Hunziker. Third, L. C. Buss. All shooting Winchester cartridges. Mr. Hunziker made a perfect target of 5 degrees in his string, and Mr. Chesley one of 6 degrees.

BULLSEYE MATCH

Won by S. Murphy with a target measuring 7 degrees. Second, J. J. Young with a 7½ degree target. Third, C. Zettler with an 8 degree target. Fourth, G. W. Chesley with an 8 degree target.
All four place winners used Winchester cartridges.

FOR RELIABILITY AND RESULTS USE THE **W** BRAND

PARAMOUNT PARKER GUNS

Mr. Woolfolk Henderson, an amateur, by scoring .9753% made the
HIGHEST OFFICIAL GENERAL AVERAGE FOR 1915

Look...

Mr. Lester German, a professional, by scoring .9742% made
SECOND OFFICIAL GENERAL AVERAGE FOR SAME PERIOD
CLEAN SWEEP ON DOUBLE TARGETS
Messrs. Guy V. During, S. A. Huntley and Woolfolk Henderson won
FIRST, SECOND and THIRD,
respectively, by scoring 9000%, 8666% and 8400%.

Read...

THE WORLD'S RECORD!!!
At Atlantic City Sept. 15 to 17 Mr Lester German broke all Tournament Records by scoring 647 OUT OF 650 TARGETS, with one run of 372 straight, which is longest for the year.
PARKER GUNS have won the Grand American Handicap 9 times out of 25 offers, once with 100 straight, only time made. Also 7 out of 9 Interstate Championship Events with highest scores ever made, twice with 195 x 200 at 18 yards rise.

Remember

PARKER PACIFIC COAST RECORDS
In California Mr. Henry Pfirrmann won the Pacific Coast Handicap and Mr. J. Foster Couts won the Championship of California.
In Portland, Oregon, Mr. P. H. O'Brien by scoring 241 straight made the record for the Pacific Coast.

If interested in small bore guns write for instructive booklet which will be sent free on request. For further particulars regarding guns from 8 to 28 gauge, address
PARKER BROS., Meriden, Conn. New York Salesroom, 32 Warren Street;
or A. W. duBray, Resident Agent, San Francisco, P. O. Box 102

TRAINING THE HOUND

A PRACTICAL TREATISE ON THE TRAINING OF FOX HOUNDS, BEAGLES, AND COON HOUNDS.

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; $1.50, postpaid.

The State Agricultural Society

OFFERS THE FOLLOWING

Guaranteed Stakes for Harness Horses

TO BE GIVEN AT THE

California State Fair, Sacramento, Sept. 2 to 9, 1916, inc.

ENTRIES TO CLOSE THURSDAY, JUNE 1st, 1916

ALL RACES THREE HEATS

SATURDAY, SEPTEMBER 2d.

No. 1. Occident Stake, 3 year old Trotters, about $2300.00.....(Closed)
No. 2. 2:14 Class Pacing $1000.00

MONDAY, SEPTEMBER 4th.

No. 3. State Fair Futurity, 3 year old Pacers, Guaranteed $1100.00..(Closed)
No. 4. 2:30 Class Trot 1000.00

TUESDAY, SEPTEMBER 5th.

No. 5. State Fair Futurity, 3 year old Trotters, Guaranteed $1400.00 (Closed)
No. 6. 2:20 Class Pace 1000.00

WEDNESDAY, SEPTEMBER 6th.

No. 7. Stanford Stake, 3 year old Pacers, Guaranteed $1000.00.....(Closed)
No. 8. 2:15 Class Trot 1000.00

THURSDAY, SEPTEMBER 7th.

No. 9. Free for All Pace 1000.00
No. 10. 2:09 Class Trot 1000.00

FRIDAY, SEPTEMBER 8th.

No. 11. Stanford Stake, 3 year old Trotters, Guaranteed $1500.00.....(Closed)
No. 12. 2:13 Class Special, Pace, horses with no records or slower than 2:20 not eligible 1000.00

SATURDAY, SEPTEMBER 9th.

No. 13. 2:20 Class Trot 1000.00
No. 14. 2:10 Class Pace 1000.00

Consolation State Fair Futurity Pace, for 3 year olds, Guaranteed $300.00 (Closed).
Consolation State Fair Futurity Trot, for 3 year olds, Guaranteed $400.00 (Closed).

Entrance and payments on these stakes will be due and payable as follows:—2% June 1st, 1% Aug. 1st, and 2% before five o'clock the night before the race.

GENERAL CONDITIONS.

ALL RACES THREE HEATS—Money divided 25% to the first heat, 25% to the second heat, 25% to the third heat, and 25% to the race according to the rank in the summary. Money in each division 50, 25, 15 and 10 percent. Should two or more horses be tied for first place at the completion of the third heat, such horses only shall contest in a fourth heat and money divided according to rank in the summary at the termination of that heat. A horse having won the first two heats and drawn or distanced in the third heat shall not lose position in the summary.

Nominators have the right of entering two or more horses in any race by the payment of 2% additional on each horse, but only one of the horses so entered to be started in the race, and the starter is to be named by 5 o'clock P. M. the day before the race is to take place.

ENTRIES TO CLOSE JUNE 1st, 1916.

Usual 5% additional from winners in all except Futurity Stakes, Occident and Stanford Stakes.

The Society reserves the right to declare two starters a walkover. When only two start they may contest for the entrance money paid in, divided 66 2-3% to the first, and 33 1-3% to the second horse. A horse distancing the field shall be entitled to first and fourth money only and in no other case will a horse be entitled to more than one money.

The Society reserves the right to change the hour and day of any race, except when it becomes necessary to antedate a race, in which instance the nominators will receive three days' notice by mail to address of entry.

The right reserved to reject any or all entries and declare off or postpone any or all races on account of weather or other sufficient cause.

Entries not declared out by 5 o'clock P. M. the day preceding the race shall be required to start and declarations must be in writing and made at the office of the Secretary at the track.

The Society reserves the right to start any heat after the fourth score, regardless of the position of the horses.

Any horse that started in 1915 without improving its record, equaling its record, and not winning a race, shall be entitled to one second.

Address all communications to the Secretary.

JOHN M. PERRY, President.

CHAS. W. PAINE, Secretary,
Sacramento, California.

$14,250 — 27th ANNUAL RACE MEETING — $14,250

of the

PACIFIC COAST TROTTING HORSE BREEDERS ASSOCIATION

to be given in conjunction with the District Agricultural Fair at

Santa Rosa, August 9, 10, 11 and 12, 1916

Entries Close Thursday, June 1st, 1916

All Races Except Colt Stakes Limited to 3 Heats,

TIME ALLLOWANCES.

1st. Horses that have started anywhere in 1914 or 1915 without winning a race shall be allowed one second for each year raced.
2nd. Horses that have started two or more times in either 1914 or 1915 without winning a race shall be allowed two seconds.
3rd. Horses whose winning race records were made prior to 1914 shall be allowed two seconds, provided they have not won a race in 1914 or 1915.
Time allowances must be claimed when entry is made; also it must be stated why the horse entered is entitled to time allowance under above conditions.

PROGRAM

FIRST DAY	SECOND DAY	THIRD DAY	FOURTH DAY
1—Three-year-old pacing division, Futurity Stake No. 13 (closed 1912) $1300	4—Two-year-old trotting division, Futurity Stake No. 14 (closed 1913) $1350	7—Two-year-old pacing division, Futurity Stake No. 14 (closed 1913) $1100	10—2:12 class, trotting.....$ 900
2—2:09 class, trotting..... 900	5—2:15 class, trotting..... 900	8—Three-year-old trotting division, Futurity Stake No. 13 (closed 1912) 3300	11—Free-for-all class, pacing... 900
3—2:20 class, pacing 900	6—2:10 class, pacing 900	9—2:13 class, pacing..... 900	12—2:20 class, trotting..... 900

Guaranteed Stakes Nos. 2, 3, 5, 6, 9, 10, 11, and 12 $900 each, three heats, money divided $300 to the first heat, $300 to the second heat, $300 to the third heat. Money in each division divided 50, 25, 15 and 10 per cent. A horse having won the first two heats and drawn or distanced in the third heat shall not lose position in the summary.

Nominators have the right of entering two horses in one ownership in any race by the payment of two per cent. additional, but only one of the two horses so entered to be started in the race, and the starter is to be named by 5 o'clock p. m. the day before the race is to take place.

Entrance fee five per cent. to start, three per cent. due at time entries close, two per cent. additional if not declared out on or before July 1, 1916. Declarations must be paid in full at time of declaring out. Usual five per cent. additional from winners in all races except Futurity Stakes.

Horses are to be named and eligible when entries close to the classes in which they are entered.

The Association reserves the right to declare two starters a walkover. When only two start they may contest for the entrance money paid in, divided 66 2-3 per cent. to the first and 33 1-3 per cent. to the second horse. A horse distancing the field shall be entitled to first and fourth money only and in no other case will a horse be entitled to more than one money.

The Association reserves the right to change the hour and day of any race, except when it becomes necessary to antedate a race, in which instance the nominators will receive three days' notice by mail to address of entry.

The right reserved to reject any or all entries and declare off or postpone any or all races on account of weather or other sufficient cause.

Entries not declared out by 5 o'clock p. m. the day preceding the race shall be required to start and declarations must be in writing and made at the office of the Secretary at the track.

Racing colors must be named by 5 o'clock p. m. the day preceding the race, and must be worn upon the track, in all races. Colors will be registered in the order in which they are received, and when not named or when said colors conflict, drivers will be required to wear colors designated by the Association.

The Association reserves the right to start any heat after the fourth score, regardless of the position of the horses.

All Stakes are guaranteed for the amount offered and are for the amount offered only.

MEMBERS.

Under the By-Laws of this Association, none but horses belonging to members of the Association are allowed to start in the regular races at its meetings. Membership fee $25, which includes annual dues for the first year and entitles members to all privileges. Those who are not members of the Association should send membership fee at the time of making entries.

Member of the National Trotting Association.
Address all communications to the Secretary.

Salt Lake, Utah	October 2

THE BREEDERS' MEETING at Santa Rosa Aug. 7 to 12 will be one of the best meetings ever held at the city of roses if horsemen enter their trotters and pacers liberally. The annual fair to be held there at the same time is to be something entirely new, so far as its arangement is concerned, and the Sonoma, Marin, Mendocino and Humboldt Fair Association promises it will be far and away the most attractive fair ever held in that town. Arrangements are to be made with the railroads that will justify the prediction of the largest crowds ever seen at a district fair in California, and that is where every wise horse breeder, trainer or owner will want his horses to race. Entries for this meeting will close next Thursday, June 1st. Let the entries be numerous. It is the duty of every breeder to make an effort this year to race everywhere he can afford to.

Mr. John C. Welty, President of the National Trotting Association, has notified Mr. W. P. Ijams, President of the American Trotting Association, that he will call a Special Congress of the National Trotting Association the first week in December, 1916, to appoint a committee to confer with a similar committee from the American Trotting Association to adopt a uniform code of Rules that will govern all meetings given by both associations beginning with 1917. This is in accordance with the order adopted by the Board of Review at the May meeting.

Horsemen are suggesting that one or two runs be given each day at the Santa Rosa fair. A good idea and it may be adopted.

FOURTEEN HARNESS RACES for a total of $16,500 is the generous offering of the California State Fair this year. The classes are all given, the conditions all published, and the entries close on Thursday next, June 1st. The State Board of Agriculture has done its part and done it well. The program is more generous and the conditions more liberal than a vast majority of State Fairs offer. It is now up to the owners and trainers of trotting and pacing horses to say what sort of a field of horses will start for those $1000 purses. We hope all the best horses in training in California will be named in these events. Such a program is deserving of liberal patronage. The associations that get into the field and hang up the purses are the ones that the horsemen should patronize. If there is a big entry list at Sacramento, there will be other associations in the field making bids for the horses to come to their towns and thus the game will be fostered and boosted along. The tremendous lists of entries received by the eastern trotting associations this year are a pretty fair indication that harness racing is experiencing a big revival across the mountains. The wave of prosperity is coming westward and the more the local horsemen encourage it the greater will be its proportions when it reaches us. Enter liberally at Sacramento. The horse you are doubtful about may be the very horse that can win. So make a note of the fact that entries close on Thursday next, June 1.

WILD OATS are indigenous to the soil of California and the pioneers who brought cattle and horses to this state in "the days of '49" found the hills and valleys covered with crops of this grain that furnished splendid feed for their stock in the spring while it was green, and which owing to the rainless climate of the summer cured into the sweetest of hay as it stood, and supplied excellent and fattening food until the fall rains set in. California was then the stockman's paradise. Since the cultivation of the soil the natural wild oats, probably owing to the fact that they are fed down before seeding time, have had their seasons. This year is a wild oat year and the hills of the San Francisco bay region have borne heavy crops on land that has been lying idle. Probably owing to the heavy rainfall during January and February and the long dry spell thereafter, wild oats have had a favored season. The hills on the east side of San Francisco bay have yielded a big crop of wild oats this year and on the vacant lots and tracts on the hills back of Oakland wild oats have grown in such profusion that the high price of tame hay has induced horse owners to harvest the wild hay crop. During the past two weeks it has been a common sight to see an express wagon driver with scythe in hand cutting the self-cured hay from a vacant lot and loading it on his wagon. We heard of one "garbage collector" who cut a weighed ton from a lot that measured 200 x 125 feet, therefore about half an acre in area. And it was bright clean oat hay, too. As many as twenty men cutting hay from vacant lots were counted by one auto driver who rode through the Piedmont and Oakland hills last Sunday. With oat hay retailing at $20 a ton there is good profits in cutting wild hay from vacant lots in California this year.

DRAFT HORSES are not being put entirely out of business by the motor trucks in New York, as the following from last Sunday's New York Herald will show: "Second hand draught horses sold up to $765 a pair in the closing out auction conducted by the Fiss, Doerr & Carroll Horse Company on Wednesday for William Blumenauer, a well known contractor, who disposed of his plant and equipment under the hammer. It was the best sale of the kind held this season in New York, according to all market experts. Single horses went to $375 in the bidding, and the dump wagons and other paraphernalia brought equally good prices. It was said that some of the horses were sold for more than they cost when purchased of the Fiss, Doerr & Carroll people two or three years ago.

THE MARKET FOR POLO PONIES was strong in New York last week. Alexander Brown, of Bryn Mawr, received $6,300 for six head, and Charles A. Munn $2,100 for four head sold under the hammer at Durland's Riding Academy on Tuesday evening. Mellow Blossom, in Mr. Brown's string, made $2,450 and Gray Wolf $1,400. These are unusual prices for polo mounts at auction.

STANFORD—OCCIDENT FUTURITY No. 2.

Twenty-Eight Nominators Make Fifty-Five Entries in This Stake May 15, 1916.

Following is a complete list of the entries to the Occident-Stanford Futurity No. 2, which closed May 15th, as furnished this journal by Chas. W. Paine, Secretary of the California State Agricultural Society:

Anderson, J. N., Salinas, Cal.: Derby Dillon by Warren Dillon—Della Derby by Chas Derby.

Borden, I. L., San Francisco, Cal.: Foal by Expressive Mac—Gold Lilly by Copa de Oro; foal by Barney Barnato—Cleopatra by Zolock.

Clark, J. M., Woodland, Cal.: Foal by Jim Logan—Ruby C. by Palo King.

Cook, Chas., Irvington, Cal.: Foal by Athasham—Gypsy C. by Nutwood Wilkes.

Cornett, I. J., Salinas, Cal.: Foal by McDillon—Salinas Princess by Eugeneer; foal by Vernon McKinney—Malvina by Oh So.

Cowell, S. H., Santa Cruz, Cal.: Foal by Peter McKlyo—Dione II. by Cupid; foal by Panama—Dulda C. by Dexter Prince.

Dunne, J. F., Gilroy, Cal. Foal by Mahomet Watts—Letter B. Jr. by Benton Boy.

W. G. Durfee, Los Angeles, Cal.: Foals by Carlokin—La Gitana by Del Coronado; Carlokin—My Irene S. by Petigru; Carlokin—Ezelda by Del Coronado; Carlokin—Atherine by Patron; Carlokin—Iran Belle by Iran Alto; foals by Copa de Oro—Subito by Steinway; Copa de Oro—Pavlowa B. by Petigru; Copa de Oro—Leonor Mc. by McKinney; Copa de Oro—Reta H. by McKinney; Copa de Oro—Truly Ansel by Prince Ansel.

Emlay, F. E., Marysville, Cal.: Foal by Peter McKlyo—Beauty McKinney by Washington McKinney.

Erington, Joe, Pleasanton, Cal.: Foal by Vernon McKinney—Azrose by Azmoor; foal by Vernon McKinney—, by Searchlight.

Harkey, W. S., Gridley, Cal.: Foal by Robert Bingen—Deviletta by Diablo.

Hemet Stock Farm, Hemet, Cal.: Foal by Wilbur Lou—Leta W. by Nutwood Wilkes.

Hershey, H. A., Woodland, Cal.: Foal by Jim Logan—Palo Maid by Palo King.

Lavin, E., Stockton, Cal.: Foal by Dexter Derby—Stella McKinney by Ed. McKinney.

Lipson, Mrs. Mabel, Tulare, Cal.: Foal by Uganda—Frances B. by Best Policy; foal by Uganda—Jane C. by Zolock.

MacKenzie, R. J., Pleasanton, Cal.: Foals by Mahomet Watts—Martha Spy by The Spy; Mahomet Watts—Zombro Bell by Zombro; Mahomet Watts—Ava J. by Zombro; Mahomet Watts—Mildred Togo by Togo; foal by Quintell—Baroness Psyche by Baron Review; foal by Vernon McKinney—Hawthorn by McKinney; foal by Vernon McKinney—Hula Hula by Guy Dillon.

Marshall, J. W., Dixon, Cal.: Foals by Jim Logan—Balley Pointer by Star Pointer; Jim Logan—Ramona by Demonio.

Montgomery, Carey, Davis, Cal.: Foal by Dan Logan—Leta H. T. by Nutwood Wilkes.

Rush, B. F., Suisun, Cal.: Foal by Bodaker—La Muscovita by Alconda Jay; foal by Bon McKinney—Potrero Lass by Demonio; foal by Bodaker—Comet Demonio by Demonio; foal by Bon McKinney—Memonio by Demonio.

Ryan, Geo. F., Pleasanton, Cal.: Foal by Vernon McKinney—Miss Harris by Sidney Dillon.

Selman, W. L., Phoenix, Ariz.: Foal by Otis Jr.—Miss Delta by J. J. M. Jr.

Short, J. E., Santa Maria, Cal.: Foal by Skidoo Wilkes—Honda Girl by Cubino; foal by Wild Nutling—Rubber Girl by Skidoo Wilkes.

Silva, Chas. F., Sacramento, Cal.: Foal by Teddy Bear—Normona by Demonio.

Spooner, A. B., San Luis Obuspo, Cal.: Foal by Morris A.—San Luis Bell by McGinis.

Todhunter, L. H., Sacramento, Cal.: Foal by Peter McKlyo—Leavinette by Zombro.

Valencia Stock Farm, San Bernardino, Cal.: Foal by Pegasus—Rose Girl by Amado.

Wallis, D. W., Los Banos, Cal.: Foal by The Bondholder—Mary W. by Dictator.

Woy, M. L., Fresno, Cal.: Foal by Stanford McKinney—Loma B. by Stam B.; foal by Expressive Mac—Florence B. by Bon Voyage; foal by Expressive Mac—Strathalie by Strathway.

BUCKSKIN HORSES.

Dixon, Cal., May 24th, 1916.

Breeder and Sportsman: Is the contention true that a buckskin horse has greater staying qualities than a horse of any other color?

F. G. DUNNICLIFF.

Ans.—There has never been any endurance test for horses of different color so far as we know. Dun, or buckskin, is said by scientists to be a sign of primitive, wild ancestry in a horse. There is no doubt but there are many "buckskin" horses that have a reputation for stamina and endurance. Especially is this the case among vaqueros and stockmen. Is there a Californian who lived in this State when cattle raising was the leading industry who cannot recall the belief held among stockmen that a buckskin horse with a black line down his back and black stripes on his legs was as tough as iron and able to go any distance and carry any weight? But there is no record of color contests so far as we can learn.

HORSE NEWS FROM VANCOUVER.

The Vancouver track has been put in shape for matinees. Most of the old brigade will, I believe, be in evidence at the matinees this year, though A. R. Miller has gone to Regina with Bona Day 2:11¼ and Greco McKinney, his good green pacer by Greco B., and Mr. Marshall's good bread-winner Olga S. has apparently paced her last race, owing to the breaking of a bone during the races at our fair last August.

A. McCullough has his five-year-old trotting filly, May Bells by Walter Barker, that should make a good trotter this year. He has also purchased the three-year-old pacing colt by Kinney de Lopez, dam Nealey Stanley by On Stanley.

E. Burgoyne has purchased from James Welsh, of Ladner, the three-year-old K. M. C., who raced well last year as a two-year-old in the pacing classes. This colt is sired by B. C. King, and his dam was Arketa by McKinney. He is a very large horse and very promising. His owner says that he is not going to prepare him for racing this season, and possibly on account of his growth this is wise.

A. McKenzie has purchased from R. J. Johnston the three-year-old filly by Zobona 2:18, dam Just It by Nearest. This filly is not yet thoroughly broken, but had a good mother and, of course, sons of Zombro have some reputation as sires.

Of the old stand-bys, W. H. Mason's good Greco B. filly, Susie G., is probably the best trotter left, with the exception of George Bell's old stager Chromo, and it is within the bounds of possibility that the younger will be too much for the older one this season. Mr. Bell has also for matinee purposes the eight-year-old pacing mare Myrtha Pointer by Star Pointer, dam Myrtha Whips 2:09¼.

W. Steele has his eight-year-old trotting stallion, Amaline Lou by Kinney Lou, and threatens to do things this season.

Dr. Milloy's Sweet Nut will again be a matinee contender, and it is stated that Mr. Nicholson will return Fera Montana to the fun brigade. A number of others will, doubtless, be on hand when the bell taps on May 13, or whatever other day is chosen for the opening of the season.

At Minoru, E. C. Lewis has the following: King Bond 2:10¼, who is the most highly regarded, is a pacing stallion by The Bondsman, first dam by Cecilian, second dam by Lord Russell, third dam by Princeps, fourth dam by Hamlet, fifth dam by Brignoli. He is a very handsome, well made brown stallion with white ankles behind and is regarded as a fast pacer. He could show easy miles in 2:11 or thereabouts on a poor half mile track last season and is reported to have shown a quarter in 29 seconds on the trot in this three-year-old form. He certainly is a handsome fellow and much is expected of him.

Walter F. 2:12¼ by Simmons is the only other record holder in the lot. The gray gelding called Jimmy Osborne by Jim Kyle, dam a full sister of Annie Gould, that has been a saddle horse and up to a few weeks ago had shown no indications of speed has, by having fifteen ounces put on his front feet and a form of shoeing, converted into what looks like a promising pacer.

The two-year-old bay filly by Peter Preston, with a dam holding a record of 2:15¼, is a very atractive-looking filly that is now getting her preliminary education, as are a number of others, namely, the two-year-old brown stallion by a son of Sable Wilkes, dam by Rexall; the bay filly three-year-old by Ed. Fletcher, son of Ed. Custer, dam by Five Points. The latter is a very handsome filly and a trotter.

The three-year-old trotting colt by Quintell 2:12½, out of the record mare already mentioned, stands next to this one and is a well made and attractive filly. A small chestnut horse by King Entertainer 2:10¼ is highly regarded. The black roan filly by D. J. McDonald, son of Baron Moore, dam by Jim Kyle, and a bay filly by the same sire, dam unknown, complete the string of Mr. Lewis' own horses.

He also has there two horses owned by Dixon Bros., formerly mentioned, both of which are showing speed. The weather has been so backward, however, that no real work has been done.

Mr. Loomis has five horses, the aged ones being Frank D. Nichol 2:20½ by Cresceus 2:02¼, dam Silpan by Silver Bow, and Prince Malone by Kinney Lou, dam Princess Bessum; the three-year-old trotting stallion by Zobona 2:18, dam Mona, who is particularly good gaited; the three-year-old Red Squirrel by Bland S. 2:03¼, dam Chipmunk, who has grown and is a handsome individual, and the three-year-old bay stallion mentioned recently as belonging to J. K. Campbell and about whom it is difficult to obtain details as to breeding. I think he is by Direcho and that his dam was Nealey Stanley by On Stanley. He is a very compact, small colt and up to date has not been given sufficient handling to predict much about his speed qualities.

At Ladner, sixteen or seventeen miles distant, Mr. Handford has Uncle Tom by Mon Bars, a fair trotter, and three colts, one a full sister to Mr. Nixon's good filly, Beauty B.

The above list is not exhaustive and does not pretend to be so. There may be other horses in this vicinity equally or more deserving of notice, but the writer has not come in touch with them or does not remember them at the moment.—W. C. Brown in Rural Spirit.

The Oregon State Fair board, with co-operation of commercial organizations, will hold matinee races at the Salem fair grounds on July 4th.

RECORD MEETING AT LOS ANGELES.

The Los Angeles Harness Horse Association held a breeders' meeting on Friday of last week to give several of the owners who have horses in training an opportunity to mark them before W. G. Durfee and other trainers left for the eastern and other circuits. Eight horses were given breeders' records, six of them trotters and two pacers.

The fastest mile by a trotter was made by the bay mare Maggie M. owned by Mr. C. H. Morgan and driven by Baker. She circled the track in 2:12¼, a fast mile for a mare that had no previous record.

W. G. Durfee drove the three-year-old trotter Manuelito by Manrico (3) 2:07¼ a nice mile in 2:14¾, a reduction of nearly 10 seconds from his record of 2:24½ made as a two-year-old last December, and drove the two-year-old colt Troubadour a mile at the pace in 2:25. Troubadour is by Carlokin 2:07½ and is out of the same dam as Manuelito. Their dam, My Irene S. 2:28¾ by Petigru 2:10½, is now the dam of six standard performers, namely: Esperanza 2:09, Carl (3) 2:14¼, Manuelito (3) 2:14¾ and Carlos (3) 2:29¼, trotters, and the pacers Zorene 2:10¼ and Troubadour (2) 2:25.

Durfee also gave the eight-year-old brown stallion Alhambra Prince by Redlac 2:07½ a mark of 2:14½ trotting, and then drove Alhambra Duke, a three-year-old gelding by Alhambra Prince, a mile in 2:17½ pacing.

Mr. Durfee also gave Hemet Stock Farm's young stallion Wilbur Lou a new representative in the list by driving Kinsman Lou, a two-year-old colt by him, to a record of 2:26½.

Quite a number of spectators enjoyed the afternoon's sport. The summary:

Los Angeles, Friday, May 19, 1916.

To beat 2:22½ trotting:
Manuelito, ch g (3) by Manrico (3) 2:07¼—My Irene S. (2) 2:28¾ by Petigru 2:10½....(Durfee) 2:14¾

To beat 2:25¼ pacing:
Troubadour, b c (2) by Carlokin 2:07½—My Irene S. (2) 2:28¾ by Petigru 2:10½.....(Durfee) 2:25

To beat 2:30¼ trotting:
Maggie M., b m (7).....(Baker) 2:12¼

To beat 2:27 trotting:
Alhambra Prince, br h (8) by Redlac 2:07½—Patti W. by Geo. W. McKinney 2:14¼.....(Durfee) 2:14½

To beat 2:25¼ pacing:
Alhambra Duke, b g (3) by Alhambra Prince 2:18¼—Ezelda W. by Del Coronado 2:09½.... .....(Durfee) 2:17½
Cima, b m (9) by Limonero 2:15¾—Sona 2:16 by McKinney 2:11¼ .....(Durfee) 2:21

To beat 2:30¼ trotting:
Juanita G., b f (3).....(Durfee) 2:27

To beat 2:30¼ trotting:
Kinsman Lou, b c (2) by Wilbur Lou (3) 2:10¼—Sona 2:16 by McKinney 2:11¼.....(Durfee) 2:26½

SAN FRANCISCO-CALIFORNIA CLUB MATINEE.

Wind and dust made the day anything but pleasant at the track in Golden Gate Park last Sunday, but the racing was good and without any particular feature except a collision in the second heat of the second race when Mr. E. T. Ayres was thrown from his sulky and sustained a severely wrenched ankle. Owing to the wind the time was not as fast as the horses were capable of showing but the races furnished good sport throughout. The summary:

First race—2:20 trot:

Merrylena.....(J. H. Wilkins)	1	1	
Minequa .....(M. Ford)	2	2	
Matawan .....(J. McNamara)	3	3	

Time—1:47¼, 1:44.

Second race—2:18 pace:

Little Jack.....(G. Conlan)	1	1	
Victor Pointer .....(D. Keating)	3	2	
Little Dick .....(A. Scott)	4	3	
Dr. Dawson .....(E. T. Ayres)	2	d	

Time—1:40, 1:44.

Third race—Free-for-all pace:

Bradmont.....(G. J. Giannini)	1	4	1
Pointer Belle .....(J. M. Kidd)	4	1	4
Emma M. .....(William Malough)	2	2	2
W. J. K. .....(W. J. Kenney)	3	3	3

Time—1:38½, 1:41½, 1:40.

Fourth race—Free-for-all trot:

Harold C. .....(Harold Cohn)	1	1	
Ella M. R.....(G. J. Giannini)	2	2	

Time—1:38½, 1:40.

Fifth race—2:15 pace:

King Pointer .....(H. Campodonico)	1	3	1
Mabel Dillon .....(B. Cohen)	2	1	2
Senator H. .....(J. M. Kidd)	3	2	3

Time—1:42¼, 1:38, 1:39½.

Half a dozen visitors to Poughkeepsie from New York last Friday had the extra pleasure of seeing Murphy give the first stiff work to last season's champion money winner, Peter Scott, this being the first time the visitors had seen the great trotter since last year, writes Asdikian in the New York Telegraph. The champion is certainly in magnificent form right now, while his caretaker, John Clark, the boy who received a $1000 check from the horse's owner as a Christmas gift, is ready to wager part of it that, barring accident, his world beater will trot a mile in 2:03 or better either in a race or against time if started, and his challenge is open to all. In the afternoon the guests, led by Mr. Murphy, wanted to look Peter Scott over at halter, but there was nothing doing, as, in the judgment of Clark, the afternoon was sort of drafty, and besides he was just then too busy washing boots, harness, etc., and taking special notice of the two kodaks in the crowd.

That a public record no longer indicates the class in which a trotter can race is shown by the entry of Lou Jennings 2:06¾ in the 2:15 class this season on Michigan half mile tracks. The mare gets an allowance of four seconds for having been unplaced in her last four races last season, and four more because her record was made on a mile track.

DEATH OF KLATAWAH (3) 2:05½.

Word comes from Indiana of the death of Klatawah at the age of 21 years. At three years of age this son of Steinway and Katie G. by Electioneer was a great race horse and in the stable of the late Thos. Keating in 1898, whose health was then fast failing, he made a campaign across the mountains racing against aged horses and meeting defeat but once. That was the race in which he took the world's record at that time of 2:05½ for three-year-old pacers. It was in the first heat of the $5000 pace for 2:18 class horses. Miss Logan, another Californian, took the next three heats in 2:08¼, 2:08, 2:08. Klatawah started eight times that year, won seven straight races and was only defeated in his last start, which was at Louisville, September 28th. Klatawah started his campaign at Denver, where he won two races. His next start was at Peoria, where he won over a good field of twelve in 2:07¾, 2:09 and 2:06¼. The following week at Cleveland the son of Steinway headed the summary over a field of thirteen, and paced the opening round in 2:07. His next appearance was at Louisville. He won a race at the Kentucky city Sept. 27th, but after winning the first heat in the big stake the following day, lost the race to Miss Logan 2:06¼, but headed such good performers as Lady of The Manor 2:04¼ and Hetty G. 2:04¼, in the summary. It was in this event that he took the world's record, reducing it nearly four seconds, and he held it until 1909 when another California three-year-old, Jim Logan, equaled it, and in 1912 Miss de Forrest and Impetuous Palmer both reduced it a quarter of a second to 2:05¼. The three-year-old pacing record is now 2:00¾, held by the filly Anna Bradford. Gen. Todd with a mile of 2:04¼ is the fastest colt, and Rayo de Oro 2:07¼ by Copa de Oro is the fastest three-year-old gelding.

Since placed in the stud, Klatawah produced several good race horses, including Periolat 2:05¼, Emma Lou 2:08½, French Girl 2:10 and others, having altogether forty-two sons and daughters in the list. Klatawah was bred by Mr. John F. Boyd at Oakwood Stock Farm, Danville, Contra Costa county, California.

PETER THE GREAT'S RECORD.

The year book of the American Trotting Register Association furnishes the first official figures concerning the sires of the trotters and pacers that became standard by performance in 1915—that is, took records of 2:30 or better at the trot, or 2:25 or better pacing, says H. T. White in Chicago Herald.

Peter the Great, long in the van as a sire of colt trotters of the champion class, now stars as the first stallion to have fifty of his get enter "the list" in one season, his figures for the 1915 season being sixty, of which forty-five were trotters. Among these trotters were two world's champions for their age and sex, Peter Volo (4) 2:02 and Volga (2) 2:07¾. Peter Volo set a new mark for all four-year-olds, while Volga equaled the record for two-year-old fillies, the 2:07¾ of Native Belle, but decisively shaded the Moko filly's performance by coming back another mile in 2:09¾—the best two heats by a two-year-old filly.

Seven of the forty-five new trotters by Peter the Great took records under 2:15 and three of them beat 2:10, the seven being: Volga 2:07¾, Great Governor 2:08½, Miss Pierette 2:09¾, Lilly the Great 2:11¾, Lady McKee 2:12¾, Jane Ann 2:13¼ and Wenban 2:14¾. Their average age was 3.57 years, the eldest being Great Governor, 5.

An interesting fact concerning these seven speediest ones of the family yield in 1915 is that the only one having a dam that also was a developed trotter is Lily the Great, she being from Mary Louise 2:27½, by J. J. Audubon 2:19, son of Alcyone 2:27, he by George Wilkes 2:22.

Three generations of developed speed in the male line made a trotter of Mary Louise, but her best foal is the champion three-year-old pacer, Anna Bradford 2:00¾, by Todd Mac 2:07¾, trotting, son of the trotter Todd 2:14¾, he by Bingen 2:06¼. It is such freaks as this that keep the theorists, who are trying to breed trotters, busy with their checkbooks.

R. M. Williams, who brought suit against the National Trotting Association and its secretary, W. H. Gocher, for $25,000 damages last week, has just purchased a stock farm of two hundred acres, near Columbia, Tenn., and established a new stud of trotters, with the fast stallion High Admiral 2:07¾ at its head. Mr. Williams has made a small fortune for himself in handling about sixty thousand war horses since hostilities began in Europe, and is now going to breed trotters in his native state and sell them as yearlings in New York. His broodmares include the crack pacer Alice Pointer 2:05½, by Star Pointer 1:59¼, in foal to Peter Mac 2:03½. High Admiral is a ten-year-old son of Admiral Dewey 2:04½, and Avena 2:19¼, by Palo Alto 2:08¾. He is said to have trotter a quarter at a 2:00 gait when one year old. Ed Geers afterwood drove him a mile in 2:05¾ in his work. His sire was a son of Bingen 2:06¼, and Nancy Hanks 2:04. High Admiral is himself the sire of five young trotters in the 2:30 list, one of them being the sensational filly Bessie Admiral 2:28, whose record, when made, was the fastest in the books for a yearling on a half mile track.

Drink Jackson's Napa Soda.

Thoroughbred Matters

AN ENGLISHMAN'S VIEWS.

A highly-interested and delightfully interesting visitor to the races at Lexington this spring has been Edward Moorhouse, of London. Mr. Moorhouse is a director of the British Bloodstock Agency of London, editor of the Bloodstock Breeders' Review, was for many years Special Commissioner of The Sporting Life and before that sporting editor of the Pall Mall Gazette; is the author of "The History and Romance of the Derby," and is a Fellow of the Institute of Journalists.

He has been going about among the breeding farms and has been a guest of the Kentucky Association at the races. Mr. Moorhouse was interrogated as to the chief purpose of his visit to this country and this inquiry was succeeded by others, until the following interview was produced:

"It is to meet the leading men associated with blood-stock (thoroughbred horses), to study their aims and the means by which they are striving to attain the end they have in view, that I have come to the United States and to Kentucky," said he. "I have for many years followed with keen interest racing and breeding developments in this country, but it is one thing merely to read about such matters and quite another to get into personal contact with them and, more especially, with the men who have fashioned and are still fashioning the history of the thoroughbred in this truly wonderful country. I am here as a student—a learner. I realize that many good and some great horses have been bred and raced in the United States, and I am convinced that what your breeders of the past have done can be equaled and probably surpassed by the breeders of the present day.

"As you know, we in England are passing through a trying period. Owing to the war, racing has been cut down to such an extent that the breeding of bloodstock has become a precarious industry. Let me quote one or two facts by way of emphasizing that statement. In 1913, the last year before the war began, there were sold at our great Doncaster yearling sales 321 lots for an aggregate of $1,007,290, so that the average yield per yearling was $3,450. That was a record as regards both the aggregate and the average. The Doncaster sales in 1914 were held five weeks after the commencement of the war. On that occasion 220 yearlings made $274,080, the average being $1,245. Last autumn the yearling sales were held at Newmarket because there was no racing at Doncaster and 260 lots were disposed of for $255,890, so that the average was reduced to $980. That meant that nine breeders out of ten were selling at a loss. Scores of yearlings made less than the covering fee paid by the breeder. Bad as this result was, it would have been infinitely worse but for the competition occasioned by the bidding of commissioners representing wealthy American owners. You may be sure we in England will follow racing in the States during the next year or two with the liveliest interest. You have not imported the best thoroughbred stock that England and Ireland can produce, but you have certainly secured a good sample.

"The broodmares and stallions brought to this country have been selected judiciously for the most part. It would not be becoming to me to discuss now the pros and cons of the question whether the American thoroughbred is as great a proposition as the pure British thoroughbred. I hope I have no prejudices in regard to that matter. Anyway, I am prepared to admit that the American thoroughbred is not the pariah which some people try to make out. My respect for the species has been intensified during the last few days. Let me say, however: You will never make the headway in this country that you ought to until you pay much greater attention to long-distance racing. It seems to me that you carry the glorification of speed to a needless extreme. One of our English racing rules stipulates that there must be at least one contest each day over a distance not less than a mile and a half, and other rules tend to curb the hankering after sprinting. Even so, I have long been of the opinion that we might with advantage go much farther in the direction of encouraging stamina. The first and last aim of racing should be to improve the breed of horses by affording a conclusive test of their merits. If it merely results in the production of racing machinery whose lungs are clogged after they have covered three-quarters of a mile, the sport is of little or no practical service and becomes simply an amusement. A horse which can win over a mile and a quarter in good class company, carrying a substantial weight, is, in my opinion, the animal calculated to get the right kind of stock. His offspring will in all probability include both sprinter and stayers by reason of the segregation of heritable characters in accordance with the Mendelian law.

"What do I think of American racing? The Lexington meeting is so far the only one I have attended on this continent. To me, accustomed to the expansive heath at Newmarket and the spacious tracks at Ascot, Goodwood, Doncaster and other places that might be named, the Lexington track seems very small and 'trappy.' On such a course luck seems to play an unduly big part—luck and jockeyship. Of course, jockeyship is an essential ingredient of racing, but racing can be ideal only when all the horses are given equal chances, and that essential is unobtainable in sprints in which the competitors have to negotiate a sharp turn like that at Lexington and when the final straight is only about a quarter. I have noticed that in the majority of races here the horse that wins has generally been first or second at the turn into the straight. There are not the chops and changes we see in England in the last eighth or two on our straight courses, which affords a slow beginner a chance of overcoming his initial disadvantage. But let me say I have greatly enjoyed the racing at Lexington. I have seen many good-looking horses, especially among the two-year-olds, and I have made the acquaintance of some fine sportsmen. The camaraderie which animates the meeting is most noticeable. It is a spirit we find in Ireland much more than in England.—Thoroughbred Record.

The Macomber Importations.

The thoroughbreds selected in England by Walter Jennings and imported to this country for Mr. A. K. Macomber of Burlingame, California, have aroused much interest and favorable comment from the eastern turfmen who have seen them. Star Hawk, who in his first start ran second in the Kentucky Derby after being left at the post, is pronounced one of the most beautiful thoroughbreds ever imported to this country. He started in six races in England, winning twice, finishing second once, third once, and unplaced twice. He, with the rest of the sixteen Jennings importations, wintered at Palmetto Park, Charleston, South Carolina.

The other three-year-olds in the Macomber importation were fine individuals and richly bred, but while one of them, Hesperus, did not race as a two-year-old, the other, The Cock, who started four times, failed to reach a place.

Mr. Jennings appeared to have the future of Mr. Macomber's aspirations as a breeder clearly in mind when he bought his baker's dozen of two-year-olds, for while three of them are colts, no less than ten are fillies. Six of these two-year-olds are by the popular and successful sire, Sunflower, four are by Sunstar, and one each by Cicero, Roquelaure and Buckwheat.

All these animals were bought in a "bunch" from J. B. Joel, one of the most successful of England's breeders and turfmen. In making this selection, Walter Jennings was accompanied by A. J. Joyner, and when one looks over the entire lot he cannot but be impressed with the fact that both of these skilled and experienced turfman were at their best when they were choosing them, for they make up an exceptionally fine lot of individuals aside from the fact that they are all regally bred.

Gov. Stanley Endorses Racing.

At the first annual dinner of the Kentucky Thoroughbred Horse Association held at Lexington, Governor Stanley of Kentucky said he has a fondness for the sport of racing, though his busy public life has afforded him little opportunity to enjoy much of it, but he is for racing, he said, for another and higher reason because he is patriotic. "The horse is essential to any country's preparedness for defense against the encroachment of any other nation," said he. "The horse is just as necessary in war as is the gun and as are explosives. The thoroughbred blood is required to produce the ideal horse for war purposes as well as for general purposes. Without the thoroughbred, therefore, we cannot have the proper horse. Without racing we cannot have the thoroughbred. I am for racing that we may have the best possible horses." The Governor unhesitatingly pledged his friendly offices in behalf of racing, and asserted his belief that the breeding of thoroughbred horses is an ennobling occupation. He realized, he said, that his views would not meet with the approval of many persons who, under the guise of reform, have objected to racing, "but," he concluded, "when it becomes so that I may not frankly say what I believe, then I shall get out of politics."

Mont Blanc, one of George Wingfield's imported colts by Grey Leg, won at four and a half furlongs at Tijuana last Saturday in 55 seconds. Mont Blanc is a gray colt and a two-year-old. He defeated a good field and was as good as 30 to 1 in the betting.

It looks as if Harry Kelly, the chestnut son of Ultimus, would be one of the best two-year-olds of the year. He has won his last three starts and won the Bashford Manor stakes at Louisville last week, four and a half furlongs in :53¾, which is within four-fifths of a second of the Churchill Downs track record, and the track was not fast. The colt is owned by J. W. Schorr.

S. C. Hildreth, who is training the racing string of August Belmont, chairman of The Jockey Club, has about 25 colts and aged horses at work. Stromboli, winner of last year's Suburban and winner of six other races during the season, is now five years old and is as sound as a new dollar. Of unquestioned speed and gameness, he may be expected to train on and add to his reputation as a high class race horse. Stromboli is by Fair Play.

Jockeys Troxler and A. Schuttinger will ride as free lances on the New York tracks this season.

Couldn't Fool Him.

Walter Jennings, in order to be near the track, has been occupying a well-appointed room adjoining one of the stables down at Jamaica for the last few days. Last night just as he was getting ready for bed he had a caller in the person of Starter Mars Cassidy, who enlivened the occasion with weird tales of brigandage as practiced down around Juarez last winter.

"And say," Mr. Cassidy declared in hushed tones as he got up finally to take his leave, "you know there was a man beaten almost to death in this very room a few months ago by thieves. They were after his diamond rings and jewelry."

"Stop your joshing," Mr. Jennings retorted scornfully, as he stripped a pair of many-karat rings from his finger and extricated a brilliant scarf pin from his tie, preparatory to retiring. "Any one with diamond rings wouldn't be sleeping in a stable!"—Daily Telegraph.

A big program is being arranged for Sunday, Monday, Tuesday and Wednesday of next week at Tijuana. Tuesday is Memorial Day, consequently a legal holiday in California, and Manager Coffroth hopes to get a lot of visitors to his track who will remain for the four days.

The Liverpool Grand National Steeplechase which is over a course that exceeds four miles in length, was won by Cloister in 1893 by over forty lengths, when that horse carried 175 pounds.

In riding the winners of the entire card of six races at Churchill Downs, Louisville, Ky., June 5, 1907, James Lee (colored) established a world's record. "Monk" Overton (colored) rode six winners at Washington Park, Chicago, July 10, 1891. There were seven races on the card. He had no mount in the second race. C. Turner, on April 9, 1912, at Charleston, S. C., piloted six of his seven mounts to victory. Eleven other jockeys gained the distinction of having won the full card, but in each instance there were five races or less on the program. Fifty-three times have American jockeys ridden five winners in one day, but in all save thirteen instances they had mounts in six or seven races. At Benning, April 3, 1906, Walter Miller rode the winners of the last five races and the following day won the first three races, making eight successive victories. At the Harlem track, Chicago, September 7 and 8, 1900, W. Buchanan rode nine winners out of eleven mounts. Instances of four winners ridden in one day in this country are too numerous to mention.

Joseph E. Seagram furnished the winner of the King's Plate, the big feature of the opening of the Canadian racing season, in the three-year-old Mandarin. The latter's stable companion, Gala Water, was second, and Gala Day, another stable companion, third. There were only six starters, and the Seagram entry had things pretty much their own way most of the trip. Mandarin made all of his own pace and won under restraint. He is evidently a good colt and much better than the race showed, as there was no opposition back of him. It was the first time in eight years that the Seagram colors were carried to victory in this famous old Canadian classic.

General Wilkes, a four-year-old son of Marvin Wilkes, is winning races in New Zealand.

UNIVERSITY HORSE SHOW.

An official catalog has just announced the rules and classes of the third annual Commencement Horse Show held by the Agricultural Club of the University of Missouri and the citizens of the city and county in which that school is located. The show will be held on the nights of May 29 and 30, and the afternoon of May 30 on the athletic field of the institution.

First prizes of from $25 to $35 are offered in most of the thirty-six classes, with two to three other liberal prizes in each class, but in some cases handsome trophies are to be awarded instead of money prizes. Harness horses and roadsters will receive most of the attention with eleven classes out of the total of thirty-six, and money prizes will be offered in ten of these eleven classes. Fine three- and five-gaited saddle horses come next, six classes apiece, while light harness horses and ponies have four classes each, and competition in runabout horses, tandems, fine harness horses, and riding teams will be narrowed to one class apiece. There will also be a high-school horse exhibition and potato race.

Although the booklet announcing the classes, prizes and trophies has just been issued, the entries already received include nineteen made by Miss Loula Long of Kansas City, ten from Blades and Holman, and several from Porter D. Taylor, Montgomery City. Professor E. A. Trowbridge, Consulting Secretary, feels sure that practically all the old exhibitors and a number of new ones will be on hand this year.

This horse show is unique in being the only show of its kind managed largely or altogether by college students and in requiring no entry fees and no take-outs. The Board of Directors consists of twelve men chosen from the student body of the College of Agriculture who have chosen C. R. Thompson of Columbia as Secretary and E. A. Trowbridge as Consulting Secretary. They have also secured the advice and assistance of an Advisory Council of eighteen business men and farmers of Columbia and Boone county.

Something New At Santa Rosa

Forest Carnival to be Held in Conjunction With Pacific Coast Breeders Meeting

The Sonoma, Marin, Mendocino and Humboldt Fair Association, whose big fairs of 1913 and 1914 drew tremendous crowds and were successful in every way, proposes to outdo both those fairs this year and with the aid of the Pacific Coast Trotting Horse Breeders' Association will hold a fair and race meeting in August that will eclipse anything ever seen in the beautiful city of Santa Rosa, which, in the slang of the day will be going some, as the city of roses has held some very successful expositions.

The fair of 1916 is to be on a new plan which is here outlined by the Santa Rosa Press Democrat:

"The Forest Carnival," the very latest idea in uniqueness of display and entertainment, will be staged in the picturesque grove of trees at the race track here during the big race meeting of the Pacific Coast Trotting Horse Breeders' Association in Santa Rosa, August 7-12.

The old-time plan of exhibits of products under pavilion roof or canvas tent, is out of the question and not in the consideration in point of uniqueness when it comes to staging these displays in the open air, with the roof tree foliage and the starry heavens as a canopy. No cramped space, either. Twenty acres of grove are available for "The Forest Pageant," or if you prefer it, "Fairyland in August."

The novelty was suggested to the fair directors at a meeting held here on Monday and was adopted as the thing for the coming August at the time when the races are here. It is a big thing and it will be sure to prove the attraction of the year when it comes to county fairs.

The grove will all be laid out with streets and lanes and the exhibits will be located in the various blocks thus formed. There will be booths, buildings, etc., as required, under the trees and the whole will be brilliantly illuminated at night with thousands of electric lights and Chinese lanterns.

Already the directors have been given assurances that the principal manufacturing interests of the county will make appropriate displays of their wares and there will be many feature exhibits, including a model chicken ranch with brooder-house, real chickens in pens, and everything just as it is found on an actual ranch anywhere in the county. This will prove of much interest to visitors from a distance and all who have not visited some of the chicken ranches in the country.

It is proposed to provide some interesting amusement features such as ball games, campfires, pageants, musical programs, etc., in connection with the day and evening so as to give interesting amusement for all. Then, too, there will be the usual other fair attractions on the grounds.

Nothing will be left undone to make the affair the most interesting and successful ever held in Sonoma county and it is expected all sections of the county will join in doing their share to make it a big thing from the point of attendance as well.

* * *

Anyone who has ever visited the Santa Rosa Stock Farm track and grounds will readily see what wonderful advantages its twenty acre grove of beautiful trees has for just such a display as is above suggested. Under the umbrageous shade of those old oaks, elms and mulberries the exhibit booths will take on a charm that will be unique in its way and something never before seen at a fair in California. Arrangements are being made to string thousands of electric lights through this grove and a big dancing platform is one of the proposed attractions. But just wait until the committeemen make their report and you will determine then and there to set aside the week of August 7th to 12th for a visit to Santa Rosa.

The Santa Rosa Race Track, which was the place where the first 2:00 trotter got her first lesson in wearing harness, is now in fine shape for training, the veteran Sam Norris having charge of it. Mr. Norris knows just how to work it, and every trainer who is driving horses over it at the present time says it is just right.

Keefer and Spencer have the largest string in training there, and are hoping for a California circuit big enough to induce them to race at home. That grandly bred stallion The Proof 2:10¾, that made a hard campaign last year, starting no less than 19 times and getting his record in the third heat of a race, is in improved shape over last year. He has taken on some flesh and while he has not been given any fast miles looks and acts like a horse that will trot in 2:05 or better. He is following his sire The Exponent in giving his produce solid color, good looks and trotting ability, and is bound to be a high class sire himself.

Bonnie Ansel 2:09¼ can be considered about well of all the ailments that bothered her last year. She has a wonderful flight of speed, having shown a mile in 2:07½ and a half in 1:02½ at Sacramento last year.

Vallejo King 2:10½, owned by Tom Smith of Vallejo, is getting regular work and will be ready for the races. He has been no miles better than 2:21 so far this spring but has marched a quarter in 31¾ seconds and acted as if he could trot a bit faster if necessary.

Butch, a six-year-old brown gelding by Kinney Lou 2:07¾, dam Missie Medium (dam of 3 in the list) by Rampart, is owned by Mr. M. Walz of Healdsburg, and while a green horse with only two months' work under Spencer's care is stepping along like a real trotter.

The only pacer in this string is Memento by Alcona Wilkes, that is owned by Nick Haavesland, one of Spencer & Keeffe's caretakers. Memento is some pacer and will be ready to start in some of the slow classes.

Mr. C. G. Owen of 5122 Mission street has sent his two-year-old filly, Ella O. by Moko Hall, dam by Kinney Lou, to Santa Rosa for training and Spencer says that she is just about the most promising young thing he has ever handled. He took her unbroken and the tenth time he ever drove her a quarter she trotted it in 39 seconds and gave every evidence that she could have done better if asked. This is some speed for a baby in the primary class and as she is well staked she, like all fast females, is being much talked about.

The Expense, now a three-year-old, is the very first of the get of The Proof, and while 2:24 is the best mile she has been driven this spring, some idea of the speed she has on tap can be gained by an eighth in 15½ seconds which she showed the other day. She is filling out into a splendid looking mare and is certainly a credit to her sire.

Nuristo 2:10¼ is looking fine and on this track, where he made his record two years ago, he bids fair to gain more honors. Owing to the fact that he did not win last year he is eligible to the 2:12 class this year.

Arista Ansel 2:18¼ as a two-year-old, and eligible to the 2:20 class, is now a six-year-old and Spencer has considerable faith in again getting her to the races. Her hind foot, in which she ran a nail a year ago and which at one time looked as if she would never step on again, is almost normal and she shows only the slightest limp in it after being speeded. If she trains sound she will get out of the 2:20 class by ten seconds easily enough.

* * * *

John Compton's string of three are getting a few fast brushes, but no fast miles have been asked of any of the trio as yet. A seven-year-old chestnut gelding by Lynwood W., dam by Alcona, has been a mile in 2:20 with an eighth in 15½ seconds, which is testimony to the speed he has. He is owned by Mr. L. L. Cannon of Penn Grove, president of the Sonoma Driving Club, a very thriving organization that will open its matinee season at Santa Rosa June 25th.

Another son of Lynwood W. in Compton's charge is Pfeister's Lynwood, a dark chestnut gelding whose dam is by Gossiper. He worked a mile in 2:12½ last season at the trot, and this year a mile in 2:20, last half in 1:08 and last quarter in 32 seconds, is the best showing he has made.

* * * *

W. A. Steuart, the Humboldt horseman, has a string of four pacers and all are being made ready to race. Emmaline Dillon is a six-year-old bay mare by Guy Dillon, dam by John L. She took a record of 2:12¾ over the half male track at Ferndale last year, starting in two races and winning them both in straight heats. She can pace a half mile in a minute and 2:05 won't stop her when she is right.

Don Remo is a light bay three-year-old, green, but a racy looking fellow and he has shown a mile in 2:20¼ already. He is by Irving Pointer and his dam is by Greco B., so he has some very fast relatives.

Potreress is the name of a five-year-old chestnut mare by Potrero Boy 2:06¼, dam by Alton, son of Altamont. She has a breeder's record of 2:22½ but is green so far as racing goes. She has the speed of her ancestry, however, as a mile in 2:14½, quarters in 30 seconds and an eighth in 14½ seconds has shown. Mannie Reams of Suisun bred this mare.

Bonnie Quinn, seven-year-old bay mare, owned by Pat Quinn of Humboldt county, had a trial recently in 2:15½. Stewart says that all she lacks is brush, but as she is always trotting and trying she will do to race against some horses that seem to be faster. She is by Bonnie Steinway out of a mare by Waldstein, and eligible to the 2:20 class. She won two races last year, one a six heat affair in which she took a mark of 2:19¾, and this on a half mile track.

* * * *

Frank S. Turner's horses are occupying ten stalls and while he does not expect to do much racing this year he is just as enthusiastic a breeder as when prices were five times what they are now. The young colts and fillies he has that resulted from his taking a number of his best bred mares to Illinois and mating them with The Exponent are enough to make any breeder enthusiastic if he has any love for handsome young trotters. Three of Mr. Turner's best mares lost foals this spring by his three-year-old colt Exponent Mac, two foaling ahead of time and the other being accidentally smothered after arrival. But even this bad luck has put no crimp in Turner's optimism and he intends to keep on breeding trotters.

There is in the Turner stalls a bay trotting mare by Guy Dillon out of Adioo, therefore a full sister to that half mile track sensation of last year Adioo Guy 2:10¾. This mare was recently purchased by Mr. J. H. Rossiter, the San Francisco capitalist who manages the extensive Pacific Coast end of W. R. Grace & Co., one of the world's largest shipping firms. Mr. Rossiter purchased this mare for the express purpose of breeding her to Exponent Mac this season, and if there is anything in combining fast blood lines, the result should be a real fast one. Turner named this mare Miss Wise Guy, as he states that when a yearling, running with other colts in pasture, she could hear his voice farther and get her nose into the feed box sooner than any of the others whenever the crushed oats were dished out.

The stallion Guy Dillon is in fine shape this spring. He now has an even dozen standard performers to his credit, headed by the pacer Guy Borden 2:07¼, and there are three or four more that are just ready to enter the 2:10 list and will doubtless get there before the racing season of 1916 ends.

The real violator of the speed limit law in Turner's stable is the chestnut gelding Dr. William S. Jennings 2:11. L. L. Cannon timed this fellow a quarter in 28¾ seconds recently and a half in 1:02¾ to wind up a mile in 2:13 the other day was easy for him.

Geo. Trowbridge's mare Miss Trowbridge trotted a nice mile in 2:26 and a half in 1:11 the other day and will doubtless be heard from this year if she is raced. She is by Guy Dillon out of a mare by Anteeo.

Turner's colts by The Exponent are a swell looking lot of youngsters. Exponent Mac, the three-year-old, naturally attracts the most attention as he is nearer grown than the others, and he is surely a very handsome and classy looking fellow. The Exponent must be a remarkable sire as there is a certain individuality in color and form with which he stamps all his produce that we have seen here in California. And the fact that at the age of eleven years he has a standard list of 60 performers speaks volumes for him. We doubt if there are four better looking colts by one sire to be found anywhere than the three colts and one filly by The Exponent that are in Turner's stables. Of course they are all out of high class mares, which helps a great deal, but The Exponent mark is on every one of them.

* * * *

Frank D. McGregor, who has been in the game with one or two trotters ever since trotting horses were first bred in Sonoma county, is still at it. He steals an hour or two from business every day to drive out to the track and give the very handsome and racy-looking mare Jessie Dillon some attention. This mare is a rich chestnut and has a breeder's record of 2:26¾ trotting, has trotted a mile in her work this year in 2:21, with a quarter in 31½ seconds very comfortably.

* * * *

Sam Norris is about the busiest man at the Santa Rosa track as he superintends the working of the track, has a string of seven or eight in training and has been buying thoroughbreds for the Japanese Government. He recently bought 19 head of thoroughbreds, 14 from Tom Elrick, and among others has bought the stallion King Bright. Norris has a trotting mare by Kinney Lou out of the dam of Lady Mowry 2:09¼ that is owned by Mr. K. Nagasawa, a prominent Japanese of Sonoma county. This mare is to be bred to one of Frank Turner's Exponent colts.

A five-year-old sorrel roan by Lynwood W., dam by Nutwood Wilkes, is a promising trotter, as with only two weeks' work at the track he has shown a mile in 2:50 and a quarter in 38 seconds.

A bay trotter by Lynwood out of a Gossiper mare is showing well. He is a five-year-old and is a full brother to Pfeister's Lynwood that is in John Compton's string.

Stewart Peterson's trotter by Sir John S. is still sticking to that gait, although he is by a pacer and out of a pacing mare. He has trotted quarters at a 2:20 gait and shows no inclination to shift to the lateral way of going.

The big colt by Dickens B. out of a Secretary mare is growing so fast that Norris is not trying him for speed very much but says he handles himself very nicely for a growthy two-year-old.

The Potrero, six years, full brother to Potrero Boy 2:06¼ and Airlie Demonio 2:05½, is working nicely. A mile in 2:17½ is his best work this spring, the last half in 1:06 and the last quarter in 30¾ seconds. The manner in which he takes his work and his superb race horse looks makes him the candidate for 2:10 honors by all parties. Like his famous brothers he is a pacer. He is owned by Tobe Mitchell.

* * *

Last Tuesday, the day the above notes were made, was a freak day in the weather annals of Santa Rosa. The sun was shining brightly as the writer left San Francisco at 8:15 a. m. At Petaluma the wind was blowing strong and the clouds obscured the sun, and when the train reached Santa Rosa at 10:45 the rain was falling. There were three or four showers between that time and 2:30 p. m., and about noon a hailstorm made the ground white for a few minutes. Owing to this freaky condition of things none of the horses were on the track. The track looks to be in excellent shape and the country around Santa Rosa never looked more beautiful than it does now. The grain and hay crops are rather light this year and late frosts have destroyed about 50 per cent of the grape crop, but there will be a fair crop of other fruits and as prices are up well the season will not be such a bad one as was predicted when the late frosts came.

Notes and News

Entries close June 1st.

◈ ◈ ◈

And that is next Thursday.

◈ ◈ ◈

To the Breeders' Meeting at Santa Rosa.

◈ ◈ ◈

Also the State Fair meeting at Sacramento.

◈ ◈ ◈

Keep this important date in mind — better write it down.

◈ ◈ ◈

Where you will see it every day from now until Thursday next.

◈ ◈ ◈

Fresno is in line also.—Entries to close Monday, June 5th—one week from next Monday.

◈ ◈ ◈

Dixon, Woodland, Pleasanton, Hanford, Riverside, and one or two to hear from, but they will all be in the circuit.

◈ ◈ ◈

Earl Pool is making a good record at Tijuana. Up to Saturday last he had won 46 races, been second in 30, third in 37, and unplaced 37 times.

◈ ◈ ◈

A new track record was hung up at Tijuana last Saturday when Slippery Elm, bay gelding by Bannockburn, won the Harry Morris handicap at a mile in 1:39 1-5.

◈ ◈ ◈

Miss Bertha Dillon, by Dillon Axworthy, and Worthy Peter, by Peter the Great, look like the fastest two-year-old trotters in the extensive collection of A. B. Coxe of Paoli, Pa., for this year.

◈ ◈ ◈

Entries close next Thursday for both the Breeders and the State Fair races. Make as many entries as you can afford to. The money is sure to the horses that have speed enough to win.

◈ ◈ ◈

Texas now leads all other States in the number of mules, having 900,000 of the hybrids within its borders in 1915, while Missouri, former champion in this line, had only 329,000.

◈ ◈ ◈

Many of the fair managers in the Middle West affirm that races for the jumpers are as popular an attraction and bring is as much gate money as anything they have on the program.

◈ ◈ ◈

There are nine $1000 purses hung up for the harness horses at the California State Fair. If you want some of that "nine thou." enter your horses in the classes to which they are eligible by Thursday next, June 1st.

◈ ◈ ◈

Kentucky Jew, saddle stallion by Kentucky Choice, recently sold to P. J. Donnelly of Missouri for $2500, has been placed in the stud at Paris, Mo. at $25 to insure, and will be trained later for the show rings at the fall fairs.

◈ ◈ ◈

The Petaluma Driving Club will give a matinee meet at Kenilworth Park Sunday afternoon, June 4. The Driving Club intends to give meets every two weeks during the coming summer. K. V. McDonald is the president of the club, Dr. H. B. Wintringham the secretary and E. O. Voyer the treasurer.

◈ ◈ ◈

The committee of the New Zealand Metropolitan Trotting Club considered the starting question at a meeting held recently and it was decided that the starter should have two paid assistants to help in the work of marshaling the fields at the start. Any attempt to beat the clock will be met with a fine of $50, while a second offense will entail disqualification.

◈ ◈ ◈

Mr. L. L. Gilpin Jr., manager of the Recreation Stables at Richfield, Utah, writes us under date of May 19th: "I am sorely grieved today because of having lost the mare Maud Jay C. by Nearest 35562, and dam of Nearest McKinney 2:13¼, and El Angelo, and two promising fillies we have here by Bon McKinney. She ruptured a blood vessel in foaling and died very suddenly. We lost the foal also. Had a good veterinarian with her but could not save mare or foal. I think, taking Maud Jay C.'s disposition, size and breeding, as well as her produce into consideration, that she was one of the best mares of the day. One of her Bon McKinney fillies, three years old, which I have just started to work on, is learning as fast as any one of her age I ever saw. I believe she can take a standard mark easily without a bit of professional training." We are very sorry to learn that Mr. Gilpin has lost this good mare. She was foaled in 1899 and was therefore seventeen years old at the time of her death. Maud Jay C. was bred by Mr. J. R. Curnow of San Jose and passed to T. W. Barstow who got her in foal by artificial impregnation to McKinney and the produce was Nearest McKinney, as handsome and vigorous a horse as one would wish to see. At the time Maud Jay C. was no nearer McKinney than her owner's stables, which were located three or four blocks from the San Jose track where McKinney was stabled at the time.

A. L. Blackwell, who was for two years trainer at Hemet Stock Farm, California, has located at Britt, Iowa, where he will train a stable of horses.

◈ ◈ ◈

The Sonoma County Driving Club will open the matinee season June 25 with a good program of races at the Santa Rosa track. Mr. L. L. Cannon, president of the organization, says there will be some excellent sport as enough horses are in training to make several races and they can be so classified as to make good contests.

◈ ◈ ◈

Chas. W. Winter of Alhambra, Cal., writes that when his three-year-old colt Alhambra Duke by Alhambra Prince paced to a breeder's record of 2:17½ last week at Los Angeles he paced the last quarter in 33 seconds and the last eighth in 16 seconds. This is a fast colt and took his first lesson last January. Without hopples he has paced a quarter in 32 seconds for Will Durfee and an eighth in 15¼ seconds. He is very promising and level headed.

◈ ◈ ◈

A report of the races held at Santa Ana May Day, taken from a Los Angeles paper, stated that the 2:30 pace was won by Black Diamond. The fact is that Black Diamond only won one heat, the second. The race was won by M. A. Flood's Dash who won the first heat in 2:36 and the fourth in 2:34. The third heat was declared no heat as no word was given but in this heat Dash finished first in 2:32½. This is the report sent in by M. A. Flood of Santa Ana.

◈ ◈ ◈

The proposition of the National Trotting Association to the American in regard to the appointment of a joint committee to draft uniform rules of racing for both organizations is exactly what racing men have asked for years, in fact, demanded it as a most important change for the welfare of the sport, so it is most gratifying to hear from sources which appear to be reliable, that even in the absence of official action, the ruling body of the American Trotting Association will agree and appoint its committee to join that of the National and draft uniform rules to be in force for the racing season of 1917.

◈ ◈ ◈

Frank L. Chamberlin, secretary of the Gentlemen's Driving Club of Cleveland, and a prominent horseman of that city, died last week. He was 74 years old and a civil war veteran. Mr. Chamberlin was known in the business world as the founder of the Variety Iron Works, and as an inventor he invented the Chamberlin cartridge machine and the electric hoist and conveying machine. Both of these inventions are still being used extensively by at least two big concerns. Mr. Chamberlin was an enthusiastic gunner ,a star billiard player and a great horse lover. He was secretary of the Ottawa Gun Club and was a crack shot. Timing at the races was one of Mr. Chamberlin's specialties, and for more than thirty-five years he served as chairman of the timers at the Grand Circuit, special match races and inter-city matinees held at Glenville and North Randall tracks.

◈ ◈ ◈

Thos. Smith of Vallejo will probably race his black trotter Vallejo King 2:10½ this season unless he should sell him, which he prefers to do as he has so many other irons in the fire that he has hardly time to go to the races. Mr. Smith besides being the leading piano and music dealer of Solano, is also proprietor of a moving picture theatre, and is a busy man. Vallejo King is in good shape to lower his record this year and should be a good horse in the classes to which he is eligible. Mr. Smith still owns Gen. John B. Frisbie, sire of Vallejo King, and would like to dispose of him as there is no business for a standard bred stallion in that section. This horse is a son of McKinney and out of the good brood mare Daisy S., dam also of Vallejo Girl 2:10¼, Tom Smith 2:13¼, Prof. Heald 2:24, Little Mac 2:27½ and Santa Rosa 2:28¾. He is a full brother to Vallejo Girl and Tom Smith.

◈ ◈ ◈

A letter from C. A. Harrison states that he reached home in Seattle last week from the Indianapolis sale and that while he did not get as much for his horses as he would like to, he got all the public would pay at that particular time and was well satisfied. He states that the sale was well conducted by Mr. Kenney and his associates, that auctioneer Bain was in great form, and that if he ever has another car of good horses to sell he will surely take them to the Frank P. Kenney sale, whether it is held in Chicago, Cleveland or Indianapolis. Mr. Harrison also wrote that John B. Stetson, who sold his mare Novela 2:15¼ for $510, has engaged himself to Mr. Ed Gould of Midway Stock Farm, Kearney, Nebraska, and will not return to Salem, Oregon, for some time. Ned Neccor, of Pittsburg, made an offer of $610 for Novela immediately after the sale, and a few minutes later Marvin Childs offered the new owner $100 advance on the price, but both offers were refused by Mr. Hoover, the purchaser. Harrison says Novela would have been cheap at $2000 as she is a real trotter, a fast one and sticks to the trot. He expects her to be a good winner this year. While Mr. Harrison only received $270 for Tosora and $200 for Bonique he is well pleased and asserts that if he had a lot more horses he would take them to the big salesring. While high prices were not obtained at Indianapolis the bidding was prompt and there were plenty of buyers, facts which have done much to impress horsemen with the idea that the market is on the rise and will be better from now on.

Ima Jay 2:11¼, the unbeaten half mile track trotter of 1915, will be seen on the Grand Circuit this year. She has been named in the $5000 stake for 2:08 class trotters at Cleveland where she will meet the best in the country eligible to that race. She is by Jay McGregor, dam by Rythmic.

◈ ◈ ◈

There is a two-year-old brown filly at North Randall track which Bert Shank is trying to get going, that does a little of everything now when being trained, but that trots so fast when she does that horsemen think she may some day be a champion. She is by Peter the Great and her dam Gaidis was bred at Oakwood Park Stock Farm, California and is by Chas. Derby.

◈ ◈ ◈

Ed Geers will try Bonington 2:04¾ again this year and thinks he has the erratic son of Bellini in better shape than last year. Tom Gahagan says Geers and Bonington were the storm center of an incident at Grand Rapids last year which caused the judges to be severely censured and which caused more hot arguments probably than any other incident of the 1915 racing season. It was a stake race, with Peter Scott barred in the auction, the Cox entry, Worthy Prince, being the choice, with Murphy's great trotter eliminated from consideration. A bombshell was dropped into the ranks of the favorite players when Geers and Bonington made every post a winning one in the first heat, nosing Peter out in 2:04¾. All Bonington would have to do in the succeeding heats was to beat the flag in order to land second money, which would cash the field tickets against Worthy Prince, it being conceded that the bulldog Peter Scott would not again be headed. Before reaching the turn in the second heat Bonington broke, and, hemmed in as he was, Geers was unable to get the little horse back to his stride until after the quarter pole was passed. He beat the flag, but protests were lodged with the judges on account of the long run, and after considerable deliberation the horse was declared distanced. Up to that time the judges had been very lax in enforcing the rule in regard to breaking on the circuit, and when Bonington was penalized while others had been "getting by" with the same offense, the ruling of the officials was severely criticised, particularly by the field players. Bonington proved a very bad racing tool for Geers during the remainder of the season, due to his penchant for breaking, and at Montreal he all but ran away with the veteran trainer. His speed is unquestioned; he is a stallion which should take a record of 2:03 or better if he can be taught manners, and Geers is hoping that he has found the key to the fast but erratic stallion. The veteran trainer raced The Abbott, half brother to Bonington, to the world's record for trotters nearly two decades ago, when he was head trainer for the famous Village Farm of C. J. Hamlin.

MATINEE AT THE PARK SUNDAY.

Five races are on the card of the San Francisco-California Driving Club for tomorrow at the stadium track in Golden Gate Park and as the prospects are good for favorable weather the usual big crowd may be expected. Charles F. Silva of Sacramento is sending down a trotter and a pacer to compete with the local horses, and the classification committee has put them in where they will have a chance. The free-for-all pace, in which Bradmont, Emma M., King Pointer, Pointer Belle and Bold Harry are named, will be at mile heats, but all the other races will be at three-quarters. The entries follow:

First race, 2:25 pace—Dan Keating's Victor Pointer, S. Benson's Dible Wilkes, A. Scott's Little Dick, C. F. Silva's Stanley Quinn.

Second race, 2:15 pace—W. J. Kenney's W. J. K., J. M. Kidd's Senator H., S. Conlan's Little Jack.

Third race, free-for-all pace, mile heats—G. J. Giannini's Bradmont, W. Malough's Emma M., H. Campodonico's King Pointer, J. M. Kidd's Pointer Belle, G. J. Giannini's Bold Harry.

Fourth race, free-for-all trot—G. J. Giannini's Ella M. R., A. Combatalade's Birdeye, J. M. Wilkes' Merrylina, J. McNamara's Matawan.

Fifth race, 2:30 trot—M. Ford's Minequa, C. F. Silva's Jack, A. A. Giovanetti's Yoncalla.

CREDIT WHERE CREDIT IS DUE.

Breeder and Sportsman: Perhaps, as the breeder of Lou Child's good mare Greatness (3) 2:10¼ by Peter Wilton, it will not be amiss for me to correct an error in a statement of her breeding. In a very interesting column of news from the Rural Spirit of May 10th, republished in your last issue, Greatness' dam is given as by Mt. Vernon. It is her third dam that is by that horse. Greatness' dam is Abbie McNutward by Guy McKinney, sire of Vernon McKinney 2:01½, etc.; her second dam Lady Irene 2:14½ by Diablo 2:09¼, sire of Sir Albert S. 2:03¾ and Sir John S. 2:04½; and her third dam Geraldine 2:16½, dam of Leata J. 2:03 by Mount Vernon. Thus it will appear that the houses of McKinney and Charles Derby will insist on having something to say when credit for the speed, stamina and racing instinct of this young mare are being considered. I regard a correct statement of her blood lines quite as creditable to her as to her ancestry, and I have no doubt that your northern neighbor and all concerned will welcome the correction. Yours truly,

J. W. PENDLETON.

Oakland, Cal., May 20, 1916.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

RUN OF SALMON AT MONTEREY.

Says the Monterey Cypress: More than 12,000 salmon in two days—this is the mark set over Sunday and Monday by fishermen plying their trade in Monterey Bay. The amount, both in number and in weight, exceeds by far any previous catch recorded here in the history of the industry.

Sunday's was easily the largest single day's catch ever made here. Approximately 85 tons of salmon were handled in the packing houses and cannery. The Monterey Packing Company alone handled 51¾ tons on that day and the total catch yesterday was about 55 tons, or about 9000 fish.

Figures obtained from a reliable source show that 7008 salmon were caught for the Booth cannery Sunday and 5,029 Monday. It is estimated that the total revenue from the two days' catch will approximate $11,000.

So great was the run on Sunday that the force at the Booth cannery was unable to cope with it. Efforts were made to hire additional help but when every source had been tried 30 Chinese were finally impressed into service.

The cannery employes were busy for more than 24 hours handling the Sunday catch. It is believed along the waterfront that the big run will last as long as there is no change in the weather and until there is a change in the moon.

FOXES USED AS FERRETS.

In the quaint Derbyshire hamlet of Ambergate lives John Gaunt, a famous ratcatcher. He is nearly sixty-seven years of age, and is often to be seen over hill and in dale with his two tamed foxes tucked under his arms. He claims to be the only man in that country who has trained foxes to work with ferrets.

Whenever rats are too numerous in any of the buildings belonging to the Midland Railway it is customary for a letter and a railway pass to be sent to old John. He has been killing railway rats for 25 years. When a boy he was taught ratcatching by his father. He soon found the work lucrative and adopted it as his calling.

"When a lad I kept killing a few rats in my spare time," he says in an interview, "and I gave such satisfaction that I got recommended from one farm to another till I got known all over the country.

"Some twenty years ago I found a nest of foxes in a wood and took one home. I trained him to kill rats and broke him in to a ferret and took him up and down the country with me. Since then I've broken in about six young foxes—and fine they are to work with. They can follow a rat where a dog cannot, for, as you may know, a fox is used to getting his living in the dark."

DEER PETS OF GOLF LINKS.

Amid all the talk of the deer pest on Long Island, let it be said that Westbrook is the only metropolis golf club with deer thrown in for nothing as part of the scenery.

Up to a comparatively late date it was not an uncommon thing for a deer to put its head inside the window of the tool shop of Arthur C. Griffiths, the professional. At that the shop is less than five minutes' walk from the Great River station of the Long Island railroad.

Explanation is to be found in the fact that most of the land thereabout Islip is held by large and wealthy estates, on which no shooting was ever permitted.

In consequence, the deer became almost as tame as house pets, and when they were hungry one could almost lay hands on them.

TRAP SHOOT IN PARK AT SPOKANE.

Trapshooting that may be viewed by thousands is the aim of President Charles A. O'Connor of the Spokane Gun Club, who already is making plans to secure one of the big trapshooting tournaments for Spokane next year. Mr. O'Connor plans to install several traps in the stadium and to admit all spectators free.

"I think there is little question but that we can secure either the Pacific Coast Handicap, Northwest Sportsmen's shoot or the Pacific Coast Indians' shoot for Spokane next year," said Mr. O'Connor. "To my knowledge a trapshooting tournament has never been held in the heart of a city in the west and I think it would be a great drawing card if we are able to arrange for it.

"I have talked to Mayor Charles Fleming, who is a trapshooting enthusiast, and he says he will do everything in his power to have permission granted to us to stage the shoot in the city limits. I am sure that the park board will make no objection to our using the stadium, and we will leave it in the same condition after the shoot as it was before.

"The stadium is an ideal place for the event. With the traps facing north we will have the big Milwaukee fill for a background, and it is an excellent one. There would be no danger, as all the shot would land either in the river or hit the bank on the opposite side, and there is no traffic over there. None of the shot would carry to the top of the fill.

"If we are able to stage the event as planned Spokane will attract shooters from all over the west. The great drawback to the usual shoot is that the traps are usually several miles out of the city and are hard to get to, with the result that there are few spectators. Staging the shoot within a few minutes' walk of the center of the city will mean that we will have a capacity crowd practically all day, as trapshooting is a fascinating sport to the shooter and spectator alike.

"The Inland Empire shoot, which was staged last week, was by far the most successful ever held in this territory. We used 35,400 targets, and the most that ever before had been sprung was 26,000.

"I talked to Les Reid, Frank Riehl and Charles Dockendorf, veteran professionals, who looked over the stadium, and all said it was an ideal location."

16,500,000 FISH EGGS COLLECTED.

Approximately 16,500,000 fish eggs will have been collected by the State Fish and Game Commission when the egg-collecting season closes in the near future. The catch to date amounts to 16,015,000 eggs. This is slightly under the record of last year, owing, it is said, to the severe weather conditions which have existed this year.

Classified, the take of eggs is as follows: Steelhead trout, 6,100,000; rainbow trout, 2,500,000; Loch Leven trout, 1,725,000; Eastern brook trout, 2,275,000; German brook trout, 90,000; black spotted trout, 3,325,000.

The applications for fish to be planted in streams of the State will be received by W. H. Shebley, superintendent of fish culture for the Commission, up to and including May 31. Next season the Kearsarge hatchery and the Rae lake egg-taking station will be in full operation, which will materially increase the annual plant of fish in streams.

McCloud River Open.—Twenty miles of the McCloud river in Siskiyou county will be open to trout fishing this season for the mere asking. The McCloud River Lumber Company announces that all any angler needs to do is to come to its office in McCloud and ask for a permit. The permit gives freedom to fish anywhere on the company's holdings along the river, the only restrictions being that camp fires must be extinguished carefully.

The Shasta county supervisors last spring declared the river in that county a public highway for fishing purposes, but that is only a paper proclamation. The river in Shasta county is still closed to anglers throughout most of its course. The best fishing is in Shasta county. The poorer fishing in Siskiyou county is open to all by the grace of the McCloud Company.

DOGS GRIEVE FOR DEAD MASTER.

Oakdale.—Two valuable dogs, winners at many a bench show, are dying of a broken heart. They are the famous greyhound from the kennels of the late Father McNamara of Merced. These animals carried away the blue ribbons in many bench shows in California, although they were never exhibited by the priest himself.

Father McNamara was one of the famous priests of California, noted not only for his goodness, piety and eloquence, but for his love for children and fondness for dogs. His kennels were known the State over. The father would never sell any of his dogs. Just before his death he asked his sister to provide a home for the remaining pair of greyhounds, so that they might, like himself, die in peace.

A. B. Haslacher of Oakdale was given the dogs on his agreement to see that they were allowed their freedom on his big ranch. The greyhounds were brought here from Merced about five weeks ago, shortly after Father McNamara's death. Since then they have been slowly pining away, and now are near death, due to grief over the death of the priest. Haslacher thought that a return to their old surroundings at Merced might restore the dogs to activity, and is arranging to take them back to their old home. The dogs have been given medical attention, but do not appear to respond to any sort of treatment.

VISITOR TALKS ON HAWAIIAN FISHING.

H. Gooding Field, secretary and organizer of the Hawaii Tuna Club and the first man to catch the game fish of those islands on rod and reel, confirmed and added to the glowing reports of the royal sport offered to anglers at the mid-Pacific isles, which were made by James W. Jump and Frederick K. Burnham on their return from there some days ago.

Mr. Field, though an ardent devotee and booster of the sport of angling, and though living in a locality with this grand sport practically at his back door, asserts that until Mr. Jump's advent he (Field) had never been able to arouse much enthusiasm in rod and reel angling.

That they have both been successful and in no small degree is attested by the fact that, following Mr. Jump's lead, sportsmen of the archipelago have put up for competition 17 silver trophy cups, to be awarded for meritorious catches made on rod and reel.

Though the fishing varies to some extent with the seasons as to the species caught, the avidity with which they take the bait is unvarying throughout the year.

"We have three kinds of tuna," Mr. Field stated while on a visit to California, "the bluefiin, yellowfin and longfin, the latter having elongated dorsal and anal fins and being distinctly different from the albicore, which does not inhabit our waters. The bluefins and yellowfins are taken as large as 300 pounds and the longfins up to 60.

"The swordfish (marlin) run up to 837 pounds and are taken on hand-lines solely, as in fact are all of the Hawaiian fish, the sharp, jagged coral reefs being so close together as to prohibit the use of nets, and none having as yet been taken on rod and reel.

"There are nine species of the ulua. These run all the way up to the 200 pounds in weight, are desperate fighters, and resemble a giant pompano in appearance. They are caught inshore and when hooked, run to the jagged coral reefs, often cutting the angler's line.

"The Kahala, or Hawaiian yellowtail, abounds offshore, is a fierce fighter and is caught weighing as high as 150 pounds.

"The ono, which is also caught in the Philippines under the name of Tanguingue, is a speedy fish, striking hard, as does also the dolphin, which is caught up to six feet in length.

"Great schools of Kawahawa run in the lagoons, and are much sought by the natives, who eat them raw. The latter are very bloody, shaped like a tuna, marked like a mackerel and run up to 30 pounds in weight."

Mr. Field will visit Catalina while here, as Mr. Jump's guest, and try his hand at Southern California's fishing.

NEWS OF KENNEL DOINGS.

The Marin County Kennel Club will again hold its annual show on Decoration Day—May 31st—at Mill Valley. This is a one day, open air show and is always a pleasant outing for both exhibitors and dogs. This year Chris Shuttleworth is show secretary and superintendent and Sam Crabtree will be all rounder. It will not be surprising if the club benches—or stakes—more actual dogs here than were present at San Francisco. The judge will certainly prove a drawing card. Next in line comes Oakland and Alameda County Kennel Club in June. The dates definitely decided upon are the 15th to the 17th. This year the club proposes to include the dogs with a general pet-stock show and from a gate receipt point of view the idea is good. The dogs will be benched as before in the Auditorium and entirely separate.

‡ ‡ ‡

Ch. Midland Royal has been purchased by the Hy-Born Kennels, Fresno, Cal., and will make a strong addition to the now famous lot of stud Airedales owned in California at the present time.

‡ ‡ ‡

Messrs G. E. Clark and Leo Desics, both of Seattle, Wash., have recently bred bitches to Mr. Jack Babb's good young dog, Briarcrest Tilicum, that did so well at the late Seattle show.

‡ ‡ ‡

Mr. L. P. Olker, Chico, Cal., has purchased Tintern Mercury from James Young and expects to show him shortly. Mr. Olker has got together a great lot of bitches and should produce something this year that will be heard from.

‡ ‡ ‡

The Oakland and Alameda County Kennel Club will hold their annual bench show at the Civic Auditorium, Oakland, Cal., on June 15, 16 and 17. The show will be held in conjunction with the local Pet Stock Association. We wish the club luck and hope that success will crown their efforts to give the fancy a first-class show.

PORTLAND RODSTERS TURN OUT.

The Deschutes was lined with Portland fishermen last week, a directory of the bunch indicating that the medical and dental professions suddenly transported themselves from the metropolis to the waterside. The Deschutes is clearing rapidly, and in about two weeks the best fishing of the season will be in order, for then the millions of salmon flies will have ceased to drop conveniently into the stream for the benefit of the hungry trout.

Most of the fish caught averaged from 8 to 12 inches for those who used flies, while those who used spinners all day caught some around 16 and 18 inches.

Among those who were seen along the river were the following doctors: C. E. Kistner, A. J. Brock, Davis, San Slocum, E. Dewitt Connell, Woods, Dubois, Erskine Wood, J. Martin Watson, James Honeyman and Durkee.

California-Nevada State Shoots To Open

CHAMPIONSHIP EVENTS START AT SAN JOSE TOMORROW

San Jose, Cal.—The great California and Nevada State Shoot will be held on the grounds of the San Jose Blue Rock Club on May 28, 29, 30 and 31. May 28 will be practice day in the morning and in the afternoon the O. N. Ford medal championship of California-Nevada, at 50 singles, will be held. This medal is now held by H. Lorenson, of Newman, Cal. At 3 p. m. the O. N. Ford medal championship of California-Nevada at 25 pair will be shot. This medal is at present held by O. N. Ford of San Jose.

On May 29th there will be ten events at 20 targets with $30 in cash added to each event, or $3 for the day.

On May 30th there will be eight events at 25 targets, with $35 added to each event. On this day eight beautiful trophies will be shot for.

On May 31st, in the morning, five events at 20 targets with $30 added to each event; at 1 p. m. the California-Nevada Interstate Championship will be shot; 100 targets, 16 yards, $100 added and 7 Interstate trophies to the seven high guns and $50 to the winner, providing he also goes to the G. A. H.

In the hundred the ladies will shoot for the championship of the Pacific Coast, and Mr. Ford will award a handsome trophy to the winner. All events divided four moneys on the Rose system. There will be a jitney trap running at all times.

The San Jose Blue Rock Club grounds are located just two miles from the center of San Jose, on 35th street car service, every thirty minutes from 6 to 6, direct to the grounds for 5 cents. Four automatic traps will be used. Targets are thrown north and northeast, the sun at all times being at the shooters' backs and shining on target. The flight of the targets is over a field of grass and clover. A sky background, the great Lick Observatory in full view, makes a most ideal place to shoot.

George H. Anderson is president of the San Jose Blue Rock Club and vice-president of the California-Nevada State Association. George, as he is better known, has been in the trap game over thirty years. He was at one time one of the best live bird shots on the Pacific Coast. In 1915 he won the Double Championship of Santa Clara county and he won the first of the new amateur medals on the Pacific Coast on 415 out of 500.

C. R. Arques, vice-president of the San Jose club, fifteen years ago used to shoot a good clip, but quit for the past ten years and has just started again and will bear watching on the firing line. He won the second amateur medal on 434 out of 500.

O. N. Ford, formerly of Iowa, now secretary and manager of the San Jose Blue Rock Club, came to California in 1912 and started this club. At that time there was not a blue rock or a trap load in San Jose, nor had there been for several years. Mr. Ford has worked hard and has one of the best grounds and best equipped clubs on the Coast, and he will do all in his power to make the 1916 California-Nevada State Shoot the biggest ever held in California if not on the Pacific Coast.

Skykomish Club.—The Skykomish Gun Club held a very interesting shoot on May 14th, the participants and scores being—

Williams 92, Henry 87, Kirkland 89, Fournier 83, Farr 73, Bradburn 36, Dean 13x25, Rohde 17x25.

Williams shot the high score in the 100-target program, with Kirkland running second, with 89.

Oregon State Shoot.—P. H. O'Brien, of Portland, will represent Oregon at the Grand American Handicap at St. Louis this year, due to his winning the Oregon state trapshooting championship at Albany, on May 16. O'Brien broke 98 out of 100 birds. In addition to winning the title, O'Brien captured the Honeyman diamond, and had the high amateur record for the shoot, with a record of 384 out of 400 targets. O'Brien also ranked second in the 150-bird shoot Monday, and was third in the same event the following day.

H. E. Poston of San Francisco and L. H. Reid of Seattle, both professionals, tied for the high score of the shoot, with 387 out of 400 targets. James P. Bull was third with 378 and P. J. Holohan was next in line with 375.

Abner Blair of Portland was second high among the amateurs with a score of 382 and Frank Troeh, of Vancouver, Wash., was third with 378. Frank Templeton of Portland was fourth with 374.

L. H. Reid of Seattle made the high run of the shoot, going 141 shots without dropping a bird. Frank Troeh made high run among the amateurs, with a string of 131.

Abner Blair of Portland was second to O'Brien in the state championship event, with 97. Mark Siddall of Salem was third, with 96, and Charles Leith of Woodburn was fourth, with 94. J. W. Drinker of Halsey and Frank Templeton and J. W. Seavey, of Portland, tied for fifth place with 92. In the shootoff for the tie, Drinker and Templeton each broke 20 and Seavey took seventh place by breaking 18. Drinker win in the next shootoff by breaking 20 straight again, while Templeton broke 19.

In the 150-bird event, the scores follow:—

Professional—First, L. H. Reid ,Seattle, 148; second, H. E. Poston, San Francisco, -42; third, P. J. Holohan, Portland, and C. J. Schilling, Portland, tied 140; fourth, James W. Bull, Portland, and J. E. Reid, Portland, tied 138; fifth, E. B. Morris, Portland, 136.

Amateurs—Forst, A. Blair, Portland, 144; second, F. E. Doedele, Albany, and Frank Templeton, Portland, tied, 142; fourth, W. W. McCornack, Eugene, and Mark Siddall, Salem, tied, 141; fifth, Frank Van Atta, Portland, 139.

In a four-team shoot Portland won with 95; Salem and Woodburn tied for second, 89; Albany fourth, 87.

Only four teams contested. The score of the winning team was: P. H. O'Brien 24, James W. Seavey 24, A. Blair 24, Frank Templeton 23.

In the 150-target handicap match the summary was:

Amateurs—First, Frank Troeh Vancouver, Wash., 146; second, P. H. O'Brien, Portland, 144; tie for third between A. Blair, Portland ,and Elmer Nickerson Albany, 141; fifth, Frank Templeton, Portland, 139.

Professional—First, H. E. Poston, San Francisco, 147; tie for second between P. J. Holohan and James Bull, both of Portland, 144; fourth, L. H. Reid, Seattle, 143; fifth, C. J. Schilling, Portland, 138.

In the Oregon trapshooting contests held here Mrs. Ada Schilling of Portland, one of the two women who participated, was among the honor winners, tieing for seventh place with a score of 136 out of a possible 150. Miss Gladys Reid, the other woman in the tournament, broke 104.

It was an ideal day for the tournament and a big crowd of spectators all day watched the shooting at the grounds of the Albany Gun Club at Hackleman's Grove, just southeast of Albany.

In the 50-target match for the Honeyman diemond trophy, P. H. O'Brien, Frank Templeton and James W. Seavey, all of Portland, tied for first place with 46 birds each. Al Seguin of Portland and E. R. Seeley of Medford tied for second with 45. In shooting off the tie for the trophy O'Brien won by breaking 25 straight, Templeton scoring 21 and Seavey 20.

San Rafael Club.—The newly-organized San Rafael Elks' Club was busy at the traps on Sunday as part of the San Rafael carnival program. A number of San Francisco professionals were over to encourage the beginners in the game. No official score was kept but the following breaks were registered on 50 targets:—

Dr. R. G. Dufficy 33, Dr. Barr 39, R. Johnson 25 Ed Butler 39, J. M. Foge 16, *W. R. Ellis 37, J. B. Bauer 32, C. J. Nongues 13, *O. N. Jones 37, *W. S. Stadtfeld 34, H. Van Leuver (20-gauge) 30, *M. O. Feudner 43, *R. C. Reed 38, *J. W. F. Moore 16, *A. C. Cook 45, P. Goblet 31.

At 25 targets: H. G. Ridgeway 9, T. H. Smith 13, I. Arata 11, R. Mecchi 10.

SQUAD TO BE AT THE SAN JOSE TRAPS TOMORROW

A. G. Flickinger of Vallejo is in the foreground and right down the line are Dick Reed, Harry Ogilvie of Lindsay, O. N. Ford and W. J. McKagney. They are all fine shots and need watching. In the background looking on are shown O. N. Jones in white shirt, Len Hawxhurst and J. W. Considine.

COMING REGISTERED TOURNAMENTS.

California.

San Jose, May 28, 29, 30—California-Nevada Association Tournament, San Jose Blue Rock Club, O. N. Ford, Secretary.

Los Angeles, July 3, 4—Vernon Gun Club.

Eureka, July 4—Eureka Blue Rock Club, H. A. Hine, President.

Oregon.

Portland, June 5, 6, 7—Sportsmen's Association of the Northwest Tournament, under the auspices of the Portland Gun Club, Frank Templeton, Secretary.

Portland, Sept. 12, 13, 14—Pacific Coast Handicap.

Washington.

Seattle, July 4—"Old Policy," Green Lake Gun Club, W. C. Smith, Secretary

Tacoma, July 18, 19, 20, 21—Pacific Indians, F. C. Riehl, Secretary.

Seattle Association.—The weather undoubtedly had a lot to do with the scores at Harbor Island on May 14th, as it was ideal for shooting and the shooters were bunched together in a lot of ninety and ninety-five percent performances. The high score in the regular 50-target program was 48 and was divided between three shooters, Matt Grossman, Fred Call and John Ruppe. Hugh Fleming ranked second high with a score of forty-seven. In the one hundred bird program, C. E. McKelvey stood high with a score of ninety-six. He shot straight through sixty-six of them without a miss. Hugh Fleming shot next score to this with ninety-five to his credit.

The race for the McKelvey class trophies is getting rather close and but for a sprint in the B class the cup for same would likely hove gone to Searle. A new contender in the A class, Fred Call, took the high position with Matt Grossman in this class and these two shooters will have to shoot off the tie or count no score. Class B offered the exciting competition of the day. R. S. Searle had stood high man for the last two times and the shooters in that class were after his scalp. John Ruppe stood high in this class with his forty-eight score. J. H. Wilman was the only contestant in the C class. "Bill" Schilpin stood high in class D, this making his second high standing.

In a special squad shooting event from the 20-yard line, Fred Landwehr and C. E. McKelvey tied with scores of sixty even out of seventy-five targets.

R. H. Baldwin, an old-time trapshooter, was on the firing line for the first time this season.

Complete arrangements have been made for the State Tournament which is to be held on the Harbor Island grounds. Communications from outside points indicate a record breaking crowd attending this event.

Scores, May 14, at 50 targets—

	15	15	20	Ttl
Matt Grossman	15	14	19	48
Fred Call	15	14	19	48
John Ruppe	14	14	20	48
Hugh Fleming	14	15	18	47
R. Kinzer	13	14	19	46
C. E. McKelvey	12	15	19	46
R. S. Searle	14	13	18	45
L. S. Barnes	14	13	17	44
Deskin Reid	11	15	16	42
F. Landwehr	13	12	17	42
A. Drake	12	14	15	41
Dr. Winningham	11	14	16	41
J. H. Hopkins	10	12	19	41
Wm. Schilpin	11	13	17	41
W. B. Taft	12	12	16	40
B. J. Perkinson	11	12	16	39
J. Wilman	11	12	16	39
J. W. Geltz	10	12	16	38
R. H. Baldwin	10	11	14	35
M. James	10	10	14	34
A. E. Hall	5	5	7	17

At 100 targets—

	10	15	25	50	Ttl
C. E. McKelvey	10	15	25	46	96
H. Fleming	10	14	24	47	95
Matt Grossman	9	15	22	48	94
John Ruppe	10	14	22	48	94
R. Kinzer	9	14	22	46	91
L. S. Barnes	10	14	21	44	89
Fred Landwehr	10	14	23	42	89
W. B. Taft	8	14	23	40	85
J. H. Hopkins	9	12	22	41	84
Deskin Reid	8	12	21	42	83
R. H. Baldwin	9	12	17	35	73

C. W. Bandy did not shoot in the regular program.

E. A. FRY.

Sportsmen's Row

Are you going to attend the California-Nevada tournament at San Jose? Practice day is scheduled for Sunday and there will be events on Monday, Tuesday and Wednesday. O. N. Ford expects to receive an entry of 150 shooters.

* * *

John W. Considine did himself proud on Saturday. He has been out of the trapshooting game for seventeen years until lately but managed to land 182. He got 96 out of his last 100.

* * * *

Miss Meyers broke her gun on the first target. She tried to secure another annihilator of the blue rocks but it did not work and she was forced to withdraw from the competition.

* * * *

Dr. McGettigan takes a deal of pleasure in the sport alluring. He is proving a very promising shot, too, and makes his squad step some to beat him out.

* * *

R. J. Walsh from San Diego shot below his form. He ran into a couple of bad spots that pulled rown his score.

* * *

Frederick K. Burnham of Martinez gets a lot of fun out of a tournament. He not only makes the smoke fly but creates many a riot when the boys are talking around the clubhouse.

* * *

Secretary Clarence A. Haight ran out the events with the same thoroughness that has characterized his work all season. He picked the right man for the right job when he selected L. A. Lodge for squad hustler. Wise judges commented favorably on the selection.

* * *

H. Lorenson of Newman reports that the club of his city is making preparations to stage a shoot in the near future. In Lorenson Newman has a shot who can hold up his own with the best on the Coast.

* * *

Barney Worthen did some great shooting. In only one frame did he fall below 19.

* * * *

Permission to care for two fawns has been asked by Peter Ramatici of Petaluma, the application being made to the State Fish and Game Commission. Deputy Fish and Game Commissioner Henry Lencioni went to the Ramatici ranch and investigated the request. The mother deer, it was found, had given birth to the fawns and then had been chased away by dogs, leaving her little ones behind her. It is probable that the request will be granted.

* * * *

"It is my belief, and I venture to assert it," declared the lecturer, raising his voice, "that there isn't a man in this audience who has ever done anything to prevent the destruction of our vast forests." A rather timid-looking man quietly arose in the rear of the hall and said: "I—er—I've shot woodpeckers."

* * * *

C. M. Beer was high with 143x150 in the Rockford, Ill., Gun Club's shoot on May 9th.

* * * *

E. E. Watson, Ed Apperson and E. F. Kitelsman tied with 143x150 in the shoot of the Elwood, Ind., club on May 9th. C. A. Young led the professionals with 149x150.

* * * *

At the Topeka, Kans., club's event on May 11th Soldan won with 137x150. Gross topped the professionals, 139x150.

* * * *

Excellent sport is being enjoyed by the light tackle "rodsters" on Big Lagoon, Humboldt county. The big steelhead are very much in evidence. Large catches are being made daily although a little early, as the best of the season here is usually in June, yet those who are so lucky as to be on the Lagoon are taking steelhead weighing from nine to twelve pounds, with a half-pounder now and again for good measure.

* * * *

Magpie day among the hunters of the Lewiston valley, Idaho, was celebrated last week, and seven automobiles carried 40 city sportsmen to various sections of the valley, where they were joined by 20 more shooters of the vicinity and spent the day in shooting magpies. No attempt was made to keep a tally of the result of the day's shooting, but large numbers of birds were killed.

* * * *

Wallace, Idaho, Club.—Thirteen members of the local gun club laced the Nine Mile traps May 14th in the regular weekly shoot. Gilmore finished with high score in the 50-bird event with 43, closely followed by McConkey and Turner with 42 each.

Gilmore and Martin tied for the club goat which was forfeited to Gilmore on Martin's failure to show up for the miss and out contest. The remaining scores in the 50-bird event: Scott 39, Heitfeld 26, St. Jean 36, D. Johnson 29, Leib 34, Venable 40, C. M. Johnson 41, Martin 37, Ebbley 39, Howarth 31.

* * *

Although it rained both days of the Chappell, Neb., club's shoot on May 12th and 13th, R. J. Starkey had the creditable high score of 363 out of 400. Rush Rzee, a pro., got 385 out of 400.

Salt Lake Club.—May 14th proved the final day in the trap shoot for the handicap trophy, which was offered for the shooter getting his name on it three times. The winner was Mitchell. The day was windy and disagreeable and the targets difficult. The scores:

	Bke.	Hdcp.	Targ.
Cummings	46	Pro.	46
Bishop	40	4	44
Mitchell	44	6	50
Bray	38	8	46
Irvine	38	..	38
Holohan	47	Pro.	47
Fryrear	22	..	22
Bain	39	3	42
Klein	41	2	43
Johnston	38	7	45
Tingey	40	1	41
Fisher	34	8	42

Tacoma Club.—The Tacoma Gun Club held is semi-monthly shoot at Manito May 14. Griffin won the Mellinger medal after a shoot-off with Baker and Young. Dague won the Majestic cafe trophy. Dague, A. Riehl and J. Cooper all tied for high average on the Everding diamond pin. Griffin, Bales, A. Riehl, Young and Baker tied for high average on the Dupont trophy. Dague and Griffin tied for high average on the Hercules trophy. Young won the White Flyer fob and Dague won the Challenge cup after a shoot-off with Griffin, Smith and Young. Dague and A. Riehl each won a club silver spoon for breaking 25 straight.

Following were the scores made for the Majestic Cafe trophy at 100 birds:—

	Bke.	Hdcp.	Targ.
Dague	92	6	98
Griqin	90	4	94
Eisenbies	91	None	91
J. Cooper	91	2	93
Bales	89	3	92
A. Riehl	87	3	90
Young	85	6	91
E. W. Cooper	83	6	89
Baker	80	11	91
Mellinger	77	15	92
Smith	77	10	87

Following scores made on Mellinger medal out of 50 birds:—

	Bke.	Hdcp.	Targ.
Young	46	4	50
Griffin	45	5	50
Baker	43	7	50
Bales	45	3	48
Smith	42	6	48
Eisenbies	47	1	48
Mellinger	40	7	47
J. Cooper	44	2	46
Dague	43	3	46
E. W. Cooper	43	3	46
A. Riehl	45	None	45
Hartley	26	16	42

Vernon Club.—Bob Bole, who handles a pump gun well, tied with A. Brawner in the George T. Cline handicap clay bird shoot for the diamond medal put up at the Vernon Gun Club Sunday, at 50 birds, distance handicaps. Their scores were 49x50. In the shoot-off Bole broke 23x25 and Brawner 24x25, giving Brawner his first leg on the prize.

A clean score was made in the Wm. H. Hoegee handicap by C. P. Manderville. He broke 50 straight. The 20-gauge competition resulted in a tie between C. W. Fish and Billy Wilshire, each with 21x25.

Following are the complete results:

	Hdcp.	Cline trophy 50	Hoegee trophy 50	20-ga. trophy 25
Smith	16	39	40	..
Reid	16	45	43	..

Los Angeles Club.—O. Evans, firing from the 17-yard mark in the Diamond trophy handicap, staged Sunday at the Los Angeles Gun Club, was the winner by breaking forty-seven birds out of fifty.

Owen Council, the shooting shark from the Dyas store, and Louis Mellus tied for second best score in the diamond pin shoot, each with a 46x50 score.

The scores follow:—

Shooter.	Hdcp.	Score
Pfirrmann	21	41x50
Mitchell	21	44x50
C. Vories	20	43x50
Nichols	20	44x50
Mullen	20	45x50
H. Cline	18	42x50
Rossbach	18	42x50
Council	18	46x50
F. H. Nichols	19	42x50

Butte 31, W. D. Melville 23, M. A. Millard 40, Mrs. J. E. Reid 9x25, Mrs. H. E. Sargent 1x25, B. G. Adams 22x25, S. M. Steel 19x25.

OREGON PROTECTS FUR-BEARING MAMMALS.

Oregon in 1913 established a trapper's license law which requires every trapper who traps anywhere except on his own property, to procure a license costing one dollar. The fur-bearing mammals protected are the otter, mink, fisher, marten and musk-rat. The open season is from November 1 to February 28. The flesh of game birds or mammals is prohibited as bait for traps. As a return to the trapper for his license fee the Fish and Game Commission is carrying on investigations which are of help to the trapper and is also accumulating data as to the number of fur-bearing mammals taken each year. The latter information is obtained by requiring each trapper to make a full report as to the fur-bearing mammals taken each year. The latter information is obtained by requiring each trapper to make a full report as to the fur-bearing mammals caught and killed during the open season. Despite the fact that certain raiders of the poultry yard are given protection as fur-bearers, the proviso that nothing shall prevent any person from protecting his own premises from the depredations of fur-bearing animals appears to have secured popularity for this law. The State Biologist of Oregon recently stated that there is no opposition to this law by trappers, because they themselves advocated its adoption.

Each trapper now feels he has an equal chance at the fur-bearers, for summer trapping by the amateur has been abolished.

A law such as this should be considered for this State. California is wasting a valuable resource by a faulty administration of her fur-bearing mammals. Theblack bear, mink, river otter, fisher, and red fox are among the fur-bearers which should be protected during the summer months when the fur is of no value; and a policy which will allow of a checking up of this resource will help save it as a source of recreation and profit for the State.—Fish and Game Commission.

CALIFORNIA'S PREHISTORIC GAME.

[By Harold C. Bryant.]

A visit to the Museum of History, Science and Art in Los Angeles impresses us with the marvelous forms of animal life in prehistoric times. Imagine yourself in a region in which the elephant, mastodon and ground sloth tracked the wilds. Think of the exciting sport of hunting the saber-toothed tiger, cave bear, wolf and other carnivores once so abundant in this State.

Authentic evidence of the occurrence of these forms is furnished by recent finds in the oil fields, which have proven a great storehouse for prehistoric fauna of this State. Complete skeletons of all of the above mammals have been dug from the asphaltum of Rancho la Brea, near Los Angeles. Bones are piled thirty or more feet high and there seems to be no end to new discoveries. The teeth of the mammals have been wonderfully preserved and in many instances not a bone is found broken.

We are led to conjecture why these many forms of life are now extinct; they were evidently not exterminated at the hands of man, and yet they are gone from the earth as completely as are those species which owe their extinction to the invention of firearms. The ebb and flow of life on the earth form an enigma which all our years of research and study have but slightly cleared up. This fact should drive us to work the harder to decipher some of the laws which govern animal life.

Nor should a knowledge that many forms of life have become extinct from natural causes lead us to think that living species are doomed to extinction and that the toll taken by man can make but little difference; for whereas, under natural conditions, the death of a species may have taken thousands of years, man is able to exterminate them entirely in fifty. Hence, we should remember that man is drawing upon the supply of wild life faster than the reservoir can be filled. The lifetime of a species is governed by a higher power than our own, and if we accelerate by artificial means the forces leading toward extinction, future generations will suffer for our thoughtlessness.

Golden Gate Club.—Forty shooters, representing San Diego, Fresno, San Jose, Newman, Modesto and other points, turned out on Saturday for the registered tournament of the Golden Gate Club at Alameda. The weather was ideal and the competition was keen.

Barney Worthen was returned high amateur with a score of 192 out of the 200 targets shot at. O. N. Ford of San Jose was second with 190 and H. Lorenson was third with 189. Dick Reed annexed the professional honors with 193 and Fred Willett and Len Hawxhurst were close up with 191 and 190 respectively. Bill Ellis was in a happy mood to get 184. The scores were as follows:—

Events	20	20	20	20	20	20	20	20	20	20—Ttl

On Sunday the Golden Gate Club held its monthly shoot and sixty-five shots faced the traps. W. E. Cooley and E. Holle distinguished themselves by busting fifty straight and tied for first place. Andy Flickinger and H. Brickell were close behind with 48 out of 50. The scores for the day ran high. The results were as follows:—

R. McGill 47, T. W. Parsons 37, Col. Dorsey 41, H. Stelling 46, A. M. Gearhart 26, Dr. Topham 43, Geo. Thomas 41, W. G. Becktell 46, H. C. Peet 36, W. E. Cooley 50, J. H. Willett 32, T. D. Green Lake Club.—While the weather on May 14th had a tendency to drive many trapshooters to the banks of their favorite fishing streams, quite a crowd found their way out to the traps of the Green Lake Gun Club for the regular weekly shoot.

Dr. King celebrated his return to the shooting game by breaking forty-eight out of his fifty, and incidentally turned in the highest score of the day. W. H. Carsten, shooting in his usual good form, tied with "Dusty" Rhodes, professional, for second place, with forty-seven. E. G. Johnson, who has quite a reputation as a rifle and revolver shot, took his first fling at "the sport alluring" and succeeded in breaking thirty-one.

Don R. Baker challenged all comers to a contest at twenty doubles, and made good by breaking twenty, being tied by Carsten.

Eleven shooters took part in the special event Saturday afternoon, C. E. McKelvey heading the list with forty-five out of fifty. Judge John B. Gordon, who is getting to be quite a "bug," broke forty-nine out of his fifty Saturday. The scores, at 50 targets:

Dr. King 48, W. H. Carsten 47, *D. Rhodes 47, Hi Follrich 45, C. C. Ward 45, George Edling 45, C. E. McKelvey 45, Don R. Baker 44, George B. Baker 43, Dr. M. A. Winningham 42, W. C. Smith 42, Fred Pries 41, Judge J. B. Gordon 41, L. S. Barnes 41, Dr. R. V. Mills 40, Dr. J. F. Hill 40, Jack Landon 40, M. A. Rosenfield 39, E. K. Van Vleck 38, Howard Cosgrove 37, Dr. A. B. Kidd 37, J. W. Geltz 37, S. A. Martin 35, T. B. Beck 35, George O. Colwell 35, J. C. Wright 34, F. K. Kaynor 34, Harry Muhl 32, George D. Horst 31, E. G. Johnson 31, H. N. Carver 30, R. W. Brehm 28, Dr. S. W. Case 27, C. W. Bandy 21, R. B. Newton 19, P. N. Beal 12, C. Wright 10, W. H. Giezentanner 8. (*Professional.)

Scores in the doubles: Don R. Baker 20, W. H. Carsten 20, George B. Baker 18, D. Rhodes 18, Dr. Winningham 12, and Harry Muhl, 12. F. K. Kaynor and R. W. Brehm shot 20-gauge guns.

Trade Notes.—One of the South's prominent shooters, Mr. F. P. Fitzgerald, Clarksdale, Miss., won the Mississippi State Championship at Greenville on May 5th, with a score of 99x100, using Nitro Club shells. This shoot is the most important trap event of the season in Mississippi, and it attracts the attention of the biggest men in the Southern sporting circles. Otto Wineman, of Greenville, was second with 98x100, and Henry Fitzgerald, of Clarksdale, third, scoring 97x100, both using Arrow shells. A feature of this shoot was the three-man team race for the Lake to Gulf Championship. The winning team, all three members of which shot Remington U. M. C. shells, was composed of Messrs. H. N. Bellenger, J. B. Goodbon and Geo. Schmid.

C. C. Watts won a two-day registered shoot held recently over the traps of the Medford (Okla.) Gun Club. Shooting Nitro Club shells he scored 280x300.

W. H. Stump, and the Rev. P. B. Jenkins, both shooting a Remington gun and Nitro Clubs, won first and second places respectively with scores of 95x100 and 93x100, at a recent shoot held by the Lake Park Gun Club, of Milwaukee, Wis.

Mr. H. C. Hirschy tied for high professional average at Eagle Grove, Iowa, May 2-3, 275x300, using Peters shells.

High professional average at Fresno, Cal., April 29, was won by Mr. L. S. Hawxhurst, using Peters shells, 133x150.

High general average at South Bend, Ind., May 6, was won by Mr. C. A. Young, 148x150, using Peters shells. Mr. J. Graham tied for second, 146, also with the "P" brand ammunition. Mr. Young had an unfinished run of 113.

Regulations for Migratory Birds

U. S. GOVERNMENT SETS FORTH PROTECTIVE MEASURES

Pursuant to the provision of the act of March 4, 1913, authorizing and directing the Department of Agriculture to adopt suitable regulations prescribing and fixing closed seasons for migratory birds (37 Stat., 847), having due regard to zones of temperature, breeding habits, and times and lines of migratory flight, the Department of Agriculture has prepared and hereby makes public, for examination and consideration before final adoption, the following regulations:

Regulation 1.—Definitions.

For the purposes of those regulations the following shall be considered migratory game birds:

(a) Anatidae or waterfowl, including brant, wild ducks, geese, and swans.

(b) Guridae or cranes, including little brown, sandhill, and whooping cranes.

(c) Rallidae or rails, including coots, gallimules, and sora and other rails.

(d) Limicolae or shore birds, including avocets, curlew, dowitchers, godwits, knots, oyster catchers, phalaropes, plover, sandpipers, snipe, stilts, surf birds, turnstones, willet, woodcock, and yellowlegs.

(e) Columbidae or pigeons, including doves and wild pigeons.

For the purposes of these regulations the following shall be considered migratory insectivorous birds:

(f) Bobolinks, catbirds, chickadees, cuckoos, flickers, flycatchers, grosbeaks, humming birds, kinglets, martins, meadowlarks, nighthawks or bull bats, nuthatches, orioles, robins, shrikes, swallows, swifts, tanagers, titmice, thrushes, vireos, warblers, waxwings, whipporwills, woodpeckers, and wrens, and all other perching birds which feed entirely or chiefly on insects.

Regulation 2.—Closed Season at Night.

A daily closed season on all migratory game and insectivorous birds shall extend from sunset to sunrise.

Regulation 3.—Closed Season on Insectivorous Birds.

A closed season on migratory insectivorous birds shall continue throughout each year, except that the closed season on reedbirds or ricebirds in New Jersey, Pennsylvania, Delaware, Maryland, the District of Columbia, Virginia, North Carolina, and South Carolina shall commence November 1 and end August 31, next following, both dates inclusive: Provided, That nothing in this or any other of these regulations shall be construed to prevent the issue of permits for collecting birds for scientific purposes in accordance with the laws and regulations in force in the respective States and Territories and the District of Columbia.

Regulation 4.—Closed Seasons on Certain Game Birds.

A closed season shall continue until September 1, 1918, on the following migratory game birds: Band-tailed pigeons, little brown, sandhill, and whooping cranes, wood ducks, swans, curlew, willet, and all shore birds except the black-breasted and golden plover, Wilson or jacksnipe, woodcock, and the greater and lesser yellowlegs.

A closed season shall also continue until September 1, 1918, on rails in California and Vermont and on woodcock in Illinois and Missouri.

Regulation 5.—Zones.

The following zones for the protection of migratory game and insectivorous birds are hereby established.

ZONE No. 1, the breeding zone comprising the States of Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, Ohio, Indiana, Illinois, Kentucky, West Virginia, Michigan, Wisconsin, Minnesota, Iowa, North Dakota, South Dakota, Nebraska, Kansas, Missouri, Colorado, Wyoming, Montana, Idaho, Utah, Nevada, Oregon, and Washington—31 states.

ZONE No. 2, the wintering zone comprising the States of Delaware, Maryland, District of Columbia, Virginia, North Carolina, South Carolina, Georgia, Florida, Alabama, Mississippi, Tennessee, Arkansas, Louisiana, Texas, Oklahoma, New Mexico, Arizona, and California—17 States, and the District of Columbia.

Regulation 6.—Construction.

For the purposes of regulations 7 and 8 each period of time therein prescribed as a closed season shall be construed to include the first and last day thereof.

Regulation 7.—Closed Seasons in Zone No. 1.

Waterfowl.—The closed season on waterfowl, including coots and gallinules, shall be between December 21 and September 6 next following, except as follows:

Exceptions: In Maine, New Hampshire, Vermont, New York (except Long Island), Ohio, Michigan, Indiana, Kentucky, and West Virginia the closed season shall be between January 1 and September 15;

In Massachusetts, Rhode Island, Connecticut, Long Island, New Jersey, Pennsylvania, Washington, Oregon, Utah, and Nevada the closed season shall be between January 16 and September 30; and

In Illinois, Iowa, Nebraska, Kansas, and Missouri the closed season shall be between March 11 and September 15 and between November 16 and February 9.

Rails.—The closed season on sora and other rails, excluding coots and gallinules, shall be between December 1 and August 31 next following, except as follows:

Exceptions: In Vermont the closed season shall continue until the open season in 1918.

Shore Birds.—The closed season on black-breasted and golden plover and greater and lesser yellowlegs shall be between December 1 and August 15 next following, except as follows:

Exceptions: In Utah the closed season shall continue until the open season in 1918.

Jacksnipe.—The closed season on jacksnipe or Wilson snipe shall be between December 16 and September 15 next following.

Woodcock.—The closed season on woodcock shall be between December 1 and September 30 next following, except as follows:

Exceptions: In Illinois and Missouri the closed season shall continue until the open season in 1918.

Regulation 8.—Closed Seasons in Zone 2.

Waterfowl.—The closed season on waterfowl, including coots and gallinules, shall be between February 1 and October 14 next following, except as follows:

Exceptions: In Alabama, Arkansas, District of Columbia, Delaware, Florida, Georgia, Louisiana, Maryland, Mississippi, North Carolina, South Carolina, Tennessee, and Virginia the closed season shall be between February 1 and October 31 next following.

Rails.—The closed season on sora and other rails, excluding coots and gallinules, shall be between December 1 and August 31 next following, except as follows:

Exceptions: In Louisiana the closed season shall be between February 1 and October 31; and

In California the closed season shall continue until the open season in 1918.

Shorebirds.—The closed season on black-breasted and golden plover and greater and lesser yellowlegs shall be between December 1 and August 15 next following.

Jacksnipe.—The closed season on jacksnipe or Wilson snipe shall be between February 1 and October 31 next following.

Woodcock.—The closed season on woodcock shall be between January 1 and October 31 next following.

Regulation 9.—Hearings.

Persons recommending changes in the regulations or desiring to submit evidence in person or by attorneys as to the necessity for such changes should make application to the Secretary of Agriculture. Hearings will be arranged and due notice thereof given by publication or otherwise as may be deemed appropriate. Persons recommending changes should be prepared to show the necessity for such action and to submit evidence other than that based on reasons of personal convenience or a desire to kill game during a longer open season.

Warranted to give satisfaction.

GOMBAULT'S
CAUSTIC BALSAM

A safe, speedy and positive cure for

Curb, Splint, Sweeny, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable.

Every bottle of Caustic Balsam sold is Warranted to give satisfaction. Price $1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

FAMOUS TROUT STREAMS

Steelhead fishing in the Big Lagoon, Humboldt County, is now in full swing. The fish this year average from nine to twelve pounds.

Do not overlook the Eel River Fly Fishing for the Big Steelhead from July until October in the famous Greigs, Fortuna, Van Duzen and Weymouth pools—fresh run fish that weigh from nine to twenty-five pounds—light tackle—excellent resorts close by—only ten hours from San Francisco.

The fishing streams that are found so profusely in the new territory north of Willits embracing Humboldt, Trinity and Mendocino Counties offer the best of coast stream trout fishing. If you want to fish, go where the fish are.

Classified Advertising

FOR SALE CHEAP.

One handsome bay gelding, Dexter Lou, Reg. 52610, by Kinney Lou, dam by Dexter Prince. Matinee record 2:24 trotting. Paces under saddle, and is safe for a lady to ride or drive. Height 15.3; weight 1100 lbs., and sound.

One Miller Cart, almost new, weight 40 lbs.; new tires, and cost $95.00.

One track harness, breast collar, and two minute attachment; fine set of reins; cost $75.00.

One set buggy harness, complete. Moffett leather; cost $50.00.

One Toomey Buggy; pneumatic tires, ball bearing, new tires in front; good coat paint; two passenger. Roomy, in good condition, and can be used with poles; cost $250.00.

Will sell horse, buggy and harness for $150—separately. Miller cart and track harness for $25, separately; or $175.00 takes all.

The horse would make a fine matinee horse and is fine under saddle.

This is a $1,000 bargain for $175. Address

J. D. KALAR,
325 Front St., Salinas, Cal.

RACE TRACK FOR SALE.

The Ukiah race track, located a little less than a mile from the Court House at Ukiah and bounded by the State Highway on the west, the county road on the south, and the Northwestern Pacific Railroad nearly the entire length on the east side of the track. The property consists of twenty acres. Fifty-nine good box stalls, good grandstand, fencing in good order, and one of the best half mile tracks in the state. An excellent winter track and an ideal place to work horses during that season. Plenty of adjoining drives for jogging horses. Two wells on the premises as well as water from the city water works, with tanks conveniently arranged for sprinkling.

This is the only race track in Mendocino county and the location of the county fairs. Ukiah is the county seat and has a population of about 3000, is in a most fertile valley in which all kinds of fruit, vegetables, hay, grain and hops are grown. Has excellent water; no malaria or mosquitos. It has paved streets, good sewerage, and splendid gas and electric light works. There are many standard and thoroughbred horses in this county and the people are a race loving lot. This property is offered for sale at a less price than adjoining property is held at. For terms and further particulars address

Care of Breeder and Sportsman.

FRESNO DISTRICT FAIR and RACE MEETING

Fresno, Cal.

SEPT. 26 TO 30, 1916

Entries to Races Close Monday, June 5th, 1916

ALL HARNESS RACES LIMITED TO 3 HEATS

RACE PROGRAM

TUESDAY, SEPTEMBER 26th

No. 1.	2:14 Class Pacing	Purse	$600.00
No. 2.	2:30 Class Trotting	Purse	600.00
	Two running races	Purse	100.00 each race

WEDNESDAY, SEPTEMBER 27th

No. 3.	2:20 Class Pacing	Purse	$600.00
No. 4.	2:15 Class Trotting	Purse	600.00
	Two running races	Purse	100.00 each race

THURSDAY, SEPTEMBER 28th

No. 5.	2:09 Class Trotting	Purse	$600.00
No. 6.	2:10 Class Pacing	Purse	600.00
	Two running races	Purse	100.00 each race

Money in all races divided $200 first, $200 second and $200 third heat.

Money in each division, 50, 25, 15 and 10 per cent.

A horse having won the first two heats and drawn or distanced in the third heat shall not lose position in the summary.

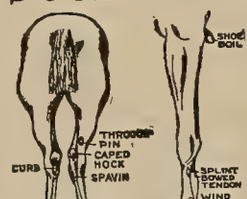
Nominators have the right to enter two horses in any race by payment of 2% additional, but only one horse may start, and the starter named by 4 p. m. the day before the race.

Entrance fee 5% to start with usual 5% additional from money winners.

The Association reserves the right to declare 3 starters a walkover. When only three start they may contest for entrance money paid in, divided 66 2-3 and 33 1-3%.

A horse distancing the field shall be entitled to first money only.

Right is reserved to declare off any race that does not fill satisfactory, and to change the hour and day of any race except to antedate a race, in which case nominators will receive three days' notice by mail to address of entry.



The Association reserves the right to have any heat started after the second score, regardless of position of horses.

All races limited to three heats.

Every bottle sold with Signed Contract to return money if remedy fails on Ringbone—Thoropin—Spavin—or Any Shoulder, Knee, Ankle, Hoof or Tendon Disease.

Here are the reasons why you should not fail to use Save-The-Horse

Chas. L. Laing, Hedgeville, W. Va., writes: "We had a horse four years ago with spavin. We lost his use for a year. I bought one bottle of Save-The-Horse and cured him sound.

"It's the Most Powerful Medicine I ever used," writes W. J. Stonesefer, Route 1, Keymar, Md.

"Save-The-Horse Cured Worst Thoroughpins I ever saw." Thos. Payne, Bowling Green, Ky., also writes, "and she has been all right for more than a year."

"After Using Save-The-Horse For Two Weeks on a Bone Spavin He Does Not Go Lame. It is a great remedy," writes Albert Stoll, 915 South 4th Ave., Ann Arbor, Mich.

"Cured by One Bottle of Save-The-Horse." E. C. Waite, West Lebanon, N. H., also says, "the hoof is grown out and the fistulous condition completely healed," etc.

"The Corns Are Gone and The Contracted Hoofs and Tendons Are All Cured," writes F. S. Reynolds, Fairplain, W. Va.

Henry F. C. Smith, Route 8, Fremont, Ohio, writes: "I am pleased to tell you that I bought Save-The-Horse for Sweeney and it did the work right and perfect. He worked every day. Refer anyone to me who wants to know."

Regardless of price or any other reason, Save-The-Horse is the cheapest remedy known. It goes through and through both bone and tissue—it works inside, not outside—and produces a cure that withstands every test. No blistering, scar or loss of hair. Horse can work as usual—winter or summer.

But write, describing your case and we will send our—96-page illustrated Book—Sample Contract and Advice—All Free (to Horse Owners and Managers).

Winners of other than a selling race after the weights are announced to carry 5 pounds extra. To be run Saturday, July 22. ONE MILE.

The rules as adopted by the Nevada State Racing Commission govern all races run under the auspices of the Reno Fair and Racing Association.

No entry will be received for any of these stakes except upon this condition: That all disputes, claims and objections arising out of the racing, or with respect to the interpretation of the conditions of any stake, shall be decided by a majority of the stewards present, or those whom they may appoint, and their decision upon all points shall be final.

Every person or horse expelled or ruled off by any reputable turf authority for fraud, or by the American or National Trotting Association, shall stand ruled off the courses running under licenses issued by Nevada State Racing Commission.

SPECIAL NOTICES:

More than two horses may be nominated for Selling Stakes, but only two can start.

Winner or non-winner of a stated sum means winner or non-winner of a single race of that value to first horse.

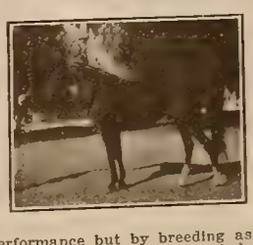
Horses penalized in a race shall not be entitled to any of the allowances in such race.

Horses not entitled to the first allowance in a race shall not be entitled to the second, and if not to the second, then to no subsequent allowance.

Address all communications to J. A. SCHAS, Secretary, Overland Hotel, Reno, Nevada.

J. B. DUNCAN, President.

J. A. SCHAS, Manager.
RALPH H. TOZER, Racing Secretary.



MR BROODMARE OWNER, do you realize the importance of the simple facts that sixty of McKinney's sons and nearly fifty of his daughters are producers of standard performers? That the McKinneys won more money than any other family in 1915? That the McKinneys won the largest percentage of the futurities, both east and west, in 1915? That McKinney has more sons to sire 2:10 performers than any other stallion living? Keep these facts in mind, and remember that I offer you the services of

THE VERY BEST SON OF McKINNEY

CARLOKIN 2:07 1-2 EXHIBITION MILE 2:05 1-4

Champion Trotter and Champion Sire of Trotters in the West

Reg. No. 36548. Licensed Pure Bred, Cert. No. 41.
Mahogany bay. Height 15.1½. Weight 1060.

Sire of ESPERANZA (3) 2:09, only three-year-old to win every trotting stake for that age on the Pacific coast, and also the following colt performers:

The Lark (4).....2:09½	Carsto (2) 2:22½
Ethel D. (3).....2:11	Helen Belle (2).....2:22½
Carl (3) 2:14¼	Carlschen (2) 2:23
Doctor S. 2:14½	Santiago (3) 2:24¼
Johnny Dugan p (3)2:16	May Marian p (3)..2:24¼
Hermes (2) 2:16½	Carlrich p (2).....2:24½
John Warwick (2) 2:17	El Carbine (2).....2:27½
Nicola B. (3).....2:18½	Eileen C. (3).....2:29
Miss Carlokin p....2:20	Carlos (2) 2:29¼
Carleta (2) 2:20¾	Fulton G. (2).....2:30

Carlokin is the best son of McKinney not only by performance but by breeding as well, his dam being the famous producer Carlotta Wilkes, whose ten performers include four with records below 2:10, while his grandam and great grandam were also producers, by Alcantara and Clark Chief. He has demonstrated that he sires more early and extreme speed than any other stallion in California, and his get are courageous race horses, endowed with soundness and wonderful vitality.

Fee: $75 the season, usual privileges; details on request.

Remember the Date--JUNE 1st

BEAUTIFUL BELVEDERE

LOTS FOR SALE

CORINTHIAN ISLAND Subdivision to Belvedere is the most beautiful spot on the shores of San Francisco Bay for a suburban home. It commands an extensive view of the City of San Francisco, Alcatraz and Angel Islands, Raccoon Straits, San Francisco Bay, Richardson's Bay, the Berkeley shore, beautiful Belvedere and Mt. Tamalpais. It is in Marin County, directly opposite San Francisco, and forms the eastern shore of Belvedere cove. It has a naturally terraced, sunny, western slope that is well adapted for many choice residence sites, every one affording most picturesque views of the bay and mountain. It is protected from the prevailing western trade winds in summer by Belvedere Island, and from the southerly storms in winter by Angel Island. The soil is fertile and part of the island is well wooded.

It is less subject to fog than any other place near San Francisco. The summer fog, as it rolls in from the ocean, splits on the western slope of Sausalito, part of it flowing in a line with Angel Island towards the Berkeley shore, and part of it along the southern slope of Mt. Tamalpais, leaving Belvedere, Corinthian Island and Raccoon Straits in the bright sunlight, while the fog banks can be seen as a white wall both to the north and the south.

There is very little available land about the shores of San Francisco Bay that is desirable for homes, especially for those who love boating and kindred sports. The Alameda and Contra Costa shores of the bay are the lee shores and receive the full brunt of the boisterous trade winds which lash the shoal waters near the land into muddy waves, making boating both unpleasant and dangerous. To the north of the city and in Marin County the land from Sausalito to the entrance of the bay is a Government reservation and will never be placed on the market. The shores of Richardson's Bay are not at present convenient to boat service and, aside from Belvedere and Corinthian Island, there is little or no land near any ferry landing that possesses the natural advantages, improvements and possibilities that are offered on Corinthian Island. Concrete roads, pure water, telephone service and electric light wires are already installed. It is only ten minutes' walk from any point on the property to Tiburon boats, and but forty-three minutes' ride to the foot of Market Street.

On the point of Corinthian Island the Corinthian Yacht Club has had its home for many years, and on any summer day the white sails of its numerous fleet add to the charming scene, as the trim yachts glide about the cove. Excellent fishing of all kinds for bay fish, including salmon, the gamey striped bass, rock fish and the toothsome silver smelt, is to be had in the cove. There is probably no spot so accessible and in such close proximity to any large city in the world that offers the attractions of climate, magnificent scenery, fishing and boating as will here be found.

For Greatest Satisfaction Use
DOUBLE SERVICE Automobile Tires
Guaranteed 7,000 Miles Service
Absolutely Punctureproof

Double Service Tires are made double the thickness of the best standard make tires.

This 100% greater wearing surface naturally gives that much more mileage and service. The average of 12 miles of tough fabric and one inch surface tread rubber makes these tires *absolutely punctureproof*.

These tires excel all others for use in the country over rough and rugged roads as well as on hard pavements. They are as easy riding and resilient as any other pneumatic tire—the air space and pressure being the same.

They are the *most economical* and "care free" tires made and are used where tires must be depended on and tire troubles cannot be tolerated. Many *Double Service* style tires are in use in the U. S. government and European War service.

Our output is limited to a certain amount, but for a short time we offer the following reduced special prices as an Introductory Offer:

PRICES

	Tires	Tubes		Tires	Tubes
30x3 in.	$ 8.60	$2.80	36x4 in.	$17.45	$4.55
30x3½ in.	10.85	3.10	35x4½ in.	21.20	5.60
32x3½ in.	12.75	3.20	36x4½ in.	22.50	6.75
33x4 in.	15.75	4.20	37x4½ in.	23.60	6.20
34x4 in.	16.70	4.35	37x5 in.	26.30	6.60

All other sizes not included in above list also furnished. Non-skids at 10% additional.

Terms: Payment with order at above special prices, a 10% discount allowed on orders for two or more tires. All personal checks must be certified.

Try these tires now and be convinced of their very high qualities. Sold direct to the consumer only. *Descriptive folder upon request. Write for it.*

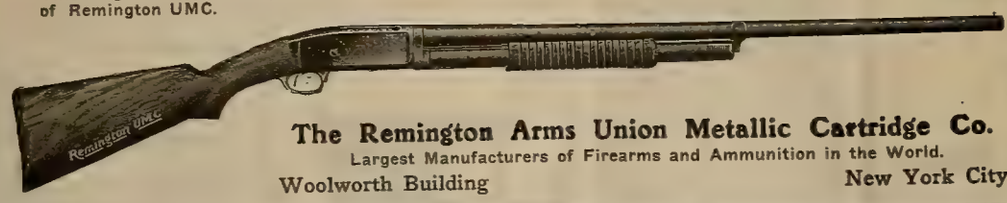
Southern Handicap Shooters Take RED BALL Route To Winnington

Big Winners From Many States Use The "Speed Shells"

(NOTE:—Nine of the eleven Southern Handicaps have been won with Remington UMC Guns, Shells, or Both).

Southern Handicap — Won by F. C. Koch of Phillipsburg, Ohio, 95x100 and 39x40 in shoot-off, shooting Remington UMC "Arrow" "Speed Shells." (19 yards.)

Southern Overture — Won by W. H. Fitzgerald of Clarksdale, Miss., 99x100, shooting "Arrows."



Preliminary Handicap — Tied for by C. A. Courtney, Sulligent, Ala., shooting Remington Pump Gun and "Arrows."

Long Runs — Amateur, H. P. De Mund, 136 straight with Remington Pump and "Arrows." Professional, C. E. Goodrich, 194 straight, same shooting equipment.

Some Other Recent Trap Winnings — Amateur Championship of America (Travers Island), Mississippi State Championship, etc.—records scores aplenty.

This Big Year for Trapshooting Starts Off Like Another Big Year of Victories for Shooters of Remington UMC.

The Big Piece of the Southern Handicap Pie

WAS WON WITH

WINCHESTER

"Leader" Loaded Shotgun Shells

BY INVITATION MEMBER OF

NEW YORK U.S.A.

Honors were divided at the big Southern Handicap Shoot, held at Memphis, May 9-11; but, as usual, the man's size share of the winnings went to Winchester — the **W** brand of shells. To particularize:

THE PRELIMINARY HANDICAP. Won by John R. Livingston, of Springville, Ala., shooting Winchester "Leader" Shells. Score, 96 x 100 and 20 straight on the shoot-off of the tie from the 22-yard mark.

HIGH PROFESSIONAL in this event was Charles G. Spencer, of St. Louis, Mo., who broke 95 out of 100 targets from the 23-yard mark, shooting Winchester Loaded Shells and a Winchester Repeating Shotgun.

COLUMBUS CUP for the highest score on all targets shot during the three days was won by John R. Livingston, shooting Winchester "Leader" Shells, and breaking 546 out of 580 targets.

To Be A Winner, Shoot The Shells The Big Winners Do

PARAMOUNT PARKER GUNS

Look...

Mr. Woolfolk Henderson, an amateur, by scoring .9753% made the HIGHEST OFFICIAL GENERAL AVERAGE FOR 1915

Mr. Lester German, a professional, by scoring .9742% made SECOND OFFICIAL GENERAL AVERAGE FOR SAME PERIOD

CLEAN SWEEP ON DOUBLE TARGETS

Messrs. Guy V. Dering, S. A. Huntley and Woolfolk Henderson won FIRST, SECOND and THIRD,

respectively, by scoring 9000%, 8666% and 8400%.

THE WORLD'S RECORD!!!

At Atlantic City Sept. 15 to 17 Mr Lester German broke all Tournament Records by scoring 647 OUT OF 650 TARGETS, with one run of 372 straight, which is longest for the year.

PARKER GUNS have won the Grand American Handicap 9 times out of 25 offers, once with 100 straight, only time made. Also 7 out of 9 Inter-state Championship Events with highest scores ever made, twice with 198 x 200 at 18 yards rise.

Remember

PARKER PACIFIC COAST RECORDS

In California Mr. Henry Pürrmann won the Pacific Coast Handicap and Mr. J. Foster Couts won the Championship of California.

In Portland, Oregon, Mr. P. H. O'Brien by scoring 241 straight made the record for the Pacific Coast.

If interested in small bore guns write for instructive booklet which will be sent free on request. For further particulars regarding guns from 8 to 28 gauge, address

TRAINING THE HOUND

A PRACTICAL TREATISE ON THE TRAINING OF FOX HOUNDS, BEAGLES, AND COON HOUNDS.

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; $1.50, postpaid.

FRESNO DISTRICT FAIR and RACE MEETING

Fresno, Cal.

SEPT. 26 TO 30, 1916

Entries to Races Close Monday, June 5th, 1916

ALL HARNESS RACES LIMITED TO 3 HEATS

RACE PROGRAM

TUESDAY, SEPTEMBER 26th

No. 1. 2:14 Class Pacing ..... Purse $600.00
No. 2. 2:30 Class Trotting ..... Purse 600.00
Two running races ..... Purse 100.00 each race

WEDNESDAY, SEPTEMBER 27th

No. 3. 2:20 Class Pacing ..... Purse $600.00
No. 4. 2:15 Class Trotting ..... Purse 600.00
Two running races ..... Purse 100.00 each race

THURSDAY, SEPTEMBER 28th

No. 5. 2:09 Class Trotting ..... Purse $600.00
No. 6. 2:10 Class Pacing ..... Purse 600.00
Two running races ..... Purse 100.00 each race

Money in all races divided $200 first, $200 second and $200 third heat.

Money in each division, 50, 25, 15 and 10 per cent.

A horse having won the first two heats and drawn or distanced in the third heat shall not lose position in the summary.

Nominators have the right to enter two horses in any race by payment of 2% additional, but only one horse may start, and the starter named by 4 p. m. the day before the race.

Entrance fee 5% to start with usual 5% additional from money winners.

The Association reserves the right to declare 3 starters a walkover. When only three start they may contest for entrance money paid in, divided 66 2-3 and 33 1-3%.

A horse distancing the field shall be entitled to first money only.

Right is reserved to declare off any race that does not fill satisfactory, and to change the hour and day of any race except to antedate a race, in which case nominators will receive three days' notice by mail to address of entry.

The Association reserves the right to have any heat started after the second score, regardless of position of horses.

All races limited to three heats.

P. O. Box 946, Fresno, Cal.

YOU CAN'T CUT OUT A BOG SPAVIN OR THOROUGHPIN
BUT YOU CAN REDUCE THEM WITH

ABSORBINE
TRADE MARK REG. U.S. PAT. OFF.

without laying up your horse. Does not blister or remove the hair.

ABSORBINE penetrates quickly and is healing, cooling and soothing—strengthens and invigorates tired, lame muscles and tendons—allays pain and inflammation—reduces soreness and lameness.

ABSORBINE is purely herbal, and safe to use anywhere. In addition to being an effective liniment, it is a powerful antiseptic and germicide. Therefore, ABSORBINE applied to a sore or wound, kills the germs, makes the wound aseptically clean, and promotes rapid healing. Effective in Poll Evil, Quittor, Sores, Lacerations, Bruises, Cuts or Speed Cracks.

Mr. Fred White, Box 675, Payne, O., writes: "I purchased a bottle of your ABSORBINE and used it as you directed. The puff all disappeared before I had the bottle quite all used up."

Winners of other than a selling race after the weights are announced to carry 5 pounds extra. To be run Saturday, July 22. ONE MILE.

The rules as adopted by the Nevada State Racing Commission govern all races run under the auspices of the Reno Fair and Racing Association.

No entry will be received for any of these stakes except upon this condition: That all disputes, claims and objections arising out of the racing, or with respect to the interpretation of the conditions of any stake, shall be decided by a majority of the stewards present, or those whom they may appoint, and their decision upon all points shall be final.

Every person or horse expelled or ruled off by any reputable turf authority for fraud, or by the American or National Trotting Association, shall stand ruled off the courses running under licenses issued by Nevada State Racing Commission.

SPECIAL NOTICES:

More than two horses may be nominated for Selling Stakes, but only two can start.

Winner or non-winner of a stated sum means winner or non-winner of a single race of that value to first horse.

Horses penalized in a race shall not be entitled to any of the allowances in such race.

Horses not entitled to the first allowance in a race shall not be entitled to the second, and if not to the second, then to no subsequent allowance.

AN ACTUAL BOOM IS ON in harness racing in the Eastern States and the Middle West. Never have there been larger lists of entries at this season than the more progressive associations are receiving and there is every indication that the season will be featured by large fields and the lowering of records. One association reports 23 entries in a 2:08 trot, which seems marvelous when one considers that it is only a comparatively short time since the first 2:08 trotter appeared. Turn to page six of this issue and read what the New York Herald says of the wealthy sportsmen who have been buying two-year-olds to start in the $2,000 colt purses that are being offered by many associations this year. Harness racing is as popular as it ever was whenever there are popular and progressive men in charge of it. Mr. H. K. Devereux, President of the Grand Circuit, in a letter to the Cleveland Plaindealer last week had the following to say in regard to the outlook: "The trotting season of 1916 promises more sensational speed and a greater number of dazzling contests than any previous racing season has produced. This condition does not arise merely from an increase in stake and purse offerings, but comes about because of the phenomenal number of closely matched horses possessing extreme speed which have been named in the various stakes clear through the circuit. Never before in the long history of harness racing have so many great horses been in sight. The early closing events all along the line have attracted excellent lists of entries, thus insuring fields large enough to make the contests attractive to the public. There has been something of an increase in the ordinary purses. Heretofore at most tracks these have been averaging $1000 each, but this year many of them will be worth $1200 and $1500. The total money offered by the circuit members will amount to over $400,000. In addition, five futurity events, worth a total of more than $40,000, will be decided at Grand Circuit meetings. These figures show very clearly why it is the ambition of every horseman to breed or buy a trotter or pacer that is good enough to race on the Grand Circuit. Harness racing was never so popular as it is at the present time. This is especially true in the Grand Circuit cities where the management has endeavored to keep the sport strictly clean and therefore beyond criticism. The old time 'job' has practically disappeared, and the man who formerly profited through that sort of sharp practice has disappeared with it. I look for the season of 1916 to be the best in the history of the circuit, and I am sure that the attendance at most of our meetings will prove conclusively that the harness horse has gained in popularity with the American public."

SENATOR KEY PITTMAN of Nevada is sponsor for a bill recently introduced in the United States Senate calling for an appropriation of $200,000 for the purchase and maintenance of stallions to be used in the production of horses for agricultural and military purposes. There is little likelihood that the bill will pass and there are no sound reasons that we have heard why it should. The American farmer will raise all the horses necessary for the biggest army the United States will ever require if the government will only pay prices for such horses as will give the breeder a reasonable profit. No person wants to engage in the breeding of army horses at the prices now paid by contractors who buy for the government. The claim that there is a scarcity of horses suitable for the uses of the United States army is entirely disproved by the fact that the European governments have taken several hundred thousand American horses during the past two years for use in their armies and there are still more horses being offered than they require. Let the United States army officials set a fair price and a standard for the horses they want and by giving these publicity all the horses necessary will be produced. Cut out the graft and the breeder will furnish the supply. The idea that $200,000 spent for stallions will in a few years provide the army with all the horses it demands of a suitable type is about as visionary a proposition as was ever made, and it probably did not originate in the brain of a practical horse breeder.

JUNE TWENTIETH, which falls on Tuesday, is the day set for closing entries to the stakes of the Summer Race Meeting at Reno, Nevada. The Opening Handicap at six furlongs has a purse of $1000, the Independence Handicap at one mile, $1000, the Golden Stakes at four and a half furlongs, $1000, the Overland Handicap at six furlongs, $500, the Nevada Derby, one mile and an eighth, $2,500, the Juvenile Stake, five furlongs, $1000, the Riverside Handicap, six furlongs, $500, and the Business Men's Handicap, one mile, $2,000. These are rich stakes for a 19 days' meeting and as there will be many generous purses for races to close overnight there should be inducement enough to horsemen to make the stake entry list a record breaker for Reno. The particulars and conditions of the stakes will be found in the advertising columns.

YOU HAVE NEARLY A MONTH to consider whether you will race your horses on the Inter-Mountain Circuit, the eight programs of which are advertised in the Breeder and Sportsman this week. There are purses of $400 and $500 for nearly every class of harness horses and liberal purses for the runners. The circuit opens August 15th at Montpelier, Idaho, and closes October 7th at Salt Lake City. There are four meetings in Idaho, three in Oregon and one in Utah, so arranged as to make the shipments as short as possible. Better send to Joseph Waddell, Secretary of this circuit, whose address is Baker City, Oregon, for a stake book, giving the complete program and conditions for the entire circuit. The sport on the Inter-mountain Circuit is always good and clean and all the races are according to rule. No more delightful outing can be had than a trip through this circuit of fairs during the summer and fall. Entries for the harness events will close July 1st.

FRESNO ENTRIES CLOSE MONDAY NEXT, June 5th, and there are six purses of $600 each for trotters and pacers. For the trotters the 2:30, 2:15 and 2:09 classes have been provided, and for the pacers the 2:20, 2:14 and 2:10 classes. The Fresno Fair will be held Sept. 26th to 30th inclusive. All these harness races will be limited to three heats, and $200 will be divided into the usual four moneys for each heat. Monday next is the day for closing and the wise horseman will see that his entries are made and mailed in time.

BRADMONT DEFEATS BOLD HARRY.

The feature of last Sunday's matinee of the San Francisco-California Driving Club at Golden Gate Park was the free-for-all pace which had five starters. It was the only race at mile heats during the afternoon and the wise ones had settled in their own minds that Bold Harry could win, but his stable companion, Bradmont, showed the way to the wire in both heats, the first in 2:15 and the second in the good time, considering the day and the track, of 2:12. Richie Roberts drove the winner and handled the son of Alto Leyburn very well. There was a strong wind blowing and the day was anything but an agreeable one.

W. J. K. 2:12¼, the Dexter Prince gelding owned and driven by W. J. Kenney, won the 2:15 pace in good style after dropping the first heat to Little Jack. W. J. K. and Bradmont are both to be seen on the California circuit this year, their owners having decided they are good enough to meet the horses in their classes. The results of Sunday's races were as follows:

First race—2:25 pace:

Victor Pointer ..... (D. Keating)	2	1	1
Little Dick ..... (A. Scott)	1	2	2
Black Mack ..... (L. Gielow)	3	3	3

Time—1:44½, 1:46, 1:47½.

Second Race—2:15 pace:

W. J. K. ..... (W. J. Kenney)	3	1	1
Little Jack ..... (G. Conlan)	1	3	3
Senator H. ..... (J. M. Kidd)	2	2	2

Time—1:43, 1:40¾, 1:39½.

Third race—Free-for-all pace:

Bradmont ..... (G. J. Giannini)	1	1	
Bold Harry ..... (G. J. Giannini)	2	2	
King Pointer ..... (H. Campodonico)	3	3	
Emma M. ..... (William Malough)	4	4	
Pointer Belle ..... (J. M. Kidd)	5	5	

Time—2:15, 2:12.

Fourth race—2:30 trot:

Yoncalla ..... (A. Giavonnetti)	1	1	
Minequa ..... (M. Ford)	2	2	
Bird Eye ..... (A. Combatalade)	3	3	

Time—2:23, 2:22½.

The program for the club's matinee tomorrow is as follows:

First race, 2:20 pace—S. Benson's Dibble Wilkes, Dan Healey's Silver Logan, James J. Ryan's Rosey O.

Second race, 2:15 pace—J. M. Kidd's Senator H., George Conlan's Little Jack, Dan Keating's Victor Pointer.

Third race, free-for-all pace—W. J. Kenney's W. J. K., J. M. Kidd's Pointer Belle, William Malough's Emma M., H. Campodonico's King Pointer.

Fourth race, 2:30 trot—A. Combatalade's Birdeye, A. Giovannetti's Yoncalla, M. Ford's Minequa.

MATINEE AT SANTA ANA MAY 30.

Some good sport was had at the Santa Ana track by the Orange County Driving Club on Tuesday, May 30th, when a program of four races was provided for the amusement of quite a large crowd. The weather was fine and the sport thoroughly enjoyed. Following is a summary of the events, which were nearly all closely contested:

Mixed Race—2:25 class:

Horses.	Owners.		
Dick W.	(W. R. Murphy)	1	1
Tommy Murphy	(F. W. Faucett)	2	3
Frank C.	(E. Barber)	3	2

Time—2:24, 2:23.

Special Event:

Buster L.	(W. J. Lindsey)	1	1
Atlantic Fleet	(Fred Cole)	2	2

Time—2:27, 2:21.

Mixed Race—2:30 class:

Laddie	(Fred Schultz)	2	1	1
California Chief	(W. M. English)	1	3	3
Maud Elmin	(E. Barber)	3	2	2
Babe	(S. Tenelck)	4	4	4

Time—2:32, 2:33, 2:34.

Running—One Mile Dash:

Lanky Long	(E. F. Hall)	1
Light Comedy	(E. Dolley)	2
Hardy	(Dr. Stevens)	3

THE HORSEMAN FUTURITY.

Detroit, Mich., May 26, 1916.

To The Horseman and Spirit of the Times Futurity Nominators:

Having discontinued the publication of The Horseman and Spirit of the Times, we find it impracticable to race our remaining Futurities, and we have therefore decided to declare them off.

Nominators will be refunded the amounts they are entitled to, and we will as rapidly as possible, communicate with them for that purpose. It will greatly facilitate matters, however, if interested persons will send us their names and present address.

All communications should be addressed to the undersigned—care of Room 22, Campau Bldg., Detroit, Michigan.

Very truly yours,

CHICAGO HORSEMAN NEWSPAPER CO.

By D. J. CAMPAU, President.

Pleasanton Trainers Practice Preparedness

Pleasanton Race Track, never so perfectly appointed nor as beautiful as now with its clean stalls, bluegrass lawns and neat buildings, probably has fewer horses training over it than at any time since it became a public training track. There are about sixty horses being worked there, and from a hurried look over them last Saturday the impression was gained that the proportion of classy ones has not lessened since the days when application had to be made weeks in advance to secure stall room for the horses that were to be made ready for the races. And the writer cannot resist the temptation to say right here that if a circuit of ten or twelve weeks could be advertised early each year in California ,even though one-half the tracks on that circuit could not offer greater inducements than four or five hundred dollar purses, not only Pleasanton, but every other training track of note in this State would be as busy as it ever was in the palmy days to which the "old timers" so often refer. It is the straggling manner in which meetings are announced in California that is responsible, as much as anything else, for the few horses in training.

Charles DeRyder, the able superintendent of Mr. R. J. MacKenzie's model plant, is out of the racing game as a public trainer, and where in former years would have from twenty to thirty horses in training now has but four or five. He still has Miss Bond, the three-year-old daughter of The Bondsman, and Miss Harris by Sidney Dillon that took a two-year-old breeder's record of 2:17½ at Los Angeles last October. She was second to Natal Day on a muddy track at the P.-P. I. E. November meeting in 2:32 and 2:29½, but outside the money in two other starts. A mile in 2:23½, half in 1:08 and a quarter in 32 seconds is her best work this year, and she will be seen in the three-year-old stakes in which she is entered. Fresno Bond by The Bondsman—Fresno Girl, owned by Mr. Frank Malcolm of Fresno, is showing better than he did last year when he was a two-year-old and gives promise of being a fair three-year-old. He has been a mile in 2:21 handily and shown quarters that are encouraging. He is well staked.

A few days since Mr. Thos. Pollock of Flagstaff, Arizona, visited Pleasanton in company with his brother who is a resident of Albuquerque, and after looking around purchased from DeRyder three equines—the three-year-old filly Miss Axworthy Dillon, the yearling by The Northern Man, and the suckling by Vernon McKinney 2:01½ that Gracie Pointer 2:07¾ is the proud mother of. DeRyder thinks Miss Axworthy Dillon has as much promise for a fast trotter as any one he has handled for some time. By agreement with Mr. E. A. Gammon who owns the mare Cleo Dillon (3) 2:13¾, DeRyder shipped the mare east and bred her to Axworthy and they "went halves" in the produce. Mr. Thos .Pollock liked her breeding and the way she trotted a mile in 2:20 and was satisfied with the price asked. His brother then looked at The Northern Man yearling that trotted a quarter in 38 seconds and did not think the price on him too high and the colt changed hands. Then the brothers saw Gracie Pointer's foal and the third sale was made. The price for the three was $2750, and we leave the reader to fix the value of each for himself. The Pollock brothers have recently invested heavily in San Francisco, having concluded negotiations last week by which they are to become the owners of The Western Fuel Company, the leading fuel company in San Francisco. They are enthusiastic horsemen and have bred and raced light harness horses for years.

We saw Millard Sanders brushing a trotting mare through the stretch in company with S. Christenson who was up behind his old matinee trotter Brutus 2:15¼, by Strathway, that took his record in a winning race at the spring meeting of the P.-P. I. E. last year. The mare moved so much like a real trotter that the announcement of her name and breeding—Peter's Queen by Peter the Great out of Sonoma Queen, full sister to Sonoma Girl 2:04¼, added to the interest already aroused by her action, and when it was also added that she was owned by Mr. C. A. Harrison of Seattle the writer concluded that the triple alliance of owner, trainer and mare deserved to result in a world's champion trotter, and there is probably not a horseman on the Pacific Coast who will not hope and pull for such a consummation. One of the caretakers who was on the Grand Circuit last year remarked as she went by: "There is a counterpart of Margaret Druien 2:03 in looks and action," and Sanders said: "Don't she move like Peter Scott?" Peter's Queen is five years old and her best work this spring has been a mile in 2:17, a half in 1:06 and a quarter in 30¾ seconds. She is one of the improving kind, sound and good headed and there is every reason to believe that she will trot a mile better than 2:05 this year if asked to.

But there was a chestnut yearling filly by Peter the Great out of the famous brood mare Carrietta, dam of five, by Directman, that Mr. Christenson had just brought in from a run in the paddock, and as she was led into her stall Sanders said: "There is a filly that I would rather own than all the trotters in California. She is not only a great individual and a natural trotter, but she has a larger earning capacity or chance than any horse on the coast, as she is eligible to about $90,000 worth of stakes, being in all the leading ones east and west. She is only just broken as it were, but she has trotted a quarter in 40½ seconds and did it like a trotter." She is the nicest mannered thing one ever saw ,quiet and gentle but when in harness has that determined way of going that seems to be a certain inheritance of the Peter the Greats.

Mr. Christenson's great colt Natal Day 2:13½ as a two-year-old, winner of the Pleasanton Futurity, the California State Fair Futurity, and second to Virginia Humbug in the Pacific Breeders' Futurity, has grown some since last year and the son of Wilbur Lou (3) 2:10¼ is now as perfect made a three-year-old as there is in California. He is being moved along carefully in the "Sanders manner," and has trotted a mile in 2:23½ with a quarter in 33 seconds. He will be ready when the three-year-old trotting stakes are called this summer.

Tim Sexton's Future Tramp 2:09¼ is "going good," and has been a mile in 2:14½. He is not a large horse but he is certainly a trotter from Trotville, and Mr. Sexton has never yet regretted that he refused $5000 for this son of Trampfast last fall.

Among the trotters in the Christenson-Sanders string is the bay gelding Howard's Comet, owned by Mr. P. J. Howard of Alameda . This horse did not make a very good showing last year but under the instruction he is now receiving is developing into a really promising trotter. A mile in 2:15¾ with a half in 1:05 has been the best asked of him to date and he responded as if he could do much better.

Bodaker 2:13, the roan stallion by Antrim, is training sound again, has been a mile in 2:20 this year and may be raced in his class.

The colt King Albert, named for the King of Belgium as he was foaled on that regent's birthday, is taking his early lessons in speed as an apt pupil. He is by The Bondsman and his dam is that good mare Reina Directum 2:12½ by Directum that was the queen of the matinees a few years ago.

The two-year-old filly Boness by The Bondsman, dam Salinas Princess by Eugeneer, is owned by Mr. I. J. Cornett of Salinas. This filly has just begun work, but the way she is dropping the seconds from each previously timed quarter is astonishing and Sanders thinks she will do to start in her stake engagements. A quarter in 41 seconds was her fastest up to last Saturday but the manner in which it was done and the reserve force and speed she seems to have give great promise of a good showing this year.

Some few months ago Mr. Christenson purchased for a small price a brown gelding by Palite, dam a mare by Director that was 23 years old when this brown fellow was foaled. He is a five-year-old and was a "broncho" when purchased, having run out all his life to that time. Chris now uses him as a road horse and he can trot a 2:40 gait without a boot and with only road shoes on. One of the cowboys in the recent wild west show at Pleasanton borrowed this gelding and rode him in the parade, and he was a show horse. He is as tough as iron and could get a standard record without any trouble.

Sutherland & Chadbourne are in business at the old stand and when this combination of father and son-in-law quits training trotters and pacers the end will have come. The senior member of the firm does not do much sulky work now, in fact he says he has retired in favor of the younger generation, but if he couldn't go to the track every day he would be under a doctor's care before long. No horseman in California has a longer or more honorable career than "Jim" Sutherland, who is well and favorably known from Seattle to San Diego, and who never started a horse that was not driven for first money. Fred Chadbourn now does all the driving and training and has been one of the most successful of the younger generation of California's trainers. He is at present at work on eight trotters and pacers, several of which will be seen on the circuit this year.

A two-year-old trotter by Prince Ansel, dam by Egyptian Prince, has been a quarter in 37½ seconds and trotted it nicely. She is staked.

There is a three-year-old bay filly by Nearest McKinney 2:13¼ out of the same dam as the two-year-old above mentioned. She is also the property of Mr. W. C. Brown of Vancouver, and is just out of pasture but trotted a mile in 2:20 as a two-year-old in her work last year.

Baron C. McGregor, a three-year-old by The Bondsman, dam Kate Kopje by Cresceus 2:02¼, has recently trotted a mile in 2:22. He is a little shy on "brush," but Fred thinks he will make it as he is a determined fellow.

Bon Cres 2:10¼ by Bon Voyage, dam the same dam as Baron McGregor, is like him owned by Mr. J. J. Campbell of Pasadena. Bon Cres is now five years old and has been a mile this year in 2:16, last half in 1:06. He is in fine form and will doubtless lower his four-year-old mark. He started three times last year, winning twice.

El Paso, the two-year-old pacer by True Kinney out of the dam of San Felipe 2:09¼, Natal Day (2) 2:13¼ and three others, is a classy looking youngster and is very highly thought of. He has been a mile in 2:20 well within himself, as the trainers say. He is owned by Mr. Roy Mayes of Dixon.

Verna McKinney 2:13 as a two-year-old, who is by Vernon McKinney 2:01¼ and out of Ramona, the dam of Del Ray 2:03¼, is working satisfactorily, has been a mile in 2:16 this spring and occasional quarters in 31 seconds. She is the property of James W. Marshall of Dixon who has a habit of raising 2:05 pacers that he can't get over, somehow.

W. S. Harkey of Gridley, whose pacing mare Deviletta 2:10½ by Diablo 2:09¼ is bound to occupy a very prominent place in the Great Brood Mare table if her produce are trained, has a two-year-old trotter from her sired by The Proof 2:10¾ that Chadbourne thinks a good deal of. This colt has trotted a mile in 2:32 and will soon be able to go much faster.

A. B. C. 2:10¼, the black pacer by Young Monterey out of Rosalie by California Dudley, has shown a mile in 2:14 this year—which is all that has been asked of him. He is owned by W. B. Alford of Ferndale.

Al Schwartz has a small but select stable this year, two of them record pacers, the other an unmarked trotter that has all the signs of a high class one. She was bred by the late Thos. Ronan and is by one of the most popular sires in America today, San Francisco 2:07¾. Her dam is by Antrim and there is not a nicer made young mare in training anywhere. She trotted a mile on Friday of last week in 2:20 handily, the last half in 1:05 and the last quarter in 30½ seconds, and she finished like a race horse. She wears little harness and has good manners. She looks like "the goods."

The two pacers Hal J. 2:09¼ and Little Bernice 2:06¼ are the record horses of Schwartz's string. Both are doing nicely.

Al McDonald has but one horse in training, the colt Surety, three years, by The Bondsman, dam by Washington McKinney. A mile in 2:16½, with the last quarter in 31¼ seconds on Friday of last week, marks the best work of this youngster.

W. E. Detels' two-year-old filly by Graham Bellini out of Daphne McKinney, of whom mention was made in last week's issue, is improving right along and a quarter in 38 seconds seemed well within her ability last week. She trots like a campaigner and seems to have the determination to try all the time. Mr. Detels' mare Petrina worked a nice mile at the trot in 2:18 last week and is also on the improve.

Henry Smith was so busy with his horses that we did not get time to interview him during our short stay at the track, but he has some good going trotters and pacers that look as if they would do to take to the races. He has Mr. S. S. Bailey's horses, including Bon Guy (3) 2:11¾, the whirlwind O. U. C. 2:07¼ and both are working nicely. Mr. Smith is also doing the speed driving and training of Mr. A. W. Longley's horses, of which there is quite a string under the care of Hiram Rapelje. One of the best bred young horses in California is Pedlar Direct 58398 that has shown a mile in 2:15. This fellow is now six years old. He is by Baron Direct, the sire of Braden Direct 2:01¾, his dam is Miss Episode by Pedlar, son of Electioneer, his second is Episode, the dam of Robert Bingen 2:11¼, etc. by Ambassador, and his third dam that wonderful broodmare Santos, the dam of Peter the Great, J. Malcolm Forbes, etc. There are great bloodlines in this young stallion and he is a good individual. Several youngsters are being given slow work, and some are just being broken. There is a colt by Prince Ansel out of Ella J., the dam of Natal Day (3) 2:13¼, etc.; a two-year-old by Vernon McKinney, dam Gertie A. by Diablo; a two-year-old by True Kinney, dam by Hawthorne, and several others. Further mention of these must be left to another time.

Jacob Brolliar has three horses at the track but has none being made ready for the races. He has a bay stallion, seven years old, by Star Pointer out of a mare by Diawood, son of Diablo, that should make a sire of army horses. He weighs about 1250, is upheaded, has good big bone and a lot of substance as well as quality. He has paced a mile in 2:16¾ but Mr. Brolliar intends taking him to some of the mountain counties for a season at the stud. A two-year-old gelding by Graham Bellini out of the same mare also has size and style and stamps his dam as a good broodmare. Mr. Brolliar has a chestnut mare by Red McK. out of a mare by Diablo that was in pasture when we visited the track but the trainers have a lot of praise for her and she looks like a high-class trotter. She has trotted a mile in 2:17, the last quarter in 33 seconds.

Among other trainers at Pleasanton that we did not find time to visit this trip are Mr. Johnson of Fruitvale, Leo Lynch of Oakland and several others, whose horses we will try to look over and report on during some time in the near future.

British inspectors have been in Chicago during the past week examining horses for the British army. They are looking for two classes of horses—the field and the heavy artillery. Specifications for the field artillery call for horses weighing 1,250 lbs. or more and for the heavy artillery for horses weighing 1,500 lbs. and over. Horses must go on the scales and show that they weigh the required poundage. Good hard colors are required in all acceptances—no light colors of any sorts. They pay $185 for the field artillery class and $200 for the heavy sorts. Ages must not be less than six and five years, and not more than nine.

Thoroughbred Matters

John Madden has sent a couple of colts to M. Jaonson at Tijuana where they will be raced. One is by Ogden ,the other by Star Shoot.

◈◈◈

The sheriffs of Alameda and San Francisco counties occupied President Coffroth's box at the Tijuana track one day last week and liked the sport so well that they remained over for several days.

◈◈◈

R. J. MacKenzie, of San Francisco, scored his first win of the Louisville, Kentucky, meeting on Tuesday, May 23rd, with Leo Skolny, five-year-old son of Star Shoot. Leo won the Azra Handicap at six furlongs worth $670 to the winner. He was off poorly, was taken around his field and finished on the outside only a nose in front of Prince Hermis. The time, 1:13 1-5, was good as the track was slow. Six horses contested and all were pretty high class sprinters.

◈◈◈

The Wingfield horses arrived at Tijuana from Kentucky on Wednesday of this week in charge of Early Wright. In the lot are Ferry B., Celesta, Scarlet Oaks, Whims, Polistena, Washoe Belle, Mary Jay, Star Shooter, Edna F., Plush, Golden Dragon, Fancy Feather, Square Set, Bank, Poppe and Treowen. Bank was recently purchased by Wingfield for $6000 and is one of the fastest horses bred in the west in recent years.

◈◈◈

Mal Doyle is the third man to be ordered away from the Tijuana track. The following edict was issued by Presiding Judge L. J. Rose and his associates: "Mal Doyle, owner of Finnigan, Waxemall and Valodolid, has been ordered away from the course with his horses. Doyle, while in a critical mood, visited the judges and made a number of insinuations and veiled charges which he refused to substantiate. In consequence, he was told to betake himself elsewhere."

◈◈◈

Walter Jennings recently purchased five richly bred two-year-olds from John Madden for the already powerful Macomber stable. Jennings, who is very busy now with twenty-one thoroughbreds in active training, will remain at Belmont Park until about the first of July and will then go to Saratoga. He may try for a few of the Empire City stakes and possibly start a horse or two at Acqueduct and Belmont, but it is Saratoga that he has in view, particularly for the regular starting of his horses.

◈◈◈

Iron Mask, one of the most famous sprinters of all times on the American turf, died at Lexington recently of double pneumonia. He was eight years old and was by Disguise—Royal Rose. He was bred at Castleton and was owned by J. Livingstone. Iron Mask had the distinction of having raced successfully in England, United States, Canada, Mexico and Cuba. His winnings on this side of the water total $22,007. In 1913 he set the world's record for six furlongs of 1:10 4-5 and reduced that mark to 1:09 3-5 at Juarez. He also set a new American record for five and one-half furlongs of 1:03 3-5.

◈◈◈

Uncle Sam may yet give the daily newspaper touts a knock-out blow: A bill to prohibit transmission between the states or into the United States from a foreign country of racetrack or other gambling bets, odds, results, or advertising for use in connection with pool selling, book-making or other gambling, has been favorably reported by the house interstate commerce committee. The bill was introduced by Representative Sims of Tennessee, with the avowed purpose of breaking up poolrooms operating on the results of the big running and trotting races, in violation of the laws of many states. It would impose penalties for violation of two years imprisonment or $1000 fine or both in the first instance and make prison sentences mandatory for all subsequent offenses.

◈◈◈

Messrs. Peter and Walter Mitchell, brothers, living in Australia, recently decided to dissolve partnership and decided to offer at auction their thoroughbred stallions, and the sale was held March 9th. Among the horses was Trafalgar, a chestnut horse, foaled in 1905, by the highly successful Wallace (son of Carbine) out of Grand Canary, who was bred by Messrs. Mitchell, and proved himself a wonderful stayer, winning, among other races, the Sydney Cup of 1909, while the following season he was second to Comedy King, conceding the winner 19 lbs., in the Melbourne Cup. Trafalgar took part in fifty-six races in all, of which he won twenty-three, and was second in ten and third in six others, his total winnings amounting to £20,603. Some keen bidding was witnessed, both the brothers being anxious to secure possession of Trafalgar, and after being started at 300 guineas the horse was eventually knocked down to Mr. Walter Mitchell for 7500 guineas, which is the highest price ever given at auction for a thoroughbred in Australia.

◈◈◈

The Tijuana race meeting is said to be injuring the San Diego Exposition greatly, and efforts are making to suppress it.

METROPOLITAN HANDICAP WON BY THE FINN.

A little over 23,000 was the attendance shown by the count of tickets on Thursday of last week when the Westchester Racing Association opened its spring meeting at Belmont Park, New York, and a more notable gathering has not been seen on a race course in America in years. More than 5,000 automobiles were lined up within the park and in the crowds which promenaded here and there were folks who haven't been seen at the track for several seasons.

The feature of the day's racing, The Metropolitan Handicap, value to the winner $3350, had twelve starters. The Belmont pair, Stromboli and Friar Rock, were the favorites at 13 to 5. Spur and High Noon, the Butler pair, were at 5 to 1. The Finn was quoted at 4 to 1. These were the opening odds. The starters were August Belmont's Stromboli and Friar Rock, Jas. Butler's Spur and High Noon, H. C. Hallenback's The Finn, Greentree's Stable Gainer, J. O. Talbott's Slumber II, E. Herz's Short Grass, W. R. Coe's Hauberk, Elkwood Park Stable's Celandria, F. P. Keene's Indian Chant, M. Daly's Kingly.

Little time was lost at the barrier, but as Starter Cassidy gave the word Butwell was very wide-awake on Stromboli, and his blinkers were first to show out of the crowd. High Noon was right with him and Hauberk third. The others were all closely bunched, with The Finn sixth of the lot and Gainer last.

As was to be expected, High Noon at once went out to make pace, but Stromboli had been away so well that Butwell permitted the son of Fair Play to go with him. Schuttinger had taken The Finn into third place, on the outside, and Spur was showing the way to Indian Chant. In that first scramble for positions there was some inevitable crowding, and some of the horses did not have fair racing room, but they were closely bunched, with the exception of a distant trailer.

High Noon had raced the first quarter in :23 2-5, and Stromboli was right at his tail. This took the pair of them two lengths out in front of The Finn and Spur was well lapped on the Hallenbeck colt. Schuttinger had the son of Ogden under slight restraint, and he was holding his position without an apparent effort. Indian Chant, the light-weight of the company, had flashed up into fifth place, but it was only a flash, while the others raced along in fairly close order, and Short Grass plodding along lengths out of the running.

Never taking a long breath, High Noon reached the three furlong pole in :35 and the half in :46¾, and still Stromboli hung to him. The Finn was still racing third, but this maintained dazzling pace had taken the pair well out from the son of Ogden. It was apparent then that High Noon was cutting out a pace for his lesser-weighted stable mate, Spur, but Butwell showed no disposition to take back from that terrific pace and when the five furlong mark was reached in :59 3-5 Stromboli was still right there.

It was inevitable that such a pace would make one or other of the horses crack and shortly after making the turn for home High Noon was through and Stromboliwas left in front. By that time he was beginning to feel the effects of the early speed himself, and just as he showed in front of the Butler sprinter, The Finn, swinging clear on the outside, loomed up dangerously.

Shortly after reaching the furlong pole The Finn drew alongside Stromboli, and the fight to the finish was on. Stromboli is not the sort to give up without a battle and he responded with great courage to Butwell's drive, but it was of no avail. The Finn, while never far away from the pace, had in a measure been reserved for this final struggle, and he had the advantage of a certain amount of seasoning by his racing at Jamaica.

He steadily drew up on the chestnut and it was apparent a sixteenth from the finish that he would be the winner. But Stromboli continued to fight back with wonderful gameness and right to the last stride he was well lapped on the black, whose margin of victory was only half a length. Five lengths back of them Spur, for whom High Noon had been carrying Stromboli along, took down the short end of the purse The others were more or less strung out, and Short Grass, coming with a mighty stretch rush when too late, was running over horses. Lengths back of the field Indian Chant and Kingly finished.

While, as the race was run, it seemed that Butwell had made a fatal mistake in judgment in going along so closely after High Noon, Trainer Hildreth had no complaint to make after the running. He said that the horse had been well off and he saw no reason for not permitting him to step along just as he had done. He said he felt satisfied that Stromboli would have been the winner had it been possible for High Noon to maintain the pace for another sixteenth of a mile. When High Noon stopped and Stromboli was left to show the way he was in a position in which he does not like to run.

It was a sportsmanlike view for Mr. Hildreth to take of the race ,and he is too shrewd a horseman to have his opinion of the running criticised, but the fact remains that The Finn had much more left than Stromboli in that last furlong, and Schuttinger had wisely not been invcizled to go after the Butler sprinter while he was fresh and clipping off his wonderfully fast furlongs.

The winner was bred by John Madden and is a black colt, four years old, by Ogden, dam Levonia.

FRIAR ROCK WINS THE SUBURBAN.

On Tuesday, May 30th, with the field of starters containing many of the horses that had raced in The Metropolitan five days previous, that classic of the Westchester Association The Suburban Handicap was run. The race is at a mile and a quarter, and August Belmont's three-year-old Friar Rock, that ran unplaced in the shorter race, won by two and a half lengths from imported Short Grass, Mr. Emil Herz's aged horse, which was also unplaced in the mile stake, although in that race he finished ahead of Friar Rock. Stromboli, stable mate of Friar Rock, beaten but a half length by The Finn in the Metropolitan, beat the latter by the same distance in the Monday race and thus the Belmont Stables won first and third money. Friar Rock carried 99 pounds, Short Grass 117, Stromboli 122, and The Finn 127.

Hauberk was the pacemaker from the start, but Friar Rock, always in good position, forced him into submission after leading for five furlongs, and from that point the lightly weighted three-year-old went on to win cleverly.

The early pace told on The Finn with his heavy impost of 127 pounds and he was never prominent until near the end, when he made up some ground in the final quarter.

Short Grass held off the pace for the first mile, but when he made his stretch run the imported horse could not get near the flying leader. He beat all the others handily, however.

The Belmont pair coupled were favorites in the betting. The Finn and Sharpshooter were next in demand, while Short Grass was strongly fancied and Hauberk was the outside.

BOOKIES STILL DOING BUSINESS.

New York, May 26.—The sacred laws of the Empire State bar wagering on its race tracks. But the betting is done, and in almost as great a volume as in the bygone days, when 100 or more "bookies" flourished at each meeting.

The system, however, is different. The plunging is done "under cover." At least it's supposed to be under cover, but a one-eyed man could see at least 100 bets made before each race by merely walking across the lawn. But no money is passed. And that foils the Sherlocks.

When the lid was pried off the racing season the other day at the Jamaica track a squad of sleuths wandered down there for the purpose of grabbing and throwing into the bastile all those "layers" who fractured the rules and regulations of New York state. As far as we have been able to determine not one of the "layers" was arrested on the opening day, although at least fifty of them were operating.

The system of betting on the New York tracks now varies radically from that of the old "open" days. The "layers," of course, are anxious to snare as many bets as possible. That's their business. But they are a bit wary of the sleuths. Therefore before you can make a "lay" you've got to have some one O. K. you with the "layers."

You make your wagering desires known to some friend, who knows a "layer," and you both approach the "layer."

"This is Mr. Jones, Mr. Layer," says the introducer. "He's all right."

And then you are free to make bets.

As a necessary preliminary you give the "layer" a deposit of from $10 to $100, according to the amount you figure on losing. You hand it to him very, very privately. The "layer" credits you with the amount, and then you go ahead and make your bets.

Before each race he quotes you the odds. Suppose he offers 5 to 1 against Slipemon, and you want to bet $5 on that horse. Therefore you (under cover, of course) write on a little slip, "$5 on Slipemon to win at 5 to 1." Then you sign your name and slip it with the other bets. When the horses go to the post, Mr. Layer moves off by himself, extracts all the little slips and enters up the bets in a book.

When the race is over you meet Mr. Layer on the lawn. Each "layer" has a special spot on that lawn and there's where you always find him between races. In case you won he passes you a little slip saying "Your credit after first race is $125." That means you put up $100 with him and won $25 on the first race. Some layers don't pass slips. They merely say to you "Your credit now $125."

When the frolic is over for the day you hunt your "layer" and settle up. In case he is a very brave person, fearless of the law and its guardians, he will settle with you right out on the lawn. But if he is a skeery sort of gent, he will entreat you to meet him back of the grandstand or in the rear of some barn, or other secluded spot.

Last year many of the "layers" took a chance on the honesty of many of their clients and refused to take any deposit before the bets were made. They were too much afraid of the "ducks," as they term the sleuths. But so many of the betters "welched" after losing sizeable amounts that the "layers" lost their faith in human nature. And so this year they insist upon a deposit sufficient to cover the amount you figure on losing throughout an afternoon.

The Duryea thoroughbreds recently imported from France were sold at New York last week and averaged $1,150 per head. Crimper, three years old, fetched $16,500, and was bought by Ral. Parr.

COLT RACES THE STAR EVENTS.

Wealthy Sportsmen Paying Big Prices For Youngsters That Look Like Winners.

The true sporting spirit which sustains harness racing when there is no longer a place for the light harness road horse except upon the race track is back of nearly every entry in the bumper lists in the colt races to be held on eastern tracks this year. It is the old spirit which inspired Robert Bonner to pay $30,000 for a trotter that could show the way to Commodore Vandervilt's fastest horse in a brush down the road in the days of Harlem Lane, and so long as it survives neither automobiles or legislation against betting can accomplish the destruction of harness racing.

For those who take a breeder's interest in the sport a colt race is nowadays the thing. It uncovers the budding champions and the coming sires and dams, and the contestants are doubly interesting because they are young, fresh and improving, with future possibilities for the enthusiasts to dream about and venture predictions as to what they will do next week and next year.

It is not so many years since a colt race was regarded as a weak feature on any harness racing program. They were not popular, for the reason that nearly always they were devoid of real contest, one colt usually outclassing the other so completely that the result became a foregone conclusion before the word "Go" had been given. But conditions have changed rapidly as the trotting horse crystallized into a breed, and today there is just about the same chance for a close contest among a lot of well bred two-year-olds as there is in a race for aged horses.

With more than one hundred young trotters entered in the races for two-year-olds and three-year-olds at Monroe, Goshen and Middletown, the colts give promise of proving to be the star performers this year in the Orange County Circuit. What the sentiment which favors colt racing means to the sport was illustrated last winter when Louis Titus of California, the new proprietor of the historic Stony Ford Farm, near Goshen, New York, paid $5,000 for the bay filly Anselila, that earned a record of 2:17½ as a yearling last season. His chief purpose in buying her was to win the two-year-old races in Orange county with a Stony Ford entry. Animated by the same ambition, Richard Delafield, owner of Brook Farm, at Chester, and one of the best sportsmen who ever owned a trotting horse, went to the Fasig-Tipton sale at Madison Square Garden last winter and paid $3,450 for the fast filly Emma Magowan, with a record of 2:22½, made as a yearling in 1915. Then, to make assurance doubly sure, he purchased Buck Watts and Coleman Watts, two other very promising colts of the same age, and entered all three of them at Monroe, Goshen and Middletown, as well as in the $2,000 race for two-year-old trotters at the Poughkeepsie Grand Circuit meeting.

Herman S. Crossman, a wealthy young New York horse fancier, who recently established a new stud farm near Monroe, has outdone all the other Orange county breeders by entering six colts and fillies in the races for two-year-olds. Seeing this unusual number of entries in the name of Mr. Crossman's Comsewogue Farm, some of the "one horse" nominators thought that special privileges were being given to him, but investigation convinced them that Mr. Crossman was paying full rates on each entry, the same as everybody else.

Horace White, formerly Governor of New York, is one of the notable men represented in the list of nominators to this notable series of colt races. His entry, made in the name of Lyndon Farm, is the bay filly Marion Bathgate, by Morgan Axworthy, and she is said to be a speedy one. A. H. Cosden, of Southold, L. I., will be represented by the fast colt Sanardo, for which he paid $3,200 at auction before it was twelve months old. John E. Madden, the largest breeder of race horses in the world, is going all the way from Kentucky to Orange county to try for the prizes with Lord Silva, a colt of his own breeding, by Siliko 2:08¼, once the champion trotting stallion of Europe. David Tod, of Youngstown, Ohio, like Mr. Madden, could find plenty of engagements and easier ones for his trotters nearer home, but the ambition to win where the best will compete led him to enter Trujolla, a daughter of Binjolla 2:17½, in the two-year-old races at Goshen, Middletown and Monroe.

Among other prominent horsemen represented by the fifty-six two-year-olds entered at Goshen are Albert C. Hall, of Woodburn Grange, at Stamford, who names the brown colt Atlantic Pilot, by Atlantic Express 2:07¾, out of the once famous two-year-old Miss Previous; A. B. Coxe, of Philadelphia, who has two royally bred ones of his own rearing; W. M. V. Hoffman, of Tuxedo, whose candidate is the black filly Patsy P., by J. Malcolm Forbes 2:08; John R. Townsend, director of the Riding Club and the National Horse Show Association, who has a promising colt by The Harvester 2:01, called First Virginian; J. O. Winston, of Saugerties Farm, who nominates Mabel Worth and Bertha McGuire, the latter by The Harvester, out of C. K. G. Billings' big saddle mare Berta Mac 2:08; W. Averell Harriman, who names another one by The Harvester, called Rye, and one by John R. Gentry 2:00¼, called Chub; William Crawford, of New York and Monroe, whose entry is Flora Lea, by Bingara; Colonel Jacob Ruppert, who names Joseph Guy and Lois Guy, by Guy Axworthy 2:08¼; Leo Oettinger, who enters two fillies of his own breeding, by the same sire; C. W. Lasell, of Oakhurst Farm, Whitinsville, Mass., who bred, trained and drove the winner of the two-year-old race at Monroe and Goshen a few years ago, and John L. Dodge, once president of the Road Drivers' Association of New York, who, like Mr. Lasell, trains and drives the trotters he breeds at Hollyrood Farm.

By a happy arrangement of the program at each one of the Orange county meetings this year the two colt races will be decided on the same day of the week, so that horsemen who are partial to the baby trotters can count on seeing them all by going to the tracks on Wednesdays.—N. Y. Herald.

GRAND CIRCUIT PURSES TOTAL $500,000.

Over $500,000 will be the total amount to be distributed by the Grand Circuit among trotters and pacers during the coming racing season, this estimate being based upon the amounts already announced as early closing stakes from the opening of the circuit at Cleveland to the close at Lexington, with Atlanta, Ga., still to be heard from and not estimated.

In the figures are calculated the value of all early closers, added moneys for colt sweepstakes, the estimated value of all the big futurities, the increase in the sweepstakes and the lowest possible amount to be added for class races or late closing events, the amount for the latter division being placed as a little over half of the total for trotters and pacers in early stakes, which certainly is a very low estimate.

The following table shows the total amount already offered for features from the opening to the close of the grand circuit at Lexington for trotters and pacers, while in sweepstakes the actual amount of added moneys only is given:

	Trot	Pace	Sweeps
Cleveland	$ 6,000	$3,000	$1,500
Detroit	13,000	7,000	600
Kalamazoo	16,000	5,000	1,000
Grand Rapids	8,000	5,000	500
Columbus	10,000	8,000	1,000
Cleveland	6,000	3,000	500
Poughkeepsie	13,000	6,000	....
Hartford	11,000	3,000	....
Syracuse	16,000	9,000	2,000
Columbus (2 weeks)	23,000	14,000	800
Lexington (2 weeks)	17,000	4,000	....
Totals	$139,000	$67,000	$7,900

It will be seen that the total amount for straight closing purse events for trotters and pacers is $206,000. At the lowest estimate the sum of $10,000 will be added to this for late closing events during the thirteen weeks of the line of march, thus making the grand total of $336,000 for the entire program, not counting the addition at Hartford for half miles and the amount to be yet announced from Atlanta, which will surely make the grand total not less than $400,000.

That the total amount offered as added moneys for sweepstakes will more than double by the additional entrance moneys received from nominators, so that the total value of the thirteen sweepstakes at $20,000 will not be an over-estimate, and judged by the present entry lists and small percentage of declarations, even that amount as total is low enough.

There will be five rich futurities as features of the Grand Circuit. The Kentucky Futurity this year will be worth $26,000, there being a four-year-old division of the same worth $5,000.

The total value of the five scheduled futurities to be raced at Grand Rapids, second meeting of Cleveland, Syracuse, Columbus and Lexington may total close to $80,000, thus bringing the final purse value for the thirteen weeks to an even half million dollars, including specials which several tracks will add to their weekly cards as has been done in past seasons.

WINNERS AT CHICO FAIR.

The spring fair held at Chico last week attracted thousands of people and was voted a big success by all who attended. The display of horses was not a large one, but some excellent specimens of the Percheron and Shire breeds were on exhibition. The following were the winners in the different classes:

Percheron Horses—Stallion, three years and over: First, Jasuir, grand champion, J. A. Franklin, Durham; second, Perfection, J. Dutro, Chico. Mare, three years and over: First, Como, grand champion, J. A. Franklin, Durham; second, Nona Maid, J. A. Franklin, Durham; third, Comet, J. A. Franklin, Durham.

Shire—Stallion, three years and over: First, Anwick Arthur, grand champion, Easton & Ward, Burlingame. Stallion, two years and over: First, Gay Lad, Easton & Ward, Burlingame. Stallion, one year and over: First, Black Hawk Mystery, Easton & Ward, Burlingame. Mare, three years and over: First, Flaford Daisy, grand champion, Easton & Ward, Burlingame.

Grades—Draft teams: First, Bird and Queen, J. F. Hollingsworth, Chico.

Standard—Stallion, over three years: First, Bon Arthur, C. M. Powell, Chico.

Walter Cox, the New Hampshire trainer, has enough horses in his training stables to fit out a cavalry company. He is training 66 in all, 48 of which are trotters and 18 pacers.

EMPIRE FARM HORSES AVERAGE $467.

The dispersal sale of William Simpson's breeding stock from his Empire City Stud, Cuba, N. Y., which was held at Lexington, Ky., May 23rd, under the auspices of the Kentucky Sales Company, drew a large gathering of horsemen and breeders from many distant points, and the bidding was lively.

Forty-two trotters from the consignment were sold for a total of $19,614, or an average of $467 per head, which was regarded as an exceptionally good sale at this time of year. It was stated that the dispersal sale was held to dissolve partnership between Mr. Simpson and his son.

Twenty-five of the horses were knocked down to F. O. Young and some others, and the report was that these purchases were made for Mr. Simpson and retained by him to continue breeding operations. The fact that the two famous stallions owned by the farm, McKinney and Axworthy, were not sold, gave the report some color. The twenty-five head are to be returned to Mansfield Farm and placed in charge of Robert L. Nash, the Kentucky manager of Empire City Stud.

Following are some of the best prices obtained at the sale:

Eleata 2:08½, blk m (19) by Dexter Prince—Elden by Nephew. R. S. Strader, Lexington. $1,250

Etta Worthy 2:20¼, b m (12) by Axworthy—Emir by Advertiser. Roy Miller, Lexington.. 700

Minetta McKinney, b f (2) by McKinney—Erta Worthy 2:20¼ by Axworthy. B. Monroe, Cleveland, Ohio 500

Diabla McKinney (3) 2:19, blk m (8) by McKinney—Princess Annabel by Mambrino King. Beaumont Farm, W. Newton, Mass. 700

Worthetta McKinney (1) 2:29½, (2) 2:14¾, b f (4) by McKinney—Etta Worthy 2:20¼ by Axworthy. F. O. Young, Lexington, Ky..... 3,500

Sister Scott, b f (4) by Peter the Great—Jenny Scott 2:14¼ by Bryson. H. M. Jones, Lexington, Ky. 2,600

Trinket Worthy (2) 2:26¼, b m (9) by Axworthy—My Trinket by Stamboul. Roy Miller, Lexington, Ky. 700

Olivia Worthy (2) 2:27½, b m (3) by Axworthy—Ollis McKinney 2:16¼ by McKinney. J. B. Armstrong, Huntington, Ind. 685

Maggie Prodigal (2) 2:29, b m (9) by Prodigal—Maggie Baron by Baron Wilkes. J. D. Grover, Georgetown, Ky. 525

Berta McKinney, b f (2) by McKinney—Bertha Derby by Chas. Derby. B. Monroe, Cleveland 475

Four-Year-Old Arab Has Endurance.

Halcyon, winner of the endurance race arranged by the Morgan Horse Club a few years ago, is at Durland's Riding Academy in New York, doing service as a school horse. Halcyon is an Arab, but she looks like an old-fashioned American thoroughbred of the type prominent in the days when race horses had to run four miles and repeat to make a reputation. When she won the endurance race she traveled one hundred and fifty-four miles, up hill and down, over country roads, in thirty hours and forty minutes, with 180 pounds on her back. She is barely 15 hands high, yet she outlasted the larger horses and outjumped them too, having won the broad jumping competition at one of the New England shows last year by clearing twenty-nine feet.

Halcyon's colt Kingfisher, four years old next month, is "somewhere in Mexico" with the troops that have been chasing Pancho Villa. Colonel Spencer Borden, who bred him, presented him to Major Frank Tompkins of the Thirteenth Cavalry, who rode him from Columbus, N. M., to Parral in a forced march which has had few parallels in border warfare. In a letter written by Major Tompkins just after the troops under his command were attacked by the Mexicans at Parral, he said to Mrs. Tompkins:

"Please drop a line to Borden and tell him I have ridden no other horse but Kingfisher since crossing the border, and that during the fight at Parral he behaved like a gentleman. Really, he is a wonderful little horse. His endurance is almost uncanny. I never saw one that could do so much on so little nourishment."

To this Mrs. Tompkins adds:

"The fact that Frank has ridden only one horse in all his hard campaigning certainly speaks wonderful things for the Arab."

Though "Ed" Geers has driven more fast trotters and pacers than any reinsman that ever lived, he has yet to ride a mile in 2:00 in the sulky. That he will do so this year, however, is the belief of many horsemen who saw his chestnut stallion Napoleon Direct finish his winning heats in 2:00¾ and 2:00¾ at Lexington last fall. This eight-year-old son of Walter Direct 2:05¾ is among the horses entered in the $3,000 race for pacers of the 2:00 class at the Poughkeepsie Grand Circuit meeting in August. In it he will start against such flyers as Frank Bogash 1:59¼, Hal Boy 2:02¼, Russell Boy 2:02¼, Peter Stevens 2:02¼, Single G. 2:02¾, R. H. Brett 2:03¼, General Todd 2:04½, Earl Jr. 2:01½, Flower Direct 2:00¾, and White Sox 2:05¼.

◈ ◈ ◈

Agnes Carter 2:15¾, by Nutwood Wilkes 2:16½, the trotting mare formerly owned by A. Ottinger and that W. L. Snyder, of Springfield, Ohio, bought at the recent Indianapolis sale, has been bred to Binjolla 2:17¾.

Notes and News

Fresno's $600 purses

◈ ◈ ◈

Will close for entry next Monday.

◈ ◈ ◈

June 5th is the date and don't forget it.

◈ ◈ ◈

There are six purses of $600 each, three for trotrs and three for pacers.

◈ ◈ ◈

The classes are: Trotters, 2:09, 2:15 and 2:30. acers, 2:10, 2:14 and 2:20, and the fair to be held September.

◈ ◈ ◈

A good list of entries for the Breeders' meeting at ie Santa Rosa Fair is almost assured. Secretary elley is opening a big bunch of entries as we go to ress and thinks every race has filled.

◈ ◈ ◈

Mr. C. K. G. Billings paid $1500 the other day for ie pacer Billy Burton 2:21¼ by Oratorio 2:13 and ill use the gelding as a saddle horse.

◈ ◈ ◈

Dr. Leland Carter, who is a son of the late Martin arter, has opened an office for the practice of denistry in the Physicians and Surgeons Building, Sutter street, San Francisco.

◈ ◈ ◈

Reports from Goshen state that all the box seats or the August races at the "historic track" have been old, which shows how well Orange County folks like o go to the races.

◈ ◈ ◈

Dixon's program of races is being prepared and vill be ready for publication soon. The Solano ounty fair will be a record breaker for attendance nd the "alfalfa centre" will be ready to provide for ll who come.

◈ ◈ ◈

Sixteen head of saddle and combination horses vhich were shipped to New York for sale at auction y Mr. E. J. DePue, proprietor of the Woodland Hackney Stud, were sold on Friday of last week and rought just a few dollars less than $5,000, the average being $306.

◈ ◈ ◈

If you need anything in the way of boots, hopples, coolers, harness or horse medicines, drop a line to J. David West, 1018 Fillmore street, San Francisco, and you will be supplied with what you want by parcels post or express as you may direct. Mr. West aims to give entire satisfaction to every customer, and his prices are as low as can be made with reason.

◈ ◈ ◈

At Colonel Jacob Ruppert's Hudson River Stock Farm, in Poughkeepsie, the first foal by Peter Volo 2:02 was born the other day to the chestnut mare Sapphire Worthy, by Axworthy 2:15½, out of Octavia 2:18½, by Baron Wilkes 2:18. The sire of the colt is now at the head of W. E. D. Stokes' extensive stud in Kentucky, where he has succeeded his sire, Peter the Great 2:07¼.

◈ ◈ ◈

August Belmont, chairman of the Jockey Club and head of the Westchester Racing Association, has joined the Goshen Driving Club, of which W. Averell Harriman is president; Pierre Lorillard, Jr., the vice-president, and W. K. Dickerson the secretary. Mr. Belmont is the breeder and owner of a fast young trotter by Peter the Great 2:07¼ and is taking a personal interest in the revival of Grand Circuit harness racing at Poughkeepsie.

◈ ◈ ◈

The Jockey Club of New York has recently made the following rule: "Valets hereafter will deliver the 'tack' of the jockey for whom they are valeting to the owner or trainer in the paddock, then return to the jockey room and remain on the premises until the finish of the race in which they are valeting a jockey, at which time they will go to the judges' stand and, after a jockey has weighed in, return with the jockey's tack to the jockey room."

◈ ◈ ◈

A pacing gelding called Peter Pan made a campaign last year on the Maine half mile tracks, starting at seven or eight meetings and getting either first or second money in every start, winding up the season with a record of 2:16¼ made on a half mile track. He is now in the stable of Walter Cox and is said to be a very likely candidate for the free-for-alls in another year. He is by Alsandra 2:12, the stallion by Bonnie Direct—Alix B. 2:24½ that the late Ted Hayes campaigned in California in 1908.

◈ ◈ ◈

The London Club's Challenge Cup, said to be the most valuable prize ever offered for a trotting race in England, was won at Parsloes Park on May 9 by a horse called Johnnie E., in 2:22. Besides the one thousand dollar trophy the winner received a purse of $300. Trotting and the trotting horse are attracting unprecedented attention in England since the war broke out. It is estimated that seventy-five per cent of all the cavalry horses imported from the United States and Canada are partly or wholly trotting bred, and they have made a very favorable impression in the home of the race horse and the hackney.

The season of harness racing has already opened in Ohio. A meeting at Bowling Green in that State will open on Tuesday next.

◈ ◈ ◈

Fred Chadbourne shipped in the same car with the horses that went to the Indianapolis sale a two-year-old by Vernon McKinney out of a mare by Star Pointer and a three-year-old by Joe Patchen 2d, dam the dam of Hal J. that was sold to W. J. Fleming.

◈ ◈ ◈

L. G. Baker of Los Angeles shipped to North Randall in the car with the Durfee horses the trotting mare Maggie M. 2:12¼, record made at the recent breeders' meeting at Los Angeles, also the mare Zomalene, trial 2:15. Mr. Baker expects to race them on the Lake Erie circuit.

◈ ◈ ◈

It was twenty-four years ago, August 17th, 1892, to be exact, when Budd Doble drove Nancy Hanks a mile in 2:07¼ in a contest against time, the 2:08¼ held by Sunol and made the year previous. 1892 does not seem so very long ago to the "old boys," but when they read that the 2:08 class trot at Columbus, Ohio, this year has 23 entries, they will conclude the speed of trotters has increased some in a couple of dozen years.

◈ ◈ ◈

Dan Hal, a full brother to Hal Boy 2:06¼ and also to Indian Hal 2:10¼, and May Day Hal, two-year-old futurity winner at Salem in 1914, is for sale. His owner, Harry Osman of Gresham, Oregon, states that it is a pity to have a horse like Dan Hal where no good mares can be bred to him and he wishes to sell him at a low figure. Dan Hal has a trial of 2:11¼ and is registered as pure bred Morgan, No. 6812, and also as a standard pacer.

◈ ◈ ◈

The premium list for the fourth annual fair of the Riverside County Fair Association, to be held October 10th to 14th, 1916, has been published. It contains lists of all the premiums offered in the live stock and other classes at the fair besides all the rules governing entries and exhibits. The Riverside County Fair is one of the big fairs of southern California and Secretary O. P. Sanders, of Riverside, will be pleased to send one of these premium lists to any person or firm contemplating making an exhibit there.

◈ ◈ ◈

This office has received with the compliments of Mr. H. K. Devereux, the Official Year Book of the League of Amateur Driving Clubs, containing full summaries of all trotting and pacing events at matinees of 1915, also summaries of amateur events at public meetings, lists of officers and members of the clubs in membership in the league, and alphabetical lists of the trotters and pacers owned by the various clubs. The book is beautifully printed and our thanks are due Mr. Devereux for this fine addition to our library.

◈ ◈ ◈

The Breeder and Sportsman office had a pleasant call one morning last week from Mr. L. L. Battey, a gentleman who has been engaged in mining in this state for forty years, residing here only part of the time, however. He formerly lived in Kansas where he owned the stallion Great Britton by Tommy Britton 2:06¼ and bred several standard performers by him. He is a brother of G. S. Battey of Kansas, whose contributions to the trotting horse journals over the pen name of "Columbus" have been enjoyed by horsemen for the past thirty years. Mr. L. L. Battey said he got out of the horse business years ago, but we surmise the disease has attacked him again, as after witnessing a green pacer work some fast miles at the Sacramento track recently he came in to the B. and S. office and looked up his pedigree quite carefully.

◈ ◈ ◈

Mr. Chas. W. Winter, of Alhambra, writes us that the mare Cima by Limonero, that took a record of 2:21 on May 19th at Los Angeles, as reported in the B. and S., was given a second trial the same day and reduced her record to 2:18¼. Her dam, Sona 2:16 by McKinney, is also the dam of Juanita G. (3) 2:27 trotting and Kinsman Lou (2) 2:26½ trotting, all of which took their records the same afternoon. It is rather remarkable that a mare should produce three to take trotting records the same day, and as she is also the dam of Alta Mac 2:19¼ by Redlac she has jumped into the Great Broodmare table with a vengeance. W. G. Durfee stepped the colt Kinsman Lou a quarter in 33 seconds and another in 33½ seconds last Saturday and the last eighth of each was in 16 seconds. He is a nice colt and Mr. Alex Grant has good reason to be proud of him.

◈ ◈ ◈

As an example of the versatility of the trotting bred horse the brown gelding Sealskin by Velvin Wilkes is a noteworthy animal. He was trained for speed when a youngster and could trot pretty well but not fast enough for the races. He was then used as a road horse for years and was a high class family horse. A daughter of his owner then took to riding him and entering him in the horse shows won blue ribbons in the harness, saddle and combination classes. Last winter he was tried as a jumper and in six weeks could clear the bars at four and a half feet as well as many of the more experienced horses in this class. He is to be entered in the jumping classes at many of the shows this year. Sealskin is 15.2½ hands, and in ordinary condition weighs 1100 pounds. His bone and substance are remarkable and unless worked regularly quickly goes up to 1200 pounds.

AUCTION SALE OF SADDLE HORSES.

The Bridgford Company is preparing to consign about twenty mares, colts and geldings to the auction ring on Tuesday evening, June 20th, and is arranging to hold the sale at the Riding Club on Seventh Avenue, this city. Judge Bridgford informs us that he is not retiring from the breeding of saddle horses by a good deal, in fact he has just gotten well started, but as the farm is getting over-stocked he has decided to reduce the number of horses on hand by an auction sale, and let the public set the value on them. The Bridgford Company purchased in Missouri three years ago the colt LeGrand McDonald, and this colt has been a winner in the show ring every time he has been shown since. As a two-year-old last season he won first prize in the class for stallions two years old and under three at the Panama-Pacific International Exposition, also the Junior Championship, and now as a three-year-old he has grown to be one of the finest specimens of the American Saddle Horse ever seen anywhere. He is not for sale but one or two of his get will be offered at this time. The stallion Artist Jr., by Artist Montrose, that has heretofore been the premier sire at the Bridgford farm, was also a winner every year shown until an accident so blemished one of his legs that he has not been taken off the farm since. He became cast in his stall by some means and the flesh was so badly torn that it was thought for awhile he would not recover, but the terrible wound finally healed and he now goes sound on it, but is badly scarred. Artist Jr. will be sold as the Bridgford Company has a number of mares and fillies by him which will be mated with LeGrand McDonald.

Judge Bridgford some years ago purchased a number of trotting and pacing bred mares to mate with his saddle stallions, among them mares by Stam B., Nutwood Wilkes and other sires whose get had style and action, and from them he has bred a number of show winning saddle horses, among them the gelding Dom Pedro that was sold last February to the Japanese government for a large price. Dom Pedro is by Artist Jr. out of Azmoorie 2:20¾ by Nutwood Wilkes 2:16½, and is a magnificent horse that goes all the gaits perfectly.

The Bridgford Company will give particulars of the coming sale in the advertising columns of this journal next week, and catalogues will also be printed and given wide circulation. Persons desiring these catalogues should send their address to the Bridgford Company, 519 California street, San Francisco, and they will be mailed as soon as printed.

There will be offered at this sale mares with foals at foot, well broken young horses two and three years old and one five-year-old. There are some great prospects for show winners among them. The American Saddle Horse is growing in popularity every day and we look for this sale to be largely attended.

—o—

Riding enthusiasts, nationally known and socially prominent, have been invited to participate in the divisional equestrian features of pageantry and parades during the Round-up in San Jose July 1, 2, 3 and 4. The Round-up association has interested Mrs. J. E. Bell in this feature of the big epochal celebration and she will make a tour of this section of the state to personally urge horse women to go to San Jose with their finely equipped horses. Several social leaders in San Francisco, Oakland, Burlingame and San Mateo have declared their intention of being present.

◈ ◈ ◈

Mr. Girard Parsons, a wealthy young Missourian, has recently purchased a saddle stallion and several mares as the foundation stock for a saddle horse breeding farm. He visited Kentucky and purchased King's Rival, a young son of Bourbon King, dam Euroda, a daughter of Highland Denmark. King's Rival is four years old, a chestnut, with some white but not conspicuous markings. He has been considered the champion of his age since a weanling and closed the season of 1915 by winning the Kentucky Fair stake. Mr. Parsons paid $3,500 for King's Rival and was offered $5,000 for him a few weeks after, but declined the offer.

◈ ◈ ◈

A rather mixed lot of Kentucky saddle horses were sold in New York May 10th, by S. T. Harbinson & Co., of Kentucky, and the average obtained y Auctioneer George A. Bain for the twenty head was $509. Two of the lot brought $1500 each. The saddle horse market cannot be said to be over supplied when such prices are obtained.

◈ ◈ ◈

Gen. Castleman's saddle queen, Emily by Bourbon Chief, dam Delia by Dillard Dudley, is dead at her owner's home in Kentucky, aged 28 years. She was as near the perfect horse as any equine becomes and had great beauty as well as great brilliancy in the show ring. At the world's fair in Chicago she won the championship, and it was her performances that attracted attention to Bourbon Chief as a sire. Her first foal Goodwin was so flawless in outline that his picture was used on all letterheads and catalogs of the St. Louis world's fair in 1904. Emily's son Merwin went to Porto Rico where he has been a great success in the stud. Kenwin, another son of Emily, is now in service in South Dakota. Her only living daughters are Eugenia and Devota. Eugenia has but one foal, a two-year-old filly by Golden King. Devota was bred last year to Astral King, and from this mating a champion should come.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

CATCHING PYTHONS—IT'S TOUGH ON PIGS.

The way natives in India catch pythons is described as follows by Prince Ghosh. He says: "A python generally lives in a hole in the ground or a hollow in a tree; but if it can find an old ruin in the jungle—and there are many old ruins in India—it likes to take up its sleeping quarters there, because even in the heaviest rains the water runs off quickly, whereas a hole in the ground is likely to be flooded. The python needs to eat only once a week, and to get that meal it lies flat along the bough of a tree near a stream and waits for its prey to come to drink. When the natives see the long trail that the pythons body makes near the bank, and find a heap of ruins near by, they make a hole in the ruined wall just exactly big enough for the python to get through. Then they tie a pig to a stake near the hole on one side of the wall, and on the other side of the wall opposite the hole they tie another pig to a stake. They also tie a wire to the leg or the tail of the near-side pig, and as evening draws on they twist it from a distance and the pig squeals. As the python comes home to bed it hears the squeals. So the python comes along merrily and seizes its supper at a single bite. Down goes the pig into the big snake's throat, sucked in slowly by sheer muscular action. In about half an hour the pig has passed completely down the long neck, and in another half-hour it is down a couple of yards farther into the python's stomach. Most animals would go to sleep right away after a gorge like that. But meanwhile the second pig on the other side of the wall has realized its unhappy brother's woeful fate, and has set up a most distressing noise. The python puts its head through the hole and sees it. "Aha!" it says to itself. "Here's my next week's breakfast!" And, instead of waiting for next week to come, that greedy python swallows the second pig, too. The wily natives wait until the second pig is well on its way down the python's body. Then they have the snake caught! Pig No. 1 prevents its from advancing, and Pig No. 2 prevents it from retreating. The natives lasso the python round the neck, break down the wall, and pass a coil of rope between the two lumps of pig before they can amalgamate. Then they bear away the python to captivity." We think our readers would be able to suggest a quicker and less expensive method of capture.

FISH LINES FROM THE SOUTH.

Fishing in the San Bernardino Mountains has been beter during the last week than at any time previous this year. More limits were taken from Big Bear Lake in the week than in the two weeks before. At Little Bear the fishing has been much better than it was early in the season. Reports from Pinecrest and Thousand Pines indicate that the stream fishing also is better. The water is lower than it was the first of May, and the fish are responding to flies and bait.

An average of twenty limits a day have been taken from Big Bear Lake by guests at Pine Knot, and similar catches by those at Knight's Camp, in addition to the fish caught by camping parties. The stages of the San Bernardino Mountain Auto Line have been bringing into San Bernardino for express shipment an average of fifteen limits a day, while many fish are consumed at the camps, or brought out of the mountains by private machines.

* * *

Complaint comes from expert anglers upon the higher Sespe that a great many dead fish are found. In one place, according to Jake Hartmann, who fished near Willet's, there were so many dead trout that the water was fouled. This will be investigated at the first opportunity by the Fish and Game Commission experts. Some think salmon eggs poison fish. Others think that the jamming about the trout suffered in the January floods may have weakened or injured them in some way to make them subject to fungus, or other like disease. It is well known that a trout handled by a dry hand loses its natural slimy coating and is very apt to contract this fatal fungus disease, which is similar to that killing the salmon after spawning, if not indeed the same thing. Whatever the explanation, it is serious business, as the trout have enough to do sustaining themselves against the army of angling-lincensees seeking their dollar's worth, without fighting disease, too.

* * *

Deputy Gyger visited the San Jacinto north fork recently and found three men with 100 very decent fish. The San Jacinto is a rocky, trying stream. Trout are earned in it. The festive "rattolier" rattles pretty frequently in those rock piles, and is as "pesky" as necessary, if not more so. But the fish average a good size and a first-class exponent of the fly can find high class sport. It takes "some shooting" to lay it to 'em in this brushy country, and one has trouble with his "back-cast" on the best pools; but the catches are ample reward—ten and twelve-inch fish, with bigger ones in the reservoir for those granted the privilege of fishing therein. The water is high now, and indications promise a sustained flow later. It is a long drive and those going there will find the natives well versed in its attractions.

WOMEN GAMEKEEPERS IN ENGLAND.

Ever since August, 1914, we have been growing accustomed more and more to seeing women performing work which had previously been regarded as the exclusive preserve of the sterner sex. We confess, however, that we were somewhat astonished at the suggestion that women would make excellent gamekeepers. Writing to the Evening Standard a few days ago a correspondent of that journal said: "It is to be regretted that women are not being employed on the game preserves in numbers. It is the fault of the women themselves. Perhaps they do not realize that gamekeeping is not arduous work, except in districts where poachers abound, and happily these are few and far between. The out-and-out professional poacher has a better job today. As a matter of fact, he seems to have entirely disappeared. The war has swept him away. Our worst poacher is and always has been the agricultural laborer—the shepherd and ploughman, who poach as they go about their usual duties, setting a snare here and picking up a clutch of eggs there. They are not easy to detect, but when run to ground at last they surrender tamely enough, and bear little or no malice. Gamekeeping should make a special appeal to the middle-class woman fond of an out-door life and nature." There is, of course, some truth in this writer's assertions; but we can hardly agree with his statement that "gamekeeping is not arduous work." And, indeed, it will be noticed that he qualifies it himself. But with regard to women gamekeepers we must "wait and see."—Shooting Times and British Sportsman.

SAN FRANCISCO FLY CASTING CLUB SCORES.

Members of the San Francisco Fly Casting Club enjoyed good sport on Stow Lake both Saturday and Sunday, competition in the various events being keen. There were some good scores. Results:

FISHING IN SUPERIOR CALIFORNIA.

Although the snow storm last week will delay the trout season in many sections of Superior California, there still are many streams where fishing is very good, especially for salmon roe and worm bait. It is yet early for flies in most sections.

All of the streams in Nevada county are a good field for the fishermen, the trout taking roe and worms eagerly, although they rarely rise for flies. Fishing also is good in the vicinity of Momon Island and Salmon Falls, near Folsom.

The State Fish and Game Commission planted 600,000 fry there last year and the trout are now from six to seven inches in length. Good catches can be made in that district.

On the upper American River and tributaries, just above Aiverton, big catches are reported with worm and roe bait. A few more weeks of clear weather and the trout can successfully be landed with a bright fly. Many good sized trout are also being hooked in the Feather River with salmon flies. Feather River fishing will be good in the vicinity of Belden as soon as the water clears.

The snow storm was quite heavy in the mountains of the Tahoe region, four inches falling at Tallac. The principal delay in the season will be caused by the waters from the new fall of snow washing down considerable food to the fish. This will mean that the trout will seldom bite as long as they have plenty of other food.

The Fish and Game Commission reports from various parts of Superior California this follow:

Weed—Trout not very plentiful.

Red Bluff—Trout fishing improving.

Susanville—Trout fishing fine in all the streams of Lassen county. Nothing unusual to get the limit.

Taylorville—Fishing on lake fair. Will improve. Lake record now eight pounds for rainbow trout.

Murphys—Fishing fair in San Antone creek near Big Trees and Dorrington. Take gray hackle and coachman flies. Some also use salmon eggs. Fishing good in Licking Ford. Fish rather small.

Belden—Account rains river high and muddy, fishing not very good just now. Chips Creek, Yellow Creek and Mosquito Creek clear. Brown hackle fly being used on North Fork above east branch. This part of river clear. Salmon fly and helgamite are popular bait but scarce.

BARKS ALONG KENNEL ROW.

Dr. George W. Clayton of Chicago will judge all breeds at the Oakland Kennel Club dog show to be held June 15, 16 and 17 at the Auditorium.

‡ ‡ ‡

George Steadman Thomas of Halimton, Mass., a recent visitor here, judged all breeds at the Brighton Beach, N. Y., show May 30. The fact that over nine hundred dogs have been entered is proof of Thomas's popularity.

‡ ‡ ‡

Sir Hebert Beerbohm Tree, the famous British actor, has turned dog fancier, and when he isn't playing Bishop Wolsey in King Henry III. he is assisting the show committee of the Nassau County Kennel Club in their coming charity show for the benefit of disabled horses of the allies.

‡ ‡ ‡

Who said that Collies were a back number, when at the Utah Kennel Club show held recently a collie owned by Dr. W. M. Waddell, named Goldfield Model, won the special for best of all breeds with 178 dogs benched. Now that is going some, for it is very seldom they get a look-in.

‡ ‡ ‡

On March 19th, at the parlors of the Adams Hotel, in Phoenix, Arizona, a large number of prominent citizens joined together and formed the Arizona Kennel Club, with headquarters in Phoenix, Maricopa county. The following officers were elected to serve during the year 1916: President, W. B. Twitchell; first vice-president, P. C. Adams; second vice-president, Edward Wooster; treasurer, Franc DeSousa; secretary, Joe M. Murphy; detective, Dr. A. N. Gurley, veterinarian. It is the intention of the club to give the first show, under A. K. C. rules and license, and have the following dates: November 14 to 17, running the same in connection with the Arizona State Fair, during fair week. Prizes will consist of money, cups, premiums and ribbons as well as other specials, and preparation will be made to bench at least 250 dogs.

‡ ‡ ‡

Wheatland (Yuba Co.).—Will Harrison caught a sturgeon weighing 172 pounds and seven feet long in the Bear River near this city.

Washington State Shoot.—The Interstate amateur championship of Washington was annexed at the Seattle trapshooting grounds on May 23d by Frank Troeh, who broke 97 out of 100. C. E. McKelvey was second with 94, R. S. Searle third with 92, and F. B. Rice was fourth with 92, also these two men winning their position in the shootoff; J. A. Dague fifth with 91, Charles O'Connor sixth, and J. H. Hulbert seventh, with scores of 90, these men also winning their positions by a shootoff.

The high amateurs in the two-days' program of the State tourney, out of 300 targets, were Frank Troeh, who totaled 284, first; Frank Templeton, 278, second; P. J. O'Brien, 275, third; Guy Egbers, 273, fourth; R. S. Searle, 271, fifth; and Hugh McElroy, 270, sixth.

The professionals for the two days' shooting, 300 targets: First, Hugh Poston, 278; second, L. H. Reid, 285; third, F. C. Riehl and P. J. Holohan, 276, and fourth, F. A. Dryden, 274.

The "long runs" registered throughout the shoot were as follows: Hugh Poston, 61-54; F. M. Troeh, 66-64; P. J. O'Brien, 62; M. Siddall, 52; F. C. Riehl, 53; L. H. Reid, 51-68; P. J. Holohan, 52.

Perhaps the most interest of the day was attached to the two 25-target handicaps for the possession of the Smith gun trophy and the Rainier trophy. Ralph Kinzer won in the Smith gun event, with a straight 25. Kinzer and W. C. Smith tied with 24 in the event for the Rainier trophy and in the shootoff Kinzer came out the winner, he now holding both of these trophies.

The scores, May 23, 100 targets:—

Frank Troeh 97, P. H. O'Brien 95, Mark Siddall 04, C. E. McKelvey 94, James Seavey 93, R. S. Searle 92, J. E. Rice 92, J. A. Dague 91, F. Templeton 91, Hugh Fleming 90, Charles O'Connor 90, J. H. Fight to Open State's Fishing Streams

— COUNTIES SUPERVISORS DRAW UP RESOLUTIONS —

The following resolution was introduced by supervisor E. H. Kaupp of Siskiyou county and unanimously carried at the annual State convention of County Supervisors at Redding, on May 23-27. It is submitted by the Breeder and Sportsman for the interest of the fishermen of California:—

"Whereas, the streams of the State of California have continuously been stocked with fish for the past 46 years at public expense, and

"Whereas, the will of the people has been expressed in an amendment to the State Constitution, set forth as article I, section 25, adopted in 1910, declaring: 'That the people shall have the right to fish from and upon the public lands of the state and in the waters thereof' and that the state shall not dispose or transfer any of its lands without reserving this right; and

"Whereas, there is in the Political Code of California, Section 4085½, containing a provision giving boards of supervisors the power to declare, 'all or any portion of a slough, river or stream, which does not lie within or run through cultivated land' . . . 'or has not been declared by law to be navigable' . . . 'to be a public highway for the purposes of fishing, provided said stream is stocked in whole or in part with fish by state or count,' and,

"Whereas, it is further provided in said section that in case the owners of the adjacent land will not agree with the county authorities on a satisfactory price, that the county authorities may proceed to acquire public rights of fishing by condemnation as authorized by title VII, part 3 of the Code of Civil Procedure, and,

"Whereas, in this state certain private parties own land within the designation above given and said parties are preventing fishermen from exercising their rights and privileges and certain specific examples of this condition exist on the McCloud River in northern Shasta county, and,

"Whereas, the Shasta County Board of Supervisors, desirous of retaining to the people of the state their right to fish in the McCloud River, have taken the important step of declaring McCloud River a public highway for fishing purposes, and which action may be followed by further proceedings as provided for in the Code, Now therefore be it

"Resolved, That this State Convention of County Supervisors in 6th annual convention assembled at Redding, May 23-27, 1916, declare our belief, that the right of the public to the fish in the streams of the state should forever be maintained, and be it further

"Resolved, That this convention endorses the action of the Board of Supervisors of Shasta county in undertaking to open the waters of the McCloud Fiver to public fishing and we urge all public spirited citizens to support the efforts of the Shasta County Board of Supervisors, and be it further

"Resolved, That we believe it is the right and duty of boards of supervisors to lend their aid and support to every movement undertaken within the constitution and the law, to prevent private individuals, corporations or clubs from securing a monopoly of the fishing privileges of any stream which has been stocked with fish wholly or in part, at public expense."

(Unanimously carried.)

RESOLUTION.

"Whereas, it appears that there is a possibility that the various counties of the State of California may, in invoking section 4085½ of the Political Code become involved in great expense, and

"Whereas, the opening of the streams of any county to public fishing is a matter of benefit to the whole State, therefore be it

"Resolved, That the legislative committee investigate this law with a view of recommending to the next legislature any improvements in the same which might relieve the counties of excessive expense in enforcing same."

(Unanimously carried.)

Shark Killed in Bay.—A shovel-nose shark, weighing 172 pounds, was caught in the oyster beds off San Mateo Point last week by Henry L. McKnew, president of the Burlingame Oyster Company, 380 Brannan street. Emil Petersen, foreman of the oyster beds, sighted the big fish as it tried to jump over a low fence in the water. An oyster rake and a lot of pulling finally killed the shark. McKnew claims is to be a record-breaker for San Francisco bay. A large deep-water fish of the stinging species was found lodged in the shark's two-foot mouth.

* * *

Green Lake Club.—While many of the Green Lake members took part in the program at Harbor Island on May 21st to get in trim for the state tournament, quite a bunch found their way out to the northern grounds.

Dr. King again led the field with the splendid score of 49 out of 50, and E. K. Van Vleck finished second with 47 out of his 50. Hi Follrich, after falling down in the first fifty target event, started a straight run in the extra program, breaking 81 without a miss.

The scores—50 targets:—

Dr. King 49, E. K. Van Vleck 47, George B. Baker 45, W. C. Smith 45, Don R. Baker 42, J. W. Geltz 42, Dr. Winningham 42, S. E. Bacon 41, Frank Ulvestad 41, C. C. Ward 41, Fried Pries 39, Hi Follrich 38, Dr. J. F. Hill 38, P. E. Sullivan 36, D. G. Huber 35, W. M. Elliott 34, Howard Cosgrove 33, R. W. Brehm 31, G. D. Horst 31, H. W. Carver 29, P. W. Beal 26, A. W. Leanard 22.

Taft Club.—The 50-bird handicap shoot of the Taft Gun Club, given May 21st, was attended by experts from all parts of the fields, sixteen men competing. W. G. Harris carried away the honors by breaking 49 of the blue rocks out of his 50.

The feature shooting of the day was done by E. Sherwood, the well known driller, who brought down 47 of the pigeons. Sherwood seldom shoots at blue rocks and has had but little practice. He showed at Sunday's shoot that with a little workout he will be able to make some of the experts of the field move some. The shooting was in three flights, 15, 20 and 15. The score:—

McKeon, 16 yards, broke 40; Sherwood, 16—47; McKissick, 16—35; W. Gollman, 16—39; Scott, 16—29; Randolph, 16—36; Hildebrandt, 17—37; Dunn, 18—23; Bontadelli, 18—39; Hall, 18—42; Swigart, 20—42; Harris, 20—49; McDonald, 20—38; Jasper, 18—36; Curtis, 18—34.

Great Two-State shoot at San Jose, Cal.

HEINE PFIRRMAN IS SENSATION IN WINNING TITLE WITH 100 STRAIGHT

One of those wild outbursts of enthusiasm that you have seen take place at a football or baseball game was in evidence about 3 p. m. Wednesday afternoon in a picturesque spot about two miles out of San Jose. The occasion was the crowning of Henry Pfirrmann Jr. of Los Angeles as the California-Nevada state champion. It is seldom that a crowd is stirred up at the traps as on the occasion aforementioned.

"Heine, the flying Dutchman," as he is known to his friends, began the fourth and final day of the tournament in anything but an auspicious manner. He missed one to two birds in each of the five frames that preceded the interstate amateur championship. Heine had also failed to show anything startling on the previous days and when he started out by smashing the first twenty-five it created interest. Then when he got the next twenty-five and the next twenty-five, the beautiful San Jose Club grounds began buzzing with comments.

The final test was slated for number one trap—one that had been causing the crack shots all sorts of trouble. Heine opened as confident and cool as possible and started cracking them to the right and to the left. He was aided by his squad members, consisting of Frank Mellus, Guy Holohan, W. E. Staunton and F. C. Favier. They worked like a clock to render as much assistance for the perfect record as possible. Pfirrmann did not need any help, however, for he was hitting the targets right in the center—and this in the face of bothersome gusts of wind.

When it got down to the last seven or eight birds it was evident that Pfirrmann was working under a strain. He let the targets fly several yards farther out and took pains with his pointing. The spectators were holding their breath for fear he would miss one. Then when the hundredth bird was cracked the cheers ran out and Pfirrmann was surrounded by friends who showered congratulations. Finally he was hoisted on several shoulders and paraded around. It was a wonderful bit of shooting as many of the other star gunners had fallen below their mark on the day because of adverse weather conditions.

It was a sort of repetition of the Pacific Coast Handicap last year at San Diego when Pfirrmann came with a spurt and won the honors by scoring 98 out of a 100 from the 20-yard mark. If Heine also duplicates the shooting when he goes back to the Grand American Handicap at St. Louis in August he will prove a worthy representative of California and Nevada.

Winners of the other interstate trophies were C. H. Nash of San Jose with 96; O. N. Ford of San Jose, 95; A. P. Halliburton of Lindsay, 95; Dr. R. N. Fuller, 94; W. S. Peace of Elko, Nev., 94, and Frank M. Newbert, 94. Frank Mellus of Los Angeles also scored a 94 but lost in the draw for a prize.

It was a grand tournament they had down there. Your humble correspondent counted thirty-five machines inside the San Jose Blue Rock Club grounds on Wednesday and on Sunday, when practice day was held, there was an even greater number. During the tournament approximately 70,000 shells were burned up and as many more blue rocks were used. An average of ovr seventy shooters were out to the traps every day.

High amateur honors for the tournament were divided by W. S. Peace of Elko, Nev. and A. P. Halliburton of Lindsay. Each broke 586 out of the 600 shot at. D. C. Davison of Modesto was third with 558 and H. Lorenson of Newman, W. H. Varien of Pacific Grove and Frank M. Newbert of Sacramento each scored 556.

Among the professionals, R. C. Reed of San Francisco led the way with 571. Guy Holohan of Los Angelos got 552 and M. O. Feudner 551.

The long run of the tourney went to Heine Pfirrmann. He busted eleven before taking the hundred straight and he has an unfinished string of 111.

Other high runs were Charles H. Knight 91, E. Staunton 74, R. C. Reed 64, O. N. Ford 54, H. Lorenson 52, Grant Adams 75, C. H. Nash 64, 62, D. C. Davison 87, A. G. Wilkes 58, A. P. Halliburton 56 and Harry Ogilvie 52, 60.

A pretty and pleasing feature this year was the presence of three fair shots in the competition. Mrs. C. E. Groat of Los Angeles and Mrs. A. G. Wilkes and Miss G. Meyers of San Francisco shot through the program and made creditable showings. They had a pretty race in the championship event of 100 birds. Mrs. Groat won the beautiful trophy set up by O. N. Ford with a score of 86. Mrs. Wilkes was only one behind and Miss Meyers was there with 84.

The amateur championship is shown by events 6, 7, 8 and 9 on the third day in the following complete scores for the three days:—

Others who did not shoot the full program were: I. C. Peet 172x200, E. C. Stamper 163x200, George Thomas 82x100, W. G. Becktell 165x200, B. F. Smith 7x100, C. McFadden 177x200, T. Hassera 161x200, D. Daniels 86x100, Dr. E. Topham 82x100, J. Plaskett 74x200.

On Sunday, practice day, two important trophies were shot for, both donated by O. N. Ford, manager of the local club. Frank Mellus of Los Angeles won the fifty-target event with 49. Ford himself tied this mark, but on the shoot-off at twenty-five targets Ford missed twice and Mellus but once.

At twenty-five pairs of doubles O. N. Ford won permanent possession of a cup he donated himself by breaking 39. Tony Prior of San Francisco was a close second with 38.

Altogether there were 125 shooters in competition in various events. Guy Holohan was the high professional shot for the day with 144 out of 150 shots. Henry Lorenzen of Newman won the miss-and-out special event with 18 straight. The scores:—

100-bird race, amateurs—O. N. Ford, San Jose, 97; Billie Varien, Pacific Grove, 97; Tony Prior, San Francisco, 95; R. N. Fuller, Tulare, 95; Henry Stelling, San Francisco, 95; N. A. Howard, San Francisco, 94; B. H. Woodworth, San Francisco, 94; R. C. Hogg, Saratoga, 94; H. Lorenzen, Newman, 94; D. C. Davison, Modesto, 93; A. J. Wilkes, San Francisco, 93; Dr. Packard, Los Angeles, 93; H. W. W. Williams, U. S. N., 93; C. H. Nash, San Jose, 93; H. Pfirrmann, Los Angeles, 93; Dr. A. M. Barker, San Jose, 93.

100-bird race, professionals—Guy Holohan, Los Angeles, 97; Fred Willett, San Francisco, 96; L. Hawxhurst, San Francisco, 94; Dick Reed, San Francisco, 93; C. A. Haight, San Francisco, 92.

50-bird race for Ford championship trophy—Frank Mellus, Los Angeles, 49; O. N. Ford, San Jose, 49; Henry Pfirrmann, Los Angeles, 48; Harry Baldwell, Stockton, 47; Ed Staunton, Winnemucca, Nev., 47; E. C. Davison, Modesto, 46; Dave Ruhstaller, Sacramento, 46. Won by Mellus in shoot-off with Ford—Mellus 24 out of 25 and Ford 23 out of 25.

50-bird race, professional—Dick Reed, San Francisco, 47; Fred Willett, San Francisco, 47; Guy Holohan, Los Angeles, 47; L. Hawxhurst, San Francisco, 46; J. A. Cook, San Francisco, 44.

Doubles, 25 pair, for O. N. Ford three-win trophy—O. N. Ford, San Jose, 39; Tony Prior, San Francisco, 38; C. E. Groat, Los Angeles, 38; H. Sargent, Los Angeles, 37; George Ellis, Stockton, 33.

Doubles, 25 pairs, professionals—Dick Reed, San Francisco, 48; L. Hawxhurst, San Francisco, 40; C. H. Knight, San Francisco, 38; Guy Holohan, Los Angeles, 36; George Oliver, Los Angeles, 34.

High average—O. N. Ford, San Jose, 146 out of 150 targets; Billy Varien, Pacific Grove, 142; Frank Mellus, Los Angeles, 142; Tony Prior, San Francisco, 141; Henry Pfirrmann, Los Angeles, 141; H. Stelling, San Francisco, 141; N. A. Howard, San Francisco, 140; D. C. Davison, Modesto, 140.

High average, professionals—Guy Holohan, Los Angeles, 144; Fred Willett, San Francisco, 143; Dick Reed, San Francisco, 140; L. Hawxhurst, San Francisco, 140; J. A. Cook, San Francisco, 135.

Professional miss-and-out race—Dick Reed, San Francisco, 25 birds straight. Second, Otto Feudner, San Francisco.

Amateur miss-and-out race—Henry Lorenzen, Newman, 18 birds straight. Second, H. Hinman, San Jose.

Chehalis Club.—F. M. Troeh of Vancouver, Wash., J. A. Dague of Tacoma, Mark Siddall of Salem, Ore., P. H. O'Brien of Portland, J. W. Seavey of Portland, Hugh Fleming of Seattle, F. Campbell and B. Bales were trophy winners in the second annual shoot held May 20 by the Chehalis Rod and Gun Club at Millett field. Thirty visitors from out of the city participated in the event, which was a splendid success in every way, the only drawback being unfavorable weather conditions. Tacoma, Seattle, Portland and Vancouver were well represented. In the 15-bird events the first was won by Poston of San Francisco, with 144; second, Schneider, 129; third, O'Brien of Portland, 143; fourth, Troeh, Vacouver, 139; fifth, Downs, Chehalis, 133; sixth, Riehl, Tacoma, 138.

Sportsmen's Row

Officers elected by the California-Nevada Association are: George H. Anderson of San Jose, president; Dr. R. N. Fuller of Tulare, vice-president; Clarence A. Haight of San Francisco, secretary-treasurer; H. A. Hine of Eureka, H. Ogilvie of Lindsay, H. Garrison of Modosto, A. G. Flickinger of Vallejo, W. S. Peace of Elko, Nev., and F. Mellus of Los Angeles, directors.

* * * *

Just think—three years ago Heine Pfirrmann didn't know the first thing about shooting and now he can bang a 100 straight in a championship event. Heine says all you got to do is to keep practicing.

* * *

O. N. Ford is a popular fellow down in San Jose. There are hundreds of autos named after him.

* * *

Clarence A. Haight handled the office work of the big shoot with his customary thoroughness. Clarence has a crew that knows how to look after the details.

* * * *

J. S. French was prominent among those present.

* * * *

Toney Prior was not able to show his best. He was troubled with an attack of hay fever and could hardly see the birds, much less bust them.

* * * *

John W. Considine broke his trusty gun and was forced to use a strange weapon. It made a difference in his scores.

* * * *

W. J. McKagney had his face cut by a bucking gun but gamely shot through the program, although he was in pain every time he pulled the trigger.

* * * *

La Salle, Ind., May 25.—With a perfect score of 100, C. G. Burmeister of Chicago won the Interstate championship event at the fortieth tournament of the Illinois State Sportsmen's Association, which closed a three-days' meet here today. Burmeister is thereby entitled to enter the national amateur championship at the Grand American Handicap at St. Louis in August. L. B. Clark, of Chicago, and Chan Powers, Decatur, followed him closely with 99. In the shoot-off for second position, Powers won the honor.

* * * *

One pleasing bit of information is given by George B. Nees of the Olympic Club. He has recently returned from Lake Alanor in Plumas county and declares that it is an ideal trout fishing country. He caught some big ones, the largest weighing eight pounds. The weather was a bit cold when he was up there a week ago and perhaps the recent storm has hit there, too.

* * * *

The newly organized Galt Gun Club will stage a shoot at Kreeger's Grove, just outside of Galt, on Sunday, June 4th. Refreshments and amusements will be tendered by the club.

* * * *

H. H. Ricklefson, who organized the Bay View Gun Club, has been in San Francisco for several weeks past and has been busy greeting old friends. Ricklefson is now a professional, with the Winchester company.

* * *

The deer of the Bangor district are proving too plentiful for owners of young orchards at Oroville. Young trees are being eaten and the tracks of deer about the trees lead to the belief that the destroyers are none other than the big game. Several deer have been seen feeding on the trees. As it is unlawful to shoot the deer at this season of the year, the orchardists are at a loss to know what to do.

* * * *

Dr. Peck of Los Angeles, Cal., recently landed what is believed to be the largest trout ever caught in Southern California. The fish weighed nine pounds and twelve ounces and was thirty-six and one-half inches long. Lon Garwood, of the same city, captured a trout which measured thirty inches and weighed seven pounds and nine ounces. Louis Kennedy registered third best with a six-pound trout, measuring twenty-seven inches. All of these big fish were taken from the Ventura River, near the Casitas bridge.

* * * *

State Gam Warden Dehart of Montana announces that warrants will be issued for suspects in the slaughter of seventy-three elk in the Yellowstone Park district. The animals were killed for their teeth. A large corps of game warden has been accumulating evidence and some sensational developments are predicted.

* * * *

Jacksnipe, it is said, have been very plentiful the past month or so on the marshes in Nebraska, in the vicinity of Omaha, and some shooting on them has been done, notwithstanding that these birds, as well as geese and ducks, are protected in the spring by the Federal migratory bird law.

Tacoma Fly-Casting.—Heavy winds prevented running off the complete program of the Tacoma Bait and Fly Casting Club on May 21 in Point Defiance Park. The high average in one quarter-onuce event, the only one tried in the wind, saw B. B. Perrow win with an average of 101 feet 1 inch. The longest single cast of the day was made by W. J. Bailey with 126 feet. Following are the averages:

B. B. Perrow, 101 feet 1 inch; William J. Bailey, 100 feet 6 inches; R. B. Nason, 96 feet 6 inches; H. J. Nason, 80 feet 10 inches; C. R. Werner, 44 feet; W. L. Richards, 55 feet; D. E. Gilkey, 50 feet 9 inches; R. Hutchinson, 28 feet 4 inches; and Carl Coon, 21 feet.

OREGON GAME COMMISSION ENTERTAINED.

Members of the Oregon State Game and Fish Commission and other Oregon officials were guests of honor at a picnic held at Winchester on May 21st under the auspices of the several sportsmen's organizations of the city. The program included a trapshoot, fishing in the Umpqua River, salmon bake and other entertainment features. The Roseburk Juvenile Bank furnished music for the occasion.

Preceding the picnic the game and fish officials were taken to the North Umpqua River hatchery on a trip of inspection. They will be asked to enlarge the capacity of the hatchery, as well as to establish an auxiliary plant for the propagation of trout. Moving pictures of the festivities were taken by William Finley, State Biologist.

Although there were frequent showers during the day not less than 500 people attended the picnic.

Portland Club.—F. O. Joy surprised himself, friends and relatives on May 21st when he finished the day with 92 per cent, thereby winning high amateur honors at the regular weekly shoot of the Portland Gun Club at Everding Park. This is the highest Joy has ever made. He was high gun over all until E. B. Morris, a professional, scored 94 per cent.

Only one more weekly shoot is on the program before the annual Northwest shoot at the Portland Gun Club grounds, June 4th.

Miss Gladys Reid is in line to win the Imperial Hotel diamond medal. Miss Reid, Al Seguin, J. C. Morris and H. A. Pollock won points on the trophy, and Miss Reid has won enough now to give her a good margin. The tourney for the trophy was finished June 1, and the winner will be in possession of the medal for one year.

Following are the scores made: Abner Blair 90, F. O. Joy 92, E. B. Morris 94, A. L. Zacherison 71, J. S. Crane 57, Al Seguin 82, A. B. Van Arnam 80, J. C. Morris 77, James Reid 88, Miss Gladys Reid 72, A. W. Strowger 71, and H. A. Pollock 86.

Vernon Club.—The George T. Cline handicap shoot was held Sunday at the traps of the Vernon Gun Club and resulted in a tie between Reid and Brawner, each with a score of 48x50. They shot off at 25 birds from their handicaps of 16 and 18 yards respectively. Reid winning his initial leg on the trophy by breaking 22x25 to Brawner's 21x25.

Following the Cline competition, the Wm. H. Hoegee handicap was placed up at 50 birds, yardage handicaps. C. W. Fish, shooting from 16 yards, broke 48x50 and was declared the winner. Following are the complete results:

	Hdcp.	Cline trophy. 50	Hoegee trophy. 50	20-ga. trophy. 25
Manderville	17	45	46	18
S. A. Bruner	19	45	46	21
O. Evans	18	46	47	16
Miller	16	40	..	..
Van Ness	16	36	39	..
A. W. Bruner	16	38	42	14
C. W. Fish	16	46	48	21
C .S. Smith	16	25	30	..
Reid	16	48	36	..
Dierdoff	18	41	47	..
White	18	40	40	..
Meek	18	44	40	..
Bole	18	44	43	..
Braidner	18	48	..	..

Porterville Club.—The Porterville Gun Club held its final handicap shoot of the season Sunday morning at the grounds on the old Cornell race track. George C. Murphy and Earl Martin were the only two to shoot 300 times, the minimum set at the start, and Murphy beating Martin by four birds will be awarded the silver trophy spoon. Murphy broke 266 rocks out of 325 and Martin 292 out of the same number.

The club has had a fairly successful season and next year expects to do still better, as interest here has been growing in trap shooting. The scores:

Dr. S. A. Berber 25x25, Guy Nnupp 97x100, Elmer James 48x50, I. Jay Boothe 47x50, H. D. Blanchard 70x75, H. Eckard 70x75, Geo. Small 93x100, P. M. Scofield 23x25, Richard Hoyt 137x150, Geo. C. Murphy 296x325, James Rohlick 137x150, Earl Martin 292x325, Harry Quinn 111x125, J. L. Mitchell 201x225, H. F. Elliott 66x75, W. E. Sprott 44x50, Howard Estes 131x150, E. S. Lawson 108x125, Harry Casad 151 x175.

Los Angeles Club.—Charlie Nichols, a crack blue rock crusher from the Los Angeles Athletic Club, annexed another diamond scarf pin in the diamond handicap of fifty targets staged Sunday at the Los Angeles Gun Club, by breaking forty-six birds out of the half-century from 20 yards.

Shooters competed on the season trophies following the diamond contest. High score was made by H. E. Sargent, with 49x50.

THE FARM

STOP SPREADING DISEASES.

How often do you clean up the water pans in your hen house? You ought to clean them every day. For a dirty water pan is the surest way of spreading disease throughout your flock.

The best way of handling water in the poultry house is to keep it in a cheap, flat wash basin that can be easily cleaned and refilled. It doesn't pay to bother with patent water tanks. You will have to fill them just as often as the basins, and they are harder to clean up.

Place the open basin on a box some 8 or 10 inches high and perhaps 18 inches square, and make a runway for it. This keeps it from filling up with dirt and straw from the floor and the hens do not climb into it when drinking from it.

Then put the box and basin in a sunny corner of the house away from the roosts and nests, so that no dirt can fall into it from above.

Clean it and refill it with clean, fresh water every day and you will have put thedisease germs to flight indefinitely. —Wisconsin Station.

FEEDING YOUNG PIGS.

It pays to feed the young pigs as much as possible both through their mother and later directly from the trough. Never again will hemake such rapid and cheap gains and it pays to keep him growing as rapidly as possible while young. To this end the sow should be given all the good milk producing feed she will eat. When the pigs are about a month old they will begin to need something in addition to the mother's milk, even though she is well fed.

As soon as the pigs will eat they should have skim milk in a shallow pan. Then a slop made of milk, some shorts, a little bran, and some oil meal or tankage. If this is fed with corn and the pigs are given plenty of exercise there should be no trouble from either thumps or scours. Mix by the weight rather than by measure four parts of corn, four parts of shorts, one part of bran, and one part of tankage. The little pigs should always be fed in a creep of some sort, that is in a small pen into which they come through and which shuts out the sows and larger pigs that would otherwise rob them. As the pigs become older, the amount of corn in the ration may be gradually increased until it has been doubled.

In addition to these methods of feeding which have given good results at the Missouri College of Agriculture, two prime essentials must be kept in mind. The pigs must be in the sunshine and direct light should get into the sleeping quarters to kill disease germs. Plenty of exercise is also important.—L. A. Weaver, Missouri Experiment Station.

FEEDING OF LAMBS.

We all know, from our experiences in handling animals, how susceptible most of the domestic animals are to digestive disturbances from sudden changes of feed, water, and conditions of environment.

While on the range lambs eat the native grasses and have five to ten miles of exercise every day. When they are brought to the feed lots, conditions are all changed; they pile up in the restricted quarters and become overheated. The feed is changed abruptly. The feeder should always bear in mind that when he takes lambs from the natural conditions of the rangs and places them under highly artificial conditions, he is jeopardizing the health of his sheep and the welfare of his enterprise. The first month should be given to seasoning the lambs to their new conditions, and gains should not be expected, says a writer from the Colorado Agricultural College.

The crux of the whole matter is that heavy losses in feed lots are due, not to communicable diseases, but to bad judgment in feeding and handling. For this reason the losses are usually heaviest during the first month, and a change of feed, unwholesome feed, or sudden increase in the amount of feed, will mean more pelts on the fence.

To feed lambs without heavy loss and secure satisfactory gains necessitates eternal vigilance, experience and common sense, and there is no other business that requires more.

ARE ACORN HOGS GOOD?

A correspondent to the Pacific Rural Press desires to know "if it is possible to use acorns at all" in feeding to market hogs, and "what time in the hog's life they may be used without putting the hog on the undesirable list," and receives the following reply:

"As a general thing a hog buyer is so suspicious of a hog which he knows has come from an acorn district that he doesn't want to buy him at all. There are, however, a great many hogs brought of the acorn districts as feeders every year and after two or three months of good grain feeding they pass muster with the butcher. The principle is that they should be grain fed from the beginning along with the acorns to support the acorn fat. An acorn hog is otherwise so soft that it does not make even a medium grade of edible pork. Acorns are a good growing feed for hogs, when grain is fed with them; but the practice of letting the hogs run on acorns alone is surely not a profitable one."

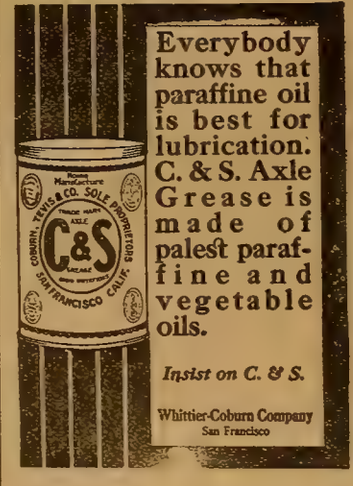
NOTHING BUT GOOD RESULTS.

Have used GOMBAULT'S CAUSTIC BALSAM for more than 20 years. It is the best blister I have ever tried. I have used it in hundreds of cases with best results. It is perfectly safe for the most highly nervous person to use. This is the largest breeding establishment of trotting horses in the world, and use your blister often.—W. H. RAYMOND, Prop. Belmont Park Stock Farm, Belmont Park, Mont.



USED 10 YEARS SUCCESSFULLY.

I have used GOMBAULT'S CAUSTIC BALSAM for ten years, have been very successful in curing curb, ringbone, capped hock and knee, bad ankles, rheumatism, and almost every cause of lameness in horses Have a stable of forty head, mostly track and speedway horses, and certainly can recommend it.—F. C. CRANER, Training Stables 990 Jennings Street, New York City.

FOR SALE CHEAP.

One handsome bay gelding, Dexter Lou, Reg. 52610, by Kinney Lou, dam by Dexter Prince. Matinee record 2:24 trotting. Paces under saddle, and is safe for a lady to ride or drive. Height 15.3; weight 1100 lbs., and sound.

One Miller Cart, almost new, weight 40 lbs.; new tires, and cost $95.00.

One track harness, breast collar, and two minute attachment; fine set of reins; cost $75.00.

One set buggy harness, complete. Moffett leather; cost $50.00.

One Toomey Buggy; pneumatic tires, ball bearing, new tires in front; good coat paint; two passenger. Roomy, in good condition, and can be used with poles; cost $250.00.

Will sell horse, buggy and harness for $150—separately. Miller cart and track harness for $25, separately; or $175.00 takes all.

The horse would make a fine matinee horse and is fine under saddle.

This is a $1,000 bargain for $175. Address

325 Front St., Salinas, Cal.

RACE TRACK FOR SALE.

The Ukiah race track, located a little less than a mile from the Court House at Ukiah and bounded by the State Highway on the west, the county road on the south, and the Northwestern Pacific Railroad nearly the entire length on the east side of the track. The property consists of twenty acres. Fifty-nine good box stalls, good grandstand, fencing in good order, and one of the best half mile tracks in the state. An excellent winter track and an ideal place to work horses during that season. Plenty of adjoining drives for jogging horses. Two wells on the premises as well as water from the city water works, with tanks conveniently arranged for sprinkling.

This is the only race track in Mendocino county and the location of the county fairs. Ukiah is the county seat and has a population of about 3000, is in a most fertile valley in which all kinds of fruit, vegetables, hay, grain and hops are grown. Has excellent water; no malaria or mosquitos. It has paved streets, good sewerage, and splendid gas and electric light works. There are many standard and thoroughbred horses in this county and the people are a race loving lot. This property is offered for sale at a less price than adjoining property is held at. For terms and further particulars address

F. W. KELLEY,
Care of Breeder and Sportsman.

FARMS FOR SALE

Choice Land in Idaho

Lewiston, Idaho, is situated at the forks of Clearwater and Snake rivers and has transportation to the coast.

960 acres 7½ miles from Lewiston, Idaho, 4½ from Lapwai, Idaho, on main traveled road, all in cultivation except about 15 acres, all level land, just a little rolling, 320 acres of fall wheat in, 225 acres fall plowed for spring crop, about 30 acres in alfalfa. All fenced and cross fenced. Two good springs with big cement water troughs, well, windmill and cement reservoir, water piped to house, 7 room house, hot and cold water and electric lights. Large horse barn with hay mow in the center, electric lights in barn; cow barn with two box stalls; hog pens, shade trees, chicken houses, blacksmith shop, wagon shed, granary, outdoor cellar with bunk house overhead. $85 per acre; will take one-third down, time on balance to suit purchaser, at 7 per cent interest. One-third of crop goes with place if sold any time up close to harvest. Mild climate, can raise all kinds of fruit, grain and vegetables. Wheat in this country goes from 35 to 65 bushels per acre, barley 40 to 80 bushels per acre.

320 acres 4¼ miles south of Vollmer, Idaho, 275 acres in cultivation, balance in pasture and timber, farm land lays practically level, one-third of crop goes with place if sold before harvest. Some fall wheat already sown. All fenced and cross fenced. Quarter section of it fenced hog tight; good four-room house, wood shed, and out of door cellar, nice grove around house, well at house, fair stabling and out buildings, spring and spring creek close to barn, three springs on place. Price $70 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

238 acres 4½ miles from Lewiston, Idaho, 175 acres in cultivation, 25 more can be cultivated, balance good bunch grass pasture, fenced and cross-fenced, good spring creek runs across place, small house, station on place for Johnson R. R., two grain warehouses at station. Price $70 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

160 acres of timber land, good farm land when timber is cleared off, all can be farmed except about 2 or 3 acres. Good timber, yellow pine and fir. Price $4000. 40 miles from Lewiston, Idaho. Well located to log off.

240 acres 6 miles from Asotin, 12 miles from Lewiston, Idaho, about 75 acres in fall wheat, about 75 acres more can be cultivated, balance in bunch grass pasture, two springs, small house, all fenced. Price $40 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

DISEASES

Success in live stock farming has its foundation in maintaining good health in the animals. The author has specially emphasized the causes, prevention and early recognition of common diseases. COMMON DISEASES OF FARM ANIMALS is an authoritative guide to the farmer, but does not trespass upon the domain of the veterinarian. The chapter upon the best method of telling the age of farm animals will mean money in the bank when you make your next purchase. An entirely new book, giving the latest word upon the subject by the leading authority, Dr. Craig.

With 124 illustrations, 334 pages. Octavo. Handsome cloth. $1.50 net. Postage or express charges extra.

GUNCRAFT

By W. A. Bruette

A modern treatise on guns, gun fitting, ammunition, wing and trap shooting.

The theoretical side of the subject has been covered with a scientific accuracy which makes it an up-to-date book of reference, and the practical side of wing shooting, gun fitting, the master eye, defects in vision and other important questions have been treated in a way that will enable either the expert or the amateur to determine if he is shooting with a gun that fits him and how to decide upon one that does. It will enable him to ascertain why he misses some shots and is successful with others. The secrets of success in trap shooting, as well as the peculiarities in flight of the quail, the jacksnipe, the woodcock, the ruffed grouse, and the duck family, are illustrated by drawings and described in a way that will facilitate the amateur in mastering the art of wing shooting.

Cartridge board cover, $1.00; Cloth, $1.50

FAMOUS TROUT STREAMS

Steelhead fishing in the Big Lagoon, Humboldt County, is now in full swing. The fish this year average from nine to twelve pounds.

Do not overlook the Eel River Fly Fishing for the Big Steelhead from July until October in the famous Greigs, Fortuna, Van Duzen and Weymouth pools—fresh run fish that weigh from nine to twenty-five pounds—light tackle—excellent resorts close by—only ten hours from San Francisco.

The fishing streams that are found so profusely in the new territory north of Willits embracing Humboldt, Trinity and Mendocino Counties offer the best of coast stream trout fishing. If you want to fish, go where the fish are.

LOW EXCURSION RATES

"Vacation-1916" gives list of hotels and resorts in this section, and our new "hunting and fishing" booklet will soon be ready for distribution. Call at 871 Market Street or write J. J. Geary, G. P. A., Room 808 Phelan Bldg., San Francisco, for copies.

NORTHWESTERN PACIFIC R. R.

BEAUTIFUL BELVEDERE

LOTS FOR SALE

CORINTHIAN ISLAND Subdivision to Belvedere is the most beautiful spot on the shores of San Francisco Bay for a suburban home. It commands an extensive view of the City of San Francisco, Alcatraz and Angel Islands, Raccoon Straits, San Francisco Bay, Richardson's Bay, the Berkeley shore, beautiful Belvedere and Mt. Tamalpais. It is in Marin County, directly opposite San Francisco, and forms the eastern shore of Belvedere cove. It has a naturally terraced, sunny, western slope that is well adapted for many choice residence sites, every one affording most picturesque views of the bay and mountain. It is protected from the prevailing western trade winds in summer by Belvedere Island, and from the southerly storms in winter by Angel Island. The soil is fertile and part of the island is well wooded.

It is less subject to fog than any other place near San Francisco. The summer fog, as it rolls in from the ocean, splits on the western slope of Sausalito, part of it flowing in a line with Angel Island towards the Berkeley shore, and part of it along the southern slope of Mt. Tamalpais, leaving Belvedere, Corinthian Island and Raccoon Straits in the bright sunlight, while the fog banks can be seen as a white wall both to the north and the south.

There is very little available land about the shores of San Francisco Bay that is desirable for homes, especially for those who love boating and kindred sports. The Alameda and Contra Costa shores of the bay are the lee shores and receive the full brunt of the boisterous trade winds which lash the shoal waters near the land into muddy waves, making boating both unpleasant and dangerous. To the north of the city and in Marin County the land from Sausalito to the entrance of the bay is a Government reservation and will never be placed on the market. The shores of Richardson's Bay are not at present convenient to boat service and, aside from Belvedere and Corinthian Island, there is little or no land near any ferry landing that possesses the natural advantages, improvements and possibilities that are offered on Corinthian Island. Concrete roads, pure water, telephone service and electric light wires are already installed. It is only ten minutes' walk from any point on the property to Tiburon boats, and but forty-three minutes' ride to the foot of Market Street.

On the point of Corinthian Island the Corinthian Yacht Club has had its home for many years, and on any summer day the white sails of its numerous fleet add to the charming scene, as the trim yachts glide about the cove. Excellent fishing of all kinds for bay fish, including salmon, the gamey striped bass, rock fish and the toothsome silver smelt, is to be had in the cove. There is probably no spot so accessible and in such close proximity to any large city in the world that offers the attractions of climate, magnificent scenery, fishing and boating as will here be found.

For Greatest Satisfaction Use
DOUBLE SERVICE Automobile Tires
Guaranteed 7,000 Miles Service
Absolutely Puncturepoof

Double Service Tires are made double the thickness of the best standard make tires.

This 100% greater wearing surface naturally gives that much more mileage and service. The average of 12 miles of tough fabric and one inch surface tread rubber makes these tires *absolutely puncturepoof*.

These tires excel all others for use in the country over rough and rugged roads as well as on hard pavements. They are as easy riding and resilient as any other pneumatic tire—as air space and pressure being the same.

They are the *most economical* and "care free" tires made and are used where tires must be depended on and tire troubles cannot be tolerated. Many *Double Service* style tires are in use in the U. S. government and European War service.

Our output is limited to a certain amount, but for a short time we offer the following reduced special prices as an introductory Offer:

PRICES

	Tires	Tubes		Tires	Tubes
30x3 in.	$ 8.60	$2.30	36x4 in.	$17.45	$4.65
30x3½ in.	10.55	3.10	35x4½ in.	21.20	5.60
32x3½ in.	12.75	3.20	36x4½ in.	22.50	5.75
33x4 in.	15.75	4.20	37x4½ in.	23.60	6.20

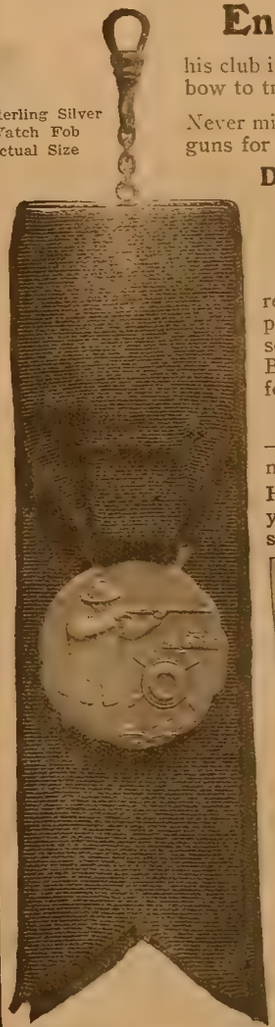
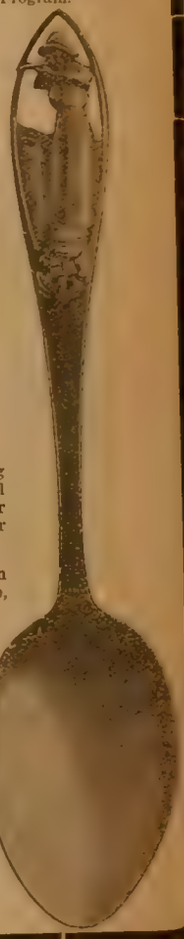
Your Chance To LEARN TO SHOOT



YOU'VE probably said many times: "Some day I'll give this clay target shooting stunt a try-out." The "day" is here and the place is the nearest trapshooting club,—probably you've been asked by some club member to

Enter The Beginners' Shoots



his club is arranging for June. "Obey the impulse,"—make your bow to trapshooting at the local club's Beginners' Shoot.

Never mind if you haven't a trap gun,—the boys at the club have guns for visitors.

Sterling Silver Watch Fob Actual Size

Sterling Silver Spoon—Actual Size To be Given to the Woman Making Winning Score in Special Event on Beginners' Day Program.

Don't Stay Away—Attend This 2nd Annual

DU PONT BEGINNER'S SHOOTS

ready to compete for the sterling Silver Watch Fob (see plate) the club gives the "beginner" making the winning score.

Bring along your brother,—invite your friends and don't forget the

SPECIAL EVENT FOR WOMEN

—a sterling silver spoon (see plate) given to the woman making the winning score.

Help your local club "cop" the cup given to the club in your state or province having the most "beginners" shooting in this Second Annual Beginners' Shoot.

Get into the trapshooting game,—start now and you'll have plenty of fun with your gun in the good "old summer time."

If you don't know the location of the nearest sporting club, write to

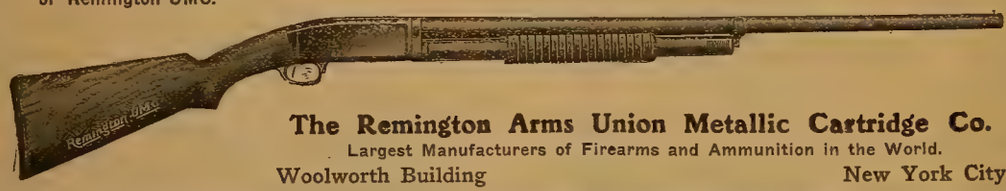
Southern Handicap Shooters Take RED BALL Route To Winnington

Big Winners From Many States Use The "Speed Shells"

(NOTE:—Nine of the eleven Southern Handicaps have been won with Remington UMC Guns, Shells, or Both).

Southern Handicap — Won by F. C. Koch of Phillipsburg, Ohio, 95x100 and 39x40 in shoot-off, shooting Remington UMC "Arrow" "Speed Shells." (19 yards.)

Southern Overture — Won by W. H. Fitzgerald of Clarksdale, Miss., 99x100, shooting "Arrows."



Preliminary Handicap — Tied for by C. A. Courtney, Sulligent, Ala., shooting Remington Pump Gun and "Arrows."

Long Runs — Amateur, H. P. De Mund, 136 straight with Remington Pump and "Arrows." Professional, C. E. Goodrich, 194 straight, same shooting equipment.

Some Other Recent Trap Winnings — Amateur Championship of America (Travers Island), Mississippi State Championship, etc.—records scores aplenty.

This Big Year for Trapshooting Starts Off Like Another Big Year of Victories for Shooters of Remington UMC.

The Big Piece of the Southern Handicap Pie

WAS WON WITH

WINCHESTER

"Leader" Loaded Shotgun Shells

BY INVITATION MEMBER OF

NEW YORK U.S.A.

Honors were divided at the big Southern Handicap Shoot, held at Memphis, May 9-11; but, as usual, the man's size share of the winnings went to Winchester — the **W** brand of shells. To particularize:

THE PRELIMINARY HANDICAP. Won by John R. Livingston, of Springville, Ala., shooting Winchester "Leader" Shells. Score, 96 x 100 and 20 straight on the shoot-off of the tie from the 22-yard mark.

HIGH PROFESSIONAL in this event was Charles G. Spencer, of St. Louis, Mo., who broke 95 out of 100 targets from the 23-yard mark, shooting Winchester Loaded Shells and a Winchester Repeating Shotgun.

COLUMBUS CUP for the highest score on all targets shot during the three days was won by John R. Livingston, shooting Winchester "Leader" Shells, and breaking 546 out of 580 targets.

To Be A Winner, Shoot The Shells The Big Winners Do

PARAMOUNT PARKER GUNS

Look...

Mr. Woolfolk Henderson, an amateur, by scoring .9753% made the HIGHEST OFFICIAL GENERAL AVERAGE FOR 1915

Mr. Lester German, a professional, by scoring .9742% made SECOND OFFICIAL GENERAL AVERAGE FOR SAME PERIOD

CLEAN SWEEP ON DOUBLE TARGETS

Messrs. Guy V. Dering, S. A. Huntley and Woolfolk Henderson won FIRST, SECOND and THIRD, respectively, by scoring 9000%, 8666% and 8400%.

Read...

THE WORLD'S RECORD!!!

At Atlantic City Sept. 15 to 17 Mr Lester German broke all Tournament Records by scoring 647 OUT OF 650 TARGETS, with one run of 372 straight, which is longest for the year.

PARKER GUNS have won the Grand American Handicap 9 times out of 25 offers, once with 100 straight, only time made. Also 7 out of 9 Interstate Championship Events with highest scores ever made, twice with 198 x 200 at 18 yards rise.

Remember

PARKER PACIFIC COAST RECORDS

In California Mr. Henry Pfirrmann won the Pacific Coast Handicap and Mr. J. Foster Couts won the Championship of California.

In Portland, Oregon, Mr. P. H. O'Brien by scoring 241 straight made the record for the Pacific Coast.

If interested in small bore guns write for instructive booklet which will be sent free on request. For further particulars regarding guns from 8 to 28 gauge, address

TRAINING THE HOUND

A PRACTICAL TREATISE ON THE TRAINING OF FOX HOUNDS, BEAGLES, AND COON HOUNDS.

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; $1.50, postpaid.

2:24. Class Trotting 400	2:20. Class Trotting 400

HALF MILE TRACK

GENERAL CONDITIONS.

ALL RACES THREE HEATS—Money divided 25% to the first heat, 25% to the second heat, 25% to the third heat, and 25% to the race according to the rank in the summary. Money in each division 50, 25, 15 and 10 per cent. Should two or more horses be tied for first place at the completion of the third heat, such horses only shall contest in a fourth heat and money divided according to rank in the summary at the termination of that heat. A horse having won the first two heats and drawn or distanced in the third heat shall not lose position in the summary.

Nominators have the right of entering two or more horses in any race by the payment of 2% additional on each horse, but only one of the horses so entered to be started in the race, and the starter is to be named by 5 o'clock P. M. the day before the race is to take place.

Usual 5% additional from winners.

The Association reserves the right to declare two starters a walkover. When only two start they may contest for the entrance money paid in, divided 66 2-3% to the first, and 33 1-3% to the second horse. A horse distancing the field shall be entitled to first and fourth money only and in no other case will a horse be entitled to more than one money.

The Association reserves the right to change the hour and day of any race, except when it becomes necessary to antedate a race, in which instance the nominators will receive three days' notice by mail to address of entry.

The right reserved to reject any or all entries and declare off or postpone any or all races on account of weather or other sufficient cause.

Entries not declared out by 5 o'clock P. M. the day preceding the race shall be required to start and declarations must be in writing and made at the office of the Secretary at the track.

The Association reserves the right to start any heat after the fourth score, regardless of the position of the horses.

Any horse that started in 1915 without improving its record, equaling its record, and not winning a race, shall be entitled to one second.

Address all communications to the Secretary.

THE DEMAND for uniform rules in harness racing ems now about to be supplied and by next year all tting and pacing races in the United States should held under rules that are the same from Maine California. The proposition made by President hn C. Welty, of the National Trotting Association, rly this season to President W. P. Ijams, of the erican Trotting Association, for calling a special ngress of the two associations early next December, s been officially accepted by the latter. The purse of this special congress is to select twelve delegates representing each association and the same to t as a joint rule committee whose decision is to enforced by each organization. The committee ll be fully authorized to draft uniform rules to govn the harness turf of the United States, said rules be enforced through the season of 1917 by members. This will be the first time rules have been iform since 1887 when the American Trotting sociation was organized and since which time ere have been two sets of rules to race by. There s long been a desire on the part of all horsemen t the two associations should unite and it begins look as if such a condition will eventually be ought about. "It is a consummation devoutly to wished."

EIGHT PURSES OF $400 EACH are announced by the Kings County Fair Association for its fair at Hanford October 2d to 7th, 1916. The half mile track at Hanford is one of the best on the coast, and there is no better managed or better attended county fair held anywhere. If you want to enjoy some good sport, earn a little money and spend four days in one of the most prosperous and progressive fruit growing sections of California enter your horses in the Kings County Races. Entries will close July 1st.

THE USE OF BANDAGES.

Why are bandages used? If this question is put to the average groom he will not be able to give you an answer. He applies the bandages as soon as the horse comes in from his work on the track or road because he has been taught that this is the proper thing to do. Theo. B. Doll, a veterinarian writing in Rider and Driver says "bandages, if applied in the correct way, are a great help to the horse's legs by keeping them warm until the circulation has become normal after exercise. Cotton should always be used under the bandage as it is the warmth that is needed and not the pressure. When the horse is exercised the rate of circulation is increased to supply oxygen in greater quantities to the tissues. Since oxygen is the fuel that generates strength and drives the animal body in the same way that coal is burned in a steam engine according to the speed the engine is driven, when the horse is rested after exercise the circulation falls back to the same rate that it was before it was taken out of the stable.

"Now if the horse is not in good condition and the heart lacking tone, after severe work the heart takes longer to regain its former strength and the blood is pumped so slowly through the vessels of the extremities of the legs that the fluids filter through the vessel walls into the tissues of the legs, and we then have what the layman calls filled legs. While on the other hand, if warm bandages are applied the circulation is kept up and the blood does not have time to leave deposits in the tissues, so the bandages then are a help in this case by retaining the warmth and helping circulation, until the heart can regain its tone, and perform its office unaided. Filled legs are also due to organic troubles. In these cases bandages are of no service, as the organic disease must be corrected before relief can be given.

"Examine the bandages after they have been put on by the average strapper and you will find that you can hardly get your finger under the tie string. Instead of helping the circulation in this case it is stopping or cutting off the circulation.

"This is just what you would do if you had a cut on the foot that was bleeding; you would bind a bandage round the leg to stop the blood. For this same reason bandages should never be left on over night, as when the horse rests and the legs are bent, undue pressure is brought to bear upon the blood vessels. They should never be left on more than six hours and never at night. Bowed tendons are caused by the tight string of a bandage and many other troubles, but the tight bandage never gets the blame."

NOTICE TO HORSEMEN.

We desire to call the attention of owners and their agents, who enter horses in races, to the fact that many of them are not complying with Rule 25, by giving the name and address of the owner; the name of the sire and dam and the dam's sire, and when written to later, refuse or do not answer inquiries. This not only causes us trouble, but so hampers the compiling of the Year Book that we have concluded to try and stop it.

No penalty will be attached to the first offense, but after that those who do not comply with the rule may expect either to be fined, identification demanded or their entries declared void. So if you wish to avoid trouble you must comply with the rule which reads as follows:

Rule 25.—"All entries must be made in writing, signed by the owner or his agent, the entry shall give the name and address of the owner and if signed by an agent, the name and address of said agent and the name and address of his principal. Also the class to be entered in, the name, record and color of the horse, whether a stallion, gelding or mare, the name of the sire and also the name of the sire of the dam. If unknown it shall be so stated in the entry. If any of these requirements are not complied with the offending party may be fined not less than $5.00 or more than $50.00 for each offense, and if the facts are falsely stated for the purpose of deception, the guilty parties shall be fined, suspended or expelled."

THE AMERICAN TROTTING ASS'N,
W. H. KNIGHT, Secretary.

COLLEGE SCHOLARSHIP BECOMES A NEW COMPETITIVE SPORT.

After this, to "make the team" will not be the only way for a student at the University of California to become distinguished. The faculty are going to give him a chance to win distinction by being a good student.

The faculty has just adopted a new system of "Candidacy for Honors." Within the next few weeks the University will announce the names of all those Juniors and Seniors in the College of Letters and Science and the College of Chemistry whose work has been of such excellence as to win them the distinction of designation as "Candidates for Honors." This honor is more than an honor—it is a privilege, too, for these "Candidates for Honors" will be given the opportunity of entering new courses planned expressly for students of marked excellence. Moreover, these "Candidates for Honors" will be given special freedom in the use of the library, laboratories, and museums of the University, and other opportunities that the excellence of their past work has shown them worthy to profit by.

The adoption of this new system of "Candidacy for Honors" is regarded as a frank declaration that the educational theorists are profoundly mistaken who for a generation or more have been preaching that prizes, honors, and scholarship distinctions appeal to unworthy motives.

Of late years there has been intense rivalry among the seventy-two fraternities and house-clubs at the University to excel each other in scholarship. The faculty believes that the adoption of the new system of "Candidacy for Honors" will afford valuable new opportunities for the spirit of competition in good scholarship to come into play, and that the fraternities will strive with one another to have as many as possible of their members win designation as "Candidates for Honors."

The University holds that nothing could be more democratic than the creation of this new intellectual aristocracy within the ranks of the students of the University, for admission to that aristocracy of brains, and to its special opportunities for training, is freely open to every student who has the intelligence, the industry and the strength of will to fight his way into the ranks of the "Candidates for Honors."

The University will regard as the highest type of student the man who can have the distinction of enrollment as a candidate for honors without becoming a "dig," who can share naturally and wholesomely in the athletic and other "activities" of student life, and yet hold to the essential truth that good scholarship is the all-important "college activity."

MATINEE AT HANFORD.

Beyond a doubt the most successful matinee races ever held in this locality were raced Sunday at the Kings County fair grounds when approximately seven hundred enthusiasts were in attendance. Satisfaction was liberally expressed by horsemen and spectators at the manner in which the sport was conducted.

Dr. Watkins, R. F. Thompson and Joe Crawford were the judges. W. B. Dolby, W. R. McKay and Perry Gard recorded the time and Clarence Johnson acted as starter. The summaries:

Free-for-all pace:

J. C. L.	(Leggett)	3	1	1
Mollie	(Gallup)	1	3	3
Firebaugh	(Brollier)	2	2	2

Time—1:05, 1:03¾, 1:04½.

2:25 pace:

Unice Direct	(Leggett)	1	1
Ira Basler	(Perry)	2	2

A half mile dash completed the program.

Respectfully,
MARJORIE AGUIRRE.

SANTA ROSA'S GREAT FESTIVAL.

Santa Rosa invites the State and all within its bounds to come to what is expected to prove one of the most unique pageants ever held in the open air in California. It is to be a forest carnival at the time the district fair and harness race meeting of the Breeders is held there. The festivities will begin August 7 and close August 12. It is proposed to make the days and nights of the carnival filled with pleasure for young and old. In fact, the effort will be put forth to make this Santa Rosa's crowning success in the entertainment line and at the same time show Sonoma county's resourcefulness to the world.

Instead of housing piles of products in an inclosed building with very little to relieve the monotony of the scene, it has been decided to have the exhibits arranged under the leafy canopy furnished by a magnificent grove of trees at the race track and fair grounds. The plans formulated by Ney L. Donovan, C. C. Donovan and Edward K. Brown, the latter the builder of the land show of San Francisco and having charge of the Sonoma county exhibit at the Panama-Pacific Exposition, will result in a novelty that will attract thousands.

It is planned to have a model camp, showing people how to camp in the summer time; a model orchard and vineyard with trees and vines bearing fruits; a model dairy, a model chicken farm, and exhibits of all kinds indicating the soil possibilities. The industries will be exploited and acres of attractions will be seen in this pageant of the forest. There will also be the stock and poultry exhibits, the harness races and all sorts of amusements.

High Class Racing Assured

Entries for Breeders' and State Fair Meetings Are Liberal and of Excellent Quality

Lovers of harness racing will read with much pleasure and satisfaction the splendid showing that has been made by the California owners of trotters and pacers in the lists of entries for the Breeders' meeting to be held during the great Forest Festival at Santa Rosa in August, and the State Fair at Sacramento in September. Not in many years has there been a better prospect of close contests between the fastest and best of our horses and there will be many heats paced below 2:05 and trotted below 2:10, in all probability.

The fact that but three programs had been announced by associations in California up to the time entries closed for the Santa Rosa and Sacramento races, makes the liberal showing all the more remarkable and is proof positive that there are plenty of horses ready to race, and it only remains for a real circuit to be organized and announced to put California on the map as one of the best harness racing states in the Union. The entries received in the races declared filled by the Breeders' Association and the California State Fair are as follows:

P. C. T. H. B. A. at Santa Rosa

WEDNESDAY, AUGUST 9th.

No. 1—Breeders' Futurity, 3 Y. O. Pace—$1300.
Starters to be named July 31st.

No. 2—2:09 Class Trotting—$900.
Did not fill—Reopened to close Monday, July 3—$500.

No. 3—2:20 Class Pacing—$900.

Thoroughbred Matters

Reno entries close Tuesday, June 20th. There will be 19 days of racing. One $2500, one $2000, four $1000 and two $500 stakes. See advertisement on page 2.

◈◈◈

Bank the three-year-old for which Geo. Wingfield recently paid $6000, made his first start at Tijuana last Sunday in the Speed Handicap at six furlongs. He finished last. The race was won by Ed Cudihee by six lengths from Harry L., who was two lengths in front of Sangallo. Seven horses started. The time was 1:11 3-5, a new track record, which could have been lowered as the winner came in easily. Bank was the odds on favorite.

◈◈◈

M. L. and Charles Schwartz have purchased the two-year-old colt Sortie from John E. Madden for a price said to be in the neighborhood of $10,000. This youngster is a son of Watercress and Enterprise and was purchased out of the Haggin sale for $4,600.

◈◈◈

A. K. Macomber's good three-year-old Star Hawk may be seen under colors for the first time in the East on the opening day of the Aqueduct session. This imported son of Sunstar is being pointed for the Brooklyn Handicap, one of the most notable of the features on the Metropolitan track.

◈◈◈

Finishing eased up, the Australian mare Carlita won the Champion Stakes for the second time in succession at Melbourne this year, running three miles in 5:22½, which is within a quarter of a second of the Australian record. Messrs. Roger and Rivers, who own the champion mare, are Frenchmen, one of whom is now fighting on the western front. They paid $625 for Carlita as a yearling, and have won more than $75,000 with her in stakes.

◈◈◈

The Kentucky Oaks for three-year-olds, the feature for the closing day at the Churchill Downs track, Louisville, Ky., was won by Geo. J. Long's Kathleen, ten lengths in front of Mandy Hamilton, which was second. Kathleen is by Sempronius—Boema.

◈◈◈

Racing Calendar for May contains a list of 357 thoroughbreds imported in 1915 and 1916. Obviously this is a contingent sufficient to cut a big figure in American racing and breeding. The horses six years old and over are nearly all broodmares and stallions for stud service and are forty-six in number. In the racing forces there are now fifty-nine three-year-olds and 160 two-year-olds. There are also fifty-nine yearlings. No less than eighty-five mares that were in foal when they arrived, have been nominated in the futurity for foals of 1918.

◈◈◈

The thoroughbred Iron Grey, son of Andover, was recently imported from England for the Nordix Club of Warrentown, Virginia, and will be used to sire horses for cross country riding. Iron Grey is 16.1 hands and a horse of powerful build.

◈◈◈

The Juvenile Stakes, having a value of $5,000, was won by August Belmont's imported two-year-old Courtless at Belmont Park last week. Mr. Belmont owned the colt in France and brought him to this country as a yearling. His sire is Negofol, winner of the French Derby and his dam Hour Glass 2nd. Negofol is by Childwick, he by St. Simon. Hour Glass 2nd is by Rock Sand.

◈◈◈

Early Wright, who reached Tijuana with the Wingfield horses last week, says there are many eastern horsemen talking of moving to Tijuana. John W. Schorr and Baker Brothers have applied for twenty stalls each.

◈◈◈

Col. Phil Chinn has purchased from Emil Herz the black horse Black Pine, 6, by Rock Sand, dam imp. Black Poplar by Petronel, second dam Mettle by Surnaby, third dam by Cymbal, fourth dam by The Earl. Black Pine is a grand individual, 16 hands, and Col. Chinn will use him as a sire.

◈◈◈

Woodford Clay, one of the best known of Kentucky racing men and horse breeders, died at Louisville suddenly June 1st. Clay, who was 43 years old, together with his brother dealt extensively in thoroughbred horses and was the owner of many high-class performers of the turf at one time or another, most notable of which was Roamer, the champion of last year. He was the son of Colonel E. F. Clay, of the old firm of Woodford & Clay, breeders of some of the best thoroughbreds this country has ever known. He was a graduate of Yale and unmarried. Clay took naturally to the turf after leaving college and during the last few years raced some smart thoroughbreds in Kentucky and over the Eastern circuit. Among other good horses seen under his silks were Lady Amelia, Running Water, Flying Ship, Outcome, Kentucky Beau and Ocean Bound. He took Roamer to New York and disposed of that great little runner for the price of a good selling plater to Andrew Miller. By the time, of course, the gelding's worth had not been proven. Woodford & Clay bred this son of Knight Errant—Rose Tree II. as well as most of the other horses raced by Clay. Clay disposed of Outcome and Ocean Bound several years ago at Saratoga for $30,000.

SIXTEEN THOROUGHBREDS BRING $66,400.

Sixteen thoroughbred horses belonging to the estate of the late H. B. Duryea, which were brought from the Duryea breeding farm in Normandy, France, to New York to be sold brought an average of $4150 per head. Crimper, a big rangy three-year-old, half brother to Banshee, winner of the 1000 Guineas and a number of important races, brought the top price of the sale—$16,500. Crimper has never won a race but has always been well up in all his starts.

Tranby, a bay colt, a full brother to Banshee, brought the next highest price to Crimper. He is by Irish Lad—Frizette, and went to John Sanford for $6,600. A. J. Joyner, who brought the horses over here and knows them well, was a liberal buyer in the interest, it was said, of George D. Widener of Philadelphia. John Sanford, H. K. Knapp, and Schuyler L. Parsons, all members of the Jockey Club, were spirited bidders and purchasers of some of the best of the sale.

Purchasers and prices follow:

Crimper, ch c by Maintenon—Frizette. Ral Parr	$16,500
Tranby, b c by Irish Lad—Frizette. John Sanford	6,600
The Belgian, ch c by Rabelais—Suffragette Ral Parr	5,100
Farce, b f by Rire aux Larmes—Armenia. A. J. Joyner	5,000
Frizzle, ch h by Biniou—Frizette. Oneck Stable	7,500
Medora, b f by Rabelais—Mediant. P. A. Clarke	3,600
Panoche, b c by Irish Lad—St. Inez. S. L. Parsons	3,500
Killadar, b c by Irish Lad—Ascot Belle. A. J. Joyner	3,500
Herodate, ch c by Uncle—Herodia. S. D. Riddle	3,000
Iniskellen, b f by Irish Lad—Zuna. S. L. Parsons	3,000
Muckross, blk c by Irish Lad—Stillwater. A. J. Joyner	2,800
Teetotal, b f by Irish Lad—Teetotum. A. J. Joyner	1,800
Mint Drop, b f by Irish Lad—Mintberia. L. Feustel	1,600
The Minx, b f by Irish Lad—Artless. Quincy Stable	1,100
Censure, b f by Irish Lad—Census. Oneck Stable	1,100
El Dinero, ch c by Uncle—Herodia. Henry Watterson	700

An Australiasian paper reports the death of John Rose ,inventor of most of the starting machines now in use on the Australasian tracks. He was 75 years of age.

◈◈◈

Mr. John Porter, the eminent English trainer, recently celebrated his seventy-eighth birthday at his home, Ormonde House, Newbury. From 1868 to 1902 John Porter trained seven winners of the Derby, eight horses who ran second in the great classic race, and two that ran third in the Blue Ribbon contest. The winners were Bluegown, Shotover, St. Blaise, Ormonde, Sainfoin, Common and Flying Fox; the seconds were Pero Gomez, Paradox, Miguel, La Fleche, Matchbox, Batt, Simon Dale, and William the Third; while the two third-place geters were Orwell and Friar Tuck. Porter's record in the Derby is one of which he is naturally very proud, for he has trained more winners of the Derby than any other trainer in the long history of the British turf.

◈◈◈

The war tax which is imposed on admission tickets to races in Australia and Canada is bringing a large revenue to those governments. There is a tax on betting in New South Wales which is also bringing much money into the war chests. The Sydney Referee, in referring to the matter, says: "For the first three months of the year the ticket tax has returned £15,000, so that something about £60,000 from that source for the current year appears assured. But that will be greatly augmented by the amount which will be jointly contributed by the bookmakers and clubs in connection with license fees. At Randwick, for instance, bookmakers who bet in the paddocks have to pay the Government £50 each, in the Leger £20, and on the flat £5. As there are 140 bookmakers licensed for the paddock, a similar number for the Leger, and 130 for the flat, the total the Government will receive from that source will be £10,450."

◈◈◈

Consuelo II., dam of this year's Kentucky Derby winner, will be sent to Out of Reach this season and it is the hope that another George Smith will be bred. Out of Reach is now the premier stallion at James Butler's East View Farm near Tarrytown, while Mr. Sanford bought Consuelo II. before he purchased his Derby winner. It was the suggestion of Mr. Butler that the mare be sent back to his stallion and this offer was made before the black colt had scored his remarkable triumph. As a matter of fact, George Smith, though an American bred colt, is more of an Englishman than is Star Hawk, the one to finish second to him, though the Macomber colt has to be programmed imported for the reason that he was born abroad. Star Hawk is English enough on the sire side, being by Sunstar, but his dam, Sweet Finch, was American bred and of very stout American lineage, while George Smith is by an imported horse out of an English mare.

FIFINELLA WINS DERBY AND OAKS.

The English Derby the greatest of racing classics, was run at Newmarket May 30th, and was won by the three-year-old filly Fifinella, with Kwang Su second and Nassovian, and English bred colt owned by the American John Sanford of New York, third. The Derby is at a mile and a half. Ten horses started in the race. Fifiinella is owned by Mr. E. Hutton and two days later the same filly won The Oaks, the great classic at a mile and a half for fillies of her age. Fifinella was at 11 to 2 in the Derby and at 8 to 13 in The Oaks. The value of the Derby was about $35,000 this year and The Oaks had a value of of $25,000.

The last time both classics were won by the same horse was in 1908, when Signoretta, owned by Chev. Ginestrolli, won the Derby in such sensational style at the long price of 100 to 1, and repeated the performance two days later in The Oaks.

There can only be one race at less than a mile for three-year-olds and upwards at any of the meetings held in the east under the rules of the Jockey Club. This rule went into effect June 1st.

◈◈◈

The recent meeting at Toronto, Canada, is said to have been the greatest in point of attendance of any meeting ever held there. The betting proved much heavier than the machines could properly handle, and men were at the track as early as 7 a. m. with winning tickets of the previous day, waiting to have them cashed, and although the force of attendants would have been ample under ordinary circumstances they were forced to stand in long lines awaiting their turns with the cashier.

BOOK NOTICES.

We have received from the publishers, The Horse World Co., of Buffalo, N. Y., a copy of "Shoeing and Balancing the Light Harness Horse," from the pen of James Clark who, before he abandoned the forge and anvil for the pen, was one of the most widely known shoers of light harness race horses in this country. Mr. Clark is not only a most skillful shoer, but he is a deep student of the anatomy of the horse's foot and leg and perhaps no other man who has studied the subject possesses greater knowledge regarding corrective treatment for faulty action by restoring the proper balance to the foot and leg which has been neglected or improperly treated, than he, and in this work he has given to those interested in the light harness horse a book that no owner, trainer or shoer can afford to leave out of his library. In his book the author, in language so simple and with instructions so plain that they are easily understood, commences with the foot of the colt and tells how it should be treated and shod to keep the legs in balance; tells hom to treat and shoe the horses that develop the various forms of unsoundness and faults of action which mark the trotter and pacer; tells how to make various kinds of shoes to correct the various faults and gives to horseshoers easily-understood instructions in making various tools needed to make shoes of peculiar design. Drawings of more than fifty shoes of different designs which have been worn by noted Grand Circuit trotters and pacers are reproduced in the handsomely bound book, with full explanation as to the particular purpose for which each shoe is intended. Price of the volume is $1.00 postpaid.

"Diseases of Cattle" is the title of a volume of 550 pages just received from the United States Department of Agriculture, Bureau of Animal Industry. The work is revised from the edition of 1908 and is made up to date in every particular. The changes made consist mainly in a revision of the chapters on diseases of the digestive organs and infectious diseases and a new chapter on animal parasites. The work is intended for the use of the farmer and stock grower. One hundred thousand copies have been printed and parties desiring a copy should write to their Congressman.

The Springfield, Ohio, horse show which opens next Wednesday, will have a special event for the runabout horses Jack Tar and Brother Jed. These two horses are considered among the best in the world in their particular class, and yet they have never met. The president of the Springfield Horse Show Company is offering a silver cup for this event, and it will be one of the headline features of the Springfield show. Jack Tar is a roan gelding that has been undefeated in the middle west and at Denver last January he was in better shape than ever. He is owned by John R. Thompson of Chicago. Brother Jed is a little bay gelding with wonderful speed and action. In the east where he has been shown he has won the blue ribbon every time he has been shown but once. When these two horses meet at Springfield a real contest can be expected. Brother Jed is owned by Walter I. Hanley of Providence, R. I.

Flower Direct 2:00¾ has broken down and will not be raced this year. One of the greatest races ever won by Flower Direct occurred at Detroit two years ago when Directum I. 1:56¾ won the first two heats of the free-for-all pace with Frank Bogash Jr. close up. After finishing well up in third place, Flower Direct won the next three heats. Excellent time was made that day, the time of the heats being 2:03¾, 2:02½, 2:02¾, 2:07, 2:09. Del Rey, Earl Jr., Evelyn W. and Hal B. Jr. also started.

GREATEST IN STATE'S HISTORY.

California State Fair to Outshine All Previous Exhibitions.

California's 1916 State Fair will be bigger, greater and grander than any preceding fair. Not only will the exhibits be more numerous and varied, but the crowds attending the fair from September 2 to 9 will find many improvements in the grounds and a number of new buildings. Other state fairs have been huge successes, but Secretary Charles W. Paine declares that the 1916 fair will eclipse them all.

Preparations are now being made for the fair. From this time on the fair grounds and the buildings will be a scene of activity. Exhibits will begin to arrive in the near future.

Early in August the new $30,000 women's building will be completed. McLean & Peterson, the contractors in charge, are satisfied with the progress that is being made on the new structure. Work on the building started on March 25. The object of the state in providing the building was to make the women attending the state fairs comfortable. On the ground floor of the building will be an extensive rest room. An art exhibit will be on the second floor and in an annex there will be a completely equipped emergency hospital.

One big feature that has pleased thousands in years past will be repeated this year. There will be another locomotive collision. The fair directors are already makin garrangements for the staging of this spectacular event.

Before the state fair opens on September 2 the new $10,000 sewer system, now being installed under the direction of the state engineering department, will be in operation. The main sewers have already been installed and work is now being rushed on the laterals. The sewer will connect with the city mains, immediately south of the grounds.

Within the 50 days, work on the enlarging of the poultry building will be completed. The state engineering department has received bids, McLean & Peterson presenting the lowest offer, $4,586. Within a few days the contract will be awarded and work started. The building must be completed within 50 days.

Five acres on the northern end of the grounds are being leveled and as soon as this work is finished more hog and cattle sheds will be constructed. Secretary Paine says that the hog and cattle exhibits will be the most complete in the history of California. This feature of the big show will outrival the stock display at the Panama-Pacific International Exposition. In years past about 450 head of hogs were usually on display. This year there will be at least 1,000 hogs in the pens.

A number of new herds of cattle will also be on exhibition. Fred W. Keisel and J. M. Johnson, Jr., two of the breeders of Holstein Friesian cattle, will show some of the fancy stock in their herds. Two additional herds of Guernsey and Ayrshire cattle will also be on exhibition. Easton and Ward, horse breeders of Burlingame, have already arranged for their stable accommodations.

Minor improvements are also being made in the interior of the main exhibit building. A handsome room has been fitted up as a meeting place for various horse, hog and cattle-breeding and raising societies which may want to convene during the life of the fair.

Within the next two weeks many counties are expected to apply for space in the exhibit building. A majority of the boards of supervisors throughout the state meet on Monday, and at that time they will take up the matter of granting appropriations through which their counties can install exhibits at the com ing fair.

Those who have not visited the fair grounds for several months will find many new lawns and much new shrubbery in evidence. A number of rough places have been leveled. Instead of the unsightly fence at the entrance there is now an attractive wire fence. The ground has been raised and planted to grass. Rose vines now twine themselves up a majority of the buildings. A wire fence, 1800 feet in length, will replace in front of the grandstand the unsightly wooden fence now there.

WOODLAND WILL HAVE FAIR AND RACES.

Woodland, Cal., June 4.—Yolo County District Fair will be held August 23, 24, 25, 26 at Woodland. It will be an old-fashioned county fair with exhibits of soil products, live stock and races.

The exhibits will be shown down town, in a central location, and the races on the famous old track.

We will again hold races equal to any we have ever had, and will have an exposition far surpassing anything ever seen in Yolo county.

Yours very truly,
H. S. MADDOX, Secretary.

The officers of the association are as follows: A. C. Stevens, president; H. E. Van Norman, vice-president; J. D. Harling, treasurer; H. S. Maddox, secretary; I. H. Gregg, assistant secretary.

Directors: E. A. Bullard, W. H. Gregory, Frank Morris, I. E. Brink, J. A. Murray, G. H. Fish, J. Smith Scott, Emil Kraft and Wm. Gould, all of Woodland; T. G. Schmeiser, Davis; W. O. Russell and F. W. Wilson, Winters; M. H. Stitt, Guinda; T. H. Brock, Esparto; F. B. Edson, Knights Landing; C. A. Minard, Yolo; Wm. Leinberger, Washington; Byron Archer, Madison; John Schlosser, Zamora.

GOOD RACING AT LOCKEFORD'S HALF MILE.

At Lockeford on Friday last there was an old-fashioned picnic, this being an annual event at that place. The farmers and their families gathered from all the country round about, to the number of at least 10,000, and one of the leading amusements for the crowd was horse racing.

The committee advertised two trotting and two pacing races with a half mile dash running race for good measure. The principal feature of the races was the free-for-all pace between the well known circuit pacers Happy Dentist 2:05¼, now owned by J. W. Wakefield of Acampo, Ray o' Light (3) 2:08½, owned by George Need of Galt, and an unknown three-year-old, Billy Bounce by Ray o' Light, owned by Roll Brewster of Galt. In the 2:20 pace he was beaten in 1:18 by Ben Walker, and then came right back and drove out Happy Dentist in 1:06 over the half mile track—flat and of sandy formation.

Happy Dentist holds the state matinee record made at Stockton, in July, 1912, when he beat out Teddy Bear in 2:06¾, 2:07. Ray o' Light was in no condition to pace a fast mile. Going into the air on the back stretch he broke his hobbles and was hopelessly beaten. In the second heat he again went up on the back stretch and came in a bad third. Dan Lieginger, an old-time driver, was again on hand with his pacer Ben Walker and his trotter Prince Mac. Taking them from his farm work for a few days before the races he gave them a few days' of training and at the races he made a good showing and won a little money. The following is the summary:

2:30 pace:

Ben Walker	(Lieginger)	1	1
Billy Bounce	(Brewster)	2	2

Time—1:18, 1:17.

Free-for-all trot:

Too Soon	(George Orr, Galt)	1	1
Peter Scott	(B. Gilham, Acampo)	2	2

Time—1:14, 1:11¼.

Free-for-all pace:

Happy Dentist	(Wakefield)	1	1
Billy Bounce	(Brewster)	2	2
Ray o' Light	(Need)	2	2

Time—1:06, 1:06¾.

2:30 trot:

Prince Mac	(Lieginger)	1	2	1
Ginger	(M. Smithson, Acampo)	2	1	2

Time—1:20, 1:15, 1:14.

Half mile dash, Ted, Grasshoper, Tomatoes. Time, :58½. Ted has won this race four successive years.

The judges of the race were: Starter, Dr. E. J. Weldon, Sacramento; timers, Dr. M. C. Delano, Sacramento, George Orr of Galt and Frank Lieginger of Stockton.

G. H. T.

LAST SUNDAY'S MATINEE.

W. J. K. won a good race at the stadium in Golden Gate Park last Sunday, and if he keeps on improving he will be a hard horse to beat in the races in which he is entered at the Santa Rosa and State Fairs.

James Ryan's Rosie O. also won a good race, defeating Silver Logan and Dibble Wilkes, and Senator H., Joseph Kidd's pacer, won his race in straight heats. The free-for-all trot was declared off. Summaries:

First race—2:20 pace:

Rosey O.	(James J. Ryan)	1	1	
Silver Logan	(O. Dealy)	3	2	
Dibble Wilkes	(S. Benson)	2	3	

Time—1:55½, 1:50.

Second race—2:15 pace:

Senator H.	(J. M. Kidd)	1	1	
Victor Pointer	(D. Keating)	2	2	
Little Jack	(J. M. Kidd)	3	3	

Time—1:42, 1:43.

Third race—Free-for-all pace:

W. J. K.	(W. J. Kenney)	1	3	1
Emma M.	(William Malough)	3	1	2
King Pointer	(H. Campodonico)	2	2	3
Pointer Belle	(J. M. Kidd)	4	4	4

Time—1:40, 1:38½, 1:38½.

Four races are carded for the matinee tomorrow, one of which, the free-for-all pace, will be at mile heats and in which Bradmont, W. J. K., Senator H. and Emma M. will try conclusions. The first two named are entered at Santa Rosa and Sacramento and there is considerable "conversation" as to their relative abilities and also as to how they will class with the horses that are considered too classy to race for fun. Entries for tomorrow are:

First race, 2:20 pace—J. Vermet's Cookey, J. J. Ryan's Rosey O., Dan Healey's Silver Logan, S. Benson's Dibble Wilkes.

Second race, 2:15 pace—Dan Keating's Victor Pointer, Kidd and Luce's Pointer Belle, George Conlan's Little Jack.

Third race, free-for-all pace—George J. Giannini's Bradmont, J. M. Kidd's Senator H., William Malough's Emma M., W. J. Kenney's W. J. K.

Fourth race, free-for-all trot—A. Schwartz's Petrina, J. A. Wilkes' Merrylina, A. Giavonetti's Yoncalla, M. Ford's Minequa.

Racing has started in the middle west over the half mile rings. The big circuits will open at North Randall July 17th, the Grand and the Great Western both starting with this meeting.

◈◈◈

Algier U. 2:16½ by Sidney Dillon, dam Algeciras by St. Vincent, trotted a mile in 2:13¼ on a half mile track handily last month, and the Chicago horse experts think it something remarkable, which it is considering the fact that the race tracks in that locality are only fit for sleigh riding up to about May 1st each year.

ALMADEN D. 2:16¼ IS DEAD.

Word comes that the trotting stallion Almaden D 2:16¼ by Direct 2:05½, dam Rose McKinney 2:2 by McKinney, dropped dead at Echo Lake, Ore gon, on the 10th of April this year, the property o Albert M. Robinson. Almaden D. was bred by Chas Durfee of Oakland and when a two-year-old in 190 won the trotting division of the Pacific Breeders Futurity, value $1250, the Breeders' meeting bein held at Petaluma that year. He won this race i straight heats in 2:25½ and 2:22¼, and it was hi only start that year. The following year Almade started but once and that was in the Occident Stak for three-year-olds at the California State Fair o 1904. This was one of the most severe races eve participated in by three-year-olds, as it went t seven heats and led to the State Board of Agricul ture changing the conditions of the stake so that al non heat winners should go to the stable after thre heats. Almaden won $2,000 for his owner in thi race, and his win was due to the masterly driving o W. G. Durfee, as there were faster colts in the rac than he. The summary of this race will prove inte esting in this connection, and is as follows:

Occident Stake—3-year-old trotters. Value, $3,055:

Almaden, blk c by Direct...(W. G. Durfee) 3-4-3-2-1-1-
Marvin Wilkes, b c by Don Marvin.....
.....(W. Mastin) 1-3-4-1-3-2-
Carlokin, b c by McKinney..(H. Hogoboom) 4-1-1-4-2-3-
Neergard, br f by Neernut.....(Brooks) 2-2-2-3-4-ro
Times—2:18, 2:21½, 2:22¼, 2:23, 2:24½, 2:25¼, 2:28.

Auction pools before the race sold Marvin Wilke $30, Almaden $10, Carlokin $8, and Neergard $6.

Almaden did not start again until 1909 when h was eight years old. Mr. Durfee had sold him then He was raced across the mountains in the middl west and wound up the season at Phoenix, Arizon in November without winning a race. The followin year he started five times and reduced his record t 2:19¼ in a race won at Portland, Oregon, and th next year, 1911, was started a few times but did no win. In 1912 at Seattle, Washington, Almaden D (the suffix having been added to his name to enabl him to be registered) made his last start. He wen to beat his record and lowered it to 2:16¼. He wa then 11 years old. As his death occurred suddenl from a heart affection it is more than probable tha the race he went through as a three-year-old whe he won the Occident Stake affected that organ s that he was never thereafter the same horse, as hi races showed. No gamer horse ever raced than A maden when he won the Occident at Sacramento i 1904. In the stud he never had a very large patro age, yet he is the sire of three trotters with record two of which are in the 2:10 list. They are Albalom 2:08¼, Dean Swift 2:08 and El Bell Maden 2:17.

HORSE SHOW A SUCCESS.

Imagine the best horses you have ever seen, wel driven or ridden on a springy green turf in a wel lighted ring, and you have some idea of the Thir Annual Commencement Horse Show recently held b the agricultural students of the University of Mi souri. The open-air setting, the green backgroun and lights that illuminate perfectly without any tro blesome glare, constitute one of the features tha make this horse show unique. Another is the tot absence of takeouts or disappointments of any kin from the management; but best of all, of course, a the horses drawn from some of the best stables tha compete in horse shows anywhere. Among the fe tures that especially pleased the crowds were th unusually good riding and driving done by the ladie who contested, and the exhibition work of Bell Beach, the famous high school mare owned by Dinl L. Parrish of St. Louis and exhibited by Tom Bas her trainer.

Although the showing was the largest and best i the history of this show, it would have been sti larger had not sickness in the stables kept Mis Long's saddle horses away. Rain the morning of th first day of the show kept away a great many wh were planning to motor to Columbia from near towns but did not interfere with the show itself. number of the classes were so closely contested a to render difficult the decision of even such comp tent judges as C. W. Green of Centralia, Mo.; C. Robertson of Hardinsburg, Ky., and Walter Palmer Ottawa, Ill.

Space forbids listing the winners in all the thirt six classes but the champions and the cups they wo were as follows: Champion road horse, Animatio owned by Miss Loula Long of Kansas City and wi ner of the Columbia Commercial Club trophy; cha pion harness horse, Illustration, also owned by Mi Long and winner of the Board of Curators trophy champion five-gaited saddle horse, Ruth St. Den owned by L. H. Ingram of Little Rock, Arkansas, e hibited by Blades and Holman of Holliday, Missou and winner of the Board of Curators trophy; cha pion three-gaited saddle horse, Johnny Jones, owne by Colonel Paul Brown of St. Louis, exhibited E. D. Moore and winner of the Board of Curato trophy. The exhibitors who won blue ribbons in th various classes included J. T. Davis of Columbi Miss Myrene Houchin of Jefferson City, Colonel Pa Brown of St. Louis, E. F. Reuther of Columbia, Gira Parsons and W. R. Bush of Benson, Vermont, Augu Busch and Adolphus Busch III of St. Louis, Miss J F. G. Burr of Bement, Illinois, J. T. Harris of Colu bia, Frank Harris, Jr., of Columbia, and W. R. Fr ther of Columbia.

Notes and News

Hanford offers eight $400 purses.

◈◈◈

Entries close on Saturday, July 1st.

◈◈◈

The fair will be held October 2nd to 7th.

◈◈◈

Marvin Childs is again training Major By By 2:19¼ at Indianapolis and thinks he will get him to the races this year.

◈◈◈

Several trainers are getting ready to move to Santa Rosa with their horses. The track there is in fine shape.

◈◈◈

The Kentucky Futurity for three-year-old trotters is worth $14,000 this year and that portion of it for two-year-old trotters is worth $5,000.

◈◈◈

That spring fair at Chico netted nearly $5,000, and shows what real energy and enterprise will do. With races the success would have been even greater.

◈◈◈

California horsemen will regret to hear that J. O. "Red" Gerrety is reported by the Chicago papers to be in very poor health.

◈◈◈

Robert Clarkson, J. S. Evans, S. T. Holland, William Ray, E. P. Day and other trainers are working their horses on the new Bellingham, Washington, half mile track.

◈◈◈

June 25th is the date for the opening matinee of the Sonoma Driving Club which will be held at the famous Santa Rosa track. A nice lot of prizes will be hung up for the winners.

◈◈◈

The green pacer Dixon Boy that worked three heats one afternoon inside of 2:10, one of them in 2:06¼, is named in the 2:20 pace at the Breeders' meeting and in the 2:10 pace at the State Fair.

◈◈◈

The Cleveland horseman had the first opportunity to clock a horse in 2:10 this year when Doc Tanner drove C. K. G. Billings' pacer William 1:58½ a mile in that time on June 1st. William is being prepared to lower his record.

◈◈◈

The California horses from Sacramento and Pleasanton arrived at the North Randall track last week in good shape. Lon Daniels had seven in his string, Will DeRyder two, Harry Bell two and C. H. McCarthy one—twelve in all.

◈◈◈

Effie Logan, the dam of Jim Logan 2:01¾, Sir Albert S. 2:03¾, Dan Logan 2:07¼ and Lock Logan 2:07¼ (breeder's record) has not had a foal for the past two or three years but is now at Suisun Stock Farm where she is being bred to Demonio 2:11¼.

◈◈◈

The stallion Inferna, by Diablo, dam Biscari, the famous broodmare by Director, and himself the sire of Inferlotta 2:04¾, is reported to be in fine condition at Lewiston, Idaho, where he is owned by C. D. Crutcher, M. D., of Polson, Montana.

◈◈◈

James J. Hill, the great railroad builder who died May 29th, was a great lover of the trotting horse, owned and bred several and even raced some. He owned Allen 18728, sire of Silva 2:12¼, a trotter that he bred.

◈◈◈

Several horses are in training at Port Townsend. The trainers there are J. M. Thomas, Peter Manson, J. W. Worthington and Howard L. Bill, and they have horses by Diablo, Basil B., Kinney Lou, Duroc Hal, Sonoma Boy and other well known stallions.

◈◈◈

With Santa Rosa, Dixon, Woodland, Sacramento, Pleasanton, Fresno, Hanford, Bakersfield, Riverside and Phoenix in line (as they all are) the pacers and trotters fast enough to win this year should earn their winter oats.

◈◈◈

Only three horses were declared from the North Randall second meeting stakes at second payment time. These are Clara Mack from the 2:07 pace, Belle Stanford from the 2:08 trot and Virginia Humbug from the three-year-old event.

◈◈◈

"Protected all the way to Sacramento by block signals" is one of the many things that make the Oakland, Antioch and Eastern Railway a popular road to travel on. It passes through a most interesting portion of the state beside, reaching Oroville and Marysville by way of Antioch and Sacramento.

◈◈◈

Mr. M. L. Woy of Fresno was in town this week and is still optimistic over harness racing in California. He has named several of his horses at Santa Rosa, Sacramento and Fresno. He is still of the opinion that an organization of horsemen should be formed that will subscribe sufficient money to guarantee associations giving harness meetings against loss and believes it would be easy to raise the money under proper management. As he would be a very liberal subscriber himself his opinion is worth something.

The world's best riders and ropers will be at San Jose during the first week in July when the California Round-Up will be held. It is said entries have already been made from Washington, Oregon, Montana, Idaho, Wyoming, Arizona and New Mexico.

◈◈◈

The Skagit County fair grounds, at Burlington, Wash., have been enlarged by the purchase of nine acres additional ground and a good half mile race track has been built. The fair to be held this fall will be the sixth, and it is expected to be the most successful yet.

◈◈◈

Plans for the Salinas Rodeo and Big Week have been completed and the annual attraction which draws thousands of people from all parts of the country to the Monterey county seat will be staged July 12th to 16th, inclusive, at the Salinas race track. It is said that $50,000 will be paid in expenses and prizes.

◈◈◈

The Arizona State Fair Commission is preparing a good program of purses for harness races, which will be announced shortly. There will be no early closing purses, but all will close later. A case is now before the Arizona Supreme Court which may be decided so that pari mutuals can be sold on races in Arizona. Secretary Shaughnessy states that Arizona would be glad to participate in a circuit with California and can promise at least four meetings if one can be arranged—at Phoenix, Yuma, Tucson and Prescott.

◈◈◈

Hawley says: The sale of the horses owned by William Simpson & Sons made very little change in the breeding operations of the senior member of the firm, as he bought a majority of the offerings, and these are now at the Kentucky branch of Empire City Farms or at the Lexington track. Robert L. Nash will continue to be in charge of both the breeding and training operations of the New Yorker, and there will be no curtailment in the plans of the owner of two of the greatest sires living, Axworthy and McKinney.

That's a pretty fast bunch that has been entered in the free-for-all pace at the Breeders' Santa Rosa meeting. Jim Logan 2:01¾, Leata J. 2:03, Vera Hal 2:05, Rastus 2:05¼, Teddy Bear 2:06¾, Little Bernice 2:06¼, and Ben Corbett 2:09¼. We would like to see that field enter the home stretch on even terms. There would sure be a horse race to the wire. The same field is entered at Sacramento with the addition of the alphabetical sidewheelers, A. B. C. 2:10¼ and O. U. C. 2:07½.

◈◈◈

Rush & Haile, proprietors of the Suisun Stock Farm, will hold their annual sale of two-year-olds Saturday, July 1st. There are an even dozen head, out of the farm's best producing mares, eight being sired by that royally bred son of Moko, Montbaine 48667, and four by the great speed sire Demonio 2:11¼. As is the rule with Suisun Stock Farm these untried two-year-olds will be sold without reserve and offer an opportunity for those who are looking for highly bred youngsters that are likely to develop into fast pacers or trotters. Catalogues will be out in a few days and next week we will give a list of all these two-year-olds and their breeding. They are all untried and Rush & Haile never sold a colt yet that was not guaranteed to be just as represented. The sale will be held at Suisun as usual.

◈◈◈

If some eastern buyer does not get possession of Geo. Hammett (3) 2:15¼, the son of Nutwood Wilkes 2:16¼ that Charles McCarthy, of Pleasanton, took east in the same car with the Silva string of trotters and pacers, it will be because McCarthy does not want to part with the horse. Geo. Hammett has not been raced since he was a three-year-old, and he is now seven years old. As a three-year-old he won a $750 stake among horses of his age at Pleasanton, beating Albaloma, California B., Tom Kinney and Laura Keyes in 2:15¼ and 2:18½. At Stockton later the champion Wilbur Lou got three heats in 2:10¼, 2:11¾ and 2:12 after Albaloma had won the first two in 2:12 and 2:12½, but Geo. Hammett got third money, his positions in the summary being 4-3-3-2-2 and he showed to be a game race trotter. He has been working nicely at Pleasanton this spring and if he keeps right will make the North Randall railbirds sit up and take notice before long.

◈◈◈

On their records made in their past performances the horses named in the $1000 purse for 2:09 class trotters at the California State Fair this year will be about as evenly matched a field of horses as ever turned for the word. The fastest record held by any of the nine is the 2:08¼ which S. H. Cowell's Albaloma carries opposite his name. He made this record at Santa Rosa in 1914 when he trotted the greatest race of his life, taking three straight heats in 2:08¼, 2:08¾ and 2:09. Bonnie Ansel comes next with a mark of 2:09¼ and Bon Cres 2:10¼ and Pavana 2:10¼ are tied for third place by the records, though they are only a quarter of a second faster than Vallejo King 2:10½ and he a second in front of Ella Mac 2:11½. Then come Bon Guy and Harold C., right close up and nose and nose in 2:11¾ with Bert Kelly last in 2:12¼, only half a second behind them. If the nine horses in this race should each trot the first heat of the Sacramento race in September next exactly at his record it would be a horse race from start to finish and the result depend largely on their positions at the start. It should make a great race.

BRIDGFORD COMPANY'S FIRST ANNUAL SALE.

The next big event in Saddle horsedom will be the first annual auction sale on the evening of Tuesday, June 20th, at the Riding Club, Seventh avenue, San Francisco, of 25 head of saddle bred horses from the breeding farm of the Bridgford Company at Knightsen, California. At the head of this consignment will be the stallion Artist Jr., a son of the great Artist Montrose, winner of the sweepstakes at the Chicago World's Fair in 1893. Artist Jr. was himself a winner at the California State Fair of 1909 when he was a five-year-old, and was first in his class and sweepstakes again in 1910. After the close of that season he met with an accident which prevented him from being shown again, but he has been in the stud and has already proved himself a sire of winners. He is the sire of Acme that was herself a blue ribbon winner and the dam of a winner, and is also the sire of Candy Kid, a winner whose picture adorns the title page of this issue of the Breeder and Sportsman. There are so many of Artist Jr.'s daughters now on the Bridgford Company farm that there will be little use for him in the future if kept there, so it has been decided to offer him for sale. He is a handsome, vigorous horse and his get are all endowed with style and fine action. Dom Pedro, one of his colts, was sold some months ago for $2,000 by the Bridgford Company to the Japanese Association of California and by them presented to the Emperor of Japan at the time of his coronation. Several standard bred mares that the Bridgford Company has been breeding to Artist Jr. and other saddle stallions are in the consignment to be sold and they have foals at foot and have been bred back to the farm's saddle stallions. There are two foals by the Junior Champion of the P. P. I. E. show, Le Grand McDonald, to be sold with their dams. This young stallion is a grand individual and it is the desire of Judge Bridgford to have as many as possible of Le Grand McDonald's get shown at the horse shows in California, consequently he has placed these representatives of his first crop of colts in this sale.

The catalogues of this sale will be out next week and we advise every person interested in high class saddle horses to request the Bridgford Company, 519 California street, San Francisco, to send him one. They will be mailed to you free upon application.

We regret to announce that Dr. W. J. Smyth, Secretary of the Pacific Coast Saddle Horse Breeders' Association, has lost by death his splendid Kentucky saddle mare Peg o' My Heart, that won first prize in the class for mares two years old and under three and also won the Junior Championship for mares at the Panama-Pacific International Horse Show last October. Peg o' My Heart was a very high class mare and was very highly prized by her owner, who will have the sympathy of every person who ever saw this beautiful animal.

◈◈◈

Secretary of the Treasury William G. McAdoo is considered one of the most thorough horsemen in Washington, and rides a good Missouri saddle horse. Mr. McAdoo, it is said, is an excellent judge and in former years officiated at horse shows in an official capacity.

◈◈◈

The mare Candy Kid, whose picture taken last Saturday appears on our title page today, is a daughter of the Bridgeford Co.'s stallion Artist Jr. that is to be sold at the farm's first annual auction, June 20th. Candy Kid is a show ring winner and a fine saddle mare, as well as a splendid roadster at either single or double hitch.

◈◈◈

Princess Charming, a half sister to the successful sire and show horse Astral King, was sold recently to Mrs. Harry Kinnard, of Des Moines, Iowa, for $1750.

◈◈◈

Miss Loula Long, of Kansas City, Mo., who was an extensive exhibitor at the P. P. I. E., will not exhibit her stable of beauties until the fall and winter shows open. This announcement has been made to the management of the Springfield, Ohio, Horse Show, which had hoped to secure Miss Long as one of its exhibitors. The Springfield show opens June 14.

◈◈◈

Society Belle, a nine-year-old mare, with a foal at foot by Bourbon King, was sold recently by E. C. Ward of Newtown, Kentucky, to W. T. Crozier, of Upland, Pa., for $3000. Society Belle is by the great sire Montgomery Chief, and her dam is the show mare Daisy Beatty by Highland. She was quite a good show mare as a yearling, two-year-old and three-year-old and since entering the breeding ranks has proved a good producer. Her daughter Society Favorite was the winner of the big stake at the Blue Grass Fair last August and other prizes, being undefeated at Lexington and Paris, the only places shown, while Society Belle also won the broodmare class at each place.

◈◈◈

John McE. Bowman, of New York, has bred his noted little English thoroughbred saddle mare Sweetbriar, by Collar, to Dr. Thomas G. Ashton's hackney stallion Wynnewood, champion of the last National Horse Show. Mr. Bowman hopes to get a champion saddle horse from the hackney-thoroughbred cross. The mare is one of the most perfect specimens of the thoroughbred saddle type ever seen at American horse shows, while Wynnewood is the only hackney stallion that ever won the championship as a three-year-old at the Madison Square Garden show.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

CELEBRATE FOUNDING OF FIREARMS.

Millions of adult sportsmen the world over—and boys, perhaps, in particular, who are sons of farmers and of blacksmiths—are looking toward the Mohawk Valley this year with a special interest. At Ilion, N. Y., in that historic country of the Leather Stocking Tales, one hundred years ago, a boy of seventeen was working with his father in a little blacksmith shop on the family estate. In the boy's mind had long been a growing yearning for a rifle—the hills about his father's farm were alive with game. On this memorable morning in 1816 the youth plucked up courage to ask his father for money to buy the coveted arm.

All hail the courage of American boyhood—and the traditional conservatism of American fathers!

For the boy's request was refused and right there was laid the foundation of Remington arms!

The boy was Eliphalet Remington, Jr.

In August of this year the people of Ilion village—now a community made up largely of skilled gunsmiths who treasure and are jealous of the Remington story, past and present—will celebrate the making of the first Remington rifle which the boy Remington started immediately upon his father's refusal.

It is familiar history in the valley—told and retold from father to son by many a fireside—how young Remington picked up scrap iron here and there, how by infinite labor he hammered it into a billet on the smithy anvil, how he carried the bar fifteen miles to Utica to have it bored and rifled, and how he finally assembled the complete rifle. It was a well made rifle and there was a demand for more—first among neighbors, then the people of the adjoining counties looked to Ilion for their hunting weapons. Day by day the Remington fame spread until the state and the nation, and finally the whole wide world found the path to the always growing factories for which this farmer-smithy boy genius laid the foundation. Today more than 25,000 workers are making firearms and ammunition which go forth under the Remington name.

So the citizens of Ilion—and Ilion has grown in these hundred years from a cross roads to a thriving town of 10,000 people—have long planned this celebration. There will be a great pilgrimage to the scenes of the early Remington activities. The forge has long since gone—crumbled and rotted and washed away by the years—but on the site, well marked by generations of dwellers in the valley, a commemorative tablet will be placed. And in the village, in the shadow of one of the gigantic Remington arms factories, there will be parades and pageants, speeches and spectacles, games and various other forms of entertainment, all to bring back to the present generation a glimpse of the progress of one hundred years and to emphasize the old adage, "Despise not the day of small things."

Three days, August 29, 30 and 31, are announced as the celebration days by the Ilion Centennial Committee. These will be designated, respectively, as Ilion Day, New York State Day and Industrial Day.

DO GEESE COMMUNICATE?

The Globe of Wellsville, Kansas, is responsible for this interesting anecdote:

Byron Shields is convinced that geese have some method of communication. Out on his farm he has a number of geese which use the same nest in a cattle shed. The other morning two of the geese were on the nest when a turkey hen came along and drove them off the nest, and appropriated it to herself. The geese waddled off, around the shed to where the gander was standing, and in a minute or two the whole bunch of geese, headed by the indignant gander, returned to the nest and the turkey hen. The old gander reached down, nipped the turkey and literally lifted her from her nest, and the two geese took her place . Now if the old gander wasn't told the trouble, why did he came to the aid of his mates?

HAIRLESS DOGS IN MEXICO.

Hairless dogs have never been common, even in Mexico. They have a small patch of hair at the top of the head; otherwise they are absolutely hairless. They are usually about the size of a medium-sized fox-terrier, are good watch dogs, but have bad tempers, especially as they grow old. They resent being touched, yet they are affectionate and will protect their friends to the "last ditch." They do not snap at people but growl chestily, giving due warning that one must attend to one's own affairs. Legend says that the great Axtec chief, Montezuma, had one of these hairless dogs, and that, until Montezuma comes to earth again, some few of this species will wander, awaiting their chief. They certainly resemble the typical Indian character in having tenacity of purpose. This dog is fifteen years of age.—Our Dumb

GOVERNMENT WAR ON COYOTES.

Dr. A. K. Fisher (United States Bureau of Biological Survey): Portions of the country inhabited by wolves and coyotes have been divided by the Biological Survey into nine districts, each in charge of an inspector, who has under him a number of hunters. By careful supervision, the work of these hunters has been made very effective. They are not allowed to receive bounties, and the skins of the animals captured become the property of the Government. A number of sales were carried on throughout the winter and it is estimated that the total amount secured for the skins will be about $5,000. Recently, Congress has made available $75,000 to exterminate coyotes in portions of Nevada, California, Oregon, Idaho and Utah, where they are affected by rabies. To carry on this work effectively, 190 additional hunters have been put in the field, and it is hoped that the disease will be prevented from spreading to the east and south of the present limits.

Illegal Fishing.—Tomas Orgera and Joe Gomez, members of the Watsonville Castilian colony employed by the railroad, were arrested last Saturday by Game Warden J. H. Hill and Sheriff J. J. Croxon and charged with violating the state law by catching fish without a license . They entered a plea of guilty in Judge Agnew's court and were fined $50 each, with an alternative of fifty days in jail. Pending the raising of the money to pay their fines they were locked up in the county jail, but paid their fines and were freed later in the day.

Game Warden Hill states that the two men were fishing in the Pacheco creek, just above the Ausaymas bridge, and had caught four or five trout, a number of pike, carp and suckers, and neither of them were provided with the necessary license. The officers are certain that the two men had been dynamiting the creek, which is a very serious offense, but were unable to secure conclusive evidence of this fact, and therefore preferred the less serious charge against them.

District Forester Redington, of the Albuquerque, N. M., office of the Forest Service, United States Department of Agriculture, announces that requisitions for seventeen consignments of fish fry have gone forward to the Bureau of Fisheries at Washington. The consignments run up to 20,000 fry each and will be used by the forest rangers to restock the fishing waters of the southwestern forests. The varieties will include mountain trout, rainbow trout and black bass. Six different waters, heretofore empty, are to be stocked. Rainbow trout will be placed in Ben Hur Lake on the Carson Forest, in Water Canyon, on the Manzano Forest, in Stewart Lake on the Santa Fe Forest, and in Showlow Creek on the Sitgreaves Forest. Mormon Lake on the Coconino Forest will be stocked with black bass. All these waters, from the fisherman's viewpoint, have heretofore been idle, although apparently well adapted to fish. Mormon Lake, the largest mountain lake in the Southwest and embracing over fifteen square miles of water, will, when once stocked, afford excellent fishing every year for thousands of fishermen.

FOREST RANGERS SURVEY CAMPING SITES.

In anticipation for the demand for summer homes, resorts, and permanent camp sites on the Plumas National Forest, the Forest Service has commenced to survey and map tracts in the Feather River and Gold Lake regions. Lots are to be laid out first in the Feather River Canyon and then about the shores of Crystal, Bear, Long and Silver lakes, for many years famous among sportsmen as some of the best fishing grounds in the State.

These lots will be rented for short or long periods at $5 to $25 a year, and will in many cases be available for occupancy this season. It is expected by the Forest officer that a large proportion of the hundreds of campers who every year travel and camp within the Plumas Forest will be glad to avail themselves of an opportunity to acquire a permanent camp. All parts of the Forest are still open, however, to those who prefer to camp when and where they please.

The Plumas National Forest offers many attractions as a region for summer homes, such as government-built trails, roads, telephone lines, forest fire protection, an abundance of fish and game ,and magnificent scenery.

SNAKES DEATH ON TROUT.

"Swat the snake on every stream," should be the slogan of the trout-seeker wherever sport takes him.

Two anglers returned from the Agua Blanca, agog with the great discovery that snakes eat trout.

This is nothing new to veteran sportsmen; but, as it may be novel to others, all fishermen may feel easy in conscience executing every snake they find along a trout stream. Such snakes eat fish and already have formed the habit. Excepting venomous species, snakes in general are harmless, and most species are even beneficial, but all are bad along the streams, where they early acquire this taste for fish.

Those who never have seen snakes fishing have missed one of the most remarkable natural performances that even the varied life of a trout stream can show. Extending themselves over some shallow side pool they crowd the fish up until awash and then snap at them if small; if good sized, they appear to get a hold upon them, then a hitch around the fish with a tailhold upon a weed or bit of brush, gradually wearing out the fish, and then getting it ashore, upon exactly the same principle that a sportsman exhausts a lusty trout upon light tackle. The common striped snakes will kill small carp in wayside ditches.

WASHINGTON FIELD TRIALS IN SEPTEMBER.

The Washington Field Trial Club desires to announce their 1916 trials. The club has secured a very fine ground for the trials comprising several thousand acres of fine, level, open country with a wealth of birds of several varieties. The trials will begin on September 11th and the duration will depend somewhat upon the entries for the trials. Competent judges will officiate, announcement of these to appear later.

Entry fees are as follows: Open classes, $5 forfeit and $2.50 starting fee. Entry blanks and all particulars may be had by applying to F. E. King, secretary, Box 63, Tacoma, Wash. Entries positively close on August 15th.

The motto of the club is, "The sport and not the purse is the first consideration."

Tacoma, Wash. F. E. KING.

NEWS IN KENNEL CIRCLES.

C. H. Babcock has given up training and handling for the public, and in the future will look after the dogs of U. G. Fleischmann and F. T. Bedford of New York.

‡ ‡ ‡

The annual trip to the prairies will soon begin. Garr will locate at his usual quarters, near Denbigh, N. D., and will work his dogs over the All-American course. Eliot, Avent and Gilchrist will be near by, while Grady Smith, Gude and Harris will be just over the line in Manitoba. More of the handlers are going into Canada every season.

‡ ‡ ‡

John B. Sanford of Middletown, N. Y., is rumored to have recently offered $5000 for Champion John Proctor, which offer was refused. Mr. Sanford evidently wishes to add field-trials laurels to his recently acquired turf honors. He is the owner of George Smith, recent winner of the Kentucky Derby.

‡ ‡ ‡

M. E. Kelling, of Staten Island, N. Y., has purchased the English bulldog Magnet Mayor from Thomas Parvin of Newark. This dog is a massive heavyweight, which was imported from England a year or so ago by Parvin. He is of good quality and a specimen which will do considerable winning for his new owner.

‡ ‡ ‡

An Eiglish paper commits the following:

Gentleman: But I am afraid he wouldn't make a good watch dog.

Man (with Bull Terrier): Not a good watch dog! Why, Lor' bless your 'art, it was only last week that this very animal held a burglar down by the throat and beat his brains out with his tail.

‡ ‡ ‡

A. E. Grofton, Jr., Tacoma, has bought the Airedale bitch, Ch. Soo Floradora (by Ch. King Oorang), she being one of the two bitches winning their championships on the Pacific coast in the past seven years.

HERE IS A TRAINED FISH WORM.

Wiggling Pete the worm doth lure;
He calls them all to meet;
His master pats him on the back
And that makes Pete repeat.

No protective tariff is required for this industry. Out on the edge of town, Frank Mussard made $850 last year on a fish-worm farm of a half acre. He had trained one worm named Pete, who holds the confidence of the best worm set. Pete crawls around and leads the wriggling crew into a trap. Mussared puts them in cans and sells them to fishermen. Pete is getting more adept every night he works.

* * * *

Here's 60-pound Bass.—From Chico comes a story that J. A. Kirk, who had charge of the construction of the new postoffice in that city, while fishing in the Sacramento river near there on Sunday, hooked one of the biggest black bass ever caught in the section. The fight the fish put up nearly landed Kirk in the hands of the undertaker. He was dragged into the water and nearly taken under. Kirk managed to hold to the bass, however, and brought it to Chico for exhibition. It weighed 60 pounds.

We are a bit skeptical about that sixty pounds. The biggest black bass on record in California tipped the beam around 12 pounds. It is likely that Mr. Kirk hooked a striped bass and even so it was some catch.

Drink Jackson's Napa Soda.

Coast Trap-Shooting Titles Are Decided

PACIFIC HANDICAP TOURNAMENT AT PORTLAND IN AUGUST NEXT BIG EVENT

Oakland Elks' Club.—W. H. Price and W. J. Terry were high amateurs on Sunday in the monthly shoot of the Oakland Elks' Club at Alameda. They scored 44 apiece in the 50-target event. Bill Ellis achieved the honor of tying Dick Reed at 45 for the professional honors. There were not many out to the traps as the majority of the bay shooters were recuperating from their operations in the state tournament at San Jose. The Alameda Elks will be at the traps this Sunday. The scores, at 50 targets:—

F. M. Carter 37, C. E. Babb 27, J. A. Pizotti 41, C. A. Merrill 33, D. D. Jones (20-gauge) 28, *R. C. Reed 45, W. J. Terry 44, *W. R. Ellis 45, W. H. Price 44, A. A. Durney 40, *M. O. Feudner 42, *Frank Blum 38, H. Truscott 35, *F. W. F. Moore 40, H. Martine 38, T. W. Smyth 34, T. D. Riley 40.

Railroad Men's Club.—The founding of the Railroad Men's Gun Club took place June 1st on the grounds of the Los Angeles Gun Club with the holding of an opening shoot and the election of officers.

Inasmuch as the shooters, all of whom are railroad men, are called away on duty at all hours of the day, only forty turned out, a small percentage of the club's membership. To date the list shows 215 strong.

A practice contest to help the novices get in trim was staged in the morning with George Keeny hanging up the best tally. He broke 42 out of 50. Otto Younce was the only railroader to brave 100 birds. He broke just one-half of them.

Shortly after noon a meeting was held in the club's headquarters on the grounds and officers elected. E. Stotler was chosen president, Arthur Logue, vice-president; C. M. Herb, treasurer; Walter E. Palmer, the cowboy switchman, secretary, and J. D. Dierdoff field captain. George Keeny, L. R. Spafford, Itto Dawson, J. King, C. M. McCoy and G. L. Kelly were selected as the club's directors

The club was founded by Secretary Palmer, an employe of the Southern Pacific Company.

A handicap shoot at 25 birds was put on for a gun case put up by the William H. Hoegee Company and was won by J. D. Dierdoff with 23 shattered clays out of the quarter century. Spafford was second with 22x25.

Handicap for Hoegee trophy—

	Hdcp.	Broke
Dierdoff	18	23x25
Keeny	18	20x25
J. L. Smith	18	21x25
C. M. Herb	16	20x25
Spafford	16	22x25
Palmer	16	11x25
Dawson	16	11x25
Terry	16	18x25
Younce	16	16x25
Harvey	16	16x25
Cantrell	16	17x25

Practice scores:—Yocum 40x50, F. J. Small 27x50, J. L. Smith 41x50, George Keeny 42x50, Ray Spafford 39x50, E. H. Stotler 25x50, G. L. Kelly 35x50, C. O. Dawson 17x50, Otto Younce 50x100, J. Kalinski 1x25, J. H. Thompson 22x25, W. J. Merrichew 19x25, Dad Smith 9x16, Dan Terry 16x25, Mrs. U. M. Goodwin 6x25, J. A. Warren 18x25, J. E. Clark 11x25, P. L. Clark 20x25, A. F. Harvey 16x25, Walter Palmer 12x25, J. D. Cantrell 17x25.

Team race, at 25 targets: S. P.—Dierdoff 23, Keeny 23, J. L. Smith 23, Spafford 19, Yocum 21—total, 99. P. E.—Kelly 17, Stotler 10, Younce 14, Dawson 8, Herb 16—total, 65.

L. A. Gun Club Shooters' Scores, at 25 targets:—A. W. Bruner 21, Walt Clement 21, Mrs. Pfirrmann 22, Chas. Vories 24, Frank Mellus 50x50, Frank Mellus 49x50, Heine Pfirrmann 25, Fred Grewell 23, R. A. Rossbach 25, Mrs. Groat 22, Dr. Taber 23.

Doubles Shooting:—Heine Pfirrmann 19x25, Frank Mellus 20x25, Fred Grewell 17x25, C. E. Groat 17x25.

Utah State Shoot.—The Utah sportsmen's state shooting tournament came to a close with the report of the last gun on May 31st on the grounds of the Springville Gun Club, where the shoot was held, and the members left the grounds after contesting for the championship of the state.

L. A. Cummings of Salt Lake made the highest general average for the professionals. He broke 210 straight birds, which is said to be one of the most remarkable feats ever accomplished at a shooting tourney. E. J. Morgan of Salt Lake made high score second among the professional shooters. A. P. Bigelow made the highest record for the amateurs, with Fred King of Delta Colo., a close second.

The Browning handicap, the principal event, was won by W. H. Mitchell of Salt Lake. J. Browning of the Ogden club tied him for first place, but Mitchell won in the shoot-off. The first scores were 46 out of 50, and the shoot-off, 44, and 43 out of 50.

In the two-man race Bibelow and Becker of Ogden and Reilley and Moffat of Salt Lake tied for the lead. In the shoot-off the Salt Lake men won the trophy. In the main event Moffat made a score of 46 straight birds.

Never in the history of the state association has the shooting weather been better. The members of the organization are extending much credit for the success of the two-day shoot to J. H. Vance, Jr., of the Springville club, who worked faithfully on the details of the shoot. The score for the 400 targets on the two days follow:

*Cummings 387, *Morgan 371, *Anderson 369, *Hood 360, *Bowman 357, *McGanney 338, Bain 330, Mitchell 345, Bishop 310, Eudey 356, Redley 366, Quayle 348, Cook 338, King 379, Dunn 350, Luff 327, Moffat 364, Cowan 350, Drainey 356, Skeen 357, Becker 363, Bigelow 380, Browning 353, Wightman 288.

*Professionals.

COMING REGISTERED TOURNAMENTS.

California.

Los Angeles, July 3, 4—Vernon Gun Club.

Eureka, July 4—Eureka Blue Rock Club, H. A. Hine, President.

Oregon.

Portland, Sept. 12, 13, 14—Pacific Coast Handicap.

Washington.

Seattle, July 4—"Old Policy," Green Lake Gun Club, W. C. Smith, Secretary

Tacoma, July 18, 19, 20, 21—Pacific Indians, F. C. Riehl, Secretary.

1916 STATE SHOOTING CHAMPIONS.

State.	Name.	Score.
Oklahoma,	J. N. Walker	94x100
Georgia,	H. Brad Timms	98x100
Missouri,	C. B. Eaton	98x100
Mississippi,	F. D. Fitzgerald	99x100
Kansas,	George Grubb	99x100
Pennsylvania,	Allen Heil	100x100
California-Nevada,	H. Pfirrmann	100x100
Oregon,	P. H. O'Brien	98x100
Washington,	Frank Troeh	97x100

Nebraska State Winners.—State and Interstate Championship, Frank Rudat of Columbus, score, 98; won shoot-off with Harry Philson, runner-up, who also broke 98.

Winner Nebraska Handicap Championship, C. C. Tappan, of Gandy, score, 97 out of 100 from 21 yds.

Winner double event, C. C. Tappan, score, 45 out of 50.

High amateur for the meet, Al Koyen, of Fremont.

High professional, Rush Razee.

Seattle Association.—With the most of the members of the Seattle Trapshooters' Association paying honors to the Green Lake Club, outside of those who were resting up after the strenuous tournament week there were only a few shooters who came out to the Harbor Island grounds on May 28th.

Hugh Fleming led the squad with a forty-four out of fifty and ninety-one out of the hundred. "Dok" Hager came out and broke in a new firing stick. A. E. Hall and R. W. Brehm, two recent novices at the sport, were in the bunch and both showed improvement in their form.

A special effort is being made by the club to make ladies and "beginners'" day, slated for June 18, second in importance of the season only to the recent tournament. Every member should report to the secretary any person who may be interested in the "sport alluring." This day will give an opportunity for the shooter just starting out to line up in the squads with shooters of their class. A "beginner" is one who has not shot at more than 500 targets prior to May 1. From that date until the date of the "beginners'" shoot any amount of practicing is permissible. The scores, at 50 targets:

Hugh Fleming 44, W. H. Wilman 36, R. W. Brehm 27, J. R. ("Dok") Hager 21, A. E. Hall 23, G. A. Canuck 41, Van M. Woodaman 32.

At 100 targets—Hugh Fleming 91, W. H. Wilman 73.

Tacoma Club.—The Tacoma Gun Club held its semi-monthly shoot at Manito May 28th. A heavy wind cut the scores down considerably. Dave Bales won the Majestic Cafe trophy after a shoot-off with J. A. Dague. There were four men tied for high average on the L. S. Mellinger medal, but they did not shoot off the tie. L. S. Mellinger won the diamond pin. A. Riehl and A. Z. Smith tied for high average on the Hercules trophy. A. Riehl won the Dupont Powder company trophy. A. Z. Smith won the J. A. Dague challenge trophy. A. Riehl won the White Flyer fob. There were no spoons won, but A. Riehl and J. A. Dague each came within one bird of a spoon.

The following scores were made out of 100 birds for the Majestic Cafe trophy:

	Broke.	Hdcp.	Ttl.
Dague	86	6	92
Bales	86	6	92
A. Riehl	88	3	91
L. Riehl	78	13	91
Smith	68	23	91
Mellinger	70	19	89
Young	68	20	88
Griffin	78	9	87
Baker	59	23	82

The following scores were made out of the 50 birds for the L. S. Mellinger gold medal:

	Broke.	Hdcp.	Ttl.
A. Riehl	46	1	47
Griffin	43	4	47
L. Riehl	43	4	47
Bales	42	5	47
Mellinger	35	11	46
Dague	44	1	45
Young	38	4	42
Baker	34	7	41
Smith	31	10	41

Green Lake Club.—A crowd of forty-two marksmen turned out May 28th at the regular weekly shoot of the Green Lake Club, including six ladies who took part in a special fifteen-target contest.

Some excellent scores were hung up in the regular program, with Hi Follrich, L. S. Barnes and W. H. Carsten shooting a tie for high amateur honors with 46 out of 50, while E. R. Bacon, E. K. VenVleck and W. C. Smith dropped into second place with 45. L. H. Reid and Hugh Poston, professionals, shooting in their usual good form, broke 48 and 47 respectively.

Mrs. M. A. Winningham proved to be the best target smasher among the ladies with 11 out of 15, and second prize went to Mrs. Barnes with a score of 10. Mrs. Conklin and Miss B. Mikklesen tied with 4 and decided the ownership of third and fourth prizes by tossing a coin.

The scores, 50 targets:—

L. H. Reid* 48, H. Poston* 47, Hi Follrich 46, W. H. Carsten 46, L. S. Barnes 46, E. R. Bacon 45, E. K. Van Vleck 45, W. C. Smith 45, W. B. Taft 44, G. A. Conklin 44, S. A. Martin 44, W. M. Easter 44, George H. Young 43, J. W. Geltz 42, R. S. Searle 41, George Edling 41, S. E. Bacon 41, Dr. J. F. Hill 40, J. H. Hopkins 39, Frank Ulvestad 39, M. A. Rosenfield 39, C. C. Ward 38, Fred Pries 37, A. Hansen 37, Dr. A. B. Kidd 36, E. M. Hansen 35, Dr. M. A. Winningham 35, Dr. R. V. Mills 34, C. C. Griffin 32, H. M. Carver 31, A. W. Mathis 30, Dr. S. W. Giffin 30, G. D. Horst 28.

Scores in ladies' event, 15 targets—Mrs. M. A. Winningham 11, Mrs. L. S. Barnes 10, Mrs. G. A. Conklin 4, Miss B. Mikkelsen 4, Mrs. E. Giffin 3, Miss G. Rothe 1.

Dr. King, F. W. Van Vleck and William Spurck did not complete their events in the regular program.

HAIL, HEINE PFIRRMANN!

Aside from the innate pleasure and genuine exultation which come to any of us of normal disposition, after having accomplished a really great feat in any line of sport—there is still an additional sensation which perhaps may be more cherished and more lasting, and that is the absolute knowledge that one's competitors—when of the right mettle—were one and all glad to see us win—provided, they could not land themselves.

The above thought is suggested by the hearty, spontaneous burst of applause that greeted Henry Pfirrmann Jr. at San Jose, California, when he scored one hundred straight targets and at one bound became the recognized official champion of California and Nevada.

The mere fact of scoring that number of targets without a miss, is of itself a most laudable performance; but when it is done under such conditions as a Championship imposes ,then it is doubly as great a feat, for the very essence of the Championship spirit calls into action a far greater strain on the eye, hand and nerves than could occur when shooting for mere cups or prizes, however ardently one might wish to annex them.

As there can be but one bona fide Champion, there can be no division of the honor—and with such an array of talent as California can, and does, muster in almost any kind of outdoor sport, it stands to reason that the going can't be easy when in pursuit of any championship goal.

On this particular occasion Pfirrmann shot in faultless form from start to finish, taking time on all soaring targets but snuffing out the darting ones drifting and curving with the wind. It was a piece of head and hand work that at once stamps him as a strong, heady shooter, and one who has absolute control of his hands and nerves, and all of us who shoot know only too well the part the latter play in any shooting contest where all emotion must be suppressed and the pulse kept beating well within its normal trend.

The writer has seen many and many a spirited contest among the finest shots on earth during the last forty years, and can safely and truly say that even the most reputable old war horse, Bill Crosby, could not in his palmiest day, have worked his head and hands to greater and better advantage than our Heine!

Further deponent sayeth not—for that is the end of the rope. GAUCHO.

Sportsmen's Row

Capt. A. W. DuBray is back from his annual tour. He was up through the northwest and then went to New Orleans and back by way of Texas and New Orleans. The genial captain reports that the trapshooting sport is a bit quiet in the fa rsouth but he has never witnessed more interest than is being displayed this season on the Pacific Coast.

* * * *

The Golden Gate Club is booming its Beginners' Shoot on June 25th. Any shooter who has not shot 500 targets up to May 1st is eligible to compete and members are requested to bring out their friends to the traps.

* * * *

Some names of the crack shots of the Coast are inscribed on the O. N. Ford championship medal. In 1913 F. Couts won it with 46x50, in 1914 O. N. Ford with 48x50, and R. H. Bungay with 47x50 took the honors, and last season Toney Prior 50x50 and H. Lorenson 49x50 were the king-pins. F. H. Mellus with 49x50 won it at San Jose. It will be up for competition at the big shoot to be held in San Jose in September.

* * * *

According to a Sacramento paper, the Monitor Gun Club, which owns one thousand acres of land in Reclamation District No. 1001 near Vernon, has leased two hundred acres of the tract to George Jones of Sacramento county for $15 per acre for a period of ten years and Mr. Jones will plant same to asparagus. The club purchased the land some years ago for a hunting preserve but the same has since been reclaimed at a reclamation cost of $85,000. The original purchase price was about $17 per acre. The members of the club reside in Sacramento.

* * * *

George Rice, the intrepid hunter and trapper of the Yorkville section, has been kept busy lately plying his trade in an attempt to clear the ranges of varmints that prey upon the sheep. He has been working for the Yorkville Coyote Club and has made a handsome piece of money by his efforts. In the last few weeks Mr. Rice has trapped 41 wild cats, one eagle and six coyotes. For the wild cats he received $200 each, for the eagle $200, and for the six coyotes $47.50 each. He says that since his work upon the range there have been no reports of any stock killed.

* * * *

Grass Valley, May 22.—The rifle club organized here, under the direction of the National Rifle Association, claims to have the oldest crack rifle shot in the state among its membership—Postmaster I. W. Hays. Although 72 years of age, Hays still wins every shooting contest in which he is entered. The club has a membership of 120, the largest in the state. C. E. Clinch has been elected president and F. C. Peterson secretary.

A rifle range will be secured immediately.

* * * *

A meeting of the Utah State Association was held for the purpose of electing officers and the officials of the state organization were elected. J. F. Cowan of Salt Lake succeeds himself as president. A. P. Bigelow of Ogden is vice-president and A. R. Bain of Salt Lake is secretary and treasurer. The next annual shoot will be held in Ogden.

* * * *

Dallas, Tex., May 25.—Ed Forsgard of Waco, Tex., won the state professional championship at the 39th annual shoot of the Texas Sportsmen's Association, which closed a two-days' shoot here today, by averaging 95 hits out of 100 at the traps for the meet. A. V. Cook of Wellington, Tex., was second, and C. G. Spencer of St. Louis, Mo., third, with 92.

E V. Fisher, Oklahoma City, in the 600-target amateur event, was first with 567; A. V. Cook of Wellington, Tex., second, 561, and Forest McNeir, Houston, Tex., third, with 557. In this event C. G. Spencer of St. Louis, world's professional champion, had a score of 569. H. A. Murrele, Houston, was second high professional with 558, and L. J. Wade, Dallas, third, with 556.

What is said to be the largest sword fish ever captured in South Atlantic waters is now on display in Brunswick, Ga. The fish was caught by Leon Robards, just off the Brunswick bar. The monster weighs 300 pounds and measures ten feet from tip to tip. Robards and two companions were prawning when they encountered the prize, and, after a hard struggle, succeeded in landing him. Mr. Robards has removed the sword from the body and will treasure it as a memento of the largest "haul" he ever made.

Plans are being made by the members of the Watsonville Bluerock Club to hold one of the biggest bluerock shoots next Sunday that has been staged in this community in several years. The shoot will be held on the club range near Freedom on the Zils ranch and the committee in charge of the event is composed of C. A. Palmtag, chairman; William Whitton and Dr. S. Jewett.

* * * *

Members of the Sportsmen's Association of the Northwest at the annual meeting awarded the 1917 Northwest trap shoot to the Portland Gun Club. James W. Seavey of Portland was re-elected president of the association, and W. E. Carlon of Portland, secretary.

If you would have better shooting ,respect the game law to the very letter, and endeavor to get your acquaintances and neighbors to do likewise. Do not go a,eld during the open season with the thought in your mind that it will not amount to much if you exceed the bag limit a bird or two, for while that bird or two will not amount to much to you, if every man who goes out exceeds the bag limit only one bird every time he goes afield, it will mean hundreds, yes, thousands, of birds illegally killed during a season, and it is better for you and for all sportsmen if those extra birds are left in the field.

* * * *

W. W. Flavell is the second member of the St. Petersburg (Fla.) Tarpon Club who has been awarded the club button this year for a kingfish landed on a light line. Mr. Flavell captured a six-pound kingfish with a nine-thread line. He had previously landed a fifteen-pound kingfish on what he supposed to be a fifteen-thread line, but soon discovered that the line was heavier, which barred hi sentry under the rules of the club, which state that no kingfish can be registered unless caught with a line of fifteen threads or less. T. W. Weston recently entered a three-pound mackerel, which he landed on a nine-thread line. The club prize for mackerel is conditional on a nine-thread line being used. These are the first two entries that have been made this season. The club will now admit guides as members, the professionals being entitled to club buttons if the club rules have been adhered to, but will not be deemed eligible for the prizes offered.

* * * *

Vernon Club.—A second leg on the George T. Cline handicap diamond medal was annexed by Dr. L. M. Packard Sunday when the prize was shot for at the Vernon Gun Club at 50 birds, distance handicaps, by squelching 48 targets out of the half century from 21 yards.

C. E. Groat, president of the club, was runner-up in this event, breaking 47x50.

The big gun of the day's bombardment on the clay bird family was Bishop, who pinged 49 tarhawks out of 50 in the William H. Hoegee handicap event. He shot at 75 birds during the morning and broke 74. Packard scored another 48x50 in the Hoegee competition. This brought his score for 100 birds up to 96 kills, and all registered from the 21-yard mark.

"Red" Hedderly, fish and bame expert and a small-bore gun enthusiast, waded through a string of birds in the 20-gauge contest, but broke 22 out of a quarter century when it came to the final contest. Billy Wilshire hung up the high score in the small bore event, smashing 24 mud saucers. The scores in all events follow:

George T. Cline handicap, 50 birds:—

	Hdcp. yds.	Broke
Manderville	17	44x50
Stan Bruner	21	46x50
Reid	17	42x50
Smith	16	38x50
A. W. Bruner	16	43x50
Dr. Bishop	17	46x50
C. W. Fish	16	43x50
J. D. Dierdoff	17	45x50
Dougherty	17	44x50
Dr. L. M. Packard	21	48x50
C. E. Groat	18	47x50
Mrs. C. E. Groat	17	46x50
Knoff	16	40x50
Ed Hedderly	16	41x50
Bob Bole	16	37x50
Van Ness	16	35x50
Stafford	16	38x50
W. H. Wilshire	16	44x50
Palmer	16	44x50

Wm. H. Hoegee handicap, 50 birds:—

	Hdcp. yds.	Broke
Manderville	17	46x50
S. A. Bruner	21	47x50
A. W. Bruner	16	44x50
Dr. Bishop	17	49x50
C. W. Fish	16	45x50
Dougherty	17	44x50
Dr. L. M. Packard	21	48x50
C. E. Groat	18	46x50
Mrs. Groat	17	43x50
Knoff	16	41x50
Bob Bole	16	39x50
Palmer	16	41x50

20-gauge contest: Fish 22x25, Hedderly 22x25, Wilshire 24x25.

* * * *

..Los Angeles Club.—The second annual Du Pont Beginners' Day trap shooting tournament was held Sunday at the traps of the Los Angeles Gun Club. The first prize ,a silver watch fob, was won by C. J. Hurst. He broke 22 clays out of 25.

Following the contest for the new shooters, three contests, each of 50 birds from the shooters' allotted handicaps, were put on. A diamond scarf pin was put up in each event. Dr. S. B. Friend won in the initial event, Fred Grewell in the second and O. Evans in the third. Ninety-two shooters contested during the day. The complete results follow:

Beginners' event at 25 targets from 16 yards:—

W. E. Palmer 17, C. M. Herb 20, F. Andres 17, Geo. Friese 21, William T. Hill 16, Clarence Stapel 5, Otto Younce 18, William Kennedy 14, John Kolinski 7, A. S. Hardy 17, W. J. Koerner 20, John F. Younce 13, W. A. Gillette 15, W. Jackson 16, J. K. Tweedy 17, L. H. Brown 20, Miss A. Wheeler 17, J. B. Winston 13, C. W. Hays 20, C. J. Hurst 22, S. H. Wilson 21, Rus Chenoweth 17, L. F. Roussey 19, W. J. Rizer 20, H. H. Waters 9, E. Cleveland 1, R. W. Gardner 12, Mrs. A. M. Godwin 6, J. P.Hopkins 8, A. H. Rude 16, Mrs. W. Kennedy 5, H. M. Clark 12, J. Cook 9, J. P. Goodhue 6, B. S. Small 6, G. P. Stacey 17, George P. Benton 18, C. A. Halpin 14, Carl Moore 11, S. P. Shepherd 8, Mrs. G. Pulley 9, Miss M. Warren 3, R. Canfield 15.

Diamond trophy handicap, in three events of 50 birds, one trophy in each event:

	Hdcp.	1	2	3
E. Mitchell	22	43	47	46
H. Pfirrmann	22	41	37	43
F. H. Mellus	22	30	48	44
G. Holohan	22	43	47	44
C. F. Nichols	21	44	48	..
R. Witman	18	46	47	46
F. H. Nichols	18	44	45	43
S. R. Smith	19	46	48	..
H. Cline	18	36	40	38
F. Grewell	18	44	49	36
S. B. Friend	18	47	44	45
C. F. Blackstock	17	45	39	43
P. A. Rice	17	42	44	48
J. Arnial	17	45	43	48
C. W. Clement	17	43	44	41
V. A. Rossbach	18	41	47	47
William Mullen	18	44	47	44
F. D. Putzar	18	43	42	38

Reedley Club.—The Reedley Rifle Club on June 4 held a meet for the qualification of "marksmen" under the new rules, as laid down by the War Department. This course consists of 40 shots fired at the "B" target at the 200-yard range, as follows: 50 shots slow fire, 5 prone, 5 kneeling, 5 squatting and 5 standing, no rest; 20 shots magazine fire from the same positions with the target remaining in view only 30 seconds for each magazine of five shots. A member to qualify as a "marksman" and be entitled to shoot the "sharpshooter" course must make at the marksman course a score of 75 in the magazine fire and a total of 150 in the aggregate. The score made by the Reedley club follows:

	Slow fire.	Mag. fire.	Total.
C. N. Parlier	83	92	175
M. Gilbert	86	87	173
Charles M. Knauer	96	75	172
R. C. Sheibley	84	85	169
N. W. Elter	89	80	169
R. Stanton	83	77	160
W. B. Gillingham	87	68	155
E. A. Eymann	80	73	153
S. Jorgensen	82	63	145
F. Peck	69	64	133

C. M. Knauer made a straight run of 14 bullseyes and 17 out of 20 perfect shots at the slow fire, but could not hold the pace at the magazine fire.

C. N. Parlier showed best at the standing position, making a perfect score at both the slow and magazine fire.

Another shoot will probably be held on June 18 for the "marksman" course for those who did not qualify and for those who were not present at this shoot

R. L. Spotts of the N. Y. A. C. made an excellent showing in the Keystone League shoot April 27th when he won the DuPont Challenge Trophy with 98x100, shooting Nitro Clubs.

NATIONAL RIFLE QUALIFCATION COURSES.

The following courses have been adopted tentatively by the National Rifle Association:

Any rifle may be used.

Any kind of sight, peep, open, or telescopic, may be used. The use of the peep sight is recommended.

Use of sling is authorized.

Coaching is permitted. There should be a coach at each firing point.

Each course may be repeated as often as is desired. Qualifying entitles you to advance to the next course. The names of those who qualify are recorded in the War Department (National Board for Promotion of Rifle Practice).

Decorations will be awarded to those who qualify as Expert Riflemen.

Target "B" is used for all firing. Hits in the bull's-eye count 5; the white disk marks a 5; the red a 4; the white-and-black a 3, and the black a 2. A miss is indicated by waving a red flag. Hits on the wrong target count as misses. (The instructor will illustrate on an actual target with disks, the method of marking, the use of spotters and the meaning of the expression "o'clock.".)

In slow fire the target is marked after each shot and a spotter indicates the exact location of the hit.

In magazine fire the target is exposed 30 seconds. Five shots are fired during the exposure. I there are more than 5 hits on the target the score is not recorded and another string is fired. (The expression "rapid fire" is no longer used because the idea is to fire deliberately instead of rapidly.)

Marksman Course—Fired at 200 yards. No rest is used. Slow Fire—5 shots prone, 5 kneeling, 5 squatting, 5 standing — total, 20 shots. Magazine Fire—5 shots prone, 5 kneeling, 5 squatting, 5 standing—total, 20 shots. Necessary to qualify—aggregate score of 150 or total score in Magazine Fire of seventy-five.

Sharpshooter Course.—Arm, hand or rifle must touch post or parapet. Slow fire. 200 yards, 5 shots, standing from post rest; 300 yards, 5 kneeling from trench; 400 yards, 5 sitting or squatting from trench; 500 yards, 5 prone from trench; total, 20 shots. Then one skirmish run of 20 shots. Necessary to qualify: an aggregate score of 150 or a total score on skirmish of 75. On ranges where posts and parapets are not provided, the firing may be from the prescribed positions without the rests.

The Skirmish begins at 500 yards. Five shots are fired at each of above distances and positions. Targets exposed 30 seconds for each range and down 1½ minutes for each advance. All advances are atdouble time. A coach accompanies each skirmish. Score taken at end of run. If there are more than 20 hits on target run must be repeated.

Expert Rifleman Course—Fired at 500 yards. No rest used. Slow fire. Five shots prone, 5 kneeling, 5 squatting, 5 sitting; total, 20 shots. Then four strings of changing position fire of 5 shots each. Necessary to qualify: an aggregate score of 140 or a total score of 70 on changing positions fire.

Changing Positions Fire—Target up 5 seconds, down 5 seconds. One shot at each exposure. Sequence of positions for each string: Prone, kneeling, squatting, kneeling, prone.

FRED H. PHILLIPS, Jr.,
Sec. Nat. Rifle Ass'n of America.

GOOD SPORT ON TRUCKEE.

According to word received by Frank M. Newbert, President of the State Fish and Game Commission, trout fishing in the Tahoe and Brockaway regions is unprecedented in the history of the state. N. C. Comestock, the informant of Newbert, states that since the opening of the trout season June 1, not a day has passed but anglers with rods have caught the limit by noon. A Mr. Woods of Stockton and a Mr. Lowe of San Jose, he states, had particular success, landing trout weighing from six to seven pounds.

On the first day of the open season Comestock shipped out of Brockway forty boxes of trout, while 125 boxes left Tahoe for friends of anglers. The post office department at Tahoe, according to Charles W. Paine, secretary of the State Agricultural Society, is distributing trout by parcels post.

The post, it is claimed, in most instances deliver the fish the day after it is shipped. The shipping zone is limited to Sacramento, Stockton and way points.

REGULARITY IMPORTANT IN SQUAD.

Time and regularity are important matters to the trapshooter. In a squad of trained shots it becomes almost a matter of rhythm, the movements of each man fitting in with the "swing" of the others, and seldom does anything interfere, save perhaps a bird broken at the trap.

There is no hesitation on the part of the good shot when the bird is thrown. With instant decisive action he takes the proper lead and fires. It may be that he realizes at the instant of shooting that it is a "miss," but still he shoots, for he knows that any attempt to get a second aim would be bad for the future. He knows the value of regularity.

The point at which the birds should be stopped should be somewhere between 50 and 60 feet from the trap. Beyond this place they begin to lose their regularity of flight, so are harder to hit, and the shotgun pattern becomes too open.

Heine Pfirrmann was fortunate at San Jose in being with a good squad. His teammates sacrificed their scores in order to assist Heine make a 100 straight.

EIGHT-POUNDER CAUGHT AT LAKE ALANOR
George B. Nees of the Olympic Club is pictured with his prize taken in Plumas County.

LOCAL ELKS' SHOOTERS CHALLENGED.

Brother Elks:

Wilmington Lodge, B. P. O. Elks, No. 307, is the only Elks Lodge in Delaware. In population our state is the smallest in the Union, while in area it is the second smallest.

However, small as we may be, we number among our membership severa ltrapshooters who, in shooting ability, rank second to those of no other state. We are proud of our trapshooters and anxious to pit their skill against our Brother Elks in other states.

A CHALLENGE.

Inasmuch as a large number of the great body of Elks are trapshooters, and in view of the fact that a great many of those who will attend the Baltimore Convention will be men who are active trapshooters, Wilmington Lodge, B. P. O. Elks, No. 307, issues the following challenge:

The Delaware Elks challenge the Elks of other states to a trapshooting match to take place at Baltimore, Md., Friday, July 14th, starting at 10:30 a. m.

Any Elk in good standing is eligible to participate in the match. Elks residing in a state other than the one in which their home lodge is located are eligible to participate with the Elks in the state in which they reside, because they will be familiar with the preparations being made to accept this challenge, by the Elks in the state in which they reside.

Each state may enter as many shooters as are at the Convention and the five high men from each state will be counted as the teams.

The match will be at 100 targets per man, shot in five events of 20 targets each, or four events of 25 targets each, as may be deemed necessary by the number of entries.

The entrance fee will be 1c each for targets shot at, and regular prices for shells.

Prizes to the value of from $100 to $150 are offered by friends of Wilmington Lodge who are anxious to bring the skill of the local Elks to the attention of our brethren.

The prizes will be as follows: To the winning 5-man team—5 prizes; to the second 5-man team—5 prizes.

In addition there will be 8 other suitable prizes offered, and awarded under the Lewis Class System—four classes and two prizes to each class, and a prize for low score, making 19 prizes in all.

It should be understood that all Elks who attend the Baltimore Convention and are trapshooters are welcome to participate in this tournament, and shoot for the state in which they reside. So bring your guns along and help show what the boys from your state are capable of in the trapshooting line.

The trapshooting tournament will start about 10:30 a. m., permission having been given by the Oriole Gun Club to hold the shoot on their grounds, and everything will be in readiness for the occasion. To reach these grounds take Annapolis Short Line car from Camden Station and get off at Baltimore Highlands. The ride requires but nine minutes. Targets and shells will be for sale on the grounds, so all you need do is bring your gun.

We have the permission of the officials in charge of the Convention to arrange a shoot of this nature, and those participating in same will not miss any of the big events.

Kindly let us know as soon as possible how may of your shooters expect to take part in this shoot, as we want to arrange for their accommodation. Please send names and addresses to

Yours very truly,
W. L. HAMMAN, Secretary.

This will likely be of interest to the Alameda, Oakland, Santa Rosa and Eureka Elks, who have recently organized shooting clubs.

REPORTS ON FISHING CONDITIONS.

Telegraphic reports on fishing conditions as furnished by agents of the railroads are given as follows:

NORTHWESTERN PACIFIC.

The trout fishing in the streams of Northern Mendocino, Trinity and Humboldt Counties, which has been belated this season because of the inclement weather which has been experienced through the canyon during the last few weeks is now beginning to look quite promising, and excellent fly fishing should be enjoyed before many days have passed.

The Noyo River in Mendocino county is reported in shape now, and the agent of the Northwestern Pacific Railroad at Dos Rios wires in that fly fishing is good now on Berger creek ,a tributary of the Eel River. Both Big Dobbins and Fort Seward creeks near Fort Seward in Humboldt are affording fine sport and the fishing there in the Eel itself should commence very soon. Redwood Creek, farther north, has been yielding some excellent baskets during the past week, and the natives say that even better fishing will be enjoyed toward the latter part of the month.

SOUTHERN PACIFIC.

Shasta Region.

Dunsmuir—Fishing good. Fair catches with both fly and bait. River little high.

Shasta Springs—Fishing good. Weather excellent. No large catches reported.

Ager—Fishing excellent on Klamath river at Klamath Hot Springs and on Bogus Creek. Many limit catches made. Weather ideal.

Sisson—Fishing good. Weather fine.

Castella—Fishing only fairly good account wind.

The Sierras and Lake Tahoe.

Emigrant Gap—Fishing only fair. Water high.

Cisco—Weather good. River very high. No fly fishing. Few caught with bait.

Truckee and Tahoe—Weather ideal. Fishing in Truckee River and Lake Tahoe fair. Eleven pound trout taken in Donner Lake June 2 on display Southern Pacific ticket office, Palace Hotel, San Francisco.

Boca—Truckee river high and partially muddy account melting snow. Fly fishing fair. Good bait fishing. Big catches.

Floriston—Fishing very good. Trout taking angleworms and grubs. Good catches. Water too high for fly fishing.

Towle—Small catches. Brooks are insufficiently stocked.

Blue Canyon—Fishing conditions good. Water going down in stream. Fair catches. Some bass and catfish taken in lakes.

Santa Cruz Region.

Brookdale—Fishing conditions fair. Good catches but fish small. Sizes up to seven inches. Weather excellent. Nights cool. Fishermen report lots of sport. Limit catches taken in a few hours.

Boulder Creek—Fishing conditions good.

Santa Cruz—Salmon and trout fishing good. Weather clear and warm. Beach in excellent condition. Thronged with bathers. Sunday afternoon band concerts popular. Summer cottages being rapidly taken.

WESTERN PACIFIC.

Keddie—Fishing not very good in immediate vicinity, account of streams being muddy. Some limit catches being made in Big Meadow. Principal bait, worms and flies.

Blairsden—Fishing in river and creeks good. No trouble to get limits. Using salmon eggs and light and brown colored flies. Lakes are opening up fast. Weather clear and warm.

Big Bar—Fishing fair. River low and clear.

Belden—Indian Creek, Chip Creek, Yellow Creek, North Fork, East Branch, Feather River and Three Lakes good.

Trade Notes.—Edgar Alperson defeated a field of 61 shooters over the traps of the Magic City Gun Club of Muncie, Ind., recently. Mr. Apperson shooting Nitro Clubs won high general average with the excellent score of 149x150, and also made an unfinished long run of 142 straight.

At the first registered tournament of the Oriole Gun Club of Maryland, held at Baltimore May 13th, the first, second, third and fourth amateur winners, Messrs. Ford, Newcomb, Tomlin and Martin shot the Speed Shells and there were only two between the fourth and first places.

Two gold watches put up as special prizes were also taken by shooters of Remington UMC.

This initial tournament brought out 64 shooters in all and there was a lively scramble for the high places, an unusually strong field being represented.

◈ ◈ ◈

The fine weather brought out a field of twenty shooters at the Greenhill (Del.) traps, April 29th, and some fine scores were made. T. Martin was high man with a break of 69 out of 75. Mrs. White, of the Nemours Trapshooting Club, won the handicap event, with a score of 22x25 and annexed the sterling silver spoon.

THE FARM

POPULARITY OF GRAIN HAY.

[Pac. Rural Press.]

The fact has been noted that the only enduring opposition to hay made from "grains cut green" was put up by the supply experts of the U. S. Army, and this existed until very recently. When the Spanish war and the occupation of the Philippines made it necessary to ship hay across the Pacific it took some effort by our congressmen to get Pacific Coast contractors a chance to file bids and longer still to admit the "grains cut green" to the place occupied by the sainted Timothy on the army schedules, and we understand that oat and even barley hay are now admissible to the government mule menu. We mention this fact to emphasize the contrast between the conservatism of the army and the ready acceptance of grain hay by the California pioneers. They saw what the Mexicans did with horses and the "grain cut green" which they used for hay and had no doubt of their quality. But the more specific demonstration came later when the race-horse magnates put a test on the "efficiency" of Balifornia grain hay and stopped at no expenditure to secure the advantage of it. Joseph Cairn Simpson, who was probably the greatest equine-philosopher of the last century, was firmly convinced that the supremacy of California horses, which was so clearly demonstrated a few decades ago, was due in good part to the climate and the feed, and he used to like to point to the practice of expert horse men as supporting his contention. In one of a series of articles for the Sunset Magazine in 1901 Mr. Simpson gave these facts:

"A test between timothy hay imported from Oregon and wheat hay of California resulted in a decided preference for the latter. That estimate has been endorsed by many trainers from the East. Hickok, Marvin, Goldsmith and Salisbury, after one trip east with trotters, when eastern hay had to be used, became so well satisfied of the superiority of California hay that in subsequent eastern trips they took a season's supply with them. There were differences of opinion as to which kind was best; wheat, oats, wheat and oats, and wild oats, each had its advocates. The crowning testimony of its excellence was when Edward Corrigan, known all over the United States as one of the most successful managers and trainers of race horses (which achieved many notable victories on every prominent race course from San Francisco to New York and from Chicago to New Orleans) shipped a detachment of his horses from California to England. Accompanying the horses went several carloads of California hay—enough to last his large stable for a year. This was because his horses did not do as well in distant parts as they did when trained in California, and this he could only ascribe to the superiority of the hay ,as all the other conditions in distant parts were favorable."

And farther comment seems unnecessary to establish the quality of California "grains cut green" for hay. These famous horsemen staked millions on it, before Uncle Sam dared officially spend a few thousands for it as meals for his mules!

FACTS ABOUT LIVE STOCK.

The breeding and feeding of farm animals is a popular branch of agriculture in this country. There is a profound reason for it, easily explained when we consider man's fondness for dumb creatures.

We believe in live stock as an inseparable feature of farming in America. The most useful type of farmer, on the whole, is "the live stock farmer," combining cropping and the raising of useful domestic animals.

Just what does live stock mean, economically—not as a fad or fancy, but as a money maker? It seems that the indiscriminate urging of live stock farming to conserve the productive power of the land is questionable, to say the least, inasmuch as commercial fertilizers are obtainable nowadays. Too often you hear some one remark, "Live stock is necessary to maintain soil fertility."

Concerning this statement there are two important things to remember, and to ignore them in practice is to wilfully blind ourselves to the facts. The first is that live stock farming should itself be profitable aside from its value in relation to the perpetuation of the soil. That this is not always so, many a feeder can testify. The man who merely breaks even is still a loser, although he may try to console himself with the thought that at least he has manure to put back on the land.

For here enters the second vital fact, that farm animals alone never did and never can sustain the productive power of the soil. No argument is needed for anyone can see that meat and milk and wool are not made from nothing. Besides, the scarce and costly nitrogen and phosphorus that are removed from the soil in a carload of cattle, sheep or hogs, or in a can of milk or bag of wool, an animal uses up more than half its rations in bodily maintenance—just living and moving about. So far as the land is concerned the feed consumed for this purpose is wasted.

The truth does not hurt a strong man, and he is neither brave nor wise who deceives himself by shutting his eyes to plain facts. The plain facts are that no field ever was enriched by the manure made from animals fed evclusively on the crops grown on that field.

Under careful management livestock may be made extremely profitable, but under poor management a man can lose a whole lot of money at it. Yard manure is a good by-product of the feed lot when it is not wasted, but too often it costs more than it is worth in comparison with other forms of fertility.

Where work stock, meat stock, milk stock or pet stock are handled so that the ledger shows a satisfactory balance on the right side of the page, a part of the profits can be spent for phosphorus, limestone or potassium, or whatever may be necessary to replace the essential elements of plant food removed by the crops.

When this can not be done it is idle to talk of conserving soils by livestock alone.

CROPPING IRRIGATED LANDS.

In choosing the crops which will be the most profitable for a new agricultural region, there is a tendency to specialize on one or two crops, little attention being given to crop rotation. Grain and alfalfa are usually the first irrigated crops to be grown, and these are followed by vegetables or fruits or some other inter-tilled crop.

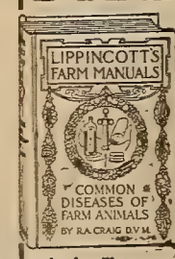
There seems to be an impression that the fertility of the irrigated soil is inexhaustible, and the experience of farmers in humid sections is disregarded entirely. While it is true that the average arid soil contains enough of the essential mineral plant foods for years to come, yet the supply of humus is very small, usually less than that of the soil of humid regions.

One of the most important problems on irrigated lands is that of keeping up the organic matter supply. Where alfalfa or other leguminous crops can be grown to advantage the problem does not present so many difficulties. But alfalfa is not an ideal rotation crop in many regions, and the tendency, once a good stand is gotten, is to let it remain as a permanent crop.

The suitability of the soil for a permanent crop of this nature should be seriously considered before putting in too large a proportion of one's land to alfalfa, and the average farm would be better planned by allowing for rotation crops.

The high cost of retailing food products is the biggest leak between producer and consumer. The Watsonville retailers are cutting it by dividing the city into four delivery districts. Members of the delivery association will send goods for their customers to a central station whence each driver will deliver on his own certain route four times a day ,thus avoiding duplication of routes.

PICKING THE LAYERS.



While thetrap nest is the most dependable method by which to select birds of high egg production, the additional labor and expense involved prohibits its use under most farm conditions. Without the trap nest one must resort to external indications.

When selecting pullets, choose only those from early hatches with strong constitutional development, early producing pullets, heavy eaters, early risers, late retirers and active. Hens of highest egg production have a feminine appearance, fine head, alert eyes, comb, face and wattles fine of texture and medium in size. They should stand square on their feet, legs wide apart, with the front end of the body slightly higher than the posterior end, long back and tail carried rather high. The body should present a wedge-shaped appearance, yielding ample room for the reproductive and digestive organs. Late molters make heavier winter egg producers.

THE BEST LINIMENT
OR PAIN KILLER FOR THE HUMAN BODY
Gombault's
Caustic Balsam
IT HAS NO EQUAL
For the Human Body
—It is penetrating, soothing and healing, and for all Old Sores, Bruises or Wounds, Felons Exterior Cancers, Boils Corns and Bunions CAUSTIC BALSAM has no equal as a Liniment.
We would say to all who buy it that it does not contain a particle of poisonous substance and therefore no harm can result from its external use. Persistent, thorough use will cure many old or chronic ailments and it can be used on any case that requires an outward application with perfect safety.

DISEASES

Success in live stock farming has its foundation in maintaining good health in the animals. The author has specially emphasized the causes, prevention and early recognition of common diseases. COMMON DISEASES OF FARM ANIMALS is an authoritative guide to the farmer, but does not trespass upon the domain of the veterinarian. The chapter upon the best method of telling the age of farm animals will mean money in the bank when you make your next purchase. An entirely new book, giving the latest word upon the subject by the leading authority, Dr. Craig.
With 124 illustrations, 334 pages. Octavo. Handsome cloth. $1.50 net. Postage or express charges extra.

RACE TRACK FOR SALE.

The Ukiah race track, located a little less than a mile from the Court House at Ukiah and bounded by the State Highway on the west, the county road on the south, and the Northwestern Pacific Railroad nearly the entire length on the east side of the track. The property consists of twenty acres. Fifty-nine good box stalls, good grandstand, fencing in good order, and one of the best half mile tracks in the state. An excellent winter track and an ideal place to work horses during that season. Plenty of adjoining drives for jogging horses. Two wells on the premises as well as water from the city water works, with tanks conveniently arranged for sprinkling.

This is the only race track in Mendocino county and the location of the county fairs. Ukiah is the county seat and has a population of about 3000, is in a most fertile valley in which all kinds of fruit, vegetables, hay, grain and hops are grown. Has excellent water; no malaria or mosquitos. It has paved streets, good sewerage, and splendid gas and electric light works. There are many standard and thoroughbred horses in this county and the people are a race loving lot. This property is offered for sale at a less price than adjoining property is held at. For terms and further particulars address

F. W. KELLEY,
Care of Breeder and Sportsman.

FARMS FOR SALE
Choice Land in Idaho

Lewiston, Idaho, is situated at the forks of Clearwater and Snake rivers and has transportation to the coast.

960 acres 7½ miles from Lewiston, Idaho, 4½ from Lapwai, Idaho, on main traveled road, all in cultivation except about 15 acres, all level land, just a little rolling, 320 acres of fall wheat in, 225 acres fall plowed for spring crop, about 30 acres in alfalfa. All fenced and cross fenced. Two good springs with big cement water troughs, well, windmill and cement reservoir, water piped to house, 7 room house, hot and cold water and electric lights. Large horse barn with hay mow in the center, electric lights in barn; cow barn with two box stalls; hog pens, shade trees, chicken houses, blacksmith shop, wagon shed, granary, outdoor cellar with bunk house overhead. $85 per acre; will take one-third down, time on balance to suit purchaser, at 7 per cent interest. One-third of crop goes with place if sold any time up close to harvest. Mild climate, can raise all kinds of fruit, grain and vegetables. Wheat in this country goes from 35 to 65 bushels per acre, barley 40 to 80 bushels per acre.

320 acres 4½ miles south of Vollmer, Idaho, 275 acres in cultivation, balance in pasture and timber, farm land lays practically level, one-third of crop goes with place if sold before harvest. Some fall wheat already sown. All fenced and cross fenced. Quarter section of it fenced hog tight; good four-room house, wood shed, and out of door cellar, nice grove around house, well at house, fair stabling and out buildings, spring and spring creek close to barn, three springs on place. Price $70 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

238 acres 4½ miles from Lewiston, Idaho, 175 acres in cultivation, 25 more can be cultivated, balance good bunch grass pasture, fenced and cross-fenced, good spring creek runs across place, small house, station on place for Johnson R. R., two grain warehouses at station. Price $70 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

160 acres of timber land, good farm land when timber is cleared off, all can be farmed except about 2 or 3 acres. Good timber, yellow pine and fir. Price $4000. 40 miles from Lewiston, Idaho. Well located to log off.

240 acres 6 miles from Asotin, 12 miles from Lewiston, Idaho, about 75 acres in fall wheat, about 75 acres more can be cultivated, balance in bunch grass pasture, two springs, small house, all fenced. Price $40 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

THE BREEDER AND SPORTSMAN

DRAWER 447, SAN FRANCISCO, CAL.

GUNCRAFT

By W. A. Bruette

A modern treatise on guns, gun fitting, ammunition, wing and trap shooting.

The theoretical side of the subject has been covered with a scientific accuracy which makes it an up-to-date book of reference, and the practical side of wing shooting, gun fitting, the master eye, defects in vision and other important questions have been treated in a way that will enable either the expert or the amateur to determine if he is shooting with a gun that fits him and how to decide upon one that does. It will enable him to ascertain why he misses some shots and is successful with others. The secrets of success in trap shooting, as well as the peculiarities in flight of the quail, the jacksnipe, the woodcock, the ruffed grouse, and the duck family, are illustrated by drawings and described in a way that will facilitate the amateur in mastering the art of wing shooting.

Cartridge board cover, $1.00; Cloth, $1.50

FAMOUS TROUT STREAMS

Steelhead fishing in the Big Lagoon, Humboldt County, is now in full swing. The fish this year average from nine to twelve pounds.

Do not overlook the Eel River Fly Fishing for the Big Steelhead from July until October in the famous Greigs, Fortuna, Van Duzen and Weymouth pools—fresh run fish that weigh from nine to twenty-five pounds—light tackle—excellent resorts close by—only ten hours from San Francisco.

The fishing streams that are found so profusely in the new territory north of Willits embracing Humboldt, Trinity and Mendocino Counties offer the best of coast stream trout fishing. If you want to fish, go where the fish are.

LOW EXCURSION RATES

"Vacation-1916" gives list of hotels and resorts in this section, and our new "hunting and fishing" booklet will soon be ready for distribution. Call at 874 Market Street or write J. J. Geary, G. P. A., Room 808 Phelan Bldg., San Francisco, for copies.

NORTHWESTERN PACIFIC R. R.

BEAUTIFUL BELVEDERE

LOTS FOR SALE

CORINTHIAN ISLAND Subdivision to Belvedere is the most beautiful spot on the shores of San Francisco Bay for a suburban home. It commands an extensive view of the City of San Francisco, Alcatraz and Angel Islands, Raccoon Straits, San Francisco Bay, Richardson's Bay, the Berkeley shore, beautiful Belvedere and Mt. Tamalpais. It is in Marin County, directly opposite San Francisco, and forms the eastern shore of Belvedere cove. It has a naturally terraced, sunny, western slope that is well adapted for many choice residence sites, every one affording most picturesque views of the bay and mountain. It is protected from the prevailing western trade winds in summer by Belvedere Island, and from the southerly storms in winter by Angel Island. The soil is fertile and part of the island is well wooded.

It is less subject to fog than any other place near San Francisco. The summer fog, as it rolls in from the ocean, splits on the western slope of Sausalito, part of it flowing in a line with Angel Island towards the Berkeley shore, and part of it along the southern slope of Mt. Tamalpais, leaving Belvedere, Corinthian Island and Raccoon Straits in the bright sunlight, while the fog banks can be seen as a white wall both to the north and the south.

There is very little available land about the shores of San Francisco Bay that is desirable for homes, especially for those who love boating and kindred sports. The Alameda and Contra Costa shores of the bay are the lee shores and receive the full brunt of the boisterous trade winds which lash the shoal waters near the land into muddy waves, making boating both unpleasant and dangerous. To the north of the city and in Marin County the land from Sausalito to the entrance of the bay is a Government reservation and will never be placed on the market. The shores of Richardson's Bay are not at present convenient to boat service and, aside from Belvedere and Corinthian Island, there is little or no land near any ferry landing that possesses the natural advantages, improvements and possibilities that are offered on Corinthian Island. Concrete roads, pure water, telephone service and electric light wires are already installed. It is only ten minutes' walk from any point on the property to Tiburon boats, and but forty-three minutes' ride to the foot of Market Street.

On the point of Corinthian Island the Corinthian Yacht Club has had its home for many years, and on any summer day the white sails of its numerous fleet add to the charming scene, as the trim yachts glide about the cove. Excellent fishing of all kinds for bay fish, including salmon, the gamey striped bass, rock fish and the toothsome silver smelt, is to be had in the cove. There is probably no spot so accessible and in such close proximity to any large city in the world that offers the attractions of climate, magnificent scenery, fishing and boating as will here be found.

For Greatest Satisfaction Use

DOUBLE SERVICE Automobile Tires

Guaranteed 7,000 Miles Service

Absolutely Punctureproof

Double Service Tires are made double the thickness of the best standard make tires.

This 100% greater wearing surface naturally gives that much more mileage and service. The average of 12 miles of tough fabric and one inch surface tread rubber makes these tires *absolutely punctureproof.*

These tires excel all others for use in the country over rough and rugged roads as well as on hard pavements. They are as easy riding and resilient as any other pneumatic tire—the air space and pressure being the same.

They are the *most economical* and "care free" tires made and are used where tires must be depended on and tire troubles cannot be tolerated. Many *Double Service* style tires are in use in the U. S. government and European War service.

Our output is limited to a certain amount, but for a short time we offer the following reduced special prices as an **Introductory Offer:**

PRICES

	Tires	Tubes		Tires	Tubes
30x3 in.	$ 8.60	$2.80	36x4 in.	$17.45	$4.65
30x3½ in.	10.85	3.10	35x4½ in.	21.20	5.60
32x3½ in.	12.75	3.20	36x4½ in.	22.50	5.75
32x4 in.	15.75	4.20	37x4½ in.	23.60	6.20
34x4 in.	16.70	4.35	37x5 in.	26.30	6.60

All other sizes not included in above list also furnished. Non-skids at 10% additional.

Terms: Payment with order at above special prices, a 10% discount allowed on orders for two or more tires. All personal checks must be certified.

Try these tires now and be convinced of their very high qualities. Sold direct to the consumer only.

Descriptive folder upon request. Write for it.

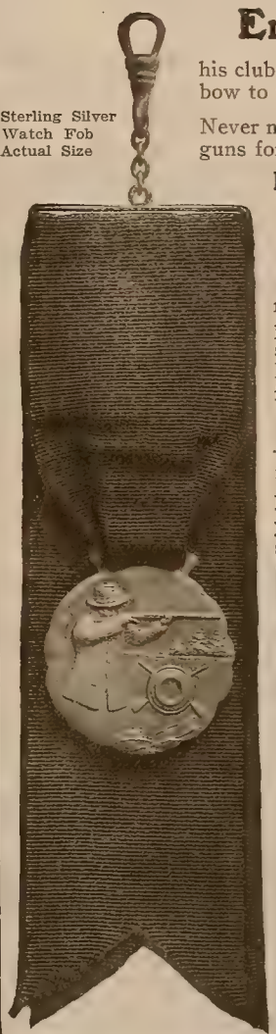
Your Chance To LEARN TO SHOOT



YOU'VE probably said many times: "Some day I'll give this clay target shooting stunt a try-out." The "day" is here and the place is the nearest trapshooting club,—probably you've been asked by some club member to

Enter The Beginners' Shoots

his club is arranging for June. "Obey the impulse,"—make your bow to trapshooting at the local club's Beginners' Shoot.

Never mind if you haven't a trap gun,—the boys at the club have guns for visitors.

Sterling Silver Watch Fob Actual Size

Don't Stay Away—Attend This 2nd Annual

DU PONT BEGINNER'S SHOOTS

ready to compete for the sterling Silver Watch Fob (see plate) the club gives the "beginner" making the winning score.

Bring along your brother,—invite your friends and don't forget the

SPECIAL EVENT FOR WOMEN

—a sterling silver spoon (see plate) given to the woman making the winning score.

Help your local club "cop" the cup given to the club in your state or province having the most "beginners" shooting in this Second Annual Beginners' Shoot.

Get into the trapshooting game,—start now and you'll have plenty of fun with your gun in the good "old summer time."

If you don't know the location of the nearest sporting club, write to

WINCHESTER

.22 CALIBER AUTOMATIC RIFLE

THE DOPE FOR PESTS

It's hard for anything to get away from the Winchester .22 Automatic Rifle, as, owing to its being loaded by the recoil, it can be fired rapidly with accuracy. This makes it exceedingly effective against pests of all kinds. It is a ten-shot repeater, light and well-balanced, strong in construction, and safe and sure in operation. It is at all times under control, as the trigger has to be pulled for each shot. It is readily taken down, and easy to keep clean and in good working order. A rifle that is a great sport maker, fascinating to shoot and sure to get the game or hit the target. It lists at $25.00 and is sold by all dealers for less.

TRAINING THE HOUND

A PRACTICAL TREATISE ON THE TRAINING OF FOX HOUNDS, BEAGLES, AND COON HOUNDS.

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies. Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; $1.50, postpaid.

Springfield, Ill.	Sept. 18-22
Sedalia, Mo.	Sept. 25-30

NEARLY A MILLION HORSES, bred and reared in the United States, have passed the rigid censorship of the European army buyers and gone across the water to Europe during the past two years at a cost to the governments that bought them of not less than $300 per head. From $125 to $175 was the price paid the contractors here and the rest of the amount was made up from cost of transportation and expenses. The contractors bought these horses from the breeders at from $75 to $125 per head. Some conservative horsemen, acquainted with the cost of shipping horses to Europe, affirm that $400 per head is not too high a figure to place on the cost of each horse when it reaches France, England or Italy. If the people who claim there are not enough suitable horses in the United States to supply our army on a preparedness basis, and who are pressing the passage of a bill to appropriate $200,000 to buy stallions suitable to sire army horses that they may be distributed about the country for horse breeders to patronize, will introduce a bill authorizing Uncle Sam to pay $200 a head to horse breeders for such animals as will suit the army's requirements they will find that more horses will be offered than the army will require. And they will be as good horses as any army the world has yet seen have ever used. Read the records of what the United States cavalry and artillery horses have been doing in Mexico and then remember that these horses, that have broken all army records for the distance traveled under like conditions, and which are most highly praised for their soundness and stamina, were furnished the U. S. Government by contractors for less than $200 each and were purchased from their owners or breeders at figures far below that sum. We do not believe it would be an exaggeration to state that the horse breeders of the United States could furnish the army with 100,,000 sound and suitable horses within a month from any given date if the breeders were paid the prices which the contractors now receive. The shortage which is supposed to exist in horses suitable for cavalry and artillery purposes can be traced to the custom which prevails among contractors of making very low bids for furnishing remounts and artillery horses, and then "taking it out" of the breeders.

HORSES ARE STILL USED almost exclusively by many of the most successful business concerns of the country in spite of the claims made in the advertisements of the motor truck makers that goods can be delivered by the gasoline wagons cheaper than with horse drawn vehicles. The motor makers assert and re-assert that one motor truck will do the work of three teams and perhaps it can, but there are some of the users of both means of transportation who have been keeping books on the relative expense of horse and gasoline vehicles and have found that horses are more economical than any style of motor truck yet discovered. This accounts for the fact that the prices of draft horses have not declined in New York and Chicago, the two cities of this country where the most goods are hauled, but have increased during the past year. One of the most efficient and best managed transportation firms doing business on the Pacific Coast is Wells, Fargo & Co. ,and that big organization finds that motor trucks are only suitable for a small proportion of its delivery business, a business where economical, prompt and safe delivery is the most important factor in satisfying its customers. Wells, Fargo & Co. uses 250 horses and 16 automobiles in San Francisco and the manager states that proportion of horses to motor trucks gives the company the best service. One of the big organizations often referred to in eastern financial circles as a model of modern efficiency is the National Biscuit Company, which last year built a $2,000,000 factory out of profits after paying dividends of seven per cent to its stockholders, and which has thirty factories together with hundreds of distributing plans throughout the country, all built and equipped in the same thrifty way and managed with the utmost care and economy. In New York this concern gives employment to five motor trucks and two thousand horses, and the horses are used in that proportion simply because a strict account of cost has shown that the horse is best and cheapest for the work to be done. Comparing the cost of horses and machines, a writer in the Breeder's Gazette of Chicago hits the nail on the head when he says the motor truck advocate credits the gasoline vehicle with a full load every time it goes out, and by this false method of computation tries to prove that it costs but little more to collect and deliver freight with machines than with horses. But in actual practice a motor truck having a capacity of three tons often has to make a trip with a few hundred pounds and come back empty so that the cost must be multiplied by five or six, for the expense is the same whether the machine is loaded to capacity or empty. As the writer says: "Time consumed in waiting to load or unload is another important factor in actual experience with motor vehicles. Experts estimate that an automobile truck waits at an expense of about one dollar and a half per hour, as against sixty cents for a team of horses or thirty cents for a one horse wagon. In congested freight yards and docks, where each vehicle must wait its turn, this item runs into money very rapidly. With all conditions favorable, in experimental tryouts, with picked men to load and unload in double quick time, it has been demonstrated that a three ton motor truck can do the work of three teams, but in actual practice, according to the Gazette, 1,120 tons have been moved by horses at a cost of $1,080, as compared with $1,260 for the same weight on the same job moved by motor vehicles. These are some of the things, other than the rise in gasoline, which explain the increasing market value of draft horses at a time when motor trucks are being exploited by every means that can force them into use."

MORE HIGHLY BRED SHORTHORNS FOR CALIFORNIA.

Mr. J. N. Colomb and Mrs. C. M. Barton and daughter of San Benito county returned from a trip to Missouri and Texas a few weeks ago, where they made many purchases of Shorthorn bulls and cows for the Barco Ranch in Santa Ana valley, which they own and where they propose to engage in the breeding of the finest beef cattle. In Missouri they purchased from the prize herd of the famous Hallwood farm at Carthage, three pure-bred shorthorn bulls, a white sired by Village Flash, 387926; a roan by the same sire; and a white by Cumberland Dreamer. From the same herd was selected 18 cows and heifers, bred to Village Flash, Wallhurst Goods, and the famous Master of Orange, now dead.

From the H. C. Johns Overlook Farm at Carthage was selected 18 Scotch heifers, reds, whites and roans, and bred to Choice Sultan, one of the grandest shorthorn bulls in America.

Proceeding to Gregory, Texas, additional stock was purchased for the Barco ranch, as follows:

A roan bull, Texas Sultan, born May 2, 1915, sired by Sultan, 316806, grandsire of the famous White Hall Sultan. Also 25 Scotch shorthorn heifers, reds and roans, bred to Sultan, 316806, Skylight 392356, and Roan Hero, 388438.

All of this stock has now arrived and all interested stockmen are invited to make a visit to the ranch in the Santa Ana valley, four miles east of Hollister.

In looking for stock for the Barco ranch, the owners found plenty of good shorthorn stock in California, but none for sale. They have inaugurated a new policy at the Barco ranch, in that there will be a sale price upon every head of stock. In fact a specialty will be made of handling the best breeds that money or influence can buy.

In addition to horned stock, the ranch has imported a fine line of registered Poland-China boars and sows, that are pictures to delight the eyes of stockraisers.

INCIDENTS IN THE CAREER OF BANASTAR.

Banastar, by Farandole—Blessing, one of the best race horses of his day and winner of the Brooklyn Handicap and Toboggan Handicap for W. H. Clark in 1899, and of the Metropolitan and Toboggan Handicaps in 1901 in the colors of Clarence H. Mackay, died Wednesday at the farm of Troop A., at Hustington, L. I. When he broke down shortly after important victories as a six-year-old, Mr. Mackay presented the noted racer to Capt. Fred Dubois. He has done useful service since as a sire of army mounts.

Banastar was a brilliant race horse but of uncertain temper, and two years before he won the Metropolitan for Mr. Mackay he was the direct cause of the loss of the services of Danny Maher to the American turf. At that time Banastar was owned by the late W. H. Clark, corporation counsel of New York, and had performed so well in previous races that he was made a strong favorite for the Suburban Handicap. Maher had the mount and, after a delay of nearly an hour at the post, the crack jockey got his mount away, only to have him wheel and refuse to run. There was a scandal over the affair, and Mr. Clark, who had a contract with Maher, kept him on the ground, in addition to which he was punished on the technical ground of having beaten the horse.

Mr. Clark had paid $10,000 for Banastar to the Oots Brothers of Kentucky, and sold him to Mr. Mackay for the same amount. He proved his worth when he carried top weight 123 pounds in the Metropolitan of 1901 and, in the hands of Odom, defeated a big band. A few days later he won the Toboggan with the same jockey and 130 pounds in the saddle. Banastar was twenty-one years old and his death was supposed to be due to heart disease.

Chicago horse market reports of last week say there is no change in the prices being paid in the auctions. The variety wanted by the foreign army inspectors is now great, ranging from light cavalry remounts weighing 900 lbs. or a little better to heavy artillery horses weighing 1,500 lbs. or more. Heavy cavalry horses, light artillery weighing around 1,300 lbs., and the French sorts are all wanted, so that the country consignor who picks his horses wisely in the country need experience little trouble in disposing of them so long as he refuses to take chances. With the number of horses now offering the inspectors are in no hurry to fill out their quota, hence the most of them are quite hard to please. Prices on commercial chunks weighing 1,200 to 1,275 or 1,300 lbs. at the first hands are practically on a par with those paid for medium weights, but selections from among the rejects can be made at a range of $125 to $150. On the generality of commercial chunks the price from consignors is $165 to $185, and eastern buyers are quite exacting at that. Heavier chunks with quality bring from $190 to $215, a few as high as $225, and big horses with quality, weighing over 1,600 lbs., make from $240 to $265. A few of the best can be disposed of at old-time figures. There are very few big horses here, the bulk of the run consisting of chunks weighing from 1,200 to 1,400 lbs. Few buyers were at the auctions this forenoon. Light reject stock sold at all sorts of prices, the decent kind making from $50 to $70, with medium-weight rejects at a range of $75 to $100.

The Ohio half mile racing circuit opened last Tuesday at Cranwood Park, near Cleveland. Several of the Californians expected to start.

Saddle Horse Sale June 20th

Much interest is manifested in the auction sale of saddle horses to be held next Tuesday evening, June 20th, by the Bridgford Company at the Riding Club, 701 Seventh Avenue, San Francisco. The horses, twenty-five in all, will be down from the Bridgford Company's breeding farm at Knightsen the day before the sale. The catalogue which has been issued from the Breeder and Sportsman press has the pedigrees of some great young prospects as well as brood mares and stallions that will be offered.

The mahogany bay stallion Artist Jr., foaled 1904, winner of the blue ribbon at the California State Fair of 1909, first in class and in sweepstake at the same fair of 1910 and winner of the model class at the Fresno fair of 1910, is No. 1 in the catalogue. Artist Jr. was sired by Artist Montrose, winner of the sweepstake at the Chicago World's Fair, he by Artist, the great Kentucky show horse. The dam of Artist Jr. was by Banta Gold Dust, great sire of saddle horses and himself a very handsome member of the famous Gold Dust family. Artist Jr. met with an accident in the winter of 1910 that has prevented his being shown since, but it in no wise affected him for breeding purposes and he is regularly licensed under the State law. He is a proven sire of show winners. His daughter Acme, now in the broodmare ranks, was a frequent winner, and his daughter Candy Kid, owned by Dr. Smyth of Oakland, is another that has won many blue ribbons. His son Dom Pedro was not only a show winner but was sold for $2,000 to the Japanese Association of California and presented to the Emperor of Japan at the time of his coronation. Artist Jr. is to be sold solely for the reason that the young mares retained for breeding on the Bridgford Company farm are nearly all by him and the young stallion Le Grand McDonald, winner of the Junior Championship at the P.-P. I. E. last year, was purchased to mate with them. Artist Jr. should be a good money earner in any practical horseman's hands.

Among others named in the catalogue is Exeter, a five-year-old bay mare by Artist Jr., dam Lady Stam B. by that wonderfully handsome trotting stallion Stam B. 2:11¼. Exeter will be shown under saddle.

Silver Pointer, a four-year-old gelding by Artist Jr. will also be shown under saddle. He is out of a mare by Bayswater Wilkes. Hotspur is a two-year-old gelding, full brother to Exeter. J. T., a two-year-old by the good saddle stallion Jack Rogers, that has been a frequent winner at California fairs. This two-year-old is out of a mare by Artist Jr.

Dorothy Green is the name of a young mare by Artist Jr. out of Lady Crawford by Bayswater Wilkes. Dorothy is but five years old and has a suckling colt by Le Grand McDonald at foot and has been bred back to the same horse. This is an opportunity for some one to secure the nucleus for a saddle horse breeding venture. The mare is a good individual and her colt is a sure show colt.

Azmoorie 2:20¾, one of the best bred mares in the State, was purchased by the Bridgford Company to breed to Artist Jr. She is a pacer and her sire is the great Nutwood Wilkes 2:16¼ and her dam the great brood mare Azrose, dam of Happy Dentist 2:05¾ and two more in the list by Azmoor 2:20½. Azmoorie is the dam of the young stallion Dom Pedro, sold for $2,000 as above noted, has a full brother to that horse at her side, and has been bred to Le Grand McDonald.

Minnie Russell is the name of a three-year-old filly that will be shown under saddle. She is a daughter of Artist Jr. out of a mare by Hollywood, son of Woodnut. The Dutchman is the name of another three-year-old, a gelding by Artist Jr. also to be shown under saddle, and Maxine still another three-year-old by Artist Jr. that will be shown. Maxine is just the thing for a boy or girl to ride as she is perfectly gentle.

Several yearlings will be offered and all are by registered saddle horse sires.

The last horse offered will be the imported French Draft stallion Alexandre, registered in both the French and American stud books. He is a fine individual, and is only sold because nearly all the draft mares now on the farm are by him and must be bred to another horse.

W. H. Hord, the well known live stock auctioneer, will conduct this sale and it will offer an opportunity for the purchase of young saddle stock that is not often met with in California.

The saddle horse sales recently held in New York, Missouri and Kentucky have been most successful, showing that there is an increase in interest in saddle and show horses in this country. That there are future first prize winners among the young things here offered is as certain as they are trained and shown.

Zoe Dillon by Sidney Dillon, Lon McDonald's candidate for the slow trotting classes on the Grand Circuit this year, has been a mile a shade below 2:20 and pleases the watch holders.

◈ ◈ ◈

Mary Putney (3) 2:05½ by San Francisco is in the best possible shape this spring according to all reports.

SIGNS OF LIFE IN WASHINGTON.

Clinton A. Harrison, the greatest enthusiast in harness horse breeding and training matters that the Pacific Coast has produced in years, and who never yet was too busy to drop us a line from the tracks he visits, to say a good word for a horseman or to help a fellow sell a horse, sends the Breeder and Sportsman the following:

Seattle, Wash., June 7, 1916.

Don McCrae, sheriff of Everett, Wash., is having his mare Vallejo Girl 2:10¼ trained at Everett by trainer George Small. Vallejo Girl is in fine form and will be raced this year over the North Pacific Circuit.

The new half mile track at Burlington, Skagit county, Wash., is finished. Charles Chambers is the first trainer on the new track and has S. M. Ball's horses headed by the nice Gambetta Wilkes stallion Van Winkle 2:20½ and some of his colts. Van Winkle is a real classy trotter and has good breeding. His register number is 44511. His dam is Delta, dam of Emma Offutt 2:11¼, by Mambrino Startle, and his grandam Delilah by Administrator, is the dam of three standard trotters. Van Winkle's first crop of colts are now coming on and they are nice horses and all show speed.

The half mile track at Lynden, Wash., is a good track. It is almost on a boundary line between Washington and British Columbia and quite a few horses are being trained there, so with all due respect to the pessimistic scribes and hammer artists the harness horse is not quite gone from the State of Washington.

The Southwestern Washington Fair track at Chehalis is in first class shape and several good horses are being trained there.

Over on Gray's Harbor, in the good town of Elma, there is a nice half mile track built and is being maintained by a few good sports and several horses are in regular training.

At the Washington State Fair grounds, North Yakima, a number of classy steeds are being made ready. Trainer Chas. Guion is there with Floradora Z. 2:11¼, Maud Bond, a nice mare by The Bondsman, also a fast green trotter owned by S. M. Ball of Mount Vernon. Guion is also training the good California trotting stallion True Kinney 2:12¼ for his new owner, Mr. F. A. Urban, the writer having recently sold this horse.

Our old California friend, formerly of Woodland, Mr. A. B. Kenney, is also at Yakima training a flock of Hal B. pacing mares.

Over at Walla Walla William Hogoboom is training some extra nice three-year-olds sired by that good son of Peter the Great, Blue Peter 2:16¼. "Huck" also has a few elegant colts sired by Prince Axworthy, a son of Axworthy that is out of a Kentucky Prince mare, and is extra sweet on a three-year-old pacer by Geo. A. Kelly's good sire Bonnie McK.

I am just making mention of these few tracks in Washington and while I am at it will say that while on a visit to Salem, Oregon, last week I saw Ed Keyt and Doctor Smith and Sam Bush all working some very fast horses over the lone tree track. I also saw the best big standard bred stallion it has been my pleasure to see. This horse is 16.2 tall, weighs 1200 pounds and is made like a model. He is a perfect pacer and has been en easy half in 1:03, with a quarter in 30 seconds. He was sired by the good game stallion Prince Seattle 2:18¼ by Stam B. 2:11¼, and is out of a Zombro mare. His owner is just as fine a man as ever trained a horse. His name is John Kirkland and I hope he has all the good luck in the world, for John is all I say and more. He is not only a nice man but a good competent trainer.

Well, they are racing in Canada, in New Jersey, in New York, in Ohio, in Minnesota, and why not in sunny California, Oregon and Washington? Gee Whiz! We are a sleepy bunch.

Yours truly,

C. A. HARRISON.

Wells Fargo & Co. spend about $70,000 a year in California for horses, and over $160,000 are spent annually for supplies for them. The firm makes its own harness and spends $10,000 a year for labor and $11,000 for leather. The firm has on its pay roll in California 2800 people who receive annually in wages about $800,000. Wells, Fargo & Co. use 250 horses and about 16 automobiles in their San Francisco delivery and Manager Christenson never expects this ratio to be changed very much.

◈ ◈ ◈

Matt Meek, of Oklahoma, shipped eighteen carloads of horses from California to Oklahoma last week for the use of the allies on the battlefields of Europe. After these horses reach Mr. Weeks' home they will be inspected by the agents of the entente powers and he expects a very small proportion of them will be rejected. Mr. Weeks will visit California again in the near future as he says the demand for horses for the European armies is increasing.

◈ ◈ ◈

The E. C. Horst Company at Wheatland, California, has a contract to buy 1000 head of horses for the French government, and has already purchased a large number in the Sacramento valley.

◈ ◈ ◈

May Patchen 2:19½, raced in Canada last season, given in the Year Book as "by Patchen," is really a daughter of Joe Patchen II 2:03¾, out of Black Maud 2:18¼.

CAL. STATE FAIR PREMIUM LIST.

The premium list for the California State Fair of 1916 is ready for distribution. It contains the rules and regulations for the 62nd annual fair of the California State Agricultural Society to be held at Sacramento from Saturday, Sept. 2nd to Saturday, Sept. 9th, both dates inclusive.

The prizes in the classes for horses are very liberal this year and should lead to the biggest display of equines ever seen in the State.

The California Stallion Registration Board, to encourage horse breeding in this State offers four cups and $800 in special premiums to be awarded at the State Fair of 1916, for pure bred stallions and jacks and their get, as follows:

Draft stallion any breed and three of his get, trophy cup and $100 to first, $60 to second and $40 to third.

Standard stallion, trotter or pacer, and three of his get, trophy cup and $100 to first, $60 to second and $40 to third.

American Saddle Horse stallion and three of his get, trophy cup and $100 to first, $60 to second and $40 to third.

Jack and three of his get, trophy cup and $100 to first, $60 to second and $40 to third.

In the different draft classes there will be the usual liberal premiums, with numerous special premiums and medals offered by the Percheron Society of America, the Shire Horse Society of England, and the American Shire Horse Association.

There will be liberal prizes for German Coach and Hackney horses with a special prize by the American Hackney Horse Association for the best registered Hackney, stallion, mare or gelding not under 14.2 hands.

Standard Bred Horses are well provided for with classes for the different ages and sexes, stallion with not less than three of his get and mare with not less than two of her foals, as well as the champion stallion cup offered by the American Trotting Register Association to the fair association having the largest number of exhibitors in a class for standard stallion and five of his get four years old and under. The cup to be awarded by the association winning it to the stallion which shall be decided to be the best in that class.

Five gaited Saddle Horses are provided with many classes and liberal premiums. For the best stallion four years old and over the prizes will be $50, $25 and $15. The classes three years and under will be awarded $25, $15 and $10 in each class. Mares four years old and over $30, $20 and $10; the three and two-year-old classes will get $25, $15 and $10, and one year and under will receive $20, $10 and $5. Many prizes will be offered for geldings, with a sweepstake of $75, $40 and $25 for stallion, mare or gelding. The American Saddle Horse Breeders' Association will give a trophy valued at $100 for stallion or mare to be shown to hand. Competition for this trophy is limited to horses owned in California. Then there is the State Fair stake for five gaited saddle horses, $250 for the senior class, any age or sex, and $250 for the junior class, any sex, four years old or under. The money will be divided 50, 25, 15, and 10 per cent in each stake. Entries will close August 2nd.

There will also be prizes for three gaited saddle horses, combination saddle horses, high school horses, California stock horses, road teams, Shetlands and ponies other than Shetland, and for work teams, draft horses in harness, mules in harness, etc.

Horse owners should send to Secretary Chas. Paine, Sacramento, Cal., for one of the premium lists. They give all the premiums, rules, etc.

STATE FAIR NOTES.

An art exhibit that will far exceed anything yet seen at a California State Fair will be made in the new Women's Building at Agricultural Park this year. An effort will be made to make the exhibit of oil paintings one of the most extensive ever made on this coast.

Two locomotives in collision will again be one of the features of the State Fair this year. As a "thriller" it has proved a success and draws more people at the gate than any other attraction.

A first aid mine rescue, with ten teams competing, has been definitely settled upon by the State Fair directors as one of the features for this year's fair. It proved a big sensation at the P.-P. I. E. and has much educational value.

Judges have been selected as follows for the animal contests this year: Professor E. A. Trowbridge of the department of animal industry, University of Missouri, judge at horse show and on beef cattle; Professor E. W. Major of Los Angeles, judge on dairy cattle; Walter Gatton of Calexico, judge on Duroc Jersey futurity; F. M. Laip of San Jose, judge of Poland-China futurity; Professor J. I. Thompson of Davis, judge of sheep; Mrs. E. P. Thayer of Ontario, Cal., judge of fine arts; Robert V. Moore of Los Angeles, judge of pigeons; C. G. Hinds of Oakland, judge of poultry.

SAN FRANCISCO HAY MARKET.

Fancy wheat hay (light bales), $14.50 to $15.50; No. 1 wheat or wheat and oat, $12 to $13.50; No. 2, wheat or wheat and oat, $9 to $11.50; choice tame oat, $14 to $15; other tame oat, $12 to $13.50; barley, $10.50 to $12.50; wild oat, $10 to $12; alfalfa, $8 to $12; stock hay, $7.50 to $9; No. 1 barley straw, 25c to 40c.

THE SIRE OF LEATA J. 2:03.

The subject of this sketch is "Royal McKinney," or "Old Royal" as he is affectionately called by his friends. Not because of his age, having been foaled in 1902, but rather because of his staple character and fine individuality.

Thirty-seven years ago, in 1879, the late Dr. Pardee, of Oakland, whose son afterwards became Governor of California, came to me with a little old-fashioned bob-tailed bay mare that he wished to mate with the stallion Santa Claus 2:17½ that I then had at the old Oakland Trotting Park. He said he thought a great deal of that little old mare. Though she was short of tail she was long on pugnacity, which was later better understood when it was found that she was by "Bull Pup" or Road House St. Lawrence, as that horse was sometimes called. The Doctor's faith in her sire materialized as this same "Bull Pup" was the grandsire of Directum 2:05¼, Hulda 2:08½ and Dione 2:07¼, the dam of Bernice R. 2:07¼. So I mated this "Bull Pup" mare of the Doctor's with Santa Claus, the champion five-year-old stallion of his day, and the sire of William Penn 2:07, Sidney the greatest of all early and extreme speed sires, sire of Sidney Dillon, the sire of Lou Dillon 1:58 and seven in 2:07 or better. The product of this union was a filly afterwards known as Nellie Grant. She was subsequently mated with Director 2:17 and produced a colt that was named Live Oak Hero. This colt was never track broke and his opportunities in the stud were therefore restricted. He was given a few good mares however, two of which were daughters of Dexter Prince—the produce of one being J. T. 2:12½, sire of Lillian R. 2:04¼, dam of Peter Mac, perhaps the fastest of living stallions. The other daughter of Dexter Prince was a mare called Kitty and she was out of Brownie by Capt. Lewis. Her foal by Live Oak Hero was a filly and was named Hattie Hero. She was in turn mated with the great McKinney and the result was the subject of this sketch, Royal McKinney.

It appears that the irony of fate is the heritage of this somewhat obscure sire, as was the case with many of his predecessors. Bred and raised by a country gentleman, his best years were restricted to a few of his owner's roadster mares and to neighborly courtesies. No line of publicity on cross-roads cards ever bespoke his lineage or solicited his services. He simply lived the life of a country gent. and gratified the whims and fancies of his affluent owner. It was not until reverses forced him upon the auction block that any opportunities in the stud offered themselves and then only of an ordinary character. Up to this time but five of his get have ever seen the inside of a race track. These are Leata J. 2:03, whose grand circuit performances of 1914 are but recent incidents and placed her among the foremost racing mares of her day, and I may add that she was the only one of the five who was given the opportunity her lineage deserved. Another was Blanche A. mat. 2:13, and Lloyd A. trial 2:13, both trotters that showed two-minute speed. Since Royal McKinney's transfer of ownership, which occurred some four years ago, his opportunities have been somewhat extended though but few of his mares could be classed as fashionable along current blood lines. There is a two-year-old colt called The Orphan by Royal McKinney that is a good one. His dam is by Derby Ash, second dam by Mambrino Wilkes and third dam by Gen. McClellan. He had his first harness on the 19th of March, and last Saturday stepped a mile in 2:22½. He is owned by Mr. J. Aker of Stockton.

The unfortunate fate of many great sires hangs over the head of Old Royal through no fault of his. His name may never grace the pages of the Great Book of classic lineage; but be that as it may, his name may yet go into memory's pages with greater laurels. My faith in his blood lines classes him with all of our great sires of speed, the four greatest of which may be mentioned as California's galaxy: Santa Claus, Director, McKinney and Dexter Prince. Three of them great race horses, and the fourth would have been, but for his unsoundness. Dexter Prince was undoubtedly the fastest son of Kentucky Prince. I have often timed him eighths in 15 seconds for Richard Havey at Palo Alto.

Respectfully,

JOHN ROWEN.

Stockton, Cal.

STOCK SHOW FOR SAN FRANCISCO.

An annual live stock show with entries open to the world is to be held in San Francisco late in the fall each year, if the plans inaugurated at a meeting of representative merchants and stock men held in this city last Tuesday, materialize. Mr. R. B. Hale presided at the meeting and set forth the purpose for which the meeting had been called. Among the speakers were M. H. Tichenor of the Palo Alto Stock Farms, W. Mayo Newhall, W. S. Gilford of Orland, B. F. Schlesinger, A. Christenson, George Tourny, A. P. Giannini, F. S. Moody, F. W. Van Sicklen, Edgar J. de Pue and Frederick J. Koster.

It was the consensus of opinion that there is a great need of such a show in California as a means of standardization in live stock of the state, and the educational features that such shows offer to producers. The plan is to make the show the court of last appeal on awards for live stock for the entire Pacific Coast, coming at a date after awards have been made by State and county fairs and other exhibits. The figure of $10,000 has been tentatively agreed upon for cash prizes and awards, and this amount is already practically assured.

A committee consisting of W. Mayo Newhall, chairman; A. W. Foster, vice-chairman; M. H. Tichenor, William T. Sesnon, A. P. Giannini and B. F. Schlesinger was appointed to discuss arrangements and plans for the show and report back at an early day to the main body with recommendations. The committee will meet next Tuesday afternoon at the Chamber of Commerce for its first meeting.

WILL MURPHY LEAD AGAIN THIS YEAR?

While at this writing, weeks before the opening of the Grand Circuit, the prospects of the Poughkeepsie wizard, Tom Murphy, sweeping the platter in the rich trotting stakes of the big ring do not look as bright as they did at the same time in 1915, yet advices from the training camp on the banks of the historic Hudson are to the effect that his two most prominent candidates for these events are coming along nicely in their work, and as both showed themselves to be right as 2:05 trotters last season, Murphy must be considered a dangerous factor. Of course Peter Mac, with a mile officially to his credit in 2:03½, is the most highly tried trotter ever to be staked through the big ring, while Mabel Trask, the smooth-going chestnut mare, which "Long Shot" Cox drove a trial mile in 2:04¼, is another which is enjoying early-season favoritism over the pair from the Murphy stable.

Last season Murphy had the $30,000 Peter Scott as his dependence for the rich plums of the major circuit, and the rough-going, bulldog trotter was the one picked by the majority of the critics to lead the money winners, which he did, and set a record for money winnings for future generations to shoot at. Peter, however, did not have such highly tried opponents, although he was trimmed in the M. and M. by Lee Axworthy, which, a few weeks later, took a record of 2:03¼, but the Cleveland colt did not retain his form and gave the Murphy kale collector no further trouble after the passage-at-arms in the local classic. Peter Scott was a high-class 2:05 trotter, but when asked to go faster was a bit short, as evidenced by his being beaten two heats by Lee Axworthy in 2:04¾, and one heat by Bonnington in the same time. It was the bulldog courage, the fact that he apparently never knew when he was beaten that put Peter Scott ahead of all the money winners.

The pair upon which Murphy will place his main reliance in the stakes this summer are Trampright (2:08¼) and Vanko (2:06¼), both seasoned race horses, which have been tried and not found wanting in the Grand Circuit crucible. The former was but a four-year-old last season and won several races for Murphy on the big ring—in fact, he won all of his starts, and, curiously enough, he took his best record in a heat in which he defeated by a head his now stable companion, Vanko. The colt was raced over the half-mile tracks in 1914 and took a record of 2:09¼ in a trial against the watch.

After Trampright won at Columbus last fall Murphy decided not to start him again, not desiring to take a chance of getting him out of his class. However, at Lexington he gave him the acid test against the watch, the youngster going to the half in 1:04¼ and finishing the mile in 2:05 flat, the last half in 1:00¾. On another occasion he trotted a quarter in :29½, which shows that he has that always necessary "lick," one of the prime essentials of a successful race horse. His record was taken over a muddy track, and outside watches caught the mile in 2:07½. He is a small horse, but stout-made, and made but one break, I believe, in his 1915 races.

Vanko is a Canadian product, and was one of the best half-mile trotters of the past season. He campaigned through Michigan and Ohio on the two-lap tracks, taking on such stars of the minor circuits as Jack K., Billy Bing, Mr. Forbes, etc., and he was a frequent winner and took a record of 2:11¼. His one essay in a race for the money in select company was in the race previously mentioned at Columbus, where he compelled Trampright to take a record which eliminated him from the 2:10 classes.

The Columbus trainer, Denny Valentine, had an option on Vanko at Lexington and drove him a mile in 2:06¼, but for some reason the deal fell through and Murphy stepped in and purchased the horse for one of his patrons, the price paid being something like $5,000. If one or both of these trotters should prove stars this summer the profit would be greater than in 1913, for the pair did not cost much more than 25 per cent of what was paid for Peter Scott.—Cincinnati Enquirer.

Shorthorns are bringing big prices. The Chicago Live Stock World reports three recent auctions of animals of this breed as follows: "Shorthorns are selling some. The Saunders sale averaged $1045.75 on fifty head, the Stanton sale averaged $1164.82 on twenty-six head and Carpenter & Ross' sale averaged $1,000 on fifty-seven head. The highest price of the last named sale was $5,000 paid for the roan bull Lord Avondale, calved April 28, 1913. He was purchased by Jess Andrews of West Point, Indiana."

H. K. Devereux, president of the Grand Circuit, has been invited to judge the trotters in harness in company with Rensselaer Weston at the New York State Fair horse show in September.

FOUR STRAIGHT FOR BRADMONT.

At last Sunday's matinee of the San Francisco-California Driving Club at Golden Gate Park track, four races were carded and furnished a large crowd with some good sport. The 2:20 pace, 2:15 pace and free-for-all trot were at three-quarter mile heats, but the free-for-all pace in which Bradmont, Emma M., W. J. K. and Senator H. were starters was at mile heats. Bradmont should have won in straight heats, but lost a toe weight in the first heat and finished second to Emma M. in 2:14. He took the next two, however, handily in 2:13 and 2:12.

Silver Logan and Cookey were the contenders in the first race in which there were four starters and the first named won, although he lost the second heat in faster time than his winning heats were paced in.

Victor Pointer and Pointer Belle had quite a duel in the second race, while Merrylina won the last race in straight heats. The summaries:

2:20 pace, three-quarters of a mile:

Silver Logan	(D. Healy)	1	3	1
Cookey	(J. Vermet)	2	1	2
Dibble Wilkes	(S. Benson)	4	2	4
Rose O.	(James J. Ryan)	3	4	3

Time—1:45, 1:46½, 1:45¾.

2:15 pace, three-quarters of a mile:

Victor Pointer	(D. Keating)	2	1	1
Pointer Belle	(Kidd & Luce)	1	2	2

Time—1:41½, 1:41, 1:45½.

Free-for-all pace, one mile:

Bradmont	(G. J. Giannini)	2	1	1
Emma M.	(William Malough)	1	2	3
W. J. K.	(W. J. Kenney)	4	3	2
Senator H.	(J. M. Kidd)	3	4	4

Time—2:14, 2:13, 2:12.

Free-for-all trot, three-quarters of a mile:

Merrylina	(J. H. Wilkins)	1	1	
Yoncalla	(A. Giavonnetti)	2	2	
Minequa	(M. Ford)	4	3	
Petrina	(Al Schwartz)	3	4	

Time—1:40, 1:40.

GETTING READY AT THE BAKER, ORE., TRACK.

As usual the trainers at the Baker track are wearing a broad smile. The reasons for this are: The weather is all that could be desired, the track is in first-class condition, and the horses are working in a satisfactory manner. There are about twenty head in training. These trainers believe in preparedness, as is shown by the condition of the majority of the horses. No fast miles have been asked of any of them as yet, for the reason that they will not ship to early meetings, but they will be ready to try conclusions when the foreign "bear cats" arrive.

Chas. Butcher has five head. His string is headed by Harold Welcome p. 2:09¼, by Welcome; Terry McGregor p., no record, by Gregmont; a three-year-old green pacer by Joe Brady; Alice DeForest, three-year-old trotter, by DeForest; and Bonfire, two-year-old trotter, by Gamax. This colt is learning fast and has every appearance of developing into a very useful trotter.

Chas. Willbourne and Thos. Brady are working seven head. Haltamont p. 2:05¼, by Hal B.; Maurice S. p. 2:06, by King S.; Delmas p. 2:09¼, by Dialect; Amy McKinney, trotter, no record, by Capt. McKinney; Ben T., four-year-old trotter, by McV.; Byron Regent, p., four-year-old, green, by Royal Regent, dam Ina Barondale, and a promising two-year-old trotter. J. B. Rogers has very recently commenced his work with his trotter Royal Meath, who shows plenty of "pep" and is going good.

Pierce & Son are training six runners, headed by the breadwonner Isom. Unfortunately Isom stepped on a nail which has kept him out of training, but he is fast rounding to and promises to be himself at an early date. Several other good ones are included in this stable.

Frank Speelman has the big Harney Valley horse, Waumpus Cat, and Thos. Caine has Marwood. Plume and Black Sam, belonging to S. Palmer, have gone to the early meetings.

Oregon Joe and several other local horses have created no little excitement in running circles, the result being about three matched races a week for stakes amounting to from $20 to $50 a race.

More interest is being manifested in racing here than there has been in years. Several other stables are expected here soon to complete their training season. All the members of the Intermountain Circuit are showing commendable interest and the result is bound to be some of the best racing in the West.

Yours truly,

JOSEPH WADDELL.

Dick Benson, who was a prominent trotting horse trainer years ago but who turned his attention to the runners and has been in charge of the thoroughbreds owned by James Butler of Eastview Farm, New York, since 1913, died suddenly on Monday, June 5th, at his old home in Kansas City. Benson visited California during the winter of 1901 and later purchased The Roman (son of McKinney and Wanda) from the late Frank H. Burke and drove the gelding to his record of 2:09¼ in a winning race at Providence, Rhode Island, in September, 1902. Benson was successful as a trainer with both trotters and runners. Among the trotters that he successfully handled were the sensational Ryland T. 2:07¾, John Nolan 2:08 and The Roman, the two latter being winners of The Charter Oak. Benson was about 60 years of age and unmarried. He died of Bright's disease.

White Sox has been declared out of the two-minute pace at Poughkeepsie.

Santa Rosa's Great Festival

The entire program for the great Forest Festival and Agricultural District Fair to be held at Santa Rosa, August 7th to 13th inclusive, is announced by Secretary Edward H. Brown and every person who reads it will want to be present when the big fair and festival opens on Monday, the first day, and when he gazes at the wondrous displays that will be made in the beautiful forest of trees out at the Santa Rosa Fair Grounds, and sees the live stock display and the handsome horses being made ready for the races which begin on Wednesday under the auspices of the Pacific Trotting Horse Breeders' Association, he will want to remain until the last light is put out on the following Sunday evening. It will surely be a great week, as the following program shows:

Monday, August 7, 1916.

1:30 p. m.—Opening of Fair Grounds to public. Music and orations for the occasion.
2:30 p. m.—Better baby show.
4:00 p. m.—Judging of horticultural products.
7:30 p. m.—Grand Ball and promenade through the beautiful forest decorated with horticultural, agricultural and manufactured products.

Tuesday, August 3—Children's Day.

10:00 a. m.—Judging of agricultural products.
11:00 a. m.—Judging of live stock.
1:30 p. m.—Stock parade.
3:00 p. m.—Forest carnival events.
8:00 p. m.—Dance and special events on midway.

Wednesday, August 9—Pomona Grange's Day.

10:00 a. m.—Judging of manufactured products.
2:00 p. m.—Races, P. C. T. H. B. A.:
Three-year-old pacing division, Futurity Stake No. 13 (closed 1912).....$1300
2:09 class, trotting..... 500
2:20 class, pacing 900
8:00 p. m.—Dance. Special events on midway. Chorus of 300 voices.

Thursday, August 10—Petaluma and Marin Co. Day.

10:00 a. m.—Judging of mammoth egg exhibit.
11:00 a. m.—Address on scientific poultry raising.
2:00 p. m.—Races, P. C. T. H. B. A.:
Two-year-old trotting division, Futurity Stake No. 14 (closed 1913).....$1350
2:15 class, trotting..... 900
2:10 class, pacing 500
8:00 p. m.—Dance. Special events on midway.

Friday, August 11—Northern Sonoma and Mendocino County Day.

10:00 a. m.—Stock parade.
2:00 p. m.—Races, P. C. T. H. B. A.:
Two-year-old pacing division, Futurity Stake No. 14 (closed 1913).....$1100
Three-year-old trotting division Futurity Stake No. 13 (closed 1912).... 3300
2:13 class, pacing 900
8:00 p. m.—Dance. Special events on midway.
10:30 p. m.—Mammoth bonfire. Baked Burbank potato festivity.

Saturday, August 12—San Francisco and Oakland Day

10:00 a. m.—Reception of visitors.
2:00 p. m.—Races, P. C. T. H. B. A.:
2:12 class, trotting.....$500
Free-for-all class, pacing 900
2:20 class, trotting..... 900
8:00 p. m.—Dance. Special events on midway.
10:30 p. m.—Barbecue.

Sunday, August 13.

10:00 a. m.—Inspection of horticultural, agricultural, manufactured and stock exhibits.
2:00 p. m.—Concerts.
3:00 p. m.—Drill by Company E., National Guards.

—o—

The latest report from Patchen Wilkes Farm, the home of Peter Volo 2:02, writes A. G. Asdikian, was that the champion had already served forty-two mares and more were waiting, so that the number will exceed fifty. The demand for the services of Peter Mac 2:03½ appears to be equally brisk in Kentucky, where he is now located, but how many have been bred to him is not given out, while Lord Dewey 2:03¾ will be at his old stand to represent the Bingen family with Etawah 2:03 as grandson and great-grandson of that famous sire, respectively. None of this noted four have yet produced standard speed and it will be some time before their merits will be proven as begetters of their kind—youngsters with extreme speed and racehorses of quality, but as the choicest of matrons are being bred to them, and will be each season, their names will be recorded on the list of standard speed sires long before the younger ones reach the age of ten, or soon be forgotten as failures. As sensational colt trotters and racehorses, both Etawah and Peter Volo have retired to the stud with fixed and proven reputations, the latter with a year in his favor, and will attract patronage from owners of the best bred mares for several years to come, as the champion, The Harvester, has. Peter Mac, although a phenomenal trotter still has to prove his ability as a racehorse also, with the final result that the trio will occupy a prominent and interesting position in breeding ranks never held by a group of speedier stallions.

SUISUN STOCK FARM'S SALE.

The annual sale of the colts and fillies bred on this famous speed breeding farm will be held at Suisun on Saturday, July 1st, this year. There are an even dozen highly bred two-year-olds, all unbroken, but in fine order and ready to begin on. Eight are by that highly bred young sire Montbaine 48667, son of the great Moko out of the famous broodmare Krem Marie, dam of 4, by the ex-champion trotting stallion Kremlin 2:07¾. The other four are by Suisun Farm's great sire of speed Demonio 2:11¼, sire of 8 in the 2:10 list. The colts and fillies to be offered are as follows:

By Montbaine 48667.

Bay filly, dam Minerva, dam of Denervo 2:06½, Solano Boy 207 and Ben Rush 2:10½, by Guy Wilkes 2:15¼.
Bay filly, dam Edna Earle by Demonio 2:11¼.
Black filly, dam Nellie T. (dam of Little Babe and Delmonio) by Dawn 2:18¾, son of Nutwood.
Bay filly, dam Coronio by Demonio 2:11¼.
Chestnut filly, dam Normonio, sister to Memonio 2:09½ by Demonio 2:11¼.
Bay gelding, dam Laura Demonio by Demonio 2:11¼.
Bay filly, dam Janice by Demonio 2:11¼.
Bay gelding, dam Eva Demonio by Demonio 2:11¼.

By Demonio 2:11¼.

Brown gelding, dam Corinne by California Nutwood 15119.
Bay filly, dam Mamie Airlie by Prince Airlie 28045.
Bay gelding, dam Corasham by Athasham 2:09¼.
Bay gelding, dam Margaret Hunt, sister to Prof. Heald 2:09½, by Nutwood Wilkes 2:16¼.

All the above two-year-olds are bred in producing lines. Their dams are either producers or out of producing mares and there are no better bred youngsters to be found on any stock farm anywhere.

The Suisun Stock Farm never by-bids at any of its sales. Every animal offered will go for what it will bring. This will be a great opportunity for those who desire to buy a youngster that can be raced next year on the circuit or at the matinees. Remember that from the Suisun Stock Farm sales have come such good ones as Airlie Demonio 2:05½, Denervo 2:06¼, Potrero Boy 2:06¼, Nordwell 2:08½, Oro Mo 2:09¼, Memonio 2:09½, Demonio Wilkes 2:09¾ and many others. The sale will take place at Suisun at 2 p. m. July 1st, there being trains on the Southern Pacific to that town from all points that will enable persons residing in San Francisco, Oakland, San Jose, Pleasanton, Stockton, Sacramento, Woodland, Marysville or any other point within a radius of 100 miles of Suisun, to reach that town in time for the sale and to return home the same evening.

—o—

BIG ENTRY LIST AT LEXINGTON.

Lexington, Ky., June 10.—Four hundred and twelve entries have been made in the eight fixed events and kept good in the four Kentucky Futurity divisions of the Kentucky Trotting Horse Breeders' Association for its annual meeting Oct. 2 to 14. This means an average of a fraction over thirty-four per race, which figure sets the high mark for the year.

The principal event is, of course, the great trotting classic, the Transylvania, a $5,000 event for 2:08 trotters, starters to be named Sept. 15. Eighteen have taken subscriptions as follows:

Pastime stable, Duquesne stable, A. McDonald, E. F. Geers, W. R. Cox, Thomas W. Murphy, W. G. Durfee, Thomas D. Bell, L. W. Fischer, C. L. Gloyd, agent; Harvey Ernest, Dick McMahon, V. L. Shuler, Brook Farm, Beau Ideal Stock Farm, Saugerties Farm, Samuel Harris and David Cahill.

Inasmuch as starters do not have to be named till Sept. 15 it would be mere guesswork to say just what horses will be in the field, but the names above naturally suggest such stars as Mabel Trask 2:14¾, Ima Jay 2:11¼, Peter Mc 2:03½, Trampright 2:08¼, Rusticoat 2:08¼, Ames Albingen 2:07¾, St. Frisco 2:07¼, Omar 2:05¼, Junior Watts 2:11¼, Peter McCormack 2:05½, Axtien 2:06¼ and Virginia Barnette 2:08¼.

The Castleton Cup, $3,000 for 2:07 trotters, has received the entry of twenty-three of the best racers now in training. It is likely the field will include a number of Transylvania starters, as it will be carded the second week.

The three-year-old Kentucky Futurity has fifty trotters and twelve pacers. The trotting wing of this division is worth $14,000 and always produces a battle royal between the greatest colt trotters of the year. This, the twenty-fourth renewal, will be one of the most brilliant contests in the history of the stake.

The Kentucky, a $2,000 event for three-year-old trotters and sort of companion race for the Futurity, has fifty entries. The starters in it will be made up largely of the Futurity field with the winner of the latter barred, lending a new interest.

Sixty-eight sterling youngsters have made the payment in the two-year-old Futurity and in its companion race, the Lexington, $2,000 for two-year-old trotters, fifty have been entered. In it the two-year-old Futurity winner will be barred, adding to the uncertainty as to the ultimate winner.

—o—

Koh-I-Noor, winner of the Fashion Stakes, was purchased for $800 as a yearling by William Karrick, acting for Schuyler L. Parsons. She is the best of Dr. Leggo's get that has come to the races in many years.

A FALSE BELIEF.

Superstitions and beliefs founded upon "signs" exist to a certain extent with a very large proportion of the people of the entire world, largely based upon legends and folk tales of the past, yet just the same having an effect upon many whose business training and education would seem to have certainly placed them at a point where only facts would be considered.

The often expressed belief, that a pure going trotter cannot last out a prolonged race because his method of progress is so natural and easy that he must necessarily run down, seems to us one of the greatest fallacies that has ever been called to our attention.

We recognize the fact that it is not possible for any performer to win a race when the demands upon his speed and vitality encroach upon and exhaust his reserve force to a greater degree than is demanded of his competitors in the same event, but we know, beyond any question of a doubt, that a pure gaited performer of equal constitution with one of rough gait, cannot possibly make an equal drain upon the aforesaid reserve. This is a matter that is easy of demonstration ,as it is only necessary to watch a laborer of any sort and speedily we become aware of the fact that the one who performs his daily stunt without any false motions finds, at the end of the day, the greater record of work accomplished to his credit.

Applying the old geometrical theorem, proven beyond any question of disputation, that "a straight line is the shortest distance between two points" we necessarily must arrive at the conclusion that any unnecessary effort on the part of a man or horse, any useless movement, must beyond a shadow of a doubt decrease the production of the laborer, or the speed of the animal.

How then can we explain the remarks of the trainers and grooms that so-and-so is rough gaited and does not tire as quickly as a pure gaited horse would? Or, on the other hand, how can we explain the fact that the trainer spends hours in shoeing, balancing, and booting a horse to improve his gait? The above two questions are absolutely contradictory, and we are thereupon placed in the position that we must judge as to which has the most evidence in support of it.

It is not a criminal matter wherein we are bound to convict our opponent beyond the shadow of a doubt, on the other hand it is a civil question upon which the preponderance of evidence controls the verdict.

Such being the case, and our hands not being tied by any technical rules of evidence that will prevent us from submitting the actual truth for the consideration of our readers, a study of the champions of the past, the horses that not only promised but delivered great feats, would certainly seem to us to be proper in this connection.

What rough gaited trotter ever beat Uhlan 1:58? How many trotters of any kind ever beat this champion in a race? Name over the horses that beat the champion stallion, The Harvester 2:01. Did any man, woman or child ever look at a better going trotter than Etawah 2:03? Can any person point to an exhibition of gameness surpassing that of this great stallion?

Never before was a three-year-old asked to do what he did at Columbus on Friday and then but a few days later win a Kentucky Futurity.

How about Peter Volo 2:02, Lee Axworthy 2:03¼, Sweet Marie 2:02, and a host of others?

Were they accused of showing the white feather very often? Did any rough going trotters ever outrace them?

Hamburg Belle 2:01¼, holder of the fastest race record for one mile and for two consecutive heats (2:01¼ and 2:01¾) was never faulted as regards her gait, and sweet little Alix 2:03¾, while a trifle rough in a mile in 2:15, was simply the poetry of motion at speed.

We have not cited all of the champions above but we have named those whose feats still stand supreme in the harness horse world, and yet not a one reached their pinnacle of greatness through other than the best of gaits.

Does it not therefore seem almost in the light of a joke to hear any one claim that roughness of gait predicates a game disposition?

Ask a trainer to name the rough gaited horses that now hold world's records. Then ask him what course of preparation he puts a horse through in preparing him for market and inquire why he does everything within his knowledge and power to improve his gait.

Why, if a rough gaited horse is desirable, does he expend all of his energy in improving his method of going?

It is certainly reasonable to conclude that a trotter is, to a certain extent, very much like a piece of machinery, and we know that machinery lasts longer and does better work when properly adjusted.

In the case of all the great performers heretofore named in this article, we can continually find that they proved the geometrical theorem above referred to, "a straight line is the shortest distance between two points," and we unhesitatingly state our belief that they were great only because of their purity of gait. No analysis of the subject enables us to subscribe to the doctrine that a pure gaited horse will run down before a rough gaited one, if the conditions are equal and no greater demand is made of the one than of the other.—American Sportsman.

Notes and News

Reno entries close next Tuesday, June 20th.

◈◈◈

Fresno entries will close Monday, June 26th. All purses re-opened.

◈◈◈

Three stakes, the 2:09 trot, the 2:10 pace and the 2:12 trot, have been re-opened by the Pacific Coast Trotting Horse Breeders Association, entries to close July 3rd.

◈◈◈

Havis James is said to have the best string of horses he has had in years, and is located at Detroit.

◈◈◈

Trotter and Pacer calls My Irene S. (2) 2:28¾ by Petigru 2:10½ a 100 per cent mare, as every one of her foals has taken a standard record.

◈◈◈

The Bridgford Company's auction sale of saddle horses will be held next Tuesday evening at the Riding Club, 701 Seventh Avenue, San Francisco.

◈◈◈

Dates have already been announced for ninety-three trotting meetings in the State of New York this year. New York horsemen do not have to go far to start a horse.

◈◈◈

The Sonoma Driving Club will hold its first matinee of the season at Santa Rosa track Sunday, June 25th. There is great friendly rivalry between the club's members as to the speed of their horses.

◈◈◈

Sired by a $50,000 stallion, out of a former star of the Grand Circuit, and a full brother to a trotter that has been priced at $125,000, is the story that goes with the colt by Peter the Great 2:07¼ that Lillian R. 2:04¼ foaled last week.

◈◈◈

There were some half mile races held at Wartsburg, Washington, May 27th, and a green pacer named Wallace Hal won in three straight heats from a lot of old campaigners, the heats being right around 1:05.

◈◈◈

The courts have found against Mike McDevitt, who brought suit against W. E. D. Stokes for $1,000, alleging that it was due him as having marked the first trotter by Peter the Great 2:07¼ (Grace 2:04¾) to beat 2:05, according to a public offer made by the then-owner of the stallion.

◈◈◈

John B. Stetson, formerly of Salem, Oregon, is now in charge of the breeding operations at Midway Stock Farm, Kearney, Neb. Robert Bingen 2:11¼ and Judge Maxey, son of Axworthy, are the stallions in service. Over 100 mares are being served by the above named stallions. Mr. Stetson is a busy man. All the mares being bred are by popular sires.

◈◈◈

The Latonia Derby, which carries $10,000 in added money, is the last of the big stakes of the Kentucky season and will be run off today at the Latonia track. There were sixty nominations to this stake, and it is expected the race will result in one of the greatest contests in the history of the event.

◈◈◈

Miss Katherine Herman of Everett, Washington, is the owner, driver and trainer of the fast Diablo pacing mare Elfreda D. 2:12¼. Miss Herman is a real lover of her horses. In addition to Elfreda D. she owns a very nice two-year-old colt by Frank H., son of Ira Wilkes. Miss Herman insists on driving her own horses and says that she likes the sport.

◈◈◈

The once-famous pacer Shadow Chimes 2:05, the 20-year-old son of Chimes and Charmer, by Mambrino King, that Ed. Geers campaigned 15 years ago, was sold for $184 at auction recently, at Charlottetown, P. E. I. Now when there is an authentic report of a twenty-year-old automobile selling for that amount, we'll admit that the benzine wagon is crowding the horse a little.

◈◈◈

The big horse sales of Missouri, Kentucky, Ohio and New York have demonstrated that there is little demand for the "family horse." But high class saddle horses are commanding better prices than ever before known. One of the features of the New York sales is that long tailed horses are the ones wanted most, as they outsell the dock tailed fellows. Every metropolitan paper is reporting the establishment of riding clubs and there is a 'back' to the saddle" movement that extends all over the country.

◈◈◈

H. K. Devereux visited Atlanta, Georgia, recently and writes enthusiastically about the new track there which has come into the Grand Circuit. He says the grounds cost at least $200,000. It is a mile track around a lake, the water conveniently near the inner rail the entire distance, as to afford a pleasant bath should the driver go over the fence. While he could wade ashore near the inner rail, were he to go far out he would find from 50 to 100 feet of water. It is a natural amphitheatre with the grandstand on a side hill. One can sit and let one's feet hang over and see every foot of the track.

John Ray of Cleveland, Ohio, has refused $500 for his Robert Bingen yearling colt. Mr. Ray says this colt and a couple of True Kinney colts are stemjiggers, which means they are just right in every way.

◈◈◈

A. R. Miller of Vancouver, B. C., has sold his trotting stallion Bonaday 2:11¼ to parties in Saskatoon, Canada. Mr. Miller reports horse interests in and around Vancouver as being quite lively.

◈◈◈

A representative of a San Francisco firm was in Hollister last week offering alfalfa growers a contract price of $12 for their 1916 hay crop exclusive of the first cutting, which is usually undesirable on account of weeds and foul stuff.

◈◈◈

Rennselaer Weston, the successful secretary of the Goshen track, states that he receives countless letters from racing secretaries all over the country asking for information as to how the Goshen meeting is made such a success. The recipe is given by him in two words: "Printers' Ink."

◈◈◈

Suisun Stock Farm, Rush & Haile proprietors, will hold its annual sale of trotting bred stock on Satur, day, July 1st. Twelve two-year-olds are to be sold this time . They are by the great speed sire Demonio 2:11¼, sire of 8 in 2:10, and by Montbaine 48667, the highly bred young son of Moko.

◈◈◈

Of the $35,000 added money attached to the next Melbourne Cup, $7,000 will go to the second horse and $3,500 to third. Last year second money was $8,000 and third $4,000. Even on the reduced scale, second and third moneys will make satisfactory consolation prizes.

◈◈◈

The Silva stable of campaigners which Lon Daniels will race through the east comprises five pacers and two trotters. The pacers are Bondalean 2:08¼, Potrero Boy 2:06¼, John Malcolm 2:11½, Graustark by Aerolite and Col. Mazuma by Demonio. The trotters are San Felipe 2:09¼ and Kid Cupid 2:08¾.

◈◈◈

There are now about twenty horses in training on the Stockton track, varying in age and speed from Leata J. 2:03 to the yearling Walter Mac. C. J. Jones has eight trotters and pacers in his stable, H. W. Williams four or five, Farmer Bunch three, and A. T. Jackson a half-dozen.

◈◈◈

The Illinois Jockey Club, Chicago, will give thirteen days of racing at the Hawthorne race course, opening Saturday, July 15, and closing Saturday, July 29. Frank A. Froehling is president of the club; E. V. Beifeld, secretary and treasurer, and M. Nathanson racing secretary. Capt. T. J. Clay will be the presiding judge and J. F. Milton starter.

◈◈◈

The class for ladies' saddle horses, ladies to ride at the Commencement Horse Show of the Missouri Agricultural College, this year, was one of the best and closest contests ever seen. The veteran horseman Tom Bass remarked during the show that the judges could have tied the blue ribbon on any one of the six horses without making a mistake, so closely did the entrants figure. The Missouri Stockman said that every mount was a lady's horse and every exhibitor worthy of a prize as a rider. Miss Myrene Houchin on Nickle Plate was awarded the blue ribbon.

◈◈◈

John Rowen of Stockton, who furnishes our readers this week with a very interesting sketch of Royal McKinney, the sire of Leata J. 2:03, is himself the owner of a young stallion that should be well patronized by breeders. This young horse is by The Bondsman, dam Modesto by Mendocino, son of Electioneer, second dam Clarion 2:25¾ by Ansel 2:20, another son of Electioneer; third dam Consolation by Dictator 113, fourth dam Belle by Norman 25, fifth dam Vic by Mambrino Chief 11, and on without a break to the eighth dam. The second, third, fourth and fifth dams of this colt are each the dams of two or more trotters with standard records. This colt is a good individual, and as Mr. Rowen says, "He has breeding a-plenty."

◈◈◈

Owing to the fact that many entries for the harness races at the Fresno District Fair were received too late, the association has decided to extend the date of closing to June 26th. It is believed that every one of the eight races advertised will fill at that time. Secretary Eberhart has returned all the entries to the parties making them with a request to re-enter on or before June 26th. Ten per cent discount will be allowed on every entry that is accompanied by the entry fee. As all the purses are $600 each, the entry fee will be $30, or $27 if the cash is sent.

◈◈◈

Fire destroyed one of the large stables at the Stockton track last Wednesday. Few particulars of the fire have been received but it is learned that two horses were burned, one a stallion owned by A. M. Dillwood of Oakdale, the other a mare owned by trainer Williams. Six animals were in the stable when the fire broke out, one of them the great pacing mare Leata J. 2:03, but she with three others were rescued before the fire reached their stalls. The flames spread to the roof of the grand stand and also burned a part of the field of grain in the center of the track. Several sets of harness and other stable articles were lost by those who have interests at the track. The race track and stables are the propetry of San Joaquin county.

John Splan believes the trotting horse breeding business is about to have a boom and to get in right he has purchased a fast mare, sister to Uncle Biff 2:06¾ by John A. McKerron 2:04¾, and will breed her to Peter Volo (4) 2:02. The dam of the mare is by Star Pointer 1:59¼ and the second dam a sister to Ashland Wilkes. Trust Splan to pick a good one.

◈◈◈

A colt by The Bondsman that is entered in the Pacific Breeders' Futurity for foals of 1914 and was recently sold by Chas. DeRyder to a gentleman of this city, will not be trained this year, but James Sutherland of Pleasanton, who has sent many a stake winner to the races from his stables, offered to take the colt and pay all expenses for half the winnings. So he must be "some" trotter.

◈◈◈

It is getting close to racing time. Don't start your horse with a weak set of hopples and lose the race because of this fact. See that your harness is good and your whole outfit in ship shape. Write to Dave West for anything in the line that you need. His address is 1018 Fillmore street, San Francisco, and he can furnish everything needed to rig a horse for racing or to administer to him if he is lame or sick. And his prices are right.

◈◈◈

The Gentlemen's Driving Club of Cleveland has decided to hold its weekly matinees on Wednesdays instead of on Saturdays, this season, and to make the racing to carts instead of wagons. The reason of the change in the day was simply because so many sporting events are listed for Saturdays that many horse lovers are unable to attend the Randall matinees. The change from wagons to carts was made in the interest of new members, who are almost unable to obtain wagons and also for the sake of safety and faster time.

◈◈◈

A New York Telegraph turf wr'ter says that James Butler's Spur, by his wonderful victory in the Withers at Belmont Park last week, stamped himself as probably the best three-year-old that has been shown this year. He only beat Foxhall P. Keene's Churchill by a narrow margin and August Belmont's Friar Rock, the one to finish third, was very much abused in the running, but Spur had gone lengths farther than any other colt in the field ,and his speed and his courage were severely tested.

◈◈◈

Five hundred cowboys and cowgirls, $500,000 represented in horses, vehicles and equipment, five days of furious fun, daring and danger. These are a few of the things that Salinas is offering in the Original California Rodeo and Salinas Big Week, July 12 to 16, inclusive. Twenty-five thousand people are expected to attend and plans for their accommodation and entertainment are well under way. It will be a regular carnival week and the Southern Pacific Railroad has made excursion rates for the round trip to Salinas and return from all points in the State.

◈◈◈

The Overland Stables, as Chas. Silva of Sacramento has named his string of horses that will campaign east of the Rocky Mountains under the training and driving of Lon. B. Daniels, made several entries in the $400 purses at the Cranwood half mile track where racing started this week. Graustark, by Aerolite in the 2:23 pace, Bondalean in the 2:14 pace, San Felipe and Kid Cupid in the 2:13 trot, and John Malcolm in the 2:16 pace. W. Fleming named Joe Patchen 2d in the free-for-all pace. Results of these races will not be at hand until next week.

◈◈◈

More than 1,600 horses participated in the 14th Annual Work Horse Parade given by the Boston Work Horse Relief Association, of Boston, Mass., May 31st. The "free horse show" brought out a crowd of several thousand animal lovers, who ranged themselves along the avenue and watched the teams go by the reviewing stand where the winning horses received their blue, red or yellow ribbons, the few dogs their rosettes, and the more fortunate drivers their medals. The parade included as fine a collection of working animals as has been seen in competition since it was inaugurated.

◈◈◈

The American Sportsman (Cleveland) of June 8th said: "Billy Fleming arrived at Cranwood Park early in the week with the pacing trio, Joe Patchen II 2:03¼, The Beaver 2:05¾ and The Badger 2:15½, and while they have not been any fast miles this season, he expects to start the first two named at Cranwood next week and race them into form. It will be recalled that Fleming made a sensational campaign in 1912, winning fifteen races and $28,000, with 'The Big Train,' since which time the latter has proven a rank failure for several other trainers and very much of a disappointment to his owner, R. J. MacKenzie. 'Billy,' however, believes that the stallion is yet quite useful, so secured his racing qualities for 1916 and will give him a thorough trial on the half mile tracks, then if he returns to his 1912 form will hit the mile rings in the fall. The Beaver 2:05¾ may take part in the opening meeting at North Randall, but The Badger 2:15½, also by Searchlight 2:03¼, will hardly be ripe for any big ring company so early. Harry Bell brought over from California the four-year-old filly Jessie Patchen, which is the personal property of Fleming, and the latter now has her at Cranwood. She is by Joe Patchen II 2:03¼, out of Jessie M. (dam of Hal J. 2:08½, Della H. 2:10, etc.) by Del Norte 2:08, and is a young mare of considerable promise, having trialed in 2:14."

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

MARKET FISHERMEN TO ORGANIZE.

As a further step in the movement on the part of the State Market Director to organize local fishermen, wholesalers and retailers of fish, for the purpose of regulating the price of fish on the basis of supply and demand, mass meetings have been called for both fishermen and wholesalers.

The fishermen's meeting will be held in Pittsburg, Contra Costa county, Saturday, June 17, while that of the wholesalers will be held at the Market Director's offices Wednesday night, June 14.

Each meeting will be asked to select representatives to serve on a joint committee to fix the price of fish from the fisherman down to the ultimate consumer.

TAGS PLACED ON SALMON.

The California Fish and Game Commission has evolved a way of getting records for the area covered by salmon. Salmon will now traverse the ocean with all the dignity and impressiveness shown by the automobile. Like flivvers and new spring hats, the salmon will, in future, carry a tag. This tag is to be of silver and will be placed on the dorsal fin. It will be inscribed as is the automobile tag, only no tail lights are demanded and the salmon will be exempt from the dimming law. Some 1,000 salmon who have chosen Monterey bay as their resident home when not traveling will have this silvered distinction bestowed upon them. By this unique method the commission expects to determine whether or not the Monterey salmon go as far north as the Columbia and Klamath rivers, and as far south as Santa Barbara. The tag will also enable the commission to tell whether or not the Monterey salmon always returns to Monterey Bay streams to spawn, and just how rapidly it has developed from the date its tag was issued.—Red Spinner, Santa Cruz, Cal.

About Flying Fish.—The popular notion that flying-fish beat their "wings" is a mistake, if one is to rely upon the results of studies of these fish by an authority, Capt. Barrett Hamilton. It appears that the wings are not true organs of flight, but rather play the part of a parachute or an aeroplane. The whole motive power is supplied by the tail, which acts as a propeller, and the vibration or quivering of the wings in the air currents and their occasional shift of inclination are not phenomena connected with the propulsion of the fish in its aerial flights.

SHERIFF HAS MENAGERIE ON HIS HANDS.

Deputy Sheriff John A. Shepston herded along the streets one day last week from the wharf of the Toyo Kisen Kaisha Company to the Panama Stables at 314 Natoma street three elephants, one king cobra snake, twenty-five monkeys, one tiger and one dog.

There haven't been as many vows of future abstinence made along the water front since the bay came up to Montgomery street.

This queer collection of animals and reptile is being held in bond with the Sheriff's office until a suit as to the ownership between the Al G. Barnes Shows Company on the one hand and Stewart Tait and D. M. Callahan on the other is determined in the Superior Courts.

The snake, of course, went boxed, and the tiger was in a cage. But the elephants and the monkeys made mad and merry the job for Deputy Sheriff Shepston. The elephants lacked direction altogether and insisted throughout the journey in going the other way. The monkeys—25 of 'em, count 'em—evinced a great and sudden liking for anything in the nature of a lamp post and street-car pole.

"It's all right if the elephants don't kick the place down," said the manager of the stables, "and the snake doesn't get out and bite somebody on the ankle and the monkeys don't monkey with the horses and the tiger stays put. I guess it's all right."

Dog With Two Legs.—Richmond Hill, L. I., boasts of a self-educated dog which, without so much as a hint from a trainer, has succeeded in learning to walk about on his forelegs, chase cats and follow its ordinary doglike pursuits, without the aid of its hind legs.

Brownie, the wonder of the village, was compelled to become adept at two-legged walking, as a series of accidents deprived him of the use of his hind legs. He disputed the right of way with a Long Island railroad train and lost the use of one leg permanently. The following day he forgot his injury, leaped over a hedge at a cat and dropped into a barbed wire ambush, losing the use of his second hind leg.

Two hours later he had discovered that the injured legs had been superfluous anyway and has managed to get along without them since.

Drink Jackson's Napa Soda.

"COLLARS OF HONOR" FOR DOGS IN WAR.

Several dogs which have been aiding the French army at the front during the war were decorated with special "collars of honor" at a meeting of the Animal Protective Society, held in the Trocadero, Paris, recently. Among them were Fend l'Air, which saved his master, Jacquemin, a zouave, at Roclincourt; Loustic, which rendered very many valuable services, and Pyramus, which saved a battalion by barking, warning the soldiers of the approach of the enemy and carrying back to the generals in the rear a note announcing the advance of enemy forces. The dogs seemed to display human intelligence at the presentation, apparently highly appreciating the honors conferred upon them.

‡ ‡ ‡

The Western Airedale Terrier Club, a leader among specialty clubs in the middle west and embracing among its membership about the most enthusiastic lot of fanciers in the country, will hold its annual specialt yshow on November 18, probably in one of the large downtown hotels, the exact location and the judge, both not yet selected, to be announced in the near future. Phil R. Brand is president and Charles H. Perrin, secretary of this hustling organization, and its membership includes about every Airedale fancier of any prominence in Chicago and its vicinity.

‡ ‡ ‡

The Oxford prefix is to remain as prominent as ever in the fox terrier fancy, as Mrs. Able will follow in the steps of the late Mr. Able, who was known wherever fox terriers were mentioned in the United States and Canada. Mrs. Able, to keep the kennel in the fore, has purchased the wirehaired fox terrier bitch, Ridgeway Chunk Loo, as she considers Chunky Loo one of the best wire bitches in the country, and just the specimen from which to breed the type of youngster that has given the Oxford prefix its fame.

‡ ‡ ‡

Mr. Westley of Hamilton, Mass., has just imported six Newfoundlands. We understand he intends to help this neglected breed along and we hope he will be successful.

Dr. Jordan on Fishing.—Dr. David Starr Jordan, noted ichthyologist and a former fish and game commissioner of the State, widely known as president of Stanford University, recently visited the Japanese village at Port Los Angeles and talked in their own tongue with the fishermen, seeing a number of fish he first identified in the early '80's and greeting them as old friends. Dr. Jordan says:

"The waters of the Pacific Ocean along the Southern California coast are rich in fish good for table use," and states further that the correct spelling of the most overrated fish in our sea is "pampano," not "pompano." He is a strong booster for that coast climatically also, saying "there is nothing comparable in the world but the coast of Dalmatia, which is now overrun by war."

SHORT FISH LINES.

Food for thought is found in the figures of Fish and Game Commission plantings of nearly 750,000,000 fry, distributed in the waters of California during the last forty-five years. The exact figures are 746,537,329. This has been of prime importance in bringing to its present high plane the sport of scientific angling.

* * * *

California is now collecting shad roe to ship to eastern States, although shad were introduced in California waters only about thirty-five years ago. The fish cultural work of California has been copied extensively not only by the Federal Fisheries Bureau ,but abroad also, and is taken as the foremost in the world in magnitude and effectiveness.

* * * *

Both the California and Nevada fish and game commissions are endeavoring to keep the Nevada side of Lake Tahoe closed to fishing for some time, because of the spawning period for lake trout, and at a recent joint meeting between the two commissions at Tallac, the California Commission loaned to Nevada 100,000 eyed rainbow eggs to be used in stocking Nevada streams.

* * * *

At meetings held in Fillmore and Santa Paula last week, the "Game and Fish Protective Association of Saticoy, Santa Paula, Fillmore and Piru" was formed to co-operate with and supplement the propagation and protective work of the Fish and Game Commission with J. N. Proctor of Saticoy, president; Henry Case, Fillmore, vice-president; M. N. Shedenhelm of Santa Paula, secretary. Applications for half a million trout for stocking, and arrangements for fish-ladders in the Seepe, and the screening of all ditches, will be made in harmony with the commission's recommendations. They asked for 200,000 steelhead for the Sespe, 30,000 steelhead for the Agua Blanca and 5,000 rainbow for Hopper Creek. Wherever these do not conflict with the Fish and Game Commission's policy of furnishing no fish to waters privately controlled, the requests will be granted undoubtedly. Those wanting fish should put in an application for them at once. Not many things can be had for the asking.

SAN FRANCISCO FLY-CASTING SCORES.

Scores set by the San Francisco Flycasting Club last Saturday and Sunday were as follows:

Saturday's scores:—

Contestant.	—Delicacy— Accy.	Dlcy.	Net.	H. T. Accy.
H. A. Thomsen, Jr.	17	20	18½	11
W. D. Mansfield	24	15	19½	..

NEW SPORTING CLUB IN PORTLAND.

The Lazy Lodge Hunting and Fishing Club will be organized in Portland along different lines than those usually followed by similar organizations. It is the idea of the promoters to purchase outright a location contiguous alike to all kinds of game hunting and close to lake and stream fishing. By owning their own site, members of the club will be enabled to avail themselves of shooting or fishing privileges at any time during the open seasons and at the same time to have a vacation place in which to spend a week end or month if desired.

The Lazy Lodge Club intends to purchase acreage in the Cascades, not more than 150 miles from Portland . Thus, members will be enabled to run out for a few days hunting or fishing at small expense. The club will be limited to 20 members, and a membership fee will entitle the holder to a pro rata share of the acreage, one-fourth of which will be set aside as permanent club grounds and the balance divided by lot among the members.

Sportsmen, desirous of learning more of the club, may communicate with George Larfield, secretary pro tem, at 927 Chamber of Commerce Building.

* * * *

R. L. Handy, John Handy, H. L. Griffiths, Frank Frossard and William Fritschi are enjoying the sport at Emerald Bay with great success.

Frank Troeh High Gun In Big N. W. Shoot

OVER HUNDRED COMPETE IN BANNER FOUR-DAY TOURNAMENT

Northwest Shoot.—The 32nd annual trapshooting tournament of the Sportsmen's Association of the Northwest is now history and it will go down as "some" affair in more ways than one.

Frank M. Troeh, the sensational Vancouver, Wash., amateur, ended the tourney in a blaze of glory. He won the main event, which was known as the "For You a Rose in Portland Grows" contest, on June 7th at the Everding traps of the Portland Gun Club, by breaking 98 of the 100 blue rocks thrown for him.

The boy from across the Columbia river also is heralded not only as the leading amateur of the gathering, but high gun of the tournament. Out of 400 registered targets, 381 of them died the death of a rag doll by the uncanny accuracy of Mr. Troeh.

The nearest competitor was H. E. Poston, one of the popular San Francisco professionals, who followed, two birds in the rear.

The opening day of the Portland Rose Festival was duly recognized at the Everding Park traps of the Portland Gun Club. The main event was named after the 1916 slogan chiefly because the Portland Rose Festival donated $100 in cash to be divided among the winners.

To celebrate the occasion T. R. Everding, ex-president of the Portland Gun Club, had more than 20 dozen of beautiful roses brought out to the grounds, and every contestant in the 100-target match had one pinned on him for good luck. Practically all the spectators, of whom there were almost 500, wore the favorite Portland bloom.

Sensational scores were recorded in the main event. The ambition of A. W. Strowger, president of the local club, and Henry R. Everding, to have a record-breaking entry list was fulfilled. Just 101 men and women stepped to the traps and, just to impress the fact that those present saw some good shooting, it might be well to state that 26 of them returned with 90 per cent or better. All were amateurs, too, wih four exceptions.

The trophy events, three of them, were what might be termed as "after-dinner shoots." It was not until after 7:30 o'clock at night that final winners in the shoot-offs could be determined.

After Frank M. Troeh, with 98 per cent out of the 100 targets in the main event, came Pete Whitney, a comparatively new shooter in the game, belonging to the Woodburn, Ore., Gun Club but hailing from Hubbard, Ore., and Guy Egbers, of Pasco, Wash., with 96 out of 100. H. E. Poston of San Francisco led the pros with the same acerage recorded by two second amateurs.

The five high amateurs for the three days' gathering in the regular registered birds only were Frank M. Troeh, 381 out of 400; Peter H. O'Brien, of Portland, 377; Abner Blair, of Portland, 375; O. N. Ford, of San Jose, Cal., 375, and Dr. R. N. Fuller, of Tulare, Cal., 371. The five pros for high honors were: H. E. Poston, San Francisco, 379; P. J. Holohan, Portland, 377; Les H. Reid, Seattle, 377; Frank C. Riehl, Tacoma, 367, and Fred A. Dryden, Spokane, Wash., 366.

Scores, June 7, 100 targets—

*J. E. Reid, Portland, 76; C. A. Conklin, Seattle, 89; A. Riehl, Tacoma, 89; C. E. Feller, Woodburn, Ore., 83; R. Kinzer, Seattle, 83; O. N. Ford, San Jose, Cal., 93; Dr. A. N. Fuller, Tulare, Cal., 92; N. A. Howard, San Francisco, 94; E. G. Anderson, Los Angeles, 88; F. Mellus, Los Angeles, 87; *F. A. Dryden, Spokane, 93; Guy Egbers, Pasco, Wash., 96 G. B. Joslin, Pasco, 84; Mrs. F. A. Dryden, Spokane, 66; J. R. Owens, Wenatchee, Wash., 81; Mark Siddall, Salem, Ore., 81; J. Lewis, Salem, 84; H. H. Veath, Cottage Grove, Ore., 90; A. G. Magers, Salem, 85; *C. J. Schilling, Portland, 87; *L. H. Reid, Seattle, 87; A. G. Wilkes, San Francisco, 92; C. E. McKelvey, Seattle, 89; John Considine, Seattle, 84; Tom Wilkes, San Francisco, 90; *H. E. Poston, San Francisco, 96; Charles Leith, Woodburn, Ore., 91; R. P. Knight, Portland, 87; Lou Rayburn, La Grande, Ore., 85; Dr. E. R. Seeley, Medford, Ore., 90; *E. B. Van Arnam, Portland, 71; Ed. Fitzgerald, Burley, Idaho, 85; D. W. Fleet, Montesano, Wash., 84; James K. Simpson, Stevenson, Wash., 67; *P. J. Holohan, Portland, 94; Frank Van Atta, Vancouver, Wash., 95; Frank M. Troeh, Vancouver, Wash., 98; C. E. Owens, Wenatchee, Wash., 91; W. E. "Dick" Carlon, Portland, 88; P. H. O'Brien, Portland, 95; E. H. Keller, Portland, 90; J. W. Seavey, Portland, 93; Abner Blair, Portland, 95; J. Kienast, Bellingham, Wash., 88; Ed Brackney, Bellingham, 83; W. G. Ballack, Albany, Ore., 83; P. P. Nelson, Yacolt, Wash., 85; Mrs. A. G. Wilkes, San Francisco, 58; J. A. Dague, Tacoma, 88; G. Ulrich, Lewiston, Idaho, 81; G. E. Beckman, Lewiston, Idaho, 88; *F. C. Riehl, Tacoma, 95; A. W. Strowger, Portland, 84; *E. B. Morris, Portland, 87; F. Dodele, Albany, Ore., 83; W. W. McCornack, Eugene, Ore., 73; C. W. Hadley, Pomeroy, Wash., 87; Al Seguin, Portland, 83; J. C. Morris, Portland, 84; A. Parrott, Portland, 86; F. O. Joy, Portland, 71; C. C. Miss Gladys Reid	16	47

On the second day the handsome Smaills cup was won by J. Roy Owens, of Wenatchee, Wash., who recorded a perfect score. He broke the 25 targets thrown to him. Frank C. Riehl, of Tacoma, Wash., did not lose one either, but he is a professional and must shoot for targets only.

Abner Blair, of the Portland Gun Club, and Frank M. Troeh of Vancouver, Wash., both amateurs, led the entire field in the day's high score for the regular 150-rock match. Each dropped only six in 150 tries. O. N. Ford of San Jose, Cal., was next in line with 143, tying both P. J. Holohan, of Portland, and Les H. Reid, of Seattle, both pros.

The scores of the regular 150-bird event, June 6:—*J. E. Reid 127, G. A. Conklin 140, Charles Feller 122, A. Riehl 135, R. Kinzer 128, O. N. Ford 143, Dr. R. N. Fuller 139, N. A. Howard 134, F. Mellus 124, *F. A. Dryden 135, G. Egbers 123, G. B. Joslin 129, Mrs. F. A. Dryden 99, J. R. Owens 123, M. Siddall 127, J. Lewis 125, W. E. Carlon 118, A. G. Magers 121, *C. J. Schilling 130, *L. H. Reid 143, A. G. Wilkes 139, C. E. McKelvey 133, John Considine 116, Tom Wilkes 126, *H. E. Poston 141, Charles Leith 136, R. P. Knight 115, Lou Rayburn 136, Dr. E. R. Seeley 137, *E. B. Van Arnam 120, E. Fitzgerald 131, R. H. Miller 130, D. W. Fleet 134, J. K. Simpson 102, *P. J. Holohan 143, Frank Van Atta 141, Frank M. Troeh 144, C. E. Owens 139, E. L. Mathews 132, P. H. O'Brien 140, E. H. Keller 132, J. W. Seavey 137, Abner Blair 144, Frank Templeton 140, J. Kienast 125, Ed Brackney 120, W. G. Ballack 121, P. P. Nelson 120, Mrs. A. G. Wilkes 121, J. A. Dague 135, G. Ulrich 119, G. E. Beckman 133, *F. C. Riehl 134, A. W. Strowger 128, *E. B. Morris 135, F. Dodele 120, W. W. McCornack 118, C. W. Hadley 129, Al Seguin 120, J. C. Morris 122, A. Parrott 125, F. O. Joy 105, C. C. Kelley 126, Mrs. Ada Schilling 131, G. K. Marck 139, Hugh McElroy 138, Mrs. C. A. O'Connor 121, Hugh Fleming 128, C. O'Connor 134, J. S. Crane 95, B. Pearson 121, A. Zierlof 117, E. Langendorfer 117, A. Langendorfer 106, J. M. Ferguson 110, H. A. Pollock 89, C. A. Meyer 136, Earl R. Goodwin 115, H. L. Streeter 111, R. S. Thompson 50x90, *J. S. French 79x90, A. L. Zichrisson 39x60, J. Huff 44x80, A. Woelm 33x45.

Long runs—H. E. Poston 101; F. C. Riehl 53, 84; L. H. Reid 60, 59, 57; P. J. Holohan 55; Frank M. Troeh 58, 62 unfinished; F. A. Dryden 63; Abner Blair 58; Frank Van Atta 55; C. E. Owens 53; C. E. McKelvey 54.

On opening day Peter H. O'Brien was high amateur for the regular 150-bird contest, with a record of 142 broken blue rocks out of 150 attempts. Second place resulted in a three-cornered tie between Guy Egbers, of Pasco, Wash., E. H. Keller of Portland and Dr. R. N. Fuller of Tulare, Cal. Each finished with only 10 misses in the 150 shots.

P. P. Nelson of Yacolt, Wash., broke 17 out of 20 in the 10 pair of doubles race for the Walla Walla Brownlee cup. He was given a close contest with five Nimrods trodding on his heels with one less. F. M. Troeh, Dr. R. N. Fuller, James W. Seavey, Frank Templeton and R. P. Knight each scored 16.

The only shoot-off of the day is attributed to the two-man tie for the Dayton medal between J. A. Dague of Tacoma and A. G. Wilkes of San Francisco, each breaking 20 out of 20 in the regular match. Dague was handicapped at 20 yards and Wilkes, who proved to be the final winner, was standing two yards nearer the trap-house.

Scores, 150 targets, June 5:—

J. E. Reid 132, G. A. Conklin 136, Charles Feller 123, A. Riehl 116, R. Kinzer 118, O. N. Ford 139, Dr. R. N. Fuller 140, N. A. Howard 134, G. H. Anderson 121, F. Mellus 123, *F. A. Dryden 138, G. Egbers 140, Miss G. Reid 110, Mrs. F. A. Dryden 61, J. R. Owens 122, M. Siddall 127, J. Lewis 132, H. H. Veatch 118, A. G. Mager 125, C. J. Schilling 135, *L. H. Reid 147, A. G. Wilkes 137, C. E. McKelvey 138, Tom Wilkes 127, John Considine 118, *H. E. Poston 142, Charles Leith 135, R. R. Knight 118, Lou Rayburn 134, Dr. E. R. Seeley 131, *E. B. Van Arnam 103, E. L. Mathews 128, F. O. Joy 43, H. W. Fleet 122, J. S. Crane 100, *P. J. Holohan 140, Frank Van Atta 131, F. M. Troeh 139, C. E. Owens 137, J. P. Bull 132, P. H. O'Brien 142, E. H. Keller 140, J. W. Seavey 136, A. Strowger 114, *E. B. Morris 135, F. Dodele 135, W. W. McCornack 132, H. L. Streeter 104, Al Seguin 129, J. C. Morris 118, A. Parrott 119, *J. S. French 98, E. Fitzgerald 130, Mrs. J. C. Shilling 119, George March 132, H. McElroy 132, Mrs. C. A. O'Connor 115, C. A. Fleming 126, C. A. O'Connor 123, E. C. Meyer 117, Mrs. A. G. Wilkes 111, A. Zierlof 94, E. Langendorf 114, A. Langendorf 108, G. B. Joslin 128, B. Pearson 100, C. W. Hadley 130, C. C. Kelly 119, W. B. Fechheimer 115.

Fifty-five scatter-gun artists, including three women, from all parts of the Pacific Coast participated in the 100-bird practice event of the thirty-second annual trapshooting tournament of the Sportsmen's Association of the Northwest on June 4.

COMING REGISTERED TOURNAMENTS.

California.

Los Angeles, July 3, 4—Vernon Gun Club.

Eureka, July 4—Eureka Blue Rock Club, H. A. Hine, President.

Oregon.

Portland, July 10—Portland Club, Frank Templeton, Secretary.

Portland, Sept. 12, 13, 14—Pacific Coast Handicap.

Washington.

Seattle, July 4—"Old Policy," Green Lake Gun Club, W. C. Smith, Secretary

Tacoma, July 18, 19, 20, 21—Pacific Indians, F. C. Riehl, Secretary.

Frank Troeh of Vancouver, Wash., was the winner of the high average honors among the amateurs, with a score of 97 out of a possible 100. Lou Rayburn, winner of the Oregon State Championship last year, was second with 95 per cent, and Dick Carlon won third honors with 94 per cent, nosing out Frank Templeton for the position by one bird. The score, at 100 targets:

Amateurs—Frank M. Troeh, Vancouver, Wash., 97; Lou Rayburn, La Grande, Ore., 95; W. E. (Dick) Carlon, Portland, 94; Frank Templeton, Portland, 93; C. E. McKelvey, Seattle, Wash., 92; E. H. Keller, Portland, 91; Al Riehl, Tacoma, Wash., 91; W. W. McCornack, Eugene, Ore., 91; P. H. O'Brien, Portland, 90; R. P. Knight, Portland, 89; R. N. Fuller, San Francisco, 88; J. W. Seavey, Portland, 88; Al Seguin, Portland, 88; Charles Leith, Woodburn, Ore., 88; H. A. Pollock, Portland, 87; A. G. Magers, Salem, Ore., 87; E. R. Seely, Medford, Ore., 86 G. E. Beckman, Lewiston, Ida., 86; C. E. Owens, Wenatchee, .Wash., 85; James Lewis, Salem, Ore., 85; Frank Van Atta, Vancouver, Wash., 85; G. A. Conklin, Seattle, Wash., 84; R. W. Kinzer, Seattle, Wash., 84; Dr. O. D. Thornton, Portland 84; Abner Blair, Portland, 83; Mark Siddall, Salem, Ore., 83; Ed. Fitzgerald, Burley, Ida., 82; Frank Dodele, Albany, Ore., 81; Mrs. Ada Schilling, Portland 79; Miss Gladys Reid, Portland, 78; Gus Ulrich, Lewiston, Ida., 77; A. W. Strowger, Portland, 77; J. S. Crane, Portland, 78; E. G. Broadhead, Portland, 74; E .Langendofer, Vancouver, Wash., 73; A. Langendofer, Vancouver, Wash., 73; E. C. Meyer, Portland, 72; R. S. Thompson, Vancouver, Wash., 70; A. L. Zachrison, Portland, 69; F. A. Jeter, Portland, 69; F. O. Joy, Portland, 69; W. C. Bristol (20-gauge gun), Portland, 64; H. L. Streeter, Boise, Ida., 64; C. E. Kelly, Portland, 60.

Professionals—L. H. Reid, Seattle, Wash., 98; P. J. Holohan, Portland, 97; F. A. Dryden, Spokane, Wash., 96 F. O. Riehl, Tacoma, Wash., 93; H. E. Poston, San Francisco, 91; C. J. Schilling, Portland, 91; E. B. Morris, Portland, 91; J. P. Bull, Portland, 86; J. E. Reid, Portland, 83; E. B. Van Arnam, Portland, 74.

Seattle Association.—Hugh Fleming shot the high score for the day both in the 50-target and 100-target programs with forty-six and ninety-one, at Harbor Island on June 4th.

The "gun bugs" should certainly be well seasoned with damp and chilly weather, and be in good condition for the fall shooting if the weather that has been favoring them still continues.

Harry P. Warner was on the grounds for the first time for many months, and although he showed the effects of little practice at first he soon rounded into form and was shooting in good scores.

Preparatory to "Beginners' and Ladies' Day," which is scheduled for June 18th on the Harbor Island grounds, there were several new shooters out, taking their first crack at shooting the clay saucers. V. L. Parker, Allen Latimer and Chester Latimer were three of the entries for the beginners' program, who were on the traps for the first time.

Tom Wilkes, of the Wilkes Stock Company, celebrated his return to the city from a trip through California by coming out and adding a bid number to the pile of broken blue rocks that are found on the grounds.

In the class race for the McKelvey silver trophies Hugh Fleming stood high in class A, this giving him two wins. J. H. Wilman was high score in class C, he also having two wins. Van Woodaman stood high man in the D class.

June 18th will see one of the big days of the trapshooting world, when the ladies and novice shooters will be given an opportunity to break into the game and a chance to shoot for some very fine prizes. Two of the big trophies are a sterling silver watch fob for the highest beginner's score, and a sterling silver trophy spoon for the highest ladies' score. These prizes have been presented by the Du Pont Company.

Scores for June 4th, 50 targets: Hugh Fleming 46, R. S. Searle 44, W. B. Taft 43, G. A. Canuck 41, J. H. Wilman 38, Fred Landwehr 33, H. P. Warner 28, A. E. Hall 20. At 100 targets—Hugh Fleming 91, W. B. Taft 85, G. A. Canuck 83, H. P. Warner 66, Fred Landwehr 63.

V. L. Parker, J. R. ("Dok") Hager, Van M. Woodaman, Tom Wilkes, Allen Latimer and Chester Latimer did not shoot in the regular program.

Green Lake Club.—Good shooting featured the regular weekly meeting of the Green Lake Gun Club on June 4th, with L. S. Barnes and W. C. Smith tying for first place, each getting 49 out of 50. Dr. King landed in second place by breaking 48 out of 50.

Ike Fisher, professional, turned up at the north end grounds, after an extended trip in Alaska, and succeeded in breaking 45 out of his 50. He reports several well organized gun clubs in the North.

The Green Lake Club is making elaborate preparations for its first annual registered tournament, July 4th, and already many prizes have been promised for the various events. Following the usual policy of the club, this program will be made attractive to the shooter of medium ability, and with a low entrance fee the club hopes to make this shoot one of the big annual trapshooting features of the Northwest.

While the officers are busy working up the details of the July 4th tournament, the rest of the members are taking great interest in the beginners' day event planned for the last Sunday in June. The scores:—

L. S. Barnes 49, W. C. Smith 49, Dr. King 48, *D. Rhodes 47, *I. M. Fisher 45, E. K. Van Vleck 44, Don R. Baker 44, Dr. A. B. Kidd 43, J. W. Geltz 43, George H. Young 43, S. A. Martin 42, George B. Baker 41, Hi Follrich 40, J. McBride 40, N. W. Hubinger 39, E. W. Soergel 39, R. W. Brehm 37, M. A. Rosenfield 37, H. E. Gleason 32, George O. Colwell 35, Dr. S. W. Case 32, S. Burt 29, D. D. McMaster 27, J. F. Rohowitz 23, F. N. Haley 18, G. E. Gibson 14, E. Bauer 10.

MRS. ETTIE HAUGHAWAUT
Fair shot, formerly of Fort Dodge, Iowa, who is shooting well at the Golden Gate Club traps.

Big Time Club.—Harry Tharp was high man in the Gerber causeway cup shoot held by the Big Time Gun Club at the Schenk ranch Sunday. There were 18 entries in the 50-bird event. Tharp broke 48 out of the 50. F. Newbert and Fleckenstein tied for second place with 44 and A. E. Pearson third with 43.

In the regular club shoot of 25 birds Tharp also took first honors with 24. Frank Newbert was next with 23, F. Egersdoff, Dr. Goods and W. Higgins were third with 21. There were 26 entries in this event.

In the ladies' shoot, ten bird event, Mrs. D. Newbert and Mrs. Boulware were high with six. Mrs. Baker was second with five and Mrs. Brust was third with two.

In addition to these events there were ten-bird practice events all during the day. A large crowd was on hand and the sport was thoroughly enjoyed.

Alameda Elks' Club.—A strong wind was blowing Sunday and held down the scores of the Alameda Elks' monthly shoot. Even under the conditions C. A. Merrill set the high score of 46 out of 50. Henry Stelling was second with 44. Bill Ellis continued his high class blue-rock busting by leading the professionals with 44. Next month the club will stage a banner shoot for ladies. On Sunday the Golden Gate Club will be out at the traps. The scores were as follows:—

W. L. Koch 36, E. B. Thorning 39, M. S. Goodman 32, L. Schroeder 27, W. T. Sparr 24, W. E. Cooley 40, H. Stelling 44, *R. C. Reed 43, *W. R. Ellis 44, C. A. Merrill 46, W. J. Terry 41, A. Durney 30, R. B. Valleau 29, C. Carmen 33, J. Bush 33, F. J. Croll 43, H. Meinecke 42, C. Lindemann 41, Ned Williams 37, G. Hickman 31, R. T. Boyd 29, G. Brooks 29, F. E. Hillyer 34, H. Martine 40, H. C. Peet 42, *O. N. Jones 42, *C. A. Haight 42, P. Swenson 35, W. H. Price 38, H. Truscott 34, *A. W. DuBray 37, T. H. Haskins 33, J. H. Brooks 36, Dr. Pruett 26, Batsford 22, M. N. Winans 21, J. B. Hauer 37, H. Craig 33. (*Professionals.)

Watsonville Club.—A large number of merchandise prizes have already been offered for the big blue-rock shoot to be held at Watsonville in connection with the Fourth of July celebration. The committee in charge is working hard for the success of the big shoot and many more prizes have been promised, but not yet signed up.

Southern Rod Club—At the June meeting of the Southern California Rod and Reel Club, the course of the Fish and Game Commission in transplanting striped bass from San Francisco to the Southern California bays was warmly commended by President A. E. Roome, and the co-operation of the club promised. As a nearnest of its good faith, President Roome, in behalf of the club, has written Fish and Game Commissioner Connell, stating that all members are taking out the angler's license as required, and requesting a strict and vigorous enforcement of the law by prosecuting all surf-fishermen who are not. The commissioner, before leaving for the convention in Chicago, issued instructions to the field patrol deputies to do this, and henceforth it is apt to go hard with those who angle off the beach for corbina, yellowfins or croakers, or even rock bass.

TRAPSHOOTING STILL GROWING.

The Du Pont Company of Wilmington, Delaware, has just issued a revised Gun Club map of the United States. It shows the location of all towns containing gun or trapshooting clubs and gives the total number of clubs up to January 1, 1916, as 3,961. These clubs have various memberships, but a conservative estimate would allow fifty shooters to a club or a total of 198,050 trapshooters regularly engaged in the sport.

Of course, the above figures do not include trapshooters not members of organized clubs, such as private clubs, farmers' clubs or hand trap "fiends."

The latter class are increasing daily. They rely on a hand trap, the latest and most practical portable device for throwing targets. It weighs but 6¼ pounds, costs only $4, and obviates the necessity of erecting permanent traps.

Including all classes it is estimated that there are over 400,000 trapshooters in this country. The sport is growing rapidly, the ten leading states showing the following number of clubs: Pennsylvania, 492; New York, 344; Illinois, 287; Iowa, 220; Ohio, 187; Minnesota, 175; New Jersey, 168; Wisconsin, 164; Missouri, 142; Michigan, 133.

Vernon Club.—The second annual Du Pont beginners' shoot at the Vernon Gun Club proved a big success. Sixty-eight shooters took part in the day's program. In the men's beginners' event L. H. Palmer was the victor, breaking 23x25 targets. H. C. Palmer was second with 21x25 and Stafford and Yueling tied for third with 21x25. Mrs. Fish won the ladies' event bf breaking 16x25. Mrs. Shanlow came a good second with 9x25. Handsome prizes were awarded to both winners.

The feature of the day was the shooting of O. Evans who broke 50x50 clay targets from the 18-yard mark. He was shooting for the George T. Cline trophy and captured his first leg on the prize. S. A. Bruner and William Pugh were raunners-up with 48x50.

The complete results are as follows:—

	Hdcp.	Cline trophy. 50	Hoegee trophy. 50

20-gauge event—C. W. Fish 23x25, C. E. Groat 22x25, Wilshire 23x25.

Practice event—Manderville 24x25, C. W. Fish 23x25, Mrs. C. E. Groat 19x25, O. Evans 45x50, Holohan 47x50, Vorens 39x50, Ed Bohring 21x25, White 48x50, Pfirrmann 49x50, Mellus 72x75, Mrs. Pfirrmann 39x50.

Beginners' event at 25 targets, for watch fob—Keeney 20, Spaford 20, Shandow 12, B. C. Palmer 21, R. O. Pool 17, Suell 14, Yudling 20, Youcan 20, Blandon 19, Maclean 11, L. H. Palmer 23, Stanburger 22, Hoff 17, Memhuber 18, R. L. Howard 16, Jackson 18.

Ladies' event for spoon—Mrs. Shandow 9, Mrs. Fish 16, Mrs. Manderville 7.

Vallejo Club.—The Vallejo Gun Club staged its opening shoot of the season on Sunday with pleasing results. Andy Flickinger, the veteran shot, who is going to the Grand American Handicap in St. Louis in August, was high gun with 49 out of 50. Barstone showed to good advantage with his 20-gauge gun in breaking 33. The scores were:

Flickinger 49, Yocom 44, O'Hara 44, Wiscraevere 33, Grag 34, Standish 29, Dr. Taneler 34, Wilkels 30, Moore 33, Blum 30, King 35, Humphreys 29, Lucke 33, Herbut 19, Flynn 14, Barstone (20-gauge) 33.

Sportsmen's Row

The Spokane Gun Club will stage an amateur shoot over the Moran traps June 25, according to an announcement made by President Charles A. O'Connor. It will be exclusively for beginners and open to women and men. The DuPont Company has offered a handsome fob to the winner in the men's division and a spoon to the winner in the women's division. Only those who have not shot at more than 500 targets up to the first of May will be eligible to compete.

* * * *

The Vancouver Gun Club, Limited, of Vancouver, B. C., will conduct a registered shoot on June 20 and July 1.

* * * *

Trapshooting clubs interested in beginners' day shoots may hold them any time during the month of June. No one who has shot at more than 500 targets up to May 1 is eligible for the beginners' day event.

* * * *

E. J. Robertson has been chosen president of the Louisville (Ky.) Gun Club. The club at its annual meeting decided to reduce the dues from $6 to $3 a year and to admit women to membership without cost to them.

* * * *

A new way of catching mackinaw trout in Deer Lake, near Spokane, was discovered last week. More for practice in casting than for any other reason and because the fish were not biting in the deep water, J. R. Hanford took a No. 5 tango from his outfit box and started some distance tossing. The tango No. 5 is a bass lure and is bright yellow with a bright red head. On his fourth or fifth cast Mr. Hanford hooked a five-pound mackinaw and was so surprised that he nearly fell out of the boat. He kept at it and soon had the limit.

* * * *

A catch that rarely has been duplicated in Hayden Lake was made recently by A. W. Hartsough. Mr. Hartsough used a mirror spoon and landed 18 brook trout. Incidentally, he won the Spokane Hardware Company prize for the display of trout during the week.

* * * *

F. W. Millett, a 75-year-old fisherman, hooked a 13½-pound mackinaw in Deer Lake. After playing the fish about 25 minutes and making little headway toward landing him, Mr. Miller called for assistance from J. E. Griffith, who wielded the gaff when the trout was brought near the boat.

* * * *

Because of the danger of accidental or wild shots missing the mark and finding a human target back of the Bullhead, the State rifle range in North Sacramento has been condemned by Adjt.-Gen. Charles W. Thomas, and will be abandoned. Capt. H. H. Sydenham, range officer, has been notified notto allow any more shooting at the range, which was built in 1911 at a cost of $4,700. The land is under lease, but an effort will be made to terminate the contracts.

* * * *

J. E. Griffith of Spokane, Wash., returned the other day from Deer Lake with six bass which totaled twenty-five pounds. Mrs. Griffith, who accompanied him, caught a mackinaw trout at the lake which weighed eleven pounds.

* * * *

W. H. Cameron and Frank Pomin caught thirty-seven trout in a little over an hour's time at Pomin's last Tuesday. Wednesday Bradley and Cameron caught ten at Emerald Bay. The largest one, a big silver trout, weighed twelve pounds.

* * * *

Perch are biting freely in the vicinity of Elkhorn at present, according to Mr. and Mrs. Frank Murray who, during the past week, caught the limit of crappie in an hour. They did their fishing just west of the station, a distance of perhaps two blocks. At various sections on the lower river fishing also is excellent, both striped and black bass, as well as perch being taken. Only a few days ago Louis Smith, John Guisto and party took twenty-six striped bass at Prospect slough, using spoons as lures. Black bass now are rising freely in that vicinity, the floating lures being particularly satisfactory to the anglers. Of these the "Tango" seems to have been bringing the best results.—Sacramento Union.

* * * *

Trout fishing in Lake Tahoe is reported better than it has been in fifteen years. Keeping the market fishermen out until June 1st is said to be the reason as in previous years the season opened May 1st and the weather was so cold that few anglers went up there.

* * * *

Hunting licenses will be due on July 1st. Although the season does not come in until a month or so later the Fish and Game Commissioners are making preparations to issue licenses.

* * * *

The first catch of striped bass in a couple of weeks was taken last Saturday at Wingo by Charley Urfer. He hooked a twenty and a twelve-pounder.

DEER COMING BACK IN NUMBERS.

That the long period of short seasons and low limits, backed by a steady increase in the fish and game patrol-force, is bringing back the deer, is the belief of a party of Los Angeles sportsmen who recently returned from a protracted trip through the northern San Gabriel watershed. They quote such veteran deer-slayers as Charlie Vincent and Fred DeLancey of Old Point Comfort, who are certain that there are a hundred deer in the North Baldy country where there were ten a few seasons back.

Years ago, the Fish and Game Commission advocated drastic reduction in both time and numbers in which game could be taken, feeling that only some such emergency measure could stay its extermination with the growth of sporting interests which had set in with the rapid increase of population. Deer early impressed upon conservationists, the rapid decrease that is certain to follow anything beyond a very moderate exercise of the so-called "taking-privilege." That this self-denial, which was acceptable to all true sportsmen who saw the need of it, is now working out in an increase of the game, is the very best news possible to the men who love gun or rifle, and the reports now coming in through Fish and Game Commission deputies and sportsmen who cover a wide range of territory, indicate a noticeable improvement.

Everyone admits the remarkable increase in quail, which is even more noticeable this year than it was last. The Owens' Valley is swarming with valley quail. Deputy W. K. Robinson of Orange county reports every evidence that the quail, all but cleaned out there a few years ago, are becoming very plentiful with this season's increase to add to the numbers now in sight in the Silverado, Trabuco, San Juan, and of course, all over the Santa Margarita and in many parts of the big Irvine rancho. Robinson also reports a heavy breeding of doves in the canyons, and says no quail are shirking their family duties this year; all seem mated.

Many fawns are reported in the uplands, and the usual number of does is being seen by fishermen in the head-water streams; but these things do not excite the hunters nearly so much as the judgment of fellows like DeLancey and Vincent who have been watching 'em for years. Vincent says there is a drove of twenty mountain sheep on North Baldy, and they appear to be making a slow increase; but occasionally one falls victim to some "crook" who can't trust himself at large with his conscience, and must needs qualify as one who "has killed 'big-horn.'"

Vincent and de Lancey maintain a theory that these modern small-bore rifles have had something to do with the increase in the deer; and the way they "dope" it would make anyone who knows Fred enjoy a good laugh, while the effect would be much different upon any small-bore rifle "crank." The proclivities of de Lancey for that old 45-70 Remington, Hepburn model singleshot pumpkin-slinger are known to all his friends; one shot and the job is done. Fred used three cartridges last season and got his two bucks. He is one of the few "trackers" that is left; one of the old-school hunters who never drew trigger until certain that half a day's "stalking" would bring no surer shot. With the modern "blaze away and pray" system of chance-taking and crippling, such as de Lancey have no patience. "These new-fangled toy guns hit 'em and you never know it; no blood, they lay up in the brush where you can't follow and most of them get well, because the bullet makes a clean wound," is Fred's philosophy. Wonder what some of these .280 Ross "fans" with their copper-tube "exploding" bullets would say to that!

Veteran hunters in the San Joaquin Valley have been opposed to a summer open period on deer because it makes the game too easy to get. When the new horns are "in the velvet," they are so tender that the bucks stay out in the open much more than a little later after the horns are hardened. This coupled with the better venison, has converted experienced men to the later season, dated so as to stop short of "running time" when no one wants to kill deer.

Many eastern states have passed short season and shorter bag-limit laws than California without increasing game, and sportsmen have had their self-denial for no apparent benefit. Sometimes laws have been framed by the enemies of sportsmen, designed to prevent shooting by making seasons that do not correspond with the times birds are naturally present to be shot. Double dealing of this sort has made enemies elsewhere, but California has been free, thanks to administration of fish and game affairs by sportsmen with the interests of sportsmen at heart.

Increased game has been the best possible answer to those who at first were opposed to all restrictive game legislation, and against enforcement.

—o—

Railroad Men's Club.—The opening shoot of fifty targets of a series of twelve contests, was held on Sunday at the Los Angeles Gun Club traps by the Railroad Men's Gun Club. High score was hung up by J. E. Clark with 42 kills out of a half century. H. E. Morris and C. J. Hurst tied for second best score, each with 40 dead out of 50. The results follow:—

J. E. Clark 42, B. L. Clark 36, W. E. Palmer 29, W. J. Merithem 35, H. E. Morris 40, W. E. Lish 36, S. W. Aldridge 35, P. L. Carter 39, C. J. Hurst 40, E. L. Biler 38, T. G. Scannon 36, G. L. Kelly 35.

BULLETINS ON FISHING CONDITIONS.

Bulletins on fishing conditions as furnished by agents of the railroads are as follows:

SOUTHERN PACIFIC.

Truckee—River continues high account melting snow. Water cloudy. Bait fishing good. Mr. Turnbull of Kirk Geary Co., Sacramento, recently took limit on Martis Creek, a Truckee River feeder between Truckee and Boca. Also caught 7 lbs. June 11 on Truckee River. Angleworms used. Russ Mace of Madera, first man to engage tent in Camp Truckee, is on the river daily. Never fails to bring home basket full. Fish jumping and conditions favorable for fly fishing.

Lake Independence—"A man does not have to know anything about fishing to get the limit at present."

Lake Tahoe—Fishing good at all resorts around lake. Thousands of fish shipped out last week. Fishing conditions remain about same throughout the season. Bait: Worms and hellgramites.

Boca—Truckee River falling. Fly fishing fair and improving. Good bait fishing with worms or hellgramites. June bugs out soon, then limit catches easy.

Floriston—Bait fishing fair. Catches not large but fish in fine condition. River should fall in few days and fly fishing be good.

Stirling City—Good catches. River trifle high.

Truckee (Tent City)—"Mr. W. B. Galett of Winter Sports fame is now located in Truckee and has opened up Camp Truckee (tent city)."

Santa Cruz Mountains.

Boulder Creek—Fishing not quite up to standard account several hot days. Small size.

Brookdale—Conditions good. Weather excellent. Good reports from Newell Creek. Limit easily caught. Size, 6 and 7 inches. Cottages nearly all taken. Good year in prospect.

Santa Cruz—Trout and salmon fishing better than ever. Trout now taking fly. Sport good.

Shasta Region.

Castella—Fishing in river good. Only small trout being caught in Castle Creek. Few fishing.

Dunsmuir—Several good catches reported. Weather ideal. March brown hare and whrling blue dun flies now favorites.

Shasta Springs—Excellent weather. Every one well rewarded with nice catches. Using fly.

Sisson—Weather and fishing good.

Klamath Falls, Ore.—Fishing good all streams. Many limit catches. Weather ideal.

WESTERN PACIFIC.

Big Bar—Fishing very poor. Bait and fly fail to attract. River low and clear. Weather very hot and calm.

Keddie—Very few fishermen visited this section past week. Streams a trifle muddy yet. Some good catches made in Big Meadows.

Blairsden—Fishing in river and creeks good. Lakes are open but still some snow on road. No trouble to get limit. Using dark colored flies and spoons. The weather clear and warm.

Belden—Indian Creek, Chip Creek, Yellow Creek, North Fork, East Branch, Feather River and Three Lakes. Bait used this week helgamites. Grasshoppers and black flies. Fishing much better.

—o—

Los Angeles Club.—The diamond scarfpin which was contested for at the Los Angeles Gun Club Sunday in a 50-target trapshoot at distance handicaps, was tied for between three cracks—Meek, Rowe and Sargent—each with a score of 45x50. Meek fired from 17 yards, Rowe from 16 and Sargent from 17 yards. They shot off the triple tie from their respective handicaps and Sargent won out, smashing 24 of the tarhawks out of 25. Meek broke 23x25, and Rowe 22x25. Scores in both events follow:

Event 2, Diamond trophy handicap at 50 targets:—

C. F. Nichols (21) 32, E. K. Mohler (19) 43, F. H. Nichols (18) 43, George Melford (16) 39, G. G. Adams (18) 41, J. W. Meek (17) 45, A. L. Rowe (16) 45, H. E. Sargent (17) 45, C. L. Saunders (16) 40, H. C. Garup (17) 44, F. H. Teeple (18) 41, P. L. Carter (16) 40, W. J. Merithew (16) 35, W. E. Palmer (16) 29, S. W. Aldridge (16) 36, H. E. Morris 40.

—o—

Trade Notes.—The shooters of California and Nevada by shooting Remington UMC shells and guns were rewarded with splendid scores and high averages at the California-Nevada State shoot at San Jose, May 29-30-31.

A. P. Haliburton of Lindsay, Cal., shooting a Remington UMC pump gun and Nitro Club shells, and Mr. W. S. Peace of Elko, Nevada, shooting Nitro Club shells, tied for the high amateur score, making the splendid average of over 94% on 60 0targets.

When it comes to a long hard race the "Speed Shells" always finish on top, for out of the first six high averages five shooters used the famous Remington UMC Nitro Club.

Mr. C. H. Nash of San Jose was runner-up in the State Championship race with 96x100, but was closely followed by Messrs. Haliburton, Flickinger and Ford with 95 and Mr. Peace with 94, and all of these shooters pinned their faith to Remington UMC "Speed Shells."

Five out of the nine trophies competed for at this tournament were won by shooters using Remington UMC goods and the other four were divided between four other makes of shells.

THE FARM

"Better send a thousand miles for a new male than to inbreed," is the advice tendered to many turkey raisers by the poultry husbandry of the Clemson College. Turkey raising can be made a profitable source of income, in fact, the demand in this country continues to increase apparently faster than the supply. Farmers who go into the business, however, are cautioned to give the marketing problem considerable attention in advance.

In the turkey publication of the Department of Agriculture, which is Farmers' Bulletin No. 200, the following rules for selecting turkeys for breeding are given:

First—Always use as breeders turkey hens over one year old. Be sure they are strong, healthy and vigorous, and of good medium size. In no instance select the smaller ones. Do not strive to have them unnaturally large.

Second—the male may be a yearling or older. Do not imagine that large, overgrown males are the best. Main points are strength, health and vigor, with well-proportioned medium size.

Third—Avoid close breeding. New blood is of vital importance to turkeys. Secure one in the fall so as to be assured of his health and vigor prior to the breeding season.

Warranted to give satisfaction.

GOMBAULT'S
CAUSTIC BALSAM

A safe, speedy and positive cure for

Curb, Splint, Sweeny, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable.

Every bottle of Caustic Balsam sold is Warranted to give satisfaction. Price $1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

FAMOUS TROUT STREAMS

Steelhead fishing in the Big Lagoon, Humboldt County, is now in full swing. The fish this year average from nine to twelve pounds.

Do not overlook the Eel River Fly Fishing for the Big Steelhead from July until October in the famous Greigs, Fortuna, Van Duzen and Weymouth pools—fresh run fish that weigh from nine to twenty-five pounds—light tackle—excellent resorts close by—only ten hours from San Francisco.

The fishing streams that are found so profusely in the new territory north of Willits embracing Humboldt, Trinity and Mendocino Counties offer the best of coast stream trout fishing. If you want to fish, go where the fish are.

LOW EXCURSION RATES

For Greatest Satisfaction Use
DOUBLE SERVICE
Automobile Tires
Guaranteed 7,000 Miles Service
Absolutely Punctureproof

Double Service Tires are made double the thickness of the best standard make tires.

This 100% greater wearing surface naturally gives that much more mileage and service. The average of 12 miles of tough fabric and one inch surface tread rubber makes these tires *absolutely punctureproof*.

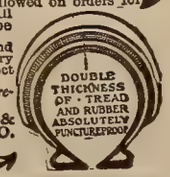
These tires excel all others for use in the country over rough and rugged roads as well as on hard pavements. They are as easy riding and resilient as any other pneumatic tire—same air space and pressure being the same.

They are the *most economical* and "care free" tires made and are used where tires must be depended on and tire troubles cannot be tolerated. Many *Double Service* style tires are in use in the U. S. government and European War service.

Our output is limited to a certain amount, but for a short time we offer the following reduced special prices as an Introductory Offer:

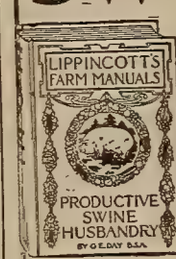
PRICES

	Tires	Tubes		Tires	Tubes
30x3 in.	$ 8.60	$2.30	36x4 in.	$17.45	$4.65
30x3½ in.	10.85	3.10	35x4½ in.	21.20	5.60
32x3½ in.	12.75	3.20	36x4½ in.	22.50	5.75
33x4 in.	15.75	4.20	37x4½ in.	23.60	6.20
34x4 in.	16.70	4.35	37x5 in.	26.30	6.60



All other sizes not included in above list also furnished. Non-skids at 10% additional.

Terms: Payment with order at above special prices, a 10% discount allowed on orders for two or more tires. All personal checks must be certified.



Try these tires now and be convinced of their very high qualities. Sold direct to the consumer only.

Descriptive folder upon request. Write for it.

RACE TRACK FOR SALE.

The Ukiah race track, located a little less than a mile from the Court House at Ukiah and bounded by the State Highway on the west, the county road on the south, and the Northwestern Pacific Railroad nearly the entire length on the east side of the track. The property consists of twenty acres. Fifty-nine good box stalls, good grandstand, fencing in good order, and one of the best half mile tracks in the state. An excellent winter track and an ideal place to work horses during that season. Plenty of adjoining drives for jogging horses. Two wells on the premises as well as water from the city water works, with tanks conveniently arranged for sprinkling.

This is the only race track in Mendocino county and the location of the county fairs. Ukiah is the county seat and has a population of about 3000, is in a most fertile valley in which all kinds of fruit, vegetables, hay, grain and hops are grown. Has excellent water; no malaria or mosquitos. It has paved streets, good sewerage, and splendid gas and electric light works. There are many standard and thoroughbred horses in this county and the people are a race loving lot. This property is offered for sale at a less price than adjoining property is held at. For terms and further particulars address

FARMS FOR SALE
Choice Land in Idaho

Lewiston, Idaho, is situated at the forks of Clearwater and Snake rivers and has transportation to the coast.

960 acres 7½ miles from Lewiston, Idaho, 4½ from Lapwai, Idaho, on main traveled road, all in cultivation except about 15 acres, all level land, just a little rolling, 320 acres of fall wheat in, 225 acres fall plowed for spring crop, about 30 acres in alfalfa. All fenced and cross fenced. Two good springs with big cement water troughs, well, windmill and cement reservoir, water piped to house, 7 room house, hot and cold water and electric lights. Large horse barn with hay mow in the center, electric lights in barn; cow barn with two box stalls; hog pens, shade trees, chicken houses, blacksmith shop, wagon shed, granary, outdoor cellar with bunk house overhead. $85 per acre; will take one-third down, time on balance to suit purchaser, at 7 per cent interest. One-third of crop goes with place if sold any time up close to harvest. Mild climate, can raise all kinds of fruit, grain and vegetables. Wheat in this country goes from 35 to 65 bushels per acre, barley 40 to 80 bushels per acre.

320 acres 4½ miles south of Vollmer, Idaho, 275 acres in cultivation, balance in pasture and timber, farm land lays practically level, one-third of crop goes with place if sold before harvest. Some fall wheat already sown. All fenced and cross fenced. Quarter section of it fenced hog tight; good four-room house, wood shed, and out of door cellar, nice grove around house, well at house, fair stabling and out buildings, spring and spring creek close to barn, three springs on place. Price $70 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

238 acres 4½ miles from Lewiston, Idaho, 175 acres in cultivation, 25 more can be cultivated, balance good bunch grass pasture, fenced and cross-fenced, good spring creek runs across place, small house, station on place for Johnson R. R., two grain warehouses at station. Price $70 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

160 acres of timber land, good farm land when timber is cleared off, all can be farmed except about 2 or 3 acres. Good timber, yellow pine and fir. Price $4000. 40 miles from Lewiston, Idaho. Well located to log off.

240 acres 6 miles from Asotin, 12 miles from Lewiston, Idaho, about 75 acres in fall wheat, about 75 acres more can be cultivated, balance in bunch grass pasture, two springs, small house, all fenced. Price $40 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

A horse having won the first two heats and drawn or distanced in the third heat shall not lose position in the summary.

Nominators have the right to enter two horses in any race by payment of 2% additional, but only one horse may start, and the starter named by 4 p. m. the day before the race.

Entrance fee 5% to start with usual 5% additional from money winners.

10% discount for cash to accompany entry.

The Association reserves the right to declare 3 starters a walkover. When only three start they may contest for entrance money paid in, divided 66 2-3 and 33 1-3%.

A horse distancing the field shall be entitled to first money only.

Right is reserved to declare off any race that does not fill satisfactory, and to change the hour and day of any race except to antedate a race, in which case nominators will receive three days' notice by mail to address of entry.

The Association reserves the right to have any heat started after the second score, regardless of position of horses.

All races limited to three heats.

HALF MILE TRACK

GENERAL CONDITIONS.

ALL RACES THREE HEATS—Money divided 25% to the first heat, 25% to the second heat, 25% to the third heat, and 25% to the race according to the rank in the summary. Money in each division 50, 25, 15 and 10 per cent. Should two or more horses be tied for first place at the completion of the third heat, such horses only shall contest in a fourth heat and money divided according to rank in the summary at the termination of that heat. A horse having won the first two heats and drawn or distanced in the third heat shall not lose position in the summary.

Nominators have the right of entering two or more horses in any race by the payment of 2% additional on each horse, but only one of the horses so entered to be started in the race, and the starter is to be named by 5 o'clock P. M. the day before the race is to take place.

Usual 5% additional from winners.

The Association reserves the right to declare two starters a walkover. When only two start they may contest for the entrance money paid in, divided 66 2-3% to the first, and 33 1-3% to the second horse. A horse distancing the field shall be entitled to first and fourth money only and in no other case will a horse be entitled to more than one money.

The Association reserves the right to change the hour and day of any race, except when it becomes necessary to antedate a race, in which instance the nominators will receive three days' notice by mail to address of entry.

The right reserved to reject any or all entries and declare off or postpone any or all races on account of weather or other sufficient cause.

Entries not declared out by 5 o'clock P. M. the day preceding the race shall be required to start and declarations must be in writing and made at the office of the Secretary at the track.

The Association reserves the right to start any heat after the fourth score, regardless of the position of the horses.

Any horse that started in 1915 without improving its record, equaling its record, and not winning a race, shall be entitled to one second.

Address all communications to the Secretary.

E. GRAVATT, Secretary, Hanford

BEAUTIFUL BELVEDERE

LOTS FOR SALE

CORINTHIAN ISLAND Subdivision to Belvedere is the most beautiful spot on the shores of San Francisco Bay for a suburban home. It commands an extensive view of the City of San Francisco, Alcatraz and Angel Islands, Raccoon Straits, San Francisco Bay, Richardson's Bay, the Berkeley shore, beautiful Belvedere and Mt. Tamalpais. It is in Marin County, directly opposite San Francisco, and forms the eastern shore of Belvedere cove. It has a naturally terraced, sunny, western slope that is well adapted for many choice residence sites, every one affording most picturesque views of the bay and mountain. It is protected from the prevailing western trade winds in summer by Belvedere Island, and from the southerly storms in winter by Angel Island. The soil is fertile and part of the island is well wooded.

It is less subject to fog than any other place near San Francisco. The summer fog, as it rolls in from the ocean, splits on the western slope of Sausalito, part of it flowing in a line with Angel Island towards the Berkeley shore, and part of it along the southern slope of Mt. Tamalpais, leaving Belvedere, Corinthian Island and Raccoon Straits in the bright sunlight, while the fog banks can be seen as a white wall both to the north and the south.

There is very little available land about the shores of San Francisco Bay that is desirable for homes, especially for those who love boating and kindred sports. The Alameda and Contra Costa shores of the bay are the lee shores and receive the full brunt of the boisterous trade winds which lash the shoal waters near the land into muddy waves, making boating both unpleasant and dangerous. To the north of the city and in Marin County the land from Sausalito to the entrance of the bay is a Government reservation and will never be placed on the market. The shores of Richardson's Bay are not at present convenient to boat service and, aside from Belvedere and Corinthian Island, there is little or no land near any ferry landing that possesses the natural advantages, improvements and possibilities that are offered on Corinthian Island. Concrete roads, pure water, telephone service and electric light wires are already installed. It is only ten minutes' walk from any point on the property to Tiburon boats, and but forty-three minutes' ride to the foot of Market Street.

On the point of Corinthian Island the Corinthian Yacht Club has had its home for many years, and on any summer day the white sails of its numerous fleet add to the charming scene, as the trim yachts glide about the cove. Excellent fishing of all kinds for bay fish, including salmon, the gamey striped bass, rock fish and the toothsome silver smelt, is to be had in the cove. There is probably no spot so accessible and in such close proximity to any large city in the world that offers the attractions of climate, magnificent scenery, fishing and boating as will here be found.

INFLAMED, BOWED TENDONS

are quickly cooled, soothed and strengthened with ABSORBINE. It is powerfully penetrating and efficient, but does not blister or cause any inconvenience, and horse can be used.

ABSORBINE
TRADE MARK REG.U.S.PAT.OFF.

is used by successful trainers, in developing fast, high-class race horses, getting them to the races fit and ready, and keeping them sound and strong throughout the season. They require a dependable, efficient liniment—one that does its work well, in a mild, soothing manner, and which, when used as a leg brace or wash, will stop inflammation and keep out the soreness from the strained, fatigued muscles, so that there will be no stiffness or "tying up" after a hard work-out or race.

ABSORBINE, used full strength when needed, and diluted for a wash or brace, helps the horse stay strong and win a race that otherwise might have been lost.

ABSORBINE reduces bog spavins, thoroughpins, wind puffs, shoe boils and similar swellings and soft bunches; allays pain and inflammation; stops lameness quickly.

ABSORBINE, $2.00 a Bottle at Dealers or Postpaid

W. F. YOUNG, P. D. F., 54 Temple St., Springfield, Mass.

Makes Them Sound SMITH'S WONDER WORKER Keeps Them Sound

Allays fever and inflammation at once, this must be done to effect a cure. UNEXCELLED AS A REMEDY for bone and bog spavins, curbs, splints, ringbones, capped hocks, shoe boils, wind puffs, thoroughpins and bunches of all kinds, bowed, strained and ruptured tendons, shoulder, hip and stifle lameness, weak joints, sweeny, cording up, throat trouble and rheumatism. Relieves pains and soreness without loss of hair or a day's let up. As a leg and body wash it has no equal. Invigorates and restores the distressed horse between heats and after hard workouts.

Price $1.50 per bottle, prepaid on receipt of price. $12.00 per doz.; $7.00 per half-doz.; $8 per gal. F. O. B. Tiffin, Ohio.

WINCHESTER

.22 CALIBER AUTOMATIC RIFLE

THE DOPE FOR PESTS

It's hard for anything to get away from the Winchester .22 Automatic Rifle, as, owing to its being loaded by the recoil, it can be fired rapidly with accuracy. This makes it exceedingly effective against pests of all kinds. It is a ten-shot repeater, light and well-balanced, strong in construction, and safe and sure in operation. It is at all times under control, as the trigger has to be pulled for each shot. It is readily taken down, and easy to keep clean and in good working order. A rifle that is a great sport maker, fascinating to shoot and sure to get the game or hit the target. It lists at $25.00 and is sold by all dealers for less.

TRAINING THE HOUND

A PRACTICAL TREATISE ON THE TRAINING OF FOX HOUNDS, BEAGLES, AND COON HOUNDS.

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies. Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; $1.50, postpaid.

SPECIAL HARNESS EVENTS

¾ Mile Run $100.00
½ Mile Run 50.00
Special for non-winners in ⅝ and 1 mile races.

Entry blanks and conditions for running races furnished on application to the Secretary.

CONDITIONS.

Member National Trotting Association. Entries close August 1st.

Horses to be named with entry and be eligible when entries close.

All matinee entries will be classed by a classification committee prior to the opening day of the races.

All races (except matinees), three heats, every heat a race; money to be divided as follows: Twenty-five per cent of the purse to be paid on each heat, and twenty-five per cent to the winner of the race according to his rank in the summary. Should two or more horses be tied for the first place at the completion of the third heat, such horses only shall contest in a fourth heat and money divided according to rank in the summary at the termination of this heat. (Under this arrangement, according to the rules adopted by the National Trotting Association, of which this Association is a member, only the horse winning the race would take a mark.)

Heat purses will be divided 50, 25, 15 and 10 per cent.

Any race not filling satisfactorily to the Association may be declared off.

In case class in which horse is entered does not fill, entry may be transferred to any race to which it is eligible, subject to the approval of the nominator.

Entrance fee five per cent to start. Three per cent due and payable when entries close, and two per cent before starting.

An additional five per cent of the division will be deducted from money winners.

Nominators have the right of entering two or more horses in one ownership in any race by the payment of two per cent additional, but only one horse so entered shall be started in the race; the starter to be named by 4 o'clock p. m. the day before the race is to take place.

A horse may be entered in two classes and be held for but one entry fee (entry fee in larger purse will be charged), provided only one start is made.

A distanced horse in any heat will be entitled to money already won. There will be no more money than there are starters.

Entries not declared out by 4 o'clock p. m. on the day preceding the race shall be required to start and declarations must be made in writing at the office of the Secretary on the grounds.

The Association reserves the right to change the order of the program; also to start any heat after the fourth score regardless of the position of the horses; also to reject any and all entries and declare off or postpone any or all races on account of the weather or other sufficient cause.

Address all communications to

O. P. SANDERS, Secretary, Box 533, Riverside, California.

HALF MILE TRACK

GENERAL CONDITIONS.

ALL RACES THREE HEATS—Money divided 25% to the first heat, 25% to the second heat, 25% to the third heat, and 25% to the race according to the rank in the summary. Money in each division 50, 25, 15 and 10 per cent. Should two or more horses be tied for first place at the completion of the third heat, such horses only shall contest in a fourth heat and money divided according to rank in the summary at the termination of that heat. A horse having won the first two heats and drawn or distanced in the third heat shall not lose position in the summary.

Nominators have the right of entering two or more horses in any race by the payment of 2% additional on each horse, but only one of the horses so entered to be started in the race, and the starter is to be named by 5 o'clock P. M. the day before the race is to take place.

Usual 5% additional from winners.

The Association reserves the right to declare two starters a walkover. When only two start they may contest for the entrance money paid in, divided 66 2-3% to the first, and 33 1-3% to the second horse. A horse distancing the field shall be entitled to first and fourth money only and in no other case will a horse be entitled to more than one money.

The Association reserves the right to change the hour and day of any race, except when it becomes necessary to antedate a race, in which instance the nominators will receive three days' notice by mail to address of entry.

The right reserved to reject any or all entries and declare off or postpone any or all races on account of weather or other sufficient cause.

Entries not declared out by 5 o'clock P. M. the day preceding the race shall be required to start and declarations must be in writing and made at the office of the Secretary at the track.

The Association reserves the right to start any heat after the fourth score, regardless of the position of the horses.

Any horse that started in 1915 without improving its record, equaling its record, and not winning a race, shall be entitled to one second.

Springfield, Ill.	Sept. 18-22
Sedalia, Mo.	Sept. 25-30

HORSE VALUES are rising all over this country and some of the most astute horse dealers are very certain that the depression in prices that has prevailed for some time is ended and that even ordinary light horses will soon be in demand at prices that will pay breeders to produce them. There has never yet been a time since the advent of the automobile and motor truck that a really good horse of any kind could not be sold at a fair price, but owners of common stock of all kinds have found the market very poor during the past few years. Buyers for the European governments have taken about a milllion horses from the United States for war purposes since the outbreak of the big conflict over there and now the trouble in Mexico is creating another big demand for the same class of animals. Add to this the fact that the breeding of horses of the army type has fallen off greatly in the past two or three years and that so many horse breeding farms have been turned to other uses, and the conclusion is certain that horse values must rise. In fact they are rising every day. The big drafters are bringing more money this year than they did in 1914 or 1915, and the auction sales of the pure bred draft stallions and mares for breeding purposes show that a considerable advance has been made during the past two years. The renewal of high class racing in the eastern states has given increased value to thoroughbred stock, and trotters and pacers that show speed enough to warrant entering them in races are bringing more money this year than last. The runner that cannot run and the trotter that cannot trot is not wanted and it is probably a good thing for the future of horse breeding that this is so, as it has curtailed the breeding of the light harness horse to an extent that should have prevailed years ago. The best posted horsemen in America today are of the opinion that horse values will rise for some time, as there are very few young horses of any breed in the country.

QUITE A SUM OF MONEY will be hung up for harness races in California this year after all. Outside the colt stakes there is over $30,000 in sight already, with races announced for Santa Rosa, Dixon, Sacramento, Fresno, Hanford, Bakersfield and Riverside, and there are several other places to hear from. The purses for class races are from $300 to $1000 in value, so that a horse that can win one race at each meeting will have about $1500 net to his credit over and above entrance money, which is not such a large sum, but it will buy oats and hay to last him over until next year. Then when one thinks of all the fun and glory in winning it will seem quite profitable after all. The man who owns a horse that can win one race a week need not despair even though the money won does not take five figures to express its value. Let him think of the poor devil that pays entrance once a week and fails to get any of it back. He is the fellow who has the right to relate hard luck stories.

SUISUN STOCK FARM SALE.

Twelve Highly Bred Two-Year-Olds to Go on the Auction Block Next Saturday.

The annual sale of young trotters and pacers bred at the Suisun Stock Farm of Rush & Haile will take place next Saturday afternoon at Suisun. There is not one of the twelve two-year-olds to be offered that is not a highly bred filly or gelding. There are four by that wonderful speed sire Demonio 2:11¼ and eight by Montbaine, son of the great Moko. If you want a nice young horse to use on the road, to race on the circuit or at the matinees, or to use as a saddle horse, go to Suisun and get one of these two-year-olds at your own price and have him broke and trained according to your own direction. More value for the money is given at the Suisun Stock Farm sales than at any annual sale held in the State.

Bridgford Company's Sale of Saddle Horses.

There was not a very large crowd or very lively bidding last Tuesday evening when the mares, geldings and fillies from the Bridgford Company's farm at Knightsen were auctioned at the San Francisco Riding Club show ring, by the popular auctioneer, W. H. Hord. Although the demand for the kind of stock offered was not great, every animal bid on was sold and only one, a small weanling, was returned to the farm. A five-year-old bay mare brought $145, a four-year-old gelding $120, a five-year-old mare with foal at foot sold for $150, and another mare six years old brought $175. The yearlings brought from $50 to $100 and the average for the twenty head sold was close to $100. The stallion Artist Jr. in spite of his blemished leg was in fine order and every person present lamented the fact that the injury received by this handsome horse has served to keep him out of the show ring. But for this blemish he would undoubtedly make some of the best of the saddle stallions work hard to beat him. He was not put up at auction but was sold at private sale to the Dunphy Estate of San Francisco, and will be placed in the stud on one of the estate's horse breeding farms where he will prove a valuable sire of saddle animals if given an opportunity. We understand that Mr. Mayer, manager of this estate, plans to use him for this purpose and will mate him with some extra good mares.

Among the buyers at the sale was Mr. J. J. Altube of Berkeley who purchased eight head of mares and fillies and will send them to his farm where they will be put to breeding.

The Bridgford Company has a rule that when it consigns horses or other stock to the auction ring every animal will be sold to the highest bidder without any by-bidding, and that rule prevailed at this sale. Some of the horses and mares were sold for a song but they were knocked down to the highest bidder and there was no complaint from the breeder because they did not bring more money. The sale was eminently satisfactory in every way except that prices were less than the stock was worth, and Judge Bridgford is too game a horseman to utter any complaints on that score.

SOLANO COUNTY FAIR AT DIXON.

Eight Purses of $300 Each Will be Offered For Trotters and Pacers.

The Solano County Fair will be held at Dixon during the week following the Forest Festival and Breeders' Meeting at Santa Rosa. August 16th to 19th inclusive are the dates. It has been decided to give eight purses for trotters and pacers, each purse to be $300, which makes a total of $2400 to be distributed and which is liberal for a town the size of Dixon. The half mile track there is one of the best in the State so far as soil and condition are concerned, and the association proposes to add to the number of stalls so that there will be room for all the horses that are entered in the races.

The full program of harness events with the classes and conditions is now being arranged and will be ready for publication in the Breeder and Sportsman next week. Make your arrangements now to race your horses at Dixon in August. You will find there one of the most prosperous sections of California and a most hospitable people. Every accommodation will be provided for horsemen and as this will be the first fair given at Dixon by the Solano County Fair Association every person in the county is boosting the fair along, so it is bound to be a big success. Look out for the program next week and make your arrangements to spend the four days in that pretty town, where the alfalfa makes five or six crops per annum and the people are all prosperous.

Matinee at Santa Rosa Tomorrow.

A free-for-all pace, a 2:10 pace, a 2:12 trot, a 2:15 pace and a 2:20 trot—these will constitute the card to be offered tomorrow afternoon at the matinee which is to be staged by the Sonoma Driving Club at the Santa Rosa fair grounds. The program was completed at a meeting of the club held Tuesday night. President L. L. Cannon presided and there was a good attendance of members.

The free-for-all pace will be the event of the day. It should be a real speed burner and should show great class. Frank Turner's Dr. William S. Jennings, Joe Ryan's Hamburg Belle, and Barstow's All McKinney will compete in this event and some fast time is looked for.

In the fast trot, Tom Smith's Vallejo King 2:10½, Spencer & Keefer's Nuristo 2:10¼ and Frank McGregor's Jessie Dillon 2:26¾ will probably start.

An invitation has been sent to Director Robert Brown, of the Pacific Coast Trotting Horse Breeders' Association, to act as starter for the day.

Petaluma Horsemen Give Races.

The Petaluma Driving Club furnished some excellent sport for the entertainment of a big crowd at Kenilworth Park, Petaluma, last Sunday. Two pacing events at mile heats, one at half mile heats, and a couple of running races made up the card. The results were as follows:

First race—2:30 pace; trophy.

R. Healey's Billy T.	(Healey)	2	1 2
Ed. Millerick's Glenwood Chief	(Millerick)	1	2 1
J. McGovern's Peaches	(McGovern-Ryan)	3	3 3

Time—2:32¼, 2:30, 2:32½.

Second race—Free-for-all; trophy.

J. Ryan's Hamburg Belle	(Ryan)	1	1
G. Silva's Tom Murphy	(Silva)	2	2

Time—2:24, 2:30.

Third race—special, ½-mile.

F. McGovern's Grace McKinney		1	1
T. Ryan's Dewey	(J. Ryan)	2	2

Time—1:16, 1:12.

Fourth race—¼-mile running; trophy.

Von Wilson, first; Sir Victor, second; Alice M., third; Celia, fourth. Time—:24¾.

Fifth race—⅜-mile running; trophy.

Amethyst, first; Slide, second; Togo, third. Time—:38½.

Vera Hal Will Meet Bradmont Sunday.

Five well filled races have been carded for the matinee of the San Francisco Driving Club at the stadium in Golden Gate Park tomorrow afternoon and as Harold Cohen has named his fast mare Vera Hal in the free-for-all pace, there should be quite a horse race. Bradmont, who is also named in this event, is unbeaten so far this season but he has not met the daughter of Expressive Mac. All the events but the free-for-all are at three-quarter mile heats but this will be at the regulation distance. The entries for the five events are:

First race, 2:20 trot—Joe McTigue's Darby Mac, M. Ford's Minequa, A. Giovannetti's Yoncalla, A. Combatalade's Bird Eye, J. McNamara's Matawan.

Second race, 2:15 pace—William Malough's Emma M., J. M. Kidd's Senator H., H. Campodonico's King Pointer, Dan Keating's Victor Pointer.

Third race, free-for-all pace—G. J. Giannini's Bradmont, Harold Cohen's Vera Hal, W. J. Kenney's W. J. K.

Fourth race, 2:20 pace—J. J. Ryan's Rosa O., William Hopkins' Sis Hopkins, S. Benson's Dibble Wilkes, Dan Healy's Silver Logan.

Fifth race, 2:18 pace—Frank Goulart's J. C. Simpson, J. M. Kidd's Pointer Belle, George Conlan's Little Jack.

On Tuesday entries will be received and horses classified for the Fourth of July matinee at the stadium. The meeting will be held at 373 Golden Gate avenue and the races are open to the horses of the State.

Harness Horses and Horsemen

California Horses Win at Benson, Nebraska.

Several California horses started at a meeting held week before last over the half-mile track at Benson, Nebraska and to wind up the affair on the third day Hal McKinney 2:06¼, the ten year old son of Hal B. 2:04½ out of Juliet D. 2:13½ by McKinney, now owned by Tom Dennison of Omaha, and trained and driven by Bob Sebastian, won the free-for-all pace in straight heats in 2:07½, 2:08¼ and 2:10, breaking the Nebraska state record for a half mile track in the first heat. In this race Hal McKinney met his old rival Columbia Fire 2:04¾ and gave him a decided beating. Franklin Pierce 2:08½, a frequent winner last season, was the only other starter in the free-for-all event and he was third in every heat.

The meeting was given by the Douglas County Fair Association and all races were for three heats only. In the 2:18 trot Fred Ward, who had his own and several of the Hemet Farm horses at the meeting, took first money with Bon Courage, winning the first heat and coming second in the next two in 2:23½, 2:20 and 2:21¼. There were ten starters in this race, second money going to Pronto J. by Strathway. California B. by Athasham started but was outside the money, as was The Frisco by Caution, driven by John Lance.

On the second day John Lance got third money in the 2:27 trot with the bay gelding Lathrop ,and in the 2:14 trot Fred Ward was second in every heat with Dr. Wayo. The bay gelding Hemet by Geo. W. McKinney was a starter in the 2:15 pace but was outside the money.

In the 2:25 pace the last day John Lance was 2-2-3 with the bay gelding Bud Williams in 2:14, 2:15 and 2:15½, and stood second in the summary, the race being won in straight heats by Helen Chimes. Lady Hoy by Strathway took third money.

Miss Bailey by Geo. W. McKinney was a starter in the 2:22 trot, but Sebastian failed to get inside the money with her, the heats being around 2:16. The 2:20 pace was won by Ward with Hemet Farm's chestnut gelding Harry A. by Armond Lou, a son of Kinney Lou. Harry A.'s two winning heats were in 2:15½ and 2:13¾ and he was second in the last heat in 2:12½.

Ohio Half Mile Track Circuit Opens.

The first race at the opening of the Ohio racing season at Cranwood Park, near Cleveland, was won by the chestnut horse Chilcoot, a son of San Francisco 2:07¾. Chilcoot took the 2:27 trot in straight heats, in 2:17½, 2:18 and 2:17½, very good time for the opening race of the season on a half mile track.

The second race, the 2:10 pace, was won by The Beaver, a son of Searchlight, driven by William Fleming. This race went to six heats before a winner was declared ,and the fastest heat was 2:10¼.

On the second day Lon Daniels started Kid Cupid in the 2:13 trot, and the gelding was made favorite. The race went to five heats and was won by Harry Hamilton, Glenwood B. getting second money, Royal Cadet third money and Kid Cupid fourth. The last named did not win a heat but was second twice and third once.

Kid Cupid was the only California horse started at the Cranwood Park meeting, which was successful in every way with good fields and fast time considering the season and the track. The purses were all $400 each.

Making Speed at Boise, Idaho.

O. P .Henderson, Secretary at Boise, writes: The Intermountain Fair and Racing Circuit, recently organized at Boise, and which includes La Grande, La Grande, Idaho, and which includes La Grande, Baker, and Ontario, Ore., Montpelier, Rexburg, Blackfoot, and Boise, Idaho, and Salt Lake City, Utah, will have uniform classifications, so that all horses starting can finish the circuit in the classes in which they started. There seems to be quite an interest in this new racing circuit, from the letters of inquiry which I have received from horsemen throughout Idaho, Utah, Oregon, Washington and California, with prospects for a big field in all classes.

We have had a number of horses in training at the Boise tracks up to within the last few days; however a number have gone to make the eastern circuit, but expect to return for the opening of the Intermountain Racing Circuit at Montpelier, August 15, 1916. The following horses are some of those in training and their records:

J. D. Springer, of Sonoma Girl fame, has Mountain Boy 2:12¼ and Adver Direct, a green pacer. Mountain Boy has been a mile in 2:20, a quarter in 31 seconds; Adver Direct in 2:17½, quarters in 29¾ and 29½ seconds.

O. M. Hutchins has Lady Valentine, a green pacer who who has been a mile in 2:18, half in 1:06, quarter in 31 seconds a fast high class pacer.

William Taylor has Beans, a two-year-old trotter, by Soumi, dam Summer Beaux; acts like a high class colt; a quarter in 37 seconds and an eighth in 17½ Miss Fleety by Soumi, dam Miss Otto 2:11, dam of Ovida 2:05, is a crack pacing two-year-old. She went a mile in 2:34, last half in 1:12, in only a jog. A green pacer by The Magnet, dam Don Electrite 2:14¼, has been the mile in 2:28 and is learning fast. Baron Jolla 2:30, three years old, is in the stud.

Jim Kirby has Lady Garland by Zombro, dam by Secretary 2:30. Miss Eileen 2:18½ by Junior Dan Patch 2:05½ has gone a mile in 2:26½, eighth in 15½. Miss Sirius, two-year-old trotter, by Graham Bellini 2:11¼, dam Lady Sirius 2:10¼. Kinney Benton, two-year-old trotter, by True Kinney 2:12½, dam Princess Viola by Prince Ansel, second dam by General Benton, Idaho Chief, yearling, by Soumi, dam Lady Sirius 2:10¼. Kirby's horses had a severe attack of distemper early in the spring, and he is going slow with them.

May Davis 2:08½, owned by Budd Davis, Caldwell, Idaho, is expected here any day.

The track is in first-class condition and the horses will be fit on the opening date of the Intermountain Circuit.

The indications are that many of the track records will be broken at the Gem State Fair this year, as it is positively known now that there are a number of fast ones coming through this circuit.

That Stockton Fire.

The fire at the Stockton race track June 14th caused the loss of two valuable pacers, several sets of harness, boots, sulky and hay owned by Mr. H. W. Williams, and the destruction of a double eight stall shed near the pavilion.

Several men, under the direction of the county superintendent, were burning off grass. When leaving they failed to put out all the fire, which crawled under the north end of the shed. In less than a minute the entire building was in flames. Mr. Williams and his helper were at the shed, their horses occupying the eastern half. The west side was unoccupied and as the fire caught there first, the flames were raging before it was discovered. Mr. Williams had a stable of five horses in training and he succeeded in saving one of his own and two belonging to Mr. A. L. Richardson. The horses burned to death were a four-year-old stallion called Ishmael by Salisbury, dam a thoroughbred mare, and a four-year-old filly by Aerolite, dam a Nutwood mare owned by Mr. Williams. The stallion was valued at $2,500 and the filly at $1,000. Both of these pacers have been worked out in 2:15 and they could pace in 2:12. As neither animal has any record the loss is quite heavy. Mr. Williams values his loss at $1,000 aside from the pacer. His helper, whose face was badly blistered from the intense heat, did not save even his bedding. The pavilion caught fire several times on the roof, but a quick run of the auto engine from the city saved the building.

There are now quite a number of animals in training at the race track. Mr. Williams has three, A. T. Jackson four, Farmer Bunch three and M. Henry eight. The principal stable is that of J. N. Jones. He has in training Leata J. 2:03 and seven others, including Hanover by Hannibal, dam Puss by Dexter Prince, Irene by Carley D., dam Lady Irene by Diablo, and Mary Osborne, a four-year-old mare by Dexter Derby, dam by Linwood, owned by Ed Lavin. Leata J. is entered at the State Fair in the free-for-all pace but has not been worked out this year faster than 2:30. Irene is entered in the 2:20 class pace and Hanover is expected to start in the 2:14 class. Mary Osborne will start in the 2:20 trot. G. H. T.

Red McK. Goes to Indiana.

Mr. W. R. Murphy, of Santa Ana, California, writes the Breeder and Sportsman that he has sold his stallion Red McK. 43766, son of McKinney and Bonnie Red by Red Wilkes, to Barker Bros. of Washington, Indiana, who have a stock ranch and will use the horse for breeding purposes. Mr. Murphy also sold them a green pacing mare by Zenith, dam by Stanley, and recently sold to Mr. Andrew Albright Jr. of Prospect Farm, Hilton, New Jersey, the yearling by Bon McKinney, dam Celandine by Ignus Fatuous.

In partnership with Mr. F. W. Faucett, Mr. Murphy has recently purchased a young horse that had never been trained, but is a natural trotter. After working a very little for thirty days this horse trotted an easy mile in 2:28½, with the last quarter in 33½ seconds. He is a handsome fellow and seems to be full of trot. He was foaled in 1910 and is by Wiggins (2) 2:19½ by Aberdeen. His dam is Miss Clay Bell 2:18¼ by Bow Bells, second dam Marchmont Bell 2:23¾ by Baron Wilkes, third dam Lady Mackay (dam of Oakland Baron) by Silver Threads, fourth dam Fleetwing (dam of Stamboul 2:07½) by Hambletonian 10, fifth dam Patchen Maid by Geo. M. Patchen 30, sixth dam by Abdallah 1. He was bred by Morris E. Bacon, of Lexington, Kentucky.

Mr. Murphy expects to race Dr. S. 2:14½ by Carlokin this season.

Horses Scarce at Sacramento.

Some horse buyers say there are plenty of horses in California of the army types but the Sacramento Union has a different story to tell. It said in its issue of Wednesday this week: "Representatives of the allies have combed California so thoroughly for mules and horses that it is with difficulty that the militia now preparing for mobilization can secure enough mounts to supply the cavalry troopers and equip the field wagons. Captain H. H. Sydenham of Troop B. of cavalry stated yesterday that he had not yet been able to secure horses. Some 22 animals are needed. Prices have advanced $50 a head since the militia mobilization was ordered. "I had a band of 22 horses staked out at Willows several days ago," said Captain Sydenham one day last week, "and when I went to get them Monday I found that E. Clemens Horst, who has been buying extensively for the allies, had just preceded me. I now have another band staked out at Lincoln." If the situation in Mexico becomes more acute it is intimated that the war department will ask an embargo on horses. There are at present three different companies of horse buyers in the Sacramento valley."

Races at Hollister Last Sunday.

The Hollister Driving Club held an afternoon matinee of racing at the Riverside track on Sunday afternoon, and some good contests were enjoyed by the members of the club present.

Robt. Orr Jr., the youngest member of the club, acted as official starter and secretary, and got the fields away together like an old veteran, while R. I. Orr acted as timer.

Three races were carded as follows:

First, buggy horses, one-half mile, 3 in 5.—Geo. Cagney's "Dan Patch," Jerry Wright's "Stanford White," and Ramelli Bros.' "Monte," "Patch" ably driven by his owner took the second and third heats in 1:18½ and 1:15. "Monte" with Al Wilson up took the first and fourth in 1:20½ and 1:17½. "Stanford White" was last in all the heats except the third when he came in second.

Second race was a matched one between Wright's "Oro Guy" and Jack Kydd's "Ben Alto," 3 in 5, half mile heats. "Oro Guy" driven by Wilson took the first, third and fourth heats in 1:21, 1:15 and 1:15. "Ben Alto," with Joe Sanchez driving, took the second heat in 1:15.

The third race was for buggy horses, one-half mile heats, 2 in 3, and had as entries: Hatton's "Happy," George E. Shaw's "Judge D." and R. L. Foust's "Blackie." "Judge D.," driven by the old veteran Matt Zahner, took both heats handily in 1:30 and 1:37. "Happy" was second each heat and "Blackie" third.

Washington State Fair Races.

But one of the eight early closing events advertised by the Washington State Fair Association for its fair, to be held at North Yakima Sept. 18th to 23rd, 1916, and which closed for entry June 1st, received the required number of entries. This was the 2:25 pace for which a purse of $500 was offered.

The 2:30 trot $500, 2:25 trot $500, 2:12 trot $700, free-for-all pace $700, 2:10 pace $600, 2:08 pace $700—all these stakes have been re-opened to close Monday, August 14th,.

The late closing events are the 2:15 trot $600, the 2:20 trot $600, the 2:15 pace $600 and 2:20 pace $500. These do not close until Monday, Sept. 4th, two weeks before the fair opens.

The entries for the 2:25 pace $500, which were made June 1st and which race has been declared filled, are the following:

2:25 Pace—$500.

Comet, blk s by Major B.—Ruby, A. R. O'Leary.
Helen Hal, b m by Hal B.—Vida Mack, Dr. A. G. Smith.
Maud Bond, b m by The Bondsman—Nusta, W. J. Miller.
Bud Williams, b g by Caution—Birdie Williams; Recall, b s by Freddy C. Jr.—Montey, John Lance, Agent.
Macfoster, b s by McEwen—Annie Caffee, H. M. Fullerton.
Greatness, br m by Peter Wilton—Abbie McNutward, L. A. Childs.
May Putnam, blk m by Glendor—Fanny Putnam; King Putnam, blk g by Glendor—Fanny Putnam, Mrs. W. A. Millington.
Hiho, b s by Keeler—Unknown, Wm. Brinkert.
Lock Logan, br g by Zolock—Effie Logan, J. E. Montgomery.
Garland Mc., b g by Homer Mc.—Luna, California Stock Farm.
Zombrino, by Prince Zombro—Not Given, Ten Bunch, Agent.
Allerton Direct, b h by Baron Direct—Happy Lotta; Windsor Direct, b m by Baron Direct—Cecil Woodline, Joe F. McGuire, Agent.

Oregon State Fair's Early Closing Events.

The two early closing trotting events for the State Fair at Salem, Oregon, failed to fill. These were the 2:12 trot $2,000, and the 2:25 trot $600. They will be held open until August 1st.

The early closing pacing events both filled, however, with the following list of entries:

2:08 pace, $2,000.—Bertie Seattle, S. S. Bailey; King Zolock, W. L. Masters; Lady Hal, H. G. Cox Emaline Dillon, A. F. Conners; Francis J., Mrs. J. C. Leggett; Parkwood, Mrs. Mary E. Kimball; Royal Express, Mrs. Mary E. Kimball; Prince Zolock, H. A. Gardner; Greatness, L. A. Childs; Hal Edo, W. S. Abbett; Toffee, Fred Seubert; King Bond, E. C. Lewis; Maxine, J. E. Montgomery; Lock Logan, J. E. Montgomery; Red Rock, Ina McGuire; Homer Mc, California Stock Farm.

2:25 pace, $750—Comet, A. R. O'Leary; Bertie Seattle, S. S. Bailey; Garland Mc, California Stock Farm; Zombrino, Ted Bunch; Lizzie M., Miles McGrail; Helen Hal, A. G. Smith; May Putnam, Mrs. F. L. Wolfenden; King Putnam, Mrs. W. A. Millington; Helen Mistletoe, G. L. Parker; Potreress, J. P. McConnell; Savage Right, A. Glover; Greatness, L. A. Childs; Macfoster, H. M. Fullerton; Lock Logan, J. E. Montgomery; Alerton Direct, Joe F. McGuire; Windsor Direct, Joe F. McGuire.

Thoroughbred Matters

Yearlings at Nevada Stock Farm.

There are sixteen yearlings now at Mr. Geo. Wingfield's Nevada Stock Farm, near Reno, and they are as fine a lot of youngsters as can be seen anywhere, and many of them will be seen under the Wingfield colors in 1917:

Anna Starr, bay filly by Starbottle—Anna May; foaled March 29, 1915.

Rattan, a colt by Montgomery—Alice Carey; foaled May 10, 1915.

Fine Feathers, bay filly by Ossary—Chaste; foaled March 7, 1915.

Divland, bay colt by Deutschland—Divina; foaled April 14, 1915.

Tickford, bay colt by Duke of Ormonde—Dora I.; foaled March 12, 1915.

Doveland, chestnut filly by Deutschland—Dovelike; foaled April 29, 1915.

Arrowsmith, black colt by Deutschland—Eleven Bells; foaled March 1, 1915.

Truckee, bay colt by Deutschland—Fay Muir; foaled March 26, 1915.

Carico, bay filly by Rey del Sierras—Geheimness; foaled March 7, 1915.

Avon Carey, chestnut colt by Joe Carey—Maid of Avon; foaled March 20, 1915.

Sandab, chestnut filly by Starbottle—Ocean Dream; foaled May 2, 1915.

Zubelda, bay filly by Montgomery—San Francisco Maid; foaled March 3, 1915.

Duroc, chestnut colt by Irish Exile—Swiftwater Sal; foaled May 1, 1915.

Auditor, chestnut colt by Starbottle—Urarda; foaled May 5, 1915.

Sam Pickett, black colt by Joe Carey—Afamada; foaled April 16, 1915.

Lantern, chestnut colt by Starbottle—Ravalette; foaled April 29, 1915.

Dodge Wins Latonia Derby.

Weber & Ward's great horse, Dodge, with Murphy up, won the thirty-third renewal of the classic Latonia derby at the Latonia (Ky.) race track last Saturday. George Smith, the winner of the Kentucky derby at Louisville, finished second and Dick Williams third. Dodge's time was 2:37.

A perfect day greeted the large attendance, but after the running of the first race a heavy rain fell, turning the track from good to sloppy. The rain also turned the betting from George Smith, who was a heavy early favorite, to Dodge and near post time the heaviest play centered on the eventual winner.

There were thirty-five pari mutuel machines in the betting shed which were in constant operation, while three machines had been placed on the lawn for the derby race only and were opened to the public at 1 o'clock.

Seven horses came from the paddock to the barrier in the derby event. Gypsey George caused a delay at the post of about ten minutes by bad acting, but when the field was sent away it was to a good start. Gypsey George immediately went to the front and opened up a gap of five lengths. Dodge was second with George Smith running easy three lengths back.

They ran in this position until the far turn was reached, the balance of the field being strung out almost the entire race. Here Dick Williams moved up strongly while Gypsey George tired badly and dropped out of contention.

Dodge then immediately went to the front and won eased up. George Smith held on gamely for the place, stalling off the determined rush of Dick Williams through the stretch. The other starters were Big Smoke, Victory and Ellison. King Gorin, Franklin, and Captain Rees were scratched just before post time.

In the pari-mutuels Dodge paid $5.80 on a $2 ticket to win, $3.10 to place and $2.60 to show. George Smith paid $5 for a $2 ticket for place and $3.30 to show. Dick Williams paid $3.20 to show.

Sam Hildreth on the Earning Power of 3-Year-Olds.

S. C. Hildreth, who trains for August Belmont and is one of America's most successful trainers, is of the opinion that some effort should be made by the racing associations in the East to put three-year-olds on a par with two-year-olds in the matter of earning power. "The prominent turf authorities of New York and other Eastern States," he said, "always are talking about shaping programs with the view of encouraging the breeding of thoroughbreds which will make sires valuable for crossing upon ordinary mares for the production of high-class hunters, saddle and cavalry horses, which are greatly needed throughout the country, and yet they themselves, by offering all the richest prizes for two-year-olds and next to nothing for older animals, go right on encouraging the demand for early maturity, as if that were the only object worth aiming at.

"In fact, this encouragement of breeding for early maturity as against lasting qualities and real wear-and-tear race horses, never was more in evidence than it is right now. We have plenty of two-year-olds if their owners would take a little pains to race them only reasonably in their first season; but what object can there be in saving a two-year-old for the following year when he can win neither money nor glory worth speaking of after he passes out of his two-year-old form?

"Take Friar Rock, for example. He was just a fairly good two-year-old, but there were others who always could beat him whenever they met him over the distances which two-year-olds are asked to run. Probably for this rather than any foresight on my part, he was raced moderately as a two-year-old, and this year he comes out and shows himself a really good three-year-old, and he looks like an animal which would make a sturdy, useful horse and one which would be able to show himself a real race horse for years to come should he meet with no bad luck.

"But what will Friar Rock amount to in the way of winning prizes worth while? He is past his two-year-old form, and therefore he can add but little to the annual winnings of the Belmont stable as compared with what might be accomplished by a smart, early maturing two-year-old who could win three or four of the big stakes offered for two-year-olds. Why, the Futurity alone will put a colt away up among the leading winners of the year. I do not say that the stakes for two-year-olds are too rich, but that the stakes offered for three-year-olds are too small in proportion. Rich prizes for three-year-olds spells the breeding of sturdy, rugged race horses."

Just now Friar Rock is the turf hero of the hour, and no one who saw him win the Belmont Stakes can grudge him the honors which have come to him. He won the race over the mile and three furlong distance in gallant style, proving himself a worthy son of his great sire, and a regally-bred dam, who already proved herself a splendid producer.

Every turfman knows what a great racehorse and what a regally bred one Rock Sand was, while Friar Rock's dam, Fairy Gold, by Bend Or, had won a well deserved name as a broodmare with such animals as Fair Play, Golden View, the dam of the fast but erratic Rock View, and Flittergold, all by Hastings, to her credit. Friar Rock is distinctly a Nursery product and a Belmont bred colt.

As to individuality, he is a race horse of the old-fashioned type and one made for use rather than ornamentation. No judge of real thoroughbreds could look him over without being impressed with his admirable conformation.—N. Y. Telegraph.

Great Racing Families in America.

New York, June 12.—Not the least fascinating feature of the current racing season will be the comparison of our home-bred thoroughbreds as individuals and in point of speed with those that have come from abroad. Two youngsters of purely foreign lineage, Hourless and Jack Mount, have already won, and as the season progresses and more of the imported colts and fillies sport silk the interest will increase.

There have been in all since January 1, 1915, more than 350 registrations with the Jockey Club, and of these 160 are two-year-olds, of which about one-fourth are entirely American-bred or out of American mares that were sent abroad during the period when the turf languished in the United States.

Much has been said and written about the benefit which will be derived from these importations of fresh blood, some of the best families being represented in the lot. In discussing this point on Saturday W. H. Rowe, the registrar of the Jockey Club, and an acknowledged expert in blood lines, said:

"No doubt there are many winning families represented in recent importations and a satisfactory number of them will produce animals of merit, but American breeders should not lose sight of the fact that we have at home some of the greatest racing blood, viewed in the light of achievement, that turf history has recorded. Take, for example, the Maggie B. B., Ballet and Galopade families. There is scarcely a classic in this country that hasn't been won by descendants of these mares, while they figure in the pedigrees of the winners of the Derby and other great turf events of England and Continental Europe.

"Despite their achievements we find that descendants of Wanda and Ballet are barred from registration in the English and French Stud Books because the female line as recorded in the American Stud Book does not trace to an English source. Durbar won the Derby, but he couldn't get into the English Stud Book, it having been ruled some four or five years ago that only horses that traced in all points of their pedigree directly to that authority were eligible for that honor. France, on March 1, 1913, put up the bars in like manner, and Shannon and Blarney, both good horses and winners of big money in that country, would not be eligible for registration under the present English ruling because their sire, Irish Lad, doesn't trace through the female line to the British authority. This has produced a peculiar condition of affairs, for while Colin is represented in the English Stud Book, a sister or brother to him or their produce would be refused.

"This is the time for the American breeder to study the blood lines of the families he wishes to amalgamate," went on Mr. Rowe. "He shouldn't be carried away by brilliant top-crosses, but should delve into the female lines and see that they contain the qualifications he wishes to incorporate into his product. We have been accused of breeding a lot of sprinters, but I think that if our horses were trained to stay they would show stamina of a high order. Speed must be served, of course, and it is the first essential every great race horse must possess. If we find the happy blend that results in speed and staying powers we have reached the apex of our endeavors."

In discussing the decline in the registration of thoroughbred foals from the high-water mark of 4,415 in 1905 to less than 2,000 last year, Mr. Rowe said: "The registration of 4,415 foals in 1905 doesn't imply that we hadn't more than that number of thoroughbreds born in that year. There were many that died, and others that were not worth recording, in the estimation of their owners, so that I should say that taking last year's figures as a working basis, the number of thoroughbred dams in the United States and Canada had decreased by more than one-half in ten years. It's going to take a long time to get back to our former figure. With the increased interest that is being taken in the thoroughbred, however, and the part he is bound to play in the government's breeding policy, the gain will, perhaps, be more rapid than under conditions that existed some years ago.

"There is no dearth of material," said Mr. Rowe, in conclusion, "for the prosecution of the breeding of army horses, as sires that possess the characteristics necessary for the production of that type, but lack the strains of blood that would make them desirable to produce racehorses, are abundant. Many of the English importations are horses of size and bone, and would make an admirable top-cross for the cold-blooded mares that are to be found in every rural community."

———o———

Racing is really the foundation of all the light horse breeding in the country. In every country in the world in which civilization has made way, and in which light horses have been required for commerce, for pleasure, or for war, the importance of racing has been recognized. Primarily it has been a national industry with a sporting side. A writer in the 'Gentleman's Magazine' in 1739 says of racing: "The original design of this entertainment was not only for sport, but to encourage a good breed of horse for real use." If any proof of this is wanted, it is only necessary to examine carefully the pedigree of Adbolton Kingmaker, who was the champion hackney stallion last year. In that the name of Regulus appears some twenty times. There are other racing crosses as well, and it is a sound inference that there would have been no Adbolton Kingmaker if Regulus, who was the grandsire of Eclipse, had not won Royal plates all over the country. Nor is this an isolated case, or a matter confined to one breed of horses.

* * * *

The "Irish Field" states that the biggest private stud in the United Kingdom (if not in the world) devoted to the rearing and breeding of the British thoroughbred is comprised in the Melton Studs belonging to Mr. Musker. At Thetford, Norfolk, there are about 11,500 acres of land, a large part of which is available in the form of paddocks. The auxiliary stud at Westerham, Kent, covers an area of 350 acres. There are at these Melton Studs over 300 boxes, besides fifteen large sheds capable of holding over 100 animals. At the present moment the mares at the Melton Studs number 229. Including the stallions, there are over 270 thoroughbreds at the two stud farms, and by the end of the foaling season the total will be, in all probability, about 400.

* * * *

Captain Sam Van Leers of the quartermaster's corps of the United States Army has been in California for several weeks purchasing horses. He secured one car load in San Francisco, one at Santa Rosa, one at Winters, one and a half at Paso Robles and two and a half car loads at Stockton. The animals are being assembled at Roseville, and Capt. Van Leers expects to have about three hundred horses to ship to Fort Keogh, Montana, which is the remount ground for the twelve western states. He states that he finds much excellent stock in California suitable for army purposes and the owners are not asking unreasonable prices.

* * * *

The history of the horse business has been that at each low point in prices most every one breeding horses becomes anxious to get out of the business, says an exchange. They say there is no money in it, which is true, and that they will have nothing more to do with it—which is equally untrue. This dissatisfaction results in as many as can selling or ceasing to breed their mares. In a few years the supply gets down to normal again, the demand brings up the market, and many men buy in at the advanced prices. Probably the safest rule to follow when dealing with a market so fluctuating is to produce a rather steady supply of a product of the very highest grade. Those who jump in and out of the business are usually in, or getting out, when prices are low, and out, or getting in, when they are high. Men who study carefully and intelligently the type of horses demanded by the market and then work seriously to produce this, seldom go wrong or lose money.

* * * *

The market for polo ponies was strong in New York week before last. Alexander Brown, of Bryn Mawr, received $6,300 for six head, and Charles A. Munn $2,100 for four head sold under the hammer at Durland's Riding Academy. Mellow Blossom, in Mr. Brown's string, made $2,450 and Gray Wolf $1,400. These are unusual prices for polo mounts at auction.

* * * *

The New Zealand Referee of May 17th says: "Each of the harness races for trotters at the New Brighton Club's autumn meeting last week was won by an imported American horse, Madam Shaw being successful in the Autumn Handicap on Thursday, and Great Audubon winning the Brooklyn Handicap on Saturday."

Notes and News

The Suisun Stock Farm's sale will be held next Saturday.

If you want a high class two-year-old for little money this is the opportunity.

The sale will take place at Suisun, beginning at 2 o'clock in the afternoon. Twelve two-year-olds will be sold.

Lon Daniels, who is at the North Randall track with the Overland Stable, is letting his horses step along close to their speed and is ready for the races.

The pacer Braden Direct 2:01¾ is reported in grand form this year, having stepped a quarter at Overland Park, Denver, in flat 29 seconds.

Colorado Range (3) 2:08½ is training well at Overland Park, Denver. His owner, G. H. Estabrook, has not yet decided who will race him this campaign.

Spriggan 2:08¼ worked a mile in 2:11 before leaving California, but a quarter in 30 seconds seemed to be easy for him.

A. Fish is an Oklahoma horseman who is training Sun Fish, a green pacer by Cat Fish. His owner will take an awful chance if he starts Cat Fish on Friday.

The California State Agricultural Society offers two $500 purses for two-year-olds at the fair this year. One for trotters, the other for pacers. See the conditions in the advertisement on another page.

Marvin Childs rode his fastest mile of the season when he worked the little pacing filly, Sad Thoughts, by Bingen (3) 2:06¼, in 2:13¼ a few days ago over the Indianapolis track.

Frank Caton intends to retire permanently from racing affairs in Russia and return to his Cleveland home in August. He is now selling his horse holdings at public auction.

The Hollister Driving Club will hold a race meeting on the afternoon of July 16th. The classification committee expects numerous entries and close contests.

The United States Army has sent out a call for 62,000 horses and contractors must have their bids in next week. This should raise the price of horses of the cavalry and artillery types considerably.

E. R. Dunn's colt The Puzzler, by Cochato, dam Fanny Wiggins, is eligible to start in the Kentucky Futurity this year, as is also Sadie L. Porter's Sequoia by The Bondsman—Yutu.

T. W. Barstow of San Jose has moved his horses in training to the Santa Rosa track. Many favorable comments are heard about his pacer All McKinney when he has his workouts.

Fast time may be expected at the matinee of the Sonoma County Driving Club to be held at Santa Rosa tomorrow. A splendid program has been arranged and some of the circuit horses will start.

A four-day relay race for saddle horses will be one of the big features of the Solano County Fair at Dixon. This is one of the great drawing cards at the fairs in the northwest and nothing creates more enthusiasm or excitement.

The auction sale of horses at Hollister last Saturday, under the auspices of Shaw & Berberich, was well attended and the horses sold at good prices. On the good horses the bidding was spirited as several outside buyers were present. The top price paid for a single horse was $210.

Twenty-three horses for army purposes were purchased at Woodland last week by representatives of the French government. The prices paid were from $100 to $125 a head. The horses were shipped to Chandler, above Knights Landing, where the horses purchased in the Sacramento valley for the French army are being assembled.

Miss Loula Long, the Kansas City horsewoman, gave a horse show at Longview Farm Saturday, June 10th, the proceeds of which were to go to charity. There was a very large attendance and an excellent program. There were many classes for saddle horses and a number for horses in harness. The greatest interest was manifested when the stallion My Major Dare and his get were shown. The get shown were Midnight Dare, three years old, Arletha Dare, two years, Belle's Major, one year, and a weanling whose dam was Miss Bourbon. A number of two-year-olds were shown in the five gaited class and made a fine showing. The show netted several thousand dollars.

The San Francisco-California Driving Club will celebrate the Fourth of July with a good program of races at the Stadium, the city supervisors having appropriated several hundred dollars for premiums.

Bakersfield will give two harness races each day for three days at its fair to be held in October, with purses of a uniform value of $400 each. The program giving classes and all other particulars will be out next week.

Patchen Wilkes Stock Farm has purchased the seven-year-old pacing mare Myrtle Patch 2:20¼, by Joe Patchen 2:01¼, dam Ione 2:08½ (dam of Geers 2:11¼), by Moody, and will breed her to Peter Volo 2:02.

Good fields are certain in the different divisions of the Pacific Breeders' Futurity at Santa Rosa in August. There are no less than 62 colts and fillies now eligible to the two-year-old and thirty-four to the three-year-old stakes.

Peter Mac worked two miles at North Randall last week in 2:12½ and 2:11¼ and did it so handily, with the last quarters in :32½ and :32, that he is thought to be in shape for stiff work from now on. His previous fastest mile this year had been in 2:18.

Three purses of $500 each to be decided at the Santa Rosa meeting of the Pacific Coast Trotting Horse Breeders' Association will close for entry on Monday, July 3rd. They are the 2:09 trot, the 2:12 trot and the 2:10 pace. These races will all fill and will make interesting events.

You will have a chance to race your unstaked two-year-olds at the State Fair at Sacramento this year. Purses of $500 each are advertised for trotters and pacers of this age, conditions of which will be found among the advertisements on page 15 of this issue. Both races should fill well as there are many two-year-olds without stake engagements.

Ed Geers has been in the game so long that nearly all the turf scribes refer to him as "Pop" Geers. Yet he has a string of 16 horses in training at North Randall and rides many miles in a sulky each day. If a vote were taken as to the most popular trainer in the United States today Geers would win by a big majority.

Charles Berry has taken Mr. I. L. Borden's string of trotters and pacers to Santa Rosa and is getting them in shape for the races in which they are entered. The pacer Alta Barnato by Barney Barnato, and the trotter Major's By Guy by Major Dillon, are entered in the class races, and three colts that are entered in the Breeders' Futurity comprise the string. All are reported to be in good shape.

Exclusive of the large amounts to be raced for in the futurities and other stake races for two and three year olds, the associations that have thus far announced programs of harness races in California will give the following amounts in purses: Breeders at Santa Rosa $6000, Dixon $2400, California State Fair $9000, Fresno $3600, Hanford $3200, Bakersfield $2400, Riverside $4300. This makes a total of more than $30,000 for the trotters and pacers to compete for this year in California and there are several counties to hear from.

Natal Day (2) 2:13½, S. Christenson's good Wilbur Lou colt that won the two-year-old trotting divisions of the Pleasanton and State Fair futurities last year and was second in the same division of the Pacific Breeders' futurity, is doing well under Millard Sanders' tutelage at Pleasanton and will be ready to start in the three-year-old divisions of those stakes this year. Natal Day is eligible to the famous Kentucky Futurity this year, a stake that is worth about ten thousand dollars to the winner, and if no accident happens him will probably be a starter in that great event next October.

Dunne & Lowery, who own the $20,000 stake winner Spriggan 2:08¼ that they purchased at auction for $700 before he won the big stake, have another auction trotter that cost them $240 at Chas. DeRyder's sale that may prove another Spriggan. This is the bay five-year-old stallion El Volante S. 57089, by El Volante 2:13¼ the son of Zombro that won the Occident Stake in 1909. The dam of El Volante S. is Seville S. by Strathway, second dam Simmone by Simmons, third dam Mi Lidy by Baron Wilkes, fourth dam Lady Gay by Mambrino Patchen, fifth dam by the thoroughbred Capt. Gay, a son of Berthune, and the next dam by Gano, son of American Eclipse. This is a royally bred horse, and his sire El Volante was one of the best bred sons of Zombro. El Volante S. had badly contracted feet when Dunn & Lowery bought him, but they sent him down to their ranch and he has now grown a new set of hoofs and his feet seem perfect. He is driven on the road to town, a distance of seven miles every day, is unshod and as Mr. Lowery says, has feet "like a good cattle horse." He is a square trotter with lots of natural speed, a good level head and no faults so far as known. Lowery says that if El Volante S. does not develop into a very fast trotter he is sailing under false colors.

Exposition, the gelding which James Gethin picked up for a song and sold to Miss Loula Long of Kansas City during the P.-P. I. E. last year, is showing well for that lady at the spring horse shows in Kansas and Missouri, and has several ribbons to his credit already.

Mr. S. S. Bailey has returned to Pleasanton, and finding his horses in good condition is taking great pleasure in seeing them taking their work. O. U. C. is working nicely and has all his old time speed. He should be a good horse in his class this year.

Will Durfee reached North Randall last week with eight head: Baby Doll 2:10¼, Rayo De Oro 2:07¼, Contention B. 2:10, Esperanza 2:09, Virginia Barnette 2:08¼, White Sox 2:05¼, Zomrect 2:12¼, and Lady Arabella, a green trotter, by Carlokin 2:07½. L. G. Baker and E. Dunn, also from Los Angeles, arrived at the same time. Baker has two—Maggie M. 2:12¼ by Carlokin, and a green trotter by Zombro 2:11. The Dunn stable consists of Virginia Humbug (2) 2:18¾, and two green ones.

Riverside County Fair will be held at Riverside from October 10th to 14th inclusive. The trotting events advertised are: 2:20 class $1000, 2:14 class $400, 2:30 class $300, free-for-all $500 and $50 added for each starter over four. For the pacers there is $1000 for the 2:18 class, $300 for the 2:14 class, $300 for the 2:23 class and $500 for the free-for-all with $50 added for each starter over four. There will also be a matinee race each day for trophies and they will be worth racing for. The running horses are liberally provided for with most of the races at short distances, but $500 is hung up for a mile run and should bring out a good field of horses. The entire program is in our advertising columns today. Entries will close Tuesday, August 1st.

With a view to creating added interest in saddle-bred foals and to stimulate their registration the American Saddle Horse Breeders' Association is offering at various county fairs a purse of $50 for 1916 foals registered in the American Saddle Horse Register. The money is to be divided into premiums of $25 for first, $15 for second and $10 for third. Conditions are that not less than 10 entries show. The American Saddle Horse Breeders' Association must be furnished with a full list of the entries and upon proper certification of the awards the checks will be mailed to the owners of winning foals. The competition is limited to foals bred in the county in which the fair is held. All communications regarding the county fair specials should be addressed to Secretary R. H. Lillard, Louisville, Ky.

Raise More Horses.

Although something like eight hundred thousand horses have been shipped abroad since the beginning of the European war, the statistics issued by our government do not show that the average price has increased since the beginning of the terrible conflict, says American Sportsman. The price of the heavy drafter, which is now being bred on a tremendous scale, especially in the Middle West, should not be materially affected, but it is certain that the light harness horse will command a higher figure within the next two or three years, despite the fact that the motor-driven vehicle is now being used on an enormous scale. So long as the war lasts the agents of the foreign governments will continue to comb North America for horses suitable for army purposes, and even when peace is declared the demand should not lessen until Europe is supplied with breeding stock, which we will surely furnish.

The situation is keenly appreciated by the Canadian Government, and the officials of the Canadian Live Stock Records are sending the following letter broadcast over the Dominion:

The breeding of horses has become a matter of prime necessity. Before the war commenced there was a slump in prices, owing to financial conditions and the inroads of motor power that led to a cessation of breeding. Then the war came, with its demand for certain classes. Following the previous decline in the demand many farmers sacrificed their mares. The result is a serious depletion and a sure scarcity.

The demand is increasing and will continue to increase long after peace has been declared. If Canada is to take advantage of the situation, the time to start is now. There will be an assured market demand for foals at weaning time from mares bred now.

Not only has the wastage by reason of war been enormous, but in all the belligerent countries, not omitting Great Britain, there has either been a partial stoppage or a whole stoppage of breeding by reason of the scarcity of labor, the disturbed conditions, or entire devastation.

Whether the war lasts or ceases, there must continue an undiminished demand for horses. When peace comes there will be a long period of replenishment. Then quality, as much, and even more than quantity, will be required. Hence the evident call to every Canadian farmer is to breed, and to breed to the best available, to utilize his mares for production, and to secure the immediate services of the best pure bred sire of type in his neighborhood. It will pay.

This appeal is addressed with the endorsement of the various horse breeders' associations of Canada, which urge decisive action by the farmers of Canada to remedy the serious situation that has arisen.

Stock Breeders' Page

The Howard Cattle Company is advertising 60 young Shorthorn Bulls for sale from the Paicines Ranch herd. These bulls are bred in the best lines and many high class individuals are among them. They are from 18 months to 2½ years of age ,and are sired by the farm's prize bulls and from the best cows of the famous herd established by the late W. D. M. Howard in 1857, and which has been maintained at a high standard ever since. The blue ribbons won by the Howard cattle at the many district and State Fairs held on this coast can only be reckoned by the hundreds and those who want young Shorthorn bulls to improve the quality of their grade of pure bred cattle, will find among the 60 bulls offered just the animals they are looking for. A letter to David J. Stollery, at 320 Sharon Building, 35 New Montgomery street, San Francisco, will bring full information as to the breeding of these young bulls and the prices asked for them.

Big Money for Shorthorns.

At the Carpenter & Ross sale of shorthorns at Mansfield, Ohio, June 9th, ten bulls sold at an average of $1370, and forty-five females averaged $933. Lord Avondale, a son of Avondale, sold for $5,000 after lively bidding and went to the nod of J. C. Andrews, West Point, Indiana. Maxwalton Commander, a noted Shorthorn champion bull, was sold at private sale the week before for $7,000. He is now the property of F. A. Gillespie, Tusla, Oklahoma.

The Shorthorns consigned to the auction ring at Wheaton, Illinois, by Thos. Stanton, brought $30,880 for twenty-five head, an average of $1,160. This included the bull Field Marshall, that brought $3,775.

Frank Edwards of Oakdale Farm, Tiffin, Ohio, sold 41 head at auction for $25,635, an average of $638. Oakdale-Rosewood, by Maxwalton Sultan, brought $1,300, the top price of this sale, and Meadow Queen, a cow by the champion Meadow King, was knocked down to N. R. Rundell of Hurley, South Dakota, for $1,025.

A mixed lot of Shorthorns from different breeders were sold at Ontario, Canada, June 10th, and the average was a little over $400 for 70 head.

Storing Meats in England.

That the larders of central Europe are bare is everybody's secret. Termination of the war would open an extensive, if temporary, market for American hog product. That a coterie of speculators, American and British, is engaged in accumulating stocks is openly asserted by English newspapers which are protesting volubly against the practice while the public is charged inflated prices. There is said to be in cold storage at Liverpool and Bootle, approximately 80,000 to 90,000 boxes of American bacon each containing 700 pounds, worth at current English prices the equivalent of $153.60. The total is about 2,500,000 pounds sterling, or about $12,500,000. Each week adds to the accumulation as between 20,000,000 and 25,000,000 pounds of American hog product is being sent from New York weekly and exports are limited only by steamer space. That the hoarding process is to continue is indicated by the fact that speculators are paying for empty storage space in England.

Various construction is being placed on this accumulation. Some people in the trade assert that the British government has an interest, others that the holders, anticipating peace, intend to be in readiness to profit by the needs of that part of Europe now inaccessible the moment access is possible. The American hog grower is primarily concerned in the probable effect such an accumulation is likely to have on values. Liverpool believes that if the hoard was thrown on the English market Chicago hog values would experience a serious slump. This might be possible if this country was full of marketable hogs and the walls of packers' warehouses were bulging with stocks. Neither condition exists, domestic consumption is at flood tide and holders of any accumulation in English storage are doubtless conscious of the security of their position.—Live Stock World.

Decrease in Number of Horses and Mules.

The statistical review of farm animals of California as prepared by statistician George Robertson of the State Board of Agriculture has just gone to press. It covers the year 1915. During that year there has been no change of importance in the number of farm animals. The number of horses shows a falling off of from 503,000 in 1914 to 493,000 in 1915, but the average value remains about the same.

The number of purebred certificated stallions and mares imported in 1914 for breeding purposes amounted to 1,210, of which number 524 were Percherons and 391 Belgian Draft; but the total number imported in 1915 amounted to only 301.

The number of mules also shows a decline from 74,000 in 1914 to 70,000 in 1915, and the average values per head declined from $120 to $110.

A Record-Breaking Holstein Sale.

The most sensational Holstein-Friesian auction in the history of the breed was held on June 7th in Detroit, Mich., when the record-breaking average of $1,119.65 was made on 137 head, and a bull 7 months old sold for $20,000, says Breeder's Gazette. The 121 females averaged $829.90, and the 16 bulls $3,310.95. A. W. Green, Middlefield, O., was the purchaser of the $20,000 calf—King Champion Rag Apple, sired by Rag Apple Korndyke 8th, and out of Lady Pontiac Johanna. A more distinguished Holstein pedigree than this calf's has probably never been written. The price at which he sold is the highest ever recorded at an auction for an animal of the breed, with one exception, which was a tie. It will be remembered that at a combination sale held in Chicago June 4-5, 1914, the bull calf King Segis Pontiac Chicago sold for $20,000.

The breeders of Michigan decided to hold a national sale and arranged with the veteran Holstein breeder H. A. Moyer, Syracuse, N. Y., to get together 150 head of the best Holsteins available. Mr. Moyer spent three months inspecting more than 50 herds. In 30 herds he found from one to a dozen individuals of the kind desired. These came from as far west as Spokane, Wash., and from as far east as Massachusetts. The selling during the two days was done too slowly to give a fair chance to more than 140 of the 183 animals that were finally selected; and preference in the sale ring was given to those breeders who had shipped their animals from afar and would otherwise be compelled to return them to their herds at considerable expense. Every animal offered was sold under a guarantee of "satisfaction or your money back." More than 1,200 persons were counted seated and standing in the semi-circle that spread out from the sale ring.

Meeting of the Holstein Association.

The thirty-first annual meeting of the Holstein-Friesian Association of America was held on June 7th in Detroit.

The report of the treasurer, Wing R. Smith, Syracuse, N. Y., showed total cash receipts for the year of upwards of $218,000, and disbursements of nearly $173,000. The balance on hand, including reserve and cash accounts on April 30, was about $215,000, in addition to which there was a bond investment of $52,651.25.

The report of the Committee on Special Prizes at Fairs showed that because of foot-and-mouth disease, which had prohibited the usual exhibits, no money had been paid out during the year, except at the Panama-Pacific, where the full prize list was offered and paid, amounting to $1,955.

The report of Secretary F. L. Houghton, Brattleboro, Vt., indicated the largest annual business ever transacted. It showed an accession to membership during the year of 1,260 life members. The deaths of 64 members were reported. Registrations of cattle to the number of 72,665 were entered upon the herd register and 68,766 transfers were made. The total year's income from these sources was $216,099.14. The balance after paying all expenses was $119,314.84.

In speaking of the advanced register, President Aitken stated that a mature cow, to be a champion, must now produce more than 44.42 pounds of butter in 7 days and more than 1,506 pounds in a year. A two-year-old cow must produce more than 31.4 pounds of butter in 7 days and 1,200 pounds in a year to be a champion. He stated that entries in the advanced registry for the year exceeded 12,000.

The report of the Superintendent of Advanced Registry, M. H. Gardner, Delavan, Wis., showed 12,882 cows under test during the year for milk and butter yields, averaging 408 pounds of milk and 14.40 pounds of butterfat in 7 days. The largest butter record of the year was that of a cow owned in New York state, Ormsby Jane Segis Aaggie, with a yield of 35.53 pounds of butterfat in 7 days. The largest record for one year was made by a cow owned in Minnesota, Duchess Skylark Ormsby, her yield being a world's record for all breeds of 1,205.09 pounds of butterfat.

Holstein Cows at Bridgford Farm.

On our title page today is a picture of four Holstein-Friesian cows now in the dairy of the Bridgford Company near Knightsen, Contra Costa county. About thirty cows of this breed are milked at this farm daily and the milk shipped to Oakland, where the farm has a distributing depot with a largely increasing patronage. The Bridgford Farm is located on reclaimed land, protected by a splendid levee, and the alfalfa fields furnish feed and to spare for all the stock on the farm. Fine saddle horses and purebred Shropshire sheep are also bred and raised on this farm which contains 340 acres of land in a high state of cultivation.

Jerseys Make Average of $641.

At Coopersburg, Pa., May 30th, T. S. Cooper & Sons sold 126 head of Jersey cattle at an average of $641. Eight young bulls brought $2,165; 75 cows in milk averaged $806, and 43 heifers averaged $423. T. DeWitt Cuyler, owner of White Horse Farm, Paoli, Pa., who has been a regular patron of Linden Grove auctions for the past several years, was one of the most extensive bidders and buyers. He obtained 22 females at a total cost of $17,000. Among them were two of the good daughters of Oxford You'll Do at $1,800 each.

Big Drafters Always in Demand.

California has never had the reputation of raising many of the heavy draft animals weighing from 1500 to 2000 pounds such as one sees in the New York and Chicago horse markets and which bring big prices whenever offered if they are sound and suitable for immediate work. The draft horse weighing from 1500 down to 1200 we have with us always and this ordinary horse brings an ordinary price. The fact that the really heavy drafter always brings a good price, and the further fact that San Francisco's leading draying firms are compelled to go to the other side of the Rocky Mountains for much of their heavy stock, should lead farmers and horse breeders to go in a little more for class and size in draft horses. That there is a real need for more and better horse power on the farms of the country, both east and west, is asserted by many persons who pay close attention to horse markets and to the status of the horse breeding business.

Better farm horses mean better care of crops as well as greater profits from colts. According to Dean C. F. Curtiss, of the Iowa Agricultural College, the great increase in production in Iowa indicated by the last census figures is directly attributable to the increase in horse power on Iowa farms, that state being noted for the number and quality of its horses.

As to the kind of horse for the farmer to raise, Professor Gordon True, of the University Farm school at Davis says: "The farmer should raise the market horse and the market horse should, up to the time of his sale, do the work of the farm. It is a mistake to consider that there are two types of heavy horses—one for farm work and the other for market. The farmer should aim to produce from his work stock the kind of horses the market demands, and the kind of mares that can produce market stock should do the farm work. There is no reason for trying to maintain an idle breeding band of mares. The best pure bred horses from the European countries are grown from mares that work every day of their lives on small farms. Our own market animals should be grown in the same way."

Rich Prizes for Draft Geldings and Grade Mares.

At the International Live Stock Exposition at Chicago this year, among other rich prizes for draft stock there will be offered many for geldings and grade mares. The geldings may be purebreds, crossbreds or grades, but only grade mares are eligible to show in these classes. The classification as prepared by Superintendent R. B. Ogilvie is as follows:

Draft gelding or grade draft mares, four years old or over, shown to halter—$60, $75, $40, $30, $20, $15, $10, $5. Draft gelding or grade mare, three years and under four, shown to halter—$50, $40, $35, $30, $20, $15, $10, $5. Draft gelding or grade draft mare, two years and under three, shown to halter—$50, $40, $35, $30, $20, $15, $10, $5. Pair of draft geldings or grade draft mares weighing not less than 3,600 pounds, shown to wagon—$60, $50, $40, $30, $20, $10. Pair of draft geldings or grade draft mares weighing not less than 3,200 pounds nor more than 3,600 pounds, shown to wagon—$50, $40, $35, $30, $20, $15, $10. Champion draft gelding or grade draft mare, any age, shown to halter—sterling silver valued at $75. Reserve champion draft gelding or grade draft mare, any age, shown to halter—ribbon. Three dreft horses abreast shown to wagon—$75, $50, $30. Four-horse team, wheelers weighing from 3,200 pounds to 3,600 pounds, shown to wagon—$125, $100, $75. Four-horse team, wheelers weighing more than 4,000 pounds, shown to wagon—$125, $100, $75. Six-horse team, wheelers weighing not less than 4,000 pounds, shown to wagon—$150, $125, $100. If the mare or gelding winning the championship is sired by a Percheron stallion, Fred Pabst, Oconomowoc, Wis., will add $100 in plate to the prize offered; if by a Belgian, J. H. Crouch & Son, Lafayette, Ind., will add $100 in plate; if by a Shire, Trumans' Pioneer Stud Farm, Bushnell, Ill., will add $100 in plate, and if by a Clydesdale, Thomas E. Wilson, Union Stock Yards, Chicago, Ill., will add $100 in plate.

Sheep Raising Pays.

Frank Kleinheinz, Wisconsin sheep expert, asserts that sheep raising pays and advances these reasons:

A flock of sheep
Requires a limited amount of labor.
Calls for a relatively small amount of capital for breeding stock and buildings.
Makes good use of rough and hilly waste land.
Helps to clear the land and kill weeds.
Builds and keeps up the fertility of the soil.
Returns a good profit when properly handled
Can be started on a small scale and be cared for by boys.
Fits in well with other classes of live stock.
Reasons why sheep do not pay are:
Dogs.
Neglect.
Infected pastures.
Use of inferior stock.
Inadequate fencing.
And the additional and all important reason that successful sheep raising without shepherding is impossible.

———o———

On the same acreage two cows fed silage can be kept at the cost of one cow fed hay or other roughage. In other words, good land will support twice as many cows with a silo as without it, but to get best results in feeding silage must be properly balanced with alfalfa or clover.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

BACK FROM BEAR HUNT IN THE WILDS OF ALASKA.

From the ice and snow of Kodiak Island, Alaska, R. Curtis Baird, a local sportsman, has returned from a successful bear hunt. Leaving here in early April, Baird, accompanied by Leslie Simpson of Berkeley, a well-known trap shot, set off for the distant wilds and had one grand exciting trip.

Three bears, the largest standing eight feet four inches long, and the smallest over six feet, were shot down by Baird, and the skins were brought home as trophies of the chase. Extremely cold weather was experienced during the two months the sportsmen were out hunting, and they were forced to undergo many hardships. Baird has been giving his friends a thrill by telling stories of his experience.

Simpson did not return with Baird, but remained on the island to have some additional sport with his gun. Simpson has had a deal of experience in hunting big game. For the last seventeen years or so he has been located in South Africa. Before that time he had established a reputation around here as a wing shot.

Another hunter well known here who is on Kodiak Island is Bill Hillis. He has a moving picture outfit with him and is endeavoring to get some action pictures of bears. If successful he will go on a lecture tour with the pictures. Hillis has hunted extensively in all parts of the West and has killed every description of big game.

SOUTHERN CALIFORNIA ROD CLUB.

Los Angeles, Cal.—Following is a summary of the casting records of the Southern California Rod and Reed Club, as revised to date:

Light tackle dry fly accuracy—Charles Van Horn, December 12, 1915, 99 9-15 per cent.

Light tackle accuracy fly—Charles Van Horn, February 13, 1916, 99 4-15 per cent.

Light tackle distance fly—E. J. Kennedy, December 12, 1915, 87 feet 6 inches.

Roll fly—E. J. Kennedy, October 10, 1915, 71 feet.

Heavy tackle dry fly accuracy—E. J. Kennedy, May 7, 1916, 99 1-5 per cent.

Heavy tackle accuracy fly—Charles Van Horn, May 7, 1916, 99 1-15 per cent.

Heavy tackle distance fly—E. J. Kennedy, March 12, 1916, 90 feet 6 inches.

Quarter-ounce accuracy bait—Oscar Lane, April 9, 1916, 99 per cent.

Quarter-ounce distance bait, average of five casts—Oscar Lane, April 9, 1916, 159 feet 8 inches.

Quarter-ounce distance bait, longest single cast—Oscar Lane, April 9, 1916, 168 feet.

Half-ounce accuracy bait—Oscar Lane, December 26, 1914, 98.8 per cent.

Half-ounce distance bait, average of five casts—Oscar Lane, May 9, 1915, 216 feet 1-5 inch.

Half-ounce distance bait, longest single cast—Oscar Lane, May 9, 1915, 237 feet 10 inches.

Two and one-half ounce distance bait, average of five casts—Charles Garr, July 21, 1912, 276 feet.

Two and one-half ounce distance bait, longest single cast—Charles Garr, July 21, 1912, 301 feet 6 inches.

Two and one-half ounce accuracy bait—Oscar Lane, April 11, 1915, 99 1-5 per cent.

PLEASURE IN ROD AND GUN.

Every time some friend takes a tourist or newcomer—or even one who never has had enough interest taken in him to show the fun he has been missing—another is added to the list.

This is a form of "missionary work" that is a duty devolving upon each sportsman—the duty of aiding those of lesser experience to get all there is out of life by learning to love the streams, the lakes, the mountains and valleys. None without the inducement offered by game to hunt or fish to catch can ever hope to attain the same deep and lasting affection for the great outdoors. Why is it that the shooting of a few birds, or even the creeling of a few fish after the hardest kind of a day's work, leaves a man—or woman—so completely contented and at peace with all the world, remains something of a problem even to those who have pondered it the most. But the fact remains, and explains, perhaps, why hunters and fishermen seem to get so much more recreation out of their vacations than those unfortunates who know not the lure of the rod and gun.

MAKING IT HOT FOR SPARROWS.

The campaign of extermination launched against the English sparrow by the Fish and Game Commission is going quietly forward in San Diego and Riverside counties, particularly. It is argued that the County Supervisors can better afford to pay a price of 15 cents per bird to clean out the sparrow when scarce than 3 cents when another year had multiplied its numbers; besides which, men will not work on a lesser reward with birds still scarce. A joint campaign between Riverside city and county is following the urgent appeal made to the Supervisors by Edmund Jaeger of Palm Springs, where a colony has given full and complete demonstration of the evil features charged against them by bird students—noisy, filthy, quarrelsome, driving out all song birds; of much less value in destroying noxious insects than the species it replaces. Sparrows readily learn to eat fruit and develop about all the vicious habits a bird can acquire, with scarcely a redeeming feature. Small wonder that sportsmen and Audubon societies on this point, at least, are in entire harmony.

San Diego already has accomplished a great deal toward cleaning up the sparrows. Several colonies have been exterminated.

OREGON TO HAVE FIELD TRIAL.

Oregon will once more enter the field trial game, having recently perfected a field trial club composed of prominent sportsmen of Portland and vicinity. Our date was set, the trials commencing September 17. This will be the week following the Washington state trials, thus giving an opportunity for the participants in the Washington trials to attend our meet, and we hope for a number of entries from there. We will run an open derby and an all-age stake. Our birds are principally Chinese pheasants, but work on any kind of game birds counts. For information address the secretary at 401 Selling Building, Portland, Ore.

L. A. WHEELER, Sec'y.

‡ ‡ ‡

Ty Cobb, the famous baseball player, according to report, is to become a trainer of bird dogs, it being claimed he knows how to handle them as well as he does base hits. The Georgia Peach, as he is often called, has become part owner of a hunting preserve of 6,000 acres along the Savannah River, in Georgia, in company with E. C. Rogers, John Philip Sousa Jr. and several other sportsmen, which they expect to stock with game and go there every winter to hunt, and to the famous Detroit center fielder has been assigned the task of training the dogs in preparation for the hunting season.

SEATTLE ANGLERS TO SAVE FISH.

Fearing that thousands of trout and other game will be killed when the canal between Lake Union and Lake Washington is pumped out to build the north wall, members of the Seattle Fly and Bait Casting Club will offer their services to County Game Warden Rief to have the fish seined out of the canal and liberated in Lake Washington. This decision was reached at a meeting of the club in the Press Club theater.

When the water is pumped out the fish will be trapped. As the water is lowered the club members believe the fish can be seined and quickly transplanted to Lake Washington.

Suckers, chubs and the hoi polloi of fishdom will be left to their fate, while the aristocratic trout and bass will be rescued.

The club planned to give an excursion last Sunday to Berlin, near Skyhomish . A special train was run to carry the fishermen and their families and stops were made at Grotto and Index for shipping members of the party streams near those towns.

The first prize of the May membership contest, as a result of which forty-one new members have been secured, was won by Thomas Blanchard, who was given a rod and a set of thermos bottles. The second prize, a pair of rubber waders, went to B. B. Farr, while the third prize, a fly rod, was won by C. D. Thomas.

Oregon Fishing Licenses Lag.—The late season experienced this spring held back other crops besides the rose crop this year, as was ascertained at the meeting of the Oregon Fish and Game Commission.

The fishing license crop, for instance.

The income up to date from the sale of fishing licenses is $6000 less than it was last year. This is attributed to the high water and cold weather in May, which made fishing rather poor.

With the advance of the season, however, the Commission believes that the number of licenses taken out will be restored to normal.

It was decided by the Commission at its meeting that an exhibit should be made at the State Fair this fall. Elk from Wallowa county, live fish, pheasants and other animals and birds will be placed in the exhibit.

Material improvements were ordered for the McKenzie River hatchery.

Carey M. Ramsby has been appointed special deputy game warden during the tourist season for Klamath county.

Drink Jackson's Napa Soda.

MAKE GAME LAWS MORE RESTRICTIVE.

"Unless game laws are made more restrictive in California, a comparatively few years will find our wild life resources as limited as now obtains in some Eastern States. We must cut down limits further still, or sportsmen will have only fine hunts, and no game for their vacations."

Such is the statement of Dr. Joseph Grinnell, the bird expert of the University of California. Dr. Grinnell has just returned from a two months' trip throughout the East and he has had opportunity to observe conditions at first hand. His primary work was the study of collections of birds taken in California years before the State had a corps of scientists of its own. Many of these vertebrates are now extinct and it is only by their study that a complete understanding of present species may be had.

"Many hunters told me," said Dr. Grinnell, "that game in the Adirondacks, once the greatest hunting ground in this country, is now so scarce that it is unusual to bay a limit. Of all the Eastern States that have game areas Maine seems to excel in both quantity of game and co-operation of citizens.

"In Maine, game is looked on as an asset. Thousands of tourists go into the State each year to hunt, and the people have come to look upon game with a business eye. Needless to say there is little poaching.

"From all that I have seen I am convinced that California is leading in the matter of conservation. Our great areas make sufficient protection difficult, but the educational system which we have inaugurated is already showing its effect. But still we must cut down limits and protect young game, else we will find ourselves in the predicament of the Adirondacks."

THE KENNEL FOR WARM WEATHER.

The first step (and perhaps the most important) in the building of warm weather kennels is the selection of a site.

Shade, drainage and exposure must all be considered. It will not do to expect dogs to swelter in the hot sun all day when men have to seek the refuge of shady piazzas. Deciduous trees which filter the rays of the sun and temper the heat without causing dampness form the most desirable sort of protection in this respect. It will do no harm if the building itself lies within the shadow of a tree for an hour or so in the afternoon; at any rate there must positively be a shaded area in the enclosure.

A gently sloping hill is desirable because drainage is facilitated thereby, and this is a most important item. Care must, however, be taken to avoid damp hollows where the mist collects at night, for such a location is as fatal to the health of a dog as to a man's.

The best possible construction calls for a roof of tile, lined with felt. This is expensive, to be sure, and where small individual kennels are employed is hardly essential. Don't use tin! Wood is not bad, provided it is heavily painted with some mixture which will not absorb heat excessively. In case wood is used, a very good scheme is to make the roof double with an air circulation chamber between. Do not forget that it is just as important to have gutters and water-vents on the kennel as on the house to avoid leaks and dampness inside.

Concrete is by all odds the best material for the floors of the kennel because it is easiest kept clean and does not become chilled like stone. Wood should be avoided by all means, as it is impossible to keep absolutely clean and aseptic a kennel having a wooden floor. It is a good scheme to sprinkle clean sawdust on the floor, to be swept up at night.

Puppies are best kept by themselves while being raised. For this purpose an outdoor yard with small, movable kennels is excellent.

Coarse grained pottery will keep the drinking water much cooler than do iron or porcelain bowls, because the porous ware permits a gradual percolation and evaporation on the outside. This is especially noticeable if there is a slight breeze . By all means be sure the drinking vessels hold enough and are noncapsizable.

NEW HANDICAP SYSTEM.

Over in the Middle West, trapshooting clubs are giving a new handicap system a trial, which so far has proved satisfactory. The system is simple and works automatically once it is started. By way of example—we will suppose five men are shooting a match in 20-target events. They all start at 16 yards. Thereafter each man's handicap in yards is governed by the score he makes in the preceding event. A man breaking 18 from the 16-yard mark in the first event, shoots from the 18-yard mark in the second event. Should he break 20 in the second event from the 18-yard mark, he shoots from 20 yards in the third event. Should he break 16 from the 20 yards in the third event, he shoots from the 16-yard in the fourth event. Breaking 19 in the fourth event, he shoots from the 19-yard mark in the fifth event. Suppose he breaks 17 in the fifth event, his total score would be 90x100. The advantage of this system is its simplicity. No extra work is necessary by the secretary or handicap committee. Every man knows where he shoots the next event and promptly takes his proper place when called upon to shoot. This system can also be worked in 15 and 25-target events, on the same basis as above outlined. A man breaking 15x15 would shoot from the 20-yard mark in the next event, as would a man breaking 25x25.

Many Recruits Breaking Into Trap-Shooting

BEGINNERS' TOURNAMENTS THROUGHOUT THE COUNTRY ARE PROVING POPULAR

Golden Gate Club.—Ideal weather conditions existed Sunday for the monthly shoot of the Golden Gate Gun Club on the Alameda grounds. E. Holle achieved the distinction of breaking 49 out of 50 and led the amateurs. Dick Reed set up a similar score and topped the professionals.

Others were close behind the leaders. Toney Prior was there with 48, Andy Flickinger, W. J. Terry, F. K. Burnham and Lem Hawxhurst 47 apiece. It was some of the best shooting of the season. Miss Meyers busted 41 in competing with the men shooters. The scores were as follows:

Events—	20	20	10	Total
H. C. Peet	14	16	9	39
Dr. Topham	18	18	9	45
H. Stelling	18	17	8	43
E. Holle	19	20	10	49
A. M. Gearhart	8	9	7	24
*H. Truscott	12	8	5	25
*W. Stadfeldt	13	13	6	32
J. H. Miller	17	13	7	32
D .D. Jones (20-gauge)	14	16	5	35
A. E. Stoneberger	17	11	10	38
F. K. Burnham	19	18	10	47
C. A. Merrill	20	16	9	45
Capt. Du Bray	14	14	7	35
R. E. McGill	16	17	7	40

Seattle Association.—The clay birds certainly were ome "twisters" out on the Harbor Island grounds une 11. The wind caught perfect flying targets and ut up all kinds of capers with them, putting curves n the same that would puzzle some of the big league igh percentage hitters.

Fred Landwehr furnished the high amateur score or the day both in the fifty-target bunch and also the undred-bird race, with scores of forty-four and ighty-eight. L. H. Reid shot the high professional core in the same events with forty-eight and ninety-ve to his credit.

Bill Hardy was on the grounds for the first time is year and although he has not "trapshot" for ome time showed that he could still come back. ouglas Huntington appeared for the first time since rly in the season, coming out to break in a new gun.

The McKelvey class trophy race resulted in Hugh leming being high in class A, J. V. Hough in class and "Dok" Hager first in the D class. Several ooters in each class now have two wints to their edit and by a little work some one man in his class n step out and grab the trophy. It takes three ins to become the owner of the cup.

All Wednesday shoots will start hereafter at 4 p. m. stead of 2 p. m. The scores, at 50 targets:—

*L. H. Reid 48, *D. Rhodes 45, Fred Landwehr 44, S. Searle 43, Tom Wilkes 43, Hugh Fleming 41, V. Hough 41, C. E. McKelvey 40, G. A. Canuck 40, W. Brehm 37, J. H. Wilman 33, William Hardy 33, R. Hager 23.

At 100 targets—*L. H. Reid 95, *D. Rhodes 90, Fred ndwehr 88, Hugh Fleming 86, Tom Wilkes 81, C. E. Kelvey 80, L. S. McIntyre 25, Douglas Huntington (*Professionals.)

* * * *

Tacoma Club.—The Tacoma Gun Club held its ni-monthly shoot at Manito June 11, when J. C. nsen proved to be the shooting star by winning th the Mellinger medal and the Majestic Cafe phy. J. Cooper won the White Flyer fob. Griffin, les, Dague and Young all tied for high average on Everding diamond pin. Bales and Dague tied for h average on the Dupont Powder Company trophy. ung won the Hercules Powder Company trophy.

COMING REGISTERED TOURNAMENTS.

California.

Los Angeles, July 3, 4—Vernon Gun Club.

Eureka, July 4—Eureka Blue Rock Club, H. A. Hine, President.

Oregon.

Portland, July 10—Portland Club, Frank Templeton, Secretary.

Portland, Sept. 12, 13, 14—Pacific Coast Handicap.

Washington.

Seattle, July 4—"Old Policy," Green Lake Gun Club, W. C. Smith, Secretary

Tacoma, July 18, 19, 20, 21—Pacific Indians, F. C. Riehl, Secretary.

The challenge cup was not shot for on account of the present holder, A. Z. Smith, not being on the grounds. There were no spoons won, as no one was able to break 25 straight. Bales and Jensen each broke 24. The following scores were made for the Mellinger medal out of 50 birds:—

	Broke.	Hdcp.	Ttl.
Dague	44	5	49
Jensen	40	9	49
Young	41	7	48
J. Cooper	46	1	47
Mellinger	29	16	45
Bales	41	5	46
Griffin	41	5	46
Christian	25	16	41

Following scores made out of 100 birds for Majestic Cafe trophy:—

	Broke.	Hdcp.	Ttl.
Jensen	85	10	95
J. Cooper	91	1	92
Young	80	11	91
Dague	86	4	90
Griffin	80	10	90
Bales	87	2	89
Mellinger	57	31	88
Christian	50	32	82

* * * *

Green Lake Club.—The usual large crowd was in attendance June 11th at the weekly shoot of the Green Lake Gun Club, and while a strong north wind kept the targets jumping in all directions, some fine scores were made.

L .S. Barnes repeated his performance of last week by getting 49 out of 50, and incidentally carried off high honors for the day. J. L. King, a visitor from Juneau, Alaska ,tied with W. H. Carsten and W. C. Smith for second place ,each getting 47 out of 50. Mr. King has every reason to feel proud of his score, made on strange grounds and with a strong wind blowing. C. R. Sydman and H. S. Gibson also showed up well, shooting with the club for the first time.

The scores, 50 targets:—

L. S. Barnes 49, J. H. King 47, W. H. Carsten 47, W. C. Smith 47, *eGorge H. Garrison 46, C. R. Sydman 44, Dr. King 43, H. S. Gibson 43, Hi Follrich 43, G. Scripture 42, Jack Converse 42, E. K. Van Vleck 42, S. A. Martin 42, George H. Young 41, George B. Baker 41, George Edling 40, F. E. Bronson 39, M. A. Rosenfield 37, Fred Pries 36, E. Chantrell 33, J. R. Gibson 33, S. E. Bacon 32, E. Bauer 31, H. M. Carver 30, George O. Colwell 30, W. M. Elliott 29, W. H. Giezentanner 25, D. Fortin 21, George D. Horst 20.

W. M. Elliott and S. E. Bacon shot 20-gauge guns.

* * * *

Beginners' Shoots.—Throughout the month Beginners' Shoots have been staged in all sections of the country. Anyone who has not shot at 500 targets up to May first is eligible to go into the contests and members of the clubs have induced their friends to try their hands and eyes at the "sport alluring." The Golden Gate Club is going to take its turn at the Alameda grounds on Sunday in promoting one of the events. A big crowd is expected to turn up at the traps and assist the beginners. Trap shooting is one sport where the newcomer is given all the assistance and advice gained by the experience of the old-timers.

* * * *

Vernon Club.—The George T. Cline trophy, a diamond medal, which has been shot for in fifty-bird contests at yardage handicaps for several months, was won for the third time Sunday at the Vernon Gun Club by Mrs. C. E. Groat, the amateur champion woman trap shooter.

In the fifty-bird event the amazon shooter tied with Dr. L. M. Packard and William Browner, each with a score of 48 50.

The tie was shot off at twenty-five birds, Mrs. Groat firing from seventeen yards, Packard from twenty-two and Brawner from eighteen. Mrs. Groat won out, breaking 24 birds. Packard squelched 23 and Brawner killed 23.

By winning the third leg on the medal Mrs. Groat gained the permanent possession of the trophy.

Fred Kimble took high honors in the William H. Hoegee handicap shoot, hanging up a score of 48x50. Stanton Bruner was runner-up in this event, breaking forty-seven targets.

Following these events the twenty-gauge competition was put on, with C. W. Fish and C. E. Groat tying with scores of 23x25. The scores follow:—

Shooter—	Hdcp. yds.	Cline 50	Hoegee 50
Vories	18	46	47
S. A. Bruner	20	47	47
Lawertuce	16	..	..
Kimble	16	..	48
Llewellyn	16	46	..
Armstrong	16	..	..
Meek	18	42	45

W. E. Patner	16	..	..

* * * *

Los Angeles Club.—Sensational scores by the women shooters featured the weekly shoot tourney at the Los Angeles Gun Club on Sunday. Mrs. Wheeler turned in the best score, 45x50. She was closely pressed by Mrs. Heine Pfirrmann with 43x50. Mrs. Mohler finished third with 40x50.

A. Arneill tied with Heine Pfirrmann in the prize shoot with 50x50. Second place was a tie between K. Mohler and C. D. Hagerman with 48x50.

A 47x50 by W. H. Cornelius captured the diamond stickpin.

Diamond Pin Shoot—

	Hdcp.	Broke
W. W. Butler	16	36x50

Double Targets—E. K. Mohler 44, H. Pfirrmann 43, P. O. Long 41, H. Cline 22, J. Arneill 18, O. Evans 19, L. R. Mellus 16, H. E. Sargent 15, W. H. Cornelius 15.

* * * *

The trapshooters of Arizona are trying to hold their tournament for the State title as late as possible. They have listed it to take place at the Phoenix Gun Club on November 13, 14 and 15.

* * * *

Following the demonstration by Mrs. Topperwein in Topeka, the women of that city have formed an auxiliary to the Topeka Gun Club. They have engaged in one ten-target match.

SIGN OF THE SAIL FISH.

"The sign of the sail fish," is a familiar expression with the fishermen off the coast of Florida. Willie Ritchie, the San Francisco boy who was the lightweight boxing champion of the world, had the pleasure of watching the signs when he paid a visit to Palm Beach several months ago. Ritchie declares that the sport of catching the gamey fish is all the rage at the fashionable resort.

"No one misses going sail fishing when paying a visit to Palm Beach," declared Ritchie the other day. "I went out on several parties and had the good fortune and the thrill of pulling in one that measured seven feet, two inches in length. There are launches especially fitted up for sail fishing that are for hire at a normal figure. There are seats arranged in the stern of the motor boat and a belt arrangement whereby the rod can be held securely. You usually go about a half-mile off-shore and then troll. There is a drag pressure on the line which speeds along on the surface of the water. All you do is to sit there and watch for the sign of the sail fish and to get a strike.

"The fish swim along the surface with their sail fin sticking out of the water. You can see these sails plainly. The fish are propelled along by the wind catching these sails. When you do get one of these big fellows on your line you have a battle landing him in the boat. They fight desperately, pulling and tugging for upwards of an hour. You need a powerful rod and line to aid you in the contest.

"There is another game fish in the florida waters that are popular with the anglers. I think they call them Amber Jack. Shark-fishing is also a pastime indulged in. I have seen shark pulled in on the Palm Beach pier that weighed from 400 to 500 pounds. Everyone goes in for fishing and some good sport was had during my visit there."

Ritchie is an enthusiast on fishing and hunting. Every year he goes up in the Tehama county mountains and puts in several weeks in quest of game. Last fall he managed to bring down a bear and a buck. He will start out in August this year and is looking forward to an interesting trip.

MANY NEW RIFLE CLUBS.

The growth of the National Rifle Association of America during five months of the year 1916 has been phenomenal.

Four hundred and forty-three Civilian Rifle Clubs, 7 College Rifle Clubs, 2 Preparatory and Military School Rifle Clubs, 31 High School Rifle Clubs have been organized during that time and have been supplied with arms and ammunition of the Krag pattern in sufficient quantity to participate in rifle practice.

This has been accomplished by one man on the job, assisted by four stenographers, an office boy and a multigraph operator backed by the advice of the N. R. A. Executive Committee consisting of ten patriotic citizens.

1082 Civilian Clubs, 71 College Clubs, 44 Preparatory and Military School Clubs, and 118 High School Clubs are now enrolled. These clubs have between 80,000 and 90,000 members all interested and learning how to handle military rifles.

Section 113 of the army reorganization bill to Encourage Rifle Practice will do much to promote rifle shooting among citizens.

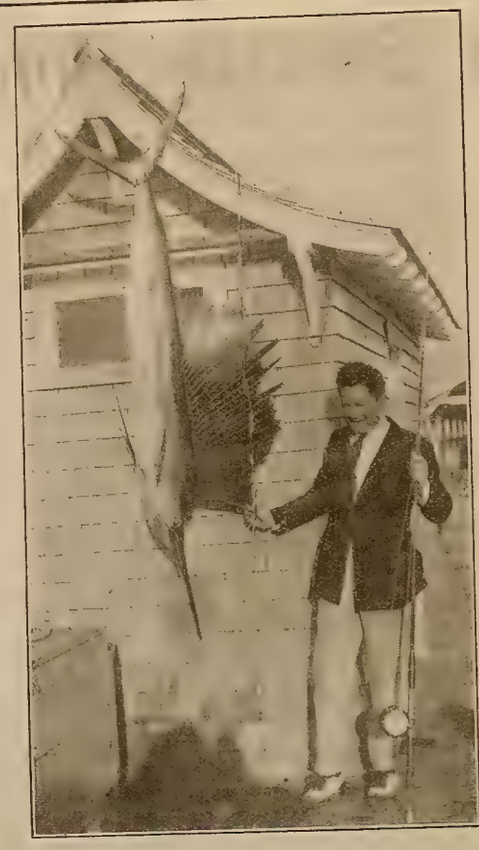
The rifle club membership offers a splendid field in time of peace from which to recruit reserves and members of civilian training camps provided for in the army reorganization bill.

In the event of war many thousand of these men trained in the use of the military arm will respond to the call to the colors.

Any effort made by you to interest citizens of your state in the organization of rifle clubs will be appreciated. Arms and ammunition will be supplied. Why not a rifle club in every county?

I will be pleased to send instructions and necessary blank forms to all who may apply for same or to such parties as you may name.

Very respectfully,
(MAJOR) FRED H. PHILLIPS, Jr.,
Assistant Recorder, N. R. A.



MANY TROUT DIE IN IRRIGATION DITCHES.

Washington, D. C.—Thorough tests of devices to prevent fish from entering irrigation ditches are to be made by Forest Service officers, who say that thousands of the trout placed in western streams by the government are killed through being carried into the ditches and washed out on the fields. There are not less than 1,200 irrigation projects on or near the National Forests, and in many places the loss of trout is very heavy. The amount of water used in irrigation, it is said, often determines the advisability of artificially stocking the streams.

The government annually plants large quantities of fish fry in the streams of the National Forests. Last year over 1,100,000 were planted in Colorado and Wyoming alone. This was done to render the forests more attractive to the puble by affordng good fishing. Where much of the water is used for irrigation, unless the ditches are screened, the trout enter and are washed out on to the fields. While fish are said to make good tertilizer, officials think that trout are too expensive to be used for that purpose.

Most of the States in the West have laws requiring that the ditches be screened, but these laws are seldom enforced. The farmers are said o dislike the screens, because they collect drift—wood and trash—which prevents the free flow of the water. Very often, too, it is stated, the farmers can supply their families with a mess of fish by collecting the trout which are found in the fields.

A number of devices for screening the ditches are in use, and while two or three have been found to be fairly satisfactory most of them are said to be unsatisfactory. It is asserted that this subject presents an excellent opportunity for inventors, since a successful screen will be sure to be widely used. Under present conditions officials are slow to recommend that the trout be placed in streams where they are apt to be led off into the irrigation ditches.

THE SIGN OF THE SAIL FISH

Willie Ritchie, former boxing champion, is pictured with one of these denizens of the deep that he caught off the coast of Florida in February. The fish measured 7 feet 2 inches in length.

COUNTRY MODEL JUDGED BEST DOG IN OAKLAND PET SHOW.

Country Model, the bulldog owned by Anton Korbel of San Francisco, was judged the best dog in the show Saturday night, at the close of the banner Oakland pet exhibition which ran three days.

Titern Tip Top, owned by Mrs. Anita Baldwin, was judged the best dog owned and exhibited by a lady exhibitor.

Other awards were to Nicholas of S. V., owned by Miss Jean Forgeus, the best American dog owned and exhibited by breeder and also best California-bred dog. The other winners were:

French bulldog—Winner dog, Vendome Bounou, owned by B. I. Bloch; winner bitch, Brackenside Fauvette, owned by Jack Bradshow.

Boston terriers—Winner dog, Arab Jr., owned by W. S. Macey; winner bitch, Tryou's Queen Adele, owned by Mrs. F. M. Tryon.

Fox terriers—Winner dog, Tallac Ted, owned by Mrs. W. T. Lalley; winner bitch, El Sur Modesty, owned by the El Sur kennels.

Fox terriers, wire—Winner dog, El Sur Spotlight, owned by El Sur kennels; winner bitch, Mulnomah Crosspatch, owned by W. B. Fiechheimer.

Selyham terriers—Winner dog, Bromley Star, owned by Mrs. John Bradshaw.

Irish terriers—Winner dog, Napper Tandy, owned by Dr. A. P. Leonard; winner bitch, Molly Make Believe, owned by Mrs. James Woods.

Scotch terriers—Winner dog, Butterscotch, owned by El Sur kennels; winner bitch, Heatherbloom, owned by James McDonald.

West Highland white terriers—Winner dog, Witchford Jock, owned by Mrs. D. O. Lively; winner bitch, Joan II, owned by Mrs. Charles Lyman.

‡ ‡ ‡

Vallejo Club.—The Vallejo Club will stage a big merchandise shoot on Sunday. Quite a number of shooters from surrounding cities are expected to put in an attendance. San Francisco will send up a delegation to join in the fun with the Vallejo boys.

SHAD RUNNING AT SACRAMENTO.

Shad are running freely at present, a fact that is being taken advantage of by many Sacramento citizens who are using dip nets to catch this fish so much favored by the epicures. As the shad travels mostly in the evening and night, in its migrations from the sea to the spawning grounds, fishers have the best success with dip nets in the evening.

The run of shad was delayed this season because of the cold weather, for the shad will not leave salt water until the temperature of the streams grows warm. Now the fish are moving freely and the state shad hatchery is busied taking the eggs.

Locally the shad is not much in demand as a food fish because few housewives have the patience to cook and serve the fish so that the bones will not bother. In the East the shad is a favorite and commands a high price, hence many tons of the California catch annually find their way across the continent.—Sacramento Union.

GOLDEN BEAVERS TO BE DRIVEN FROM HOMES

Mandeville Island, situated between Middle and Old rivers, on the lower San Joaquin, will be reclaimed this spring. Mr. Geo. Shima, the "potato king," has secured the property and will put it into potatoes. Since this island has long been the home of several colonies of golden beavers (Castor subauratus) this bit of news is of particular interest. The first step in this reclamation project will be the draining of the land and burning of the tules and undergrowth. Those beavers which escape the flames will be driven elsewhere. It is natural to expect, therefore, that there will be additional damage to levees due to the building of new burrows and that there will follow a reduction in numbers of this valuable fur-bearer.

This instance emphasizes the often cited fact that in the reclamation of land we have one of the strongest factors tending toward the extermination of wild life. To find a solution for a problem such as this is extremely difficult. A tract of land set aside as a refuge where beaver might breed unmolested appears to offer a practical solution until methods of capture and transportation are considered, when such a project immediately appears less leasible. In fact, a study of the problem tends to emphasize the hopelessness of the situation. The dollar looms large alongside of sentiment in favor of protecting wild life. So long as this viewpoint is paramount in the minds of the public the cause of wild life conservation will suffer. When sentiment comes more to the front as it did when the effort was made to save Yosemite Valley and Niagara Falls, even such obstacles as the one outlined above will be overcome.—California Fish and Game Commission.

FOREST SERVICE DISTRIBUTES MAPS TO CAMPERS.

A shipment of more than three thousand maps of the Trinity and Stanislaus National Forests was received recently at the headquarters of the Forest Service for distribution to the public, according to a report given out by the District Forester. This shipment is the first of approximately 80,000 maps of the Stanislaus, California, Trinity, Eldorado, Shasta, Plumas, Tahoe, Sierra, Sequoia and Lassen National Forests which will be available this summer for the use of campers and travelers in the above mentioned National Forests. The compilation and distribution of maps, campers' handbooks, and other literature, is in line with the intention of the Forest Service to promote a wider and more general use of all National Forest resources, and to aid the recreation seeking public in utilizing these "Playgrounds of the People."

The new recreation maps are printed in colors on the scale of one-half inch to one mile, and are very complete in detail. Trails, roads, supply stations, automobile highways, are shown. The best fishing and game regions are indicated. Forest Service headquarters, telephone stations, fire tool boxes, camp grounds, and regions of great scenic interest are marked, and much other valuable information is given. On the reverse side of the maps are printed concise histories and descriptions of the forests, with excerpts from the California Fish and Game laws, a record of the distribution of fish fry by the State Fish and Game Commission in co-operation with the Forest officers, and in some cases distance tables.

The attention of the camper is called particularly to the fact that no charge is made for entering upon or camping upon any National Forest area, nor is the camper subjected to annoyin gsurveillance on the part of Forest officers, and that other than reasonable regulations which are chiefly in respect to fire and sanitation, no restrictions are imposed.

The Billings Rod and Gun Club of Billings, Mont. has a regular shoot program that is novel and interesting, and at the same time provides a wide diversity of shooting for the members, giving them practice in handicap and double target shooting, as well as singles. The regular program consists of 50 targets, made up of five events, as follows:

25 targets at16 yards.
5 targets at 18 yards.
5 targets at 20 yards.
5 targets at 22 yards.
10 targets (5 pair) doubles.

Sportsmen's Row

Discoveries of strange animals that rival those of Roosevelt in the River of Doubt have been made in California, acording to a report by the University of California, covering the recent biological survey in Trinity, Siskiyou and Shasta counties. The publication reports the discovery of flying squirrels of a type not known until recently, an animal called the mountain beaver and a new variety of kangaroo rat. More than a thousand mammals have been placed in the California Museum of Vertebrate Zoology as a result of the survey.

* * * *

No wonder Al Durney is such a lover of the gun and rod. It has just been discovered that he is the nephew of Elmer S. Daniels, one of the pioneer sportsmen of California. Mr. Daniels for years owned the Ft. Seward horse ranch and has been interested in healthy outdoor sports.

* * * *

Jay Graham, now a professional, but in 1912 an amateur, and as such the winner of the Olympic trap shooting championship at Stockholm, Sweden, has been requested by the International Olympic Committee to return the challenge trophy that he won at that time to the American Olympic Committee, to be held until such time as these contests are renewed. This challenge prize was presented by Lord Westbury, and according to the rules under which Olympic challenge prizes are awarded, there is one which stipulates that such prizes shall be sent uninjured to the Organization Committee for the next Olympic Games before January 1, 1916. However, on account of the conditions prevailing in Europe at the present time, the International Olympic Committee desires that the American Committee retain and take charge of the said challenge prize for the present.

* * * *

Miss Lucille Meusel, of Green Bay, Wis., who is probably one of the youngest girl trapshooters we have, has a decided opinion that trapshooting is just the sport for girls. Miss Lucille is 15 years old, but she uses a 12-gauge gun and the regular 3 dram loads. She has been shooting about a year now and so well does she handle her gun, and so expert has she become, that she takes her place in the squad with the men and shoots under the same conditions.

Miss Lucille shoots at the Green Bay Gun and Game Club, and last year had an average of 78%. Her best scores have been 23x25, 21x25 and 18x20, while straight runs of 19, 17 and 12 are on record to her credit.

* * * *

The Trapshooting School on the Million Dollar Pier in Atlantic City, N. J., is turning out a lot of trapshooters these bright cheerful days. During the month of May 298 persons tried their skill with the 20-gauge guns at targets thrown over the waters of the Atlantic ocean, and of this number just one-half—149—were men who had never before shot at targets thrown from traps and in addition there were 21 women novices.

* * * *

The Amateur Trapshooters' Association now has a club membership of 595.

* * * *

At a recent tournament of the Huntington, W. Va., Gun Club, 40 employees of the Chesapeake & Ohio Railroad were given the use of the traps and the railroaders acquitted themselves creditably. Now they are going to form a club of their own.

* * * *

Not less than 1500 were fishing from the Southern California beach between Santa Monica and the southernmost limits of the Los Angeles exodus at Encinitas during Sunday a week ago, and the week-end camping party is steadily increasing in popularity as good sport becomes appreciated.

* * * *

If Robert I. Knapp of Half Moon Bay had been born three months sooner he might now be occupying a cell in the San Mateo county jail. Knapp, who is 20 years and 9 months old, was arrested by Game Warden Jack Burke for having a deer in his possession. He was brought before Justice of the Peace Johnson. The magistrate found him guilty and sentenced him to pay a fine of $50 and spend thirty days in the county jail. Upon learning that the defendant was still under age, however, the court suspended the jail sentence. Knapp paid the $50.

* * * *

The fishing season at Big Bear lake has developed a young "phenom" with rod and reel whose record this year will be hard to beat. John Merriman, 11-year-old son of Mrs. C. W. Merriman of Redlands, is the happy youngster whose first fishing season has proven him an adept at the sport. John has been at Pine Knot two weeks, and intends to spend the entire summer there. He had never before tried trout fishing, but when he saw the string of Bear Lake beauties which the older anglers bring in every morning, he immediately started making catches.

* * * *

Mr. Arthur E. Grafton, Jr., of Tacoma, Wash., purchased that fine winning bitch, Champion Soo Flora-dora, from Mr. W. S. Bartley, San Francisco, last month.

Trapshooters, attention! Get ready for the 1916 Grand American Handicap Trapshooting Tournament scheduled for St. Louis, August 21st, 22d, 23d, 24th and 25th. The St. Louis boys say "watch us, we are going to give you this year the biggest and best Grand American Handicap ever." St. Louis usually does as she says she will, so look out. Plan your vacation so you can take in the Grand American Handicap. Tell your shooter friends about it. Get them to go along. If the Grand American Handicap has a thousand entries you'll be sorry you missed it. Go, then, everybody, and it will have more than a thousand. Do it yourself. Don't leave it to George. We repeat—go to the Grand American Handicap this year.

* * * *

A 13-pounder (Native trout) caught off the Lake Tahoe Tavern pier by Mr. Jno. Adams of Boston.

* * * *

Several trout of the Silver variety have been taken between Cornelian Bay and Brockway in the shallow water by Ralph Lowe of San Jose. Lowe has been coming to the Lake for the last 25 years and it was he who won the Linnard cup last year for having landed the biggest fish during the season. He averages two big fish a day ranging in weight from five to ten pounds. He uses a 7½ oz. rod and spinner.

* * * *

Chas. Sutro of San Francisco, who is staying at the Tavern with his mother, went over to Glenbrook and landed a 16-pounder on the rod. This is the largest fish taken so far this season. Sutro was so enthusiastic that he remained over at Glenbrook(hoping to get some more big fellows.

* * * *

Woolfolk Henderson had anything but good fortune in the Kentucky state tournament. He won the high average with 394 breaks in 400 targets; broke 100 straight in the Caskey cup match; 99 in the Kentucky Trapshooters' Association championship; broke 197 out of 200 each day, and yet did not win the State championship. He broke 97 out of 100 in this and lost to J. D. Gay, who broke 98. These three misses were the only ones that Henderson had on the second day.

* * * *

In the New Jersey championship tournament Cleve Speer broke 99 targets according to the referee, but Speer thinks he should have been given a clean score, asserting that he broke his 95th bird, which the referee decided was a miss.

NORTHWESTERN PACIFIC PUBLISHES FOLDER ON FISHING.

The Northwestern Pacific Railroad has added another to its issues of attractive advertising literature in the form of a fifteen-page, illustrated folder devoted exclusively to its line in Northern California. The half-tone cuts depict scenes along river, lake, mountain and marsh, with fish and game in alluring evidence. It also contains an admirable map of the line, which shows in detail streams and roads adjacent, and contains a list of resorts and lodges that cater to the huntsman and angler. The thoroughness with which the varieties of fishing, the seasons and locations, are set forth in this publication is a credit to the Northwestern Pacific.

* * * *

Trade Notes.—John C. Martin of Harrisburg, Penn., has been attracting the attention of shooters all over the State lately, by excellent shooting form. On June 3rd at Allentown, Mr. Martin started a run of 38 unfinished. At Catawissa on June 6th, he brought this run up to 150 with still more to go and put the finishing touches on at Newmanstown on June 10th, when he brought the grand total up to 229 straight. With this sort of a start, the season ought to be a big one for Mr. Martin, who is shooting "Arrows" throughout.

Scores of 100 straight are not unusual, but when two State Championships are won with perfect scores it makes us sit up and take notice, and that is just what H. J. Pendergast and R. A. King did. These gentlemen, both of whom shot Nitro Club shells, won the New York and Colorado classics respectively. Mr. King was also high amateur with 489x500 and high on all targets with 620x650.

The Michigan State Championship was won by Joseph Bryant, of Battle Creek, shooting a Remington pump gun and Nitro Clubs. Bryant also won high amateur average, 340x350; 2nd, Robt. Bock, 333x350; 3rd, C. A. Galbraith, 331x350, both using the same Perfect Shooting Combination employed by Mr. Bryant.

OLYMPIC CLUB HAS CRACK SHOTS.

Breeder and Sportsman:

The Olympic Club Pistol and Rifle Team reported at Fort Barry Sunday, June 18th, for the annual individual qualification shoot and Members' Match with the military rifle.

Samuel T. Rodgers won the Members' Match with a score of 137 out of 150, and will be awarded the medal issued by the War Department.

The following members qualified as Expert Riflemen: V. D. Cousins, C. W. Linder, R. Mills, W. C. Prichard, S. T. Rodgers, G. L. Scoville, C. T. Blanck and Robert Staats. As Sharpshooters: W. F. Blasse, J. D. Millikin. As Marksman: C. W. Randall.

Mr. C. F. Williams of the San Francisco Telephone Rifle Club won the expert rating also and Mr. Frank Payne of the Los Angeles Rifle Club Team received the marksman rating.

Decorations for all of the qualified men will be furnished by the War Department. This is a phenomenal performance for so many men to qualify as experts out of a total of twelve Olympians and two guests participating. These men are now prepared to serve as instructors to the new recruits in National Guard and Volunteer organizations in the event that their services are desired. They are now also ready to meet all comers in military matches, under any conditions. Yours truly,

OLYMPIC CLUB RIFLE & PISTOL TEAM,
V. D. COUSINS, Secretary.

CALIFORNIA STATE CIVIL SERVICE EXAMINATION.

Deputy Fish and Game Commissioner.

The California State Civil Service Commission announces an examination for Deputy Fish and Game Commissioner, to be held at the places and on the dates announced below, to provide separate registers of eligibles from which to fill positions for the three administrative districts of the State Fish and Game Commission. The entrance salaries range from $90 to $100 a month with traveling expenses.

Place.	Date.
San Francisco,	June 23-24, 1916

Fresno,	July 1, "
San Diego,	July 3, "
Los Angeles,	July 5, "
Santa Barbara,	July 7, "
Eureka,	July 10, "

This examination is open to all American citizens who will have resided in California for a period of one year at the time of the examination, who are between the ages of 23 and 45 on the date of the examination and who are in good physical condition.

The subjects for the examination will be as follows:

	Relative Weight.
1. Interpretation of the Game Laws.....	15
This will consist of the application of fish and game laws to hypothetical cases. During this part of the examination, candidates will be allowed to refer to copies of the fish and game laws. (Free copies of these laws can be secured from the State Fish and Game Commission, New Call Bldg., San Francisco, Forum Bldg., Sacramento, and Union League Bldg., Los Angeles).	
2. Knowledge of Duties	15
Under this head, questions will be asked to draw out the candidate's knowledge of what constitutes a violation of the law, of methods of dealing with violators, making arrests, gathering and preparing evidence, and of presenting cases to justices of the peace.	
3. Practical Knowledge of Fish and Game Districts	15
This subject will require a knowledge of the fish and game and of the methods and implements of fishing and hunting in the various fish and game districts, together with the fish and game laws especially applicable to these districts.	
4. Education, Experience and Personality...	55
Under this head, candidates will be given credit for any education and experience that will fit them for the duties of the position to be filled. Ratings under this subject will be given by a special Board of Examiners designated for the purpose by the Civil Service Commission. At the time of the oral examination which this Board will conduct, candidates will be required to identify specimens of fish and game and will be classified for service in one of the three administrative districts in accordance with their knowledge of the fish and game and the special conditions of that district.	
Total.	100

In the morning, candidates will be given the oral examination as to their experience and fitness and general knowledge of California fish and game, and will be tested as to their ability to identify specimens. From the showing made at this examination, candidates will be classified for mountain, coast or bay service. Only those candidates who qualify in this portion of the examination will be given the written test in the afternoon.

Candidates who fail to secure an average rating of 70% in the written test and a final average rating of 70% will be considered as having failed in the examination.

Persons desiring to enter this examination should apply at once to the State Civil Service Commission, Forum Bldg., Sacramento, for application form No. 2, stating the name of the examination for which they are applying.

STATE CIVIL SERVICE COMMISSION.

In keeping with the order of the tournament Dick Reed with his Remington Pump and Nitro Club pounded out the high general average of 571x600 and also recorded the highest score made in the double target event, 46x50.

THE FARM

AGAIN BREAKS WORLD'S RECORD.

Again a yearling world's record has been broken by a Pacific Coast cow; this time by the wonderful junior four-year-old cow, Forward Somerset Duchess, who today holds no less than three world's records, all made during one lactation period.

Forward Somerset Duchess freshened in January, 1915, as a junior four-year-old, and made a seven-day record of 28.308 pounds of butter from 825.4 pounds of milk; for 30 days she bave 106.510 pounds of butter from 2840.1 pounds of milk; her milk production for both seven and 30 days being world's records. She was then continued on official test for one year, being the second cow of the breed in the United States to be tested officially for an entire year. Eight months after calving, in August, 1915, her production was 18.597 pounds of butter from 493.8 pounds of milk in seven days.

On January 28, 1916, Forward Somerset Duchess closed her year's official test with a total production of 1016.805 pounds of butter from 28,556.1 pounds of milk, making a wonderful world's milk record as a junior four-year-old, increasing the former world's record by 195.1 pounds of milk, which has been held by Newlinhurst America De Kol.

Forward Somerset Duchess is sired by Forward Prince Cornucopia, grandson of Aggie Cornucopia Johanna Lad. She is from Somerset Schuiling, whd has a record of 24.025 pounds of butter in seven days.

Forward Somerset Duchess is owned by the Carnation Stock Farms, Seattle, Wash., and was bred by A. P. Warren, Elizabeth, Pa.

Silage Welcome in Winter.—Silage furnishes a succulent and ready available food for cows and sheep during the winter months when succulent food is unobtainable, making the farmer less dependent upon the weather. A few of the many advantages of the silo which are brought out in a Department circular are as follows:

1—It preserves green feed, such as Indian corn, sorghums, grain, alfalfa, clover, pea vines, etc., supplying a juicy food all the year round.

2—It gives a certain acidity to the food which makes it palatable, and has a beneficial effect on the digestive system of the animal.

3—It saves barn room.

Overfed Turkeys.—Avoid overfeeding turkey breeding stock during the winter, so that they are moderately thin by spring. The bill of fare should contain less corn and more oats, wheat and clover.

THE BEST LINIMENT
OR PAIN KILLER FOR THE HUMAN BODY
Gombault's
Caustic Balsam
IT HAS NO EQUAL

For the Human Body — It is penetrating, soothing and healing, and for all Old Sores, Bruises, or Wounds, Felons, Exterior Cancers, Boils, Corns and Bunions, CAUSTIC BALSAM has no equal as a Liniment.

We would say to all who buy it that it does not contain a particle of poisonous substance and therefore no harm can result from its external use. Persistent, thorough use will cure many old or chronic ailments and it can be used on any case that requires an outward application with perfect safety.

For Greatest Satisfaction Use
DOUBLE SERVICE
Automobile Tires
Guaranteed 7,000 Miles Service
Absolutely Punctureproof
Double Service Tires are made double the thickness of the best standard make tires.
This 100% greater wearing surface naturally gives that much more mileage and service. The average of 12 miles of tough fabric and one inch surface tread rubber makes these tires *absolutely punctureproof.*
These tires excel all others for use in the country over rough and rugged roads as well as on hard pavements. They are as easy riding and resilient as any other pneumatic tire—the air space and pressure being the same.
They are the *most economical* and "care free" tires made and are used where tires must be depended on and tire troubles cannot be tolerated. Many *Double Service* style tires are in use in the U. S. government and European War service.
Our output is limited to a certain amount, but for a short time we offer the following reduced special prices as an Introductory Offer:
PRICES

	Tires	Tubes		Tires	Tubes
30x3 in.	$ 8.60	$2.30	36x4 in.	$17.45	$4.65
30x3½ in.	10.85	3.10	35x4½ in.	21.20	5.60
32x3½ in.	12.75	3.20	36x4½ in.	22.50	5.75
33x4 in.	16.75	4.20	37x4½ in.	23.60	6.20
34x4 in.	16.70	4.35	37x5 in.	26.30	6.60

All other sizes not included in above list also furnished. Non-skids at 10% additional.
Terms: Payment with order at above special prices, a 10% discount allowed on orders for two or more tires. All personal checks must be certified.
Try these tires now and be convinced of their very high qualities. Sold direct to the consumer only.
Descriptive folder upon request. Write for it.

FAMOUS TROUT STREAMS

Steelhead fishing in the Big Lagoon, Humboldt County, is now in full swing. The fish this year average from nine to twelve pounds.

Do not overlook the Eel River Fly Fishing for the Big Steelhead from July until October in the famous Greigs, Fortuna, Van Duzen and Weymouth pools—fresh run fish that weigh from nine to twenty-five pounds—light tackle—excellent resorts close by—only ten hours from San Francisco.

The fishing streams that are found so profusely in the new territory north of Willits embracing Humboldt, Trinity and Mendocino Counties offer the best of coast stream trout fishing. If you want to fish, go where the fish are.

LOW EXCURSION RATES

RACE TRACK FOR SALE.
The Ukiah race track, located a little less than a mile from the Court House at Ukiah and bounded by the State Highway on the west, the county road on the south, and the Northwestern Pacific Railroad nearly the entire length on the east side of the track. The property consists of twenty acres. Fifty-nine good box stalls, good grandstand, fencing in good order, and one of the best half mile tracks in the state. An excellent winter track and an ideal place to work horses during that season. Plenty of adjoining drives for jogging horses. Two wells on the premises as well as water from the city water works, with tanks conveniently arranged for sprinkling.
This is the only race track in Mendocino county and the location of the county fairs. Ukiah is the county seat and has a population of about 3000, is in a most fertile valley in which all kinds of fruit, vegetables, hay, grain and hops are grown. Has excellent water; no malaria or mosquitos. It has paved streets, good sewerage, and splendid gas and electric light works. There are many standard and thoroughbred horses in this county and the people are a race loving lot. This property is offered for sale at a less price than adjoining property is held at. For terms and further particulars address
F. W. KELLEY,
Care of Breeder and Sportsman.

FARMS FOR SALE
Choice Land in Idaho
Lewiston, Idaho, is situated at the forks of Clearwater and Snake rivers and has transportation to the coast.
960 acres 7½ miles from Lewiston, Idaho, 4½ from Lapwai, Idaho, on main traveled road, all in cultivation except about 15 acres, all level land, just a little rolling, 320 acres of fall wheat in, 225 acres fall plowed for spring crop, about 30 acres in alfalfa. All fenced and cross fenced. Two good springs with big cement water troughs, well, windmill and cement reservoir, water piped to house, 7 room house, hot and cold water and electric lights. Large horse barn with hay mow in the center, electric lights in barn; cow barn with two box stalls; hog pens, shade trees, chicken houses, blacksmith shop, wagon shed, granary, outdoor cellar with bunk house overhead. $85 per acre; will take one-third down, time on balance to suit purchaser, at 7 per cent interest. One-third of crop goes with place if sold any time up close to harvest. Mild climate, can raise all kinds of fruit, grain and vegetables. Wheat in this country goes from 35 to 65 bushels per acre, barley 40 to 80 bushels per acre.
320 acres 4½ miles south of Vollmer, Idaho, 275 acres in cultivation, balance in pasture and timber, farm land lays practically level, one-third of crop goes with place if sold before harvest. Some fall wheat already sown. All fenced and cross fenced. Quarter section of it fenced hog tight; good four-room house, wood shed, and out of door cellar, nice grove around house, well at house, fair stabling and out buildings, spring and spring creek close to barn, three springs on place. Price $70 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.
238 acres 4½ miles from Lewiston, Idaho, 175 acres in cultivation, 25 more can be cultivated, balance good bunch grass pasture, fenced and cross-fenced, good spring creek runs across place, small house, station on place for Johnson R. R., two grain warehouses at station. Price $70 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.
160 acres of timber land, good farm land when timber is cleared off, all can be farmed except about 2 or 3 acres. Good timber, yellow pine and fir. Price $4000. 40 miles from Lewiston, Idaho. Well located to log off.
240 acres 6 miles from Asotin, 12 miles from Lewiston, Idaho, about 75 acres in fall wheat, about 75 acres more can be cultivated, balance in bunch grass pasture, two springs, small house, all fenced. Price $40 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

A horse distancing the field shall be entitled to first money only.

Right is reserved to declare off any race that does not fill satisfactory, and to change the hour and day of any race except to antedate a race, in which case nominators will receive three days' notice by mail to address of entry.

The Association reserves the right to have any heat started after the second regardless of position of horses.

All races limited to three heats.

C. G. EBERHART, Secretary,
P. O. Box 946, Fresno, Cal.

BEAUTIFUL BELVEDERE

LOTS FOR SALE

CORINTHIAN ISLAND Subdivision to Belvedere is the most beautiful spot on the shores of San Francisco Bay for a suburban home. It commands an extensive view of the City of San Francisco, Alcatraz and Angel Islands, Raccoon Straits, San Francisco Bay, Richardson's Bay, the Berkeley shore, beautiful Belvedere and Mt. Tamalpais. It is in Marin County, directly opposite San Francisco, and forms the eastern shore of Belvedere cove. It has a naturally terraced, sunny, western slope that is well adapted for many choice residence sites, every one affording most picturesque views of the bay and mountain. It is protected from the prevailing western trade winds in summer by Belvedere Island, and from the southerly storms in winter by Angel Island. The soil is fertile and part of the island is well wooded.

It is less subject to fog than any other place near San Francisco. The summer fog, as it rolls in from the ocean, splits on the western slope of Sausalito, part of it flowing in a line with Angel Island towards the Berkeley shore, and part of it along the southern slope of Mt. Tamalpais, leaving Belvedere, Corinthian Island and Raccoon Straits in the bright sunlight, while the fog banks can be seen as a white wall both to the north and the south.

There is very little available land about the shores of San Francisco Bay that is desirable for homes, especially for those who love boating and kindred sports. The Alameda and Contra Costa shores of the bay are the lee shores and receive the full brunt of the boisterous trade winds which lash the shoal waters near the land into muddy waves, making boating both unpleasant and dangerous. To the north of the city and in Marin County the land from Sausalito to the entrance of the bay is a Government reservation and will never be placed on the market. The shores of Richardson's Bay are not at present convenient to boat service and, aside from Belvedere and Corinthian Island, there is little or no land near any ferry landing that possesses the natural advantages, improvements and possibilities that are offered on Corinthian Island. Concrete roads, pure water, telephone service and electric light wires are already installed. It is only ten minutes' walk from any point on the property to Tiburon boats, and but forty-three minutes' ride to the foot of Market Street.

On the point of Corinthian Island the Corinthian Yacht Club has had its home for many years, and on any summer day the white sails of its numerous fleet add to the charming scene, as the trim yachts glide about the cove. Excellent fishing of all kinds for bay fish, including salmon, the gamey striped bass, rock fish and the toothsome silver smelt, is to be had in the cove. There is probably no spot so accessible and in such close proximity to any large city in the world that offers the attractions of climate, magnificent scenery, fishing and boating as will here be found.

...al Agricultural Society Will Give the Following TWO-YEAR-OLD RACES At The California State Fair

Sacramento, Sept. 2nd to 9th, inclusive

2 Year Old Trot.....$500.00 2 Year Old Pace.....$500.00

ENTRIES CLOSE JULY 1, 1916

ENTRANCE AND PAYMENTS:—2 per cent July 1st, 1 per cent August 1st, and 2 per cent before 5 o'clock the night before the race.

CONDITIONS

Races will be mile heats, 2 in 3, not to exceed three heats, and if not decided in two heats, will be finished at the end of the third heat and money divided according to rank in summary. Money divided 50, 25, 15 and 10 per cent.

Nominators have the right of entering two or more horses in any race by the payment of 2 per cent additional on each horse, but only one of the horses so entered to be started in the race, and the starter is to be named by 5 o'clock P. M. the day before the race is to take place. Usual 5 per cent additional from money winners.

The Society reserves the right to declare two starters a walkover. When only two start they may contest for the entrance money paid in, divided 66 2-3 per cent to the first, and 33 1-3 per cent to the second horse. A horse distancing the field shall be entitled to first and fourth money only and in no other case will a horse be entitled to more than one money.

Distance 150 yards.

The Society reserves the right to change the hour and day of any race, except when it becomes necessary to antedate a race, in which instance the nominators will receive three days' notice by mail to address of entry.

The right reserved to reject any or all entries and declare off or postpone any or all races on account of weather or other sufficient cause.

Entries not declared out by 5 o'clock P. M. the day preceding the race shall be required to start and declaration must be in writing and made at the office of the Secretary at the track.

SWINE

Big profit should come from your hogs. If you fail to make money something is wrong. Professor Day has an international reputation and his knowledge set forth in PRODUCTIVE SWINE HUSBANDRY gives you just the facts to make your pig pens money producers. Millions of dollars have been spent in experimenting and the author gives you the results. It is practical, not theoretical, of absolute necessity, not superfluous. You must learn the practical money-making science of raising hogs for the market.

There are 95 illustrations and 363 pages. Lg. 8vo. Handsome cloth. $1.50 net. Postage and express charges extra.

AN HOUR each week at the traps is an investment that pays big dividends in increased vim and efficiency.

Trapshooting

is a pleasant tonic for every tired-out, brain-fagged, business man. The whir of the clay birds—their subtle challenge to your gun skill—makes an alluring sport that eases and benefits both your mind and body. Costs less per year, club membership included, than any other popular sport.

THE PETERS CARTRIDGE CO., PACIFIC COAST BRANCH . . . . **585-587 Howard Street, SAN FRANCISCO, CAL.**

Rifles should always be cleaned from the breech, thus avoiding any possible injury to the muzzle. Any injury to the rifling at the muzzle will affect the shooting adversely. If the bore for a length of 6 inches at the muzzle is perfect, a minor injury near the chamber will have little effect on the accuracy of the rifle

Extract from U.S. Govt. Small Arms Firing Manual

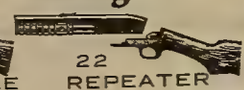
One Big Reason For Take-Down Construction in Remington UMC Firearms

AUTOLOADING SHOTGUN

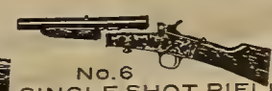
PUMP SHOTGUN

BIG GAME AUTOLOADING RIFLE

GAME SLIDE ACTION RIFLE



There are many reasons why Remington UMC shotguns andrifles are designed on the take-down principle. The most important reason, however, is that the accuracy life of all firearms is prolonged when cleaning is done from the breech instead of from the muzzle. Remington UMC take-down makes cleaning from the breech easier—thereby suggesting and encouraging this only proper cleaning method.



The Small Arms Firing Manual of the United States Army developed by trained men with years of experience to back up their opinions, advocates cleaning from the breech, as shown in the extract reproduced in the upper left hand corner of this advertisement. The importance to you of having a rifle or shotgun of the take-down type is at once apparent.

WINCHESTER

.22 CALIBER AUTOMATIC RIFLE

THE DOPE FOR PESTS

It's hard for anything to get away from the Winchester .22 Automatic Rifle, as, owing to its being loaded by the recoil, it can be fired rapidly with accuracy. This makes it exceedingly effective against pests of all kinds. It is a ten-shot repeater, light and well-balanced, strong in construction, and safe and sure in operation. It is at all times under control, as the trigger has to be pulled for each shot. It is readily taken down, and easy to keep clean and in good working order. A rifle that is a great sport maker, fascinating to shoot and sure to get the game or hit the target. It lists at $25.00 and is sold by all dealers for less.
